Procedural Stage: Judgment, Preliminary Objections

Previous Procedural Stage(s):
Order, Provisional Measures; *Land and Maritime Boundary between Cameroon and Nigeria, Cameroon v Nigeria,* (1996) ICJ Rep 13, 15 March 1996

Subsequent Development(s):
Order, Counter–Claims; *Land and Maritime Boundary between Cameroon and Nigeria, Cameroon v Nigeria,* (1999) ICJ Rep 983, 30 June 1999
Order, Intervention; *Land and Maritime Boundary between Cameroon and Nigeria, Cameroon v Nigeria: Equatorial Guinea intervening,* (1999) ICJ Rep 1029; ICGJ 62 (ICJ 1999), 21 October 1999
Judgment, Merits; *Land and Maritime Boundary between Cameroon and Nigeria, Cameroon v Nigeria: Equatorial Guinea intervening,* (2002) ICJ Rep 303; ICGJ 63 (ICJ 2002), 10 October 2002

Related Development(s):
Judgment, Preliminary Objections; *Request for Interpretation of the Judgment of 11 June 1998 in the* Case concerning the Land and Maritime Boundary between Cameroon and Nigeria. Cameroon v Nigeria, Preliminary Objections; *Nigeria v Cameroon,* (1999) ICJ Rep 31; ICGJ 55 (ICJ 1999), 25 March 1999

Subject(s):

International courts and tribunals, procedure — Good faith — Estoppel — Delimitation — Treaties, observance — Treaties, reservations and declarations — Boundaries — Territory, title

Core Issue(s):

Whether the Court has jurisdiction to hear the dispute, in light of Nigeria's preliminary objections that Cameroon violated its legal obligations to act in good faith in filing its Application and that the Lake Chad Basin Commission had exclusive competence to settle the boundary dispute in question.

Whether Cameroon's Application was admissible, considering Nigeria's preliminary objection that it

as Secretary.

The Court,

composed as above,

after deliberation,

delivers the following Judgment:

1. On 29 March 1994, the Government of the Republic of Cameroon (hereinafter called "Cameroon") filed in the Registry of the Court an Application instituting proceedings against the Government of the Federal Republic of Nigeria (hereinafter called "Nigeria") in respect of a dispute described as "relat[ing] essentially to the question of sovereignty over the Bakassi Peninsula". Cameroon further stated in its Application that the "delimitation [of the maritime boundary between the two States] has remained a partial one and [that], despite many attempts to complete it, the two parties have been unable to do so". It accordingly requested the Court, "in order to avoid further incidents between the two countries, … to determine the course of the maritime boundary between the two States beyond the line fixed in 1975". In order to found the jurisdiction of the Court, the Application relied on the declarations made by the two Parties accepting the jurisdiction of the Court under Article 36, paragraph 2, of the Statute of the Court.

2. Pursuant to Article 40, paragraph 2, of the Statute, the Application was immediately communicated to the Government of Nigeria by the Registrar.

3. On 6 June 1994, Cameroon filed in the Registry an Additional Application "for the purpose of extending the subject of the dispute" to a further dispute described in that Additional Application as "relat[ing] essentially to the question of sovereignty over a part of the territory of Cameroon in the area of Lake Chad". Cameroon also requested the Court, in its Additional Application, "to specify definitively" the frontier between the two States from Lake Chad to the sea, and asked it to join the two Applications and "to examine the whole in a single case". In order to found the jurisdiction of the Court, the Additional Application referred to the "basis of … jurisdiction … already … indicated" in the Application instituting proceedings of 29 March 1994.

4. On 7 June 1994, the Registrar communicated the Additional Application to the Government of Nigeria.

5. At a meeting which the President of the Court held with the representatives of the Parties on 14 June 1994, the Agent of Nigeria stated that he had no objection to the Additional Application being treated, in accordance with the wish expressed by Cameroon, as an amendment to the initial Application, so that the Court could deal with the whole in a single case. By an Order dated 16 June 1994, the Court indicated that it had no objection itself to such a procedure, and fixed 16 March 1995 and 18 December 1995, respectively, as the time–limits for the filing of the Memorial of Cameroon and the Counter–Memorial of Nigeria.

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

6. Pursuant to Article 40, paragraph 3, of the Statute, all States entitled to appear before the Court were notified of the Application.

7. Cameroon duly filed its Memorial within the time–limit prescribed in the Court's Order dated 16 June 1994.

8. Within the time–limit fixed for the filing of its Counter–Memorial, Nigeria filed preliminary objections to the jurisdiction of the Court and the admissibility of the Application. Accordingly, by an Order dated 10 January 1996, the President of the Court, noting that, under Article 79, paragraph 3, of the Rules of Court, the proceedings on the merits were suspended, fixed 15 May 1996 as the time–limit within which Cameroon might present a written statement of its observations and submissions on the preliminary objections.

Cameroon filed such a statement within the time–limit so prescribed, and the case became ready for hearing in respect of the preliminary objections.

9. Since the Court included upon the Bench no judge of the nationality of the Parties, each Party exercised its right under Article 31, paragraph 3, of the Statute of the Court to choose a judge *ad hoc* to sit in the case: Cameroon chose Mr. Kéba Mbaye and Nigeria chose Mr. Bola Ajibola.

10. By a letter dated 10 February 1996 and received in the Registry on 12 February 1996, Cameroon submitted a request for the indication of provisional measures under Article 41 of the Statute. By an Order dated 15 March 1996, the Court, after hearing the Parties, indicated certain provisional measures.

11. By various communications, Cameroon stressed the importance of a speedy disposal of the case; it also filed, under cover of a letter dated 9 April 1997, a document with annexes entitled "Memorandum of the Republic of Cameroon on Procedure". Nigeria made known its views on the latter communication in a letter dated 13 May 1997.

12. By a letter dated 2 February 1998, Nigeria sought to introduce a volume of documents entitled "Supplemental Documents (Lake Chad Basin Commission Proceedings)". By a letter dated 16 February 1998, the Agent of Cameroon indicated that Cameroon did not oppose their introduction. The Court admitted the said documents pursuant to Article 56, paragraph 1, of the Rules of Court.

13. By a letter dated 11 February 1998, the Agent of Cameroon sought to introduce certain "new documents relating to events occurring since the filing of the Memorial" of Cameroon, and "moreover requested the Court to consider the annexes to the [Memorandum of April 1997] as an integral part of the proceedings". Having considered the views expressed by Nigeria in its above–mentioned letter of 13 May 1997 (see paragraph 11 above) and in its letter of 24 February 1998, the Court admitted the documents pursuant to the provisions of Article 56 of its Rules.

14. In accordance with Article 53, paragraph 2, of its Rules, the Court decided to make accessible to the public, on the opening of the oral proceedings, the preliminary objections of Nigeria and the written statement containing the observations and submissions of Cameroon on the objections, as well as the documents annexed to those pleadings.

15. Public sittings were held between 2 March and 11 March 1998, at which the Court heard the oral arguments and replies of:

For Nigeria: H.E. the Honourable Alhaji Abdullahi Ibrahim,

Mr. Richard Akinjide,

Mr. Ian Brownlie,

Sir Arthur Watts,

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

Mr. James Crawford.

For Cameroon: H.E. Mr. Laurent Esso,

Mr. Douala Moutomé,

Mr. Maurice Kamto,

Mr. Peter Ntamark,

Mr. Joseph–Marie Bipoun Woum,

Mr. Alain Pellet,

Mr. Michel Aurillac,

Mr. Jean–Pierre Cot,

Mr. Keith Highet,

Mr. Malcolm N. Shaw,

Mr. Bruno Simma,

Sir Ian Sinclair,

Mr. Christian Tomuschat.

At the hearings, a Member of the Court put a question to the Parties, who answered in writing after the close of the oral proceedings.

*

16. In its Application, Cameroon made the following requests:

> "On the basis of the foregoing statement of facts and legal grounds, the Republic of Cameroon, while reserving for itself the right to complement, amend or modify the present Application in the course of the proceedings and to submit to the Court a request for the indication of provisional measures should they prove to be necessary, asks the Court to adjudge and declare:
>
> (a) that sovereignty over the Peninsula of Bakassi is Cameroonian, by virtue of international law, and that that Peninsula is an integral part of the territory of Cameroon;
>
> (b) that the Federal Republic of Nigeria has violated and is violating the fundamental principle of respect for frontiers inherited from colonization *(uti possidetis juris)*;
>
> (c) that by using force against the Republic of Cameroon, the Federal Republic of Nigeria has violated and is violating its obligations under international treaty law and customary law;
>
> (d) that the Federal Republic of Nigeria, by militarily occupying the Cameroonian Peninsula of Bakassi, has violated and is violating the obligations incumbent upon it by virtue of treaty law and customary law;
>
> (e) that in view of these breaches of legal obligation, mentioned above, the Federal Republic of Nigeria has the express duty of putting an end to its military presence in Cameroonian territory, and effecting an immediate and unconditional withdrawal of its

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

troops from the Cameroonian Peninsula of Bakassi;

(e') that the internationally unlawful acts referred to under *(a)*,*(b)*,*(c)*,*(d)* and *(e)* above involve the responsibility of the Federal Republic of Nigeria;

(e") that, consequently, and on account of the material and non–material damage inflicted upon the Republic of Cameroon, reparation in an amount to be determined by the Court is due from the Federal Republic of Nigeria to the Republic of Cameroon, which reserves the introduction before the Court of [proceedings for] a precise assessment of the damage caused by the Federal Republic of Nigeria.

(f) In order to prevent any dispute arising between the two States concerning their maritime boundary, the Republic of Cameroon requests the Court to proceed to prolong the course of its maritime boundary with the Federal Republic of Nigeria up to the limit of the maritime zones which international law places under their respective jurisdictions."

17. In its Additional Application, Cameroon made the following requests:

"On the basis of the foregoing statement of facts and legal grounds, and subject to the reservations expressed in paragraph 20 of its Application of 29 March 1994, the Republic of Cameroon asks the Court to adjudge and declare:

(a) that sovereignty over the disputed parcel in the area of Lake Chad is Cameroonian, by virtue of international law, and that that parcel is an integral part of the territory of Cameroon;

(b) that the Federal Republic of Nigeria has violated and is violating the fundamental principle of respect for frontiers inherited from colonization *(uti possidetis juris)*, and its recent legal commitments concerning the demarcation of frontiers in Lake Chad;

(c) that the Federal Republic of Nigeria, by occupying, with the support of its security forces, parcels of Cameroonian territory in the area of Lake Chad, has violated and is violating its obligations under treaty law and customary law;

(d) that in view of these legal obligations, mentioned above, the Federal Republic of Nigeria has the express duty of effecting an immediate and unconditional withdrawal of its troops from Cameroonian territory in the area of Lake Chad;

(e) that the internationally unlawful acts referred to under *(a)*,*(b)*,*(c)* and *(d)* above involve the responsibility of the Federal Republic of Nigeria;

(e') that consequently, and on account of the material and non–material damage inflicted upon the Republic of Cameroon, reparation in an amount to be determined by the Court is due from the Federal Republic of Nigeria to the Republic of Cameroon, which reserves the introduction before the Court of [proceedings for] a precise assessment of the damage caused by the Federal Republic of Nigeria.

(f) That in view of the repeated incursions of Nigerian groups and armed forces into Cameroonian territory, all along the frontier between the two countries, the consequent grave and repeated incidents, and the vacillating and contradictory attitude of the Federal Republic of Nigeria in regard to the legal instruments defining the frontier between the two countries and the exact course of that frontier, the Republic of Cameroon respectfully asks the Court to specify definitively the frontier between Cameroon and the Federal Republic of Nigeria from Lake Chad to the sea."

18. In the written proceedings, the Parties presented the following submissions:

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

On behalf of the Government of Cameroon,

in the Memorial:

"The Republic of Cameroon has the honour to request that the Court be pleased to adjudge and declare:

(a) That the lake and land boundary between Cameroon and Nigeria takes the following course:

— from the point at longitude 14°04′59″ 9999 E of Greenwich and latitude 13°05′00″0001 N, it then runs through the point located at longitude 14°12′11″7 E and latitude 12°32′17″4 N;

— thence it follows the course fixed by the Franco–British Declaration of 10 July 1919 , as specified in paragraphs 3 to 60 of the Thomson–Marchand Declaration , confirmed by the Exchange of Letters of 9 January 1931, as far as the 'very prominent peak' described in the latter provision and called by the usual name of 'Mount Kombon';

— from Mount Kombon the boundary then runs to 'Pillar 64' mentioned in paragraph 12 of the Anglo–German Agreement of Obokum of 12 April 1913 and follows, in that sector, the course described in Section 6 (1) of the British Nigeria (Protectorate and Cameroons) Order in Council of 2 August 1946 ;

— from Pillar 64 it follows the course described in paragraphs 13 to 21 of the Obokum Agreement of 12 April 1913 as far as Pillar 114 on the Cross River;

— thence, as far as the intersection of the straight line joining Bakassi Point to King Point and the centre of the navigable channel of the Akwayafe, the boundary is determined by paragraphs 16 to 21 of the Anglo–German Agreement of 11 March 1913 .

(b) That notably, therefore, sovereignty over the Peninsula of Bakassi and over the disputed parcel occupied by Nigeria in the area of Lake Chad, in particular over Darak and its region, is Cameroonian.

(c) That the boundary of the maritime zones appertaining respectively to the Republic of Cameroon and to the Federal Republic of Nigeria follows the following course:

— from the intersection of the straight line joining Bakassi Point to King Point and the centre of the navigable channel of the Akwayafe to 'point 12', that boundary is determined by the 'compromise line' entered on British Admiralty Chart No. 3343 by the Heads of State of the two countries on 4 April 1971 (Yaoundé Declaration) and, from that 'point 12' to 'point G', by the Declaration signed at Maroua on 1 June 1975;

— from point G that boundary then swings south–westward in the direction which is indicated by points G, H, I, J and K represented on the sketch–map on page 556 of this Memorial and meets the requirement for an equitable solution, up to the outer limit of the maritime zones which international law places under the respective jurisdictions of the two Parties.

(d) That by contesting the courses of the boundary defined above under *(a)* and *(c)*, the Federal Republic of Nigeria has violated and is violating the fundamental principle

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

of respect for frontiers inherited from colonization *(uti possidetis juris)* and its legal commitments concerning the demarcation of frontiers in Lake Chad and land and maritime delimitation.

(e) That by using force against the Republic of Cameroon and, in particular, by militarily occupying parcels of Cameroonian territory in the area of Lake Chad and the Cameroonian Peninsula of Bakassi, and by making repeated incursions, both civilian and military, all along the boundary between the two countries, the Federal Republic of Nigeria has violated and is violating its obligations under international treaty law and customary law.

(f) That the Federal Republic of Nigeria has the express duty of putting an end to its civilian and military presence in Cameroonian territory and, in particular, of effecting an immediate and unconditional withdrawal of its troops from the occupied area of Lake Chad and from the Cameroonian Peninsula of Bakassi and of refraining from such acts in the future.

(g) That the internationally wrongful acts referred to above and described in detail in the body of this Memorial involve the responsibility of the Federal Republic of Nigeria.

(h) That, consequently, and on account of the material and non–material damage inflicted upon the Republic of Cameroon, reparation in a form to be determined by the Court is due from the Federal Republic of Nigeria to the Republic of Cameroon.

The Republic of Cameroon further has the honour to request the Court to permit it to present an assessment of the amount of compensation due to it as reparation for the damage it has suffered as a result of the internationally wrongful acts attributable to the Federal Republic of Nigeria, at a subsequent stage of the proceedings.

These submissions are lodged subject to any points of fact and law and any evidence that may subsequently be lodged; the Republic of Cameroon reserves the right to complete or amend them, as necessary, in accordance with the Statute and the Rules of Court."

On behalf of the Government of Nigeria,

in the preliminary objections:

First preliminary objection:

"(1) that Cameroon, by lodging the Application on 29 March 1994, violated its obligations to act in good faith, acted in abuse of the system established by Article 36, paragraph 2, of the Statute , and disregarded the requirement of reciprocity established by Article 36, paragraph 2, of the Statute and the terms of Nigeria's Declaration of 3 September 1965 ;

(2) that consequently the conditions necessary to entitle Cameroon to invoke its Declaration under Article 36, paragraph 2, as a basis for the Court's jurisdiction did not exist when the Application was lodged; and

(3) that accordingly, the Court is without jurisdiction to entertain the Application."

Second preliminary objection:

"For a period of at least 24 years prior to the filing of the Application the Parties have in their regular dealings accepted a duty to settle all boundary questions through the existing bilateral machinery.

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

(1) This course of joint conduct constitutes an implied agreement to resort exclusively to the existing bilateral machinery and not to invoke the jurisdiction of the Court.

(2) *In the alternative*, in the circumstances the Republic of Cameroon is estopped from invoking the jurisdiction of the Court."

Third preliminary objection:

"Without prejudice to the second preliminary objection, the settlement of boundary disputes within the Lake Chad region is subject to the exclusive competence of the Lake Chad Basin Commission, and in this context the procedures of settlement within the Lake Chad Basin Commission are obligatory for the Parties.

The operation of the dispute settlement procedures of the Lake Chad Basin Commission involved the necessary implication, for the relations of Nigeria and Cameroon *inter se*, that the jurisdiction of the Court by virtue of Article 36, paragraph 2, would not be invoked in relation to matters within the exclusive competence of the Commission."

Fourth preliminary objection:

"The Court should not in these proceedings determine the boundary in Lake Chad to the extent that that boundary constitutes or is constituted by the tripoint in the Lake."

Fifth preliminary objection:

"(1) In the submission of Nigeria there is no dispute concerning boundary delimitation as such throughout the whole length of the boundary from the tripoint in Lake Chad to the sea, and in particular:

(a) there is no dispute in respect of the boundary delimitation as such within Lake Chad, subject to the question of title to Darak and adjacent islands inhabited by Nigerians;

(b) there is no dispute relating to the boundary delimitation as such from the tripoint in Lake Chad to Mount Kombon;

(c) there is no dispute relating to the boundary delimitation as such between Boundary Pillar 64 on the Gamana River and Mount Kombon; and

(d) there is no dispute relating to the boundary delimitation as such between Pillar 64 on the Gamana River and the sea.

(2) This preliminary objection is without prejudice to the title of Nigeria over the Bakassi Peninsula."

Sixth preliminary objection:

"(1) that the Application (and so far as relevant, Amendment and Memorial) filed by Cameroon does not meet the required standard of adequacy as to the facts on which it is based, including the dates, circumstances and precise locations of the alleged incursions and incidents by Nigerian State organs;

(2) that those deficiencies make it impossible

(a) for Nigeria to have the knowledge to which it is entitled of the circumstances which are said by Cameroon to result in Nigeria's international responsibility and consequential obligation to make reparation; and

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

(b) for the Court to carry out a fair and effective judicial examination of, or make a judicial determination on, the issues of State responsibility and reparation raised by Cameroon; and

(3) that accordingly all the issues of State responsibility and reparation raised by Cameroon in this context should be declared inadmissible."

Seventh preliminary objection:

"There is no legal dispute concerning delimitation of the maritime boundary between the two Parties which is at the present time appropriate for resolution by the Court, for the following reasons:

(1) no determination of a maritime boundary is possible prior to the determination of title in respect of the Bakassi Peninsula;

(2) at the juncture where there is a determination of the question of title over the Bakassi Peninsula, the issues of maritime delimitation will not be admissible in the absence of sufficient action by the Parties, on a footing of equality, to effect a delimitation 'by agreement on the basis of international law'."

Eighth preliminary objection:

"The question of maritime delimitation necessarily involves the rights and interests of third States and is inadmissible."

Concluding submissions:

"For the reasons advanced, the Federal Republic of Nigeria requests the Court to adjudge and declare that:

it lacks jurisdiction over the claims brought against the Federal Republic of Nigeria by the Republic of Cameroon;

and/or

the claims brought against the Federal Republic of Nigeria by the Republic of Cameroon are inadmissible to the extent specified in these preliminary objections."

On behalf of the Government of Cameroon,

in the written statement containing its observations on the preliminary objections:

"For the reasons given …, the Republic of Cameroon requests the International Court of Justice:

(1) to dismiss the preliminary objections raised by the Federal Republic of Nigeria;

(2) to find that, by its formal declarations, Nigeria has accepted the jurisdiction of the Court;

(3) to adjudge and declare:

— that it has jurisdiction to decide on the Application filed by Cameroon on 29 March 1994 as supplemented by the additional Application of 6 June 1994; and

— that the Application, thus consolidated, is admissible;

(4) having due regard to the particular nature of the case, which relates to a dispute

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

concerning the territorial sovereignty of Cameroon and is creating serious tensions between the two countries, to fix time–limits for the further proceedings which will enable the Court to proceed to the merits at the earliest possible time."

19. In the oral proceedings, the Parties presented the following submissions:

On behalf of the Government of Nigeria,

at the hearing on 9 March 1998:

"[F]or the reasons that have been stated either in writing or orally, Nigeria submits:

First preliminary objection

1.1. That Cameroon, by lodging the Application on 29 March 1994, violated its obligations to act in good faith, acted in abuse of the system established by Article 36, paragraph 2, of the Statute , and disregarded the requirement of reciprocity established by Article 36, paragraph 2, of the Statute and the terms of Nigeria's Declaration of 3 September 1965 ;

1.2. that consequently the conditions necessary to entitle Cameroon to invoke its Declaration under Article 36, paragraph 2, as a basis for the Court's jurisdiction did not exist when the Application was lodged;

1.3. that accordingly, the Court is without jurisdiction to entertain the Application.

Second preliminary objection

2.1. That for a period of at least 24 years prior to the filing of the Application, the Parties have in their regular dealings accepted a duty to settle all boundary questions through the existing bilateral machinery;

2.1.1. that this course of joint conduct constitutes an implied agreement to resort exclusively to the existing bilateral machinery and not to invoke the jurisdiction of the Court;

2.1.2. that *in the alternative*, in the circumstances the Republic of Cameroon is estopped from invoking the jurisdiction of the Court.

Third preliminary objection

3.1. That without prejudice to the second preliminary objection, the settlement of boundary disputes within the Lake Chad region is subject to the exclusive competence of the Lake Chad Basin Commission, and in this context the procedures of settlement within the Lake Chad Basin Commission are obligatory for the Parties;

3.2. that the operation of the dispute settlement procedures of the Lake Chad Basin Commission involved the necessary implication, for the relations of Nigeria and Cameroon *inter se*, that the jurisdiction of the Court by virtue of Article 36, paragraph 2, would not be invoked in relation to matters within the exclusive competence of the Commission.

Fourth preliminary objection

4.1. That the Court should not in these proceedings determine the boundary in Lake Chad to the extent that that boundary constitutes or is constituted by the tripoint in the Lake.

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

Fifth preliminary objection

5.1. That, without prejudice to the title of Nigeria over the Bakassi Peninsula, there is no dispute concerning boundary delimitation as such throughout the whole length of the boundary from the tripoint in Lake Chad to the sea, and in particular:

(a) there is no dispute in respect of the boundary delimitation as such within Lake Chad, subject to the question of title to Darak and adjacent islands inhabited by Nigerians;

(b) there is no dispute relating to the boundary delimitation as such from the tripoint in Lake Chad to Mount Kombon;

(c) there is no dispute relating to the boundary delimitation as such between boundary pillar 64 on the Gamana River and Mount Kombon; and

(d) there is no dispute relating to the boundary delimitation as such between pillar 64 on the Gamana River and the sea.

Sixth preliminary objection

6.1. That the Application (and so far as permissible, subsequent pleadings) filed by Cameroon does not meet the required standard of adequacy as to the facts on which it is based, including the dates, circumstances and precise locations of the alleged incursions and incidents by Nigerian State organs;

6.2. that those deficiencies make it impossible

(a) for Nigeria to have the knowledge to which it is entitled of the circumstances which are said by Cameroon to result in Nigeria's international responsibility and consequential obligation to make reparation; and

(b) for the Court to carry out a fair and effective judicial examination of, or make a judicial determination on, the issues of State responsibility and reparation raised by Cameroon;

6.3. that accordingly all the issues of State responsibility and reparation raised by Cameroon in this context should be declared inadmissible;

6.4. that, without prejudice to the foregoing, any allegations by Cameroon as to State responsibility or reparation on the part of Nigeria in respect of matters referred to in paragraph 17 *(f)* of Cameroon's amending Application of 6 June 1994 are inadmissible.

Seventh preliminary objection

7.1. That there is no legal dispute concerning delimitation of the maritime boundary between the two Parties which is at the present time appropriate for resolution by the Court, for the following reasons:

(1) no determination of a maritime boundary is possible prior to the determination of title in respect of the Bakassi Peninsula;

(2) in any event, the issues of maritime delimitation are inadmissible in the absence of sufficient action by the Parties, on a footing of equality, to effect a delimitation 'by agreement on the basis of international law'.

Eighth preliminary objection

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

8.1. That the question of maritime delimitation necessarily involves the rights and interests of third States and is inadmissible beyond point G.

Accordingly, Nigeria formally requests the Court to adjudge and declare that:

(1) it lacks jurisdiction over the claims brought against the Federal Republic of Nigeria by the Republic of Cameroon; and/or

(2) the claims brought against the Federal Republic of Nigeria by the Republic of Cameroon are inadmissible to the extent specified in the preliminary objections."

On behalf of the Government of Cameroon,

at the hearing on 11 March 1998:

"For the reasons developed in the written pleadings and in the oral proceedings, the Republic of Cameroon requests the International Court of Justice:

(a) to dismiss the preliminary objections raised by the Federal Republic of Nigeria;

(b) completely in the alternative, to join to the merits, as appropriate, such of those objections as it may deem not to be of an exclusively preliminary character;

(c) to adjudge and declare: that it has jurisdiction to decide on the Application filed by Cameroon on 29 March 1994 as supplemented by the Additional Application of 6 June 1994; and that the Application, thus consolidated, is admissible;

(d) having due regard to the particular nature of the case, to fix time–limits for the further proceedings which will permit examination of the merits of the dispute at the earliest possible time."

* * *

20. The Court will successively examine the eight preliminary objections raised by Nigeria.

First Preliminary Objection

21. The first objection contends that the Court has no jurisdiction to entertain Cameroon's Application.

22. In this regard, Nigeria notes that it had accepted the Court's compulsory jurisdiction by a declaration dated 14 August 1965, deposited with the Secretary–General of the United Nations on 3 September 1965. Cameroon had also accepted the Court's compulsory jurisdiction by a declaration deposited with the Secretary–General on 3 March 1994. The Secretary–General transmitted copies of the Cameroon Declaration to the parties to the Statute eleven–and–a–half months later. Nigeria maintains, accordingly, that it had no way of knowing, and did not actually know, on the date of the filing of the Application, i.e., 29 March 1994, that Cameroon had deposited a declaration. Cameroon consequently is alleged to have "acted prematurely". By proceeding in this way, the Applicant "is alleged to have violated its obligation to act in good faith", "abused the system instituted by Article 36, paragraph 2, of the Statute" and disregarded "the condition of reciprocity" provided for by that Article and by Nigeria's Declaration. The Court consequently does not have jurisdiction to hear the Application.

23. In contrast, Cameroon contends that its Application fulfils all the conditions required by the Statute. It notes that in the case concerning *Right of Passage over Indian Territory*, the Court held that

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

> “the Statute does not prescribe any interval between the deposit by a State of its Declaration of Acceptance and the filing of an Application by that State, and that the principle of reciprocity is not affected by any delay in the receipt of copies of the Declaration by the Parties to the Statute” (*Right of Passage over Indian Territory, Preliminary Objections, Judgment, I.C.J. Reports 1957*, p. 147).

Cameroon indicates that there is no reason not to follow this precedent, at the risk of undermining the system of compulsory jurisdiction provided by the Optional Clause. It adds that the Cameroonian Declaration was in force as early as 3 March 1994, as at that date it was registered in accordance with Article 102 of the United Nations Charter. Cameroon states that in any event Nigeria has acted, since the beginning of these proceedings, in such a way that it should be regarded as having accepted the jurisdiction of the Court.

24. Nigeria argues in reply that the “case concerning the *Right of Passage over Indian Territory*, was a first impression”, that the Judgment given is outdated, and that it is an isolated one; that international law, especially as it relates to good faith, has evolved since and that in accordance with Article 59 of the Statute, that Judgment only has the force of *res judicata* as between the parties and in respect of that case. For these reasons, the solution adopted in 1957 should not be adopted here. Nigeria does not accept the reasoning of Cameroon based on Article 102 of the Charter. Nigeria also contends that there is no question of its having consented to the jurisdiction of the Court in the case and hence there is no *forum prorogatum*.

Cameroon contests each of these arguments.

25. The Court observes initially that, in accordance with Article 36, paragraph 2, of the Statute:

> “The States parties to the present Statute may at any time declare that they recognize as compulsory *ipso facto* and without special agreement, in relation to any other State accepting the same obligation, the jurisdiction of the Court in all legal disputes”

as specified in that clause.

Article 36, paragraph 4, provides:

> “Such declarations shall be deposited with the Secretary–General of the United Nations, who shall transmit copies thereof to the parties to the Statute and to the Registrar of the Court.”

In the case concerning *Right of Passage over Indian Territory*, the Court concluded, in the light of these provisions, that:

> “by the deposit of its Declaration of Acceptance with the Secretary–General, the accepting State becomes a Party to the system of the Optional Clause in relation to the other declarant States, with all the rights and obligations deriving from Article 36. The contractual relation between the Parties and the compulsory jurisdiction of the Court resulting therefrom are established, ‘*ipso facto* and without special agreement”, by the fact of the making of the Declaration … For it is on that very day that the consensual bond, which is the basis of the Optional Clause, comes into being between the States concerned.” (*Right of Passage over Indian Territory, Preliminary Objections, Judgment, I.C.J. Reports 1957*, p. 146.)

The conclusions thus reached by the Court in 1957 reflect the very essence of the Optional Clause providing for acceptance of the Court's compulsory jurisdiction. Any State party to the Statute, in adhering to the jurisdiction of the Court in accordance with Article 36, paragraph 2, accepts jurisdiction in its relations with States previously having adhered to that clause. At the same time, it makes a standing offer to the other States party to the Statute which have not yet deposited a declaration of acceptance. The day one of those States accepts that offer by depositing in its turn

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

its declaration of acceptance, the consensual bond is established and no further condition needs to be fulfilled. Thus, as the Court stated in 1957:

> "every State which makes a Declaration of Acceptance must be deemed to take into account the possibility that, under the Statute, it may at any time find itself subjected to the obligations of the Optional Clause in relation to a new Signatory as the result of the deposit by that Signatory of a Declaration of Acceptance" (*ibid.*, p. 146).

26. Furthermore, and as the Court also declared in the case concerning *Right of Passage over Indian Territory*, the State making the declaration

> "is not concerned with the duty of the Secretary–General or the manner of its fulfilment. The legal effect of a Declaration does not depend upon subsequent action of the Secretary–General. Moreover, unlike some other instruments, Article 36 provides for no additional requirement, for instance, that the information transmitted by the Secretary–General must reach the Parties to the Statute, or that some period must elapse subsequent to the deposit of the Declaration before it can become effective. Any such requirement would introduce an element of uncertainty into the operation of the Optional Clause system. The Court cannot read into the Optional Clause any requirement of that nature." (I.C.J. Reports 1957, pp. 146–147.)

27. The Court furthermore recalls that, contrary to what is maintained by Nigeria, this Judgment is not an isolated one. It has been reaffirmed in the case concerning the *Temple of Preah Vihear* (*Preliminary Objections, I.C.J. Reports 1961*, p. 31), and in the case concerning *Military and Paramilitary Activities in and against Nicaragua (Nicaragua* v. *United States of America)* (*Jurisdiction and Admissibility, Judgment, I.C.J. Reports 1984*, p. 392). In that latter case, the Court pointed out that:

> "as regards the requirement of consent as a basis of its jurisdiction, and more particularly as regards the formalities required for that consent to be expressed in accordance with the provisions of Article 36, paragraph 2, of the Statute, the Court has already made known its view in, *inter alia*, the case concerning the *Temple of Preah Vihear*. On that occasion it stated: 'The only formality required is the deposit of the acceptance with the Secretary–General of the United Nations under paragraph 4 of Article 36 of the Statute.' (*I.C.J. Reports 1961*, p. 31.)" (*I.C.J. Reports 1984*, p. 412, para. 45.)

28. Nigeria nonetheless contests that conclusion pointing out that, in accordance with Article 59 of the Statute, "[t]he decision of the Court has no binding force except between the parties and in respect of that particular case". Thus, judgments given earlier, in particular in the case concerning *Right of Passage over Indian Territory*, "clearly [have] no direct compelling effect in the present case".

It is true that, in accordance with Article 59, the Court's judgments bind only the parties to and in respect of a particular case. There can be no question of holding Nigeria to decisions reached by the Court in previous cases. The real question is whether, in this case, there is cause not to follow the reasoning and conclusions of earlier cases.

*

29. In this regard, Nigeria maintains first of all that the interpretation given in 1957 to Article 36, paragraph 4, of the Statute should be reconsidered in the light of the evolution of the law of treaties which has occurred since. In that connection, Nigeria relies on Article 78 *(c)* of the Vienna Convention on the Law of Treaties of 23 May 1969. That Article relates to the notifications and communications made under that Convention. It provides that:

> "Except as the treaty or the present Convention otherwise provide, any notification or

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

communication to be made by any State under the present Convention shall:

… … … … … … … … … . .

(c) if transmitted to a depositary, be considered as received by the State for which it was intended only when the latter State has been informed by the depositary."

According to Nigeria, that rule "must apply to Cameroon's Declaration". In the light of the provisions of the Vienna Convention, Nigeria contends that the Court should overturn the solution it adopted earlier in the case concerning *Right of Passage over Indian Territory*. Cameroon states, for its part, that the declarations of acceptance of the Court's compulsory jurisdiction "are not treaties within the meaning of the Vienna Convention" and "it was clearly no part of the intentions of the drafters of the … Convention … to interfere with the settled jurisprudence of the Court in this matter". This jurisprudence, Cameroon argues, should be followed.

30. The Court notes that the régime for depositing and transmitting declarations of acceptance of compulsory jurisdiction laid down in Article 36, paragraph 4, of the Statute of the Court is distinct from the régime envisaged for treaties by the Vienna Convention. Thus the provisions of that Convention may only be applied to declarations by analogy (*Military and Paramilitary Activities in and against Nicaragua (Nicaragua* v. *United States of America), Jurisdiction and Admissibility, Judgment, I.C.J. Reports 1984*, p. 420, para. 63).

31. The Court furthermore observes that in any event the provisions of the Vienna Convention do not have the scope which Nigeria imputes to them. Article 78 of the Convention is only designed to lay down the modalities according to which notifications and communications should be carried out. It does not govern the conditions in which a State expresses its consent to be bound by a treaty and those under which a treaty comes into force, those questions being governed by Articles 16 and 24 of the Convention. Indeed, the International Law Commission, in its Report to the General Assembly on the draft which was subsequently to become the Vienna Convention, specified that if the future Article 78 included *in limine* an explicit reservation, that was "primarily in order to prevent any misconception as to the relation" between that Article and the future Articles 16 and 24 (*Yearbook of the International Law Commission*, 1966, Vol. II, p. 271). It added that consequently "specific provisions [of those latter Articles] will prevail".

According to Article 16:

"Unless the treaty otherwise provides, instruments of ratification, acceptance, approval or accession establish the consent of a State to be bound by a treaty upon:

… … … … … … … … … . .

(b) their deposit with the depositary."

Article 24 further provides in its paragraph 3 that:

"When the consent of a State to be bound by a treaty is established on a date after the treaty has come into force, the treaty enters into force for that State on that date, unless the treaty otherwise provides."

In its report to the General Assembly, the International Law Commission had pointed out that:

"In the case of the deposit of an instrument with a depositary, the problem arises whether the deposit by itself establishes the legal nexus between the depositing State and other contracting States or whether the legal nexus arises only upon their being informed by the depositary." (*Yearbook of the International Law Commission*, 1966, Vol. II, p. 201.)

After describing the advantages and disadvantages of both solutions, it concluded that:

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

> “The Commission considered that the existing general rule clearly is that the act of deposit by itself establishes the legal nexus … This was the view taken by the International Court of Justice in the *Right of Passage over Indian Territory* (preliminary objections) case in the analogous situation of the deposit of instruments of acceptance of the optional clause under Article 36, paragraph 2, of the Statute of the Court … [Therefore] the existing rule appears to be well–settled.” *(Ibid.)*

This general rule is reflected in Articles 16 and 24 of the Vienna Convention: the deposit of instruments of ratification, acceptance, approval or accession to a treaty establishes the consent of a State to be bound by a treaty; the treaty enters into force as regards that State on the day of the deposit.

Thus the rules adopted in this sphere by the Vienna Convention correspond to the solution adopted by the Court in the case concerning *Right of Passage over Indian Territory*. That solution should be maintained.

32. Nigeria maintains however that, in any event, Cameroon could not file an application before the Court without allowing a reasonable period to elapse “as would … have enabled the Secretary–General to take the action required of him in relation to Cameroon's Declaration of 3 March 1994”. Compliance with that time period is essential, the more so because, according to Nigeria, the Court, in its Judgment of 26 November 1984 in the case concerning *Military and Paramilitary Activities in and against Nicaragua*, required a reasonable time for the withdrawal of declarations under the Optional Clause.

33. The Court, in the above Judgment, noted that the United States had, in 1984, deposited with the Secretary–General, three days before the filing of Nicaragua's Application, a notification limiting the scope of its Declaration of acceptance of the Court's jurisdiction. The Court noted that that Declaration contained a clause requiring six months' notice of termination. It considered that that condition should be complied with in cases of either termination or modification of the Declaration, and concluded that the 1984 notification of modification could not, with immediate effect, override the obligation entered into by the United States beforehand (*Military and Paramilitary Activities in and against Nicaragua (Nicaragua* v. *United States of America), Jurisdiction and Admissibility, I.C.J. Reports 1984*, p. 421, para. 65).

The Court noted, moreover, in relation to Nicaragua's Declaration upon which the United States was relying on the grounds of reciprocity, that, in any event,

> “the right of immediate termination of declarations with indefinite duration is far from established. It appears from the requirements of good faith that they should be treated, by analogy, according to the law of treaties, which requires a reasonable time for withdrawal from or termination of treaties that contain no provision regarding the duration of their validity” (*ibid.*, p. 420, para. 63).

The Court added: “the question of what reasonable period of notice would legally be required does not need to be further examined: it need only be observed that [three days] would not amount to a ‘reasonable time’” *(ibid.)*.

34. The Court considers that the foregoing conclusion in respect of the withdrawal of declarations under the Optional Clause is not applicable to the deposit of those declarations. Withdrawal ends existing consensual bonds, while deposit establishes such bonds. The effect of withdrawal is therefore purely and simply to deprive other States which have already accepted the jurisdiction of the Court of the right they had to bring proceedings before it against the withdrawing State. In contrast, the deposit of a declaration does not deprive those States of any accrued right. Accordingly no time period is required for the establishment of a consensual bond following such a deposit.

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

35. The Court notes moreover that to require a reasonable time to elapse before a declaration can take effect would be to introduce an element of uncertainty into the operation of the Optional Clause system. As set out in paragraph 26 above, in the case concerning *Right of Passage over Indian Territory*, the Court had considered that it could not create such uncertainty. The conclusions it had reached then remain valid and apply all the more since the growth in the number of States party to the Statute and the intensification of inter–State relations since 1957 have increased the possibilities of legal disputes capable of being submitted to the Court. The Court cannot introduce into the Optional Clause an additional time requirement which is not there.

*

36. Nigeria's second argument is that Cameroon omitted to inform it that it intended to accept the jurisdiction of the Court, then that it had accepted that jurisdiction and, lastly, that it intended to file an application. Nigeria further argued that Cameroon even continued, during the first three months of 1994, to maintain bilateral contacts with it on boundary questions while preparing itself to address the Court. Such conduct, Nigeria contends, infringes upon the principle of good faith which today plays a larger role in the case–law of the Court than before, and should not be accepted.

37. Cameroon, for its part, argues that it had no obligation to inform Nigeria in advance of its intentions, or of its decisions. It adds that in any event "Nigeria was not at all surprised by the filing of Cameroon's Application and … knew perfectly well what Cameroon's intentions were in that regard several weeks before the filing". The principle of good faith was not at all disregarded.

38. The Court observes that the principle of good faith is a well–established principle of international law. It is set forth in Article 2, paragraph 2, of the Charter of the United Nations; it is also embodied in Article 26 of the Vienna Convention on the Law of Treaties of 23 May 1969. It was mentioned as early as the beginning of this century in the Arbitral Award of 7 September 1910 in the *North Atlantic Fisheries* case (United Nations, *Reports of International Arbitral Awards*, Vol. XI, p. 188). It was moreover upheld in several judgments of the Permanent Court of International Justice (*Factory at Chorzów, Merits, Judgment No. 13, 1928, P.C.I.J., Series A, No. 17*, p. 30; *Free Zones of Upper Savoy and the District of Gex, Order of 6 December 1930, P.C.I.J., Series A, No. 24*, p. 12, and *1932, P.C.I.J., Series A/B, No. 46*, p. 167). Finally, it was applied by this Court as early as 1952 in the case concerning *Rights of Nationals of the United States of America in Morocco* (*Judgment, I.C.J. Reports 1952*, p. 212), then in the case concerning *Fisheries Jurisdiction (Federal Republic of Germany* v. *Iceland) (Jurisdiction of the Court, Judgment, I.C.J. Reports 1973*, p. 18), the *Nuclear Tests* cases (*I.C.J. Reports 1974*, pp. 268 and 473), and the case concerning *Border and Transborder Armed Actions (Nicaragua* v. *Honduras) (Jurisdiction and Admissibility, Judgment, I.C.J. Reports 1988*, p. 105).

39. The Court furthermore notes that although the principle of good faith is "one of the basic principles governing the creation and performance of legal obligations … it is not in itself a source of obligation where none would otherwise exist" (*Border and Transborder Armed Actions (Nicaragua* v. *Honduras), Jurisdiction and Admissibility, Judgment, I.C.J. Reports 1988*, p. 105, para. 94). There is no specific obligation in international law for States to inform other States parties to the Statute that they intend to subscribe or have subscribed to the Optional Clause. Consequently, Cameroon was not bound to inform Nigeria that it intended to subscribe or had subscribed to the Optional Clause.

Moreover:

> "A State accepting the jurisdiction of the Court must expect that an Application may be filed against it before the Court by a new declarant State on the same day on which that State deposits with the Secretary–General its Declaration of Acceptance." (*Right of Passage over Indian Territory, Preliminary Objections, Judgment, I.C.J. Reports 1957*, p. 146.)

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

Thus, Cameroon was not bound to inform Nigeria of its intention to bring proceedings before the Court. In the absence of any such obligations and of any infringement of Nigeria's corresponding rights, Nigeria may not justifiably rely upon the principle of good faith in support of its submissions.

40. On the facts of the matter, to which the Parties devoted considerable attention, and quite apart from legal considerations, the Court would add that Nigeria was not unaware of Cameroon's intentions. On 28 February 1994, Cameroon had informed the Security Council of incidents which had occurred shortly beforehand in the Bakassi Peninsula. In response, on 4 March 1994, Nigeria apprised the Security Council of its surprise in noting that “the Cameroon Government had decided to raise the matter to an international level by … *(c)* bringing proceedings before the International Court of Justice”. Indeed on 4 March, Cameroon had deposited its declaration of acceptance of the compulsory jurisdiction of the Court, but had not yet seised the Court. Nigeria's communication to the Security Council nevertheless showed that it was not uninformed of Cameroon's intentions.

Further the Court points out that, on 4 March 1994, the *Journal of the United Nations*, issued at Headquarters in New York to United Nations organs and to the permanent missions, reported that Cameroon had deposited with the Secretary–General a “declaration recognizing as compulsory the jurisdiction of the International Court of Justice under Article 36, paragraph 2, of the Statute of the Court” (*Journal of the United Nations*, Friday 4 March 1994, No. 1994/43 (Part II)).

Lastly, on 11 March 1994, the bringing of the matter to the Security Council and the International Court of Justice by Cameroon was mentioned at the extraordinary general meeting of the Central Organ of the Mechanism for Conflict Prevention, Management and Resolution of the Organization of African Unity, devoted to the border conflict between Cameroon and Nigeria.

*

41. Nigeria recalls in the third place that, by its Declaration deposited on 3 September 1965, it had recognized

> “as compulsory *ipso facto* and without special agreement, in relation to any other State accepting the same obligation, that is to say, on the sole condition of reciprocity, the jurisdiction of the International Court of Justice in conformity with Article 36, paragraph 2, of the Statute of the Court”.

Nigeria maintains that on the date on which Cameroon's Application was filed, it did not know that Cameroon had accepted the Court's compulsory jurisdiction. Accordingly it could not have brought an application against Cameroon. There was an absence of reciprocity on that date. The condition contained in the Nigerian Declaration was operative; consequently, the Court does not have jurisdiction to hear the Application.

42. Cameroon disputes this argument in fact as well as in law. It states that, in the minds of the States party to the Optional Clause, the condition of reciprocity never possessed the meaning which Nigeria now ascribes to it; the Court had ascribed a completely different meaning to it in a number of its judgments. The interpretation now provided by Nigeria of its own declaration was a new interpretation for which no authority was cited in support. In sum, the purpose of the Nigerian Declaration, according to Cameroon, was only to emphasize that there is “a sole and unique condition to the compulsory character of the Court's jurisdiction in this case, i.e., that Cameroon should accept the same obligation as Nigeria, or in other words that it should accept the jurisdiction of the Court. This Cameroon does.”

43. The Court has on numerous occasions had to consider what meaning it is appropriate to give to the condition of reciprocity in the implementation of Article 36, paragraph 2, of the Statute. As early as 1952, it held in the case concerning *Anglo–Iranian Oil Co.* that, when declarations are made on condition of reciprocity, “jurisdiction is conferred on the Court only to the extent to which

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

the two Declarations coincide in conferring it" (*I.C.J. Reports 1952*, p. 103). The Court applied that rule again in the case of *Certain Norwegian Loans* (*I.C.J. Reports 1957*, pp. 23 and 24) and clarified it in the *Interhandel* case where it held that:

> "Reciprocity in the case of Declarations accepting the compulsory jurisdiction of the Court enables a Party to invoke a reservation to that acceptance which it has not expressed in its own Declaration but which the other Party has expressed in its Declaration… Reciprocity enables the State which has made the wider acceptance of the jurisdiction of the Court to rely upon the reservations to the acceptance laid down by the other Party. There the effect of reciprocity ends." (*I.C.J. Reports 1959*, p. 23.)

In the final analysis, "[t]he notion of reciprocity is concerned with the scope and substance of the commitments entered into, including reservations, and not with the formal conditions of their creation, duration or extinction" (*Military and Paramilitary Activities in and against Nicaragua (Nicaragua* v. *United States of America), Jurisdiction and Admissibility, Judgment, I.C.J. Reports 1984*, p. 419, para. 62). It simply requires that the Court ascertain whether, at the time of filing the Application instituting proceedings "the two States accepted 'the same obligation' in relation to the subject–matter of the proceedings" (*ibid.*, pp. 420–421, para. 64).

Therefore, in legal proceedings, the notion of reciprocity, and that of equality, "are not abstract conceptions. They must be related to some provision of the Statute or of the Declarations" (*Right of Passage over Indian Territory, Preliminary Objections, Judgment, I.C.J. Reports 1957*, p. 145). Consequently, "the principle of reciprocity is not affected by any delay in the receipt of copies of the Declaration by the Parties to the Statute" (*ibid.*, p. 147).

Nigeria considers, however, that that precedent does not apply here. It points out that, although in its 1965 Declaration, it recognized the jurisdiction of the Court as compulsory in relation to any other State accepting the same obligation, it was more explicit in adding the words "and that is to say, on the sole condition of reciprocity". "Those additional words clearly have some meaning and effect … it is the supplementing of the 'coincidence' required by Article 36, paragraph 2, by the element of mutuality inherent in the concept of 'reciprocity'." The Nigerian condition, in other words, sought "to mitigate the effects" of the Court's earlier decision in the case concerning *Right of Passage over Indian Territory* by creating an equality of risk and precluding that proceedings be brought before the Court by surprise.

44. In support of its position, Nigeria invokes the decision given in the case concerning *Anglo–Iranian Oil Co.*, in which the Court stated that it could not base its interpretation of the Iranian Declaration recognizing the jurisdiction of the Court

> "on a purely grammatical interpretation of the text. It must seek the interpretation which is in harmony with a natural and reasonable way of reading the text, having due regard to the intention of the Government of Iran at the time when it accepted the compulsory jurisdiction of the Court." (*Anglo–Iranian Oil Co., Preliminary Objection, I.C.J. Reports 1952*, p. 104.)

The Court had concluded that "[i]t is unlikely that the Government of Iran … should have been willing, on its own initiative, to agree that disputes relating" (*ibid.*, p. 105) to the capitulations which it had just denounced be submitted to an international court of justice.

45. The Court considers that the situation in this case is very different. Nigeria does not offer evidence in support of its argument that it intended to insert into its Declaration of 14 August 1965 a condition of reciprocity with a different meaning from the one which the Court had drawn from such clauses in 1957. In order to protect itself against the filing of surprise applications, in 1965, Nigeria could have inserted in its Declaration an analogous reservation to that which the United Kingdom added to its own Declaration in 1958. Ten or so other States proceeded in this way. Nigeria did not do so at that time. Like the majority of States which subscribe to the Optional Clause, it merely

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

specified that the commitments it was entering into, in accordance with Article 36, paragraph 2, of the Statute, were reciprocal in relation to any other State accepting the same obligation. In the light of this practice, the additional phrase of the sentence, “that is to say, on the sole condition of reciprocity” must be understood as explanatory and not adding any further condition. This interpretation is “in harmony with a natural and reasonable way of reading the text” (*Anglo–Iranian Oil Co., Preliminary Objection, I.C.J. Reports 1952*, p. 104) and Nigeria's condition of reciprocity cannot be treated as a reservation *ratione temporis*.

46. The Court therefore concludes that the manner in which Cameroon's Application was filed was not contrary to Article 36 of the Statute. Nor was it made in violation of a right which Nigeria may claim under the Statute, or by virtue of its Declaration, as it was in force on the date of the filing of Cameroon's Application.

*

47. Nigeria's first preliminary objection is accordingly rejected. The Court is therefore not called upon to examine the reasoning put forward by Cameroon under Article 102 of the Charter, nor Cameroon's alternative submissions based on *forum prorogatum*. In any event, the Court has jurisdiction to pass upon Cameroon's Application.

* *

Second Preliminary Objection

48. Nigeria raises a second preliminary objection stating that

> “for a period of at least 24 years prior to the filing of the Application the Parties have in their regular dealings accepted a duty to settle all boundary questions through the existing bilateral machinery”.

According to Nigeria, an implicit agreement is thus said to have been reached with a view to resorting exclusively to such machinery and to refraining from relying on the jurisdiction of the International Court of Justice. In the alternative, Nigeria claims that by its conduct Cameroon is estopped from turning to the Court. Finally, Nigeria invokes the principle of good faith and the rule *pacta sunt servanda* in support of this argument.

49. Cameroon maintains that the bilateral bodies which dealt with various boundary difficulties that had emerged between the two countries had only been temporary and that no permanent institutional machinery had been set up. It contends that no explicit or implicit agreement had been established between the Parties with a view to vesting exclusive jurisdiction in such bodies. Finally, according to Cameroon, the conditions laid down in the Court's case–law for the application of estoppel to arise were not fulfilled here. Therefore, there was no occasion to apply the principle of good faith and the rule *pacta sunt servanda*.

50. Nigeria's objection thus consists of two branches. But before making a legal determination considering them in turn, the Court will review the relevant facts.

51. The first bilateral contact referred to in the pleadings concerns a local dispute in the districts of Danare (Nigeria) and Budam (Cameroon). This dispute gave rise in 1965 to “exploratory talks” concerning the demarcation of the boundary in this sector. That course having been determined by the German and British authorities at the beginning of the century, it was agreed to locate existing boundary pillars with a view to identifying the boundary and proceeding with its demarcation not only between Danare and Budam, but also on a stretch of some 20 miles from Obokum Falls to Bashu (boundary pillars Nos. 114 to 105). The existing pillars were identified but none of the work planned was subsequently carried out.

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

52. Five years later, in response to incidents that occurred in the Cross River region and the Bakassi Peninsula, the two Governments decided to set up a Joint Boundary Commission. At the first meeting of that Commission, the delegates from Cameroon and Nigeria approved, on 14 August 1970, a declaration recommending that the delimitation of the boundary be carried out in three stages:

> “(a) the delimitation of the maritime boundary;
>
> (b) the delimitation of the land boundary as defined in the Anglo–German Protocol signed at Obokum on 12 April 1913 and confirmed by the London Anglo–German agreement ‘respecting (1) the settlement of Frontier between Nigeria and Cameroon from Yola to the sea; and (2) the Regulation of navigation on the Cross River”, and the exchange of letters between the British and German Governments on 6 July 1914;
>
> (c) the delimitation of the rest of the land boundary”.

The declaration further specified the bases on which the delimitation of the maritime boundary was to be carried out. It recommended that the demarcation work commenced in 1965 be resumed. Finally, it recommended that, on completion of each of these stages, a separate treaty be signed by the two countries to give effect to the boundary so demarcated and surveyed.

A Joint Technical Committee was then set up for the purpose of implementing the joint declaration. As agreed, it began its work with the delimitation of the maritime boundary. Negotiations went on at various levels on this matter for almost five years. They concluded on 4 April 1971 as regards the maritime boundary at the mouth of the Cross River, then led on 1 June 1975 to a declaration in Maroua by the two Heads of State concerning the course of the maritime boundary from the mouth of the Cross River to a point denominated “G” situated, according to the Parties, some 17 nautical miles from the coast.

53. Over the following years, contacts between the two countries on these boundary issues became less frequent. At most, it may be noted that two Joint Committee meetings were held. The first, in 1978, was attended by the two Foreign Ministers. They set forth their points of view on a number of boundary problems without undertaking negotiations and the meeting did not result in any joint minutes. The second meeting, held in 1987, brought together the Ministers responsible for planning in the two countries and did not broach boundary matters.

54. The negotiations on these issues, which were interrupted after 1975, were only resumed between the two States 16 years later when, on 29 August 1991, the two Foreign Ministers adopted a joint communiqué stating:

> “On border issues, the two sides agreed to examine in detail all aspects of the matter by the experts of the National Boundary Commission of Nigeria and the experts of the Republic of Cameroon at a meeting to be convened at Abuja in October 1991 with a view to making appropriate recommendations for a peaceful resolution of outstanding border issues.”

Indeed, a first meeting of these experts took place at the same time as that of the Foreign Ministers in August 1991. It was followed by a second meeting at Abuja in December 1991, then by a third at Yaoundé in August 1993. No agreement could be reached at these meetings, in particular as regards the Maroua Declaration, which was considered binding by Cameroon but not by Nigeria.

55. In sum, the Court notes that the negotiations between the two States concerning the delimitation or the demarcation of the boundary were carried out in various frameworks and at various levels: Heads of State, Foreign Ministers, experts. The negotiations were active during the period 1970 to 1975 and then were interrupted until 1991.

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

*

56. Turning to legal considerations, the Court will now consider the first branch of the Nigerian objection. It recalls first that, “Negotiation and judicial settlement are enumerated together in Article 33 of the Charter of the United Nations as means for the peaceful settlement of disputes” (*Aegean Sea Continental Shelf, Judgment, I.C.J. Reports 1978*, p. 12, para. 29). Neither in the Charter nor otherwise in international law is any general rule to be found to the effect that the exhaustion of diplomatic negotiations constitutes a precondition for a matter to be referred to the Court. No such precondition was embodied in the Statute of the Permanent Court of International Justice, contrary to a proposal by the Advisory Committee of Jurists in 1920 (Advisory Committee of Jurists, *Procès–verbaux of the Proceedings of the Committee (16 June–24 July 1920) with Annexes*, pp. 679, 725–726). Nor is it to be found in Article 36 of the Statute of this Court.

A precondition of this type may be embodied and is often included in compromissory clauses of treaties. It may also be included in a special agreement whose signatories then reserve the right to seise the Court only after a certain lapse of time (cf. *Territorial Dispute (Libyan Arab Jamahiriya/Chad), Judgment, I.C.J. Reports 1994*, p. 9). Finally, States remain free to insert into their optional declaration accepting the compulsory jurisdiction of the Court a reservation excluding from the latter those disputes for which the parties involved have agreed or subsequently agree to resort to an alternative method of peaceful settlement. In this case, however, no reservation of this type was included in the Declarations of Nigeria or Cameroon on the date of the filing of the Application.

Moreover, the fact that the two States have attempted, in the circumstances set out in paragraphs 54 and 55 above, to solve some of the boundary issues dividing them during bilateral contacts, did not imply that either one had excluded the possibility of bringing any boundary dispute concerning it before other fora, and in particular the International Court of Justice. The first branch of Nigeria's objection accordingly is not accepted.

57. Turning to the second branch of the objection, the Court will examine whether the conditions laid down in its jurisprudence for an estoppel to exist are present in the instant case.

An estoppel would only arise if by its acts or declarations Cameroon had consistently made it fully clear that it had agreed to settle the boundary dispute submitted to the Court by bilateral avenues alone. It would further be necessary that, by relying on such an attitude, Nigeria had changed position to its own detriment or had suffered some prejudice (*North Sea Continental Shelf, Judgment, I.C.J. Reports 1969*, p. 26, para. 30; *Land, Island and Maritime Frontier Dispute (El Salvador/Honduras), Application to Intervene, Judgment, I.C.J. Reports 1990*, p. 118, para. 63).

These conditions are not fulfilled in this case. Indeed, as pointed out in paragraph 56 above, Cameroon did not attribute an exclusive character to the negotiations conducted with Nigeria, nor, as far as it appears, did Nigeria. Furthermore, Nigeria does not show that it has changed its position to its detriment or that it has sustained prejudice in that it could otherwise have sought a solution to the border problems existing between the two States by having recourse to other procedures, but was precluded from doing so by reliance on the positions allegedly taken by Cameroon.

58. Finally, the Court has not been persuaded that Nigeria has been prejudiced as a result of Cameroon's having instituted proceedings before the Court instead of pursuing negotiations which, moreover, were deadlocked when the Application was filed.

59. This being so, in bringing proceedings before the Court, Cameroon did not disregard the legal rules relied on by Nigeria in support of its second objection. Consequently, Nigeria is not justified in relying on the principle of good faith and the rule *pacta sunt servanda*, both of which relate only to the fulfilment of existing obligations. The second branch of Nigeria's objection is not accepted.

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

60. The second preliminary objection as a whole is thus rejected.

* *

Third Preliminary Objection

61. In its third preliminary objection, Nigeria contends that "the settlement of boundary disputes within the Lake Chad region is subject to the exclusive competence of the Lake Chad Basin Commission".

62. In support of this argument, Nigeria invokes the treaty texts governing the Statute of the Commission as well as the practice of member States. It argues that "the procedures for settlement by the Commission are binding upon the Parties" and that Cameroon was thus barred from raising the matter before the Court on the basis of Article 36, paragraph 2, of the Statute.

63. For its part, Cameroon submits to the Court that

> "no provision of the Statute of the Lake Chad Basin Commission establishes in favour of that international organization any exclusive competence in relation to boundary delimitation".

It adds that no such exclusive jurisdiction can be inferred from the conduct of member States. It therefore calls upon the Court to reject the third preliminary objection.

*

64. The Court observes that the Statute of the Lake Chad Basin Commission was annexed to an Agreement of 22 May 1964 signed on that date by Cameroon, Chad, Niger and Nigeria. According to its preamble, this convention concerning the development of the Lake Chad Basin is designed "to formulate principles of the utilization of the resources of the Basin for economic purposes, including the harnessing of the water".Article IV of the Statute develops those principles by providing that

> "[t]he development of the said Basin and in particular the utilisation of surface and ground waters shall be given its widest connotation and refers in particular to domestic, industrial and agricultural development, the collection of the products of its fauna and flora".

In addition, under Article VII of the Statute, member States undertake to "establish common rules for the purpose of facilitating navigation on the Lake and on the navigable waters in the Basin and to ensure the safety and control of navigation".

Article I of the Convention establishes the Lake Chad Basin Commission. The Commission comprises two commissioners per member State. In accordance with Article X, paragraph 3, of the Statute, the decisions of the Commission shall be by unanimous vote.

The functions of the Commission are laid down in Article IX of the same Statute. They are *inter alia* to prepare "general regulations which will permit the full application of the principles set forth in the present Convention and its annexed Statute, and to ensure their effective application". The Commission exercises various powers with a view to co–ordinating action by member States regarding the use of the waters of the Basin. Finally, one of its responsibilities under Article IX, paragraph *(g)*, is "to examine complaints and to promote the settlement of disputes and the resolution of differences".

65. Member States have also entrusted to the Commission certain tasks that had not originally been provided for in the treaty texts. Further to incidents between Cameroon and Nigeria in 1983 in the Lake Chad area, an extraordinary meeting of the Commission was convened from 21 to 23 July

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

1983 in Lagos on the initiative of the Heads of State concerned, in order to entrust to the Commission certain boundary and security matters. Two sub–commissions of experts were then set up. They met from 12 to 16 November 1984. An agreement was immediately reached between the experts to adopt "as working documents" various bilateral conventions and agreements concluded between Germany, France and the United Kingdom between 1906 and 1931 "on the delimitation of Borders in the Lake Chad area". The experts proposed at the same time that the boundary so delimited be demarcated as early as possible.

This demarcation was carried out from 1988 to 1990 in the course of three boundary–marking operations involving the setting up of seven main and 68 intermediary boundary pillars. The Final Report on Beaconing was signed by the delegates of the four States concerned. Then, on 23 March 1994, at the Eighth Summit of the Lake Chad Basin Commission in Abuja, the Heads of State and Government were informed that "the physical work in the field on the border demarcation exercise was fully completed". They then decided "to approve the technical document on the demarcation of the international boundaries of member States in Lake Chad", on the understanding "that each country should adopt the document in accordance with its national laws". The question of the ratification of that document came up at the Ninth Summit of Heads of State of the Commission held on 30 and 31 October 1996 in N'Djamena when Heads of State of Cameroon and Nigeria were absent and where no progress was recorded. Since then, however, on 22 December 1997, Cameroon deposited its instrument of ratification, whereas Nigeria has not done so.

*

66. In the light of the treaty texts and the practice thus recalled, the Court will consider the positions of the Parties on this matter. For its part, Nigeria first of all contends that "the role and Statute of the Commission must be understood "in the framework of regional agencies" referred to in Article 52 of the United Nations Charter. It accordingly concludes that "the Commission has an exclusive power in relation to issues of security and public order in the region of Lake Chad and that these issues appropriately encompass the business of boundary demarcation".

Cameroon argues, for its part, that the Commission does not constitute a regional arrangement or agency within the meaning of Article 52 of the Charter, pointing in particular to the fact that

> "there has never been any question of extending this category to international regional organizations of a technical nature which, like the [Commission], can include a mechanism for the peaceful settlement of disputes or for the promotion of that kind of settlement".

67. The Court notes that Article 52, paragraph 1, of the Charter refers to "regional arrangements or agencies for dealing with such matters relating to the maintenance of international peace and security as are appropriate for regional action". According to paragraph 2 of that Article,

> "[t]he Members of the United Nations entering into such arrangements or constituting such agencies shall make every effort to achieve pacific settlement of local disputes through such regional arrangements or by such regional agencies before referring them to the Security Council".

Under Article 53, the Security Council may use these arrangements or agencies for "enforcement action under its authority".

From the treaty texts and the practice analysed at paragraphs 64 and 65 above, it emerges that the Lake Chad Basin Commission is an international organization exercising its powers within a specific geographical area; that it does not however have as its purpose the settlement at a regional level of matters relating to the maintenance of international peace and security and thus does not fall under Chapter VIII of the Charter.

68. However, even were it otherwise, Nigeria's argument should nonetheless be set aside. In this

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

connection, the Court notes that, in the case concerning *Military and Paramilitary Activities in and against Nicaragua*, it did not consider that the Contadora process could "properly be regarded as a 'regional arrangement' for the purposes of Chapter VIII of the United Nations Charter". But it added that, in any event,

> "the Court is unable to accept either that there is any requirement of prior exhaustion of regional negotiating processes as a precondition to seising the Court; or that the existence of the Contadora process constitutes in this case an obstacle to the examination by the Court of the Nicaraguan Application" (*Military and Paramilitary Activities in and against Nicaragua (Nicaragua* v. *United States of America), Jurisdiction and Admissibility, Judgment, I.C.J. Reports 1984*, p. 440).

Whatever their nature, the existence of procedures for regional negotiation cannot prevent the Court from exercising the functions conferred upon it by the Charter and the Statute.

69. Nigeria further invokes Article 95 of the United Nations Charter according to which:

> "Nothing in the present Charter shall prevent Members of the United Nations from entrusting the solution of their differences to other tribunals by virtue of agreements already in existence or which may be concluded in the future."

According to Nigeria, the Lake Chad Basin Commission should be seen as a tribunal falling under the provisions of this text. This would mean that, if the Court were to pronounce on this submission of Cameroon it "would be in breach of the principle of the autonomy of jurisdictional competence" and "would be exercising an appellate jurisdiction".

The Court considers that the Lake Chad Basin Commission cannot be seen as a tribunal. It renders neither arbitral awards nor judgments and is therefore neither an arbitral nor a judicial body. Accordingly, this contention of Nigeria must also be set aside.

70. Nigeria further maintains that the Convention of 22 May 1964, confirmed by the practice of the member States of the Commission, attributes to that Commission an exclusive competence for the settlement of boundary disputes. It concludes from this that the Court cannot entertain Cameroon's submissions requesting it to determine the boundary between the two countries in this sector.

The Court cannot subscribe to that reasoning. It notes first of all that no provision in the Convention ascribes jurisdiction and *a fortiori* exclusive jurisdiction to the Commission as regards the settlement of boundary disputes. In particular, such a jurisdiction cannot be deduced from Article IX, paragraph *(g)*, of the Convention (see paragraph 64 above).

The Court further notes that the member States of the Commission subsequently charged it with carrying out the demarcation of boundaries in the region on the basis of the agreements and treaties referred to in the experts' report of November 1984 (see paragraph 65 above). Thus, as pointed out by Nigeria, "the question of boundary demarcation was clearly within the competence of the [Commission]". This demarcation was designed by the States concerned as a physical operation to be carried out in the field under the authority of the Commission with a view to avoiding the reoccurrence of the incidents that had arisen in 1983.

But the Commission has never been given jurisdiction, and *a fortiori* exclusive jurisdiction, to rule on the territorial dispute now involving Cameroon and Nigeria before the Court, a dispute which moreover did not as yet exist in 1983. Consequently, Nigeria's argument must be dismissed.

71. Nigeria also argues that, from 1983 to 1994, "Cameroon had clearly and consistently evinced acceptance of the régime of exclusive recourse to the Lake Chad Basin Commission"; Cameroon then appealed to the Court contrary to the commitments it had entered into. This course of conduct, it was argued, had been prejudicial to Nigeria, deprived as it was of the "consultation"

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

and “negotiation” procedures afforded by the Commission. Nigeria claims that Cameroon is estopped from making its Application.

The Court points out that the conditions laid down in its case–law for an estoppel to arise, as set out in paragraph 57 above, are not fulfilled in this case. Indeed, Cameroon has not accepted that the Commission has jurisdiction to settle the boundary dispute now submitted to the Court. This argument must also be set aside.

72. In the alternative, Nigeria finally argues that, on account of the demarcation under way in the Lake Chad Basin Commission, the Court “cannot rule out the consideration of the need for judicial restraint on grounds of judicial propriety” and should decline to rule on the merits of Cameroon's Application, as it did in 1963 in the case concerning *Northern Cameroons*.

In that case, the Court had noted that the United Nations General Assembly had terminated the trusteeship agreement in respect of the Northern Cameroon by resolution 1608 (XV); it observed that the dispute between the parties “about the interpretation and application [of that agreement therefore concerned a treaty] no longer in force”; it went on to say that “there can be no opportunity for a future act of interpretation or application of that treaty in accordance with any judgment the Court might render”. It had concluded that any adjudication would thus be “devoid of purpose” and that no purpose “would be served by undertaking an examination of the merits in the case”. Observing that the limits of its judicial function “do not permit it to entertain the claims submitted to it [by Cameroon, it had considered itself unable to] adjudicate upon the merits of [those] claim[s]” (*Northern Cameroons, Judgment, I.C.J. Reports 1963*, pp. 37–38).

The Court considers that the situation in the present case is entirely different. Indeed, whereas in 1963 Cameroon did not challenge the validity of the General Assembly resolution terminating the trusteeship, Nigeria, in the present case, does not regard the technical document on the demarcation of the boundaries, approved at the Abuja Summit of the Lake Chad Basin Commission, as a document definitively settling boundary problems in that region. Nigeria reserved its position before the Court as regards the binding character of that document. It contends that the document requires ratification and recalls that it has not ratified it. Lastly, it specified at the Ninth Summit of the Commission at N'Djamena in 1996 that “Nigeria could not even start processing ratification unless the issue was out of Court”.

Cameroon for its part considers that Nigeria is obliged to complete the process of approval of the document concerned and, that, even in the absence of so doing, the boundary between the two countries in this sector is “legally defined”, “marked out on the ground” and “internationally recognized”.

It is not for the Court at this stage to rule upon these opposing arguments. It need only note that Nigeria cannot assert both that the demarcation procedure initiated within the Lake Chad Commission was not completed and that, at the same time, that procedure rendered Cameroon's submissions moot. There is thus no reason of judicial propriety which should make the Court decline to rule on the merits of those submissions.

73. In the light of the above considerations, Nigeria's third preliminary objection must be rejected.

* *

Fourth Preliminary Objection

74. The Court will now turn to the fourth preliminary objection raised by Nigeria. This objection contends that:

> “The Court should not in these proceedings determine the boundary in Lake Chad to the extent that that boundary constitutes or is constituted by the tripoint in the Lake.”

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

75. Nigeria holds that the location of the tripoint within Lake Chad directly affects a third State, the Republic of Chad, and that the Court therefore cannot determine this tripoint. Nigeria maintains that the finding of the Chamber in the case concerning the *Frontier Dispute (Burkina Faso/Republic of Mali)*

> "that its jurisdiction is not restricted simply because the end–point of the frontier lies on the frontier of a third State not party to the proceedings. The rights of the neighbouring State, Niger, are in any event safeguarded by the operation of Article 59 of the Statute ..." (*I.C.J. Reports 1986*, p. 577, para. 46)

is not applicable in the present case. It says there is a difference because the 1986 *Frontier Dispute* case was instituted by Special Agreement, which reflected the agreement of the Parties to have the entire boundary delimited. In addition, in the *Frontier Dispute* case Niger was treated as a wholly third party, while in the present case there is the Lake Chad Basin Commission in which the States bordering Lake Chad co–operate. Because of that co–operation, boundary or other agreements relating to Lake Chad between Nigeria and Cameroon are not *res inter alios acta* for the other member States of the Commission. Therefore, neither Niger nor Chad are simple third parties in this case. According to Nigeria, "the régime of Lake Chad is subject to multilateral co–operation, and is not susceptible to the thorough–going bilateralization" which the Chamber adopted in the *Frontier Dispute* case.

Nigeria also alleges that it is not the case that Chad as a third party is merely theoretically or contingently involved in the question of boundaries; there had been clashes between Nigeria and Chad in and in relation to Lake Chad. Finally, Nigeria questions the distinction which the Chamber in the *Frontier Dispute* case drew between maritime and land delimitation. "Criteria of equidistance, proportionality and equity have been applied to the delimitation of lacustrine boundaries, especially in large lakes." Nigeria's position is such that it would warrant the conclusion that its fourth preliminary objection goes not only to the jurisdiction of the Court (by analogy with the principle in the case of the *Monetary Gold Removed from Rome in 1943, Preliminary Question, Judgment, I.C.J. Reports 1954*, p. 19), but also to the admissibility of the Application, as the objection is in its view well founded on either basis.

76. Cameroon claims that the Court must exercise its jurisdiction over the totality of the disputed boundary, as far as the northern end–point within Lake Chad; Nigeria's fourth preliminary objection directly conflicts with consistent case–law relating to tripoints. Cameroon particularly rejects the Nigerian argument which distinguishes the *Frontier Dispute* decision from the present case: the absence of a special agreement, and therefore the consent of Nigeria to the institution of the proceedings, is irrelevant; Nigeria does not cite any precedent in which a differentiation was made between "wholly third States" and States which would not be real third States. *Inter se* boundary agreements from which third States are absent are frequent. Article 59 suffices as protection of the third States' rights. The concept of theoretical involvement of a third State in a boundary question is, in the view of Cameroon, not pertinent. There is no support for this concept, the implications of which are not clearly explained. Lastly Cameroon contests the efforts made by Nigeria to exclude the applicability of the *Frontier Dispute* Judgment to delimitation in lakes.

77. The Court notes that, to the extent that Nigeria's reference to the Lake Chad Basin Commission is to be understood as referring to an exclusive competence of the Commission for boundary delimitation in Lake Chad, this argument has been dealt with under the third preliminary objection. As the third preliminary objection has not been upheld, the Court need not deal with this argument again.

78. The Court moreover notes that the submissions of Cameroon addressed to it in the Additional Application (para. 17) and as formulated in the Memorial of Cameroon (Memorial of Cameroon, pp. 669–671, para. 9) do not contain a specific request to determine the localization of the tripoint

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

Nigeria–Cameroon–Chad in the Lake. The Additional Application requests the Court "to specify definitively the frontier between Cameroon and the Federal Republic of Nigeria from Lake Chad to the sea" (para. 17 *(f)* of the Additional Application), while the Memorial requests the Court to adjudge and declare:

> "that the lake and land boundary between Cameroon and Nigeria takes the following course:
>
> — from the point at longitude 14°04′59″ 9999 E of Greenwich and latitude 13°05′00″0001 N, it then runs through the point located at longitude 14°12′11″7 E and latitude 12°32′17″4 N″ (p. 669, para. 9.1 *(a)*).

These submissions nevertheless bear upon the localization of the tripoint. They could lead either to a confirmation of the localization of the tripoint as accepted in practice up to now on the basis of acts and agreements of the former colonial powers and the demarcation carried out by the Commission (see paragraph 65 above), or they could lead to a redetermination of the situation of the tripoint, possibly as a consequence of Nigeria's claims to Darak and adjacent islands. Thus these claims cannot be considered on the merits by the Court at this stage of the proceedings. However, the Court notes, at the present stage, that they are directed against Cameroon and that in due course the Court will be in a position to take its decision in this regard without pronouncing on interests that Chad may have, as the Court will demonstrate hereafter.

79. The Court therefore now turns to the crux of Nigeria's fourth preliminary objection, namely the assertion that the legal interests of Chad would be affected by the determination of the tripoint, and that the Court can therefore not proceed to that determination.

The Court recalls that it has always acknowledged as one of the fundamental principles of its Statute that no dispute between States can be decided without their consent to its jurisdiction (*Monetary Gold Removed from Rome in 1943, Judgment, I.C.J. Reports 1954*, p. 32.) Nevertheless, the Court has also emphasized that it is not necessarily prevented from adjudicating when the judgment it is asked to give might affect the legal interests of a State which is not a party to the case; and the Court has only declined to exercise jurisdiction when the interests of the third State "constitute the very subject–matter of the judgment to be rendered on the merits" (*Certain Phosphate Lands in Nauru (Nauru* v. *Australia), Preliminary Objections, Judgment, I.C.J. Reports 1992*, p. 261, para. 55; *East Timor (Portugal* v. *Australia), Judgment, I.C.J. Reports 1995*, pp. 104–105, para. 34).

The Court observes that the submissions presented to it by Cameroon refer to the frontier between Cameroon and Nigeria and to that frontier alone. These submissions do not refer to the frontier between Cameroon and the Republic of Chad either as contained in the Additional Application of Cameroon or as formulated in the Memorial. Certainly, the request to "specify definitively the frontier between Cameroon and the Federal Republic of Nigeria from Lake Chad to the sea" (para. 17 *(f)* of the Additional Application) may affect the tripoint, i.e., the point where the frontiers of Cameroon, Chad and Nigeria meet. However, the request to specify the frontier between Cameroon and Nigeria from Lake Chad to the sea does not imply that the tripoint could be moved away from the line constituting the Cameroon–Chad boundary. Neither Cameroon nor Nigeria contests the current course of that boundary in the centre of Lake Chad as it is described in the "technical document on the demarcation of the … boundaries" mentioned in paragraph 65 above. Incidents between Nigeria and Chad in the Lake, as referred to by Nigeria, concern Nigeria and Chad but not Cameroon or its boundary with Chad. Any redefinition of the point where the frontier between Cameroon and Nigeria meets the Chad–Cameroon frontier could in the circumstances only lead to a moving of the tripoint along the line of the frontier in the Lake between Chad and Cameroon. Thus, the legal interests of Chad as a third State not party to the case do not constitute the very subject–matter of the judgment to be rendered on the merits of Cameroon's Application; and therefore, the absence of Chad does not prevent the Court from proceeding to a specification of the border

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

between Cameroon and Nigeria in the Lake.

80. The Court notes also that, in the case concerning the *Territorial Dispute (Libyan Arab Jamahiriya/Chad)*, the tripoint where the boundary between Libya and Chad meets the western boundary of the Sudan, on the 24th meridian east of Greenwich, was determined without involvement of the Sudan. The eastern end–points of the principal lines taken into consideration by the Court in that case for the delimitation of the boundary between Libya and Chad were situated at various locations on the western boundary of the Sudan.

Furthermore, in that case, the Court, in the absence of Niger, fixed the western boundary between Libya and Chad as far as the point of intersection of the 15th meridian east and the parallel 23° of latitude north, a point at which, according to Chad, the frontiers of Chad, Libya and Niger meet.

81. The factual situation underlying the case concerning the *Frontier Dispute (Burkina Faso/Republic of Mali)* was quite different from the present case in the sense that the relevant part of the boundary of Niger at the time was not delimited; in that case the fixing of the tripoint therefore immediately involved Niger as a third State, which, however, did not prevent the Chamber from tracing the boundary between Burkina Faso and the Republic of Mali to its furthest point. Whether the location of the tripoint in Lake Chad has actually to be changed from its present position will follow from the judgment on the merits of Cameroon's Application. Such a change would have no consequence for Chad.

82. Finally the Court observes that, since neither Cameroon nor Nigeria challenge the current course of the boundary, in the centre of Lake Chad, between Cameroon and the Republic of Chad (see paragraph 79 above), it does not have to address — even if that was possible at the present preliminary stage — the argument presented by Nigeria concerning the legal principles applicable to the determination of boundaries in lakes and especially in large lakes like Lake Chad.

83. The fourth preliminary objection is accordingly rejected.

* *

Fifth Preliminary Objection

84. In its fifth preliminary objection Nigeria alleges that there is no dispute concerning “boundary delimitation as such” throughout the whole length of the boundary from the tripoint in Lake Chad to the sea, subject, within Lake Chad, to the question of the title over Darak and adjacent islands, and without prejudice to the title over the Bakassi Peninsula.

85. In the course of the oral proceedings, it became clear that in addition to Darak and Bakassi, there are competing claims of Nigeria and Cameroon in respect of the village of Tipsan, which each Party claims to be on its side of the boundary. Also, in the course of the oral proceedings, a question was asked of the Parties by a Member of the Court as to whether Nigeria's assertion that there is no dispute as regards the land boundary between the two States (subject to the existing problems in the Bakassi Peninsula and the Darak region) signifies,

> “that, these two sectors apart, there is agreement between Nigeria and Cameroon on the geographical co–ordinates of this boundary as they result from the texts relied on by Cameroon in its Application and its Memorial”.

The reply given to this question by Nigeria will be examined below (paragraph 91).

86. For Cameroon its existing boundary with Nigeria was precisely delimited by the former colonial powers and by decisions of the League of Nations and acts of the United Nations.

These delimitations were confirmed or completed by agreements made directly between Cameroon

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

and Nigeria after their independence. Cameroon requests that the Court "specify definitively the frontier between Cameroon and Nigeria from Lake Chad to the sea" (Additional Application, para. 17 *(f)*) along a line the co–ordinates of which are given in Cameroon's Memorial.

The fact that Nigeria claims title to the Bakassi Peninsula and Darak, and adjacent islands, means, in the view of Cameroon, that Nigeria contests the validity of these legal instruments and thus calls into question the entire boundary which is based on them. That, in the view of Cameroon, is confirmed by the occurrence, along the boundary, of numerous incidents and incursions. Nigeria's claims to Bakassi as well as its position regarding the Maroua Declaration also throw into doubt the basis of the maritime boundary between the two countries. In Cameroon's view, and contrary to what Nigeria asserts, a dispute has arisen between the two States concerning the whole of the boundary.

87. The Court recalls that,

> "in the sense accepted in its jurisprudence and that of its predecessor, a dispute is a disagreement on a point of law or fact, a conflict of legal views or interests between parties (see *Mavrommatis Palestine Concessions, Judgment No. 2, 1924, P.C.I.J., Series A, No. 2*, p. 11; *Northern Cameroons, Judgment, I.C.J. Reports 1963*, p. 27; and *Applicability of the Obligation to Arbitrate under Section 21 of the United Nations Headquarters Agreement of 26 June 1947, Advisory Opinion, I.C.J. Reports 1988*, p. 27, para. 35)" (*East Timor (Portugal* v. *Australia), Judgment, I.C.J. Reports 1995*, pp. 99–100, para. 22);

and that,

> "[i]n order to establish the existence of a dispute, 'It must be shown that the claim of one party is positively opposed by the other' (*South West Africa, Preliminary Objections, Judgment, I.C.J. Reports 1962*, p. 328); and further, 'Whether there exists an international dispute is a matter for objective determination' (*Interpretation of Peace Treaties with Bulgaria, Hungary and Romania, First Phase, Advisory Opinion, I.C.J. Reports 1950*, p. 74)" (*I.C.J. Reports 1995*, p. 100).

On the basis of these criteria, there can be no doubt about the existence of disputes with respect to Darak and adjacent islands, Tipsan, as well as the Peninsula of Bakassi. This latter dispute, as indicated by Cameroon, might have a bearing on the maritime boundary between the two Parties.

88. All of these disputes concern the boundary between Cameroon and Nigeria. However, given the great length of that boundary, which runs over more than 1,600 km from Lake Chad to the sea, it cannot be said that these disputes in themselves concern so large a portion of the boundary that they would necessarily constitute a dispute concerning the whole of the boundary.

89. Further, the Court notes that, with regard to the whole of the boundary, there is no explicit challenge from Nigeria. However, a disagreement on a point of law or fact, a conflict of legal views or interests, or the positive opposition of the claim of one party by the other need not necessarily be stated *expressis verbis*. In the determination of the existence of a dispute, as in other matters, the position or the attitude of a party can be established by inference, whatever the professed view of that party. In this respect the Court does not find persuasive the argument of Cameroon that the challenge by Nigeria to the validity of the existing titles to Bakassi, Darak and Tipsan, necessarily calls into question the validity as such of the instruments on which the course of the entire boundary from the tripoint in Lake Chad to the sea is based, and therefore proves the existence of a dispute concerning the whole of the boundary.

90. The occurrence of boundary incidents certainly has to be taken into account in this context. However, not every boundary incident implies a challenge to the boundary. Also, certain of the incidents referred to by Cameroon took place in areas which are difficult to reach and where the

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

boundary demarcation may have been absent or imprecise. And not every incursion or incident alleged by Cameroon is necessarily attributable to persons for whose behaviour Nigeria's responsibility might be engaged. Even taken together with the existing boundary disputes, the incidents and incursions reported by Cameroon do not establish by themselves the existence of a dispute concerning all of the boundary between Cameroon and Nigeria.

91. However, the Court notes that Nigeria has constantly been reserved in the manner in which it has presented its own position on the matter. Although Nigeria knew about Cameroon's preoccupation and concerns, it has repeated, and has not gone beyond, the statement that there is no dispute concerning "boundary delimitation as such". Nigeria has shown the same caution in replying to the question asked by a Member of the Court in the oral proceedings (see paragraph 85 above). This question was whether there is agreement between the Parties on the geographical co–ordinates of the boundary as claimed by Cameroon on the basis of the texts it relies upon. The reply given by Nigeria reads as follows:

> "The land boundary between Nigeria and Cameroon is not described by reference to geographical co–ordinates. Rather, the relevant instruments (all of which pre–date the independence of Nigeria and Cameroon) and well–established practice, both before and after independence, fix the boundary by reference to physical features such as streams, rivers, mountains and roads, as was common in those days. Since independence, the two States have not concluded any bilateral agreement expressly confirming or otherwise describing the pre–independence boundary by reference to geographical co–ordinates. Nevertheless, the course of the boundary, which was well established before independence and related United Nations procedures, has continued to be accepted in practice since then by Nigeria and Cameroon."

92. The Court notes that, in this reply, Nigeria does not indicate whether or not it agrees with Cameroon on the course of the boundary or on its legal basis, though clearly it does differ with Cameroon about Darak and adjacent islands, Tipsan and Bakassi. Nigeria states that the existing land boundary is not described by reference to geographical co–ordinates but by reference to physical features. As to the legal basis on which the boundary rests, Nigeria refers to "relevant instruments" without specifying which these instruments are apart from saying that they pre–date independence and that, since independence, no bilateral agreements "expressly confirming or otherwise describing the pre–independence boundary by reference to geographical co–ordinates" have been concluded between the Parties. That wording seems to suggest that the existing instruments may require confirmation. Moreover, Nigeria refers to "well–established practice both before and after independence as one of the legal bases of the boundary whose course, it states, "has continued to be accepted in practice"; however, it does not indicate what that practice is.

93. The Court is seised with the submission of Cameroon which aims at a definitive determination of its boundary with Nigeria from Lake Chad to the sea (see paragraph 86 above). Nigeria maintains that there is no dispute concerning the delimitation of that boundary as such throughout its whole length from the tripoint in Lake Chad to the sea (see paragraph 84 above) and that Cameroon's request definitively to determine that boundary is not admissible in the absence of such a dispute. However, Nigeria has not indicated its agreement with Cameroon on the course of that boundary or on its legal basis (see paragraph 92 above) and it has not informed the Court of the position which it will take in the future on Cameroon's claims. Nigeria is entitled not to advance arguments that it considers are for the merits at the present stage of the proceedings; in the circumstances however, the Court finds itself in a situation in which it cannot decline to examine the submission of Cameroon on the ground that there is no dispute between the two States. Because of Nigeria's position, the exact scope of this dispute cannot be determined at present; a dispute nevertheless exists between the two Parties, at least as regards the legal bases of the boundary. It is for the Court to pass upon this dispute.

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

94. The fifth preliminary objection raised by Nigeria is thus rejected.

* *

Sixth Preliminary Objection

95. The Court will now turn to Nigeria's sixth preliminary objection which is to the effect that there is no basis for a judicial determination that Nigeria bears international responsibility for alleged frontier incursions.

96. Nigeria contends that the submissions of Cameroon do not meet the standard required by Article 38 of the Rules of Court and general principles of law regarding the adequate presentation of facts on which Cameroon's request is based, including dates, the circumstances and precise locations of the alleged incursions and incidents into and on Cameroonian territory. Nigeria maintains that what Cameroon has presented to the Court does not give Nigeria the knowledge which it needs and to which it is entitled in order to prepare its reply. Similarly, in Nigeria's view, the material submitted is so sparse that it does not enable the Court to carry out fair and effective judicial determination of, or make determination on, the issues of State responsibility and reparation raised by Cameroon. While Nigeria acknowledges that a State has some latitude in expanding later on what it has said in its Application and in its Memorial, Cameroon is said to be essentially restricted in its elaboration to the case as presented in its Application.

97. Cameroon insists that it stated clearly in its pleadings that the facts referred to in order to establish Nigeria's responsibility were only of an indicative nature and that it could, where necessary, amplify those facts when it comes to the merits. Cameroon refers to the requirements established in Article 38, paragraph 2, of the Rules and which call for a “succinct” presentation of the facts. It holds that parties are free to develop the facts of the case presented in the application or to render them more precise in the course of the proceedings.

98. The decision on Nigeria's sixth preliminary objection hinges upon the question of whether the requirements which an application must meet and which are set out in Article 38, paragraph 2, of the Rules of Court are met in the present instance. The requirements set out in Article 38, paragraph 2, are that the Application shall “specify the precise nature of the claim, together with a succinct statement of the facts and grounds on which the claim is based”. The Court notes that “succinct”, in the ordinary meaning to be given to this term, does not mean “complete” and neither the context in which the term is used in Article 38, paragraph 2, of the Rules of Court nor the object and purpose of that provision indicate that it should be interpreted in that way. Article 38, paragraph 2, does therefore not preclude later additions to the statement of the facts and grounds on which a claim is based.

99. Nor does Article 38, paragraph 2, provide that the latitude of an applicant State, in developing what it has said in its application is strictly limited, as suggested by Nigeria. That conclusion cannot be inferred from the term “succinct”; nor can it be drawn from the Court's pronouncements on the importance of the point of time of the submission of the application as the critical date for the determination of its admissibility; these pronouncements do not refer to the content of applications (*Questions of Interpretation and Application of the 1971 Montreal Convention arising from the Aerial Incident at Lockerbie (Libyan Arab Jamahiriya* v. *United Kingdom), Preliminary Objections, Judgment, I.C.J. Reports 1998*, p. 26, para. 44; and *Questions of Interpretation and Application of the 1971 Montreal Convention arising from the Aerial Incident at Lockerbie (Libyan Arab Jamahiriya* v. *United States of America), Preliminary Objections, Judgment, I.C.J. Reports 1998*, p. 130, para. 43). Nor would so narrow an interpretation correspond to the finding of the Court that,

> “whilst under Article 40 of its Statute the subject of a dispute brought before the Court *shall be* indicated, Article 32 (2) of the Rules of Court [today Article 38, paragraph 2] requires the Applicant ‘as far as possible’ to do certain things. These words apply not only to

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

> specifying the provision on which the Applicant founds the jurisdiction of the Court, but also to stating the precise nature of the claim and giving a succinct statement of the facts and grounds on which the claim is based." (*Northern Cameroons (Cameroon* v. *United Kingdom), Preliminary Objections, Judgment, I.C.J. Reports 1963*, p. 28.)

The Court also recalls that it has become an established practice for States submitting an application to the Court to reserve the right to present additional facts and legal considerations. The limit of the freedom to present such facts and considerations is "that the result is not to transform the dispute brought before the Court by the application into another dispute which is different in character" (*Military and Paramilitary Activities in and against Nicaragua (Nicaragua* v. *United States of America), Jurisdiction and Admissibility, Judgment, I.C.J. Reports 1984*, p. 427, para. 80). In this case, Cameroon has not so transformed the dispute.

100. As regards the meaning to be given to the term "succinct", the Court would simply note that Cameroon's Application contains a sufficiently precise statement of the facts and grounds on which the Applicant bases its claim. That statement fulfils the conditions laid down in Article 38, paragraph 2, and the Application is accordingly admissible.

This observation does not, however, prejudge the question whether, taking account of the information submitted to the Court, the facts alleged by the Applicant are established or not, and whether the grounds it relies upon are founded or not. Those questions belong to the merits and may not be prejudged in this phase of the proceedings.

101. Lastly, the Court cannot agree that the lack of sufficient clarity and completeness in Cameroon's Application and its inadequate character, as perceived by Nigeria, make it impossible for Nigeria to respond effectively to the allegations which have been presented or makes it impossible for the Court ultimately to make a fair and effective determination in the light of the arguments and the evidence then before it. It is the applicant which must bear the consequences of an application that gives an inadequate rendering of the facts and grounds on which the claim is based. As the Court has stated in the case concerning *Military and Paramilitary Activities in and against Nicaragua (Nicaragua* v. *United States of America)*:

> "[u]ltimately … however, it is the litigant seeking to establish a fact who bears the burden of proving it; and in cases where evidence may not be forthcoming, a submission may in the judgment be rejected as unproved, but is not to be ruled out as inadmissible *in limine* on the basis of an anticipated lack of proof." (*Ibid.*, p. 437, para. 101.)

102. The Court consequently rejects the sixth preliminary objection raised by Nigeria.

* *

Seventh Preliminary Objection

103. In its seventh preliminary objection Nigeria contends that there is no legal dispute concerning delimitation of the maritime boundary between the two Parties which is at the present time appropriate for resolution by the Court.

104. Nigeria says that this is so for two reasons: in the first place, no determination of a maritime boundary is possible prior to the determination of title in respect of the Bakassi Peninsula. Secondly, at the juncture when there is a determination of the question of title over the Bakassi Peninsula, the issues of maritime delimitation will not be admissible in the absence of prior sufficient action by the Parties, on a footing of equality, to effect a delimitation "by agreement on the basis of international law". In Nigeria's view, the Court cannot properly be seised by the unilateral application of one State in relation to the delimitation of an exclusive economic zone or continental shelf boundary if that State has made no attempt to reach agreement with the respondent State over that boundary,

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

contrary to the provisions of Articles 74 and 83 of the United Nations Convention on the Law of the Sea. Any such unilateral application, in the view of Nigeria, is inadmissible.

105. Cameroon is of the view that the first argument invoked by Nigeria concerns neither jurisdiction nor the admissibility of its Application, but simply the method whereby the merits of the case are best addressed, a decision which falls within the discretion of the Court. As to the second argument put forward by Nigeria, Cameroon denies that the conduct of negotiations is a precondition for instituting proceedings before the Court in cases of delimitation. Cameroon views the identical paragraphs 2 of Articles 74 and 83 of the United Nations Convention on the Law of the Sea not as barring recourse to third party settlement, but as an obligation for such recourse in order to avoid unilateral delimitations.

Cameroon says that, in any event, it had sufficiently negotiated with Nigeria before it seised the Court, and it seised the Court only when it became clear that any new negotiation would be doomed to failure. In this respect, it contends that since the actual occupation of the Bakassi Peninsula by Nigeria, any negotiation on the delimitation of the maritime boundary has become impossible.

106. The Court will initially address the first argument presented by Nigeria. The Court accepts that it will be difficult if not impossible to determine the delimitation of the maritime boundary between the Parties as long as the title over the Peninsula of Bakassi has not been determined. The Court notes, however, that Cameroon's Application not only requests the Court

> "to proceed to prolong the course of its maritime boundary with the Federal Republic of Nigeria up to the limit of the maritime zones which international law places under their respective jurisdictions" (Application of Cameroon of 29 March 1994, p. 15, para. 20 *(f)*),

but also,

> "to adjudge and declare:
>
> > (a) that sovereignty over the Peninsula of Bakassi is Cameroonian, by virtue of international law, and that that Peninsula is an integral part of the territory of Cameroon" (*ibid.*, para. 20).

Since, therefore, both questions are before the Court, it becomes a matter for the Court to arrange the order in which it addresses the issues in such a way that it can deal substantively with each of them. That is a matter which lies within the Court's discretion and which cannot be the basis of a preliminary objection. This argument therefore has to be dismissed.

107. As to the second argument of Nigeria, the Court notes that, while its first argument concerned the whole maritime boundary, the second one seems only to concern the delimitation from point G seawards. That was accepted by counsel for Nigeria and seems to correspond to the fact that there were extensive negotiations between the two Parties in the period between 1970 and 1975 on the maritime boundary from the landfall on Bakassi to point G, which resulted in the disputed Maroua Declaration.

Moreover, the Court recalls that, in dealing with the cases brought before it, it must adhere to the precise request submitted to it. Nigeria here requests the Court to hold that,

> "at the juncture where there is a determination of the question of title over the Bakassi Peninsula, the issues of maritime delimitation will not be admissible in the absence of sufficient action by the Parties, on a footing of equality, to effect a delimitation 'by agreement on the basis of international law'".

What is therefore in dispute between the Parties and what the Court has to decide now is whether

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

the alleged absence of sufficient effort at negotiation constitutes an impediment for the Court to accept Cameroon's claim as admissible or not.

This matter is of a genuinely preliminary character and has to be decided under Article 79 of the Rules of Court.

108. In this connection, Cameroon and Nigeria refer to the United Nations Convention on the Law of the Sea, to which they are parties. Article 74 of the Convention, relating to the exclusive economic zone, and Article 83, concerning the continental shelf, provide, in their first identical paragraphs, that the delimitation

> “between States with opposite or adjacent coasts shall be effected by agreement on the basis of international law, as referred to in Article 38 of the Statute of the International Court of Justice, in order to achieve an equitable solution”.

These are followed by identical paragraphs 2 which provide that “If no agreement can be reached within a reasonable period of time, the States concerned shall resort to the procedures provided for in Part XV.” One of these procedures is the submission of the case to the Court for settlement by contentious proceedings.

109. However, the Court notes that, in this case, it has not been seised on the basis of Article 36, paragraph 1, of the Statute, and, in pursuance of it, in accordance with Part XV of the United Nations Convention on the Law of the Sea relating to the settlement of disputes arising between the parties to the Convention with respect to its interpretation or application. It has been seised on the basis of declarations made under Article 36, paragraph 2, of the Statute, which declarations do not contain any condition relating to prior negotiations to be conducted within a reasonable time period.

The second argument of Nigeria cannot therefore be upheld.

*

110. In addition to what has been put forward by the Parties, the question could arise whether, beyond point G, the dispute between the Parties has been defined with sufficient precision for the Court to be validly seised of it. The Court observes not only that the Parties have not raised this point, but Cameroon and Nigeria entered into negotiations with a view to determining the whole of the maritime boundary. It was during these negotiations that the Maroua Declaration relating to the course of the maritime boundary up to point G was drawn up. This declaration was subsequently held to be binding by Cameroon, but not by Nigeria. The Parties have not been able to agree on the continuation of the negotiations beyond point G, as Cameroon wishes. The result is that there is a dispute on this subject between the Parties which, ultimately and bearing in mind the circumstances of the case, is precise enough for it to be brought before the Court.

*

111. The Court therefore rejects the seventh preliminary objection.

* *

Eighth Preliminary Objection

112. The Court will now deal with the eighth and last of the preliminary objections presented by Nigeria. With that objection Nigeria contends, in the context of and supplementary to the seventh preliminary objection, that the question of maritime delimitation necessarily involves the rights and interests of third States and is to that extent inadmissible.

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

113. Nigeria refers to the particular concave configuration of the Gulf of Guinea, to the fact that five States border the Gulf and that there are no agreed delimitations between any two of those States in the disputed area. In these circumstances, the delimitation of the maritime zones appertaining to two of the States bordering the Gulf will necessarily and closely affect the others. Nigeria also holds that the situation between Cameroon and Nigeria is distinct from that underlying the case concerning the *Frontier Dispute (Burkina Faso/Republic of Mali) (Judgment, I.C.J. Reports 1986*, p. 554) as that case concerned a land boundary to the delimitation of which apply principles that are different from those applying to the delimitation of maritime boundaries. The case concerning the *Continental Shelf (Libyan Arab Jamahiriya/Malta) (Application for Permission to Intervene, Judgment, I.C.J. Reports 1984*, p. 3) was different from the present case in the sense that the areas to which the claims of the third State (Italy) related, were known; and in the case concerning the *Continental Shelf (Tunisia/Libyan Arab Jamahiriya) (Application for Permission to Intervene, Judgment, I.C.J. Reports 1981*, p. 3) the Court was merely laying down principles applicable to the delimitation of the continental shelf in a given context without actually drawing any particular line. Nigeria acknowledges that by virtue of Article 59 of the Statute, third States are not formally bound by decisions of the Court; it maintains nevertheless that Article 59 of the Statute gives insufficient protection, since in specific situations, in spite of that Article, decisions of the Court may have clear and direct legal and practical effects on third States, as well as on the development of international law.

114. Cameroon holds that the maritime delimitation which it is requesting the Court in part to confirm and in part to determine, concerns only the Parties to the present dispute. In Cameroons view, the interests of all other States are preserved by Article 59 of the Statute and by the principle according to which any delimitation as between two States is *res inter alios acta*. Referring to the jurisprudence of the Court, Cameroon claims that the Court has not hesitated to proceed to maritime delimitations in cases where the rights of third States were more clearly in issue than they are in the present case. Cameroon also finds that practice of State treaties confirms that a delimitation is in no way made impossible by the existence of the interests of neighbouring States.

115. The Court notes, as do the Parties, that the problem of rights and interests of third States arises only for the prolongation, as requested by Cameroon, of the maritime boundary seawards beyond point G. As to the stretch of the maritime boundary from point G inwards to the point of landfall on the Bakassi Peninsula, certainly a dispute has arisen because of the rival claims of the Parties to Bakassi and the fact that the Maroua Declaration is considered binding by Cameroon but not by Nigeria.

That dispute however does not concern the rights and interests of third States. That is so because the geographical location of point G is clearly closer to the Nigerian/Cameroonian mainland than is the location of the tripoint Cameroon–Nigeria–Equatorial Guinea to the mainland.

116. What the Court has to examine under the eighth preliminary objection is therefore whether prolongation of the maritime boundary beyond point G would involve rights and interests of third States and whether that would prevent it from proceeding to such prolongation. The Court notes that the geographical location of the territories of the other States bordering the Gulf of Guinea, and in particular Equatorial Guinea and Sao Tome and Principe, demonstrates that it is evident that the prolongation of the maritime boundary between the Parties seawards beyond point G will eventually run into maritime zones where the rights and interests of Cameroon and Nigeria will overlap those of third States. It thus appears that rights and interests of third States will become involved if the Court accedes to Cameroon's request. The Court recalls that it has affirmed, “that one of the fundamental principles of its Statute is that it cannot decide a dispute between States without the consent of those States to its jurisdiction” (*East Timor (Portugal* v. *Australia), Judgment, I.C.J. Reports 1995*, p. 101, para. 26). However, it stated in the same case that, “it is not necessarily prevented from adjudicating when the judgment it is asked to give might affect the legal interests of a State which is not a party to the case” (*ibid.*, p. 104, para. 34).

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

Similarly, in the case concerning *Certain Phosphate Lands in Nauru (Nauru* v. *Australia)*, it adopted the same approach:

> "a finding by the Court regarding the existence or the content of the responsibility attributed to Australia by Nauru might well have implications for the legal situation of the two other States concerned, but no finding in respect of that legal situation will be needed as a basis for the Court's decision on Nauru's claims against Australia. Accordingly, the Court cannot decline to exercise its jurisdiction." (*I.C.J. Reports 1992*, pp. 261–262, para. 55.)

The Court cannot therefore, in the present case, give a decision on the eighth preliminary objection as a preliminary matter. In order to determine where a prolonged maritime boundary beyond point G would run, where and to what extent it would meet possible claims of other States, and how its judgment would affect the rights and interests of these States, the Court would of necessity have to deal with the merits of Cameroon's request. At the same time, the Court cannot rule out the possibility that the impact of the judgment required by Cameroon on the rights and interests of the third States could be such that the Court would be prevented from rendering it in the absence of these States, and that consequently Nigeria's eighth preliminary objection would have to be upheld at least in part. Whether such third States would choose to exercise their rights to intervene in these proceedings pursuant to the Statute remains to be seen.

117. The Court concludes that therefore the eighth preliminary objection of Nigeria does not possess, in the circumstances of the case, an exclusively preliminary character.

* * *

118. For these reasons,

The Court,

(1)

(a) By fourteen votes to three,

Rejects the first preliminary objection;

IN FAVOUR: *President* Schwebel; *Judges* Oda, Bedjaoui, Guillaume, Ranjeva, Herczegh, Shi, Fleischhauer, Vereshchetin, Higgins, Parra–Aranguren, Kooijmans, Rezek; *Judge* ad hoc Mbaye;

AGAINST: *Vice–President* Weeramantry; *Judge* Koroma; *Judge* ad hoc Ajibola;

(b) By sixteen votes to one,

Rejects the second preliminary objection;

IN FAVOUR: *President* Schwebel; *Vice–President* Weeramantry; *Judges* Oda, Bedjaoui, Guillaume, Ranjeva, Herczegh, Shi, Fleischhauer, Vereshchetin, Higgins, Parra–Aranguren, Kooijmans, Rezek; *Judges* ad hoc Mbaye, Ajibola;

AGAINST: *Judge* Koroma;

(c) By fifteen votes to two,

Rejects the third preliminary objection;

IN FAVOUR: *President* Schwebel; *Vice–President* Weeramantry; *Judges* Oda, Bedjaoui, Guillaume, Ranjeva, Herczegh, Shi, Fleischhauer, Vereshchetin, Higgins, Parra–

IV. The Legal Disputes Which May Be Submitted to the Court

V. Conclusions

I. Introductory Remarks

1. I voted in favour of subparagraph 3, as well as of subparagraph 1 *(a)*, of the operative part of the Judgment, as I agree that the Court, on the basis of Article 36 (2) of the Court's Statute, has jurisdiction to adjudicate upon certain of the issues unilaterally presented by Cameroon. I share the view expressed in the Judgment concerning the interpretation and application of the Optional Clause of the Statute.

I have given this opinion the title of "separate" opinion, rather than "dissenting" opinion, mainly because, in spite of my negative votes on some points relating to admissibility, I support, in general, the Court's jurisdiction to entertain certain of the claims in Cameroon's Applications.

2. I also voted in favour of subparagraph 4, as I believe that some, but not all, of the issues in the Application are admissible. But I cast my vote on some of the subsections of subparagraph 1 and on subparagraph 2 reluctantly, as the Judges are not permitted, for any reason whatsoever, to abstain from voting on the operative part of the Judgment. Otherwise I would have abstained from voting on certain of Nigeria's objections relating to the admissibility of Cameroon's Application on the ground that Cameroon's claims were presented in a somewhat irregular way, as I shall explain later, while Nigeria's objections do not necessarily correspond to those claims and do not appear to have been formulated in a proper manner.

Thus, in seeking, both in the Judgment as a whole and in its operative part, to deal with Nigeria's objections in isolation, the Court has adopted an approach which, in my view, is not wholly adequate.

3. Cameroon's Application lacks precision and some parts of it do *not*, in my view, constitute a claim which may properly be presented to the Court by a *unilateral* application of one of the parties to a dispute. Among the contentions that Cameroon has made, only some very limited issues can be deemed as falling within the purview of the Court's jurisdiction. Just as Cameroon's Application lacks precision and is inadequate, so Nigeria's objections are also quite irregular.

The question of whether or not Cameroon's Application is admissible falls irrefutably within the competence of the Court. Although the Court is still at the jurisdictional phase due to Nigeria's presentation of preliminary objections, it does not necessarily have to restrict itself to a discussion of Nigeria's objections, but must also examine more carefully, on its own initiative, the substance of Cameroon's Application.

In addition, Nigeria, in raising a number of preliminary objections, seems to have confused the question of admissibility of the claims with the matters to be argued at the merits stage. Thus the Court is faced with an extremely difficult situation at this jurisdictional stage of the case.

4. The Court should have attempted *proprio motu* to scrutinize whether or not any of Cameroon's claims made in its Application are admissible — with or without reference to Nigeria's objections.

II. Cameroon's Application as a Whole

5. Cameroon's position has lacked clarity from the outset. Its Application appears to me to be so irregular that, from the standpoint of the Court, it should only have been received after a number of modifications. I shall begin with an examination of the irregular aspects of Cameroon's Application itself, which causes us so much difficulty in dealing with the present case.

1. The Structure of Cameroon's 1994 Application

6. On examination of the various Court documents, I note that on 29 March 1994 Cameroon filed with the Registry an "Application instituting proceedings" and on 6 June 1994 an "Application additional to the Application instituting proceedings". Having heard Cameroon's wishes, and having also ascertained that Nigeria "had no objection to the *Additional* Application being treated, in accordance with the wishes expressed by Cameroon, as an *amendment* to the initial Application" (emphasis added), the Court decided, on 16 June 1994, to deal with these two originally distinct Applications as a single case (see Judgment, para. 5).

7. The Court's document entitled "Application instituting proceedings filed in the Registry of the Court on 29 March 1994 — *Land and Maritime Boundary between Cameroon and Nigeria (Cameroon* v. *Nigeria)*" (bearing the legend "1994 General List No. 94") contains:

(I) the letter of the Cameroonian Ambassador to the Netherlands, addressed to the Registrar, dated 28 March 1994 (p. 3);

(II) the "Application instituting proceedings" (undated but filed in the Registry on 29 March 1994) (hereinafter referred to as "Application–I") (p. 5); and

(III) the "Application additional to the Application instituting proceedings brought by the Republic of Cameroon filed in the Registry of the Court on 29 March 1994" (on which no date is indicated but which was actually filed in the Registry on 6 June 1994) (hereinafter referred to as "Application–II") (p. 77).

The confused structure of these documents produced by the Court conveys an impression of the irregularity of the case.

8. The two Applications, Application–I and Application–II, each consist of five sections (the titles of which are identical in both Applications), namely, Section I ("Subject of the Dispute"), Section II ("The Facts"), Section III ("The Jurisdiction of the Court"), Section IV ("The Legal Grounds upon Which Cameroon Bases Its Case") and Section V ("Decision Requested"). In each Application, the content of Section III is approximately the same. In each case the Section indicates, explicitly or implicitly if not in identical terms, that both Parties have accepted the Court's compulsory jurisdiction in conformity with Article 36 (2) of the Statute, without any reservation. By contrast, the other four Sections in both Application–I and Application–II tend to complement one another.

9. *Application–I*. In Section I ("Subject of the Dispute"), paragraphs 1 and 2 deal with the disputes relating essentially to the question of sovereignty over the Bakassi Peninsula, whereas paragraph 3, without referring to any particular dispute, mentions simply the issue of the maritime boundary in the Gulf of Guinea beyond the terminal point (namely point G) of the boundary line alleged by Cameroon in the mouth of the Cross River.

Section II ("The Facts") traces the history over the past century of some parts of the boundary in the so–called "hinterland" including the Bakassi Peninsula. Mention is made solely of the land area, particularly the Bakassi Peninsula. If any frontier incidents or aggressions are mentioned here, they are limited mainly to the Bakassi Peninsula. The subject of maritime delimitation is not mentioned at all in this section.

In Section IV ("The Legal Grounds upon Which Cameroon Bases Its Case") a great deal is said concerning Nigeria's impairment of Cameroon's sovereignty and territorial integrity, mainly in the Bakassi Peninsula, and Nigeria's violation of the prohibition of the use of force. There is no mention of the maritime boundary in this section either.

In Section V ("Decision Requested") all the seven items *(a),(b),(c),(d),(e),(e′)* and *(e″)*, which are quoted in full in paragraph 16 of the Judgment, and on which Cameroon asks the Court to adjudge

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

and declare, appear to relate to questions and incidents concerning the Bakassi Peninsula. *Only* in item *(f)* does Cameroon, "[i]n order to prevent any dispute arising between the two States", request the Court "to proceed to prolong the course of its maritime boundary with [Nigeria] up to the limit of the maritime zones which international law places under the respective jurisdictions", in other words, the course of the boundary of the continental shelf and the exclusive economic zone within the Gulf of Guinea.

Most of the issues mentioned throughout Application–I, except for the maritime delimitation in the Gulf of Guinea, are related mainly to the border incidents in the Bakassi Peninsula. Those issues seem to constitute the real "legal dispute" between the two States for which interim measures were indicated by the Court in 1996 (*Land and Maritime Boundary between Cameroon and Nigeria, Provisional Measures, Order of 15 March 1996, I.C.J. Reports 1996*, p. 11).

It may be observed that Sections I, II, IV and V, entitled "Subject of the Dispute", "The Facts", "The Legal Grounds" and "Decision Requested", respectively, are thus presented in a random fashion.

10. *Application–II*. Section I ("Subject of the Dispute") deals with the question relating to Lake Chad, but in that same section Cameroon refers to the course of the boundary from Lake Chad to the sea. It is said that Nigeria's challenge to Cameroon's sovereignty took the form of "a massive introduction of Nigerian nationals into the disputed area, followed by an introduction of Nigerian security forces".

In Section II ("The Facts") most of the discussion is devoted to the subject of Lake Chad, but reference is also made in paragraph 6 to the "illegal and massive presence" of Nigerian nationals in various parts along the boundary from Lake Chad to the sea. In paragraph 7 the prolonged presence of the Nigerian security forces is mentioned *only* in Cameroon's part of Lake Chad.

In Section IV ("The Legal Grounds upon Which Cameroon Bases Its Case") Nigeria's alleged occupation of the territory of Cameroon is mentioned extensively, but this concerns *only* the part of Cameroon in Lake Chad.

Under Section V ("Decision Requested"), the six items *(a),(b),(c),(d),(e)* and *(e′)* (which are quoted in full in paragraph 17 of the Judgment) seem to relate *only* to Lake Chad, but in item *(f)* Cameroon requests that the Court *specify the frontier* "from Lake Chad to the sea" in view of the repeated incursions of Nigeria into Cameroon's territory.

In Application–II, as with Application–I, the four Sections I, II, IV and V, entitled "Subject of the Dispute", "The Facts", "The Legal Grounds", and "Decision Requested", respectively, are presented in a random fashion.

11. It should also be noted that, because of the random fashion of presentation and the irregular nature of each corresponding section of Application–I and Application–II (except for Section III ("The Jurisdiction of the Court"), the sections are not sufficiently interrelated. This makes the present case extremely complicated, and a proper understanding of the issues involved very difficult.

2. The Submissions Contained in Cameroon's 1995 Memorial

12. On 16 March 1995 Cameroon filed its Memorial within the time–limit prescribed in the Court's Order dated 16 June 1994 (*Land and Maritime Boundary between Cameroon and Nigeria, I.C.J. Reports 1994*, p. 104). In fact, the text of "the decision that the Court is asked to hand down" read out by the Registrar of the Court, at the President's request, at the beginning of the oral pleadings on 2 March 1998 was taken only from Section V ("Decision Requested") as it appears in both Application–I and Application–II. The "submissions" made by Cameroon in its Memorial were not even mentioned on that day in the Registrar's statement.

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

The main part of the “submissions” contained in Cameroon's Memorial is quoted in part below (the full text is quoted in the Judgment, paragraph 18). Cameroon requests the Court

“to adjudge and declare:

(a) That the lake and land boundary between Cameroon and Nigeria takes the following course: [Cameroon indicates a line from Lake Chad to the sea reflecting the alleged existing boundary provided for by treaties or international documents].

(b) That notably, therefore, sovereignty over the Peninsula of Bakassi and over the disputed parcel occupied by Nigeria in the area of Lake Chad, in particular over Darak and its region, is Cameroonian.

(c) That the boundary of the maritime zones appertaining respectively to [Cameroon] and to [Nigeria] follows the following course: [Cameroon indicates (1) a line covering the offshore area provided for in the 1975 Maroua Declaration (first subparagraph of submission *(c)*) and (2) a line beyond the offshore area, as indicated above, for the delimitation of the exclusive economic zone and the continental shelf (second subparagraph of submission *(c)*)].

(d) That by contesting the courses of the boundary defined above under *(a)* and *(c)*, [Nigeria] has violated and is violating the fundamental principle of respect for frontiers inherited from colonization *(uti possidetis juris)* and its legal commitments concerning the demarcation of frontiers in Lake Chad and land and maritime delimitation.

(e) That by using force against [Cameroon] and, in particular, by militarily occupying parcels of Cameroonian territory in the area of Lake Chad and the Cameroonian Peninsula of Bakassi, and by making repeated incursions, both civilian and military, all along the boundary between the two countries, [Nigeria] has violated and is violating its obligations under international treaty law and customary law.

(f) That [Nigeria] has the express duty of putting an end to its civilian and military presence in Cameroonian territory and, in particular, of effecting an immediate and unconditional withdrawal of its troops from the occupied area of Lake Chad and from the Cameroonian Peninsula of Bakassi and of refraining from such acts in the future;

(g) That the internationally wrongful acts referred to above and described in detail in the body of this Memorial involve the responsibility of [Nigeria].

(h) That, consequently, and on account of the material and non–material damage inflicted upon [Cameroon], reparation in a form to be determined by the Court is due from [Nigeria] to [Cameroon].” (Memorial of Cameroon, Vol. I, pp. 669–671.)

13. As in the Section entitled “Decision Requested” in Application–I and Application–II, these eight submissions (*(a)*–*(h)*) in the 1995 Memorial are complex and presented in a complicated manner. I am somewhat surprised to find that these “submissions” do not correspond particularly well to the “Decision Requested” (Section V) in Application–I and Application–II; nor does what Cameroon asks the Court to adjudge and declare, in its 1995 Memorial, even constitute an amendment to the “Decision Requested” in the 1994 Applications. It is thus difficult, given this confused presentation, to ascertain Cameroon's real intentions in bringing the present case before the Court.

Accordingly, I consider that Cameroon has failed to formulate adequately the issues set out under the title “Subject of the Dispute” (Section I) and “Decision Requested” (Section V) in Application–I and Application–II, respectively, which issues could have been, and indeed should have been, amplified in the “submissions” made in the Memorial. In my view Cameroon's claims require

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

clarification, and in effect the Court is having to make good the apparent irregularities in the Applications and in the “submissions” so that they may be presented in a proper form.

14. Careful examination of the submissions discloses the following inconsistencies on points of details. *Firstly*, I note that

— submission *(a)* concerning the lake and land boundary corresponds to item *(f)* of Section V (“Decision Requested”) of Application–II;

— submission *(c)*, second subparagraph, concerning the boundary of the maritime zone (exclusive economic zone and continental shelf) corresponds to a part of item *(f)* of Section V (“Decision Requested”) of Application–I,

and that by these submissions Cameroon simply asks the Court to *specify a boundary line either on land or at sea*. Submission *(c)*, first subparagraph, concerning the boundary in the offshore area is not mentioned at all in the 1994 Application and Cameroon further contends in this connection in submission *(d)* that Nigeria, by contesting the course put forward by Cameroon in submissions *(a)* and *(c)*, has violated and is violating the interests of Cameroon.

15. *Secondly*, I note that the submissions also include the actual boundary disputes, which constitute “legal disputes”. Thus:

— submission *(b)*, concerning the sovereignty over the Bakassi Peninsula and over the parcel in the area of Lake Chad, in particular over Darak and its region, corresponds to the seven items *(a)* to *(e″)* inclusive in Section V (“Decision Requested”) of Application–I and to the six items *(a)* to *(e′)* inclusive in Section V (“Decision Requested”) of Application–II, respectively;

— submission *(e)*, referring to repeated incursions all along the boundary between the two countries, corresponds to the allegation set out in item *(f)* in Section V (“Decision Requested”) of Application–II, namely that Nigeria, by using force against Cameroon and, in particular, by militarily occupying parcels of Cameroonian territory in the area of Lake Chad and the Cameroonian Peninsula of Bakassi, and by making repeated incursions all along the boundary between the two countries “has violated and is violating its obligations under international treaty law and customary law”;

— submissions *(e),(f),(g)* and *(h)*, concerning the alleged violation by Nigeria of its obligations under international law, the removal by Nigeria of “its military presence”, the alleged “responsibility” to be borne by Nigeria, and the payment of “reparation”, which are essentially related to the “legal disputes” as mentioned above, are in fact referred to in items *(b)* to *(e″)* of Section V (“Decision Requested”) of Application–I and also in items *(b)* to *(e′)* of Section V of Application–II.

III. Request for Delimitation of a Boundary Line

16. As stated above, in a part of its Application Cameroon requests the Court to specify the boundary line with Nigeria both at sea and on land, and to prolong the maritime boundary.

1. The Drawing of a Maritime Boundary

17. My *first* main point is the *issue of maritime matters*. In this respect, Cameroon's Application and “submissions” are not entirely consistent. In its 1994 Application–I, Cameroon “[i]n order to prevent any dispute between the two States concerning their maritime boundary” requests the Court

“to proceed to prolong the course of its maritime boundary with [Nigeria] up to the limit

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

of the maritime zones which international law places under their respective jurisdictions" (Section V, item *(f)*; emphasis added).

This is clearly a request solely for delimitation of the exclusive economic zone and the continental shelf between Cameroon and Nigeria in the Gulf of Guinea.

In contrast, in submission *(c)* of its 1995 Memorial, Cameroon not only refers to the question of the delimitation of the exclusive economic zone and the continental shelf beyond those narrow coastal areas in the Gulf of Guinea (second subparagraph of submission *(c)*) but also asks the Court to declare the course of the boundary in the areas at the mouth of the Cross River close to the coast (first subparagraph of submission *(c)*).

18. *Maritime delimitation in the mouth of the Cross River*. The delimitation in the offshore area at the mouth of the Cross River depends entirely on which country, either Cameroon or Nigeria, has sovereignty over the Bakassi Peninsula. The delimitation line down to point G, as indicated by Cameroon pursuant to the Maroua Declaration of 1975, is based on the firm assumption that the Bakassi Peninsula is in Cameroonian territory.

It may well be that Cameroon's maritime boundary in the mouth of the Cross River could only be challenged by Nigeria in connection with its alleged claim to sovereignty over the Bakassi Peninsula. Otherwise the maritime boundary in the mouth of the Cross River could not be a "legal dispute". Unless the territoriality of that region is settled, the question of the maritime delimitation in this coastal sea area would obviously be meaningless. I repeat that submission *(c)*, first subparagraph, is not *per se* a subject that may be presented to this Court.

Incidentally, though, I should like to reiterate that this issue concerning the frontier in the coastal sea areas in the mouth of the Cross River was not referred to or mentioned at all in the 1994 Application–I.

19. *Maritime delimitation in the Gulf of Guinea*. The delimitation of the exclusive economic zone and the continental shelf between neighbouring States beyond the limit of their territorial seas also cannot be an issue in the present case unless, as in the case of the offshore areas in the mouth of the Cross River, as mentioned above, the land boundary between Cameroon and Nigeria at the coast is settled by those neighbouring States. More concretely, the issue of maritime delimitation in the whole vast area of the Gulf of Guinea cannot arise independently of the territoriality of the Bakassi Peninsula. In fact the Parties have not even negotiated on such a delimitation, and no "legal dispute" has ever arisen between the two States on the delimitation of the exclusive economic zone and the continental shelf.

20. More generally, the delimitation of the exclusive economic zone and the continental shelf shall, according to the 1982 United Nations Convention on the Law of the Sea, be "effected by agreement on the basis of international law … in order to achieve an equitable solution" (Arts. 74 and 83).

In the event that a delimitation of the maritime boundary line for the exclusive economic zone or the continental shelf is required between neighbouring States, the firm wishes of the parties to delimit their respective areas must in general exist, and negotiation must be continued for this purpose. The relevant parties, after negotiation, may determine the line by agreement and, if they fail to agree, they may then seek a third–party judgment. However, the mere fact that the parties have not been able to reach agreement on the delimitation in their negotiations does not constitute a "legal dispute".

21. There has been no negotiation between Cameroon and Nigeria with a view to deciding on the delimitation of the exclusive economic zone and the continental shelf, nor has a "legal dispute" arisen between Cameroon and Nigeria which might fall within the purview of Article 36 (2) of the

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

Court's Statute.

If the Court considers that Cameroon's Application concerning the delimitation of the exclusive economic zone and the continental shelf can be entertained on the grounds that there is a “legal dispute” under the circumstances appertaining to this case, then there will be hundreds of similar disputes that could be brought to the Court from all parts of the world.

22. Over the past 20 years, I have made known my belief that maritime delimitation may be dealt with more properly by recourse to arbitration than to judicial settlement. However, I concede that the Court cannot, in principle, refuse to receive a request for demarcation of a maritime boundary *if* that request is made *jointly* by the parties. It should be noted that delimitation cases have in the past been brought to the Court by *special agreement* under Article 36 (1) of the Court's Statute — namely, the cases concerning the *North Sea Continental Shelf (Federal Republic of Germany/Denmark; Federal Republic of Germany/Netherlands)*; the case concerning the *Continental Shelf (Tunisia/Libyan Arab Jamahiriya)*; the case concerning the *Continental Shelf (Libyan Arab Jamahiriya/Malta)*; the chamber case concerning *Delimitation of the Maritime Boundary in the Gulf of Maine Area (Canada/United States of America)*; the chamber case concerning the *Frontier Dispute (Burkina Faso/Republic of Mali)*; and the chamber case concerning *Land, Island and Maritime Frontier Dispute (El Salvador/Honduras)*.

23. In conclusion, Cameroon's request that the Court specify the boundary or prolong the maritime boundary stated in item *(f)* of Section V (“Decision Requested”) of Application–I and in submission *(c)*, both first and second subparagraphs, is not a matter that can be unilaterally presented to the Court. The Court should have refused Cameroon's request, as mentioned above, as it is not competent to entertain such a unilateral application.

2. Lake and Land Boundary

24. The *second* main point that I would like to take up in connection with the drawing of a boundary line is the *issue of the lake and land boundary* between Cameroon and Nigeria. Item *(f)* of Section V (“Decision Requested”) in Application–II states:

> “[t]hat in view of the repeated incursions of Nigerian groups and armed forces into Cameroonian territory, all along the frontier between the two countries, the consequent grave and repeated incidents, and the vacillating and contradictory attitude of [Nigeria] in regard to the legal instruments defining the frontier between the two countries and the exact course of that frontier, [Cameroon] respectfully *asks the Court to specify definitively the frontier between Cameroon and [Nigeria] from Lake Chad to the sea*” (emphasis added).

In submission *(a)* Cameroon requests the Court “to adjudge and declare … that the lake and land boundary between Cameroon and Nigeria takes the … course [as indicated by Cameroon in concrete terms]”.

25. The fact is that there have occurred certain incidents of trespass by Nigerian armed forces or authorities into the border areas which Cameroon claims to be its own territory, as demarcated by the existing demarcation line interpreted from the diplomatic documents or historical facts. Such disputes have been reported in a certain parcel in the area of Lake Chad and in the Bakassi Peninsula, as well as in certain other border areas.

Cameroon deems all the incidents reported in these areas to be simply trespass in its territory by Nigeria. By contrast, Nigeria may certainly refuse to accept that these incidents were trespass and may consider that the areas or locations where the incidents occurred were its own territory. These are examples of typical boundary disputes that constitute “legal disputes” and, when a “legal dispute” concerning boundary incidents is filed with the Court Registry, the Court would certainly

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

need to ascertain whether the boundary claimed by the Applicant has been violated and whether historically or legally it is the legitimate boundary.

However, Cameroon's request that the Court definitively specify the frontier in the lake and on land is quite a different matter. Cameroon's contentions should not have concerned the *demarcation* of the boundary line.

The simple fact that one State wishes to specify the frontier between it and a neighbouring State does *not* constitute a “legal dispute” between those States. Cameroon's unilateral request for a boundary line to be indicated between its territory and Nigeria's from Lake Chad to the sea cannot be regarded as constituting a “legal dispute”, in terms of Article 36 (2) of the Statute, which may be presented unilaterally to the International Court of Justice for its adjudication.

26. I do not deny that the International Court of Justice is competent to undertake the indication of a boundary line if States refer such a matter to it under Article 36 (1) of the Statute. If Cameroon had wished, with the concurrence of Nigeria, to revise its boundary which it claimed as legitimate on the basis of legal or historical title, it could have done so by means of negotiations with the latter. If such negotiations failed, the parties would then certainly be free to seek a decision of the International Court of Justice by agreement. However, this case does not come under that category.

3. Part III — Conclusion

27. In concluding my argument in sections 1 and 2 of part III above, I am bound to point out, first of all, that the Court's decisions requested in item *(f)* of Section V of Cameroon's Application–I and Application–II, respectively, and in submissions *(c)* and *(a)* in the Cameroonian Memorial, namely, to specify the course of a boundary line or the frontier — either at sea or on land — between Cameroon and Nigeria, cannot be a subject to be presented unilaterally to this Court. This is far different from a “legal dispute” which can be the object of a unilateral application in a case between States which have both accepted the compulsory jurisdiction of the Court under Article 36 (2) of the Statute.

It is not a function of any judicial organ to accede to a unilateral request for the demarcation of a boundary line, which cannot be deemed to constitute a “legal dispute”, as the issues which may be brought unilaterally under Article 36 (2) of the Statute are limited to “legal disputes”.

28. In this respect, item *(f)* of Section V (“Decision Requested”) in both Application–I and Application–II, as well as submissions *(c)* and *(a)* in the Memorial, should be set aside. In other words, Cameroon's request that the Court indicate a boundary line, either at sea or on land, cannot be considered as falling within the purview of the Court's jurisdiction.

As I consider that Nigeria's fourth, fifth, seventh and eighth objections relate to this point in that respect, I voted in support of those objections.

IV. The Legal Disputes Which May Be Submitted to the Court

29. The only part of Cameroon's Application which can be regarded as being the presentation of a “legal dispute” under Article 36 (2) of the Statute — which the Court has jurisdiction to entertain — is related to actual incidents which took place as territorial and boundary disputes in the border lands between the two States.

I would suggest that in the present case Cameroon's Applications should have been related to the following “legal disputes”:

(1) as regards the Bakassi Peninsula, which territory Cameroon claims to be its own, a great number of intrusions by Nigerian authorities has been reported as indicated in items *(a)* to

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

(e″) of Section V (“Decision Requested”) of Application–I;

(2) as regards Lake Chad, which is divided among the four countries that border on its shores, Cameroon described some incursions by Nigerian authorities into its parcel in that area, as indicated in items *(a)* to *(e′)* of Section V (“Decision Requested”) of Application–II; and,

(3) as regards the certain border areas from Lake Chad to the sea, Cameroon describes incursions as referred to in item *(f)* of Section V (“Decision Requested”) of Application–II.

30. These three main issues, as indicated above and as demonstrated in Application–I and Application–II, are again presented in the “submissions” of the Memorial in the following manner:

“[Cameroon] … request[s] that the Court … adjudge and declare:

… … … … … … … … … . .

(b) That notably … sovereignty over the Peninsula of Bakassi and over the disputed parcel occupied by Nigeria in the area of Lake Chad, in particular over Darak and its region, is Cameroonian.

… … … … … … … … … . .

(e) That by using force against [Cameroon] and, in particular, by militarily occupying parcels of Cameroonian territory in the area of Lake Chad and the Cameroonian Peninsula of Bakassi, and by making repeated incursions, both civilian and military, all along the boundary between the two countries, [Nigeria] has violated and is violating its obligations under international treaty law and customary law.”

In connection with these incidents of trespass, Cameroon contended that Nigeria should bear responsibility and should pay reparation for the repeated incursions into those areas.

31. I conclude that the Court has jurisdiction to entertain Cameroon's Applications relating to the “legal disputes” arising out of the alleged intrusion by Nigeria into the territory in which Cameroon is allegedly entitled to sovereignty and territoriality; in other words, by the alleged violation by Nigeria of Cameroon's sovereignty in the Bakassi Peninsula and in a certain parcel in the area of Lake Chad, as well as in certain other border areas.

The issues of whether or not Nigeria has trespassed on territory claimed by Cameroon, namely in the Bakassi Peninsula and in the area of Lake Chad and elsewhere, and, in other words, whether or not the relevant areas where such trespass is alleged to have occurred were Cameroon's territory at the time of the incidents, and thus whether Nigeria has breached Cameroon's rights, and must bear responsibility and pay reparation for such breach, should certainly constitute the substance of the merits at a later stage of the proceedings in the present case. It would be open to Nigeria to lay claim to such areas on the basis of whatever diplomatic or historical facts might be available to it, and such a situation would be capable of constituting a “legal dispute”.

V. Conclusions

32. It may not be necessary to draw any conclusions in addition to what I have stated above. However, if I may repeat myself, Cameroon *cannot* bring unilaterally to the Court a case concerning simple demarcation of a boundary line either on land or at sea. In contrast, the alleged incursion by Nigeria into the alleged territory of Cameroon, for which violation of international law Nigeria may be responsible and may be liable to pay reparation, is the kind of “legal dispute” that *can* be unilaterally brought to the Court by Cameroon. The question of whether or not the boundary line which Cameroon has claimed is legitimate should be decided by the Court at the merits phase but, I

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

repeat, that should not be a question of the simple demarcation of a boundary line between two States.

33. In connection with Cameroon's Application, Nigeria certainly is free to challenge the jurisdiction of the Court to entertain that Application and its admissibility. Nigeria in fact did so. I submit, however, that apart from Nigeria's objection to the Court's jurisdiction (first preliminary objection), most of the objections raised by that Party concerning the border incidents and the borderline of the territory (second, third and sixth preliminary objections) are matters that should be dealt with at the merits phase.

(Signed) Shigeru Oda.

Separate Opinion of Judge Vereshchetin

Judge Vereshchetin

Argument of Cameroon that a dispute exists concerning the whole of the boundary from the tripoint in Lake Chad to the sea — Objection of Nigeria as to the existence of such a dispute — Non–exdusively preliminary character of this objection.

1 I voted with the majority of the judges on all the points of the operative part of the Judgment, except point 1 *(e)*. I am unable to vote “in favour” of that part of the Judgment because of my belief that the finding on which it is based is not duly supported by the evidence offered by the Applicant and does not stand the test of objective determination.

2 The *onus probandi* of the contention that the Republic of Nigeria disputes the entire boundary between the two States lies primarily with the Applicant, i.e., the Republic of Cameroon. In the reasoning of the Judgment, relating to the fifth preliminary objection of Nigeria, the Court rejected practically all the main arguments of Cameroon advanced in support of its contention. In particular, the Court stated that it:

> “does not find persuasive the argument of Cameroon that the challenge by Nigeria to the validity of the existing titles to Bakassi, Darak and Tipsan, necessarily calls into question the validity as such of the instruments on which the course of the entire boundary from the tripoint in Lake Chad to the sea is based, and therefore proves the existence of a dispute concerning the whole of the boundary” (paragraph 89 of the Judgment).

The Court also held that:

> “Even taken together with the existing boundary disputes, the incidents and incursions reported by Cameroon do not establish by themselves the existence of a dispute concerning all of the boundary between Cameroon and Nigeria.” (Paragraph 90 of the Judgment.)

3 The logical consequence of this assessment of Cameroon's arguments would have been the upholding of the fifth preliminary objection of Nigeria, or, at the least, a finding that the corresponding objection did not have an exclusively preliminary character and therefore required further consideration by the Court at the merits stage.

4 Instead, the Court itself shouldered the burden of proof of the Applicant's claim, and having briefly analysed one single document — the answer of Nigeria to a question put to the Parties by a Member of the Court — reached a conclusion which, in contradistinction to its previous reasoning, recognizes the existence of a dispute between the two States concerning the boundary as a whole. The geographical parameters of the disputed sectors of the land and lacustrine frontiers have thereby been extended to 1,600 km.

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

5 Admittedly, international contentious proceedings do not presuppose the passive reliance by the Court on the evidence produced by the litigating States. The objective determination of the existence or otherwise of a legal dispute and more so the adjudication on the substance of a dispute may require a more active role of the Court *proprio motu*, including questioning the parties, taking of independent evidence, etc. However, I cannot agree with the weight given by the Court to the answer provided by Nigeria. That answer could not be determinative for so important a finding of the Court. Nor can I subscribe to the assessment of the answer made by the Court.

6 From the reply given by Nigeria or, more generally, from the positions taken by the Parties in the course of the written and oral proceedings, it does not necessarily flow that "the claim of one Party [relating to the entire boundary] is positively opposed by the other", as is required by the settled jurisprudence of the Court for establishing the existence of a dispute (*South West Africa, Preliminary Objections, Judgment, I.C.J. Reports 1962,* p. 328).

7 For the Court to decide on the existence of a dispute between the two Parties as to the legal bases of the whole of the existing boundary, it must previously have been established that the Republic of Nigeria challenges the validity of the legal title to the whole of the boundary relied on by the Republic of Cameroon, or relies on a different legal title, or places a different interpretation on a given legal instrument relating to the entire boundary. None of those conclusions may be "positively" inferred from the documents or statements presented to the Court.

8 Indeed, Nigeria's answer recognizes that the boundary between the two States has been "fix[ed]" by "the relevant instruments (all of which pre–date the independence of Nigeria and Cameroon)". It also states that "the course of the boundary, which was well established before independence and related United Nations procedures, has continued to be accepted in practice since then by Nigeria and Cameroon" (see the reply of Nigeria reproduced in paragraph 91 of the Judgment). In my view, this position, albeit cautiously and somewhat vaguely expressed, does not conflict with the position of Cameroon, according to which the existing boundary has been delimited by the legal instruments entered into by the former colonial powers and by decisions and acts of the League of Nations and of the United Nations.

9 The repeated statements of Nigeria to the effect that there is no dispute concerning "boundary delimitation as such" and the reserved and cautious formulations in the above–quoted answer may signify the disinclination of Nigeria to unfold its legal arguments on the merits. True, they may also be viewed as evidence of the probable emergence of a broader dispute. However, the real scope of such a dispute, if any, its parameters and concrete consequences can be clarified only at the merits stage when the Court has compared the maps produced by both Parties and more fully heard and assessed the substance of interpretation placed by each Party on respective legal instruments.

10 This prompts the conclusion that the objection in question does not possess an exclusively preliminary character within the meaning of Article 79, paragraph 7, of the Rules of Court. At this stage, the Court cannot easily dismiss the objection of Nigeria, according to which, with the exception of the concretely defined sectors of the common frontier, "there is no dispute concerning boundary delimitation as such throughout the whole length of the boundary from the tripoint in Lake Chad to the sea". Moreover, in its submissions Nigeria has specified long stretches, not to say most, of the boundary, remaining outside the disputed areas (see, for example, the final submissions on behalf of Nigeria in the oral proceedings, paragraph 19 of the Judgment).

11 Thus, from the factual point of view, the competing claims of Cameroon and Nigeria over territories situated in three sectors of their common boundary, namely in the areas of the Bakassi Peninsula, Darak and adjacent islands and Tipsan, taken together with sporadic incidents in some other sectors of the boundary, do not justify the sweeping conclusion that a dispute has already manifestly arisen concerning the whole length of the boundary between the two States. Therefore, the finding of the Court on the existence of such a dispute is not well founded on the facts of the

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

matter. It is equally ill founded in point of law, for the Court has not objectively determined that the legal basis of the whole of the boundary is challenged by one of the Parties.

(Signed) Vladlen S. Vereshchetin.

Separate Opinion of Judge Higgins

Judge Higgins

Discretionary power of the Court concerning sequence in which it settles issues before it — Sufficiently precise character of a dispute — Whether existence of a dispute under Article 38 of the Statute — Court's powers proprio motu regarding objections to jurisdiction.

1 As is recalled in the first paragraph of the Court's Judgment, Cameroon on 29 March 1994 instituted proceedings against Nigeria in respect of a dispute "relat[ing] essentially to the question of sovereignty over the Bakassi Peninsula". Cameroon recalled in its Application that the delimitation of its maritime boundary with Nigeria had been partial and the two Parties had been unable to complete it. It accordingly requested the Court, "in order to avoid further incidents between the two countries, … to determine the course of the maritime boundary between the two States beyond the line fixed in 1975".

2 Nigeria, in its seventh preliminary objection, stated:

> "There is no legal dispute concerning delimitation of the maritime boundary between the two Parties which is at the present time appropriate for resolution by the Court, for the following reasons:
>
> > (1) no determination of a maritime boundary is possible prior to the determination of title in respect of the Bakassi Peninsula;
> >
> > (2) at the juncture where there is a determination of the question of title over the Bakassi Peninsula, the issues of maritime delimitation will not be admissible in the absence of sufficient action by the Parties, on a footing of equality, to effect a delimitation 'by agreement on the basis of international law'."

3 In its written pleadings Nigeria advanced certain arguments to support this preliminary objection. These were further developed and elaborated in oral argument before the Court. As the Court recounts at paragraphs 104 to 108 of its Judgment, Nigeria contended that as determination of title to the Bakassi Peninsula must precede a delimitation of the maritime boundary, a claim as to the latter was inadmissible. Nigeria also stated that there had been no negotiations on any delimitation beyond the point identified as "G" in Cameroon's proposed maritime frontier line.

4 The Court recalls Cameroon's responses to these points at paragraph 105 and it has rendered its judgment on them at paragraphs 106 to 110. I am essentially in agreement with what it says in paragraphs 106 to 109 but not in paragraph 110.

5 There is an aspect related to the first limb of Nigeria's objection which seems to me important. I refer to the question of whether there is, in fact and in law, a dispute relating to the maritime zones of Cameroon and Nigeria out to the limit of their respective jurisdictions. Nigeria, in its written and oral pleadings on its seventh preliminary objection, has focused on the alleged absence of relevant negotiations. It contends that as a matter of general international law and by virtue of Articles 74 and 83 of the United Nations Convention on the Law of the Sea, a State must negotiate its maritime boundary and not impose it unilaterally and that the Court thus lacks jurisdiction and/or the claim on maritime delimitation is inadmissible. But it may be that the real relevance of the issue of negotiation lies rather in providing an indication as to whether a dispute exists at all over this matter. This, rather than whether negotiation is a "free standing" pre–condition for bringing a claim on a maritime

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

boundary, seems to me the real issue.

6 In its Application Cameroon states its purpose in seeking the maritime delimitation as the avoidance of further incidents. The Court has not been informed of any maritime "incidents" beyond the territorial seas. Further, paragraph 20 *(f)* of its original Application, is in the following terms:

> "In order *to prevent any dispute arising* between the two States concerning their maritime boundary, the Republic of Cameroon requests the Court to proceed to prolong the course of its maritime boundary with the Federal Republic of Nigeria up to the limit of the maritime zones which international law places under their respective jurisdictions." (Emphasis added.)

7 Whose fault it was that no agreement had been reached beyond point G, and whether the record shows that it was because of Nigeria's change of position on the Maroua Declaration or because both sides accepted that delimitation beyond G should be on a multilateral basis in order to take account of the interest of other States in the region, is in a sense beside the point. These matters, which assume a certain importance if the key issue is whether there is a duty to negotiate before bringing a maritime delimitation claim (and if so, whether this is a preliminary or substantive matter), become less pertinent if the real preliminary issue is whether a dispute exists between the parties as to the maritime boundary out to the limit of their respective jurisdictions.

8 An initial question that I have carefully considered is as to whether it is appropriate to be concerned about this issue at all, given that Nigeria has not chosen to advance the point in these terms. Although the Court always may raise points of law *proprio motu*, it is in principle for a respondent State to decide what points of jurisdiction and inadmissibility it wishes to advance. If a State is willing to accept the Court's jurisdiction in regard to a matter, it is generally not for the Court — its entitlement to raise points *proprio motu* notwithstanding — to raise further jurisdictional objections. However, I think that an exception to this principle exists where the matter relates to the requirements of Article 38 of the Statute. Article 38 is not a clause to be accepted or waived by respondents at will. It prescribes the fundamental conditions for the Court to be able to exercise its jurisdiction. And it is there that the Court's function is described as "to decide in accordance with international law such disputes as are submitted to it".

9 The Court must always therefore itself be satisfied that a dispute exists. The Court has recalled, when pronouncing upon Nigeria's fifth preliminary objection, the various legal requirements elaborated in its case–law on the question of the existence of a dispute (see Judgment, paras. 87–89, above). It is not necessary to repeat them here. But in my view these legal requirements should have been systematically tested in relation to the seventh preliminary objection and not just in relation to the fifth.

10 The record shows that it was intended by the Parties that their entire maritime frontier should be delimited. There were some discussions about the totality of such a frontier, even going beyond what came to be agreed up to point G. At the same time, the specific line that was negotiated and agreed upon, in 1975, was the line to point G. Nigeria has informed the Court, and Cameroon has not denied, that "the very first time Nigeria saw [Cameroon's claim] line, or indeed any Cameroon continental shelf or EEZ claim line, was when it received the Cameroon Memorial" (CR 98/2, p. 40).

11 Nigeria resiled from the Maroua Declaration and the record shows that meetings held at the Joint Expert level were understandably pre– occupied with the legal status of that Declaration. The information provided to the Court also shows that there had been an intention that progress beyond point G should be on a multilateral basis, given the proximity, in particular, of Equatorial Guinea beyond that point. Possible ways to engage Equatorial Guinea in discussions had been canvassed.

12 It matters not whether the failure to reach agreement beyond point G was due primarily to the

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

dispute over the status of the Maroua Declaration; or difficulties in engaging the interest of Equatorial Guinea in the delimitation; or what Cameroon terms the invasion of the Bakassi Peninsula by Nigeria in December 1993. Nor is it legally pertinent that the Parties entered into negotiations with a view to regulating the whole of the boundary, or even that there were some discussions about the frontier beyond point G. These elements are indeed relevant to the issue as formulated by the Parties — namely, whether there is an obligation to negotiate before bringing a maritime boundary claim to the Court, and if so, if that is a procedural or substantive matter, and if the former, to whom fault may be attributed and whether there are circumstances in which negotiations became impossible and thus legally unnecessary.

13 But whether there exists a dispute or not is a different question and is “a matter for objective determination” (*Interpretation of Peace Treaties with Bulgaria, Hungary and Romania, First Phase, Advisory Opinion, I.C.J. Reports 1950*, p. 74). Quite different elements from those the Parties have debated apply. There has to be a “claim of one party [that] is positively opposed by the other” (*South West Africa* cases, *Preliminary Objections, Judgment, I.C.J. Reports 1962,* p. 328). It is not sufficient for this purpose to say that as the Bakassi Peninsula is disputed, it necessarily follows that the maritime boundary is in dispute. And, in contrast to the position with regard to the land boundary, there is (beyond point G) no existing treaty line which constitutes the claim of one Party and which the other Party — even by implication — appears not to accept. No specific claim line beyond point G had, before the institution of these proceedings, been advanced by Cameroon and rejected by Nigeria.

14 The fact that Nigeria and Cameroon have not been able to have detailed negotiations, still less agreement, beyond point G does not mean that there exists a dispute over H to K. Indeed, Nigeria has offered no opinion on where the line should run after point G.

15 What the Court will decide on the merits as to title over the Bakassi Peninsula will inevitably have implications for the drawing of the maritime boundary out to the limits of the jurisdiction of the two States. This is so whether the decision would favour Cameroon or Nigeria. The Court has no way to know whether any specific line that might, as a consequence, be proposed by one Party would be accepted or rejected by the other. The point is not that a maritime boundary cannot be drawn before the territorial title to Bakassi is determined and, as Nigeria contends, a request to the Court to determine the line must be rejected as inadmissible. As the Court correctly says, the handling of the territorial and maritime elements would be within its own discretion and cannot be the basis of a preliminary objection (Judgment, para. 106). The point rather is that the claim as formulated in Cameroon's Application at paragraph 20 *(f)* is unattached to a defined dispute and thus also lacks a certain reality.

16 Nor can it be the case that where there is jurisdiction over a territorial dispute, and the parties have in consequence (and perhaps also for other reasons) not been able to agree a maritime boundary, there is *ipso facto* and without need to show anything more, a dispute over the entirety of their maritime boundary to the limits permitted under international law. Such a contention — had it been formulated this way — would both have been inconsistent with the Court's jurisprudence on the concept of a dispute for purposes of Article 38 of the Statute, and have disturbing policy implications.

17 It is because paragraph 110 has not satisfied me on this matter, and notwithstanding my agreement with the rest of what the Judgment has to say on Nigeria's seventh preliminary objection, that I have had to vote against paragraph 1 *(g)* of the *dispositif*.

18 As I believe the Court presently has no jurisdiction over the question of maritime delimitation beyond point G, Nigeria's eighth preliminary objection thus becomes without purpose and falls away, and the Court's response to it too. It is for that reason, and that reason only, that I have voted against paragraph 2 of the *dispositif*. My views on the seventh preliminary objection have certain consequences for the eighth. But I do not otherwise disagree with what the Court has to say

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

at paragraphs 115 to 117.

(Signed) Rosalyn Higgins.

Separate Opinion of Judge Parra–Aranguren

Judge Parra–Aranguren

Nigeria's fourth preliminary objection — The determination of the States "affected" by the decision of the Court belongs to the merits — It cannot be left to the Parties but must be made by the Court — The decision, at the jurisdictional stage, that the interests of Chad are not affected, precludes the possibility of its eventual subsequent intervention according to Article 62 of the Statute of the Court — The objection does not have, in the circumstances of the case, an exclusively preliminary character.

1. I have voted against subparagraph 1 *(d)* of the operative part of the Judgment rejecting the fourth preliminary objection raised by Nigeria for the following reasons:

2. Nigeria's fourth preliminary objection requests the Court not to determine in these proceedings the boundary in Lake Chad to the extent that that boundary constitutes or is determined by the tripoint Nigeria–Cameroon–Chad in Lake Chad, because its location affects a third State, the Republic of Chad. Nigeria also stated that the matter raised by its objection is not affected whether it

> "is considered as one going to the Court's jurisdiction (on the analogy of the principle in the case concerning *Monetary Gold Removed from Rome in 1943, Judgment, I.C.J. Reports 1954*, p. 32, as applied by the Court, most recently, in the case concerning *East Timor (Portugal* v. *Australia), Judgment, I.C.J. Reports 1995*, p. 90) or as to the admissibility of the proceedings (on the analogy of cases such as the case concerning *Northern Cameroons, I.C.J. Reports 1963*, p. 32)" (Preliminary Objections of the Federal Republic of Nigeria, p. 84, para. 4.11).

3. The question of third States "affected" by the decision on the merits was examined by the Court in its Judgment of 26 November 1984 in the case concerning *Military and Paramilitary Activities in and against Nicaragua (Nicaragua* v. *United States of America), Jurisdiction and Admissibility*. On that occasion it was stated that:

> "this is a question concerning matters of substance relating to the merits of the case: obviously the question of what States may be 'affected' by the decision on the merits is not in itself a jurisdictional problem" (*I.C.J. Reports 1984, p. 425*, para. 76).

4. I am in agreement with the principle embodied in the above quotation. I therefore support paragraph 78 of the Judgment, in which it is maintained that Nigeria's claims to Darak and adjacent islands could bring about a redetermination of the situation of the tripoint Nigeria– Cameroon–Chad in Lake Chad, and that these claims cannot be considered by the Court at this stage of the proceedings.

5. I cannot accept, however, the statement at the end of paragraph 78, in which it is concluded that the Court, in due course, will be in a position to take its decision regarding the redetermination of the tripoint Nigeria–Cameroon–Chad "without pronouncing on interests that Chad may have, as the Court will demonstrate hereafter". This statement clearly runs counter to the jurisprudence of the Court in the *Nicaragua* case, as quoted above, which I consider correct. Accordingly, in my opinion it is not possible for the Court, at this stage of the proceedings, to decide whether or not the redetermination of the tripoint Nigeria– Cameroon–Chad in Lake Chad may be made "without pronouncing on interests that Chad may have".

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

6. Paragraph 79 of the Judgment repeats that the request made by Cameroon to

> "'specify definitively the frontier between Cameroon and the Federal Republic of Nigeria from Lake Chad to the sea" (para. 17 *(f)*) of the Additional Application), may affect the tripoint, i.e., the point where the frontiers of Cameroon, Chad and Nigeria meet";

and in order to demonstrate why the legal interests of the Republic of Chad are not affected the Court states:

> "However, the request to specify the frontier between Cameroon and Nigeria from Lake Chad to the sea does not imply that the tripoint could be moved away from the line constituting the Cameroon–Chad boundary. Neither Cameroon nor Nigeria contests the current course of that boundary in the centre of Lake Chad as it is described in the 'technical document of the demarcation of the … boundaries' mentioned in paragraph 65 above … Any redefinition of the point where the frontier between Cameroon and Nigeria meets the Chad–Cameroon frontier could in the circumstances only lead to a moving of the tripoint along the line of the frontier in the Lake between Chad and Cameroon. Thus, the legal interests of Chad as a third State not party to the case do not constitute the very subject–matter of the judgment to be rendered on the merits of Cameroon's Application; and therefore, the absence of Chad does not prevent the Court from proceeding to a specification of the border between Cameroon and Nigeria in the Lake."

7. As stated by the Court in its Judgment of 26 November 1984, rendered in the *Nicaragua* case, "[c]ertainly the determination of the States 'affected' could not be left to the parties but must be made by the Court" (*Military and Paramilitary Activities in and against Nicaragua (Nicaragua* v. *United States of America), Jurisdiction and Admissibility, I.C.J. Reports 1984*, p. 425, para. 75). Consequently, in my opinion, it is not for Cameroon and Nigeria to decide whether the interests of the Republic of Chad are affected or not, as suggested in paragraph 79 of the Judgment.

8. I agree with the statement in paragraph 79 that "the legal interests of Chad as a third State not party to the case do not constitute the very subject–matter of the judgment to be rendered on the merits of Cameroon's Application"; but I cannot accept that, at this stage of the proceedings, the Court can decide whether the interests of the Republic of Chad are "affected" by the determination of the tripoint Nigeria– Cameroon–Chad in Lake Chad, and in the affirmative, to what extent. Such a determination is a matter for the merits, as decided by the Court in the *Nicaragua* case, because "it is only when the general lines of the judgment to be given become clear that the States 'affected' could be identified" (*I.C.J. Reports 1984*, p. 425, para. 75).

9. I am in agreement with paragraph 81 of the Judgment, when it states that "Whether the location of the tripoint in Lake Chad has actually to be changed from its present position will follow from the judgment on the merits of Cameroon's Application." Therefore, it is very difficult for me to understand how the Court, at this stage of the proceedings, may also decide in the same paragraph that an eventual and unknown change of the tripoint Nigeria–Cameroon–Chad in Lake Chad "would have no consequence for Chad".

10. According to Article 62 of the Statute, "[s]hould a State consider that it has an interest of a legal nature which may be affected by the decision in the case, it may submit a request to the Court to be permitted to intervene". Consequently, in stating that the interest of the Republic of Chad is not affected by the determination of the tripoint Nigeria– Cameroon–Chad in Lake Chad, as it does in paragraphs 78, 79 and 81 of the Judgment, the Court is, at the same time, precluding any possible intervention by the Republic of Chad at a later stage of the present case between Cameroon and Nigeria. In my opinion, this is a quite astonishing decision, in particular because the Court does not have the slightest idea as to what is the viewpoint of the Republic of Chad on the matter.

11. In the above–mentioned Judgment of 26 November 1984, rendered in the *Nicaragua* case, the Court examined in particular the reservation made by the United States, when depositing its Optional Clause declaration, to exclude disputes arising under multilateral treaties unless all parties to the treaty affected by the decision were also parties to the case; and it stated:

> "since the procedural technique formerly available of joinder of preliminary objections to the merits has been done away with since the 1972 revision of the Rules of Court, the Court has no choice but to avail itself of Article 79, paragraph 7, of the present Rules of Court, and declare that the objection based on the multilateral treaty reservation of the United States Declaration of Acceptance does not possess, in the circumstances of the case, an exclusively preliminary character, and that consequently it does not constitute an obstacle for the Court to entertain the proceedings instituted by Nicaragua under the Application of 9 April 1984" (*Military and Paramilitary Activities in and against Nicaragua (Nicaragua* v. *United States of America), Jurisdiction and Admissibility, I.C.J. Reports 1984*, pp. 425–426, para. 76).

12. The reasons stated by the Court on that occasion are applicable to the fourth preliminary objection raised by Nigeria requesting the Court not to determine in these proceedings the boundary in Lake Chad to the extent that that boundary constitutes or is determined by the tripoint Nigeria–Cameroon–Chad in Lake Chad, because its location directly affects a third State, the Republic of Chad. Accordingly, in my opinion, the Court should have declared that the objection does not have, in the circumstances of the case, an exclusively preliminary character.

(Signed) Gonzalo Parra–Aranguren.

Separate Opinion of Judge Kooijmans

Judge Kooijmans

Whether there is a dispute between the Parties as to the continuation of the maritime boundary beyond point G — No specific claim raised by Applicant at date of filing of Application which was positively opposed by Respondent — Seventh preliminary objection should have been partially upheld — Eighth preliminary objection consequently without object — Judicial propriety, unilateral application and rights and interests of third States in cases of delimitation of maritime boundary.

1. I have voted in favour of paragraphs 3 and 4 of the *dispositif*, which state that the Court has jurisdiction to adjudicate upon the dispute and that Cameroon's Application is admissible. That does not mean, however, that I support the Court's findings with regard to each and every preliminary objection raised by Nigeria. I voted against the Court's conclusion in subparagraph 1 *(g)* that the seventh preliminary objection must be rejected. Consequently, I had to vote also against the Court's conclusion in paragraph 2 that the eighth preliminary objection does not have, in the circumstances of the case, an exclusively preliminary character. In the following I wish to set out my viewpoints with regard to these matters.

2. In its seventh preliminary objection, Nigeria submitted that there is no legal dispute concerning delimitation of the maritime boundary between the two Parties which is at the present time appropriate for resolution by the Court. In this respect, Nigeria relied on two arguments; in the first place it contended that no determination of a maritime boundary is possible prior to the determination of title in respect of the Bakassi Peninsula. I fully share the Court's view that, since Cameroon has also requested the Court to decide on the question of the title to the Bakassi Peninsula, the issue raised by Nigeria is a question of method and that it lies within the Court's discretion how to deal with these two issues (paragraph 106 of the Judgment).

3. Nigeria's second argument is that the issue of maritime delimitation is inadmissible in the

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

absence of sufficient prior negotiations with regard to the maritime boundary beyond point G. Nigeria does not contest that extensive negotiations have taken place with regard to the course of the boundary from the landfall on Bakassi to point G; these negotiations led to the Declaration of Maroua, the binding character of which is contested by Nigeria. Nigeria does not deny, therefore, that there is a legal dispute between the Parties concerning that part of the boundary. It contends, however, that there never have been serious negotiations on the determination of the boundary between point G and "the limit of the maritime zones which international law places under the Parties' respective jurisdiction", whereas such negotiations are prescribed by Articles 74 and 83, paragraphs 2, of the 1982 Convention on the Law of the Sea.

4. I am of the opinion that, whatever must be held of the interpretation of these Articles of the Law of the Sea Convention with respect to the necessity of prior negotiations before a maritime delimitation issue may be unilaterally submitted to third–party settlement, such negotiations must have the possibility of leading to an agreement. In the present case, negotiations clearly could not have led to a positive result. The dispute which has developed on the legal value of the Maroua Declaration may be said to have made negotiations on the seaward continuance of the line agreed upon in that Declaration futile. And this situation has been aggravated by the subsequent dispute about the legal status of the Bakassi Peninsula. If negotiations cannot lead to results, they cannot be seen as a necessary pre–condition in the meaning of Articles 73 and 84 of the 1982 Convention, even if these Articles were to be interpreted as making such negotiations indispensable.

5. Nigeria further contends that the negotiations leading to the Maroua Declaration only dealt with the delimitation of what both Parties at the time considered to be their territorial sea and that the bilateral negotiations were never intended to cover also the delimitation of the exclusive economic zone and the continental shelf (Preliminary Objections of Nigeria, p. 119; CR 98/2, p. 41). Whatever the character, and, in particular, the intensity of such more general negotiations, Cameroon's claim that the negotiations which had taken place since 1970 had always been carried out with a view to delimiting the whole of the maritime boundary is in my view correct. This is borne out by the fact that already in the Declaration of the Nigeria–Cameroon Joint Boundary Commission of June 1971 it is stated that the delimitation of the maritime boundary should be done in due course to include the delimitation of the boundary in the continental shelf in accordance with the 1958 Geneva Convention on the Continental Shelf (Preliminary Objections of Nigeria, Ann. 21, p. 240). Moreover, even at that early moment, it was recognized that:

> "since the Continental Shelves of Nigeria, Cameroon and Equatorial Guinea would appear to have a common area, the attention of the Heads of State of Cameroon and Nigeria should be drawn to this fact so that appropriate action might be taken" (*ibid.,* Ann. 21, p. 241).

At a later stage, even after the breakdown of the negotiations as a result of the dispute over the Maroua Declaration, such appropriate action was specified as taking the form of a "tripartite meeting" to examine the issue of the determination of the triple point as an essential condition for the delimitation of the maritime borders between the three countries (Third Session of the Nigeria–Cameroon Joint Meeting of Experts on Boundary Matters, August 1993, Preliminary Objections of Nigeria, Ann. 55, p. 465).

6. Although I share the Court's view that the alleged absence of sufficient prior negotiations is no impediment for the admissibility of Cameroon's claim, I cannot follow the Court when it says that it, consequently, rejects the seventh preliminary objection in its entirety. In this respect, it is necessary to recall Nigeria's formulation that there is no legal dispute concerning delimitation of the maritime boundary between the two Parties which is *at the present time appropriate for resolution* by the Court (emphasis added). The Statute of the Court explicitly states that its jurisdiction is concerned with the decision on disputes (Art. 38, para. 1, and Art. 36, para. 2; the latter is also

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

applicable in the present case). For the Court to have jurisdiction it is therefore of vital importance to determine whether there is a dispute and in the affirmative case to identify such dispute. As Professor Rosenne says:

> "The function of the concept of *dispute* is to express in a legally discrete term the matter in connection with which the Court is empowered to make a judicial decision having final and binding force on the parties."[1]

And the Court itself stated in the *Nuclear Tests* cases:

> "The Court, as a court of law, is called upon to resolve existing disputes between States. Thus the existence of a dispute is the primary condition for the Court to exercise its judicial function." (*Nuclear Tests (Australia* v. *France), Judgment, I.C.J. Reports 1974*, pp. 270–271, para. 55.)

7. During their history, the present Court and its predecessor have given great attention to determine what a dispute, which lends itself for judicial decision, is. Their findings have been recalled in the present Judgment (para. 87) where the Court deals with the fifth preliminary objection. The Court there refers to the *South West Africa* cases where it stated that "[i]t must be shown that the claim of one party is positively opposed by the other" (*South West Africa, Preliminary Objections, Judgment, I.C.J. Reports 1962*, p. 328). It also referred to another statement by the Court, namely "[w]hether there exists an international dispute is a matter for objective determination" (*Interpretation of Peace Treaties with Bulgaria, Hungary and Romania, First Phase, Advisory Opinion, I.C.J. Reports 1950*, p. 74). Both statements were recently repeated in the Judgment in the *East Timor (Portugal* v. *Australia)* case, *I.C.J. Reports 1995*, p. 100, para. 22). After a painstaking analysis, the Court came with regard to the fifth preliminary objection to the conclusion that a dispute exists between the two Parties, at least as regards the legal bases of the whole of the existing boundary, although it is not yet possible to determine its exact scope. I fully subscribe to that conclusion.

8. In my view, the Court should have applied the same criteria with regard to the question whether a dispute exists between Cameroon and Nigeria as to the delimitation of the maritime boundary from point G to the outer limit of the various maritime zones. It is undoubtedly true that Nigeria has not raised this point as a separate argument and that, consequently, Cameroon has not seen fit to try and define the exact subject–matter of this dispute. This does, in my opinion, not relieve the Court of the task to determine *proprio motu* whether there exists a dispute which is the subject of the Application. As the Court said in the *South West Africa* cases:

> "A mere assertion is not sufficient to prove the existence of a dispute any more than a mere denial of the existence of the dispute proves its non–existence." (*South West Africa, Preliminary Objections, Judgment, I.C.J. Reports 1962,* p. 328),

whereupon the Court, independently of the arguments of the Parties, decided that a dispute existed. It is therefore for the Court to "objectively determine whether there exists an international dispute".

9. In its Application, filed on 29 March 1994, Cameroon requested

> "the Court …
>
>> (f) In order to prevent any dispute arising between the two States concerning their maritime boundary … to prolong the course of [this] boundary with the Federal Republic of Nigeria up to the limit of the maritime zones which international law places under their respective jurisdictions."

No further legal grounds for this request nor any other details underpinning it were provided in the

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

Application which, therefore, hardly seems to meet the conditions of Article 38, paragraph 2, of the Rules of Court as far as this part of the claim is concerned.

In its Memorial, dated 16 June 1994, Cameroon specified its request by asking the Court to adjudge and declare:

> "(c) That the boundary of the maritime zones appertaining respectively to the Republic of Cameroon and to the Federal Republic of Nigeria follows the following course:
>
> … … … … … … … … …
>
> — from point G that boundary then swings south–westward in the direction which is indicated by points G, H, I, J and K represented on the sketch–map on page 556 of this Memorial and meets the requirements for an equitable solution, up to the outer limit of the maritime zones which international law places under the respective jurisdictions of the two Parties."

On page 556 of the Memorial a map was reproduced entitled "La Délimitation Equitable" on which the various points mentioned in the submissions were indicated; an explanatory memorandum on the location of these points is contained in paragraphs 5.107 to 5.128 of the Memorial.

10. The critical date for the Court having jurisdiction and for the admissibility of an Application and, therefore, of the determination of the existence of a dispute is that of the Application's filing. This has been the established jurisprudence of the Court and has been recently confirmed in the Judgment of 27 February 1998 on the Preliminary Objections in the *Lockerbie* case (*Questions of Interpretation and Application of the 1971 Montreal Convention arising from the Aerial Incident at Lockerbie (Libyan Arab Jamahiriya* v. *United States of America), I.C.J. Reports 1998,* pp. 128–129, para. 36, and pp. 130–131, para. 43). Can it really be said that at the day the Application was filed there was with regard to the maritime boundary beyond point G a claim of Cameroon which was "positively opposed" by Nigeria, a "disagreement on a point of law or fact, a conflict of legal views or interests" between the Parties?

11. Although Nigeria did raise the matter of the non–existence of a dispute only in the context of an alleged absence of prior negotiations, it nevertheless drew the Court's attention to the fact that it had never been presented with a specific claim by Cameroon with regard to the continuation of the projected boundary line beyond point G. In its preliminary objections it stated:

> "Nigeria for its part has not yet had the opportunity to consider, in the context of diplomatic negotiations, *any* proposal for the delimitation of the respective maritime zones … beyond 'point G'. It learned of Cameroon's actual position as to delimitation beyond 'point G' *only when it received the* Memorial." (Preliminary Objections of Nigeria, p. 120, para. 7.15; emphasis added.)

12. If Rosenne is correct in saying that the existence of a dispute may be established from the examination of the positions of the parties, as expressed in the diplomatic history of the matter[2], what more do we learn from that diplomatic history than that there is a clear disagreement about the location of point G, the starting point of the "prolonged" maritime boundary, and the fact that the Parties agree that for the delimitation of their maritime zones the involvement of third countries, in particular Equatorial Guinea, is essential to the delineation of their maritime borders (Preliminary Objections of Nigeria, Ann. 55, p. 465), an understanding which was confirmed as late as 1993, long after the dispute about the binding character of the Maroua Declaration emerged?

How can the subject–matter of such a dispute be described in legal terms? What are the opposing legal claims which empower the Court to make a judicial decision having final and binding force on the Parties? Can it really be said that there "is a legal dispute which is at the present time

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

appropriate for resolution by the Court"?

13. It deserves mentioning also that — in so far as there would be a dispute as to the "prolonged" boundary beyond point G — the whole issue is obfuscated by the fact that it is exactly the contested location of point G which is determinative for the settlement of that dispute. Now it may be said that this is as much a matter of method as the relationship between the disputed title to Bakassi and the initial leg of the maritime boundary up till point G and that the order in which the various issues will be dealt with lies within the discretion of the Court. Here, however, the position of points H–K are indissolubly linked with the location of point G as established in the Maroua Declaration. Any determination by the Court, which is different from Cameroon's claim, will totally unsettle its claim with regard to the seaward continuation of the maritime boundary in case the specific claim, as rephrased in its Memorial, would be accepted as an element of the dispute.

14. All this would have been different, of course, if the two Parties had concluded an agreement to submit the matter of the determination of the maritime boundary to the Court and had been able to plead their differing or opposing views, asking the Court either to define the legal principles and rules applicable to the delimitation of the maritime zones or to determine it itself. It would have been difficult for the Court to avoid or even refuse to give such a decision, even if the constituent elements of the dispute were not worded in very clear or precise terms.

It is, however, quite another matter — and hardly desirable in my view — if the Court can be unilaterally seised by a State with the request to determine a maritime boundary in more remote zones, if negotiations with another State on the delimitation of more in–shore areas have been unsuccessful, without a clear difference of views on the legal *criteria* for the delimitation in these more remote zones as well.

15. For all these reasons, I am of the opinion that the Court should not have concluded that the seventh preliminary objection must be rejected *in its entirety*, but that it should have been partially sustained; there does not exist a legal dispute between the Parties as to the continuation of the maritime boundary beyond point G, as is required by Article 36, paragraph 2, of the Statute.

16. This position also has its consequences for my vote on the eighth preliminary objection. I share the Court's view that the problem of rights and interests of third States only arises for the prolongation of the maritime boundary seawards beyond point G and that the dispute as to the boundary between the landfall on the Bakassi Peninsula and point G does not concern the rights and interests of third States (para. 115 of the Judgment).

Since in my opinion the Court should have refrained from taking upon itself the task of determining the maritime boundary beyond point G by partially upholding the seventh preliminary objection, I could not vote for the Court's conclusion with regard to the eighth objection either, since this objection, in my view, should have been declared without object.

17. This may not be interpreted as implying that I disagree with the Court's finding that an objection of this character *in se* does not possess an exclusively preliminary character and can only be decided upon in connection with the merits.

I feel, however, that in the present case the Court, for reasons of judicial propriety, could or even should already *in limine litis* have sustained this objection instead of reserving that possibility for the phase of the merits.

18. Nigeria, in its eighth preliminary objection, stated "[t]hat the question of maritime delimitation necessarily involves the rights and interests of third states and is inadmissible beyond point G".

In the present Judgment the Court

"notes that the geographical location of the territories of the other States bordering the Gulf

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

of Guinea, and in particular Equatorial Guinea and Sao Tome and Principe, demonstrates that it is *evident* that the prolongation of the maritime boundary between the Parties seawards beyond point G will eventually run into maritime zones where the rights and interests of Cameroon and Nigeria *will* overlap those of third States. It thus appears that rights and interests of third States will become involved if the Court accedes to Cameroon's request.” (Para. 116; emphasis added.)

This leads the Court to the conclusion that it

> “cannot rule out the possibility that the impact of the judgment required by Cameroon on the rights and interests of the third States could be such that the Court would be prevented from rendering it in the absence of these States …” *(ibid.)*.

The pivot on which everything hinges, therefore, seems to be the willingness of such third States to exercise their right to intervene under Article 62 of the Statute in the present proceedings.

19. In the case concerning the *Continental Shelf (Libyan Arab Jamahiriya/Malta)* the Court stated that it

> “has not been endowed with jurisdiction to determine what principles and rules govern delimitations with third States, or whether the claims of the Parties outside that area prevail over the claims of those third States in the region”.

This was the logical conclusion of the Court's finding that its decision

> “must be confined to the area in which, *as the Court has been informed by Italy*, that State has no claims to continental shelf rights. The Court, *having been informed of Italy's claims*, … thus ensures Italy the protection it sought.” (*I.C.J. Reports 1985*, p. 26, para. 21; emphasis added.)

20. In delimitation of maritime boundary cases, therefore, knowledge of the viewpoints of third States involved is quintessential for the Court to enable it to perform its judicial task as requested by the parties if an application has been brought by Agreement. That would be even more so with regard to the position of Equatorial Guinea, if the present case had been brought by Agreement, in view of the fact that both parties had considered the determination of the triple point an essential condition for the delimitation of the maritime borders between the three countries. If there had been an Application by Agreement, the present case would, apart from geographical factors, have reflected the *Libya/Malta* case.

21. The present case, however, has been brought by unilateral application under Article 36, paragraph 2, of the Statute. The Applicant requests the Court to determine the maritime boundary with the Respondent, whereas it has itself, together with the Respondent, admitted that such delimitation requires the involvement of, and thus negotiations with, a third State. Under such conditions it does not seem proper or reasonable to “compel” that third State to expose its views and its position by means of an intervention under Article 62 even before negotiations with the neighbouring States have begun. Of course, the third State is free not to intervene but in that case the Court could — and in the present case in all probability would — be prevented from rendering the judgment required by the Applicant. Since there is no agreed request by both Parties, considerations of judicial propriety could in the present case have led the Court to the decision to uphold the eighth preliminary objection in the preliminary phase of the proceedings.

Dissenting Opinion of Vice–President Weeramantry

Vice–President Weeramantry

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

Article 36, paragraphs 2 and 4, and Article 38, paragraph 1 (c), of the Statute — Need for communication of acceptance before consensual relationship is formed — Duty imposed on Secretariat by Article 36, paragraph 4 — Use under Article 38, paragraph 1 (c), of comparative law perspectives regarding formation of consensus — Need for time interval between deposit of declaration and formation of consensual bond — Avoidance of surprise to party sought to be bound — Strengthening of Court's jurisdiction through due compliance with Article 36, paragraph 4.

1 I have some reservations in regard to the Court's conclusions on objection 1. Since the principles involved are of considerable importance to the jurisprudence of the Court, I consider it necessary to set out these reservations in some detail.

2 Briefly stated, my concerns centre on the proposition that the deposit of a declaration under Article 36, paragraph 2, of the Statute is all that is required to establish the necessary consensual bond under the Optional Clause. It follows from this proposition that the moment a declaration is lodged under Article 36, paragraph 2, the party lodging the declaration has the right to bring another declarant to Court, irrespective of that other party's knowledge that such declaration has been lodged. It seems to me that such a proposition cannot be in conformity with either the express law or the essential philosophy governing the Optional Clause.

3 Such a view negates a specific provision of the applicable law which is contained in Article 36, paragraph 4, of the Statute, and runs contrary to the philosophy of consensus on which the structure of the Court's jurisdiction, as well as of this particular provision, is based. It is also in disharmony with the principles of equality, fairness, good faith, and reciprocity. Moreover, it results in the rather incongruous situation that, during the interim period between the filing of the declaration and the communication of this fact, there is great inequality between the parties in relation to their practical right of access to the Court. The right to take one's adversary to court is, in any circumstances, a valuable right. It is rendered all the more valuable — and inequitably so — if one's adversary does not know that it has a corresponding right. If such a one–sided state of affairs prevails for nearly a year — which could occur, as we have seen, owing to delays in communication by the Secretariat — so much the greater is the advantage to one party and the resulting lack of equality and reciprocity. The declarant can regulate its conduct and direct its negotiations from the vantage point of its certain knowledge that the matter is now justiciable before the Court, while its opponent negotiates in ignorance of this vital item of information regarding its rights.

4 I do not think such results were within the contemplation of those who drafted the Statute of the Court, especially having regard to their particular concern with the question of communication, as reflected in the wording of the Article itself.

5 The authority for the proposition underlying the Court's ruling is the often–invoked *Right of Passage* case[1], but, with much respect, it seems to me that that case, though followed in the Court's subsequent jurisprudence, needs re–examination. It affects too fundamental an aspect of the Court's jurisdiction to remain as the leading authority on this question. After 40 years of development of international law, in the spheres of such concepts as fairness, reciprocity and good faith, so sweeping a hypothesis as the immediate creation of a right to sue, regardless of the other party's knowledge thereof, is much in need of review.

* * *

6 A word is necessary regarding the facts of this particular case. Nigeria had filed its Declaration in 1965. Cameroon filed its Declaration on 3 March 1994, and made its Application to the Court three weeks later. The Secretary–General did not communicate Cameroon's Declaration for nearly a year, and Nigeria states that it first received formal intimation of Cameroon's Application from the Registrar on 29 March 1994.

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

7 Cameroon relies on informal references to such a possibility in the communications between the States, and on other sources from which Nigeria might have gleaned this information. In dealings between States on a matter of such importance and formality, one would require something more than a communication which is both informal and indefinite. The question arises whether, in any event, the announcement of the Declaration in the *Journal of the United Nations* would have been sufficient notice to Nigeria of the Declaration of Cameroon. It is necessary to observe in this connection that not every mission in the United States is so well equipped with professional personnel that it can keep a tab on all the treaties deposited and link up the declarations under Article 36, paragraph 2, with their country's immediate concerns. Such a view would operate harshly on the less well–equipped missions at the United Nations. I cite, in this connection, the following passage from Rosenne's work on *The Law and Practice of the International Court of Justice, 1920–1996*:

> "An announcement of the deposit of a declaration is published immediately in the *Journal of the United Nations* issued on each weekday in New York. That announcement is made for information purposes. It is accompanied by a footnote specifying that the date indicated is the date of receipt of the relevant documents, meaning that the documents will have to be reviewed for determination as to the actual deposit. Given the Court's interpretation of Article 36, paragraph 4, this announcement is not a satisfactory method of bringing the deposit of a declaration to the immediate notice of the parties to the Statute, since the *Journal of the United Nations* is not a document of general circulation but rather the day's work programme in United Nations Headquarters in New York. Permanent Missions in New York are unlikely to appreciate the significance of announcements of this character appearing in the *Journal*."[2]

* * *

8 I shall now deal with the reasons why I consider the *Right of Passage* decision to be in need of review, commencing with the strictly legal provisions, and moving thereafter to the conceptual reasons underpinning them.

9 That decision, which receives endorsement from the Court's Judgment in the present case, holds that:

> "A State accepting the jurisdiction of the Court must expect that an Application may be filed against it before the Court by a new declarant State on the same day on which that State deposits with the Secretary–General its Declaration of Acceptance. For it is on that very day that the consensual bond, which is the basis of the Optional Clause, comes into being between the States concerned."[3]

10 My first point of disagreement with the *Right of Passage* case is based on its unequal treatment of the two mandatory clauses contained in Article 36, paragraph 4, of the Statute. The two requisites stipulated by Article 36, paragraph 4, are deposit with the Secretary–General and transmission by the Secretary–General of copies to the parties to the Statute and to the Registrar of the Court. The Court, in *Right of Passage*, treats the first request as essential and virtually discounts the other. I do not think that two parallel statutory requirements can be treated so differently, especially when both alike are couched in imperative terms.

11 Secondly, it is an important rule of statutory interpretation that all words in the instrument under interpretation should, as far as possible, be given full efficacy. The Court must necessarily avoid any interpretation which would reduce important words or clauses in the Statute to mere surplusage which has no legal effect whatever. Under the *Right of Passage* interpretation, the words "who shall transmit copies thereof to the parties to the Statute and to the Registrar of the Court" might as well have been omitted from the Statute. Such an interpretation does not seem to me to be in conformity with the recognized rules of legal interpretation. The Court is under a duty to

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

render effective all the provisions of its Statute, rather than to encourage the disregard of sections of it by interpretations which denude them of significance or meaning.

12 The Court's Judgment means that if the Secretariat ignored these words completely, the legal result would still be the same. Such a view is all the more questionable when the statutory requirement is not an arbitrary imposition, but is based, as will be shown, upon well–accepted universal norms and concepts pertinent to the creation of consensual relationships.

13 It is true this Judgment has been followed in the Court's later jurisprudence in *Temple of Preah Vihear* and *Military and Paramilitary Activities in and against Nicaragua (Nicaragua* v. *United States of America)*. However, no amount of contrary jurisprudence can override the imperative requirements of the Court's Statute and, if indeed the Statute makes such a communication compulsory, it must be treated as such.

14 Thirdly, one must look upon the deposit of the declaration and the communication by the Secretary–General as together constituting the composite package of conditions which needs to be satisfied to give legal efficacy to the declaration. It is clear that the first requisite must be satisfied, for, without it, there could be no question of the declaration being operative. The article in question designedly does not place that requisite alone, but couples it with another in terms which are equally mandatory.

15 One constituent element cannot be detached from this statutory package by a process of judicial interpretation. Nor can one element be emphasized and the other neutralized when the Statute itself gives no indications to that effect. If the juristic right fashioned by Article 36 is to come into existence, the events attending its creation must fit the mould cast for that purpose by the governing statutory provision.

16 A fourth reason why the *Right of Passage* decision needs review is that it could well encourage the Secretariat to take a more relaxed view regarding its obligations under Article 36, paragraph 4. Since the interpretation placed by *Right of Passage* on the requirement of communication deprives that requirement of all effective impact upon the matter it was meant to regulate, it is not to be wondered at that the Secretariat, acting presumably on that ruling, takes its time — up to one year — in transmitting the required communication.

17 If, indeed, a practice of delay in communication has resulted in the United Nations from the belief that one of these imperative conditions is not imperative, despite the language of the Statute to the contrary, it is important that the practice be rectified and the procedures brought into regularity with the binding requirements of the Statute.

18 It is true the second of these requirements is not within the control of the party depositing the declaration, but it is to be presumed that official acts will be duly performed, the more especially where they relate to matters of such fundamental importance to the rights of States, as the voluntary surrender of some part of their sovereign autonomy — for declarations by States under Article 36 amount to no less than this. Due performance by the Secretariat of its responsibility of transmitting such copies in a matter such as this can mean nothing short of transmission of such declarations forthwith. This is yet another reason why I believe the Court should take this opportunity to review that Judgment, and stress the imperative nature of this statutory responsibility. The delay of nearly one year that has occurred in communication in this instance is not, in any event, a proper compliance with the Statute.

19 My fifth objection to the *Right of Passage* case is that it takes out of context the expression "*ipso facto* and without special agreement", and treats it as an indication of the point of time at which the parties became consensually bound. This provision was not intended to produce such a result, nor can it bear such a construction. What Article 36, paragraph 2, provides is that where a declaration is filed, no special agreement is necessary, as the declaration has a compulsory force

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

of its own. Nowhere does this provision purport to indicate *when* that declaration becomes operative.

20 I would endorse what Vice–President Badawi observed of this construction in his dissenting opinion in the *Right of Passage* case when he criticized the isolation of the expression *"ipso facto"* from its context. This led to the achievement of a result by which, in his words, "the complete idea contained in the Statute has been dismembered and disregarded"[4].

21 As a sixth objection, I note the prejudice that the *Right of Passage* interpretation may cause to a party. A ruling which in effect confirms that the filing of a declaration becomes operative the very next moment after it is filed could be an embarrassment to a State which is in the process of negotiation with another. Unknown to itself, it could have the ground surreptitiously cut from under its feet, perhaps after it has made some vital concession, in the belief that the matter is still under negotiation. This aspect is further developed later in this opinion.

22 A seventh reason is that the declaration which constitutes the act of acceptance is not a declaration in a standard form. It is infinitely variable in its terms, and the mere fact of deposit cannot be an intimation of the terms in which the declaration is framed. The party sought to be bound is entitled to know those terms. If it is held to be consensually bound, it cannot reasonably be held to be bound to terms of which it is unaware. This factor militates so strongly against the core content of the concept of consensus that even had it stood alone, it would, in my view, have been conclusive.

23 An eighth and final reason why, in my view, the *Right of Passage* decision needs re–examination is that it could have an adverse effect on the development of the Court's jurisdiction. The Court's interpretation could well result in a reluctance on the part of States to make such declarations in the first instance. Indeed, the Court's ruling in the *Right of Passage* case was followed shortly thereafter by the introduction of a series of reservations to declarations already filed under Article 36. For example, the United Kingdom's Declaration on 26 November 1958 excepted from the scope of its Declaration disputes

> "where the acceptance of the Court's compulsory jurisdiction on behalf of any other Party to the dispute was deposited or ratified less than twelve months prior to the filing of the application bringing the dispute before the Court"[5].

So, also, India filed an amended declaration on 14 September 1959, restricting the Court's jurisdiction in respect of future applications to cases where the acceptance of the Court's compulsory jurisdiction was deposited or ratified more than twelve months prior to the filing of an application bringing the dispute to the Court[6].

24 Other States may well be expected to take similar steps to protect themselves against surprise applications if this view of the law is confirmed, while some others contemplating the filing of such a declaration may well have second thoughts on the subject. All this is not conducive to the extension of the compulsory jurisdiction of the Court.

25 Indeed, while the Court has been deliberating on its Judgment, Nigeria itself has taken action, on 29 April 1998, to amend its Declaration, so as to impose a time–limit of twelve months before acceptance of the Court's jurisdiction by a State becomes operative against Nigeria.

26 So much in regard to the interpretation of the governing statutory provision.

* * *

27 I pass now to an examination of some conceptual considerations which underlie the statutory provision and reinforce the conclusions already reached.

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

28 Since the so–called compulsory jurisdiction clause is consensual in its architecture, one must satisfy oneself that the results of the Court's Judgment are in conformity with the legal concept of consensus.

29 A State lodging a declaration under Article 36, paragraph 2, performs a twofold juristic act. On the one hand, it is making an *offer* to every other State that has not already filed a declaration that it will be bound by its terms to such State, upon that State making a declaration in accordance with Article 36. On the other hand, a declaration made in terms of Article 36 is an *acceptance* of the offers made by other States which have already filed such a declaration. A declaration duly made under Article 36 is thus both an offer to some States and an acceptance of the offer already made by other States.

30 It is true we are considering a question of international law, but this analysis shows us also that we are very much in the sphere of the law of consensual obligations, from which we draw our general principles and foundation requirements. We must not be diverted from the basic principles of this body of law, as universally recognized, by the circumstance that we are operating in the territory of international law. Where any situation in international law depends on consensus, the generally accepted principles relating to consensual obligations would apply to that situation, unless expressly varied or abrogated.

31 How is a consensual obligation formed? The completed legal product results from the classical process of the meeting of minds which follows from a confluence of offer and acceptance. This is accepted by most legal systems, with the rarest of exceptions[7]. This principle is accepted alike by the Anglo–American law and the Romanistic legal systems[8]. There are indeed substantial differences among different legal systems regarding such matters as the status and revocability of the offer[9], but the basic principle that the minds of offeror and offeree must meet remains unaffected by these considerations, and belongs to the common core of legal systems.

32 Probably the most exhaustive study available on the core content of consensus across a wide variety of legal systems is Schlesinger's monumental work on the *Formation of Contracts*[10]. Schlesinger would indeed appear to have anticipated cases such as the present where the Court needs to satisfy itself on the universally agreed fundamentals of consensus.

33 One of the purposes of this study, as expressly stated therein, was to render assistance to judges of international tribunals having occasion, under Article 38, paragraph 1 *(c)*, of the Statute of the International Court of Justice, to deal with issues relating to the formation of agreements[11]. Schlesinger was examining the “reservoir of legal concepts and precepts traditionally utilized in, and shared by, a number of national legal systems”[12], and expressed the hope that international judges “would make ample use of the ‘general principles’ as prime materials for the building of a systematic body of international law”[13].

34 The present case of interpretation of a statutory provision arising out of the concept of consensus or agreement is an apt occasion for the use of such scholarly research for the purposes of international law. In particular, it would be helpful in testing whether the interpretation adopted in the *Right of Passage* case conforms to the “general principles” attending agreement as universally understood.

35 Schlesinger notes preliminarily the following general propositions:

> “I A. In all legal systems under consideration, the first requirement of a ‘contract’, in the core meaning of the word, is the existence of an agreement, *i.e.*, of manifestations of mutual assent on the part of two or more persons. Whether or not they are promissory in nature, these manifestations as a rule must be referable to each other.” [14]

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

"III. …

In all legal systems under consideration, contracts are normally (although not necessarily …) formed by offer and acceptance occurring in an ascertainable sequence." [15]

* * *

36 Once this norm of offer and acceptance is established, the next question for examination is whether the acceptance needs to be communicated. In this regard, Schlesinger observes as follows, in the section of the General Report dealing with the question:

"*Is Communication of Acceptance Necessary?*

The problem to be treated in this Report is connected with the offeror's interest in obtaining knowledge concerning the conclusion of the contract.

Normally, although not necessarily, such knowledge is obtained through communication, *i.e.*, an act of the offeree aimed at bringing acceptance to the offeror's knowledge.

With the possible exception of French law, all systems under consideration agree, as a matter of principle, that communication of acceptance is necessary to bring about a contract."[16]

37 He also observes that the differences between French law and the other systems under consideration may be more apparent than real[17].

38 There are indeed exceptional circumstances in which legal systems do not require a specific communication of acceptance, e.g., in standard form contracts or contracts of adhesion[18]. Vice–President Badawi, in the *Right of Passage* case, distinguished this category of contracts from Declarations under Article 36 in the following terms:

"Indeed, whereas the essential feature of the 'adherence' or 'accession' contract is uniformity, that of Declarations is variety and diversity. Each Declaration expresses the conditions, the purposes and the policy of the State which makes it. Furthermore, in 'adherence contracts' one of the parties in fact is in a position in which it is impossible to discuss the terms of the contract. It is obliged to contract and gives its adherence to the all powerful will of the other. In this category are included, *inter alia*, contracts of service, contracts for transport and for insurance. What analogy can there be between such contracts and Declarations accepting jurisdiction?"[19]

39 Another such exceptional category consists of postal offers, in regard to which a variety of theories have been propounded[20] to meet the difficulties arising from time taken in transit, revocation pending transmission, and the like. All theories have been the subject of contention, but they are all designed to meet the special difficulties arising from this particular mode of communication. There may also be cases where an unusual mode of acceptance is prescribed by the offeror, and compliance with this method obviates the need for communication, which is therefore considered to be waived[21]. It is in such cases, where good reasons exist for departure from the norm, that the law of contract waives the requirement of communication of an acceptance. This is not such a case. Indeed, the present situation is the very opposite of the case where actual communication is *waived* by the law, for the Statute in fact expressly *requires* communication by action of the Secretary–General.

40 Except in such exceptional circumstances, or where communication is expressly dispensed with by the parties, there is very good reason for concluding that there can be no consensus in the absence of communication of the acceptance. Without it, the offeror would be in a state of

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

ignorance that it is bound by a contractual relationship. In the words of Nigeria, the “consensual bond” between itself and Cameroon in regard to the Court's jurisdiction “cannot be said to exist with respect to another State of whose participation in the system established by Article 36.2 of the Statute Nigeria knew nothing”[22]. This is contrary to the considerations of fairness that should govern such relationships; and the exceptional circumstances in which a merely notional communication is deemed sufficient are not replicated in the case of Article 36, paragraph 2, declarations. Such a conclusion is strengthened further by the requirement of communication built into Article 36, paragraph 2, itself.

41 The procedure of deposit of the declaration with the Secretariat is clearly not tantamount to a notification to all the world, as would be the case, for example, of the deposit and registration of a deed with a Land Registry within a domestic legal system. Indeed, the Statute would not specifically require communication if the mere fact of the deposit were to be constructive notice to all the world.

42 An important principle involved in all of the foregoing considerations is the principle of the protection of the offeror.

43 I quote Schlesinger's conclusions again, in relation to the recognition by legal systems of the need for the protecting the offeror. He refers to the fact that

> “most of the legal systems under consideration will in some way protect the offeror's interest in obtaining knowledge that the contract has been concluded. Such protection is given by imposing a duty on the acceptor to inform the offeror, promptly or at least within a reasonable time, of the conclusion of the contract. However, these systems differ as to the scope of the duty and the consequences of non–compliance.”[23]

44 I can do no better than to conclude this discussion with a reference to what Grotius himself has to say on the matter, not in his treatises on the Roman–Dutch law, but in *De Jure Belli ac Pacis* itself. His conclusions are as follows:

> “*Whether an acceptance ought to be made known to the promisor; explanation, with a distinction*
>
> This question is also commonly raised, whether it is sufficient that the acceptance be signified, or whether, in fact, the acceptance ought also to be made known to the promisor before the promise attains its full effect.
>
> It is certain that a promise can be made in both ways, either thus: ‘I desire that this be valid, if it be accepted’; or thus: ‘I desire that this shall be valid if I shall have understood that it has been accepted’. In promises which deal with mutual obligations the latter meaning is assumed, but in merely generous promises it is better that the former meaning should be believed to be present, unless something else should appear.”[24]

45 Declarations under Article 36, paragraph 2, deal with mutual obligations, and there is no doubt that they fall into the category in which the offeror must know that his offer has been accepted[25].

46 This discussion of the general principles of law relating to the formation of consensus through the process of offer and acceptance show their applicability to the matter under consideration by the Court. It indicates also how the Court's decision departs from those principles, and thereby weakens the foundation of true consensus on which the Court's jurisdiction must in all circumstances be based.

47 There are two ancillary matters which need some consideration to complete an examination of the matter before the Court — the need for a time interval between deposit of the declaration and the creation of the consensual bond, and the question of prejudice to a party that can result from

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

the view of the law which the Court has endorsed.

* * *

48 A time interval between deposit of the declaration and the creation of the consensual bond provides a necessary safety cushion to ensure that the party sought to be bound by the declaration is not taken by surprise.

49 Scholarly writings on Article 36, paragraph 4, reinforce this point. I refer, in particular, to Shabtai Rosenne, who points out that Article 36, paragraph 4, was added at a late stage of the San Francisco Conference, and immediately became subject to interpretation[26]. Rosenne's own view is that, should the Statute ever be revised, there should be “a short interval between the date of deposit and the date on which the deposit of the instrument produces its effects”[27]. The manifest reasons for such a precaution have already been discussed. Such a view underlines the need for knowledge of the declaration on the part of the States who are to be bound. This result would follow inevitably if the terms of Article 36, paragraph 4, are to be given their natural meaning rather than the truncated meaning given to them by the decision in *Right of Passage*.

50 Indeed, Rosenne's conviction of the need for such an interval was so strong that he made submissions to the International Law Commission in this regard when it was giving consideration to Article 78 of the Vienna Convention — a consideration which was no doubt heavily influenced by the prevailing *Right of Passage* jurisprudence[28]. Indeed, that eminent jurist, in dealing with the “small time–lag before the other States become aware that the treaty is in force between them and the State depositing the instrument”, suggested that this period should be fixed at 90 days, “thus allowing both for the observance of the normal administrative practices of the depositary and for receipt of the notice by the home authorities of the States concerned and the observance of their normal administrative practices”[29].

51 This suggestion was meant to allow for different depositary practices, the notices being sometimes transmitted “through a government's own diplomatic posts abroad, sometimes through diplomatic posts accredited to the depositary; and sometimes by mail”. The essential thrust of the recommendation was no doubt to ensure that the State sought to be bound was informed of the existence of the instrument which locked it into a consensual relationship.

52 I doubt very much that the interpretation of Article 36, paragraph 4, according to its natural meaning, could unsettle the Court's jurisdiction. Rather, a clarification of that provision and of the reasons underpinning it would regularize and strengthen that jurisdiction. It would also give to States making such declarations the confidence that they will not be taken by surprise, thereby reinforcing their willingness to accept the Court's optional jurisdiction.

53 No doubt modern methods of duplication and transmission of documents could considerably expedite this process, but it seems to me that the “small time–lag” stipulated by Rosenne is essential.

54 It is also relevant to refer to the full recognition accorded by Article 78 *(c)* of the Vienna Convention on the Law of Treaties to the necessity of communication of notifications in regard to treaties, if the recipient is to be bound. This is an application of the normal consensual rule. The Court does indeed refer to this provision, but observes that, in so far as declarations under Article 36 are concerned, the régime for depositing and transmitting declarations of acceptance of compulsory jurisdiction is prescribed by Article 36, paragraph 4, of the Statute of the Court (Judgment, para. 30). I respectfully agree, but that very régime prescribes a method of transmitting the communication, and must therefore be followed.

* * *

55 I refer finally to the question of possible prejudice to parties, which can result from the

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

interpretation the Court lays upon Article 36.

56 I have already adverted to the first item of prejudice: that for the period between the deposit of a declaration and the communication of that declaration to the party who is to be impleaded, the party depositing the declaration is at an advantage over the other, in that the former is aware that the Court has jurisdiction, and the latter is not. The vesting of jurisdiction in the Court is an important juristic act with major repercussions on State sovereignty. If one party is aware of its rights under this provision, and the other is not, a disparity is created between the parties, which fundamentally breaches the basic principle of equality on which the Court's jurisdiction is premised.

57 This inequality can have practical repercussions on the course of the informal negotiations between parties, that precede the formal institution of an action. I believe it is in the interests of the peaceful resolution of disputes and the general principles of our jurisprudence that such informal negotiation should be encouraged and promoted, and I can only see the effect of such a ruling as inhibiting this process.

58 It is important that when parties are in bona fide negotiation with each other there should not even theoretically be the possibility of one of those parties filing a declaration and lodging an application before the Court almost simultaneously. This could amount, in a hypothetical case, to an abuse of the process of the Court. It is by no means implied that such is the case here, but the decision of the Court opens the door to such a possibility in the future.

59 It is important to international peace and goodwill that the processes of negotiation between parties be given full scope, without the fear of a sudden and unexpected termination, followed by the dragging of a reluctant respondent to the Court. The deleterious effect that could ensue in regard to the willingness of States to file an Article 36, paragraph 2, declaration at all could be damaging to the development of the Court's jurisdiction. This is an important reason why such a construction should be avoided.

60 In the process of bona fide negotiations, concessions are made, facts are accepted, compromises are worked out, admissions and apologies are offered. Documents embodying such acts may well be exchanged. It is important that all this should take place on a footing of openness and equality.

* * *

61 For all these reasons, I am of the view that Nigeria has made out a case of lack of consensus in regard to Cameroon's declaration under Article 36, paragraph 2, at the time Cameroon's Application was filed.

62 An interpretation of Article 36, paragraph 4, according to its natural meaning, would result in more confidence on the part of States in making declarations under Article 36, paragraph 2. Any uncertainty as to whether consensus had been established could be removed by the prompt discharge by the Secretariat of its statutory duties under Article 36, paragraph 4, which modern methods of reproduction and communication of documents render much less labour intensive and time consuming than they were when the Statute was framed. A proper attention to this statutory obligation could result in communication within a matter of a few days, thus removing all uncertainty.

63 Other advantages of this view are that it would bring the operation of consensual jurisdiction within the consensual principles which lie at its very foundation, ensure fairness and reciprocity between the parties, and bring the operation of declarations under Article 36 within the express terms of the article which fashioned them.

(Signed) Christopher G. Weeramantry.

Dissenting Opinion of Judge Koroma

Judge Koroma

Optional clause (Article 36, paragraph 2, of the Statute) — Mandatory requirements prior to invoking compulsory jurisdiction of the Court — Reliance on Judgment in Right of Passage *case — Non–recognition or application of principle of stare decisis by Court — Article 59 of Statute — Article 38 of Statute establishes a hierarchy as to the application of the law — Article 36, paragraph 4, of Statute — Deposit of declaration and requirement of transmission by Secretary–General — Distinguished from Article 78 of Law of Treaties — Treaty–related communication–trend in international law — Whether time period required after deposit of a declaration before seising Court of a matter — Principle of good faith — How it should have been considered by the Court — Condition of reciprocity — Need for mutuality and equality — Submissions relating to inadmissibility of claim — Not to cross threshold of jurisdictional and admissibility phase into merits*.

1 In its reply to the first preliminary objection by Nigeria that the Court has not been invested with jurisdiction to entertain the Application by Cameroon, as the condition precedent for the Applicant to invoke Article 36, paragraph 2, of the Statute had not been met, the Court, in rejecting the objection, held that the manner in which Cameroon's Application was lodged was not contrary to Article 36 of the Statute, nor was it made in violation of any right which Nigeria may claim under the Statute or by virtue of its Declaration; and that in any event it has jurisdiction to pass upon Cameroon's Application. Since I strongly disagree with the holding that the manner of lodging the Application was consistent with the mandatory requirements of Article 36 of the Statute, that it was not made in violation of Nigeria's rights under the Statute, and that in any event the Court has jurisdiction to pass upon Cameroon's Application, I feel it incumbent upon me to set out the basis of my disagreement.

2 My view is that, in order to invoke the jurisdiction of the Court under Article 36, paragraph 2, of the Statute, two mandatory requirements must have been fulfilled. First, a State must have made a declaration that it recognizes as compulsory *ipso facto* and without special agreement, in relation to any other State accepting the same obligation, the jurisdiction of the Court in all legal disputes which fall under that provision. Second, such a declaration should be deposited with the Secretary–General of the United Nations, who is obliged to transmit copies thereof to the parties to the Statute and to the Registrar of the Court.

3 Nigeria, in its first preliminary objection, stated that it had accepted the Court's jurisdiction under Article 36, paragraph 2, of the Statute on 14 August 1965, and had deposited a declaration to that effect with the Secretary–General of the United Nations on 3 September 1965; Cameroon had done likewise on 3 March 1994, and copies were transmitted by the Secretary–General of the United Nations to the parties to the Statute eleven–and–a–half months later, prior to which Cameroon had lodged its Application with the Court on 29 March 1994 instituting the present action. Nigeria claimed that it had no knowledge that Cameroon had deposited a declaration under Article 36, paragraph 2, until it was informed by the Registrar of the lodging of Cameroon's Application. In the light of the foregoing, it submitted that the requirements of Article 36, paragraph 2, read with its own Declaration, had not been satisfied when Cameroon lodged its Application, in other words, that Cameroon had acted prematurely and had not satisfied the conditions necessary for the Court to be invested with jurisdiction; and that the Court accordingly lacks jurisdiction to entertain the Application.

4 As stated earlier, the Court rejected this line of reasoning and reached the conclusion that it has jurisdiction to pass upon Cameroon's Application. In reaching this conclusion, the Court overwhelmingly and substantively relied on the Judgment it had rendered in the case concerning *Right of Passage over Indian Territory (Preliminary Objections, I.C.J. Reports 1957*, p. 125).

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

5 While it is understandable that the Court should seek guidance from its previous decisions, one of the disturbing aspects of the present Judgment would seem to be the reluctance or disinclination on the part of the Court to undertake a juristic and judicial enquiry or examination of the meaning of Article 36 of the Statute — the meaning of which has been in contention between the two Parties in this first preliminary objection. To reinforce and justify its overwhelming reliance on the *Right of Passage* case, the Court in turn cited those cases which had been decided on the basis of the decision in the *Right of Passage* case, as justification for its reasoning in the present case. I am not sure whether in fact much has been gained in terms of legal clarity or in the dispensation of justice by this method of judicial accretion, as a judicial response to this particular legal problem. To illustrate the point, the Court commenced its Judgment by quoting Article 36, paragraphs 2 and 4, of the Statute and proceeded immediately to quote with approval a passage of the Court's Judgment in the *Right of Passage* case, as follows, that:

> "by the deposit of its Declaration of Acceptance with the Secretary–General, the accepting State becomes a Party to the system of the Optional Clause in relation to the other declarant States, with all the rights and obligations deriving from Article 36. The contractual relation between the Parties and the compulsory jurisdiction of the Court resulting therefrom are established, '*ipso facto* and without special agreement', by the fact of the making of the Declaration … For it is on that very day that the consensual bond, which is the basis of the Optional Clause, comes into being between the States concerned." (*Right of Passage over Indian Territory, Preliminary Objections, Judgment, I.C.J. Reports 1957*, p. 146.)

6 The Court further quoted from that Judgment and stated with approval that the State making the Declaration

> "is not concerned with the duty of the Secretary–General or the manner of its fulfilment. The legal effect of a Declaration does not depend upon subsequent action or inaction of the Secretary–General. Moreover, unlike some other instruments, Article 36 provides for no additional requirement, for instance, that the information transmitted by the Secretary–General must reach the Parties to the Statute, or that some period must elapse subsequent to the deposit of the Declaration before it can become effective. Any such requirement would introduce an element of uncertainty into the operation of the Optional Clause system. The Court cannot read into the Optional Clause any requirement of that nature." (*Ibid.*, pp. 146–147.)

7 In paragraph 27 of the present Judgment, the Court, referring to the *Right of Passage* case, stated that "this Judgment is not an isolated one", and then went on to cite a series of cases that had been decided on the basis of that case. In paragraph 28 the Court dealt with Article 59 of the Statute, and acknowledged that there should be no question of holding Nigeria to decisions reached in prior cases. But reliance on the *Right of Passage* case continued and the Court again made reference to it in paragraph 39 of the present Judgment.

8 The point which is now sought to be made is the fact that the Court did not grasp the opportunity which the present case presented, as well as the circumstances surrounding it, to carry out a juristic as well as a judicial reappraisal of Article 36 of the Statute, a provision which is not only fundamental to the two Parties in this case but also pivotal in determining whether compulsory jurisdiction has been properly invoked and the Court rightfully seised of the matter. In view of the fact that this provision is so crucial to both Parties for the establishment of the jurisdiction of the Court, and in view of the fact that the Judgment in the *Right of Passage* case not only was rendered more than 40 years ago but has been the subject of repeated calls for reconsideration, it would have been more than timely for the Court to undertake a reappraisal both of the provision of the Statute and the Judgment itself. Regrettably the Court appears to have adopted an uncritical approach to that Judgment, basing itself mainly on the Judgment to reach its decision in the present case. Whatever may be the merits or demerits of that Judgment, and many eminent scholars of the

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

jurisprudence of the Court have taken issue with it, Nigeria specifically requested the Court to review the Judgment, given the circumstances of the present case, and in the interests of justice. Since that Judgment was delivered, not only have many changes taken place in the practice of States, but international law has developed in a way which should have some bearing on the *Right of Passage* case and on the meaning of the Article. It is my view that, while the Judgment in the *Right of Passage* case bears on the present case, it should not have controlled its outcome, as it would seem to have done.

9 Moreover, it is an important principle of this Court that it does not recognize the principle of *stare decisis* — the principle of binding precedent does not apply in the Court. It is also part of the Court's jurisprudence that even when legal principles are accepted by the Court in a particular case, they are not regarded as binding upon other States or in other disputes. The Court has the power and the duty to depart from previous decisions when this is necessary and in the interests of justice. To my mind, the present case before it is just such a case.

10 With regard to this case, it should be recalled that Article 38 of the Statute provides that the Court in deciding disputes should do so in accordance with international law, and should apply:

> "**(a)** international conventions, whether general or particular, establishing rules expressly recognized by the contesting States;
>
> … … … … … … … … … . .
>
> **(d)** subject to the provisions of Article 59, judicial decisions … as subsidiary means for the determination of rules of law."

11 In other words the Article establishes a hierarchy as to the application of the law, and the Court is called upon to determine — to find out — what the existing law is in respect of the dispute before it and to apply that law. The Court has, on the whole, shown a tendency to develop the law, to interpret the law and not to consider itself burdened or bound by previous decisions.

12 It is a well–established principle of international law, and one accepted by the Court's jurisprudence, that the jurisdiction of the Court is based on consent. In other words, a State may not be compelled to submit to the jurisdiction of the Court without its consent. In this regard, for the Court to assume jurisdiction on the basis of a declaration made under Article 36 of the Statute, the Court has to ensure that jurisdiction has been conferred on it; such conferment cannot be presumed. Article 36, paragraphs 2 and 4, provide as follows:

> "**2.** The States parties to the present Statute may at any time declare that they recognize as compulsory *ipso facto* and without special agreement, in relation to any other State accepting the same obligation, the jurisdiction of the Court in all legal disputes concerning:
>
> > **(a)** the interpretation of a treaty;
> >
> > **(b)** any question of international law;
> >

13 When this provision is interpreted and given its plain and natural meaning, it follows that, for a State to be in a position to invoke the jurisdiction of the Court, under Article 36, paragraph 2, of the Statute and to seise the Court of a matter, it must first of all have made a declaration recognizing the jurisdiction of the Court; such a declaration must have been deposited with the Secretary–General of the United Nations, who should have transmitted copies thereof to the parties to the Statute and to the Registrar of the Court.

14 In other words, when a State makes a declaration in conformity with the Article, that State not only assumes the obligations embodied in the provision, including the obligation to accept the jurisdiction of the Court, but also acknowledges that such acceptance, if the Statute is to be complied with, can only be effected after the Secretary–General has transmitted copies of the declaration, and, in the absence of such transmission, parties to the Optional Clause system cannot be aware that another State has become a party to the system. While it is true that the object and purpose of the Optional Clause system is to ensure advance acceptance of the jurisdiction of the Court, it is essentially the case that, by making a declaration, a State is not making a commitment to bring another party before the Court, but indicating a willingness to be brought before the Court. In the absence of the transmission of copies of the declaration, there will be no knowledge that the declarant State can be brought before the Court.

15 Relying on the Judgment in the *Right of Passage* case, where the Court had stated that "the legal effect of a Declaration does not depend upon subsequent action or inaction of the Secretary–General", and in a later case that

> "'The only formality required is the deposit of acceptance with the Secretary–General of the United Nations under paragraph 4 of Article 36 of the Statute.' (*I.C.J. Reports 1961*, p. 31.)" (*Military and Paramilitary Activities in and against Nicaragua (Nicaragua* v. *United States of America), Jurisdiction and Admissibility, Judgment, I.C.J. Reports 1984*, p. 412),

the Court took the view that to require transmission of a declaration, which would involve allowing a reasonable time to elapse before it could be said to take effect, would be to introduce an element of uncertainty into the operation of the Optional Clause, which in the opinion of the Court would not be helpful at a time when the intensification of State relations has multiplied the possibilities of legal disputes which are capable of being submitted to the Court. The Court would seem to read the obligation of the Secretary–General to transmit copies of a declaration to the parties to the Statute and to the Registrar as the introduction of an additional time requirement into the Optional Clause system.

16 To construe the provision in this way would mean that the obligation of the Secretary–General is not only not mandatory but even superfluous; that it is of no interest or moment whether the Secretary–General fulfils this statutory function. Not only would such a construction be contrary to the intent and clear meaning of the provision, but transmission is necessary and indispensable for the States parties to be aware that another State has made such a declaration, thereby putting in place the consensual bond necessary to establish the jurisdiction of the Court. The functional obligation of the Secretary–General is therefore not only not superfluous but is mandatory if the Optional Clause system is to operate as it was conceived. Contrary to the Court's reasoning, in my view, transmission of the declaration by the Secretary–General would ensure the avoidance of that "uncertainty" which the Court feared would be introduced if the Secretary–General were to perform his duty in the manner prescribed in the Statute of the Court. On the contrary, it can only lead to legal security for the parties to the Statute.

17 The Court, in attempting to distinguish the deposit and transmission of a declaration pursuant to Article 36, paragraph 4, of the Statute from the régime laid down for treaties by the Vienna Convention on the Law of Treaties, stated that Article 78 of the Convention is only designed to lay down the modalities according to which notifications and communications should be carried out; that the provision does not govern the conditions in which a State expresses its consent to be

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

bound and those under which a treaty comes into force. This attempted distinction, it would seem to me, missed the point of Nigeria's contention with reference to that Article. Article 78 provides as follows:

> "Except as the treaty or the present Convention otherwise provide, any notification or communication to be made by any State under the present Convention shall:
>
> … … … … … … … … … . .
>
> **(c)** if transmitted to a depositary, be considered as received by the State for which it was intended only when the latter State has been informed by the depositary …".

18 According to Nigeria, that rule "must apply to Cameroon's Declaration".

19 Nigeria had argued that, since 1957, the trend in international law has been that where a State makes a treaty–related communication to a depositary for transmission to other States, those other States are only to be considered to have received it when they have been informed of it by the depositary acting in fulfilment of its obligation to inform other States of such communications; and that, although a declaration made under Article 36, paragraph 2, of the Statute is not a treaty as such, to the extent that both Parties are in agreement that such a declaration is to be treated as a treaty, then Cameroon's Declaration, made after the Vienna Convention entered into force, is subject to that provision.

20 For the Court to dismiss this contention by saying that Article 78 *(c)* does not govern the conditions in which a State expresses its consent to be bound, and those under which a treaty comes into force, does not constitute a proper response to the submission that, as the law has developed, other States are to be deemed as having received communications relating to a treaty only if the obligation to transmit has been fulfilled. As the Court is aware, consent to be bound by a treaty can be established either upon the exchange of instruments between the States parties, on their deposit with the depositary, or on their notification to the States parties or to the depositary. In the case of multilateral treaties, to which declarations made under the Statute can be likened in nature, the law as it has developed is that transmission of a treaty cannot be deemed to have taken place until the depositary has forwarded it to the other States. It is for this reason that Articles 16 and 24 of the Vienna Convention must be construed in the light of Article 78 *(c)* of the Vienna Convention of the Law of Treaties of 1969 and the principles it enunciated. In other words, declarations made under Article 36, paragraph 2, of the Statute of the Court can only be deemed to have established the consensual link between the relevant States for the purpose of the Court's jurisdiction after they have been transmitted by the Secretary–General.

21 The Court refers to the views expressed by the International Law Commission when it was considering the problem of the deposit of an instrument with a depositary, and reached the conclusion that the act of deposit establishes the legal nexus. Those views are correct as far as the deposit of a treaty goes; they do not impair the validity of the argument that transmission is a requirement for the establishment of a consensual bond under Article 36, paragraph 2, of the Statute. The point is not that declarations are treaties, which they are not as such, but even as unilateral acts, they establish a series of bilateral engagements with other States accepting the same obligation of compulsory jurisdiction, in which the conditions, reservations and time–limit clauses are to be observed. Hence, although the rules of treaties do not apply to declarations as such, which are governed by the Statute, in particular Article 36, paragraph 4, on this point both the Statute and treaty law coincide. Article 36, paragraph 4, requires the Secretary–General to transmit copies of a declaration in order to consummate the consensual bond between parties to the Optional Clause for the jurisdiction of the Court to be established. In other words, the deposit of the declaration is the beginning of the process in meeting the conditions precedent for the jurisdiction of the Court to be established, as a declaration by itself cannot establish the Court's jurisdiction, unless and until it has been deposited and transmitted by the Secretary–General. It is

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

only after such transmission that the States that are parties or will become parties accept the consequence and recognize that there is jurisdiction between them and the State which has made the declaration.

22 Nigeria objected that Cameroon could not file an application before the Court without allowing a reasonable period to elapse "as would … have enabled the Secretary–General to take the action required of him in relation to Cameroon's Declaration of 3 March 1994". Nigeria, in advancing this view, had relied on the Court's Judgment of 26 November 1984 in the case concerning *Military and Paramilitary Activities in and against Nicaragua (Nicaragua* v. *United States of America)*, in which the Court stated that a reasonable time is required for the withdrawal of declarations under the Optional Clause. In that case the Court stated, *inter alia*, that

> "the right of immediate termination of declarations with indefinite duration is far from established. It appears from the requirements of good faith that they should be treated, by analogy, according to the law of treaties, which requires a reasonable time for withdrawal from or termination of treaties that contain no provision regarding the duration of their validity." (*I.C.J. Reports 1984*, p. 420, para. 63.)

23 The Court considers that in this case "no time period is required" to establish a consensual bond, as opposed to a withdrawal which would bring such a bond to an end. This conclusion by the Court would seem to be at variance with the evolution of the law. Nowadays, and in spite of the Judgment in the *Right of Passage* case, international legal instruments tend to impose a time period for them to take effect after they have been ratified and deposited. Moreover, the conclusion of the Court when examined closely does not appear to respond to the objection as formulated. The objection was not that a reasonable time was required for the establishment of a consensual bond, but that Cameroon should not have filed its Application before the Court without allowing a reasonable period "as would have enabled the Secretary–General to take action required of him in relation to Cameroon's Declaration of 3 March 1994". In other words, when could a State that has made a declaration under the Optional Clause seise the Court? One would have thought that both under the Statute and in conformity with legal principles, a reasonable time period would be required before the Court could be seised. In the first place, under the Statute itself, a reasonable time will be required to enable the Secretary–General to transmit copies of the Declaration to the other States parties to the Optional Clause as well as to the Registrar. Secondly, if only to prevent the allegation of bad faith, a State would surely not wish to be seen to be seising the Court so soon after it had deposited its Declaration that the Secretary–General had not had time to carry out his statutory duty.

24 Thirdly, if a reasonable time period is not to be required for the transmission of a declaration before the filing of an action, the other States parties to the Optional Clause would not be in a position of knowing that such a deposit has been made, that the declarant State is entitled to exercise its right, or that the other States parties to the Statute have had such a right conferred on them and are entitled to exercise such a right as well. Hence, in my view, both under the Statute and from a position of principle, a reasonable time is required after the deposit of a declaration before the Court may be seised. Related to this matter is Nigeria's contention that, even while continuing, during the first three months of 1994, to maintain contacts with it on boundary questions, Cameroon was in fact preparing to seise the Court. Such conduct, Nigeria contends, infringes the principle of good faith and should not be accepted.

25 While the Court acknowledged the principle of good faith as "one of the basic principles governing the creation and performance of legal obligations …", but that "it is not in itself a source of obligation where none would otherwise exist" (*Border and Transborder Armed Actions (Nicaragua* v. *Honduras), Jurisdiction and Admissibility, Judgment, I.C.J. Reports 1988*, p. 105, para. 94), it concluded that there is no specific obligation for States to inform other States parties to the Statute that they intend to subscribe or have subscribed to the Optional Clause. Cameroon was

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

not bound to inform Nigeria of its intentions. In justification of this conclusion, the Court cited with approval its statement in the *Right of Passage* case, that:

> "A State accepting the jurisdiction of the Court must expect that an Application may be filed against it before the Court by a new declarant State on the same day on which that State deposits with the Secretary–General its Declaration of Acceptance." (*Right of Passage over Indian Territory, Preliminary Objections, Judgment, I.C.J. Reports 1957*, p. 146.)

26 In my view, not only is this statement too sweeping but, if applied, the effect would be not only to make the Optional Clause system confusing, but would be a risky enterprise as well. Therefore when the Court decided to follow this dictum, which it was not bound to do, it decided the matter too simply by stating that "[t]here is no specific obligation in international law to inform other States party to the Statute that they intend to subscribe or have subscribed to the Optional Clause". Perhaps the Court could also have viewed this matter from the perspective of what it recognizes as part of its jurisprudence also, namely, the principle of good faith. As Vice–President Judge Alfaro stated, good faith "must prevail in international relations, inasmuch as inconsistency of conduct or opinion on the part of a State to the prejudice of another is incompatible with good faith" (*Temple of Preah Vihear (Cambodia* v. *Thailand), Merits, Judgment, I.C.J. Reports 1962*, p. 42).

27 Judge Sir Percy Spender thought that the principles operated

> "to prevent a State contesting before the Court a situation contrary to a clear and unequivocal representation previously made by it to another State, either expressly or impliedly, on which representation the other States was, in the circumstances, entitled to rely and in fact did rely, and as a result that other State has been prejudiced or the State making it has secured some benefit or advantage for itself" (*ibid.*, pp. 143–144).

28 While the tendency of the Court has been to apply good faith only in situations where a legal obligation is said to exist, perhaps the Court could have taken a less abstract position in applying the principle to this case. For, despite the absence of a legal obligation on a State to inform another State that it intends to subscribe to the Optional Clause, the Court could have determined whether the bilateral negotiations on boundary problems which both States had been conducting created an expressed or implied representation on which one or the other had come to rely as a means of resolving their boundary problems. Instead the Court devoted its attention to considering whether or not Nigeria was aware of Cameroon's intentions to bring the matter before the Court. Nor did the Court say what effect or value should be given to the *Journal of the United Nations* of 4 March 1994, which it had itself introduced, and which reported that Cameroon had deposited with the Secretary–General its declaration under Article 36, paragraph 2, of the Statute recognizing the compulsory jurisdiction of the Court. Is this best evidence to be substituted for the statutory obligation of the Secretary–General to transmit copies of a declaration to parties to the Statute? If that is the intention it should be pointed out that, both for reasons of principle and of practical experience, the *Journal* cannot replace the statutory duty of the Secretary–General under Article 36, paragraph 4, of the Statute. Moreover, as a matter of experience, no delegation can rely on the *Journal* alone, susceptible as it is to so many vagaries, as an official channel for the purposes of Article 36, paragraph 2, of the Statute.

29 However that may be, one cannot help but observe the inconsistency in this section of the Judgment. In paragraph 30 of the Judgment, the Court stated that the Optional Clause régime as prescribed by Article 36, paragraph 4, of the Statute is distinct from the régime laid down for treaties by the Vienna Convention. Later, however, the Court took the view that the general rule with regard to treaties equally applies to a declaration made under the Optional Clause. With respect, it cannot be both ways. As pointed out earlier, although declarations made under the Optional Clause are not to be regarded as treaties, this is not to say that the relationships which are established do not partake of the characteristics of a treaty relationship, in other words that, in certain respects, the rule governing treaty relationships would govern declarations made under the

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

Optional Clause. This is owing to the fact that, in my view, the consensual link which is eventually established between States parties is a result of the offer and acceptance of each other's declaration and is binding. Under Article 78 *(c)* of the Vienna Convention on the Law of Treaties of 1969, States are only to be deemed to have received a treaty communication such as an instrument of ratification when they have been informed of it by the depositary in the fulfilment of its obligation.

30 It seems to me that, when the Court stated in the Judgment in the *Right of Passage* case that "the day a State deposits its Declaration of Acceptance under Article 36, paragraph 2, of the Statute, a consensual bond is established with other States that have made similar or identical Declarations", this presupposes, that following the deposit of a declaration with the Secretary–General acting as a depositary, he would in turn have performed his statutory duty by transmitting copies of that declaration to the other parties. If these copies are in conformity with similar or identical declarations, the consensual bond thus established would look to the date of the deposit or the date stipulated as the date on which the bond took effect for jurisdictional title. This construction would also appear to be in harmony with Article 102 of the Charter of the United Nations, which provides as follows:

> "**1.** Every treaty and every international agreement entered into by any Member of the United Nations after the present Charter comes into force shall as soon as possible be registered with the Secretariat *and published by it*.
>
> **2.** No party to any such treaty or international agreement which has not been registered in accordance with the provisions of paragraph 1 of this Article may invoke that treaty or agreement before any organ of the United Nations." (Emphasis added.)

31 The intent of this provision "that every treaty shall be registered with the Secretariat and published by it" is, as it has been recognized, to ensure that a treaty when concluded receives publicity, as well as its contents. By parity of reasoning, when Article 36, paragraph 4, of the Statute enjoins a party to deposit its instrument of declaration with the Secretary–General, who shall transmit copies thereof, the implication is that with transmission a State is put on notice to accept such a declaration or that its declaration made previously has been accepted. It seems to me that it is only then that a consensual bond would have been established and jurisdiction would thus have been conferred on the Court. To suggest that a declaration takes effect instantaneously and automatically without transmission, as the Court has held, would deprive other States of the knowledge that such a declaration had been made, and the consensual bond necessary and indispensable for the establishment of the jurisdiction of the Court would be missing.

32 The Court also held, in paragraph 35 of the Judgment, that to allow a reasonable time which the transmission of a declaration requires for it to take effect would introduce an element of uncertainty into the Optional Clause régime. With respect, it was this rejection of a reasonable lapse of time before a declaration could take effect in the *Right of Passage* case that had an unsettling effect on that régime, albeit unintentionally. Following that Judgment, some States which had previously made a declaration under Article 36, paragraph 2, of the Statute took measures to protect themselves against the institution of surprise proceedings by introducing further reservations into their declarations, in addition to that of reciprocity. The United Kingdom, for instance, amended its declaration to include the following reservation:

> "disputes in respect of which any other Party to the dispute has accepted the compulsory jurisdiction of the International Court of Justice only in relation to or for the purpose of the dispute; or where the acceptance of the Court's compulsory jurisdiction on behalf of any other Party to the dispute was deposited or ratified less than twelve months prior to the filing of the application bringing the dispute before the Court" (*I.C.J. Yearbook 1959–1960*, p. 255).

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

33 France, for its part, excluded disputes with any State which, at the date of the occurrence of the facts or situations giving rise to the dispute, had not accepted the compulsory jurisdiction of the Court.

34 Similar reservations have since been made by several other States to their declarations under the Optional Clause system, and the trend seems to have continued. In other words, instead of the certainty which the Court in its Judgment in the *Right of Passage* case predicted, the experience has been in the opposite direction. The Court indirectly acknowledged this when it stated in the present Judgment that

> "In order to protect itself against the filing of surprise applications, in 1965, Nigeria could have inserted in its Declaration an analogous reservation to that which the United Kingdom added to its own Declaration in 1958. Ten or so other States proceeded in this way. Nigeria did not do so." (Para. 45.)

In other words the Court is saying that a declaration under Article 36, paragraph 2, of the Statute involves risks for a State and that, as a result of its decision in the *Right of Passage* case, States have found it necessary and are deeming it necessary, in order to protect themselves against surprise applications, to take measures which they had not understood Article 36, paragraph 4, to entail when they first deposited their declarations.

35 It is also Nigeria's contention that, when Cameroon filed its Application on 3 March 1994, it acted prematurely and so failed to satisfy the requirement of reciprocity as a condition to be met before the jurisdiction of the Court under Article 36, paragraph 2, of the Statute could be invoked against it. Nigeria further contended that, for the consensual bond to exist between it and Cameroon under Article 36, paragraph 2, invoking the jurisdiction of the Court implies that there must exist not only "coincidence" and "reciprocity", but mutuality as well, so that each would be in the same position vis–à–vis the other as that other is in relation to itself. Nigeria further claimed that, at the time Cameroon instituted its proceedings, it was in ignorance of any possibility of instituting proceedings against Cameroon; that ignorance, it claimed, resulted in the lack of reciprocity. Nigeria also claimed that the haste with which Cameroon filed its Application affected its position adversely, including its position as a Respondent before this Court, since the resources it has had to devote to these proceedings, both now and at the earlier interim measures phase, and the harassment which it has suffered from Cameroon on the international plane, have had a clear and substantial material dimension.

36 In answer to this contention, the Court stated, *inter alia*, and referred to its dictum in the *Right of Passage* case, that "'the principle of reciprocity is not affected by any delay in the receipt of copies of the Declaration by the Parties to the Statute' (*Right of Passage over Indian Territory, Preliminary Objections, Judgment, I.C.J. Reports 1957*, p. 147" (Judgment, para. 43).

37 Such response, with respect, does not seem to meet this particular objection of Nigeria. As I understand it, the complaint is not about the delay as such, but one of substance, namely, that reciprocity under the Optional Clause should ensure jurisdictional equality. To the extent that an application had been filed against a Party, but one which was not in a position to invoke the jurisdiction of the Court had it felt the need to do so — to that extent, the jurisdictional equality which should exist between the two Parties had not existed. Nigeria claims that, until it was informed by the Registrar of the Application filed by Cameroon, it was not in a position to file a claim against Cameroon, as it could not have been aware that Cameroon had become a party to the Optional Clause system. It seems as if the proviso had envisaged this problem and solved it by enjoining the Secretary–General to perform his statutory function of transmitting a declaration, and, since this would allow for the receipt or acceptance of that declaration, reciprocal equality between the Parties would have thus been established.

38 It may be argued that the lapse of a reasonable time before a declaration would be allowed to

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

take effect would allow a State to modify its declaration. The customary norm governing the modification is that a declaration cannot be modified after a dispute has developed. According to the Court, as stated in the *Nottebohm* case:

> "At the time when the Application was filed, the Declarations of Guatemala and of Liechtenstein were both in force. The regularity of the seising of the Court by this Application has not been disputed. The subsequent lapse of the Declaration of Guatemala, by reason of the expiry of the period for which it was subscribed, cannot invalidate the Application if the latter was regular: consequently, the lapse of the Declaration cannot deprive the Court of the jurisdiction which resulted from the combined application of Article 36 of the Statute and the two Declarations.
>
> … … … … … … … … … . .
>
> An extrinsic fact such as the subsequent lapse of the Declaration … by denunciation, cannot deprive the Court of the jurisdiction already established." (*Nottebohm, Preliminary Objection, Judgment, I.C.J. Reports 1953*, pp. 122–123.)

39 To sum up on this point, since Nigeria's Declaration under Article 36, paragraph 2, of the Statute was based on reciprocity, for there to have been reciprocal equality with Cameroon, Nigeria should have been in a position in which, had it wanted to invoke the jurisdiction of the Court at the same time as Cameroon filed its Application, it would have been able to do so. According to the material before the Court, it was not in a position to exercise such a right had it wished to do so, hence the element of reciprocal equality and mutuality was absent. The jurisdiction of the Court cannot be imposed on a State against its clearly expressed will.

40 Nigeria, in its submissions, had also asked the Court to declare that the claims brought by the Republic of Cameroon are inadmissible to the extent specified in the preliminary objections an objection based on law and fact; in other words for the Court to rule on the Application other than on its ultimate merits.

41 In my view, while making such a ruling, one way or the other, the Court should have resisted the temptation of what could be read as taking a position on the merits of the matter, which is still in the preliminary objection phase. As I understand the material presented to the Court, to rule on whether the entire boundary between the countries is contested or whether or not the Court is in a position to delimit the maritime boundary when the rights of third countries could be involved would not have required entering into the merits of the dispute. In paragraph 109 of the Judgment the Court should have made it clear that the Court's jurisdiction cannot be established on the basis of a declaration made under Article 36, paragraph 2, of the Statute, if such a declaration would be contrary to the provisions of or obligations undertaken in a prior treaty otherwise than in conditions laid down in that treaty. On the other hand, I am constrained to note that, by some of its holdings, the Court would appear to have gone too far in taking positions which may appear prejudicial when it reaches the merits phase of the matter and would in that regard have crossed the threshold on a matter which is still at the jurisdictional and admissibility phase. There is a general recognition in the jurisprudence of the Court that, during the preliminary phase of a matter before it, the Court could not pre–empt — even in a remote way — its order, judgment or advisory opinion on the merits of a case when deciding questions of jurisdiction.

Conclusion

42 In view of the reasons which I have advanced above, I regret that I cannot support the Court's holding that it has jurisdiction to pass on Cameroon's Application. The decision of the Court should have been governed by the provisions of the Statute. Jurisdiction cannot be imposed on a State contrary to the clearly expressed provision of the Statute. The Court should not have allowed its decision to be governed by the Judgment in the *Right of Passage* case. It is also a matter of regret

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

that the Court did not take this opportunity to review the decision in the *Right of Passage* case.

(Signed) Abdul G. Koroma.

Dissenting Opinion of Judge Ajibola

Judge Ajibola

Introduction: Why the case concerning Right of Passage over Indian Territory *should be revisited*.

First preliminary objection — Why the Court should not reject it — Questions of reciprocity — Need to re–examine the requirements of Article 36 (2) and (4) of the *Statute — Contractual concept of good faith — Element of surprise and "unfriendly" act — Analysis and comparison of the* Right of Passage over Indian Territory *case vis–à–vis this case — Differences and issue of precedent — Other compelling considerations*.

Third preliminary objection — Reason for disagreement with the decision of the Court — Competence of Lake Chad Basin Commission — Whether LCBC is a regional agency within the meaning of Article 52 of the Charter — Whether LCBC is a tribunal within the meaning of Article 95 of the Charter.

Fourth preliminary objection and reason for voting in favour.

Fifth preliminary objection and reason for voting against the decision of the majority Members of the Court — Failure by the Court to address this objection as framed by Nigeria.

Sixth preliminary objection and reason for voting against the decision of the Court.

Seventh preliminary objection and reason for voting in favour of upholding the second part of Nigeria's objection — Application and interpretation of Articles 74 and 83 of the United Nations Convention on the Law of the Sea.

Eighth preliminary objection and reason for voting against the decision of the Court.

Reasons for voting in favour of the decision of the majority Members of the Court on the second preliminary objection and the first part of the seventh preliminary objection.

Conclusion: The need for the Parties to come to Court by way of special agreement — Need for caution.

Introduction

1 The first preliminary objection of Nigeria, filed on 17 December 1995 in this case, gives the Court another opportunity once more to examine critically its case–law on the provision in Article 36 (2) of the Statute, and more particularly Article 36 (4), which deals with the question of the Optional Clause as it relates to the jurisdiction of the Court. Unfortunately, the Court decided to follow its case–law in the *Right of Passage over Indian Territory* case of 1957, which I strongly disagree with; hence my basic reason for appending this dissenting opinion to the Judgment of the Court. But in addition to disagreeing with the Court with respect to its decision on the first preliminary objection of Nigeria, in which this case–law — decided over 40 years ago — was reaffirmed, I also express my disagreement with the decision reached by the Court on six other preliminary objections raised by Nigeria.

I. The First Preliminary Objection

2 The first preliminary objection of Nigeria is the most important objection addressed to the Court,

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

and was extensively argued by both Parties. In fact, if the objection had been accepted by the Court, it would have disposed of the entirety of the Applications of Cameroon, filed on 29 March 1994 and 6 June 1994 respectively, and in my view the Court ought to have dismissed the Applications on the basis of this objection.

3 It appears to me that this first preliminary objection is fundamental and that it goes to the very root of Cameroon's Application. The objection essentially concerns the interpretation of the requirements of paragraphs 2 and 4 of Article 36 of the Statute of the Court. In order to reach a decision on whether this preliminary objection should be rejected or upheld, some relevant issues raised by Nigeria and Cameroon in their respective arguments and presentations require examination.

4 Among these issues are:

1. Reciprocity or coincidence as expressed in Article 36 (2) in the phrase "in relation to any other State accepting the same obligation", and the use of the word "reciprocity" in the Optional Clause Declaration of Nigeria .

2. The question of good faith and the element of surprise.

3. The requirements contained in Article 36 (4) of the Statute of the Court , namely:

   > "Such declarations shall be *deposited* with the Secretary–General of the United Nations, who shall *transmit* copies thereof to the parties to the Statute and to the Registrar of the Court." (Emphasis added.)

4. The Judgment in the case concerning *Right of Passage over Indian Territory* (*I.C.J. Reports 1957,* p. 125).

A. Reciprocity

5 The argument of Nigeria is that Cameroon, in lodging

> "its Application on 29 March, acted prematurely and so failed to satisfy the requirement of reciprocity as a condition to be met before the jurisdiction of the Court can be invoked against Nigeria" (CR 98/1, p. 29).

6 Cameroon lodged its Optional Clause Declaration on 3 March 1994 and filed its Application three weeks thereafter (i.e., on 29 March 1994), whereas Nigeria had accepted the Court's jurisdiction under Article 36 (2) of the Statute as far back as 14 August 1965.

7 The argument of Cameroon is that this objection raised by Nigeria is "untenable". Cameroon argues that:

> "According to international law pertinent in the matter as well as the firm jurisprudence of this Court, a State party to the system of the Optional Clause may bring a case against another State party to that system immediately after the deposit of its declaration of acceptance with the Secretary–General of the United Nations." (CR 98/3, p. 47, para. 54.)

It should be noted, in this preliminary objection, that there are two aspects with regard to the use and application of the word "reciprocity": the "statutory reciprocity" embodied in Article 36 (2) of the Statute of the Court (i.e., "in relation to any other State accepting the same obligation") and the word "reciprocity" as used by Nigeria in its Optional Clause Declaration, wherein Nigeria recognizes "as compulsory *ipso facto* and without special agreement, in relation to any other State accepting the same obligation, that is to say, on the sole condition of *reciprocity* …" (emphasis added). Therefore, in order for Cameroon to invoke the jurisdiction of the Court against Nigeria it must clear the two hurdles: *(a)* by satisfying the request for "reciprocity" indicated by Nigeria and

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

also *(b)* by satisfying the “statutory reciprocity” under Article 36 (2) of the Statute.

8 A careful examination of Nigeria's Optional Clause Declaration has been the subject of arguments by counsel on both sides and each has given different interpretations to the use of the word “reciprocity”.

9 However, if words are to be given their ordinary meaning, Nigeria's Optional Clause Declaration contains a clear expression of reciprocity in terms of *coincidence*, when it states, *inter alia*, “in relation to any other State accepting the same obligation”, and another requirement of reciprocity when it declares “on the sole condition of reciprocity”. The former requirement is worded exactly as in Article 36 (2) of the Statute of the Court. It is therefore not enough for Cameroon to have attempted to satisfy the statutory requirement of reciprocity by filing its own Optional Clause Declaration as Nigeria had done in 1965; it must also have ensured that the same was done in good faith and not surreptitiously.

10 What is surreptitious about Cameroon's action? It is its failure to notify Nigeria formally (perhaps by a diplomatic note) of its intention to file this case before the Court. After all, both Parties are neighbours. There are arguments on both sides that somehow Nigeria knew about the proposed action of Cameroon, that it was announced in the media and discussed in some other forums like meetings of the Organization of African Unity. This appears to me to beg the question. Nigeria ought to have been formally notified; in my view, this is an apparent prerequisite which Cameroon cannot ignore and which will later be elaborated upon.

B. The Requirement of Article 36 (4) of the Statute of the Court

11 Article 36 (4) makes it mandatory for any State filing its Declaration to deposit the same with the Secretary–General of the United Nations. The Secretary–General *shall* in turn transmit copies thereof to the parties to the Statute and to the Court's Registrar. This paragraph was added to Article 36 during the deliberations stage in Committee IV/1 at the San Francisco Conference.

12 Shabtai Rosenne, in *The Law and Practice of the International Court, 1920–1996*, referred to the commentary of Hudson on this particular point. Hudson considered, “that the insertion of this provision into the Statute was a ‘detail of housekeeping but one which, in view of uncertainties which had arisen, might prove to be useful’” (Vol. II, p. 753). Neither Party denies that such a declaration falls within the provision in Article 102 of the Charter of the United Nations, which also requires the registration of such documents with the Secretariat. The issue here is not that Cameroon failed to register the Optional Clause Declaration with the Secretary–General but that the Declaration was not transmitted to Nigeria until nearly one year later. What then is the consequence of this lapse, having regard to the fact that Nigeria demands reciprocity? Of course, Nigeria's Optional Clause Declaration had since 1965 been communicated to all Members of the United Nations, including Cameroon, and had been published since then. Reciprocity in this context requires that Nigeria should have been informed about Cameroon's Optional Clause Declaration before its Application was filed with the Court, to avoid being surprised and to be assured that Cameroon had acted in good faith.

C. The Contractual Concept

13 In its Judgment in the *Right of Passage* case in 1957, the Court observed that by merely depositing its declaration of acceptance with the Secretary–General of the United Nations, the accepting State automatically becomes a party to the Optional Clause system in relation to any other declarant State. The Court employed the word “contractual” and stated that: “The contractual relation between the Parties and the compulsory jurisdiction of the Court resulting therefrom are established …” (*Right of Passage over Indian Territory, Preliminary Objections, Judgment, I.C.J. Reports 1957*, p. 146.) If, therefore, such a deposit of a declaration of acceptance is considered to be an *offer* to States parties to the Statute which have not yet deposited their

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

declarations, the important question is when (*ratione personae* and *ratione temporis*) can it be said that such an offer has been accepted by a new declarant State? The decision of the Court in 1957 and in all other similar cases, like the *Temple of Preah Vihear* case, is that such an offer is deemed to have been accepted on the date of the deposit of the new acceptance declaration with the Secretary–General of the United Nations.

14 The Court stated in this case that:

> "The only formality required is the deposit of the acceptance with the Secretary–General of the United Nations under paragraph 4 of Article 36 of the Statute." (*Temple of Preah Vihear, Preliminary Objections, Judgment, I.C.J. Reports 1961*, p. 31.)

Although the subject of formation of contracts by correspondence varies from one domestic legal system to another, it is nevertheless indisputable that an offer must be communicated to the offeree before a contract can be considered binding. Judge Badawi, in his dissenting opinion in the *Right of Passage* case, confirmed this view when he observed:

> "Whatever that moment may be, the position in the present case is that, in any event, and whatever criterion or moment may be adopted with regard to the formation of a contract by correspondence, it was prior to that moment. The present case is similar to one in which there is an offer which has not yet been dispatched." (*Right of Passage over Indian Territory, Preliminary Objections, Judgment, I.C.J. Reports 1957*, p. 157.)

15 It is difficult to perceive of a situation whereby a contract is considered as binding on a party when that party is unaware of the content and terms of that contract. There is therefore a cardinal prerequisite condition that the other party be notified that its offer had been accepted. This is the obvious omission in this case. Nigeria was not informed about Cameroon's Declaration before it (Cameroon) filed its Application before the Court. Further, in his dissenting opinion, Judge Badawi concluded that: "The offer by Portugal, contained in its Declaration and addressed to the other States, had not been accepted by India or, indeed, communicated to India." (*Ibid.,* p. 156.)

16 When the Court was called upon by India in 1957 to decide on its preliminary objections, two vital issues of substance (and not of procedure) were invoked in interpreting the provision in Article 36 (4); both conditions are patently mandatory because in both cases the word used in the Article is "shall". On the first condition, the Court rightly decided that the declaration must be deposited by the declarant State with the Secretary–General of the United Nations. But the Court failed to require compliance with the second prerequisite condition, that is to "transmit copies thereof to the parties to the Statute and to the Registrar of the Court". This also is a condition precedent which the declarant State must comply with before it can validly invoke the jurisdiction of this Court. There is no other ordinary meaning or interpretation (in accordance with Article 31 of the 1969 Vienna Convention on the Law of Treaties) that would ensure that both conditions are given the same interpretation and meaning. Such a transmission is the only valid and binding means of official notification to other States parties, and in this case to Nigeria. To enable Cameroon to file a proper application before the Court there is essentially the need for Nigeria to have been notified of Cameroon's Declaration, but which was not done until eleven–and–a–half months thereafter, by which time Cameroon had filed its Application. Regrettably the Court has consistently followed its 1957 decision for over forty years, on the basis on this case–law in *Right of Passage over Indian Territory*.

17 The reasoning of the Court that the requirement of transmission is purely procedural was based on the view that to state otherwise could bring about uncertainty as to the moment when jurisdiction can be invoked. But all that is required of the declarant State is to ensure from the Office of the Secretary–General of the United Nations that this condition of transmission has been met by the Secretariat before filing its application, just as it should ensure that its instrument of declaration had been properly deposited with the Secretary–General. A declarant State which knows that the

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

condition of transmission is a prerequisite, like the deposit, would ascertain that both conditions have been fulfilled before filing its application; in my view, the issue of uncertainty can thereby be disposed of without much waste of time. If the requirement of transmission is made compulsory, the declarant State would nevertheless comply with both conditions by making the necessary enquiry with the Secretary–General of the United Nations.

18 One other point that could have persuaded the Court in 1957 to decide that the issue of transmission is merely procedural concerned the nature of India's Declaration of Acceptance of 28 February 1940, in which it accepted the jurisdiction of the Court for a specified period "from today's date". This is the obvious difference between the case on *Right of Passage over Indian Territory* and the present case. Nigeria's Declaration is based on reciprocity and as such it is essential that it be given due notice and effect.

D. Good Faith and the Element of Surprise

19 It is Nigeria's argument that Cameroon's Application to the Court came as a surprise and was perhaps filed in a clandestine manner. Nigeria further alleges the absence of good faith on the part of Cameroon. Cameroon denies all these accusations and states that Nigeria was informed about Cameroon's intention to bring the action before the Court. Cameroon refers to an earlier meeting where it mentions arbitration as a means of resolving the dispute.

20 Since 1957, when the Court decided the case on *Right of Passage over Indian Territory*, the doctrine of good faith in international law has further developed considerably. There is the Friendly Relations Declaration of the General Assembly of 1970 (General Assembly resolution 2625 (XXV)), which enjoins States to fulfil in *good faith* obligations assumed by them in accordance with the Charter. Article 26 of the Vienna Convention on the Law of Treaties of 1969 also provides that "every treaty in force is binding upon the parties to it and must be performed by them in good faith". The Charter of the United Nations, in paragraph 2 of its Article 2, requires that Members shall fulfil in good faith their obligations under the Charter. The Court has also made reference to the principle of good faith in much of its case–law. In 1974, in the case concerning *Nuclear Tests (New Zealand* v. *France)*, the Court observed that:

> "One of the basic principles governing the creation and performance of legal obligations, whatever their source, is the principle of good faith. Trust and confidence are inherent in international co–operation, in particular in an age when this co–operation in many fields is becoming increasingly essential." (*I.C.J. Reports 1974*, p. 473, para. 49.)

21 One issue of good faith that is very relevant to this particular preliminary objection is the case concerning *Military and Paramilitary Activities*. In this case, the United States purported to act on 6 April 1984 in such a way as to modify its 1946 Declaration, which in fact sufficiently and immediately barred the Application filed by Nicaragua on 9 April 1984. (Nicaragua had filed its Optional Clause Declaration on 24 September 1929.)

22 In that case, the Court found that there was sufficient basis for its jurisdiction. In its Judgment, the Court observed as follows:

> "But the right of immediate termination of declarations with indefinite duration is far from established. It appears from the requirements of good faith that they should be treated, by analogy, according to the law of treaties, *which requires a reasonable time for withdrawal from or termination of treaties that contain no provision regarding the duration of their validity*. Since Nicaragua has in fact not manifested any intention to withdraw its own declaration, the question of what reasonable period of notice would legally be required does not need to be further examined: it need only be observed that from 6 to 9 April would not amount to a 'reasonable time'." (*Military and Paramilitary Activities in and against Nicaragua (Nicaragua* v. *United States of America), Jurisdiction and Admissibility,*

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

Judgment, I.C.J. Reports 1984, p. 420; emphasis added.)

23 If therefore the Court has moved a step ahead since pronouncing its Judgment in 1957 in the *Right of Passage* case by accepting the requirement of good faith as a prerequisite for the termination of an Optional Clause declaration, it stands to reason that it could now move further and do the same in this case.

24 It is the view of the Court that the principle of good faith plays an important role in Optional Clause declarations with regard to reciprocity.

25 The Court observed further in the same *Nicaragua* case that:

> "In fact, the declarations, even though they are unilateral acts, establish a series of bilateral engagements with other States accepting the same obligation of compulsory jurisdiction, in which the conditions, reservations and time–limit clauses are taken into consideration. *In the establishment of this network of engagements, which constitutes the Optional Clause system, the principle of good faith plays an important role; the Court has emphasized the need in international relations for respect for good faith and confidence in particularly unambiguous terms* ..." (*Military and Paramilitary Activities in and against Nicaragua (Nigaragua* v. *United States of America), Jurisdiction and Admissibility, Judgment, I.C.J. Reports 1984,* p. 418; emphasis added.)

26 If, *ex hypothesi,* Nigeria, being aware of the fact that Cameroon was about to file its Application on 29 March 1994 had withdrawn its Optional Clause Declaration, say on 26 March 1994, putting Cameroon in a situation similar to that of Nicaragua, the Court would have decided that Nigeria did not act in good faith and that such withdrawal would not invalidate the Application of Cameroon. The Court is now being asked to deal with "the other side of the coin" and, in my opinion, it ought to give a "reciprocal judgment" by rejecting the Application of Cameroon as an application filed *mala fide*.

27 It has been strongly canvassed by Cameroon that instituting proceedings before the Court cannot be considered an unfriendly act. However, it is the practice among States that cases are addressed to the Court when negotiation and agreement have failed. It is not unusual for States to consider litigation as an unfriendly act especially in the absence of a Special Agreement. A good example is found in the steps taken by Peru and Colombia in the *Asylum* case of 1950, before the Application was eventually filed by Colombia on 15 October 1949. The "Act of Lima" agreement signed on 31 August 1949, which permits either of the parties to file its application before the Court, states in its second paragraph thus:

> "The Plenipotentiaries of Peru and Colombia having been unable to reach an agreement on the terms in which they might refer the dispute jointly to the International Court of Justice, agree that proceedings before the recognized jurisdiction of the Court may be instituted on the application of either of the Parties without this being regarded as *an unfriendly act toward the other, or as an act likely to affect the good relations between the two countries*. The Party exercising this right *shall, with reasonable advance notice, announce in a friendly way to the other Party the date on which the application is to be made*." *(Asylum, Judgment, I.C.J. Reports 1950*, p. 268; emphasis added.)

It is therefore not unusual for a State to consider an application filed with the Court as "unfriendly" when the same is done without notice from the applicant or from other expected sources.

E. The Case Concerning Right of Passage over Indian Territory

28 Two points have to be considered under this heading:

(a) that the present case is easily distinguishable from the *Right of Passage* case;

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

(b) that, even if it is not distinguishable from the *Right of Passage* case, the Court ought not to follow that precedent.

(a) The differences

29 First, it can be clearly observed that the issue of good faith was not strongly canvassed by India, whereas in Nigeria's case absence of good faith on the part of Cameroon was strongly argued on the basis of the available facts and the law.

30 Secondly, on 28 February 1940, when India made its Optional Clause Declaration, it accepted the jurisdiction of the Court for a specified period "from today's date" (*Right of Passage over Indian Territory, Preliminary Objections, Judgment, I.C.J. Reports 1957*, p. 146). There is no such provision in Nigeria's Declaration; on the contrary it demands reciprocity from any declarant State.

31 The issue of reciprocity was not strongly canvassed by India, unlike Nigeria, and as a result the Court did not put much emphasis on it. The situation in the present case is different from the situation in the *Right of Passage* case, which concerned certain enclaves in India, the right of passage to which Portugal claimed. In the present case Cameroon is seeking a determination of all its land and maritime boundaries with Nigeria. Again in the present case, third States' rights are involved. In the Lake Chad area the interests of Chad and Niger are involved, and within the maritime area the interests of Equatorial Guinea, Sao Tome and Principe, and Gabon are involved.

(b) The issue of precedent

32 As a prelude to his book *Precedent in the World Court*, Judge Mohamed Shahabuddeen writes:

> "Decisions of the International Court of Justice are almost as replete with references to precedent as are decisions of a common law court. *Even though previous decisions are not binding, the Court relies upon them as authoritative expressions of its views on decided points of law*." (Emphasis added.)

33 The principle of *stare decisis* does not apply in this Court and, that being so, it has no rule of precedent. Article 59 of the Court's Statute expressly states that a decision of the Court is only binding between the parties and in respect of that particular case. Article 62 of the Statute permits a State which considers that it has an interest of a legal nature which may be affected by the decision of the Court in a particular case to file a request to the Court for permission to intervene.

34 In practice, however, the Court in most cases relies upon and follows its previous decisions.

35 While that practice is desirable in order to ensure some degree of certainty in the jurisprudence of the Court, there are occasions when it is necessary for the Court, for one reason or the other, not to follow its previous decisions. The present case is just such a case.

36 This latter practice is not unknown in the Court and had been employed in a few cases: in the case concerning *Interpretation of Peace Treaties with Bulgaria, Hungary and Romania* the Court declined to follow the strict rule which it had laid down in the *Status of Eastern Carelia* case regarding the rendering of an advisory opinion. Similarly, in the *Barcelona Traction* case the Court did not follow its decision in the *Nottebohm* case on the issue of diplomatic protection.

37 Of recent, Shabtai Rosenne has taken a keen interest in cases connected with Optional Clause declarations under Article 36 (4) vis–à–vis the *Right of Passage* case. He observed in his recent publication, *An International Law Miscellany*:

> "In the present Court this litigation tactic has been followed in five cases of high political implication: *Nuclear Tests (Australia* v. *France)* case, the *Aegean Sea Continental Shelf* case, the *Military and Paramilitary Activities in and against Nicaragua* case, and the two cases *Questions of Interpretation and Application of the 1971 Montreal Convention*

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

> *arising from the Aerial Incident at Lockerbie*. What is more, in all of these cases the phenomenon of the ‘unwilling respondent’ (in the first and third, a permanent member of the Security Council) was encountered, and in the first two of those cases, that unwilling respondent refused to have any part in the proceedings, all adding to the difficulties of jurisdiction and admissibility.
>
> The existence of this well–established procedure coupled with the last five precedents raises serious doubts about the continued unchecked application of the doctrine accepted by the Court in the *Right of Passage* case. Paragraph 4 was inserted into Article 36 of the Statute at the San Francisco Conference almost as a matter of routine, and like any text it is open to more than one interpretation. Since then, important developments have taken place both as regards the general law of the depositary of multilateral instruments, formulated for the first time (as stated) in the Vienna Conventions, and in State practice as exemplified in the cases mentioned.” (P. 92.)

And finally he offered some suggestions, as follows:

> “The question can be asked whether what has occurred since the *Right of Passage* case does not justify a reconsideration of the doctrine of that case should an opportunity to do so present itself. At all events, it is to be hoped that should occasion arise for a revision of the Statute, more attention will be paid to the implications of Article 36, paragraph 4, than was given in 1945, and that a method will be found to protect States which have accepted the jurisdiction under paragraph 2 from the surprise deposit of a declaration in New York and the immediate institution of proceedings accompanied by a request for the indication of interim measures of protection before the respondent can be (not ‘is’) aware that the declaration has been deposited; and that the provisions regarding the making of declarations, their modification and their termination and other related instruments, will be co–ordinated with what is now established law and practice regarding the exercise of the functions of the depositary of multilateral treaties and other international instruments.” (Rosenne, *op. cit.,* pp. 92–93.)

38 From all that has been said and quoted above, it is clear that the decision in the case concerning *Right of Passage over Indian Territory* should generally be revisited and to regard such case–law as bad law, because the decision failed to take into proper consideration the second mandatory condition provided in Article 36 (4) of the Statute of the Court, namely that States parties “shall” be notified before jurisdiction can be invoked by any declarant State. Both conditions, of “deposit” and “transmission”, are mandatory, as set forth in that paragraph 4 of Article 36, which provision must be complied with by any litigant State that intends to file its application.

F. Other Compelling Considerations

39 So many circumstances of this particular case are sufficiently compelling as to persuade the Court to accept the argument of Nigeria, even on objective grounds. Firstly, Nigeria and Cameroon are neighbours and will remain so for all time, and it is therefore not in the interests of peace and good neighbourliness in that region that one Party should be dragged to the Court against its wish. The record before the Court is that both Parties are already involved in the settlement of some of the dispute. Delimitation and demarcation have been effected in some areas and it will be in bad faith that the matter is brought to the Court while other means of settlement of the Parties' dispute is pending.

40 Moreover, many cases of delimitation in land and maritime disputes have been instituted in this Court by way of Special Agreement. A very recent and successful example is the case concerning the *Territorial Dispute (Libyan Arab Jamahiriya/Chad)*, which was concluded and judgment delivered on 3 February 1994; by the end of May of that year Libya had complied with the

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

Judgment of the Court. There are ten other similar cases: *Minquiers and Ecrehos (United Kingdom/France), I.C.J. Reports 1953*, p. 47; *Sovereignty over Certain Frontier Land (Belgium/Netherlands), I.C.J. Reports 1959*, p. 209; *North Sea Continental Shelf (Federal Republic of Germany/Denmark; Federal Republic of Germany/Netherlands), I.C.J. Reports 1969*, p. 3; *Continental Shelf (Tunisia/Libyan Arab Jamahiriya), I.C.J. Reports 1982*, p. 18; *Delimitation of the Maritime Boundary in the Gulf of Maine Area (Canada/United States of America), I.C.J. Reports 1984*, p. 246; *Continental Shelf (Libyan Arab Jamahiriya/Malta), I.C.J. Reports 1985*, p. 13; *Frontier Dispute (Burkina Faso/Republic of Mali), I.C.J. Reports 1986*, p. 554; *Land, Island and Maritime Frontier Dispute (El Salvador/Honduras: Nicaragua intervening), I.C.J. Reports 1992*, p. 351; and the pending territorial disputes *Maritime Delimitation and Territorial Questions between Qatar and Bahrain and Kasikili/Sedudu Island (Botswana/Namibia)*.

41 Three further cases were instituted by unilateral application: *Temple of Preah Vihear (Cambodia* v. *Thailand), I.C.J. Reports 1962*, p. 6; *Aegean Sea Continental Shelf (Greece* v. *Turkey), I.C.J. Reports 1978*, p. 3; and *Maritime Delimitation in the Area between Greenland and Jan Mayen (Denmark* v. *Norway), I.C.J. Reports 1993*, p. 38; however, these cases deal either with maritime delimitation or with frontier disputes, but not with both as in the present case.

42 It is a well–accepted fundamental principle of international law that the jurisdiction of the Court is based on consent of the States involved. The Court echoed this view in the recent case of *Maritime Delimitation and Territorial Questions between Qatar and Bahrain*:

> "There is no doubt that the Court's jurisdiction can only be established on the basis of the will of the Parties, as evidenced by the relevant texts." (*Jurisdiction and Admissibility, Judgment, I.C.J. Reports 1995*, p. 23, para. 43.)

Rosenne also comments as follows on this same established principle:

> "There exists an uncontroverted principle of general international law according to which no State is obliged to submit any dispute with another State or to give an account of itself to any international tribunal. The agreement of the parties to the dispute is the prerequisite to adjudication on the merits." (*The Law and Practice of the International Court, 1920–1996*, Vol. II, p. 563.)

With this consensual basis of jurisdiction, it can be strongly argued in this case that unless such consent is genuinely given, and not forced, the Court should exercise judicial caution in proceeding with the case on its merits. Nigeria's objection is premised on the argument that the Application was a surprise and that Nigeria was not given the prerequisite notice either by Cameroon or by the Secretary–General of the United Nations before the Application was filed by Cameroon.

43 In a similar vein it is also important for the Court to consider the issue of justice underpinning this preliminary objection, and ask whether a jurisdiction forced on Nigeria, as an unwilling Respondent, would promote peace and good neighbourliness between the Parties and in that region. This concept of justice is not abstract; it is to be defined and determined in accordance with the provision in Article 2, paragraph 3, of the Charter. Jurisdiction is defined by Rosenne as follows:

> "Broadly speaking the expression *jurisdiction* refers to the power of the Court to 'do justice' between the litigating States, to decide the case before it with final and binding force on those States. The expression 'do justice' has been used by the Court several times, notably in the *UNAT* advisory opinion." (*The Law and Practice of the International Court, 1920–1996*, Vol. II, p. 536.)

44 It is for all the reasons stated above that I felt convinced that the Court ought to uphold the first preliminary objection of Nigeria and, therefore, dismiss the Applications of Cameroon.

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

II. The Third Preliminary Objection

45 The third preliminary objection of Nigeria is that "the settlement of boundary disputes within the Lake Chad region is subject to the exclusive competence of the Lake Chad Basin Commission" (CR 98/5, p. 64). Nigeria argues that the provisions of the Statute of the Lake Chad Basin Commission, annexed to an agreement dated 22 May 1964, are binding on the four States which are signatories to that agreement, including Cameroon. It argues further that the provisions of the Statute coupled with the agreements and other understandings between the four States parties to the Agreement are binding on them, and thus Cameroon cannot file its Application under Article 36 (2) of the Statute of the Court. The two other members of the Commission are Chad and Niger. Cameroon denies the meaning that Nigeria attaches to the function and power of the Commission. Both Parties refer to the Statute of the Commission as well as the assignments given to it by the four member States of the Commission.

46 A careful examination of the duties of the Commission is more than sufficient to confer on it the task of dealing with all the requests that are now being submitted by Cameroon to this Court. These assignments can be viewed in two parts: those that are contained in the Statute, i.e., under Article IX, paragraphs

> "**(c)** to maintain the liaison between the High Contracting parties with a view to the most effective utilization of the waters of the Basin;
>
> **(d)** to follow the progress of the execution of surveys and work in the Chad Basin as envisaged in the present Convention, and to keep the Member States informed at least once [a] year thereon, through systematic and periodic reports which each State shall submit to it;
>
> … … … … … … … … … . .
>
> **(g)** *to examine complaints and to promote the settlement of disputes and the resolution of differences*" (emphasis added),

and those that are assigned to the Commission by the authority of the member States. As evidence of this, two sub–commissions of experts were, *inter alia*, assigned to carry out the demarcation and delimitation of borders in the Lake Chad area, having as their working documents various conventions and agreements concluded between the former colonial Powers. It is important to emphasize that the sub–commissions were assigned the duty not only to delimit boundaries but also to demarcate the same. This exercise was carried out between 1989 and 1990; by 1994 the assignment had been fully completed and awaited the signing and ratification of the pertinent document by individual Heads of State. Although the document was ratified by Cameroon last year (after this case had been filed in the Court), Nigeria did not respond accordingly, presumably because of the Application of Cameroon pending in the Court.

47 One important and convincing argument in favour of upholding this preliminary objection is the fact that the Commission had already carried out and completed the work that the Court is now called upon by Cameroon to carry out. The four member States are not disputing the final work of the Commission and all that is left to be done is the ratification of the resulting instrument. Apart from the fact that it is difficult, under the circumstances, to establish a case of any dispute between Nigeria and Cameroon within the Lake Chad Basin (except for Darak and adjacent islands), it can be concluded that the Parties, having submitted their claims to the Commission, are bound by its decision. The enigma, or the confusion, that might arise in this regard is the apparent bifurcation of judicial authority within the Lake Chad Basin which could occur if all the four member States agreed to ratify the Commission's instrument in the future.

48 In its further argument Nigeria refers to Article 52 of the United Nations Charter, and considers the Commission's assignment as being within the framework of regional arrangements "or agencies

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

for dealing with such matters relating to the maintenance of international peace and security as are appropriate for regional action …”. The question here is whether the Lake Chad Basin Commission can be regarded as a regional organization. In my view, the Commission can be so regarded and therefore qualifies as coming under Article 52 of the Charter. The reason for this is not far–fetched: as already mentioned, paragraph IX *(g)* of the Commission's Statute empowers the Commission to examine complaints, promote settlement of disputes and resolve differences. The maintenance of international peace and security, as stipulated in Article 52 (1) of the Charter, is in accord with the assignments conferred on the Commission by this regional group of States.

49 Another point raised by Nigeria during its argument in the oral proceedings concerns Article 95 of the United Nations Charter, which provides that:

> “Nothing in the present Charter shall prevent Members of the United Nations from entrusting the solution of their differences to other tribunals by virtue of agreements already in existence or which may be concluded in the future.”

The crucial question here is whether the Lake Chad Basin Commission is a tribunal. To my mind it is, because it is vested with all the powers, functions and duties of a tribunal and it is competent to act as one. The word “tribunal” is a generic term that encompasses various dispute settlement jurisdictions. In *Law Terminology*, a document of the United Nations, the word “tribunal” is defined as “person or body exercising adjudicatory functions outside the regular judicial system, i.e. exercising quasi–judicial functions”; tribunals are referred to as:

> “often established by statutory authority, in which case they are sometimes called statutory tribunals. Although outside the regular judicial system they are nevertheless subject to the supervisory jurisdiction of the High Court of Justice by the process of judicial review. They may be called tribunal, board, *commission*, committee or council and are divided into three categories: administrative tribunal, domestic tribunal, tribunal of enquiry …” (Emphasis added.)

After all, the assignment of the Commission includes not only the delimitation and demarcation of boundaries within the Lake Chad Basin; it also includes the function of dispute settlement and it therefore qualifies as an arbitral or administrative tribunal, as the case may be. Hence Nigeria rightly invokes the provision in Article 95 of the Charter. An examination of Article 94 of the Charter, which deals with the issue of compliance “with the decision of the International Court of Justice”, clearly distinguishes this Court from the establishment of such a tribunal as that envisaged in Article 95 as an alternative body that could be set up instead of an application being filed with the Court.

50 One point is therefore clear with regard to this preliminary objection: that the Commission had been assigned and is still seised of the duty to delimit and demarcate the boundary between both Parties in the Lake Chad Basin, and the subsequent assignment of the same work to the Court is, therefore, inadmissible. Hence my conclusion that the Court lacks jurisdiction. Furthermore, the Commission's assignment, carried out for and on behalf of the four member States, is a joint affair, apparently indivisible. Both Parties in the present case are therefore obliged to recognize and abide by the exclusive competence of the Lake Chad Basin Commission.

51 Finally on this preliminary objection, there is need for a note of caution: that the Court should not be called upon to carry out what has already been accomplished by the Parties through the Commission.

52 For all these reasons it is my view that the third preliminary objection of Nigeria should be upheld.

III. The Fourth Preliminary Objection

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

53 The Court rejects the fourth preliminary objection of Nigeria that:

> "The Court should not in these proceedings determine the boundary in Lake Chad to the extent that that boundary constitutes or is constituted by the tripoint in the Lake." (Preliminary Objections of Nigeria, Vol. I, p. 84, para. 4.12.)

However, I hold a contrary view. The reason for so doing is that, having regard to the position of the tripoint, it is difficult if not impossible to entertain the request of Cameroon.

54 Cameroon disagrees with this preliminary objection and argues that the case–law of the Court does not support the argument of Nigeria. Both Parties made mention of the *Frontier Dispute (Burkina Faso/Republic of Mali)*, where the Chamber of the Court conceded that it had jurisdiction to adjudicate on the case notwithstanding the fact that the endpoint of the frontier lies on the frontier of another, third State. The view of Cameroon is that the *Frontier Dispute* case, as well as the case of the *Territorial Dispute (Libyan Arab Jamahiriya/Chad)*, are case–law that cannot be distinguished from this present case as claimed by Nigeria.

55 As I have mentioned earlier in this opinion, a case of this nature requires the unequivocal consensus of both Parties to enable the Court to be seised of the matter. For example, both the *Frontier Dispute* and *Territorial Dispute* cases were brought before the Court by Special Agreement. Another important factor in favour of Nigeria's argument is the fact that its interests and those of Chad and Niger are interwoven within the Lake Chad Basin, in respect of which the Commission has performed its obligations of demarcation and delimitation.

56 But the position of Chad with regard to the tripoint is more relevant in this case when compared to the cases of *Frontier Dispute* and *Territorial Dispute*. Mention has been made of earlier clashes between Nigeria and Chad in the same area which might or might not affect the tripoint. It can therefore be said that the interests of Chad and to some extent those of Niger constitute the subject–matter of this case which, to my mind, cannot be heard on the merits without Chad intervening as a party. Of course the immediate answer on this could be the invocation of Article 59 of the Statute, in that the decision of the Court is binding only on the parties. However, this is a case which is in line with the cases of *East Timor (Portugal* v. *Australia)* and *Certain Phosphate Lands in Nauru (Nauru* v. *Australia)*. The earlier case of *Monetary Gold Removed from Rome* is also relevant here. The point has been made by Cameroon that its Applications relate only to the issue of the boundary between it and Nigeria. The issue here is not what Cameroon files or says but what, practically, is on the ground as to the position of the tripoint between Chad and the Parties. Quite definitely, the frontier between Cameroon and Nigeria will affect the frontier between Cameroon and Chad by virtue of the tripoint. A desirable situation that would certainly confer jurisdiction on the Court would be the seising of the Court by way of special agreement between Cameroon, Nigeria and Chad. For all these reasons my conclusion is that the fourth preliminary objection of Nigeria ought to be upheld.

IV. The Fifth Preliminary Objection

57 In my view, the Court ought to uphold the fifth preliminary objection as framed by Nigeria which regrettably it rejected, hence my disagreement with the decision of the Court. There are two important reasons which underlie my decision to take a contrary view to that of the Court: in effect the Court has failed to respond to the preliminary objection as framed and presented by Nigeria, and further the conclusions reached by the Court are contradictory in terms.

58 Nigeria in its fifth preliminary objection maintains that there is no dispute between it and Cameroon "concerning boundary delimitation as such throughout the whole length of the boundary from the tripoint in Lake Chad to the sea". It maintains that there simply is no evidence of such a dispute, either in Cameroon's original Application or in its Additional Application filed on 6 June 1994. It went further to particularize the objection as follows:

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

"(1) there is no dispute in respect of the boundary delimitation as such within Lake Chad, subject to the question of title to Darak and adjacent islands inhabited by Nigerians;

(2) there is no dispute relating to the boundary delimitation as such from the tripoint in Lake Chad to Mount Kombon;

(3) there is no dispute relating to the boundary delimitation as such between Boundary Pillar 64 on the Gamana River and Mount Kombon; and

(4) there is no dispute relating to the boundary delimitation as such between Boundary Pillar 64 on the Gamana River and the sea" (Preliminary Objections of Nigeria, Vol. I, p. 87).

Cameroon denies the assertion of Nigeria and argues that in fact there are not only disputes within the Lake Chad Basin area and on the frontier to the sea but that there are also maritime delimitation disputes. The question put to Nigeria by the Court was not limited to the land boundary but speaks of the whole boundary. Consequently, in the conclusion reached by the Court, its finding is that there is a dispute between the Parties concerning the "boundary as a whole". It is thus clear that, strictly speaking, the fifth preliminary objection of Nigeria as put before the Court has not been specifically addressed. The Court ought to have limited itself to the preliminary objection as framed by Nigeria and therefore it cannot be said that the fifth preliminary objection of Nigeria has been properly dealt with.

59 As claimed by Nigeria there has been partial demarcation of the boundary. In fact, Nigeria points out that "something a little over 200 miles of the present boundary has been clearly demarcated by the erection of boundary pillars" (CR 98/2, p. 21). This is not denied by Cameroon. Nigeria goes further to state:

"Even taking a generous view of the extent of the boundary affected by these local incidents (say, ¼ of a mile of boundary for each 'incident') they concern, even if all of them were relevant (which they are not), perhaps some 10 or a dozen miles of its length. That cannot be taken as representing doubt or dispute as to the whole length of that 1,000–mile boundary." (CR 98/2, p. 25.)

Thus it may be concluded that, contrary to the claim of Cameroon, the area in dispute can be considered as relatively minor or even negligible. In any case, at least it is clear from the alleged facts of the incidents and disputes presented by the Parties that there is no question of the entire length of the boundary from Lake Chad to the sea being in dispute.

60 Another aspect of Nigeria's fifth preliminary objection concerns the legal and geographical scope of the boundary dispute. It appears that, in the view of the Court, Nigeria has not definitively made its position clear regarding the course of the boundary, or at least does not agree with the claim of Cameroon. Equally, the Court cannot ascertain from the answer given by Nigeria (based on the question put to it as already referred to) what is its own view of the legal scope of the dispute either now or in the future. Since Nigeria has not filed its Counter–Memorial, it is not bound to disclose its line of defence at this stage of the procedure. Hence, as concluded by the Court, "the exact scope of this dispute cannot be determined at present" (Judgment, para. 93). Yet the Court still concluded that "a dispute nevertheless exists between the two Parties, at least as regards the legal bases of the boundary" *(ibid.)*. In my view, these are contradictory statements which I do not agree with. In fact, Cameroon's claim in its Application ought to have been restricted to the disputed boundary locations and area of incidents, which amount to less than 5 per cent of the entire boundary.

61 Again, the Court ought to have restricted its Judgment to the preliminary objection as framed by

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

Nigeria, and amplified therein under the enumerated four points. Based on this view, the Court initially and rightly concluded that: "On the basis of these criteria, there can be no doubt about the existence of disputes with respect to Darak and adjacent islands, Tipsan, as well as the Peninsula of Bakassi." (Paragraph 87 of the Judgment.)

62 The Court should therefore have concerned and indeed limited itself exclusively to this clear area of boundary disputes, undenied by both Parties. This view is further confirmed by the Court when it observes:

> "All of these disputes concern the boundary between Cameroon and Nigeria. However, given the great length of that boundary, which runs over more than 1,600 km from Lake Chad to the sea, it cannot be said that these disputes in themselves concern so large a portion of the boundary that they would necessarily constitute a dispute concerning the whole of the boundary." (Para. 88.)

63 In effect, the Court on this preliminary objection considered the entire area from Lake Chad to the sea as being in dispute rather than the locations referred to by Nigeria.

64 The Court's failure to limit its decision to the preliminary objection of Nigeria as framed calls into question its Judgment in view of the *non ultra petita* rule. The Court addressed a similar matter in submissions in the *Asylum* case (*I.C.J. Reports 1950*, p. 402). It is not for the Court to expand or enlarge the scope of the preliminary objection as framed and presented by an applicant, nor is the Court called upon to modify it *suo motu*; the objection must be considered and decided upon as put forward by the Applicant in its preliminary objection.

65 For example, France and the United Kingdom, in their Special Agreement in the *Minquiers and Ecrehos* case, asked the Court to decide which of the parties owns these group of islands. The Court might perhaps have decided that the islands had the status of *"res nullius"* or of *"condominium"* (*I.C.J. Reports 1953*, p. 52), but it was obliged to restrict itself to determining "which of the Parties has produced the more convincing proof of title to one or the other of these groups, or to both of them" *(ibid.)*.

66 Rosenne, in *The Law and Practice of the International Court, 1920–1996,* is of the opinion that,

> "in principle it is the duty of the Court, in deciding on the basis of international law the disputes that are submitted to it, to limit itself to the terms of its remit — the special agreement, the submissions, or the question put for an advisory opinion, as the case may be. This — the *non ultra petita* rule — gives the parties the last word in the ability of the Court to settle their dispute." (Vol. I, p. 173.)

67 In conclusion, had the Court followed this principle and restricted itself to the content of the fifth preliminary objection, as formulated and argued by Nigeria, it might have arrived at a decision different from the one reached in regard to this objection.

68 It is for all these reasons that I have voted against the decision of the Court.

V. The Sixth Preliminary Objection

69 I voted against the decision on the sixth preliminary objection because I am convinced that Nigeria is justified in its objection that the Application filed by Cameroon does not meet the required standard of adequacy as to the facts on which its Application is based, particularly in relation to the dates, circumstances and precise locations of the alleged incursions and incidents by Nigeria, in alleged breach of its international responsibility. A careful perusal of Cameroon's Applications reveals incongruities, irregularities, imprecision and mistakes.

70 Some of these incongruities are patent from the Applications as filed on 29 March 1994 and 6

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

June 1994. With reference to the requirement to be satisfied by Cameroon, its Applications must specify,

> "as far as possible the legal grounds upon which the jurisdiction of the Court is said to be based; *it shall also specify the precise nature of the claim, together with a succinct statement of the facts and grounds on which the claim is based*" (Art. 38 (2) of the Rules; emphasis added).

While it is true that Cameroon sufficiently specified the legal grounds upon which its Applications are based, it has, however, failed to specify adequately the precise nature of the claim or to provide a "succinct statement of the facts and grounds on which the claim is based".

71 For Cameroon to invoke Nigeria's international responsibility and consequent obligation to make reparation, it is not enough for Cameroon to make general and unsubstantiated statements about incidents. Cameroon must supply full particulars of the place, the time and the nature of the alleged incidents, and also make it clear precisely how these were serious enough to call into question Nigeria's international responsibility as recognized by international law.

72 It is true, as the Court stated, that "succinct" does not mean "complete", but it connotes conciseness, and that is a requirement which Cameroon failed to satisfy in its Applications. In its oral argument Nigeria contended that

> "the respondent State, and the Court, need, as a minimum, to know four things — the essential facts about *what* is alleged to have occurred, *when* it is supposed to have taken place, precisely *where* it is supposed to have taken place (especially in relation to any relevant boundary), and *why* the Respondent is thought to bear international responsibility for the incident" (CR 98/2, p. 28).

73 In its pleadings Cameroon stated that, in order to establish Nigeria's responsibility, its Applications were only indicative of the nature of such responsibility and that the allegations contained therein would be amplified when the matter reached the merits stage.

74 However "indicative" such a statement may be, it must be sufficiently clear as to the nature of Nigeria's responsibility. And since Cameroon fails in this regard, the Court ought not to reject Nigeria's sixth preliminary objection.

VI. The Seventh Preliminary Objection

75 The seventh preliminary objection of Nigeria contends that there is "no legal dispute concerning delimitation of the maritime boundary between the two Parties which is at the present time appropriate for resolution by the Court" (Preliminary Objections of Nigeria, Vol. I, p. 113). In support of this contention Nigeria gave two reasons:

> "(1) In the first place, no determination of a maritime boundary is possible prior to the determination of title in respect of the Bakassi Peninsula.
>
> (2) Secondly, at the juncture when there is a determination of the question of title over the Bakassi Peninsula, the issues of maritime delimitation will not be admissible in the absence of sufficient action by the Parties, on a footing of equality, to effect a delimitation 'by agreement on the basis of international law'." (Preliminary Objections of Nigeria, Vol. I, p. 113.)

76 On the first reason, I agree with the conclusion reached by the Court that this is simply a question of method. It is true that the Court determines its procedure and could easily arrange its own adjudicatory process so as to ensure that the land disputes are dealt with first, before embarking on the maritime dispute. As a matter of fact, this does not appear to me as an issue of

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

preliminary objection and as such it has been rightly rejected.

77 However, I hold a contrary view to the conclusion reached by the Court on the second strand of Nigeria's seventh preliminary objection. Here the issue is an important one under international law, as it relates to the provisions of the United Nations Law of the Sea Convention of 1982. What Nigeria contends here is that the issue of maritime delimitation is inadmissible in the absence of negotiation and agreement by the Parties on a footing of equality to effect a delimitation. In other words, Nigeria alleges that Cameroon failed to seek first an attempt for a delimitation by agreement based on international law under the principles and provisions of the United Nations Convention on the Law of the Sea of 1982. The relevant provisions are Articles 74 and 83. Article 74, paragraphs 1 and 2, provides as follows:

> "**1.** The delimitation of the exclusive economic zone between States with opposite or adjacent coasts *shall be effected by agreement on the basis of international law*, as referred to in Article 38 of the Statute of the International Court of Justice, *in order to achieve an equitable solution*.
>
> **2.** If no agreement can be reached within a reasonable period of time, the States concerned shall resort to the procedures provided for in Part XV." (Emphasis added.)

Article 83, paragraphs 1 and 2, provides as follows:

> "**1.** The delimitation of the continental shelf between States with opposite or adjacent coasts *shall be effected by agreement on the basis of international law*, as referred to in Article 38 of the Statute of the International Court of Justice, *in order to achieve an equitable solution*.
>
> **2.** If no agreement can be reached within a reasonable period of time, the States concerned shall resort to the procedures provided for in Part XV." (Emphasis added.)

78 As quoted above, the provisions of the two Articles are similar, but while one deals with the exclusive economic zone (Art. 74), the other deals with the issue of the continental shelf (Art. 83). Furthermore, both Parties are signatories to the Convention, which they have also ratified. The question now is whether these provisions are binding on both of them; in my view, there is no doubt about that. Before instituting an application in this Court, it is a condition precedent that both Parties ought to attempt genuinely to agree on the settlement of their maritime boundary dispute, failing which such a matter could be brought before the Court. These are mandatory provisions for both Parties. Cameroon, for its part, contends that there was no compelling reason to negotiate nor reach an agreement before filing an application before the Court, and went further to state that attempts were made to reach an agreement but failed. While it may be true to say that there was an attempt to negotiate and agree on their maritime boundary delimitation up to point G, there is however no evidence to indicate that there was any attempt to reach such an agreement regarding their maritime disputes beyond that point. To institute therefore an action in the Court without compliance with the provisions set out above, under the Law of the Sea Convention, is a fatal omission which makes such an application inadmissible. In any case, the Court, pursuant to Article 38 of the Statute, must apply international law and "international conventions, whether general or particular …" (para. 1 *(a)*). This has always been the position under general international law and it was first affirmed by the Court in 1969 in the *North Sea Continental Shelf* cases, which emphasize the need for parties to be given the opportunity to negotiate, when it held that

> "the parties are under an obligation to enter into negotiations with a view to arriving at an agreement, and not merely to go through a formal process of negotiation as a sort of prior condition for the automatic application of a certain method of delimitation in the absence of agreement; they are under an obligation so to conduct themselves that the negotiations are meaningful …" (*North Sea Continental Shelf, Judgment, I.C.J. Reports 1969*, p. 47).

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

A clear guideline was expressed in the *Gulf of Maine* Chamber case that first an agreement must be sought, following negotiations which should be conducted in good faith with a clear and honest intention of achieving a successful result. And the Chamber went on to state in its Judgment that:

> "Where, however, such agreement cannot be achieved, delimitation should be effected by recourse to a third party possessing the necessary competence." (*Delimitation of the Maritime Boundary in the Gulf of Maine Area, I.C.J. Reports 1984*, p. 299.)

It is therefore immaterial to determine whether this is a procedural or a substantive issue. What is clear is that the process of negotiation and attempt to reach an agreement in good faith must precede any reference to a third–party adjudication. In any event, I strongly believe that without complying with the prerequisite condition of negotiation and attempt to reach an agreement, Cameroon failed to comply with a requirement of substance and not just a merely procedural one. This is not a question of jurisdiction under Article 36 (2) of the Statute, but one of admissibility. My conclusion is that the Applications of Cameroon are not admissible as regards a dispute over the maritime boundary.

VII. The Eighth Preliminary Objection

79 The last preliminary objection of Nigeria appears to me to be a sound one, which ought to be upheld by the Court. Unfortunately the Court also rejects it. Here, Nigeria argues "that the question of maritime delimitation necessarily involves the rights and interests of third States and is to that effect inadmissible" (Preliminary Objections of Nigeria, Vol. I, p. 133). It states that there are five States involved within the Gulf, which is "distinctly concave". These States are Equatorial Guinea, Gabon, Sao Tome and Principe, and the two Parties in the present case. Nigeria, in its argument, tries to distinguish and differentiate the situation of this particular case from other cases like those of the *Frontier Dispute,* the *Continental Shelf (Libyan Arab Jamahiriya/Malta)* as well as the *Continental Shelf (Tunisia/Libyan Arab Jamahiriya)*. Cameroon, on its part, argues to the contrary, that all these cases are relevant and that they should be followed in the present case. Besides, it invokes the provision of Article 59 to the effect that a judgment in this case would be binding on no other States than the Parties.

80 The subject–matter of this preliminary objection concerns maritime delimitation beyond point G, which relates to the exclusive economic zone. Agreed, that a delimitation exercise between the Parties may not affect the interests of third States as such, but, in this particular case, it is difficult to effect any maritime delimitation beyond point G without calling into question the interests of other States, particularly Equatorial Guinea and Sao Tome and Principe. In accordance with the jurisprudence of the Court, it cannot decide a dispute between two parties without the consent of those States whose interests are directly affected, unless they intervene in such a matter.

81 It is for all these reasons that the Court ought to refuse the Application of Cameroon based on maritime delimitation of the area beyond point G and uphold the eighth preliminary objection of Nigeria.

VIII. The Second Preliminary Objection and the First Part of the Seventh Preliminary Objection

82 However, I agree with the decision of the Court in rejecting the second preliminary objection of Nigeria, whereby it maintains that for a period of 24 years prior to the filing of Cameroon's Application both Parties had accepted a duty to settle all boundary disputes through "the existing boundary machinery" and that this constitutes an implied agreement and that Cameroon is thereby estopped from invoking the jurisdiction of the Court. I believe that, having regard to all the facts presented by both Parties in this case, Cameroon is not estopped from invoking the jurisdiction of the Court and that this duty cannot override the provision in Article 33 of the Charter which permits

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

parties to seek the settlement of their disputes by "negotiation, enquiry, mediation, conciliation, arbitration, judicial settlement … or other peaceful means of their own choice". In addition, Nigeria referred its grievance concerning the armed incident of 1981 to the Organization of African Unity. In the circumstance, it is difficult to agree with Nigeria that this is a case of *pacta sunt servanda* or estoppel.

83 Furthermore, I agree with the decision of the Court, as already mentioned above, that the first part of Nigeria's seventh preliminary objection deals with the matter of methodology and as such the objection, which in my opinion is unconvincing, has been rightly rejected by the Court.

Conclusion

84 The general conclusion I have reached with regard to the eight preliminary objections filed by Nigeria is that, whereas I agree generally with the decisions of the Court on the second and the first part of the seventh preliminary objections, I do however disagree with the decisions reached by the Court on the first, third, fourth, fifth, sixth and the second part of the seventh and the eighth preliminary objections respectively.

85 As already mentioned, the most important objection raised by Nigeria is the first one, which deals with Article 36 of the Statute, particularly its paragraphs 2 and 4. Needless to say that there would have been no need for the Court to consider the remaining seven preliminary objections if the first one had been upheld.

86 I am also of the view that the *Right of Passage over Indian Territory* case is no longer good case–law. In 1957, when the Court had the first opportunity of interpreting the provision in Article 36 (4), the decision, while positively and effectively asserting the legal position as to the *deposit* of the declaration of acceptance as a condition precedent to invoking the jurisdiction of the Court, failed to do the same with regard to the second prerequisite condition: that copies of such instruments must be *transmitted* to all member States. That precisely is what the Court is called upon to regularize in this case, which it failed to do. This is a unique opportunity for the Court to do so, in order not to drag an unwilling Respondent to Court without its *real* consent. To do so may not be in the interests of peace within that enclave. Most cases of this nature that have come to the Court have come by way of Special Agreement and it would have been better for the Parties to be persuaded by the Court to bring the case in this manner. That would not be a unique attempt, having regard to what happened in the case concerning the *Maritime Delimitation and Territorial Questions between Qatar and Bahrain*. There are other considerations of a compelling nature to warrant an exercise of caution on the part of the Court. If one considers the fact that Cameroon is seeking the delimitation of the entire maritime and land boundary between it and Nigeria, the fact that there had been allegations and counter–allegations of border incidents and the fact that the Parties have on the ground various commissions to effect demarcation, delimitation and pacific settlement of disputes — all these facts are cogent reasons why the Parties should be enjoined to come to Court by way of Special Agreement.

87 Furthermore, it is essential that the Court should handle this matter with care to ensure that peace will reign within that region at the end of this litigation. In this regard there is also need for caution to ensure that the jurisdiction of the Court will not be an exercise in futility if, for example, what is required of the Court is ultimately accomplished by the Lake Chad Boundary Commission.

88 Finally, in dealing with cases between States, adherence to the general principles of international law as expressed in Article 2, paragraph 1, of the Charter (regarding the principle of the sovereign equality of Members) must be observed. As stated above, the jurisdiction of the Court is based on genuine consent of the parties and nothing should be done to derogate from this basic principle. As observed in the dissenting opinion of Judge Chagla in the *Right of Passage over Indian Territory* case:

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

"I should like to make one general observation with regard to the question of the jurisdiction of the Court. It has been said that a good judge extends his jurisdiction. This dictum may be true of a judge in a municipal court; it is certainly not true of the International Court. The very basis of the jurisdiction of this Court is the will of the State, and that will must clearly demonstrate that it has accepted the jurisdiction of the Court with regard to any dispute or category of disputes. Therefore, whereas a municipal court may liberally construe provisions of the law which confer jurisdiction upon it, the International Court on the other hand must strictly construe the provisions of the Statute and the Rules and the instruments executed by the States in order to determine whether the State objecting to its jurisdiction has in fact accepted it." (*I.C.J. Reports 1957,* p. 180.)

(Signed) Bola Ajibola.

favoured passing under Spanish sovereignty. Then Great Britain again enlarged the powers of the local Gibraltarian authorities by issuing an Order in Council entitled The Gibraltar Constitution Order (1969). Spain promptly terminated all communications between Gibraltar and the mainland, which remained closed until they were partially reopened in December 1982.

5. *Conclusion*

When Spain became a member of the → North Atlantic Treaty Organization, the former made sovereignty over Gibraltar a major issue. However, a subsequent Spanish Government removed the barriers to access from Spain to Gibraltar and negotiations have been initiated for the joint operation of the Gibraltar airport. With the advent in 1992 of further changes in the European Economic Community, of which Spain is now a member, Gibraltar once again is looking forward to becoming the "Hong Kong of the Mediterranean", particularly in financial matters.

There are many problems to be resolved before there can be a final settlement between Spain and Great Britain with respect to the problem of Gibraltar. The only really viable solution appears to be the transfer of sovereignty to Spain, with appropriate agreed provisions to protect both the Gibraltarians and Great Britain.

GOOD FAITH

1. *Notion*

The principle of good faith requires parties to a transaction to deal honestly and fairly with each other, to represent their motives and purposes truthfully, and to refrain from taking unfair advantage that might result from a literal and unintended interpretation of the agreement between them (→ Interpretation in International Law). The concept figures prominently in the → Vienna Convention on the Law of Treaties, which by virtue of its careful draftsmanship and wide ratification has assumed an authoritative place in international law on questions relating to the interpretation and enforcement of → treaties. Art. 31(1) of that Convention provides: "A treaty shall be interpreted in good faith in accordance with the ordinary meaning to be given to the terms of the treaty in their context and in the light of its object and purpose." These references to context and purpose demonstrate that the substance of the principle of good faith is the negation of unintended and literal interpretations of words that might result in one of the parties gaining an unfair or unjust advantage over another party.

A secondary notion of good faith in the context of explicit agreements pertains to the duties of signatories to a treaty prior to ratification. The early rule of international law to the effect that States had an obligation to ratify treaties that their diplomatic agents had signed has been replaced since the 18th century by the concept of discretionary ratification (→ Treaties, Conclusion and Entry into Force). This change came about as a result of the growth of parliamentary institutions within States that adopted constitutional checks and balances against the acts of the executive branch or its diplomatic agents abroad (→ Diplomatic Agents and Missions). Yet the new concept of discretionary ratification carried over the old notion to the extent that the executive branch, having signed the treaty through its agents, now had an obligation to make every effort in good faith to obtain the consent of the sovereign, and not to act in the interim period in such a way as to prejudice the unperfected rights of the signatories to the treaty. Art. 18 of the Vienna Convention on the Law of Treaties, while not explicitly referring to the principle of good faith, summarizes its substance by providing that a signatory, prior to ratification, "is obliged to refrain from acts which would defeat the object and purpose" of the treaty.

Finally, the principle of good faith may be said to apply, apart from treaties or other agreements, to the general performance of a State's obligations under international law. According to a significant

(1) **Significance of Transparency 619**

(2) **The Expansion of Transparency Obligations in IIAs 625**

(3) **Transparency and 'Fair and Equitable Treatment' 628**

Concluding Remarks 634

(p. 618) Nowadays it is understood that transparency should be observed in numerous types of organizations, including in particular governments and other public bodies. In the contemporary field of international investment, transparency has begun to be characterized as a fundamental principle. Initially required of the host country, it may also come to be required of the home (investing) country and the investor (investing corporation), according to research conducted by the United Nations Conference on Trade and Development (UNCTAD).[1] The Declaration of the Doha Development Agenda of the World Trade Organization (WTO), which sought to draft a multilateral investment agreement in the section entitled 'Relationship between trade and investment', indicated that transparency would be one of the basic elements of future WTO Investment Rules. It stipulates as follows: 'In the period until the Fifth Session, further work in the Working Group on the Relationship Between Trade and Investment will focus on the clarification of: scope and definition; transparency; and non-discrimination …'.[2]

However, early bilateral investment treaties (BITs) concluded in the late 1950s to 1960s did not contain a provision for transparency. Articles on transparency first appeared in the early US BITs, which were concluded in the 1980s. Furthermore, even recent books on investment treaties have neither a chapter on transparency nor do they include transparency as a term in the index.[3]

Furthermore, with respect to the international economic field, transparency is argued for not only in the area of investment but also in trade. As transparency is to be required widely in relation to the organization in general, it is natural that transparency is required in respect of the importing countries as the main addressee of obligations in the trade field.[4] Transparency is widely discussed, so we need to take its particular meaning into account in the context of investment.

The present chapter will offer an overview of transparency issues as follows. It begins with a discussion of the significance of the concept in the investment field, asking why transparency is being increasingly characterized as a fundamental (p. 619) principle and considering why it was neglected for a long time, bearing in mind early investment treaty practice. It then goes on to review the development of specialized transparency obligations in more recent international investment agreements (IIAs), highlighting their principal features. Thirdly, the chapter will analyse the interrelationship between the transparency obligations of the state and the principle of fair and equitable treatment, taking into account developments in international investment arbitrations in this regard. Finally, the chapter will conclude by considering the role that transparency has to play in investment protection more generally. The chapter does not cover issues of corporate transparency through disclosure rules, which is done elsewhere in this volume.[5]

(1) Significance of Transparency

Transparency is covered in many WTO agreements and in the General Agreement on Trade in Services (GATS) is ranked as a basic principle alongside the principle of most-favoured-nation treatment.[6] One reason why transparency has obtained the position of a fundamental principle in the international economic field, including international investments, was the impact of its treatment in GATS. Transparency within the GATS treaty is covered in the preambles as follows.

> Wishing to establish a multilateral framework of principles and rules for trade in services with a view to the expansion of such trade under conditions of *transparency* and progressive liberalization and as a means of promoting the economic growth of all trading

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

partners and the development of developing countries …. (Emphasis added)

In the text of GATS, transparency, which is stated as its main purpose in the preamble, is defined as a 'basic principle'.[7] The main obligations contained in Article 3 are as follows: (1) the obligation to make publicly available all relevant measures (p. 620) of general application, that are all relevant national laws, such as by their publication; (2) the obligation promptly to inform the Council for Trade in Services of the introduction of any new, or any changes to existing, laws and other regulations; (3) the obligation to respond promptly to all requests by other members for specific information on a member's measures of general application or international agreements and to establish enquiry points to provide specific information to other members.

Article 3 of GATS indicates that the core element of transparency is that all relevant measures of general application be made publicly available. To ensure this availability, importing countries need to meet the three obligations as stated above. It should be noted that this requirement of public availability does not always require the publication of these measures. Publication is one means by which the measures of relevant laws may be made publicly available. Furthermore, with respect to the exchange of information as the means of securing the public availability of all relevant laws, only the obligations to inform the Council for Trade in Services and to respond to all requests by other countries are included. The obligation to respond is not placed on any individual entity but only on countries themselves. The scope of information which is exchanged is more restricted than that which is to be publicly available.

Other WTO agreements in addition to the GATS emphasize transparency. For example in the following, though transparency is not designated as a basic principle, it is still addressed:

- Article 10 of GATT;
- Article 7 of the Agriculture Agreement;
- Article 7 of the SPS Agreement;
- Articles 2, 5 and 15 of the TBT Agreement;
- Article 6 of the TRIM Agreement;
- Article 12 of the Customs Evaluation Agreement;
- Article 2 of the Agreement on Preshipment Inspection; (p. 621)
- Articles 2(g) and 3(e) of the Agreement on Rules of Origin;
- Appendices 2 and 3 of the Understanding on Rules and Procedures Governing the Settlement of Disputes;
- Sections B and D of the Trade Policy Review Mechanism;
- Article 9 of the Agreement on Trade in Civil Aircraft; and
- Article 17 of the Agreement on Government Procurement.

The inclusion of transparency obligations in the WTO Agreements carries on the precedent set by the General Agreement on Tariffs and Trade (GATT) 1947. The ensuring of public availability of all relevant national laws applied as the basic element of transparency came into existence in Article 10 of the GATT, which provides obligations for the publication of laws, regulations, judicial decisions, and administrative rulings of general application. Article 10 of GATT does not include the obligation of information exchange which nowadays is one of the means of realizing transparency.[8] On the other hand, Article 3 includes other obligations which are not included in Article 3 of GATS. Those obligations are: (1) the obligation not to enforce a measure before such a measure has been officially published, (2) the obligation to administer in a uniform, impartial, and reasonable manner all its laws etc, as stated above (fair administration), (3) the obligation to maintain or institute independent judicial, arbitral, or administrative tribunals or procedures (independent tribunals). These last two obligations are common to the contemporary US criteria of transparency as stated below.

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

But it was not recognized that Article 10 of GATT included transparency as it was viewed only as a technical provision.[9] This means that this article was not considered important in the GATT. Therefore Article 10 cannot be characterized as the origin of the transparency obligation in current international economic regulations, although it might appear so on the surface when we compare Article 10 with the present provisions. Article 10 of GATT is only a forerunner to these present manifestations of transparency.

The concept of transparency came into existence in the GATT Tokyo Round codes. The Preamble to the Government Procurement Agreement reads, 'Recognizing that it is desirable to provide transparency of laws, regulations, procedures and practices regarding government procurement; …'. On the other hand, in the text of the Agreement there is no article specifically entitled 'transparency'. Article 6, 'Information and Review', includes only the obligation to publish any law and procedure regarding government procurement but does not include the obligation of information exchange. We can presume that transparency in the preamble is used (p. 622) in connection with Article 6, but it is not clear whether or not it can be considered to be limited to the content contained in Article 6. However, in order to achieve national treatment and non-discrimination as the main purposes of the agreement on government procurement, open tendering procedures, as well as regulations of technical specifications, are stressed. The emphasis on open tendering procedures indicates the importance of transparency in this area.[10] In the history of the WTO and GATT, we have to realize that the concept of transparency emerged as an important principle at the time of the Tokyo Round and finds its most developed contemporary expression in the GATS.

In the field of trade, the importance of the general availability of relevant laws was formerly recognized, but it is only in recent times that it has been viewed as important from the standpoint of transparency. The initial practice of BITs did not include a specific transparency provision. The first BIT was between West Germany and Pakistan in 1959 and certain Western European countries followed this practice. The purpose of BITs at that time was to secure prompt, adequate, and effective compensation provided against expropriation by states. At that time, the notable case where the issue of expropriation and compensation emerged was the expropriation of natural resources-related investments in developing states. Developing states strongly argued that natural resources should be entirely controlled based upon the state in which they were located under the title of 'permanent sovereignty over natural resources', and the means of compensating for expropriation should be decided entirely by the states themselves. The initial BITs were in response to such a situation and were called 'investment protection agreements'. Such BITs did not include the principle of transparency, neither mentioning the word 'transparency' nor containing any provision concerning the general availability of laws of the countries concerned. Such agreements continue even today. One example is the most recent UK BIT with Vanuatu in 2004.[11] Thus, this type of investment protection attaches no importance to transparency.

On the other hand, in the late 1970s the prevailing opinion in the USA was that the conventional programme of freedom of commerce and navigation treaties (FCN) had not responded to the needs of investors and traders. First, as GATT regulations widely covered trade, the significance of disciplines imposed by FCN treaties was weakened. Secondly, with respect to international investment, it was recognized that FCN rules were not sufficient to respond to the needs of that time. The conventional FCN treaty did not include a clause covering issues such as the prohibition of (p. 623) performance requirements or the free entry of key foreign personnel in connection with the establishment and operation of an investment. Thirdly, as the FCN programme was built on the premise that partners were advanced states, it was difficult for developing states to commit to obligations that were capable of full compliance only for advanced states. Given this situation, much attention was paid by the USA to the European practice of concluding BITs and, in due course from the early 1980s, the US government constructed a BIT programme to conclude such treaties with developing countries.

The purpose and structure of the US BIT programme was, however, different from its European counterpart. Although the main purpose of European BITs was to guarantee adequate, prompt, and

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

effective compensation against expropriation, the US government set as its main aims the improvement of the investment environments of host states as well as investment protection. The improvement of the investment environment in host countries enabled the acquisition of national treatment or most-favoured-nation treatment. The securing of transparency was one form of treatment of investment for which improvement was sought.

Article 2 (Treatment of Investments), paragraph 9 of the first US Model BIT, drafted in 1983, states,

> Each Party and its political subdivisions shall make public all laws, regulations, administrative practices and procedures, and adjudicatory decisions that pertain to or affect investments in its territory of nationals or companies of the other Party.[12]

This includes securing the public availability of relevant laws in the treatment of investments. The US BITs with Bangladesh and Haiti from the 1980s adopted this model to make publicly available the relevant laws of host states. Furthermore, the BITs with Turkey, Grenada, and Congo adopted the model of the 1984 or 1987 draft. (The BIT with Panama did not contain such a provision because in this case, in the view of the US Department of State, such public availability of relevant laws had already been realized.[13]) At that time, the US BIT included only the obligation of public availability of relevant laws of host states and did not use the concept of transparency. This obligation was characterized as one of the treatment of investment standards.

(p. 624) After the end of the Cold War, the USA began to conclude BITs with Eastern European countries. On the one hand, this was for the purpose of maintaining a market economy system after the collapse of the former socialist regimes and on the other hand it indicated to the wider world the change of economic regimes of the former socialist countries. One such pioneering agreement was the Treaty with Poland Concerning Business and Economic Relations, a comprehensive agreement that included not only investment but also trade. At that time, Poland was not a member of GATT. By Article VIII of that agreement,

Exchange of Information and Transparency

> **1**. Each Party acknowledges the desirability of facilitating the collection and exchange of all non-confidential, non-proprietary information relating to investments and commercial activities within its territory.
>
> **2**. Each Party shall make publicly available all non-confidential, non-proprietary information which may be useful in connection with investment and commercial activities. In addition, each Party shall promptly make public all laws, regulations, administrative practices and procedures, and adjudicatory decisions having general application that pertain to or affect commercial activities or investments.
>
> **3**. The Parties shall disseminate to their respective business communities such information made available under paragraph 2 which will assist their nationals and companies in pursuing the most expeditious and equitable settlement of any dispute affecting them which may arise under this Treaty. Such information may be related to timeliness of decisions and vindication of rights under the Treaty.[14]

In this article, the word 'transparency' is applied clearly, which means securing the public availability of all laws with the added obligation to make information public and for information exchange. In this sense, this provision appears similar to Article 3 of GATS. However, the obligation to make information public was not specifically equated with publication as in GATS. With respect to information exchange, it mentions only its desirability. On this point, the obligations are less strict than those in GATS.

The Treaty on Business and Economic Relations with Poland had the political and economic functions of showing the transition of the former socialist regime beyond the mere improvement of investment environments through legal forms.[15] Such a document was highly symbolic of the

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

functions of the concept of transparency. Transparency was viewed as an inevitable requirement of a free market economy. From the historical viewpoint, transparency that ensured the public availability of relevant laws as its basic element was definitely born at that moment, and led to GATS.

(p. 625) (2) The Expansion of Transparency Obligations in IIAs

NAFTA realized the next stage of transparency. The aim of NAFTA is included in Article 102, paragraph 1 as follows: 'The objectives of this Agreement, as elaborated more specifically through its principles and rules, including national treatment, most-favored-nation treatment and transparency, are to …'. Herein transparency is positioned as a basic principle and rule on a par with national treatment and most-favoured-nation treatment. As the concrete definition of transparency, Chapter 18, 'Publication, Notification and Administration of Laws', stipulates its core meaning as securing the public availability of relevant information on laws. The structure of Chapter 18 is as follows: Article 1801: Contact Points; Article 1802: Publication; Article 1803: Notification and Provision of Information; Article 1804: Administrative Proceedings; Article 1805: Review and Appeal. Chapter 18 of NAFTA stipulates the involvement of related parties in administrative procedures and obligations to establish an impartial review agent, such as a court, in addition to the public availability of information on relevant laws. However, it is not indicated in the text that transparency is to be secured by these articles. This point has been clearly demonstrated in US practice in the 21st century.

The new US Model BIT of 2004 includes the following transparency-related articles: Article 10, entitled 'Publication of Laws and Decisions Respecting Investment' and Article 11 entitled 'Transparency'.[16]

(p. 626) The concept of transparency was greatly expanded in the US Model BIT of 2004. First, the publication of laws and other regulations is separated from the principle of transparency itself. The term transparency covers the following items: (1) to make contact points for facilitation of communications; (2) to publish in advance any relevant measure that a Contracting Party proposes to adopt and to provide the opportunity to comment on proposed measures; (3) to respond to questions pertaining to any actual proposed measure; (4) to institute administrative proceedings; (5) to establish or maintain administrative tribunals or procedures for the purpose of the prompt review.

Transparency was expanded to include the institution of a prior comment upon the proposed laws and administrative decisions as stipulated in (1), that is, a commitment concerning the enactment of laws and administrative decisions beyond the mere provision of information of relevant laws to be publicly available and the review of the related administrative decisions by an impartial agent such as a court. Such broad transparency appeared in the US-Uruguay BIT.[17] In more recent US Free Trade Agreements with investment provisions, a commitment to transparency in (p. 627) administrative proceedings has been introduced.[18] In addition, in a number of other BITs a general right for any interested person to have available to them information on relevant laws, regulations, and procedures can be found, as well as permission to comment on proposed measures.[19]

Transparency was expanded in this way because its purpose had shifted from mere improvement of investment environments to public control of policy-making or of the implementation and dispute settlement process of host states. A new philosophy has emerged that transparency is to ensure the accountability of host states with a view to good and effective governance.[20] Transparency from the standpoint of accountability is compatible with that of the improvement of investment environments. Investors not only obtain merit from the public availability of information on relevant laws, but this can also reinforce the accountability of host states. Furthermore, the realization of such accountability guarantees good and effective governance in host states as a means of improving their investment environment.

Deep analysis of the purpose of transparency leads to an increase in the number of actors for

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

which transparency would be requested. The research on BITs by UNCTAD which positioned transparency as an emerging principle in international investment law examines transparency not only towards host countries but also towards home countries and investors themselves.[21] The basic philosophy of UNCTAD's research is that BITs should be desirable for all relevant actors, including host states, home states, and investors, and that home countries as well as investors should be requested to release relevant information on request. In practice, BITs have demanded transparency from neither home states nor investors. But it is important that such an idea on transparency has emerged. Currently, the basic purpose of transparency has been shifting from mere improvement of investment environments to pursuit of the accountability of all actors concerned.

This new philosophy on BITs, in practice, has been adopted only by the US government, which further has only applied such transparency to host states' measures. Governments other than the USA have not requested such transparency in making BITs.[22] Taking this situation into account, one may conclude that the (p. 628) currently prevailing idea is that transparency should be viewed only as securing public availability of information on relevant laws by their open release and information exchange in order to improve the investment environment. The transparency provided in the BITs and Economic Partnership Agreements concluded by Japan belong to such a category.[23] But it is necessary to pay attention to the new philosophy of transparency and the gradual increase in the number of its supporters.[24]

(3) Transparency and ‘Fair and Equitable Treatment’

Since around 1980 the number of BITs that include the obligation of fair and equitable treatment of investors by host states has been increasing. The purpose of this provision is to ensure a certain level of treatment of investors and investments by host states. The concept of fair and equitable treatment has not been clearly defined and the abstract views on the topic have been divided into two main factions. The first view is that it means the minimum standard that should be given to foreign investors under international customary law and the second is that it means a degree above the minimum standard.[25] We may suppose that transparency could be included in fair and equitable treatment, so such an idea should be discussed.

Whether such a relationship exists between fair and equitable treatment and transparency has been considered in a number of recent investment arbitrations. One of the most important legal grounds of claim alleged by investors in such cases has been a breach of the obligation of fair and equitable. As a result, the definition of fair and equitable treatment has come to attract attention.[26] In this process, arbitral awards have emerged where the relationship between fair (p. 629) and equitable treatment and transparency was the most controversial issue. The *Metalclad* case, based on NAFTA Chapter 11 (chapter on Investment), was the first of these recent cases in which fair and equitable treatment came into contact with issues of transparency.

In the *Metalclad* case,[27] the Metalclad Corporation had planned to operate a waste disposal facility in Mexico on the invitation of the Mexican government, but, faced with the opposition of local government authorities in Mexico, Metalclad abandoned its plan. In response, it brought the case to arbitration to pursue the responsibility of the Mexican government to provide compensation for the loss of investment. The arbitration tribunal considered that the Mexican government had not provided fair and equitable treatment to Metalclad, contrary to Article 1105 of NAFTA. The arbitration award states:

> An underlying objective of NAFTA is to promote and increase cross-border investment opportunities and ensure the successful implementation of investment initiatives … Prominent in the statement of principles and rules that introduces the Agreement is the reference to ‘transparency’ (NAFTA Article 102(1)). The Tribunal understands this to include the idea that all relevant legal requirements for the purpose of initiating, completing and successfully operating investments made, or intended to be made, under the

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

> Agreement should be capable of being readily known to all affected investors of another Party …. Once the authorities of the central government of any Party (whose international responsibility in such matters has been identified in the preceding section) become aware of any scope for misunderstanding or confusion in this connection, it is their duty to ensure that the correct position is promptly determined and clearly stated so that investors can proceed with all appropriate expedition in the confident belief that they are acting in accordance with all relevant laws.[28]

The Mexican government's denial of a municipal construction permit was considered improper. Metalclad, relying on representations by Mexican government officials, acted in good faith and fully expected to be granted the permit. Therefore,

> Mexico failed to ensure a transparent and predictable framework for Metalclad's business planning and investment. The totality of these circumstances demonstrates a lack of orderly process and timely disposition in relation to an investor of a Party acting in the expectation that it would be treated fairly and justly in accordance with the NAFTA.[29]

In the view of the arbitral tribunal, the policies of the Mexican Federal Government and local governments were not clearly made known to Metalclad, which created confusion and therefore the lack of transparency created Metalclad's hardships. The tribunal acknowledged the responsibility of the Mexican government.

(p. 630) Mexico sought judicial review of this award before the courts of Canada as the designated place of arbitration in this case.[30] With respect to the issue of fair and equitable treatment, the arbitration award was nullified by the judgment of the Supreme Court of British Columbia[31] on the grounds that the tribunal had read transparency into fair and equitable treatment:

> In its reasoning the Tribunal discussed the concept of transparency after quoting Article 1105 and making reference to Article 102. It set out its understanding of transparency and it then reviewed the relevant facts. After discussing the facts and concluding that the Municipality's denial of the construction permit was improper, the Tribunal stated its conclusion which formed the basis of its finding of a breach of Article 1105; namely, Mexico had failed to ensure a transparent and predictable framework for Metalclad's business planning and investment. Hence, the Tribunal made its decision on the basis of transparency. This was a matter beyond the scope of the submission to arbitration because there are no transparency obligations contained in Chapter 11.[32]

It seems that the tribunal read transparency (Art 102 NAFTA) into fair and equitable treatment and made the award. In the view of the Supreme Court, the issues an investor can bring to arbitration were limited to Chapter 11 under NAFTA. Therefore, it was beyond the scope of NAFTA's authority for the tribunal to make a decision based on Article 102.

From the viewpoint of the arbitration tribunal, it can be argued that it did not have the intention of directly applying Article 102. Indeed, the tribunal acknowledged that the Mexican government lacked transparency and affirmed the responsibility of the Mexican side. Yet in the view of the tribunal, the investor suffered damages from the measures of the Mexican government which were contrary to the obligation of fair and equitable treatment. To define the measures of the Mexican government which lacked fair and equitable treatment in precise terms, the tribunal argued there was a lack of transparency. Article 102, which includes transparency, covers myriad fields, including investment, but is not found in Chapter 11 of NAFTA, which the arbitration between investors and states covers. To interpret the arbitral award in such a way is in effect to exclude any transparency obligation from the fair and equitable treatment standard in Article 1105 of NAFTA, which is what the decision of the Supreme Court of British Columbia did.

Such a narrow approach to the fair and equitable treatment standard was not accepted in the subsequent *Tecmed* case, where a different approach to interpretation was taken not involving

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

Article 102 of NAFTA. In the *Tecmed* case,[33] the tribunal (p. 631) considered that the fair and equitable treatment provision in the BIT between Spain and Mexico was an element of good faith recognized under international law and stated:

> (T)his provision of the Agreement, in light of the good faith principle established by international law, requires the Contracting Parties to provide to international investments treatment that does not affect the basic expectations that were taken into account by the foreign investor to make the investment.
>
> The foreign investor expects the host State to act in a consistent manner, free from ambiguity and totally transparently in its relations with the foreign investor, so that it may know beforehand any and all rules and regulations that will govern its investments, as well as the goals of the relevant policies and administrative practices or directives, to be able to plan its investment and comply with such regulations ….The foreign investor also expects the host State to act consistently, i.e. without arbitrarily revoking any preexisting decisions or permits issued by the State that were relied upon by the investor to assume its commitments as well as to plan and launch its commercial and business activities.[34]

The view of the tribunal was that investors held a certain expectation in concluding the BIT and that this led the definition of fair and equitable treatment to be one that ensures the protection of such investor expectations. The expectation held by investors, according to the tribunal, was that host states should act in a consistent manner, free from ambiguity and totally transparent in its relations with the foreign investor. This tribunal rephrased fair and equitable treatment in accordance with the principle of good faith and read transparency into it. Such an approach was also followed in the *Saluka* case.

The *Saluka* case[35] developed and clarified the *Tecmed* decision. In the *Saluka* case, the actions of the Czech government were the object of the complaint by Saluka Investments BV, a Netherlands-registered affiliate of the Japanese financial group Nomura. In the case, whether the actions taken by the Czech government violated the 'fair and equitable treatment' standard became an important issue. To interpret the 'fair and equitable treatment' standard, the tribunal examined first its ordinary meanin; secondly, the context, and finally, the object and purpose of the Czech Republic-Netherlands BIT. With regard to the ordinary meaning, the tribunal, quoting the *SD Myers* decision,[36] stated that 'the infringement of the standard requires treatment in such an unjust or arbitrary manner that the treatment rises to the level that is unacceptable from the international perspective'.[37] Regarding the context, this tribunal said that 'the "fair and equitable treatment" standard is linked directly to the stimulation of foreign investment and to the economic development of both (p. 632) Contracting Parties'.[38] Concerning the object and purpose, its overall aim is considered to be to encourage foreign investment, and extend and intensify the parties' economic relations. Based on these interpretations, the tribunal considered that the 'fair and equitable treatment' standard requires the host state to assume an obligation 'to treat foreign investors so as to avoid the frustration of investors' legitimate and reasonable expectations'.[39] Theoretically, a foreign investor may expect that the government's conduct does not manifestly violate the requirements of transparency as well as those of consistency, even-handedness, and non-discrimination as this tribunal said. Thus the tribunal connects the 'fair and equitable treatment' standard with transparency.[40]

Thus, transparency has been considered as an element of fair and equitable treatment in recent arbitration awards. Is this view compatible with the concept of fair and equitable treatment? With regard to fair and equitable treatment, there has been controversy over whether it would mean the minimum standard under customary international law or beyond the minimum, as stated above. Such controversy is related to the argument as to why transparency should be read into fair and equitable treatment standard in any case. Taking into account the current situation of developing states, and the prevailing view that each country is required to provide treatment for foreign investors that is equivalent to that for nationals,[41] it is difficult to say that transparency, even the

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

public availability of information of relevant laws, should be a minimum standard towards foreign investors under customary international law.

The arbitral tribunal of *Metalclad* assumed that an underlying objective of NAFTA is to promote and increase cross-border investment opportunities and interpreted the fair and equitable treatment not as a standard of international law but as a standard of NAFTA. The tribunal in the *Pope and Talbot* case[42] clearly stated that fair and equitable treatment should be a NAFTA standard beyond the minimum under customary international law in the language, '[a]nother possible interpretation of the presence of the fairness elements in Article 1105 is that they are *additive* to the requirements of international law. That is investors under NAFTA are entitled to the international law minimum *plus* the fairness elements'.[43] Such interpretations (p. 633) of fair and equitable treatment as a NAFTA standard exclude the idea that it should be a standard under customary international law. However, in later arbitration awards under NAFTA, the tribunals considered that fair and equitable treatment does not mean anything other than the minimum standard under international law and in fact dismissed the *Pope and Talbot* interpretation. The implication of this may be that transparency might not be an additional element to fair and equitable treatment in NAFTA as it goes beyond the minimum standard under customary international law.

On the other hand, the interpretation of the *Tecmed* tribunal uses a very subtle expression as follows: '(T)he commitment of fair and equitable treatment included in Article 4(1) of the Agreement is an expression and part of the *bona fide* principle recognized in international law'.[44] How should we interpret this expression? If fair and equitable treatment indicates the standard under customary international law, the fair and equitable treatment clause in a BIT has little significance as this obligation would be complied with by countries without the clause.

First, we should be reminded that fair and equitable treatment clauses differ from agreement to agreement. Accordingly, the purpose and interpretation of this clause will be different in each agreement. For example, Article 1105 of NAFTA provides as follows:

> Each Party shall accord to investments of investors of another Party treatment in accordance with international law, including fair and equitable treatment and full protection and security.

Article 3.1 of the Czech Republic-Netherlands BIT, upon which *Saluka's* claim was brought, provides as follows:

> Each Contracting Party shall ensure fair and equitable treatment to the investments of investors of the other Contracting Party ….

Comparing these two clauses, their styles are completely different. On the one hand, it might be appropriate for the fair and equitable standard of NAFTA to be interpreted under customary international law as it explicitly mentions international law. On the other hand, it might be reasonable that Article 3.1 of the Czech Republic-Netherlands BIT, which does not mention international law, should be interpreted as an autonomous standard as in the *Saluka* decision.

We have to note that as the same concept of fair and equitable treatment has been applied to different BITs, it is important to seek a common element in this concept. From this perspective, the *MTD Equity* case[45] gives us helpful guidance. In that case the tribunal states that it follows the *Tecmed* decision on this issue,[46] and borrows (p. 634) Professor Schwebel's words to indicate the meaning of fair and equitable treatment as 'a broad and widely-accepted standard encompassing such fundamental standards as good faith, due process, nondiscrimination, and proportionality'.[47] The tribunal then paraphrases, 'In their ordinary meaning, the terms "fair" and "equitable" used in Article 3(1) of the BIT mean "just", "even-handed", "unbiased", "legitimate"'.[48] The tribunal, upon such an assumption, concludes that the host state's approval of an investment which was clearly against its own urban development policy is a breach of the obligation of fair and equitable treatment. Thus 'minimum' is the common element of fair and equitable treatment and includes good faith, due process, non-discrimination, and proportionality. The *Tecmed* and *Saluka* decisions

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

have added transparency to this list of good governance criteria.

As the above-mentioned arbitration awards show, the common meaning of fair and equitable treatment is the minimum standard to act in good faith under customary international law or under each BIT. Its concrete meaning should be adapted according to both the contents of each BIT, such as the purpose of the BIT, and the political and economic situations of the host states to which it applies.[49] Based on applicable situations, transparent action might be required as a principle of good faith. In other words, even if a BIT does not contain a provision for transparency, the core element of transparency might emerge if a clause on the fair and equitable treatment obligation resides within it and its application calls for such a reading. Yet, we cannot define the concrete meaning of transparency as an element of fair and equitable treatment in each BIT by understanding the specific contents of the BIT and investment environments, although the obligation of public availability of information on relevant laws could be included in the meaning.

Concluding Remarks

As stated above, transparency originated in the concept of the improvement of the investment environment, but it is not clear what relationship transparency should (p. 635) have with investment protection. One could presume that the obligation of transparency has no relation to the protection of investments. But to read transparency into fair and equitable treatment gives a basis for compensation towards investments that have suffered injuries, such as where an investor was led into making a bad decision to invest due to lack of information on relevant laws. Thus, transparency might have a significant bearing on the aspect of investment protection in this sense. Transparency may require the host state not only to secure the public availability of relevant laws but also to compensate investors who have suffered because of the lack of transparency by host states.[50] Indeed, depending on the particular interpretation that a tribunal might place on the precise meaning of fair and equitable treatment in a given case, transparency may be regarded as an element of fair and equitable treatment and so require a degree of accountability by host states.

In the 1980s, transparency came to be known as the securing of the public availability of information on relevant laws. This trend was followed by the WTO Agreements, which ranked transparency as a basic principle. Furthermore, transparency has developed in US BITs as a tool to pursue the accountability of host states and to charge host states with corresponding obligations so as to establish an impartial review mechanism. From the same viewpoint, it has come to be argued that accountability should also be required of investors and host states in BITs. This proposal indicates a change in the theoretical basis not only of transparency but also of the fundamental functions of BITs. Until now, BITs have been treaties that lay out obligations concerning areas such as investment protection or improvements in investment environments in host states in favour of investors and investments. But the new argument could intend to shift the obligations upon both investors and home states in favour of host states. In this sense, this argument proposes changing the paradigm of what BITs should be.

to which contracting states have made commitments. Therefore the ambit of the application of national treatment and market access is very restrictive. On the contrary, transparency and MFN are applied to all matters in principle. See General Agreement on Trade in Services 1994, available at <http://www.wto.org>.

[7] GATS Article III: Transparency:

> '**1**. Each Member shall publish promptly and, except in emergency situations, at the latest by the time of their entry into force, all relevant measures of general application which pertain to or affect the operation of this Agreement. International agreements pertaining to or affecting trade in services to which a Member is a signatory shall also be published.
>
> **2**. Where publication as referred to in paragraph 1 is not practicable, such information shall be made otherwise publicly available.
>
> **3**. Each Member shall promptly and at least annually inform the Council for Trade in Services of the introduction of any new, or any changes to existing, laws, regulations or administrative guidelines which significantly affect trade in services covered by its specific commitments under this Agreement.
>
> **4**. Each Member shall respond promptly to all requests by any other Member for specific information on any of its measures of general application or international agreements within the meaning of paragraph 1. Each Member shall also establish one or more enquiry points to provide specific information to other Members, upon request, on all such matters as well as those subject to the notification requirement in paragraph 3. Such enquiry points shall be established within two years from the date of entry into force of the Agreement Establishing the WTO (referred to in this Agreement as the "WTO Agreement"). Appropriate flexibility with respect to the time-limit within which such enquiry points are to be established may be agreed upon for individual developing country Members. Enquiry points need not be depositories of laws and regulations.
>
> **5**. Any Member may notify to the Council for Trade in Services any measure, taken by any other Member, which it considers affects the operation of this Agreement.'

‘Article 10 : Publication of Laws and Decisions Respecting Investment

1. Each Party shall ensure that its: (a) laws, regulations, procedures, and administrative rulings of general application; and (b) adjudicatory decisions respecting any matter covered by this Treaty are promptly published or otherwise made publicly available.

2. For purposes of this Article, “administrative ruling of general application” means an administrative ruling or interpretation that applies to all persons and fact situations that fall generally within its ambit and that establishes a norm of conduct but does not include: (a) a determination or ruling made in an administrative or quasi-judicial proceeding that applies to a particular covered investment or investor of the other Party in a specific case; or (b) a ruling that adjudicates with respect to a particular act or practice.

Article 11 : Transparency

1. Contact Points

(a) Each Party shall designate a contact point or points to facilitate communications between the Parties on any matter covered by this Treaty. (b) On the request of the other Party, the contact point(s) shall identify the office or official responsible for the matter and assist, as necessary, in facilitating communication with the requesting Party.

2. Publication

To the extent possible, each Party shall: (a) publish in advance any measure referred to in Article 10(1)(a) that it proposes to adopt; and (b) provide interested persons and the other Party a reasonable opportunity to comment on such proposed measures.

3. Provision of Information

(a) On request of the other Party, a Party shall promptly provide information and respond to questions pertaining to any actual or proposed measure that the requesting Party considers might materially affect the operation of this Treaty or otherwise substantially affect its interests under this Treaty. (b) Any request or information under this paragraph shall be provided to the other Party through the relevant contact points. (c) Any information provided under this paragraph shall be without prejudice as to whether the measure is consistent with this Treaty.

From: Oxford Public International Law (http://opil.ouplaw.com). (c) Oxford University Press, 2015. All Rights Reserved. Subscriber: Dechert LLP Paris; date: 02 October 2015

4. Administrative Proceedings

With a view to administering in a consistent, impartial, and reasonable manner all measures referred to in Article 10(1)(a), each Party shall ensure that in its administrative proceedings applying such measures to particular covered investments or investors of the other Party in specific cases: (a) wherever possible, covered investments or investors of the other Party that are directly affected by a proceeding are provided reasonable notice, in accordance with domestic procedures, when a proceeding is initiated, including a description of the nature of the proceeding, a statement of the legal authority under which the proceeding is initiated, and a general description of any issues in controversy; (b) such persons are afforded a reasonable opportunity to present facts and arguments in support of their positions prior to any final administrative action, when time, the nature of the proceeding, and the public interest permit; and (c) its procedures are in accordance with domestic law.

5. Review and Appeal

(a) Each Party shall establish or maintain judicial, quasi-judicial, or administrative tribunals or procedures for the purpose of the prompt review and, where warranted, correction of final administrative actions regarding matters covered by this Treaty. Such tribunals shall be impartial and independent of the office or authority entrusted with administrative enforcement and shall not have any substantial interest in the outcome of the matter. (b) Each Party shall ensure that, in any such tribunals or procedures, the parties to the proceeding are provided with the right to: (i) a reasonable opportunity to support or defend their respective positions; and (ii) a decision based on the evidence and submissions of record or, where required by domestic law, the record compiled by the administrative authority. (c) Each Party shall ensure, subject to appeal or further review as provided in its domestic law, that such decisions shall be implemented by, and shall govern the practice of, the offices or authorities with respect to the administrative action at issue.'

[22] See further UNCTAD, *Bilateral Investment Treaties 1995–2006: Trends in Investment Rulemaking* (New York and Geneva, United Nations, 2007) at 76–80. The study concludes: 'only a small—albeit growing—number of BITs of the last decade include provisions on transparency. However, to the extent that BITs deal with this issue, there have been significant developments concerning the content of the clause. Transparency is no longer perceived as a matter of the contracting parties exchanging investment-related information. In addition, a few recent BITs grant information rights to "all interested persons" and even allow them to comment upon draft legislation. Some BITs also enhance investor rights in administrative and judicial proceedings and provide for third-party participation'.

CLA-000054

THE GOVERNMENT AT THE STANDARDS BAZAAR

Stacy Baird*

In recent years, there has been heightened interest in having government intervene in what has become primarily a market activity to mandate information technology standards. This article will provide an analytical framework by which government can consider such actions. I premise my proposal on the conclusion that government should be reluctant to intervene in the setting of information technology standards (and particularly, to mandate a particular standard that has not been developed and/or widely adopted by the market) because: (1) the relevant industries are sophisticated in regard to standards setting and have many well-developed types of standards, and forums in which to develop standards; (2) the U. S. government has a strong preference for market-developed information technology standards and promotes this preference as a matter of both domestic law and policy and foreign trade policy; (3) international trade agreements limit the degree to which participating governments can mandate standards; and (4) in contrast to the sophistication of the marketplace, government is rarely as informed, sophisticated in its understanding of the market, or nimble enough to respond to market conditions; therefore, the risk of government failure is significant, and indeed greatest where the market is young and dynamic, as is the case with regard to the current market affected by information technology standards.

Based on these premises, this article proposes the following test, which appears as a flow chart in the Appendix. First, the government should identify which of three categories describe the instant circumstances: (1) clear cases for intervention, those where there is a government responsibility to meet a critical public interest objective and the standard is essential for the government to meet that objective; (2) "gray area" cases, where the standard is relevant to either (a) meeting a public interest objective arising in the context of a non-critical issue in the area of national security, defense, public safety, health or

---

* Mr. Baird was Senior Policy Advisor to U.S. Senator Maria Cantwell and Brookings Institution Legislative Fellow advising Rep. Howard Berman on intellectual property and technology issues. He is now a consultant to entertainment and information technology companies. This article was written in the course of consulting for Microsoft. The views expressed herein are solely those of the author. Mr. Baird would like to thank Grace Koh for her invaluable assistance and contribution.

welfare, or (b) providing an essential but non-critical government service; and (3) cases that are clearly not circumstances for government intervention. As to determining whether to intervene in a case arising within the first category, where a critical public interest objective is at stake and a standard is essential to meet the objective, the government should take all necessary measures to address the objective. That said, pursuant to clear government policy, even in these cases government should be predisposed to implement market-developed standards and may apply the same test as described for "gray area" cases. In a "gray area" case, there must be a significant and substantial market failure to develop a standard to meet the important public interest objective before the government should consider mandating a particular standard. "Significant and substantial" means the market failure has proved to be a barrier to government action to address the important public interest objective. The government should further consider mitigating factors, such as whether the market has had a reasonable time, relative to the circumstances, to develop, approve, and implement the standard and whether there is cohesiveness among the stakeholders (i.e., whether stakeholders have adequate forums in which to act in the specific situation). The government and industry should support credible and informed non-governmental public interest (e.g., consumer-oriented) representation to potentially obviate the need for direct government action later on.

Where a government decides to intervene, intervention should be reasonably tailored to rectify the identified market failure and to achieve the particular public interest objective. The government should limit the scope of intervention and define objectives. In order to assure the most narrowly tailored intervention, government should clearly articulate: (a) the specifics of the important public interest objective in the establishment of a particular information technology standard; (b) the purpose and scope of the government intervention; and (c) defined objectives for government intervention to achieve. The government should proceed incrementally with intervention. The first step should be to encourage market behavior through incentives. As a second step, the government should use its leverage as a major market participant and potential regulator to influence market behavior; however, the government should behave as a rational consumer, and it should consider not only the public interest objective at issue, but also the general public good. At each stage of intervention, the government should consider how best to mitigate the risk of harm of "non-market failure." To this end, where the government does intervene, intervention should reflect the market norms and market behaviors to the greatest extent possible.

I. INTRODUCTION

In recent years, there has been heightened interest in having the state or federal government (or a corresponding foreign governing body) intervene in

the information technology standards-setting process to mandate a particular standard.[1] The question of whether the government should mandate a particular information technology standard has arisen in several contexts, including entertainment content protection (e.g., efforts to implement standardized copy protection measures such as the broadcast flag, digital rights management, etc.), access to government services (e.g., state government requirement of the open-standard formats for all government documents), and efforts to achieve greater interoperability for data exchange in the areas of law enforcement, national security, and healthcare. The question of the government's proper role in setting standards has spurred substantial debate. However, to date there has been no objective analysis by which the need for and nature of government action may be determined. It is up to government policymakers to determine the best course in the public interest. This Article will outline a framework to

---

1. For the purpose of this discussion, I define the term "standard" as a written specification that facilitates interoperability between information technology networks, applications, or services, enabling such components to exchange and use information. In simple terms, an information technology standard enables software, hardware, or information technology services to "talk" to each other. More specifically, a standard is a technical description of the functionality or features necessary for interoperability; it is a description of the *requirements* to achieve interoperability, not a specific implementation of such a "description." For example, a standard for automobiles might be the technical requirement that the engine would run on gasoline with an octane rating ranging from 86 to 92. An implementation might be the General Motors design of a piston engine, or a Mazda design of a Wankel rotary engine. In the information technology sphere, one example of a standard is the XML file format that enables the creation of documents that can be read, revised, managed, saved, and stored across a broader array of applications and platforms. In terms of interoperability, this is not the same as "interchangeability," which is the ability to substitute one product or system for another to perform the same functions (i.e., the creation of a piece of software or an information technology system that functions in the same manner as another product and is used to replace such other product). As two U. S. courts have concluded, describing "interoperability" in this manner would be overly broad. *See* Massachusetts v. Microsoft Corp., 373 F.3d 1199, 1225 n.16 (D.C. Cir. 2004); New York v. Microsoft Corp., 224 F. Supp. 2d 76, 122 (D.D.C. 2002). Interoperability, in the meaning I give the term, allows information technologies to provide differing features and characteristics, while at the same time ensuring that such different technologies can communicate to exchange data with one another.

I use the terms "government intervention in the setting of information technology standards" and "government-mandated standards" to describe a government action to establish or mandate by law or policy a particular information technology standard in cases where the market/industry has not developed and/or approved a standard. I do not mean to include in my definition the government's participation in the standard-setting process as a full participant in standards-setting organizations, or as a potential customer for (or even developer of) a standard. I also do not mean to necessarily frown upon situations where governments simply "ratify," "bless," or "codify" in their rules for enforcement purposes information technology standards that have previously been developed, tested, and approved by industry (assuming the government action provides an opportunity to expeditiously adapt or revise the standard as technology evolves). I also take the liberty of conflating computing technology with consumer electronics, and discuss them collectively as "information technology." Finally, I will feel free to take examples from each sector, given their ongoing convergence.

guide government policy when the following question arises: should the government intervene in the market to mandate an information technology standard?

II. BACKGROUND

The past decade has been a dynamic period in the information technology standards-setting world. The explosive growth of the role of information technology in our society and as a component of our economy has dramatically elevated the importance of information technology interoperability. Interoperability may be achieved in a number of ways, through intellectual property licensing and cross-licensing, relatively simple technical means (for instance, in information technologies and consumer electronics, converters and translators are commonplace in both software and hardware), through industry collaboration with companies working to facilitate interoperability among their products, through a company designing its product to interoperate with the products of other companies, and through consulting services that facilitate interoperability among otherwise non-interoperable technologies. And indeed, as I suggest above, interoperability between modern technologies is often a far simpler task than during previous eras of technological evolution wherein inventors were limited by physical characteristics and mechanical interactions. This said, I will be focusing on standards and standard setting, as standards have been the focal point for government action and significantly, an integral part of some commercial competitive strategies.

The increased need for interoperability has in turn resulted in enormous demand for standards at a pace that challenges traditional standards-setting processes. Concurrently, government programs have transitioned from reliance on government-specific standards, such as MilSPEC/MilStandards, to voluntary standards developed in the private sector, placing an additional burden on standards-setting forums.[2] As a result of these factors, the information technologies industries are in an extremely competitive commercial environment, one that is also reliant on standards that facilitate interoperability among increasingly heterogeneous products and services. The high demand for interoperability is in turn creating an environment wherein stakeholders are more likely to turn to government to intervene in the market to aid in achieving particular goals more rapidly than may occur in the natural course of market activity.

In some cases, the government is being asked by one business sector or

2. MilSPEC and MilStandards are respectively the "military specifications" and "military standards" developed by Department of Defense engineers and technicians to describe the products to be made by contractors. *See* U.S. GEN. ACCOUNTING OFFICE, GAO/NSIAD-95-14, ACQUISITION REFORM: DOD BEGINS PROGRAM TO REFORM SPECIFICATIONS AND STANDARDS (Oct. 1994), *available at* http://www.gao.gov/archive/1995/ns95014.pdf.

another to play a role in, or even to take responsibility for, setting information technology standards, the development of which were vexing the industry with conflicting interests, or identified by one proponent or another to need government assistance to accelerate the advancement of one technological solution, business model, or corporate venture over another. Throughout this dynamic period, governments have been asked by stakeholders, or have independently pursued mandating particular information technology standards, in several areas:

Copyright protection and digital rights management for copyrighted works. This has been a technical, legal, and political issue for years. Examples include recent efforts to seek a government mandate, such as legislation introduced by U.S. Senator Hollings that set a deadline for market action, the failure of which would precipitate a government mandate for digital rights management standards.[3] There have been efforts by both Congress[4] and the Federal Communications Commission (FCC)[5] to establish a "broadcast flag" with specific technical standards for digital broadcast television.[6]

Open Source Software. There is an ongoing debate as to whether governments should mandate standards that are implemented with open source code software over proprietary software because, proponents of open source argue, open source software has characteristics that are better aligned with the needs of government (e.g., Massachusetts's selection of open standards formats for all state government documents[7]) and government adoption would accelerate broader market adoption of open source applications.

National security information sharing. Subsequent to the events of September 11, 2001, there has been heightened attention given to improving data interoperability to facilitate better information sharing between law enforcement, intelligence, immigration, and foreign service agencies, to better

4. *See* Perform Act of 2007, S. 256, 110th Cong. (2007); Digital Transition Content Security Act of 2005, H.R. 4596, 109th Cong. (2005); Communications Opportunity, Promotion, and Enhancement Act of 2006, H.R. 5252, 109th Cong. (2005).

5. *See infra* notes 149-151, 166-168 and accompanying text.

6. The term "broadcast flag" refers to a digital "marker" encoded into a digital television program that triggers compliance rules in a broadcast flag-compliant digital television receiving device (that which is designed to recognize and comply with the flag). These rules instruct the device as to how to treat the content, for instance, whether to allow copying or not. The term "broadcast flag" is often used to describe in the collective the marker, compliance rules, and a statutory or regulatory requirement that the technology be incorporated into receiving devices. *See* CTR. FOR DEMOCRACY & TECH., IMPLICATIONS OF THE BROADCAST FLAG: A PUBLIC INTEREST PRIMER (VERSION 2.0) (2003), *available at* http://www.cdt.org/copyright/20031216broadcastflag.pdf#search=%22cdt%20broadcast%20flag%22.

7. *See infra* notes 153-157 and accompanying text.

protect our borders and U.S. citizens. The USA PATRIOT Act[8] and its progeny addressed this and related issues.

Emergency communications interoperability. Also subsequent to the events of September 11th, there has been greater interest in improving radio and data communications interoperability for fire, law enforcement, and other "first responders." The USA PATRIOT Act and its progeny took steps to accomplish improvements, and several bills in Congress seek to provide spectrum and other resources to fully execute an interoperability strategy.[9]

Electronic medical records. Since the early 1990s, research has shown that conversion from paper to interoperable electronic health care records and prescription systems, would save thousands of lives and billions of dollars annually. Recently, the government has given significant attention to this problem. Numerous bills have been introduced in Congress and the President has made this a priority.[10]

Law enforcement interception of electronic communications. With voice-over-internet-protocol (VoIP) gaining popularity, early in the development of VoIP, the FBI sought legislation to require VoIP service providers to comply

with Communications Assistance for Law Enforcement Act (CALEA)[11] requirements to make the providers' facilities accessible to law enforcement for the interception of VoIP communications. The FCC ultimately published a rulemaking describing the requirements.[12]

III. SUBSTANTIAL BASIS FOR GOVERNMENT RELUCTANCE IN MANDATING INFORMATION TECHNOLOGY STANDARDS

There are several premises upon which I base my conclusion that government should be reluctant to mandate an information technology standard. The first is that the information technology industries are generally sophisticated and well structured to develop standards. The second is that U.S. law and public policy guides government, particularly the U.S. federal government, to a preference for market-developed standards. Third, trade agreements may preclude government from setting technology standards that may impact international trade. The fourth factor is the high risk of government failure, or "non-market failure." Upon this substantial basis for government reluctance, I base the analytic process described herein.

A. THE RELEVANT INDUSTRIES ARE WELL STRUCTURED TO DEVELOP STANDARDS

One of the first set of factors for the government in analyzing an apparent market failure is to consider how sophisticated the market participants are and how well-developed the market is. In the context of standards development, the questions to consider might include: is the industry mature; are the participants sophisticated in their ability to develop standards; are there well-developed institutional structures to facilitate standards development. The industries this article describes as the information technology sector include the computing and software industries, the entertainment industry, and consumer electronics industry, and, in some instances, telecommunications and broadcast industries. Each of these industries has a long and successful history of standards setting. In relation to each industry and the broad convergence of these industries, there are many now well-trodden paths the market can take to establish an information technology standard. Indeed, these are sophisticated participants in mature industries, experienced in developing standards. As evidence of this, there are a number of approaches and institutions, well-established and newly-

11. 47 U.S.C. §§ 1001-10 (1994).

12. *In re* Communications Assistance for Law Enforcement Act & Broadband Access & Services, 20 F.C.C.R. 14,989 (Sept. 23, 2005); *In re* Communications Assistance for Law Enforcement Act & Broadband Access & Services, 19 F.C.C.R. 15,676 (Aug. 9, 2004). Congress and the FCC recently imposed CALEA requirements on VoIP providers. *See* Communications Assistance for Law Enforcement Act, 47 U.S.C. § 1001-10 (1994); *In re* Communications Assistance for Law Enforcement Act & Broadband Access & Services, 21 F.C.C.R. 5360 (May 12, 2006).

evolving, in which these industries develop standards. Further, there are many and varied types of standards used by these industries.

1. MANY AVENUES AND FORUMS EXIST FOR INFORMATION TECHNOLOGY STANDARDS DEVELOPMENT

There are numerous forums for the development of information technology standards. The traditional courses for standards development are voluntary consensus forums including formal standards development organizations such as Institute of Electrical and Electronics Engineers (IEEE), International Electrotechnical Commission (IEC), International Telecommunications Union (ITU), industry or sector-specific standards-setting organizations (e.g., InterNational Committee for Information Technology Standards (INCITS), Internet Engineering Task Force (IETF), Telecommunications Industry Association (TIA), Organization for the Advancement of Structured Information Standards (OASIS), European Computer Manufacturers Association (ECMA), Association of Computing Machinery (ACM), Audio Engineering Society (AES), and Society of Motion Picture and Television Engineers (SMPTE)), and trade associations (e.g., Consumer Electronics Association (CEA) and the National Association of Broadcasters (NAB)). These forums have produced an endless list of standards, including: IEEE 802.11 (popularly known as Wi-Fi, a wireless digital interconnect); IEEE 1394 (also known as Sony iLink or Apple Firewire high bandwidth digital interconnect), and TCP/IP Internet communications protocol (IETF). These standards development organizations are exceedingly credible and common to all industries that rely on standards. At the most formal end of standards setting are standards development organizations accredited by ANSI, the American National Standards Institute. ANSI is the only accredited U.S. entity that is a member of the International Standards Organization and the International Electrotechnical Commission (IEC). A standard set by an ANSI-accredited standards development organization may be approved by ANSI as an American National Standard. Several of the formal standards development organizations listed above are ANSI accredited.

There is also a robust ecosystem for informal standards development. A now common approach to standards setting is where the relevant industries or businesses develop and support a standard by mutual agreement through a consortium. Consortia are organizations formed by companies interested in developing a standard to serve their mutual interests. Typically, because these organizations are formed to meet the specific standards needs of the interested companies, the process can be more efficient.[13] Consortia come in many

13. In fact, although it may, to the uninitiated, appear that fewer participants with a greater commonality in interest would result in a less contentious process, participants often have as many competing interests as those in common, so often consortia can be as rigorous a process as formal standards development organizations.

flavors, from very informal to very formal, having very similar processes and characteristics as a traditional standards development organization. Consortia-developed standards examples abound including video standards such as VGA and SXGA analog computer display standards (VESA); digital transmission standards such as digital subscriber line, or DSL (DSL Forum); Internet-related developer standards such as HTML (W3C), XML (W3C and OASIS), SOAP (W3C) and Synchronized Multimedia Integration Language (SMIL, W3C); OpenCable Application Platform (or OCAP, a set of standards that will facilitate interactive video interoperability, i.e., a unified developers platform for set-top boxes, consumer electronics devices, game devices, digital video recorders, portable devices, PCs, etc.),[14] the Advanced Access Content System

---

14. OpenCable is the result of the work of FCC authorized consortium, CableLabs. OCAP uses some patented software that are licensed to users of the standard. Numerous diverse companies have agreed to license OCAP from CableLabs. *See* Press Release, CableLabs, Twenty-eight Firms Demonstrate Interoperability on OCAP and eTV Platforms at CableLabs Event (Aug. 17, 2005), *available at* http://www.cablelabs.com/news/pr/2005/05_pr_ocap_interop_081705.html. *See, e.g.*, Press Release, CableLabs, Funai Licenses CableLabs® Technology for Interactive Digital Cable Products (Oct. 17, 2006), *available at* http://www.cablelabs.com/news/pr/2006/06_pr_funai_chila_101706.html. In addition, see generally OpenCable press releases describing several major licensing agreements at http://www.opencable.com/news/archive.html. There have been concerns over the specifics of OpenCable standards and the credibility of the organization developing the standards, CableLabs. The FCC designated the standard development authority to CableLabs, an organization created by cable companies. Initially, CableLabs worked with consumer electronics companies and excluded participation by the computer and software industries. There was (and continues to be) consternation that CableLabs was developing standards that implicated industries other than cable and consumer electronics without allowing for the input from these other industries. In 2003, the FCC agreed with the commenters that raised these concerns and issued an order requiring CableLabs to consider the input of these sectors. *See In re* Implementation of Section 304 of the Telecommunications Act of 1996, 18 F.C.C.R. 20,885, 20,919 ¶ 78 (Oct. 9, 2003). The FCC further established an interim rule creating a route for companies to appeal CableLabs decisions, placing the burden on CableLabs to prove their objectivity in denying the recommendations by these participants. The order stated:

> Any interested party, including but not limited to consumer electronics manufacturers, content providers, information technology companies or consumers, may appeal an initial decision by CableLabs to the Commission. CableLabs shall bear the burden of proof that its initial determination, whether an approval or disapproval, was justified. In any responsive pleading to an appeal before the Commission, CableLabs will specify each of the objective criteria used to evaluate the proposed output and copy protection technology and articulate in detail how such proposed output and copy protection technology met or failed to meet each of the criteria. Should CableLabs disapprove a particular output or content protection technology, we expect that CableLabs will articulate in detail the reasons for its disapproval. The Commission will review *de novo* both the reasonableness and necessity of the objective criteria, as well as CableLab's application thereof to the proposal under consideration. We clarify that parties seeking Commission review may file a petition for special relief pursuant to our normal procedures under Section 76.7 of the Commission's rules. The Commission will address such petitions on an expedited basis.

Licensing Administrator (AACS LA) digital rights management for high-definition videodisk standards (adopted into both HD-DVD and BluRay standards), Universal Plug-N-Play developed by Microsoft and numerous third-party equipment manufacturers (UPnP Forum) ostensibly to simplify and automate an end-user's installation of hardware on a computer that uses the Windows operating system.

Although consortia can be less transparent or open in their processes than traditional standards development organization, they have their important place in the standards arena. As Oliver Smoot, then Chairman of the Board of ANSI, testified before Congress:

> The information technology industry does have a special challenge because it uses every kind of standardization process imaginable, ranging from the most informal meeting possible to the very formal processes that result in an American National Standard. However these challenges do not impair their ability to compete domestically or internationally. Now, even within the subset of standards development, and it is this very flexibility that makes them useful. . . . Because they meet real needs, consortia-developed standards are fully acceptable to, and widely used by, industry and the U.S. Government to procure and use advanced technologies and, in fact, to procure and use technologies of all kinds. . . .[15]

As Gerald Ritterbusch, the Director of Standards for Catapiller, observed at that same hearing:

> [T]he IT industry needs the right mix of standards that are developed in both the formal and those that can develop through the consortia process. The IT industry has a definite need for speediness in bringing standards to the market so they can be used. Consortia provide the speed while the formal standards system, through its openness and balance, takes a little longer, but I believe that there needs to be the right mix of using both the formal and the consortia and that needs to be chosen by the users of the standards and the players in the process. [16]

Some have expressed the concern that consortia are potentially at risk of capture by the largest of industry players. Standards expert and Director of

Subcomm. on Environment, Technology & Standards*, 107th Cong. 23 (2001) (statement of Oliver Smoot, Chairman of Board, American National Standards Institute), *available at* http://commdocs.house.gov/committees/science/hsy73317.000/hsy73317_0f.htm [hereinafter Standards-Setting Hearing].

16. *Id.* at 26 (statement of Gerald H. Ritterbusch, Director of Standards, Catapiller, Inc.).

Standards for Sun Microsystem, Carl Cargill, in testifying before Congress, observed, "Very rarely do you get a captive consortia that is trying to prejudice the market in its own favor. Normally, consortia benefit the entire market. That is one of the requirements."[17] In regard to mitigating the risk of antitrust issues in the context of standards setting, as the FTC's David Balto observed, "where the standard setting process is dominated by users or other vertically related firms, rather than rival producers, competitive injury is unlikely. The involvement of buyers in the design of standards may reduce competitive concerns."[18]

One mechanism that is used to address complex patent licensing issues surrounding standards in an efficient manner is the "patent pool." A "patent pool" is the sharing, or pooling, of patent ownership interests to benefit the market at large. There is a long history of the use of "patent pools" in connection with the development of standards, or the adoption of a proprietary technology into a standard; the broadcasting, consumer electronics and information technology industries have long been part of that history. Often it is the pioneers in an industry or technical achievement that take this approach. An early example in the information technology sphere was the Associated Radio Manufacturers, later renamed the Radio Corporation of America. Formed in 1924, the Associated Radio Manufacturers brought together the radio interests of American Marconi, American Telephone and Telegraph (AT&T), General Electric and Westinghouse, to develop standards for radio parts, spectrum management, and television transmission standards.[19] Fast forward to 1998, when Sony, Philips, and Pioneer developed the DVD-Video and DVD-ROM standard specifications, and 1999, when Hitachi, Matsushita, Time-Warner, Toshiba, and others pooled patents for DVD compliant products. Modern computing technology standards using patent pools include MPEG, MPEG-2 AAC audio codec, DVI, and USB. Even as recently as last year, RFID vendors formed a patent pool to resolve intellectual property rights ownership issues.[20] The U.S. Patent and Trademark Office has clearly stated its

support for patent pools, as has the Federal Trade Commission and the Department of Justice, providing guidelines for antitrust enforcement in regard to such collective rights management.[21]

It is important as a matter of background to understand that the federal government has endorsed consortia, informal multi-company standards development activities (including those that implicate "patent pools"), and even single-enterprise standards-setting activities as on the same footing as formal standards-setting organizations in meeting federal government requirements for "voluntary consensus standards." The National Technology Transfer and Advancement Act (NTTAA) sets out the mandate that federal government agencies use commercially developed "voluntary consensus standards" unless doing so would be against the law or otherwise impractical.[22] The revised Office of Management and Budget Circular A-119, which provides detailed guidance to federal agencies regarding this statutory mandate, is clear that standards developed by any private sector standards-setting enterprise would meet the meaning of voluntary consensus standards for the purposes of the requirements of Circular A-119.[23] The *Eighth Annual Report on Federal*

22. National Technology Transfer and Advancement Act of 1995, Pub. L. No. 104-113, § 12(d), 110 Stat. 775, 783 (1996) (codified at 15 U.S.C. § 272 (2006)).

23. The OMB emphasized that it is "not the intent of the Circular to create the basis for discrimination among standards developed in the private sector, whether consensus-based or, alternatively, industry-based or company-based." OFFICE OF MGMT. & BUDGET, EXECUTIVE OFFICE OF THE PRESIDENT, OMB CIRCULAR A-119, FEDERAL PARTICIPATION IN

Agency Use of Voluntary Consensus Standards and Conformity Assessment, issued in May 2005 by NIST, reinforced this reading of the law:

> In reporting the full measure of their efforts at minimizing reliance on government-unique standards, Federal agencies have historically reported the use of private sector standards including other than voluntary consensus standards. The OMB Circular classifies these other private sector standards as non-consensus standards, industry standards, company standards, or de facto standards. The Circular also states that it does not establish a preference among standards developed in the private sector. Consequently, the information contained in this report, as received from the agencies, includes the use of standards by, and participation in standards development activities of, both consensus and non-consensus standards developing organizations.[24]

It is clear, too, that formal standards bodies such as ANSI and ISO acknowledge the importance of the use of the full range of standards-setting forums including those that incorporate proprietary technologies, as well.[25]

The final avenue for the development of a standard is where a technology is so widely adopted by consumers or users that it becomes a de facto standard. Examples of de facto information technology standards include the mini-DV videocassette format, Adobe PDF file format, Apple iTunes's AAC audio file format, Microsoft Windows Media Player WMP file format, Hewlett-Packard's Printer Control Language (PCL), and Sun Microsystem's JAVA programming language, among numerous others.

THE DEVELOPMENT AND USE OF VOLUNTARY CONSENSUS STANDARDS AND IN CONFORMITY ASSESSMENT ACTIVITIES (1998) (revised to conform to NTTAA standards) [hereinafter OMB Circular A-119].

24. KEVIN L. MCINTYRE & MICHAEL B. MOORE, NAT'L INST. OF STANDARDS AND TECH., EIGHTH ANNUAL REPORT ON FEDERAL AGENCY USE OF VOLUNTARY CONSENSUS STANDARDS AND CONFORMITY ASSESSMENT 2 (2005), *available at* http://www.whitehouse.gov/omb/inforeg/reports/8th_annual_nist_rpt_2004.pdf [hereinafter NIST Annual Report].

25. While ANSI generally espouses the consensus model of standards development, it has no objections to the use of proprietary technologies within standards that have undergone canvassing. *See* AM. NAT'L STANDARDS INST., ANSI ESSENTIAL REQUIREMENTS: DUE PROCESS REQUIREMENTS FOR AMERICAN NATIONAL STANDARDS 9 § 3.1 (2006), *available at* http://publicaa.ansi.org/sites/apdl/Documents/Standards%20Activities/American%20National%20Standards/Procedures,%20Guides,%20and%20Forms/ER0106.doc ("There is no objection in principle to drafting a proposed American National Standard in terms that include the use of a patented item, if it is considered that technical reasons justify this approach."). Moreover, ANSI will accredit standards that have been developed initially on a proprietary basis. For example, the C programming language was developed by Bell Labs in the early 1970s, and was not officially standardized until the early 1980s by the ANSI X3J11 committee, which then issued today's standard: ANSI X3.159-1989. *See* Dennis Ritchie, *Development of the C Language, in* HISTORY OF PROGRAMMING LANGUAGES (Thomas J. Bergin, Jr. & Richard G. Gibson, Jr. eds., 2d ed. 1996), *available at* http://cm.bell-labs.com/cm/cs/who/dmr/chist.html. ISO has also approved Microsoft's C# and Common Language Interface (CLI). *See also* Press Release, ECMA Int'l, ISO/IEC Finishes Fast-Track Standardization of Ecma Standards for C# Programming Language And Common Language Infrastructure (Apr. 2, 2003), *available at* http://www.ecma-international.org/news/ECMA%20ISO%20CSharp%20Final.pdf.

There are also circumstances in which consumers or other users (i.e., industry members or segments) embrace multiple competing standards that then co-exist in the market. Some examples of widely adopted, yet competing standards include the various flavors of high speed communications standards such as IEEE 802.11 (a/b/g/n and so on), USB-2, IEEE 1394, and DVI; the competing digital video disc formats, DVD+ and DVD-; the competing EISA v. MCA, current multiple format standards for digital video (i.e., progressive, interlaced formats in various resolutions: 480p, 480i, 720p, 720i, 1080p, 1080i), and in earlier days, the Ethernet architecture as it competed with IBM's Token Ring. Notable cases where competition between standards resulted in consumer confusion and a delay in consumer interest in the overall commercial offering include the competition between Betamax and VHS, SuperAudio CD and DVD-Audio, and potentially Blu-ray and HD DVD.[26] On the upside, such market behavior results in user choice. Competing standards that survive in the market may each meet users' differing needs even at the expense of true interoperability. Similarly, if multiple standards develop and are each adopted by the market, the result may be standards-agnostic platforms (devices) or multi-standard platforms that are interoperable through conversion or gateway tools or otherwise (this is a less difficult matter, and therefore more common, in regard to software as compared to hardware). The downside is the potential for inefficiency or consumer confusion that could forestall widespread adoption.

Eventually, where there is a viable commercial market (the convergence of a mature technology or standard and the conditions where consumers are truly interested in having the products made possible by the standard), either the market formally adopts a standard or multiple standards (and those standards coexist), or a de facto choice evolves.

---

26. Note that slow market adoption could be the result of an absence of consumer interest in the product because the technology is not adequately mature and the market recognizes this fact. Some technologies that failed to become standards in the marketplace because the technology was immature include early WAP implementation from providers such as AT&T (Wireless Pocketnet) and Nextel, many consumer electronics technologies, such as RCA SelectaVision video disc and Philips/MCA VideoDisc, Phillips Interactive CD-I, and the competing and incompatible early matrix four-channel surround audio phonograph technologies offered by CBS and Sansui, confusingly named Quadraphonic and Quadrasonic, respectively. Regardless of the maturity of the technology, the failure to establish a standard may quite simply highlight another kind of failure: market research failure. There may be little consumer interest in having the standard, or even in having the particular type of technology. In other words, the public may not be interested in the overall commercial offering, let alone interested enough to choose between one technology and another to establish a standard. Examples of the market not being ready include the Phillips/Sony Compact Disc (it took ten years for the compact disc to supplant the Phillips audio cassette in the market); and the recordable Sony MiniDisc format.

2. WELL-DEVELOPED DIFFERING TYPES OF STANDARDS REFLECT A SOPHISTICATED STANDARDS-SETTING ENVIRONMENT

As evidence of the sophistication of the information technology standards-setting marketplace, there are numerous and highly differentiated types of market-developed standards that can achieve interoperability: open standards developed through formal standards-setting organizations; proprietary standards developed by informal standards bodies, consortia or by individual or groups of companies; de facto standards, i.e., a technology, usually proprietary, so widely adopted it effectively becomes a standard; or technologies which may have initially been a proprietary or a de facto standard yet are subsequently submitted to a formal standards-setting organization and become an open standard.

The two most prominent types of standards are "open standards" and "proprietary standards." There are many definitions for the term or concept of an "open standard." I will offer the following as a guideline for comparison. An open standard is a technical specification that has the following characteristics:

(a) It is developed, maintained, approved, or affirmed by rough consensus, in a voluntary private-sector (i.e., non-governmental) standards-setting organization that is transparent in its process and open to all interested and qualified participants;

(b) It is published (i.e., made available openly to the public) including specifications and supporting material providing sufficient detail to enable a complete understanding of the scope and purpose of the standard;

(c) The documentation of the standard is publicly available without cost or for a reasonable fee for adoption and implementation by any interested party; and

(d) Any patent rights necessary to implement the standard are made available by those developing the standard to all implementers on reasonable and non-discriminatory (RAND) terms (either with or without payment of a reasonable royalty or fee).[27]

---

27. This definition is very similar to and is drawn from the definitions of "open standards" adopted by leading standards development organizations and industry associations. *See* AM. NAT'L STANDARDS INST., CURRENT ATTEMPTS TO CHANGE ESTABLISHED DEFINITION OF "OPEN STANDARDS" (2005) *available at* http://public.ansi.org/ansionline/Documents/Standards%20Activities/Critical%20Issues%20 Papers/Open-Stds.pdf; BUS. SOFTWARE ALLIANCE, BSA STATEMENT ON TECHNOLOGY STANDARDS (2005), http://www.bsa.org/usa/policy/loader.cfm?url=/commonspot/security/getfile.cfm&pageid=2 2407&hitboxdone=yes; GLOBAL STANDARDS COLLABORATION (GSC-10) (2005), *available at* http://portal.etsi.org/docbox/workshop/gsc/gsc10archive/GSC10_Closing_Plenary/gsc10_clo sing_12%20Resolution%2004%20Open%20Standards.doc; TSB Dir.'s Ad Hoc Group on IPR, Int'l Telecomm. Union (ITU), Definition of "Open Standards" (2005), http://www.itu.int/ITU-T/othergroups/ipr-adhoc/openstandards.html;. I have also drawn from the definition provided in BERKMAN CTR. FOR INTERNET AND SOC'Y AT HARVARD LAW SCH., ROADMAP FOR OPEN ICT ECOSYSTEMS 6, *available at*

Well-known and widely implemented open standards include TCP/IP, HTML, HTTP, 802.11, MPEG, XML, SNMP, and SMTP.

"Proprietary standards" are technical specifications developed and maintained by a single entity or more typically by a private, small group of cooperating entities. Standards are by their nature intellectual property and, thus, are potentially subject to ownership protected by copyright or patent law. Since proprietary standards are created by a small group of private parties, often working ad hoc, they are typically not subject to the formalized rules of a traditional standards-setting organization; and thus, the owners of the underlying intellectual property may control implementation of such a standard more tightly through the licensing terms. The key reason proprietary standards are developed is that working in small groups without many of the procedural issues of an open standards-setting organization (particularly issues having to do with consensus among many and the openness of the process) is more efficient, and thus, interoperable products can be developed and brought to market more quickly.

The status of a proprietary standard may change over time. Commonly, proprietary standards are technologies developed by groups of companies working in consortia, less formal efforts with the use of "patent pools" or cross-licensing, or even by a single company, and emerge as de facto standards.[28] Some of these proprietary standards are subsequently submitted to formal standards-setting organizations to become de jure, or formal open standards. For example, it may be a good business decision for only a few companies to work together to develop a standard for their mutual benefit, since doing so can be done more quickly than in a formal setting. Eventually, more adopt the standard to achieve interoperability and the standard becomes a de facto standard. At this point, the standard may be submitted to a standards-setting organization, such as TIA, IEEE, ITU, or ISO, for formal adoption as an open standard (de jure standard) to encourage yet wider adoption. Examples include Bell Laboratories C Programming Language;[29] ANSI CAT-5 Cable (and other such cable specifications developed by the Telecommunications Industry Association, a trade association and ANSI-accredited standards developing organization) and hundreds of information technology standards (many designated as ISO or ANSI standards) developed by International Committee for Information Technology Standards (INCITS, an ANSI-accredited standards development organization supported by the Information Technology Industry Council (ITI), a trade association), Adobe's PDF format (various parts of which have been submitted to ISO for adoption as an open standard) and Microsoft's

http://cyber.law.harvard.edu/epolicy/roadmap.pdf.

28. I will discuss each of these various modes of developing proprietary standards in detail *infra* at Part III.A.1.

29. *See* CHRISTINE R. DEVAUX, U.S. DEP'T OF COMMERCE, A GUIDE TO DOCUMENTARY STANDARDS, NISTIR 6802, at 16-17 (2001), *available at* http://ts.nist.gov/Standards/Conformity/upload/ir6802.pdf.

open XML file formats (which have been submitted for adoption as an open standard).

Many, if not most, information technology standards, including open standards, have patented components that are owned or controlled by one or a few companies. Whether open standards or proprietary standards are involved, entities that develop standards and own the associated patents typically license the technology on RAND terms, either with or without a reasonable royalty, and therefore facilitate the wider adoption of the standard.[30]

---

30. Although there is ongoing debate as to how RAND royalties should be calculated and when those terms can be disclosed in the standards-setting process, the overwhelming consensus by leading international standards and industry organizations such as ANSI, ITU, BSA, and others is that RAND licensing strikes the proper balance between the interests of patent holders on the one hand and implementers of standards on the other. *See, e.g.*, AM. NAT'L STANDARDS INST., *supra* note 27. This perspective is held by a broad international coalition. For example, several of the world's leading standards organizations (including the European Telecommunications Standards Institute, International Telecommunication Union (United Nations-based), Association of Radio Industries and Businesses (Japan), Telecommunications Industry Association (United States), among others), acting as part of the "Global Standards Collaboration," recently resolved to: (1) "strongly support the adoption of effective intellectual property rights policies that are transparent, widely accepted and encourage broad-based participation and the contribution of valuable technical solutions by respecting intellectual property rights, including the right of the intellectual property holder to receive reasonable and adequate compensation for the shared use of its technology;" (2) "strongly support definitions of 'open standards' that reflect the following characteristics: such standards are (i) made available to the general public, (ii) developed (or approved) and maintained via a collaborative and consensus driven process, and (iii) subject to a RAND/FRAND intellectual property rights policy;" and (3) "strongly voice their opposition to policies that mandate compensation-free licensing provisions." GLOBAL STANDARDS COLLABORATION, GSC #10 MEETING: PARTNERS FOR COLLABORATION, *available at* http://www.gsc.etsi.org/GSC_10.htm (follow "GSC #10 Final Resolutions"; then open "Resolution 15, Intellectual Property Rights and Policies"). This was also reiterated in the new IPR and open standards resolution from GSC-11 in June, 2006. *See* GLOBAL STANDARDS COLLABORATION, RESOLUTION GSC-11/04: (JOINT) OPEN STANDARDS (2006), *available at*
http://webapp.etsi.org/meetingDocuments/ViewDocumentDetails.asp?DOCId=86936.

U.S. technology transfer laws exemplify the public interest in commercializing intellectual property in a competitive marketplace, producing innovation protected by intellectual property laws. *See* Stevenson-Wydler Technology Innovation Act of 1980, Pub. L. No. 96-480, 94 Stat. 2311 (codified at 15 U.S.C. §§ 3701-3714); Small Business Innovation Development Act of 1982, Pub. L. No. 97-219, 96 Stat. 217 (codified at 15 U.S.C. §§ 631-638); National Cooperative Research Act of 1984, Pub. L. No. 98-462, 98 Stat. 1815 (codified at 15 U.S.C. §§ 4301-4306); Federal Technology Transfer Act of 1986, Pub. L. No. 99-502, 100 Stat. 1785 (codified at 15 U.S.C. §§ 3710a-3710d); Malcolm Baldrige National Quality Improvement Act of 1987, Pub. L. No. 100-107, 101 Stat. 724 (codified at 15 U.S.C. § 3711a); Bayh-Dole Act of 1980, Pub. L. No. 96-517, 94 Stat. 3015 (codified at 35 U.S.C. §§ 202-211); Exec. Order No. 12,591, 52 Fed. Reg. 13,414 (Apr. 10, 1987).

As a general proposition, the adoption of intellectual property into a standard should not diminish the value of intellectual property. In a copyright context, the Supreme Court noted that "[i]t is fundamentally at odds with the scheme of copyright to accord lesser rights in those works that are of greatest importance to the public. Such a notion ignores the major premise of copyright and injures author and public alike." Harper & Row Pub., Inc. v.

3. EACH RELEVANT INDUSTRY HAS A LONG AND WELL-DEVELOPED HISTORY OF STANDARDS SETTING

Each industry converging in the information technology environment has unto itself a long history of success relying on these many avenues for standards setting in the commercial marketplace. That success continues to this day. Although not without substantial discord, the early radio and television industry standards were developed by only a few competing companies under the auspices (and occasionally mediation) of the FCC, its predecessor, the Federal Radio Commission (and in the case of television standards, the National Television Systems Committee (NTSC)), and these were subsequently adopted as government-mandated standards (e.g., NTSC-adopted 525 line/30 frames per second monochrome broadcast standards and the RCA-developed electronic color standards selected by the NTSC and the FCC over Columbia's color-wheel).[31] More recently, digital television standards have been developed in the marketplace and ratified by the FCC.[32] The movie and music industries share similar histories (and really, the same companies have long been involved in both industries), but entertainment standards have generally been market-driven de facto standards. Take, for instance the Edison cylinder which competed with the Berliner phonograph disk, Columbia's patented 33-1/3 R.P.M. LP that co-existed in the market with the RCA's 45 R.P.M. disk and the many film format standards (and now digital cinema standards) that have facilitated international film distribution over the years.[33] The consumer electronics industry shares much history with the entertainment industry, but is also often subject to government mandates (T.V. and radio standards, again typically standards developed by the consumer electronics and broadcast industries and then ratified and mandated by the FCC for enforcement purposes). But consumer electronics standards have also been substantially

---

Nation Enter., 471 U.S. 539, 558 (1985). The Court's conclusion is equally applicable to standards and patents.

All of this is not to say that a creator of a standard cannot make a standard available for free under extremely flexible terms. In fact, even single-company created standards are often made available for free and with few restrictions. Doing so often is ultimately valuable in expanding the adoption of the standard.

31. *See* DONALD FINK, THE FORCES AT WORK BEHIND THE NTSC STANDARDS (1981), *available at* http://www.ntsc-tv.com/ntsc-main-01.htm; EDWIN HOWARD REITAN JR., THE FOLLOWING PROGRAM IS BROUGHT TO YOU IN LIVING COLOR (1997), *available at* http://novia.net/~ereitan/NTSC_overview.html.

32. *In re* Advanced Television Systems and Their Impact Upon the Existing Television Broadcast Service, 11 F.C.C.R. 17,771 (Dec. 27, 1996).

33. The list goes on with obvious examples including Philips's compact cassette versus the Lear 8-Track, the compact disc which eventually eviscerated the compact cassette market, Dolby's patented noise reduction (which competed, yet briefly coexisted, with DBX in analog audio devices), multi-channel audio formats (currently Dolby standards coexisting with DTS), Panasonic and Sony's MiniDV video media format, the Toshiba/Warner (and others) DVD and of course, HD DVD and Blu-ray.

driven by consumer behavior.[34] And, of course, the computer industry utilizes patent pools and cross-licensing and the full range of forums, those being informal groups, consortia, and formal standards-development organizations to an extent similar to that of the broadcast and consumer electronics industries. Computer standards include the twisted nematic liquid crystal display (invented by James Fergason, which lead to the LCD of modern computer and television monitors), the Kensington security socket (the mechanical connector used to physically secure a computer to a desk by a cable), the ISO-adopted Moving Picture Experts Group (MPEG) digital audio and video compression specifications including MPEG-2, MPEG-4, Thompson's MPEG-1, Layer III (AKA MP3), Apple's IEEE 1394 digital communication specification, the joint ITU-ISO/IEC specification AVC/H.264 video codec (a mandatory specification of both Blu-ray and HD DVD), Small Computer System Interface (SCSI), Universal Serial Bus (USB and USB2), AT Attachment (ATA), a digital transport standard, accelerated graphics port (AGP), Peripheral Component Interconnect bus (PCI) and an alphabet soup of other standards.

As the NIST Acting Director testified before Congress in 2005, there are over 450 U.S. standards-setting organizations and an additional 150 consortia standards-development activities ongoing. Approximately twenty standards-setting organizations develop about eighty percent of the standards in the United States. Although the U.S. standards system is highly decentralized and naturally partitioned into industrial sectors, ANSI alone is composed of more than 700 companies, 30 government agencies, 20 other institutions and 260 professional, technical, trade, labor, and commercial organizations. There are more than 13,000 private sector standards in use by the federal government. "Our decentralized, private sector, demand-driven U.S. standards system has many strengths. U.S. companies derive significant advantage from the system's flexibility and responsiveness. The government also derives great benefit from the system, both as a customer and user of standards."[35]

As is the case with most human endeavors, there is no assurance of success. Indeed, some standards are not successful even if they are adopted by formal means. Furthermore, standards setting through any one of the numerous means available does not assure the greatest efficiency in standards development, although given the several paths standardization, efficiencies are more likely than where there may be limited fora to develop a standard.

Given the facts I have described, it is well established, through the long history and up-to-date practices of formal and informal standards-setting

---

34. Consider again, LPs, cassettes, and CDs, but also such devices as the RCA/phono connector and the Sony-Phillips-developed Digital Optical connector.

35. *China, Europe, and the use of standards as trade barriers: How should the U.S. respond?: Hearing Before the H. Comm. on Science & H. Subcomm. on Environment, Technology and Standards*, 109th Cong. (2005) (statement of Hratch G. Semerjian, Acting Director, National Institute of Standards and Technology), *available at* http://www.nist.gov/testimony/2005/hs_house_science_ets_intl_stds_5-11.html [hereinafter Semerjian Testimony].

organizations, the vibrancy of ad hoc standards setting or adoption through consortia and the use of "patent pools," and marketplace adoption of both open standards and proprietary standards, that the information technology industries are well suited to develop standards in the marketplace.

B. U.S. FEDERAL LAW AND POLICY PREFERS THAT STANDARDS BE DEVELOPED IN THE MARKETPLACE

It almost goes without saying that as a general matter, because the United States is a market-oriented economy (i.e., a free market, or "bazaar" where goods are freely exchanged for value with little government involvement), the government is restrained in interfering with the operation of the market. As Alan Greenspan recently observed in discussing the importance of Adam Smith and his theory of a market freedom to modern economic growth in the United States:

> By the 1980s, the success of that strategy in the United States confirmed the earlier views that a loosening of regulatory restraint on business would improve the flexibility of our economies . . . . Enhanced flexibility has the advantage of enabling market economies to adjust automatically and not having to rest on policymakers' initiatives, which often come too late or are misguided. Such views . . . clearly have been paramount in a renewed twenty-first century appreciation of Adam Smith's contributions.[36]

In the context of standards setting, there is a substantial early history of the government as the exclusive or predominant standards-setting entity, rooted in its British heritage dating back many hundreds of years.[37] However, over the course of the last two centuries, U.S. government policy has reflected an appreciation that industry is typically the most efficient and informed, as well as the most capable of developing standards. And as our system has evolved, the U.S. federal government policy has come to reflect a strong preference for developing standards in the private sector with a concomitant aversion to government-unique standards.

1. U.S. DOMESTIC LAW AND POLICY

In December of 2005, ANSI published *The United States Standards Strategy* (USSS). The Strategy is approved by the Board of Directors of ANSI and is endorsed by the U.S. Department of Commerce.[38] As the introduction to

38. U.S. DEP'T OF COMMERCE, STANDARDS AND COMPETITIVENESS—COORDINATING FOR RESULTS: REMOVING STANDARDS-RELATED TRADE BARRIERS THROUGH EFFECTIVE

the USSS states,

> Voluntary consensus standards are at the foundation of the U.S. economy . . . . The United States is a market-driven, highly diversified society, and its standards system encompasses and reflects this framework . . . . [A] standards system is strengthened whenever standards developers share a common vision for meeting stakeholders needs . . . . Standards are essential to a sound national economy and to the facilitation of global commerce.[39]

Congress has expressed statutorily a strong preference for private sector-developed standards and restraint in government mandating standards. In enacting the National Technology Transfer and Advancement Act of 1995 (NTTAA), Congress formally adopted into law what had since 1980 been the policy of the Executive Branch and embodied in guidance to federal agencies issued by the Office of Management and Budget Circular A-119.[40] With the NTTAA, Congress required federal agencies to abide by a preference for voluntary standards over government-specific standards. The preference for market-developed standards is evident in the report language that accompanied the NTTAA. To assure absolute clarity, the House Committee Report stated: "It is . . . the intent of the Committee to make private sector-developed consensus standards the rule, rather than the exception."[41] As I have described in detail above, the 1998 revision of OMB Circular A-119 emphasized that it had "not been the intent of the Circular to create the basis for discrimination among standards developed in the private sector, whether consensus-based or, alternatively, industry-based or company-based."[42] Thus, it is clear that the federal government preference is not only to rely on private sector-developed standards, but those standards developed in the full range of private sector forums.[43]

The results of the enactment of the NTTAA are noteworthy. During fiscal year 2004, federal agencies reported using 4559 private sector standards developed by the private sector.[44] In contrast, during the same year, they reported using only seventy-one government-unique standards.[45] The impact of

45. *Id.*

the NTTAA can be observed in regard to many key federal agencies that rely on standards. The FCC has also articulated a preference that standards be developed in the marketplace rather than by governmental fiat.[46] The Communications Act of 1934 requires that the FCC regularly review all of its regulations to determine whether they are still necessary, given the current state of competition.[47] These Biennial Reviews of Regulations have reflected a deregulatory approach. For example, in 2000, the Commission eliminated some 130 pages of technical specifications in the FCC rules for telephone terminal equipment. Instead, the FCC articulated the principles it sought to serve and left standards development to the private sector.[48]

An example of the FCC's approach to market-developed information technology standards can be found in their management of the development of the standards to facilitate interoperability among digital cable devices:

> [W]e have emphasized our reliance on market forces to bring innovation, choice and better prices to consumers. It is the work of private entities and the economic incentives motivating the participants in the OpenCable process that provide the most immediate opportunity for a degree of standardization that will both create scale economies reducing the cost of equipment and developing interfaces allowing the equipment to be readily sold through retail outlets.[49]

---

46. *In re* Year 2000, 19 F.C.C.R. 3239, 3259 ¶ 48 (Feb. 12, 2004) ("We prefer, as a general policy, to allow market forces to determine technical standards wherever possible, and to avoid mandating detailed hardware design requirements for telecommunications equipment, except where doing so is necessary to achieve a specific public interest goal.").

47. 47 U.S.C. § 161(a) (2007).

48. *See In re* 2000 Biennial Regulatory Review of Part 68 of Comm'n's Rules and Regulations, 15 F.C.C.R. 24,944, 24,946 (Dec. 21, 2000). The Commission stated,

> In the *Notice*, we tentatively concluded that the public interest would be better served if private industry, rather than the Commission, developed the technical criteria that are necessary to protect the public switched telephone network from harms. We therefore proposed in the *Notice* to use one of several potential industry standards-setting processes. To ensure that the public interest is adequately protected, we proposed to provide for *de novo* Commission review and enforcement, where necessary, of the industry-established technical criteria in the event of an appeal regarding the criteria. We noted our expectation, however, that such Commission involvement would be extremely limited.

Id. at 24,950 ¶ 18 (footnotes omitted).

The Order concluded that the FCC would rely on market-developed standards, stating

> industry rather than Commission development of technical criteria will decrease development time and allow manufacturers to bring innovative consumer products, especially for the provision of advanced services, to the market on an expedited basis. This expedited process should benefit consumers by lowering the costs of terminal equipment and by ensuring that new technologies are widely available.

Id. at 24,952 ¶ 21. *See also* 47 U.S.C. § 161 (2002).

49. *In re* Implementation of Section 304 of the Telecommunications Act of 1996, 13 F.C.C.R. 14,775, 14,821 ¶ 117 (June 24, 1998). However, see also *supra* note 14 (discussing the successes and failures in the navigational devices standards-setting process).

Similarly, HDTV standards were developed in a consortium standards-setting process (humbly named the Grand Alliance) under the auspices of the standards-setting organization, the Advanced Television Systems Committee, and subsequently ratified by the FCC.[50]

Another example of the impact of the OMB Circular A-119 and the NTTAA can be found in examining the Department of Defense policies on standards. In 1994, Secretary of Defense William Perry issued a memorandum entitled "Specifications and Standards—A New Way of Doing Business" (often referred to as "MilSPEC Reform"). The memo set out as a priority for the Department of Defense the increase in use of commercial technologies and the use of performance standards and commercial specifications and standards in "in lieu of military specifications and standards, unless no practical alternative exists to meet the user's needs."[51] MilSPEC Reform evidences the importance the federal government placed on taking the government out of the technical specifications-setting role. In announcing the new policy, the Secretary stated: "'We're going to rely on performance standards . . . instead of relying on [MilSPECS] to tell our contractors how to build something. . . .'"[52] A Defense Department newsletter described remarks by Secretary Perry delivered at a conference in November of 1996: "acquisition reform encompasses more than just saving money—it also deals with the quality of the things we buy . . . actually speeding up access to rapidly evolving commercial technologies."[53]

52. THE STANDARDIZATION NEWSLETTER (Defense Standardization Program, Washington, D.C.), Oct. 1994, at 2 (quoting William Perry, Sec'y of Def., Remarks at Press Conference (June 29, 1994)), *available at* http://www.dsp.dla.mil/newsletters/archive/news9410.pdf.

53. *See* Trudie Williams, *Secretary of Defense Perry Recognized at Joint Industry Conference*, THE STANDARDIZATION NEWSLETTER (Defense Standardization Program, Washington, D.C.), Dec. 1996, at 3, *available at* https://www.dsp.dla.mil/newsletters/archive/news9612.pdf. The transition from MilSPEC/MilStandards reform was not without its challenges. A workshop report undertaken at the request of the Department of Defense by the National Materials Advisory Board in 2000 stated: "The key barrier to military use of commercial materials and process specification appears to be a lack of DoD participation in [standards-setting organizations], which poses a significant risk that specifications may not meet military needs." NAT'L ACAD. OF SCIENCES, THE IMPACT OF ACQUISITION REFORM ON DEPARTMENT OF DEFENSE SPECIFICATIONS AND STANDARDS FOR MATERIALS AND PROCESSES: REPORT OF THE WORKSHOP ON TECHNICAL STRATEGIES FOR ADOPTION OF COMMERCIAL MATERIALS AND PROCESSING STANDARDS IN DEFENSE PROCUREMENT 3 (2002). The Defense Department's response to the concern was an increase in resources dedicated to standards-setting organizations, strengthening their performance. *See* Gregory E. Saunders, *Director's Forum*,

Thus, the Department of Defense, with a long history of setting government-specific standards (highly regarded standards, at that) shifted policy dramatically to participation in the free market development of standards and, in fact, more frequent adoption of off-the-shelf solutions.

A third federal agency that long relied on government-specific standards is the National Aeronautics and Space Administration (NASA). As with the Department of Defense, NASA has shifted policy and in compliance with Circular A-119:

> approximately fifty-four percent of all standards utilized by NASA over the past four years were derived from the private sector. The balance are MilSPECS (25.84 percent), NASA unique (Center Developed - 10.31 percent, or NASA Preferred - 5.54 percent), or other government standards (4.39 percent) . . . . NASA's standards program has adopted (or is in the process of adopting) some 3,400 standards, only 60 of which were developed by NASA internally for agency-wide use (although there are other Center-unique standards in use as well).[54]

Even where public safety and law enforcement are concerned, the government does not commonly mandate standards. For example, pursuant to CALEA, the FBI is to have technical access to intercept telephone communications through what are commonly known as "wiretaps."[55] Compliance requires that carriers develop their networks to ensure that they can deliver specific types of information to law enforcement agencies. However, the FCC did not mandate a particular technology or methodology for compliance. Instead, the statute requires the FCC to designate a standard as a "safe harbor" for compliance,[56] which it did by endorsing standardized interception technologies, developed through a private-sector "voluntary

---

DEFENSE STANDARDIZATION PROGRAM J., Oct./Dec. 2003, at 1, *available at* http://www.dsp.dla.mil/newsletters/journal/DSPJ-10-03.pdf (stating

> [u]sing [non-government standards (NGSs)] is not a cheap alternative for DoD. To participate effectively in NGS development, our engineers and scientists must spend some of their valuable time writing standards for the committees, researching technical information, reviewing draft standards, and resolving issues among a wide array of users and manufacturers. They also must spend both time and travel dollars to attend meetings. And, once the document is completed, DoD has to buy it, and so do our suppliers and their suppliers. Oddly, travel dollars and purchase price are often identified as cost drivers, but the largest dollar investment is the burdened cost of our experts. The roughly $100-per-hour expert who spends 3 or 4 weeks per year—at his desk, in the air, or at committee meetings—working on standards represents an investment of $12,000 to $16,000, exclusive of travel costs.).

consensus process."[57] Telephone service carriers and manufacturers are presumptively in compliance when they implement those standards.

Harmonious with the intent of Congress, the USSS, published in 2005, is intended to guide American standards policies and U.S. trade relations as they implicate standards. The USSS sets as its cornerstone the process of sector-specific, market-driven, private sector led standards, not a top-down, one-size-fits-all approach as found in some other countries.[58] It is based on the proposition that the U.S. standards system is the most innovative

- . . . through alliances and processes provided by companies, associations, standards developing organizations, consortia, and collaborative projects.
- This market-driven, private sector-led approach to global standardization is substantially different from the top-down approach favored in many other countries. . . .
- [Stakeholders] continue to explore new modalities of standards development. Organizations such as consortia and Internet-based processes that enable worldwide participation of stakeholders are creating an innovative environment that is becoming increasingly important in the global marketplace.[59]

Regardless of the specific process used, formal standards should be developed according to globally accepted principles of transparency, openness (participation by all stakeholders), impartiality, consensus, coherence to avoid overlapping or conflicting standards, and due process so that all views are considered. The development process should also include assistance to stakeholders that may not have adequate technical expertise, particularly those in foreign countries, and should be performance-based.[60] "[T]he process should be [f]lexible, allowing the use of different methodologies to meet the needs of different sectors; [t]imely so administrative matters do not result in a failure to meet market expectations; and [b]alanced among all affected interests."[61] Governments should encourage flexible standards solutions and rely on standards from diverse sources, including consortia and forums.[62] According to the USSS, as a matter of its strategic vision, the standards community is committed to the notion that "[g]overnments rely on voluntary consensus standards as much as possible in regulation and procurement rather than creating additional regulatory requirements."[63] Thus, it is clear that the federal

57. *In re* Communications Assistance for Law Enforcement Act, 14 F.C.C.R. 16794, 16794 ¶ 1 (Aug. 31, 1999).

63. *Id.* at 7. As previously noted, OMB Circular A-119 describes the U.S. government position as not favoring voluntary consensus standards over industry-developed or even company-developed standards, but considering each on equal footing as the others. OMB Circular A-119, *supra* note 23.

government is generally opposed to government intervention into the standards marketplace and such an intervention would be contrary to both the spirit of the policy and, potentially, the law.

C. U. S.TRADE POLICY PLACES SUPPORT FOR MARKET-DEVELOPED STANDARDS AS FUNDAMENTAL TO ELIMINATING TECHNICAL BARRIERS TO TRADE

The USSS articulates clearly that from the U.S. government perspective, standards are at the core of U.S. trade policy. Then-Secretary of Commerce Donald L. Evans prefaced the USSS stating, "[t]he international language of commerce is standards . . . . Without standards, it would be difficult to imagine the tremendous volume and complexity of international trade."[64] A goal of foreign trade policy is to unify the approach governments take to develop standards, encouraging foreign governments to adopt the approach of using voluntary consensus-developed standards. Further, "the U.S. government should work with other WTO members to seek full implementation of the Technical Barriers to Trade (TBT) Agreement and annexes . . . [and to] identify and eliminate or minimize the effect of technical barriers to trade that result from technical standards and their application."[65] The USSS outlines

64. *See* USSS, *supra* note 39, at 3.

65. *Id.* at 12. *See also* Agreement on Technical Barriers to Trade, Multilateral Agreements on Trade in Goods, Apr. 15, 1994, Marrakesh Agreement Establishing the World Trade Organization, Annex 1A, Final Act Embodying the Results of the Uruguay Round of Multilateral Trade Negotiations, Apr. 15, 1994, 33 I.L.M. 1125, 1154 (1994), *available at* http://www.wto.org/english/docs_e/legal_e/17-tbt.pdf [hereinafter TBT Agreement]. The TBT Agreement encourages the use of international standards in order to minimize technical barriers to trade. Pursuant to the TBT Agreement, when a government prepares a technical regulation to achieve a certain policy objective, whether protection of human health, safety, or the environment, the negotiations shall not be more trade-restrictive than necessary to fulfill the legitimate objective. The TBT Agreement encourages governments to specify, whenever appropriate, product regulations in terms of performance rather than design or descriptive characteristics, as doing so will also help in avoiding unnecessary obstacles to international trade. *Id.* at art. 2.8. The obligation to avoid unnecessary obstacles to trade applies also to conformity assessment procedures. An unnecessary obstacle to trade could result from stricter or more time-consuming procedures than are necessary to assess that a product complies with the domestic laws and regulations of the importing country. *Id. at* arts. 5.2.3 and 5.2.6. The Agreement encourages Members to use existing international standards for their national regulations, or for parts of them, unless "their use would be ineffective or inappropriate" to fulfill a given policy objective. This may be the case, for example, "because of fundamental climatic and geographical factors or fundamental technological problems." *Id.* at art. 2.4. As explained previously, technical regulations in accordance with relevant international standards are rebuttably presumed "not to create an unnecessary obstacle to international trade." *Id.* at art. 2.5. Similar provisions apply to conformity assessment procedures: international guides or recommendations issued by international standardizing bodies, or the relevant parts of them, are to be used for national procedures for conformity assessment unless they are "inappropriate for the Members concerned for, inter alia, such reasons as national security requirements, prevention of deceptive practices, protection of human health or safety, animal or plant life

recommendations that will encourage the U.S. standards community to continue to fully engage the global standards community to recognize the strength of the public-private partnership of the U.S. standards system and embrace the sector-specific approach to standards development.[66]

As Dr. Hratch G. Semerjian, Acting Director of the National Institute of Standards and Technology testified before Congress in 2005, the Department of Commerce intends "to partner with U.S. industry and standards developers to more effectively promote the virtues of an open, transparent and impartial approach to standards development and implementation."[67] He continued, "[b]oth U.S. standards interests and policy objectives will be served when the governments of our most important export markets are convinced of the strengths of this approach versus alternatives that are less open and transparent, and more subjective."[68]

The clearly articulated U.S. government domestic policy preference for market-developed standards, and the success of this policy, is a critical argument in support of U.S. government opposition to the use of government-established standards by foreign governments. Correspondingly, government intervention in the U.S. market to establish or mandate a particular information technology standard undercuts the U.S. position in this context. An action by the U.S. government or a government in the United States to intervene in the market to mandate a standard would be perceived by foreign governments as, at a minimum, hypocritical to U.S. foreign policy, and more likely, support for similar behavior by the foreign government.

D. RISK OF "GOVERNMENT FAILURE" SHOULD GIVE GOVERNMENT CAUSE TO PAUSE

It is often observed that the market is more well-informed, efficient, flexible, and capable than government in developing information technology standards. In general, this observation leads to a concern that one major consequence of government intervention to address a market failure is the high risk of "non-market failure," also called "government failure." A non-market failure can be defined as the unintended and undesirable consequences of

---

or health, or protection of the environment; fundamental climatic or other geographical factors; fundamental technological or infrastructural problems." *Id.* at art. 5.4. Widespread participation in international standardizing bodies can ensure that international standards reflect country-specific production and trade interests. The TBT Agreement encourages Members to participate, within the limits of their resources, in the work of international bodies for the preparation of standards, *id.* at art. 2.6, and guides or recommendations for conformity assessment procedures, *id.* at art. 5.5.

66. *See* USSS, *supra* note 39, at 11-12 (providing an extensive outline of the recommendation).

67. Semerjian Testimony, *supra* note 35 (including comments supporting this position as stated by the U.S. representative to ISO and IEC).

68. *Id.*

government failure where it intervenes to address a market failure.[69] Economist Thomas Sowell observed, "Markets are indeed imperfect, as everything human is imperfect. But 'market failure' is not a magic phrase that automatically justifies government intervention, because the government can also fail—or can even make things worse."[70]

In setting information technology standards, the risk of getting it wrong is very high and the consequences may be very large because technology that has broad economic and social impact advances rapidly. Standards development in the area of information technology requires eloquence in incorporating flexibility into a standard to accommodate technical advances and changes in the marketplace. The market itself generally has the most sophisticated expertise in establishing standards (technical knowledge, institutional knowledge, standards-setting bodies, etc.) and the ability to revise standards as appropriate.

Federal Reserve Bank of Chicago senior economist Victor Stango observed:

> [Early literature examining the economics of standards reflects] that even in instances where the market would move too swiftly or slowly between standards, a policymaker will have difficulty improving upon the market. For instance, when there is uncertainty regarding the benefits that would accrue from adoption, or which standard will achieve adoption first, a policymaker can improve on the market outcome only if it possesses superior information. Moreover, little is known about the positive aspects of standard-setting. For example, a policymaker may resolve uncertainty more quickly than would be the case in a standards war but also might be more likely to choose the "wrong" standard.[71]

An example of a "government failure" in what was in part essentially a standards setting can be found in the U.S. government policy in regard to encryption. In the early 1990s, a public debate erupted with the creation of software called "Pretty Good Privacy," or PGP. PGP allowed a user to encrypt e-mail messages so that only the intended recipient could unlock the message with a pre-assigned key. This scheme (and the strength of the encryption) prevented law enforcement access to these encrypted e-mail messages. In 1993, the federal government proposed the "Clipper Chip." The Clipper Chip was a National Security Agency (NSA) developed encryption device that could be attached by a user to phone lines. The Clipper Chip encrypted communications using a system called "key escrow." Key escrow allowed the recipient to decrypt a message, but also placed into "escrow" a second key that could be

---

69. *See* Charles Wolf, Jr., *A Theory of Nonmarket Failure: Framework for Implementation and Analysis*, 22 J.L. & ECON. 107 (1979).

70. THOMAS SOWELL, BASIC ECONOMICS: A CITIZEN'S GUIDE TO THE ECONOMY 300 (rev. and expanded ed. 2004) (1930). Although I do not agree with Professor Sowell on many points, as to this, he is charmingly eloquent.

71. Victor Stango, *The Economics of Standards Wars*, 3 REV. OF NETWORK ECON. 1, 9-10 (2004) (citing S.J. Liebowitz and S.E. Margolis, *Path Dependence, Lock-In and History*, 11 J.L. ECON. & ORG. 205 (1995)).

used by law enforcement to access the message with proper authorization.[72] This "back door" to individuals' computers was viewed as an invasion of privacy and critics thought it was preposterous to expect criminals to use the technology by choice. At the same time the government proposed the Clipper Chip, it restricted the export of U.S.-made encryption products.[73]

Indeed, while at the time America was at the forefront of encryption technology, the industry predicted that were the government to limit American encryption to the Clipper Chip and preclude export of U.S. encryption products, industrious developers around the world would advance encryption technology and surpass the United States in this area. Commercial business would be lost to foreign competitors and the law enforcement advantages of the Clipper Chip would be lost at the same time. And this is exactly what happened. With export restrictions in place, and a long debate ongoing regarding the Clipper Chip, foreign software developers took substantial encryption market share from U.S. companies. Ultimately, the government succumbed to the critics, relented regarding the Clipper Chip, and eventually relaxed export controls on encryption products.[74] As Oliver Smoot, Director of the ANSI Board stated in a congressional hearing in 2001, "[o]ver the past decade, our government export policies squelched new encryption technologies, which in turn, gave rise to a robust encryption industry in other countries."[75] This view is now widely held; despite the best of intentions regarding the preservation of national security, the government attempt to mandate the Clipper Chip failed. The Clipper Chip and encryption export controls were intended to limit public access to encryption technology (without a government back door), thereby making it harder for criminals and terrorists to communicate using encryption. We know now that criminals often communicate in the open (for example, using cell phones), or if

---

72. In announcing the "Clipper Chip," the White House touted,

> [a] state-of-the-art microcircuit called the "Clipper Chip" has been developed by government engineers. The chip represents a new approach to encryption technology. It can be used in new, relatively inexpensive encryption devices that can be attached to an ordinary telephone. It scrambles telephone communications using an encryption algorithm that is more powerful than many in commercial use today.

Press Release, The White House, Statement by the Press Secretary (Apr. 16, 1993), *available at* http://www.cdt.org/crypto/admin/041693whpress.txt. The Clipper Chip used an NSA-developed 80-bit algorithm they named Skipjack. Upon announcement of the Clipper Chip, the government made available Skipjack to industry for review. Even as they were announcing the Clipper Chip, the government was preparing the successor, "Capstone," and "MYK-80" developed by Mykotronx. The government was essentially going into the business of developing commercial software.

they use encryption, they can get it off the shelf in any country. The proposed U.S. policy really did not solve the identified problem.

Justice Stephen Breyer, prior to his appointment to the U.S. Supreme Court, described "government failure" in his seminal book, *Regulation and its Reform.*[76] Breyer posited that regulatory failure occurs because of "mismatches," i.e., the failure "to correctly match the [regulatory] tool to the problem at hand."[77] Sidney Shapiro succinctly describes this situation: "A mismatch can occur because government can mis-diagnose the problem that it is attempting to solve and apply the wrong regulatory approach as a result, or even if a problem is correctly identified, government chooses a regulatory tool that is less effective and more expensive than other options."[78] The U.S. federal policy toward encryption in the 1990s represented such a mismatch.

Government failure is most likely to occur when a market is new. As the FCC observed, it is a perilous time to regulate "when consumer demands, business plans, and technologies remain unknown, unformed or incomplete."[79] In information technologies, rapid innovation is driven by industrial creativity, a healthy economy, commercial and government need, and enthusiastic consumer appetite. Standards are central to this innovation. Although the several industries that constitute the evolving information technology sector are established and sophisticated, in some regards the sector is relatively young in that we are seeing a paradigm-changing convergence of these industries, the confluence of which is in progress and advancing swiftly. It is counterintuitive to inject the government into such a highly dynamic environment.

Stanley M. Besen and Leland L. Johnson, two prominent experts on technological standards, have long argued that when industry is in a period of high innovation and volatility, the likelihood that a government standard will result in inefficient and/or artificial technological decisions is particularly

---

79. *In re* Implementation of Section 304 of the Telecommunications Act of 1996, 13 F.C.C.R. 14,775, 14,781 ¶ 15 (June 24, 1998). *See also In re* Telecommunications Relay Services and Speech-to-Speech Services for Individuals with Hearing and Speech Disabilities, 21 F.C.C.R. 5442 ¶ 51, 56 (May 9, 2006) (stating

> [i]n declining to mandate the provision of VRS [or any particular VRS standard protocol] in the *Improved TRS Order*, the Commission stated because VRS was in its early stages of technological development the Commission would "permit market forces, not the Commission, to determine the technology and equipment best suited for the provision of [VRS], and allow[] for the development of new and improved technology.").

However, the FCC is currently seeking comment on whether it should mandate specific Internet protocols that VRS providers must use to receive and place VRS calls. *In re* Telecommunications Relay Services and Speech-to-Speech Services for Individuals with Hearing and Speech Disabilities, 21 F.C.C.R. 5,442, ¶¶ 51-57 (May 9, 2006).

acute.[80] Thus, formal standard-setting in rapidly changing industries should always be avoided. When the technology "settles down," the advantages of standards will present themselves, resulting in de facto standards being established by the market or industry bodies. As Besen and Johnson conclude:

> [T]he government should refrain from attempting to mandate or evaluate standards when the technologies themselves are subject to rapid change. A major reason for the Commission's difficulty in establishing the first color television standard was the fact that competing technologies were undergoing rapid change even during the Commission's deliberations. It is only after the technologies have "settled down" that government action is most likely to be fruitful.[81]

This perspective is reflected in the FCC's thinking in regard to regulatory intervention in telecommunications standard-setting. For example, the Commission adopted this market-based approach in the licensing of Personal Communications Service (PCS) spectrum, concluding that the rapid technological change in PCS development demanded a flexible regulatory approach to technical standards:

> [M]ost parties recognize that PCS is at a nascent stage in its development and that imposition of a rigid technical framework at this time may stifle the introduction of important new technology. We agree, and find that the flexible approach toward PCS standards that we are adopting is the most appropriate approach.[82]

The FCC recognized that telecommunications is currently in a highly dynamic period, and, given the dynamic environment, it is both an opportune and a perilous time for government regulation, as the FCC described in regard to interoperability standards for video navigation devices:

> The markets involved [for navigational devices] are in the early stages of becoming competitive, and the participants in these markets are on the precipice of a change from analog to digital communications. Because of these changes, this is both a particularly opportune and a particularly perilous time for the adoption of regulations. . . . It is perilous because regulations have the potential to stifle growth, innovation, and technical developments at a time when consumer demands, business plans, and technologies remain unknown, unformed or incomplete.[83]

However, it may be that the FCC's role in developing navigational devices will serve as evidence of the perils of government intervention. The FCC is adopting the work of CableLabs, a consortium of cable service providers and equipment manufacturers, and others, to develop interoperability standards for navigational devices. "[C]ommercial interests, fueled by consumer demand,

will agree on specifications . . . ."[84] It is worth noting that even in the context of CableLabs, which was initiated by cable companies in a process blessed by the FCC, the FCC had to intervene to make possible greater participation by computer, software, and entertainment companies; yet in 2006, concerns remain.[85] It appears that the cable companies dominated the process early on to the exclusion of these other key market sectors. It is probably safe to characterize the FCC's selection of the cable industry to lead this effort as short-sighted and made with insufficient attention to the dynamics of the market environment. Arguably, the problems with the process the FCC established are rooted in the initial decision to give a single highly interested industry a dominant role in the standards-setting process.

The government is typically not as nimble, efficient, or informed as the private sector at developing and advancing technology standards. Indeed, government may behave more like a tourist than an experienced local would in the bazaar, failing to understand or even perceive the nuances of each potential transaction, or failing to distinguish a good deal from a bad one. It is not overstating the truth to say that even those within the industry are often surprised by market behavior. But faced with that surprise, a business or sector is more rapidly able to adapt and take advantage of the turn of events than is government.

By contrast, the process of creating or changing a government-mandated standard typically takes years to accomplish. If a government mandates a standard, it is difficult to replace dated technologies embodied in the standard. For example, it took the FCC over two years to amend its ISDN rules to accommodate new technology.[86] Of course, such time frames are inconsistent with the current rapid pace of innovation in the digital media distribution marketplace. The Commission acknowledged that by imposing a standard it "could reduce the incentive to conduct the research and development that leads to innovation."[87]

In a notable example of "government failure," in the early 1980s, Japan

In fact, this is precisely why very few innovations have been implemented in the NTSC transmission standard. *Id.* at 6248, ¶ 34. It is worth mentioning that these same problems could occur where the government codifies a market-developed standard for enforcement purposes and should stand as a warning that, when doing so, government should incorporate expeditious means for a government-blessed standard to be revised as technology evolves.

established a government-mandated analog HDTV standard.[88] At the time, the FCC had been considering the need to develop a high-definition standard. In fact, one early FCC requirement for the new standard was backwards compatibility to standard definition, a requirement later dropped.[89] But high-definition technology in the 1980s was immature, equipment was large, and it required a great deal of maintenance and consumed enormous amounts of power, and the U.S. industry and FCC recognized this fact. Ultimately, with advances in digital technology that would result in more efficient use of spectrum and a higher quality picture, the United States and other countries chose to pursue digital for their high definition television standards. Very simply put, the Japanese government's standard was premature and essentially failed before it was launched.

A more recent situation in which some have questioned whether government intervention in standards-setting is appropriate or instead the path to non-market failure is the case of France's parliament proposing legislation addressing standards in digital rights management (DRM). In March 2006, the French Assemblée Nationale passed legislation that required digital rights management interoperability to improve consumer choice in music and video entertainment devices.[90] The legislation's intent was to require vendors to make available to third parties adequate information about their technology so the third parties could provide interoperability. The bill required disclosure of all technical documentation and programming interfaces necessary to facilitate interoperability. For example, market leader Apple would have had to provide enough information to competitors so they could make their music and video files play on an iPod, or make devices that would play songs downloaded from iTunes. The bill also provided that the publication of the source code and technical documentation of an interoperating independent software is permissible.[91]

The point of the bill was to make iPods accessible to competitors and to allow competitors' players to play songs downloaded from iTunes. A major problem, critics observed, was in the approach. The legislation would have had the effect of opening to competitors the use of Apple's FairPlay DRM (the bill did not name any specific technology, so it would have applied to any system such as the Sony Walkman using Sony's proprietary ATRAC3 DRM, or any other proprietary DRM). But it appeared to critics that the bill undermined the functional protections of the subject DRM. As one observer noted when the bill

91. *Id.*

was under consideration, "the problem is that the type of information necessary to achieve interoperability is also precisely the information necessary to render DRM useless: the encryption algorithms, keys, content metadata, and so on."[92] The bill was lauded by some who claimed this a victory for consumers, but the information technology industry and the U.S. government were highly critical.

In May of 2006, the Sénat, the upper house of the French Parliament, declined to pass the same legislation, passing instead a bill that establishes a government tribunal to adjudicate DRM interoperability issues. Some observers saw this as a complete backtrack from the initial legislation and one noted "one wonders if the French parliament should not just leave well enough alone and remove all of the interoperability-related sections of the legislation."[93] Indeed, it is likely these two versions of the legislation reflect the push and pull of advocates for competing interests upon government officials, and not sophisticated public policy analysis by government experts.

As further evidence of the difficulties at the intersection of technology and law, and the potential for government failure, in August 2006, the French Conseil Constitutionnel vacated as unconstitutional provisions of the new law that permitted circumvention of DRM to accomplish interoperability, concluding that the definition of "interoperability" was too vague.[94]

The situation in France exemplifies why government should be reluctant to intervene in information technology standards-setting. At a minimum, the case supports the notion that such government intervention carries with it substantial risk of the government getting it wrong. Potentially in this case, the result of the government action could have been precisely contrary to the stated public policy goals. Setting aside the question of whether there is an adequate public interest objective in requiring government intervention, it is uncertain that government could have accomplished its stated goal of interoperability by statutorily requiring DRMs to be opened for competitors in the manner the French government undertook. Some have observed that in the long-term, giving competitors the keys to Apple's DRM could have strengthened Apple's position in the market, as other content services sell to the iPod market and neglect competitive technologies. Indeed, the proposed law was designed to foster competition, but one must wonder if the legislative solution was a mismatch to the problem of iTunes market dominance. Competitors in this case have certainly not given up on the market for music downloads. The success of iTunes and the iPod *should* encourage competitors to work harder to compete for a rapidly growing market.[95] This is a situation in which competitors should

95. Indeed, interoperability between entertainment technologies, including DRM interoperability, would be of benefit to consumers, particularly given the growing market

aggressively pursue greater and more successful competition, but it requires heightened creativity in technological innovation and consumer offerings, rather than government intervention. Time (and far greater analysis) will tell whether digital rights management interoperability is appropriate fodder for a legislative solution or whether the market will produce technological solutions. Regardless, the French experience illustrates the risk of legislating in the area of an information technology standard, i.e. the risk of non-market failure.

Given the dynamic conditions in the markets impacted by information technology standards, the balance of expertise favoring commercial developers over the government, the ability of industry to be more nimble in reacting to market conditions, and the open acknowledgement of these factors by government in the information technology standards-setting context, it is critical to recognize that as a general matter, the risk of and potential harm from government failure, as compared to a market failure, is substantial.

It is worth mentioning at this point that the market has also had its failures in standards-setting. Even a standard that becomes formalized by a standards developing organization may not meet with market success. I'm sure it has been said elsewhere that the roads of the information superhighway are littered with discarded standards. Businesses, like governments, often may try to anticipate the direction of the market and fail to do so. But when a company or industry fails with a particular standard, they can simply abandon it. When the government makes this type of mistake, it takes time to undo it through either legislative or regulatory action.

To summarize, governments should be reluctant to intervene in information technology standards because: (1) the relevant industries are sophisticated in regard to standards setting and have many well-developed types of standards and forums and avenues to develop standards; (2) the U.S. government has a strong preference for market-developed information technology standards and promotes this preference as a matter of both domestic law and policy and that of foreign trade; (3) international trade agreements limit the degree to which government can mandate standards; and (4) in contrast to the sophistication of the marketplace, government is rarely as informed or sophisticated in its understanding of the technology or market, or nimble enough to respond rapidly to market conditions. Therefore, the risk of government failure is significant, and indeed greatest where the market is young and dynamic, as is

---

and the number of different types of devices that now and in the future will play music and video. It would appear that the industry recognizes this and is working in at least two forums to develop just such interoperability standards. Coral, whose members include Hewlett-Packard, Sony Corporation, NBC Universal, Phillips, 20th Century Fox, LG Electronics and Matsushita Electric, is developing a standard using Intertrust technologies, and Microsoft, Time-Warner, and Thompson are working to establish what would be a competing standard. Apple is not participating in either effort. There are several other standards being developed as well, some for cross-platform interoperability, some exclusively for portable devices. *See* Bill Rosenblatt, *2005 Year in Review: DRM Standards*, DRM WATCH, Jan. 2, 2006, http://www.drmwatch.com/standards/article.php/3574511.

the case with regard to the current market affected by information technology standards. Based on these premises, a test to evaluate whether government should intervene in setting an information technology standard should be biased toward avoiding intervention.

IV. THE TEST (PART ONE): THREE TYPES OF CASES FOR ANALYSIS

To help understand government's role in setting standards, I will divide the universe of possible circumstances into three broad categories: clear cases for government intervention; cases in a large "gray area" where analysis will determine whether the government should intervene, and if so, in what manner; and finally, those circumstances in which it is generally inappropriate for the government to intervene.

A. CLEAR CASES FOR GOVERNMENT INTERVENTION

Cases in which there is a government responsibility to meet a *critical public interest objective*, and *the information technology standard is essential* for the government to meet that objective are clear cases for government intervention. These cases are clear, in that the government responsibility to the public interest is of paramount import and may only be met if the essential standard exists.[96]

First, there must be a *critical public interest objective* at stake, that is, the public interest in question must involve a critical issue in the area of national security, defense, public safety, health, or welfare. By "critical," I mean urgently affecting government's responsibilities such as protecting life, the safety of the public, national security or defense and is therefore of the absolutely highest priority for government action. For example, subsequent to the events of September 11, 2001, federal, state, and local governments

96. In some cases, however, a government requirement may be met by the market *before* a government mandated standard is in place. Such market response may foreclose the need for a government mandate or may simply require a government blessing or other limited government action. This is the case with radio interoperability for first-responders (i.e., local law enforcement and fire departments). Radio manufacturer Motorola was among those that developed the technology to facilitate interoperability between current generation radio systems and new technologies. It is only a question of the federal government allocating adequate spectrum and deployment of the necessary new equipment. *See The Spectrum Needs of Our Nation's First Responders: Hearing Before the Subcomm. on Telecommunications and the Internet of the H. Comm. on Energy and Commerce*, 108th Cong. 40-56 (2003) (statement of Gregory Q. Brown, Executive Vice President, Motorola, President & Chief Executive Officer, Commercial, Government, & Industrial Solutions Sector), *available at* http://republicans.energycommerce.house.gov/108/action/108-34.pdf; *In re* Development of Requirements for Meeting Public Safety Agency Communication Requirements Through the Year 2010, 14 F.C.C.R. 152 (Sept. 29, 1998); *In re* Development. of Requirements for Meeting Public Safety Agency Communication Requirements Through the Year 2010, 15 F.C.C.R. 16,899 (Aug. 2, 2000).

examined the circumstances and identified several issues related to standards that adversely affected preparation for and response to a terrorist attack. Among the problems cited even in the earliest examinations were failures in inter-agency communications.[97] It was determined that the government needed to improve radio interoperability to facilitate emergency inter-agency communications and data interoperability to improve information sharing between local, state, and federal law enforcement, intelligence, emergency preparedness, and response agencies. It was also clear after examination that there were inadequate standards in place in data systems used for immigration background checks. To address these issues, the USA PATRIOT Act and its progeny addressed several communications interoperability issues.[98] The law now requires that spectrum be made available for radio communications and that newly-interoperable radio systems be deployed.[99] It also requires that new standards be developed to facilitate inter-agency data exchange; standards that include biometrics and immigration document technologies to facilitate background checks on individuals entering the United States from foreign countries.[100] Some of these standards were to be developed under the auspices of NIST, coordinating the activities of other federal agencies.[101]

The second element of the test is that the technology standard is essential to the government's ability to meet its obligation to address the critical public interest objective. In each example I have described, the critical public interest objective can only be addressed through technical interoperability, and the technology standard itself is *essential* to ensuring such interoperability.[102]

101. USA PATRIOT Act of 2001 § 403(c).

102. It is notable that even in such highly critical circumstances, the federal government looks to marketplace solutions to meet the government's needs. For instance, in the case of the USA PATRIOT Act requirements, NIST worked with commercial vendors to identify the technologies best suited to the requirements and where appropriate, conformed final requirements to the available technologies. However, there are examples where government set out interoperability requirements to meet critical public interest objectives. One such example can be found in the reform of the public emergency warning system. In 1994, FEMA and the FCC replaced the Emergency Broadcast System with the Emergency Alert System (EAS). The EAS serves two purposes. First, it is to provide a means for the president to address all Americans in the time of an emergency; second, it is to allow state and local officials to issue warning messages of imminent or ongoing emergencies through broadcast stations in specific regions. National alerts are issued via the telephone system to thirty-four U.S. radio stations, which cover in theory approximately ninety percent of the country and its territories. The EAS message is subsequently relayed by television, cable,

But let me emphasize the point that, given the statutory requirement that the federal government give preference to market-developed standards unless doing so would violate law or would be "otherwise impractical,"[103] and the other previously described national and international legal and practical arguments favoring market-developed standards over government-mandated standards, it is incumbent on government to work with the private sector to develop the appropriate standards to meet government needs. And indeed, this is what government almost invariably does. Even in circumstances where there is heightened urgency to meet the public interest needs, possibly even a critical public interest objective (such as meeting critical needs of the Department of Defense or law enforcement), government typically looks to industry to develop standards to satisfy the government requirements. Therefore, it is likely appropriate to apply the test herein described to apply to "gray area cases" even in the situation of a critical public interest objective, and apply it with constant awareness of the aforementioned practical constraints and legal preferences.

B. THE "GRAY AREA" CASES

In the "gray area" are cases where *the information technology standard is relevant to an important public interest objective.* I define "relevant" for the purpose of this examination to mean having an objectively reasonable connection to the important public interest objective. Although this is seemingly a broad category, this is only a threshold criterion that should trigger an analysis to determine whether government intervention of any nature is appropriate. Once this criterion is met, the analysis would guide a

---

and satellite television broadcasters to their audiences. EAS equipment sends and receives messages using a standardized format referred to as the EAS digital protocol, which was developed by the government in coordination with manufacturers. EAS equipment implements manufacturer developed standards for reception and transmission of the EAS digital protocol, and must be certified by the FCC. *See* EAS Protocol, 47 C.F.R. § 11.31 (2007); *In re* Review of the Emergency Alert System, 20 F.C.C.R. 18,625 (Nov. 10, 2005); *see generally* Emergency Alert System , 47 C.F.R. § 11 (2006).

Another example can be found in the 9-1-1 emergency call system. The goal of the 9-1-1 system is to be accessible to all individuals in the United States with a telephone. The notion is that one can dial 9-1-1 to report an emergency, and the 9-1-1 dispatcher will be able to identify the location of the caller and dispatch the appropriate emergency service. However, wireless carriers were not required to obtain or provide customer location information. The system is administered through 7000 local Public Safety Answering Points (PSAPs). As the use of wireless telephones grew, the system was challenged by the need to locate wireless 9-1-1 callers. To address this interoperability problem, the FCC adopted a rule in 1996 to require wireless carriers to provide location information for all wireless 9-1-1 calls by 2005, provided that the local PSAP is equipped to receive and use the information. *See* Federal Communications Commission, Enhanced 911-Wireless Services (2006), http://www.fcc.gov/911/enhanced/; *see also* Wireless Communications and Public Safety Act of 1999 (911 Act), Pub. L. No. 106-81, 113 Stat. 1286 (establishing 9-1-1 as the universal emergency telephone number).

103. National Technology Transfer and Advancement Act of 1995, Pub. L. No. 104-113, 110 Stat. 775, 783 (1996).

determination as to whether, given the legal, policy and practical constraints I have described, intervention *is* appropriate, and, if so, how that intervention should proceed.

There are two categories by which I define an *important public interest objective*. First, cases where an information technology standard may be relevant (but may not be essential) to the government's ability to meet its obligation to address a *non-critical* issue in the area of national security, defense, or public safety, health, and welfare. A second category is where *the information technology standard is relevant to providing an essential but non-critical government service* (e.g., access to public records). These are rough characterizations intended to distinguish important government responsibilities from those that I have described previously as critical and further, to distinguish circumstances wherein the standard *itself* may not be essential to government's ability to meet the public interest objective.

The first example illustrates the case where the government has a responsibility to protect the health and welfare of its citizens. Although it may be rare that an information technology standard is central to addressing an important public interest objective (and obviously this centrality weighs heavily in the determination of whether government should intervene in the event of a market failure to produce such a standard), there is at least one example where the implementation of an information technology standard will significantly contribute to improving healthcare outcomes *and* reducing a major burden on the U.S. budget and the economy as a whole: healthcare data standards.

The federal government is the largest "customer" paying for healthcare in the United States. In 2000, federal spending constituted approximately half of U.S. healthcare spending.[104] Medicare plus Medicaid alone constitutes approximately 19.5% of the federal budget.[105] Department of Defense healthcare spending has doubled from $19 billion in 2001 to $38 billion in 2006, constituting 12% of the DOD budget.[106] Healthcare costs are nearly 15% of GDP.[107] The costs are not only in dollars; there is substantial data that indicates the cost in lives. Between 44,000 and 98,000 Americans die as a result of medical errors each year,[108] about 7000 from medication errors

alone,[109] with an estimated 770,000 injured due to adverse drug events; up to 70% of these events may be avoidable.[110] The Institute of Medicine estimates that medical errors cost the United States approximately $37.6 billion per year; about $17 billion are associated with preventable errors.[111] This is both an economic and health issue of enormous magnitude.

There is broad consensus among experts that the absence of a unified set of open information technology standards for healthcare data is a significant barrier to substantially reducing the cost of healthcare and improving healthcare outcomes. A recent study estimates that adoption of electronic patient records and an open-standard health information technology network could yield $78 billion in annual savings.[112] Further, it is widely acknowledged that there has been a market failure to address the problem in a reasonable time frame (in that information technology companies in the healthcare field have not implemented open standards after having many years to do so).[113] Leading proponents of the development of standards to accomplish creating a health information technology environment have recommended that the role of government should be to encourage market-developed standards by creating incentives that are "predicated on improving quality of care through [information technology], [by] investing (with the private sector) in the creation of" a public-private collaborative entity to establish and administer standards and policy rules, identify and recommend for implementation technical standards for interoperability developed among stakeholders (among other responsibilities), and "provid[e] seed funding to define and disseminate the . . .

profiles for interoperability."[114] This is in contrast to requiring the market to deploy government-mandated standards.[115] Indeed, in 2005, ANSI established the Healthcare Information Technology Standards Panel, a public-private forum to address healthcare data interoperability issues.[116]

In the second category, a government may have to examine whether to intervene in the market to develop or mandate an information technology standard where the information technology standard is relevant to providing an essential, although not critical, government service. For example, governments have the responsibility to assure that official government documents and public records are readily accessible by their citizens for examination and use in perpetuity. Beyond the practical implications for those touched by government action, there is the need for transparency in governing in the United States, and governments have a responsibility to maintain records reflecting the operation of the government for current and future generations. Governments have long recognized the challenges of converting official records from a paper-based system to one of digital creation, storage, and retrieval. Given the rapid evolution of digital technology, there is a concern that government records created in a digital format available today will not be accessible by the public in perpetuity. Many in both the public and private sectors have sought to address this issue. Factors such as file format standards, record retention policies and strategies, and public access to electronic files are critical issues to be addressed in the standards-setting context.[117]

There are other "gray area" cases that warrant consideration. In rare cases, the government has intervened to modify market behavior to enhance competition. In such cases, the government has often not developed a particular standard itself, but rather mandated interoperability, and ultimately ratified a market-developed standard. For example, the FCC's cable TV "plug-and-play" technical standards were developed and agreed to through voluntary consensus by the cable TV and consumer electronics industries, which then asked the FCC to codify them in its rules to ensure interoperability going forward. The rules in general were adopted to benefit consumer electronics manufacturers and retailers that compete with cable operators in providing customer equipment.[118]

Some advocate that the government is the best positioned to promote leading edge or untested technologies that may bring about substantial change in the market that is favorable to society. They argue that the government is uniquely positioned to encourage or require the use of such technology where others would avoid adoption due to the risks of uncertainty or costs associated with implementing such technologies. For example, some proponents of open source software argue that only the government, as consumer, is positioned to encourage widespread adoption of open source applications.[119] In some instances, they advocate that the government mandate such a procurement requirement.[120] Some extend the argument to advocating that governments should implement new technologies simply because the technology may not get "fair" opportunity to compete in the marketplace. However, such is the case with every type of product from cars to television shows. Although there may be merit to a product, sometimes consumers will overlook the product in favor

organizing, preserving, and providing access to and services for government information are more important than ever in the digital age).

118. *See* 47 C.F.R. § 76.602 (2006); 47 C.F.R. § 76.640 (2006); *In re* Implementation of Section 304 of the Telecommunications Act of 1996, Commercial Availability of Navigation Devices, 18 F.C.C.R. 20,885 (Oct. 9, 2003).

119. *See* Andy Updegrove, Editorial, *Governments as Accelerators*, CONSORTIUM STANDARDS BULL., Sept. 2005, *available at* http://www.consortiuminfo.org/bulletins/sep05.php#editorial. Some proponents of open source software argue that government has an interest in using software that is not potentially subject to control of a single vendor. Although this may be a valid argument regarding open standards, I would distinguish open standards from open source software in this regard: Whereas the use of software that *implements* open standards (or possibly even broadly accessible and licensed proprietary standards) may meet the goal of protecting government from control by a single vendor, open source software does not necessarily do so, since an open source implementation may be unique to a particular company, and, but for that company's product, the use of the implementation by government may be impractical. Moreover, most open source software has been commercialized and is acquired under specific terms and conditions.

120. This is to say a procurement requirement that would not only mandate a particular technology, but mandates the use of the licensing scheme and development model. It is important to understand that the term "open source software" does not define the utility or functionality of a particular software, but rather a development scheme, i.e., who writes the code, and very often, particular licensing terms embodied in what is called a General Public License, or GPL.

of known quantities, regardless of the projected benefits of the new product. It is not unusual for the market to simply favor the incumbent over a new, untested product. This is not to say that where the best business case for the government as consumer urges the use of a new or untested technology standard, the government should refrain. The point is that even in this situation the business case must still be made, and good judgment as a rational consumer must be relied upon.[121]

C. CASES THAT ARE CLEARLY NOT CIRCUMSTANCES FOR GOVERNMENT INTERVENTION

Under the third category, as a general matter government should not intervene in the setting of information technology standards in circumstances where the competitive market is vibrant (i.e., there is market competition and viable means to set the relevant information technology standards) and where (1) the market is not clearly failing to meet an important public interest objective, or (2) there is no important public interest objective or creating the standard is tangential to an important public interest objective. By tangential, I mean that creating the standard is not the only way to achieve the public interest objective; thus, even in a case of market failure, such would not be a barrier to the government in accomplishing the important public interest objective.

Let me step back at this point to be clear as to what constitutes the public interest. For the purpose of examining the government's role in setting standards, policymakers must keep a broad view of what the public interest is—that is, to maintain proper perspective, they should examine the narrow issue at hand in light of the greater public good. Indeed, this may be a difficult task. However, given the strong preference for government restraint in mandating standards, and given the extremely small likelihood that the setting of any particular standard will negatively impact the public at large, it is an extremely important consideration. Where there may be a more narrowly defined public interest sector impacted by the setting of a standard, it is important to have the relevant public interest representation informed and meaningfully involved in the standard-setting process, as I describe in Part VI.

---

121. *See* Dep't of Def., Open Systems Joint Task Force Frequently Asked Questions, *available at* http://www.acq.osd.mil/osjtf/faqs.html#dejure [hereinafter OSJTF FAQ] (describing the Defense Department's decision-making process in regard to standards implemented in open systems: "Overall, you should select the standard that provides the best business case, whether it's *de facto* or *de jure*, and that provides your program the best chance for success over the life of the program . . . . Selecting a standard that is too immature may not satisfy functional/performance requirements."). Thus it is clear that the Department of Defense is not opposed to selecting emerging standards over a standard that is in widespread use; however, the policy mandates that the choice be made on the best business case. The OSJTF FAQ emphasizes that "market analysis is key to making the best choice (a key risk mitigation technique)." *Id.*

One circumstance not warranting government action would be intervention absent a market failure that is detrimental to the public interest.[122] For example, in a situation in which a standard has not evolved, the government need not intervene for the sole reason that adoption of a standard would provide a consumer benefit unto itself. Keep in mind the long history of "would-be" standards rejected by the public described at the outset of this article. Although there are many roads that can lead to the development of a standard, some dead-end because, as I have described, the technology is not mature, affected industries are unresolved as to the appropriate standard, the standard-in-waiting is superceded, or the market simply is not ready or interested. In these cases, and even where competing technologies flummox the market, delaying the adoption of a standard, consumer rejection of a standard as such is not rationale enough for government intervention.

A frequently cited example where some argue the market is failing to meet an important public interest objective is in the context of consumer access to, and use of, works protected by copyright. Major aspects of the current debate are whether or how government should address the competing interests of various stakeholders (e.g., relative competitive advantage of an incumbent technology or commercial interest),[123] the preservation of the fair use doctrine,[124] and whether the law and the industries are meeting consumer expectations regarding the use of copyrighted works.[125] Without a doubt, important public interests are at stake. However, it is not so certain that standards are essential to achieving these public interest objectives. Indeed, standards are possibly only tangential to achieving these objectives. Other laws and behaviors are implicated and may be regulated pursuant to non-technical (i.e., not standards-related) means.

As to the fair use issues, clearly important public interest objectives are

---

122. I distinguish consumer benefit from consumer protection, which would certainly fall under other areas of law such as antitrust or general consumer protection laws rather than the government intervening in the standards-setting process per se.

implicated (e.g., the protection of the public interest limitations on the otherwise exclusive rights in intellectual property protection such as disclosure in the context of patents and preservation of the fair use doctrine in the context of copyright). However, even if the market is failing, it is not the actual information technology standard that is at issue, but rather the operation of copyright law (or the enforcement of that law). The applicable law in this case is the Digital Millennium Copyright Act (DMCA). The DMCA amended the Copyright Act barring circumvention of digital rights management protecting copyrighted works.[126] The DMCA also authorizes the Librarian of Congress to periodically review the impact on fair use of the anti-circumvention provisions of the DMCA, and "exempt certain classes of works from the prohibition against circumvention of technological measures that control[s] access to copyrighted works."[127] Proceedings have taken place in 2000, 2003 and again in 2006.[128] Although in early years, the Copyright Office determined that no revision to the law was necessary, in 2006, the Registrar of Copyrights exempted persons making non-infringing uses of six classes of copyrighted works from the circumvention prohibition.[129] Thus, the government is addressing the issue of preserving fair use without requiring alteration of information technology standards. There may be an argument about whether the statutory approach of exemptions is a correct one (some may argue that all works should be exempted), but this is a statute regulating behavior, not technology standards. Copyright law is, as it is often said, a perpetual balancing between the public interest in protecting the rights of the creator and the public interest in the use of a work.

As to the competing commercial interests, the presumption should be that the government should not intervene merely to skew the competitive playing field.[130] In this case, the market is young and the participants, copyright owners and the competing information technology companies are only beginning to develop business models. As I have described, this is a circumstance that argues against the need for government intervention.[131]

130. Of course, if there are anticompetitive behaviors, such can be addressed by antitrust law.

131. *See supra* notes 93-95 and accompanying text (discussing France's recent legislative efforts to mandate interoperable entertainment digital rights management). Interoperability among digital audio players has been at issue since the market success of the proprietary Apple AAC file format and their Fairplay DRM. *See also*, *Hearing Before the Subcomm. on Courts, The Internet, and Intellectual Prop. of the H. Comm. on the Judiciary*, 109th Cong. (2005) (statement of Raymond Gifford, President, The Progress & Freedom Foundation) ("Furthermore, these markets usually trend toward interoperability, as that is

As to the consumer issues, there are important market questions regarding the delta between commercial offerings and consumer expectation, and these questions are not an issue of the setting of an information technology standard. In other words, the standard will implement the access rules that the copyright holder or content distributor imposes. It is worth noting that where an industry uses a technology that "goes too far" to the detriment of a public interest in protecting consumers, or for that matter, too far in regard to consumer expectation, the public outcry and press reaction tend to quell the adverse actions and even litigation may ensue. Recently, Sony BMG incorporated First4Internet XCP copy protection into CDs and DVDs, which install without a user's permission on a user's PC as a rootkit, creating security vulnerabilities. Consumer advocates and the Department of Homeland Security sought legislation to prohibit this technology and the Electronic Frontier Foundation brought a class action suit against Sony/BMG (relying on current law protecting computers), obtaining a settlement in January 2006.[132]

Finally, in some cases, there may be an important public interest objective in helping a nascent industry develop. The most obvious example is the early evolution of the Internet. Although there has been much debate, and there are a few exceptions, the government has been hesitant to regulate the Internet for all the reasons regarding government failure aforementioned. In the few instances in which the government has regulated the Internet, there have been problems fitting the solution to the problem. Although these are not examples of "standards" per se, one can look to the examples of the CAN SPAM Act and efforts to protect children from pornography, the Communications Decency Act (CDA) and the Children's Online Privacy Protection Act (COPPA) for a mismatch of regulatory approach to the problem at hand.[133]

---

usually where consumer preference directs them. By contrast, government mandated interoperability sacrifices the dynamic competition for the standard for competition within the standard."); *Id.* (statement of William E. Pence, Ph.D., Chief Technology Officer, Napster) (stating

> [m]arketplace forces will continue to drive innovation in the DRM arena with attendant consumer benefits, new ways to enjoy digital music at a variety of different price points, while also gradually 'solving' the interoperability problem . . . . Napster believes that allowing the iPod to work with multiple service offerings would benefit consumers . . . . I do not see government intervention as the solution, as it would stifle competition and innovation that will benefit consumers and copyright owners at a very early stage of the market's development . . . . It does not seem prudent for government to pick a winner in the continuing . . . marketplace battle between Apple's FairPlay DRM and its competitors.)

Each house of France's parliament would argue that they are encouraging growth and competition in a nascent online music industry with their proposed DRM law.[134] The market can certainly be described as nascent. Although Apple is clearly the current market leader, it leads in a small part of the *potential* market, which is growing rapidly.[135] There is significant consumer interest in online music,[136] and there are many major companies focusing significant investment to compete with Apple, including Sony, Creative, Dell, Microsoft, Panasonic, Phillips, Toshiba, Samsung, Sandisk, and others. Indeed, in this case, where there are several viable competing technologies in the marketplace (i.e., Microsoft's Windows Media Player format, RealPlayer's format, and, of course, MP3), it has been argued that a government mandate may have the effect of foreclosing competition. As I have noted, some have observed that rather than leveling the playing field, such a law could tilt the

misleading header and subject line information, and gives consumers the right to ask e-mailers to stop spamming them in an effort to halt spam. 15 U.S.C. §§ 7701-7713 (2003). However, American legislation can only accomplish but so much, given that spammers can simply move their operations off shore and the FTC has no legal mechanism to bring actions against spammers located abroad. The Children's Online Privacy Protection Act of 1998 (COPPA) prohibits website operators from collecting personal information from children under thirteen years of age without the verifiable consent of the parent. 15 U.S.C. §§ 6501-6506 (1998). However, among other things, privacy advocates argue that the FTC has yet to clarify what constitutes "actual knowledge" that minors are using a website. *See* EPIC Complaint and Request for Injunction, Investigation and for Other Relief, *In re* Amazon.com, Inc. (filed Apr. 23, 2003), *available at* http://www.epic.org/privacy/amazon/coppacomplaint.html; Comments of Electronic Privacy Information Center, Center For Digital Democracy, Kathryn C. Montgomery, National Institute on Media and the Family, Consumer Action, Privacy Rights Clearinghouse, Consumer Federation of America, and Robert Ellis Smith of Privacy Journal, *In re* COPPA Rule Review 2005, (filed June 27, 2005), *available at* http://www.ftc.gov/os/comments/COPPArulereview/516296-00014.pdf; *see also* FTC decision to retain the Children's Online Privacy Protection Rule without modification (Mar. 15, 2006), *available at* http://www.ftc.gov/os/2006/03/P054505COPPARuleRetention.pdf. The Communications Decency Act (CDA) imposed broadcast-style content regulations on Internet content, prohibiting posting of "indecent" or "patently offensive" materials in a public forum on the Internet. Pub. L No. 104-104, §§ 501-509, 551-552, 561, 110 Stat. 56, 133-43 (1996), *invalidated by* Reno v. ACLU, 521 U.S. 844 (1997). This would have included the texts of classic fiction such as the "Ulysses" and other materials that, although offensive to some, enjoy the full protection of the First Amendment if published in a newspaper, magazine, or a book, or in the public square. The CDA was struck down by the Supreme Court in Reno v. ACLU, 521 U.S. 844 (1997).

134. *Supra* notes 91-95 and accompanying text.

135. Some might even argue the sector has crossed the threshold of "nascent." In.Stat, a leading Internet research firm, reports that online sales of digital music constituted nearly five percent of the total worldwide music market in 2005, representing $41.5 billion in sales, which is up from zero percent in 2003. Press Release, In.Stat, The Online Music Market: Downloaded Music Will Outpace Physical Media Bought Online in 2007 (Mar. 2006), *available at* http://www.instat.com/catalog/Ccatalogue.asp?id=212#IN0602972CM. In.Stat expects that download revenues will exceed revenues from physical products purchased online by 2007. *Id.*

136. *Id.*

field toward the current market leader, Apple, growing its market share and creating a disincentive for others to compete. The essence of the situation is that a sector is nascent and it is questionable at best whether the market has failed let alone whether the public interest (that of consumer's choice of online music vendors and devices) rises to the level of warranting government intervention.

V. THE TEST (PART TWO): SIGNIFICANT AND SUBSTANTIAL MARKET FAILURE

In the context of information technology standards, and for the purposes of identifying the government's role in regard to setting such a standard, I define market failure as circumstances where an information technology standard essential to meet a critical public interest objective, or relevant to an important public interest objective, has not developed in the market in a reasonable time frame and, thus, has proven a barrier to government action to address the identified public interest objective.[137] Market failures may occur for various reasons, such as: underinvestment by the private sector to develop and deploy the appropriate standards; a lack of proposed standards or conflicting standards such that no single standard has emerged to meet the critical or important public interest objective; systemic inefficiencies that result from competitive efforts to develop standards that function to impair the development of the standard (i.e., competing companies or standards-setting organizations develop conflicting standards to meet the same need causing increased market expenditure on the development of the standard or market uncertainties that cause consumer confusion); or intractable discord between industries or participants in the standards-setting process (i.e., the standard-setting process has apparently irrevocably broken down). In this last case, there must be such a high level of discord between participants that the system fails to deliver standards to meet the essential or important public interest objective in a reasonable time frame.[138] Under any of these circumstances, the government

137. To assess what a reasonable time frame is, the government would consider the urgency or criticality of the need for a standard and to what extent, if any, the pace of market behavior is operating to the detriment of the public. Consider for example the possibility of a standard that is established as a result of widespread user adoption, i.e. a de facto standard. Such may take considerable time to emerge in the marketplace, but the timing is often coincidental to the market need as its establishment is precipitated by the scale and scope of market need.

138. Indeed, there may be other market behaviors that operate to the detriment of the public, such as collusion among a few in the standards-setting process, market allocation, boycotts of a particular company or standard, the problems of "hold up" or that of "submarine patents." But, there are other legal theories and remedies to address these market failures, such as laws applying to intellectual property protection in copyright or patents, contracts or antitrust. The government should consider these means in the appropriate circumstances, before intervening in the standards-setting process in a manner of "selecting" the standard.

Take, for example, the *Rambus* case, in which Rambus, while participating in a

may be asked to intervene by stakeholders or may, as a stakeholder, independently consider intervening.

---

standards-setting effort within the Electronic Industries Association-established Joint Electron Devices Engineering Council (JEDEC), failed to disclose patents. Rambus v. Infineon Techs. AG, 164 F. Supp. 2d 763, 764 (E.D. Va., 2001), *rev'd in part*, 318 F.3d 1081 (2003). Subsequent to the development of the standard, Rambus sought royalties on the patents from companies that implemented the standard. The FTC unsuccessfully brought an administrative action against them. In concurrent litigation, Rambus was held not liable for allegedly misleading JEDEC's standards-setting activity. However, the Virginia District Court on remand found that Rambus was guilty of evidence spoliation, which, in part, provided the basis for a bench ruling that Rambus could not enforce its patents on a theory of "dirty hands." In 2004, the District Court found that Rambus had spoliated evidence, warranting the piercing of Rambus' attorney-client and work-product privileges. This permitted the subsequent discovery in the federal civil case. Rambus, Inc. v. Infineon Techs. AG, 222 F.R.D. 280 (E.D. Va. 2004). In February 2005, in a bench trial, the court found that Rambus was liable for "unclean hands," which would estop Rambus from pursuing its patent claims. *See* Samsung Elecs. Co. v. Rambus, Inc., 398 F.Supp. 2d 470, 473 (E.D. Va. 2005). *See also* Rambus, Inc. v. Infineon Techs. AG, 222 F.R.D. 280, 282 (E.D. Va. 2004). There is no record of the bench trial to which the *Samsung* case refers. After this ruling, Rambus and Infineon settled out of court before the court finally ruled in the matter. In May 2005, the FTC re-opened the record upon discovering that Rambus's attorneys had likely tampered with evidence. The full Commission is hearing the matter and is considering the new evidence. *In re* Rambus, Inc., FTC Docket No. 9302 (2004), *available at* http://www.ftc.gov/os/adjpro/d9302/index.htm Although the case is ongoing, the facts have thrown into question how a standards-setting organization can enforce its intellectual property rights policy and whether courts can resort to equity as an appropriate remedy..

Another example can be found in the FTC Consent Order in Dell Computer Co., FTC Docket No. C-3658 (May 20, 1996) (Commissioner Azcuenaga dissenting), where Dell was alleged to have intentionally failed to disclose claimed intellectual property to VESA during the standards-setting process. The Consent Order required Dell to refrain from enforcing its patents. *Id.* Were such a circumstance to become endemic, it might be appropriate for government to intervene. *See*, The Vital Role of Standard-Setting Organizations and the Necessity of Good Faith and Fair Play Among Participants, The Future of Standards-Setting 2004 Symposium Paper, *available at* http://www.standardsconference.org/docs/WhitePaper_1-14-05.pdf; Deborah Platt Majoras, Chairman, Fed. Trade Comm'n, Remarks, For Standardization And The Law: Developing The Golden Mean For Global Trade (Sept. 23, 2005), *available at* http://www.ftc.gov/speeches/majoras/050923stanford.pdf.

But mitigating factors that lead to self-correction may prevail. Indeed, even where there is fear of potential market power abuse, as has been expressed in the context of standards setting (in regard to certain companies, or particular development schemes, such as proprietary as compared to open source), "most networks consist of several manufactures supplying complementary products that must interconnect in order for the network to function efficiently." David Balto, Assistant Dir., Office of Policy and Evaluation, Bureau of Competition, Fed. Trade Comm'n, Remarks at the Cutting Edge Antitrust Law Seminars International (Feb. 17, 2000), *available at* http://www.ftc.gov/speeches/other/standardsetting.htm.

Further, such a risk is substantially eliminated when the standards-setting process enters formal stages and transparency, consensus, good faith, and fair play work to preclude unfair advantage by any single participant. Although this view may appear idealistic, the risks of assault on a standards-setting proceeding are most notably that of the imposition of a "submarine patent" or of patent royalty "hold up" risks, which are concerns as to behavior but are not attributable to the size of the perpetrator.

In a case that falls within the first category, the standard is essential to meet a critical public interest objective; the government should certainly take all necessary measures to remedy the failure as rapidly as possible. That said, as previously noted, the government's strong preference for voluntary consensus standards has led the government to be reluctant to set a mandate where the market has not decided, and thus the test described herein for "gray area" cases may well be appropriate.

As to "gray area" cases, given the well-articulated reluctance of the government to intervene in the market to set standards as a general matter, it is appropriate to set a high bar for failure before the government should intervene, that of *significant and substantial market failure.* A significant and substantial market failure would be where the market failure has proved to be a barrier to the government's ability to address the important public interest objective. Even where there is a significant and substantial market failure, one must consider a number of *mitigating factors.* The first may be posed as a question: if given a reasonable period of time without government intervention, will the market rectify the failure? With regard to the *reasonableness* of the time frame in which a standard may emerge in the market, the examination must consider whether the magnitude of the need corresponds with the availability of the standard. Typically, the market sorts out technical standards well in advance of the time where the majority of users needs to make a technology choice. By this time, the standard reaches wider market acceptance, it is generally well understood, and the methods of interoperability are mature enough to be relied upon.

An example in the standards-setting context of where government appropriately delayed action to allow the market to work can be found in the evolution of consortia. This was a question of the viability and legitimacy of this particular approach to standards setting in general, rather than the development of an individual standard, but the correlation will become apparent, as this debate could have taken place as to any single consortium-developed standard. At the advent of consortia, some critics were concerned that standards set by consortia harmed the standards-setting process because, it was argued, consortia did not adhere to the due process guidelines of formal standards development organizations such as those relating to transparency and inclusiveness. Therefore, the argument went, standards set by consortia were not truly voluntary and consensus based, i.e., not valid. These criticisms were brought to the government's attention.[139] But the government did not intervene and only a few years later it became apparent that the use of consortia to develop standards has revealed itself in many cases to be a better allocation of resources than circumstances where individual companies compete to develop a standard or the market endures a lengthy formal standards-setting process. The consortium significantly reduces both redundancy in the creative process

139. Standards-Setting Hearing, *supra* note 15, at 19.

(similar tasks being undertaken by different people at different companies) and provides a forum for more efficient consensus building. Even where a proposed standard is developed at a single company, the process of creating a consortium or acquiring consortium approval is an exercise in building consensus, and providing efficiencies otherwise unavailable. In fact, many consortia take on the characteristics and processes of traditional, formal standards-development organizations.[140]

Although there may be concern that single-company, or small-consortium developed standards create a risk to the overall standard-setting scheme, it would be premature to conclude that the government should intervene into a particular standard-setting merely because a single company or a small consortium is proposing the standard. In fact, reviewing the history of standards, one sees many standards developed by a single (even dominant) company or small groups of companies working together.[141] There would have to be much more substantive grounds for government intervention.

Another mitigating factor that the government must evaluate in determining the significance of an apparent market failure is the cohesiveness of the stakeholders, i.e., the degree to which there are existing avenues of interchange, agreement or dispute resolution, such as customary channels for negotiation, forums such as trade associations, cross-industry working groups and so on. The greater the cohesiveness, the less likely government intervention is warranted even where there is a market failure. Keep in mind the enumeration of the vast number of forums for standard-setting, channels of communication between stakeholders, and constant reinvigoration of the development of standards through new forums such as consortia. For example, the entertainment industry and computer industries have been somewhat at odds over business models for, and intellectual property protection in, distribution of the entertainment industry's products using the computer industry's (and consumer electronics) products as the means of distribution. There are numerous avenues for discussion, including private negotiations regarding the terms for distribution, through ad-hoc organizations such as the Content Protection Technology Working Group (CPTWG), and in that case

140. Although consortia are formed for a wide range of reasons, some of which are purely strategic in regard to competitors, as a market-accepted tactical approach and not presumptively deleterious to the market, they may even enhance competition.

141. Leading examples include Adobe's PDF, Hewlett Packard's PCL, IBM's VGA, Microsoft's open XML file formats, Intel's x86 architecture, and Hayes' Standard AT Command Set. As I have described in detail in Part III.B.1, during the process of revising OMB Circular A-119 to conform with the NTTAA, comments were received seeking clarification as to whether a standard developed by a private-sector business or consortium qualify as a "voluntary," "consensus" standard. OMB made this clarification, stating "It has not been the intent of the Circular to create the basis for discrimination among standards developed in the private sector, whether consensus-based or, alternatively, industry-based or company-based." OMB Circular A-119, *supra* note 23.

more narrowly, the 5C companies (a consortium) that, for example, developed the "encoding rules" to insert into specific "bits" left open for the "broadcast flag" by ATSC (a formal, ANSI-accredited standards developing organization) in its DTV standard, trade associations (e.g., Recording Industry Association of America ("RIAA"), Motion Picture Association of America ("MPAA"), Information Technology Association of America ("ITAA"), Business Software Alliance ("BSA"), Consumer Electronics Association ("CEA"), National Association of Broadcasters ("NAB") and others), issue- or technology-specific consortia, and so on. Similarly, Internet-related companies, non-profit public interest groups, and standards organizations that are organized to address Internet-specific standards (i.e., W3C, IEEE, IETF, ITU-T, INCITS, etc.) provide still more possible avenues for greater cohesiveness. So too is the case with computer and software architecture and consumer electronics. These are sophisticated, evolved businesses with numerous means to resolve differences and conclude standards setting even in a dynamic, relatively young marketplace of convergence (CEA, IEEE, ITU, ICITS, etc.).

To conclude, there must be a significant and substantial market failure before the government should consider intervening, and even where such a failure exists, the government should consider several mitigating factors before acting.

VI. THE TEST (PART THREE): GOVERNMENT INTERVENTION MUST BE REASONABLY TAILORED

Where the government concludes that intervention in the standards-setting process is warranted, *it should reasonably tailor its intervention to rectify the identified market failure and to achieve the particular public interest objective.* The government should limit the scope of intervention and define objectives in acting to address a critical or important public interest objective. In order to assure the most narrowly tailored government intervention, where government elects to intervene, it should be able to clearly articulate: (a) the specifics of the important public interest objective in the establishment of a particular information technology standard; (b) the purpose and scope of the government intervention; and (c) identifiable objectives for government intervention to achieve.

Because the government is substantially predisposed not to intervene and the risk of government failure is of substantial concern, *the government should, where it determines it must, proceed incrementally in its intervention,* respectful of the guiding premises that, first, the information technology market is generally well equipped to develop standards, second, government prefers market-developed information technology standards to government mandates, and, third, the risk of government failure is significant. By incremental intervention, I mean that which initially produces minimal non-market behavior, and with each step, imposes greater degree of intervention. With this in mind, the first step in intervention should be to encourage market activity;

government should first encourage the market to undertake and develop the needed standards. Typically, the government uses incentives such as taxation incentives or government funding through grants or loans to encourage market behavior and the same could be true in regard to the development of information technology standards. In the event of disputes between stakeholders that delay standards to the extent of a market failure, the government could facilitate something akin to mediation to mitigate the need for more direct government intervention.

As a first step prior to direct intervention, and to potentially obviate the need for the government to even entertain the question of directly intervening in the setting of a standard, the government and the private sector should endeavor to strengthen non-governmental public interest representation in the particular standards setting. Government and industry share a responsibility to assure that non-governmental public interest representatives are, or become adequately informed and fully engaged through funding, education and technical assistance where necessary.

By public interest representation, I mean entities that are known to be credible advocates representing the views of the general public (or segments thereof) on issues of public concern and that are accountable to the public for their advocacy. They may represent consumers or consumer sectors such as the elderly as represented by the American Association of Retired Persons (AARP), or have constituencies such as patients in the healthcare arena or the disabled in areas such as accessibility or healthcare. The key factors are that they credibly and genuinely represent the public interest, are informed, meaningfully involved and are accountable.[142]

There are three categories of interested parties represented in the standards-setting process representing diverse opinions: industry (often many companies or trade associations with differing interests); government, as both a customer for standards and as a regulator of industries that use standards, and non-governmental public interest groups (e.g., consumer advocacy organizations). Each set of interested parties have a seat at the standards-development table, but depending on the importance of the standard to each, the credibility and appropriateness of the participation, and other factors, differing weight is given each depending on the circumstances.

Involvement of public interest representatives in these circumstances adds to the diversity of stakeholders and gives greater assurance that the public interest will be served without the direct intervention of government. It is to the

142. In the context of information technologies, there are many flavors of "public interest" representatives, many of which actually represent industry sectors or even individual companies and have neither accountability to the public nor genuine credibility at stake in the public eye. I do not mean to imply that these enterprises should be excluded from a standards-setting process, as they may well be legitimate stakeholders. However, they do not fulfill the role of a true "public interest" representative, as organizations such as the Consumer's Federation of America, National Consumers League, AARP or the Disabled American Veterans would, and their viewpoint should be given appropriate consideration.

benefit of industry, government and the public to have such representation to inform the standards-setting process and integrate into the process greater consideration of public interest matters. Further, such representation will be valuable in the event government elects to intervene, representatives participating in the process can inform government decisions, and support or refute with transparency positions taken by the government. As it is described by ANSI in the United States Standards Strategy:

> The representation of consumer interests in the U.S. standards system is essential to ensure that the individual's needs are being considered and addressed. Today's consumers are concerned about such issues as product compatibility; quality of products and services; ease of use and accessibility . . . . With its emphasis on . . . openness, and transparency, the U.S. standards system provides a valuable forum for the consumer voice to be heard. . . .
>
> - *Standards developers* should identify, encourage and support appropriate consumer representation on their committees . . . .
> - *Industry* should use consumer research as a basis for standardization initiatives and decisions.
> - *Government* should strengthen its consumer-related programs and initiate standards information and participation programs as appropriate.
> - *ANSI* should work with consumer organizations to educate them about standardization and encourage and support their participation in standards development.[143]

Beyond this first step, a government response might include taking the role of broker or mediator, or assigning such a role to a neutral third party, providing a setting for dispute resolution or the establishment of an informal or formal forum to assist the private sector in developing the needed standard. For example, to mitigate a government mandate and the associated risk of government failure, NIST or the FCC can function as a convener, drawing all appropriate interested parties together.[144] As Carl Cargill testified

> NIST has a unique opportunity . . . the ability to call on its own right a meeting of people engaged in standardization . . . and because they are neutral, that is, they don't have their own technical agenda to push, it is phenomenally helpful . . . . It can be a source of information, a source of knowledge about what is going on [in an area of standards-setting.][145]

ANSI has performed this role ably, as has the FCC. The FCC has provided opportunities for consensus building and brokering resolutions in standard-setting where telecommunications standards are at issue. For example, in its proceeding regarding set-top boxes for cable systems, the FCC has on several occasions deferred its deadline for eliminating integrated set-top boxes,[146] the

---

143. USSS, *supra* note 39, at 10 (footnote omitted).

144. Notably, to some extent ANSI standards planning panels serve this function as well, and being a private-sector enterprise, should be considered as a possible and less government-intrusive alternative avenue.

145. Standards-Setting Hearing, *supra* note 15, at 48 (statement of Mr. Carl Cargill, Director of Standards, Sun Microsystems).

146. The initial deadline for phasing out the integrated set-top box was set for Jan. 1,

latest one, until July 1, 2007, to afford the industry more time to develop a downloadable security solution. The FCC concluded that downloadable security was likely to produce more competitive and interoperable digital devices, which would consequently foster the DTV transition. The Order, however, also imposed reporting requirements on the cable industry in order to ensure that negotiations for development of technical standards and licensing agreements were not unnecessarily delayed.[147]

Similarly, the FCC has also adopted performance requirements and permitted various technical methods to fulfill those requirements. In the "Broadcast Flag" proceeding, the Commission concluded that, absent some content protection mechanism, the potential threat of mass indiscriminate redistribution would deter content owners from making high-value digital content available through broadcasting outlets. To help curb this threat, the Commission adopted the ATSC flag-based system, which signals DTV receiving devices to limit redistribution of the broadcasted content.[148] It is key to understand that the FCC, however, did not prescribe a specific content protection or recording technology that equipment manufacturers must use in producing flag-compliant devices. Rather, the Commission set forth an interim process by which a manufacturer could certify to the FCC that their technology is compliant in giving effect to the ATSC flag, giving life to competing technologies to meet the flag requirements.[149] Even though the Commission acknowledged that it was not mandating a single federal standard, it stated that it would review the standards for licensing terms and compliance.[150] The FCC

2005, but it has been deferred several times by the FCC, and the current deadline is July 1, 2007. *See In re* Implementation of Section 304 of the Telecommunications Act of 1996, 20 F.C.C.R. 6794 (Mar. 17, 2005). The FCC sought to phase out navigation devices for cable consumers that performed both conditional access functions and other functions in a single integrated device. The goal was to foster competition in the navigational devices market, by enabling unaffiliated manufacturers, retailers, and other vendors to commercially market host devices while allowing cable operators and other video programming providers to retain control over their system security.

147. *Id.* at 6814-6815, ¶ 39. *See also supra* note 14 (discussing the successes and failures in the navigational devices standards setting process). This situation also exemplifies the risks associated with government intervention.

148. *In re* Digital Broadcast Content Protection, 18 F.C.C.R. 23,550 (Nov. 4, 2003), *rev.'d in part & vacated in part,* 406 F.3d 689 (D.C. Cir. 2005).

149. That is, the device would recognize the broadcast flag, which instructs the device as to what the device may do with the protected content, whether the content may be distributed freely, distributed to an unlimited number of other devices (but only those that recognize the flag), copied only once to another compliant device, or never copied. *Id.* at 23,575 ¶ 53.

150. *In re* Digital Output Protection Technology and Recording Method Certifications, 19 F.C.C.R. 15,876, 15,916 ¶¶ 90-91 (Aug. 12, 2004). Although the D.C. Circuit ultimately struck down the FCC's broadcast flag requirements, the Commission's expectation that approved content protection technologies be licensed on a "reasonable and non-discriminatory basis" is still instructive in terms of how the FCC addresses the issue of mandatory technical standards. *See* Am. Library Ass'n v. FCC, 406 F.3d 689 (D.C. Cir. 2005).

has fostered the development of standards in the private sector in many other situations, at times adopting those standards as a federal standard[151] and at other times simply providing approval for compliance with an established industry standard, as in the broadcast flag instance or the cable TV plug-and-play context described above.

As a second step in intervention, the government can use its leverage as a *potential* market participant and *potential* regulator to influence the marketplace. The government is very effective at manipulating market behavior by threatening to undertake regulation, or, as a major market participant, by driving commercial decisions (particularly by government vendors). This step is descriptive of typical situations in which stakeholders seek to put pressure on competing stakeholders by urging Congress or the executive branch to pursue a change in the law to meet the advocate's parochial needs. And indeed, this is common enough behavior. However, the government should only take this step where it is in the broader public interest to do so, and doing so can be and should be accomplished without "taking sides." The goal for the government should be to encourage, cajole, and incite the market to resolve differences impairing the development of a standard.

Even where the government is participating in the market primarily to influence the market, it should do so as a *rational consumer*. The government's decision to participate in the market must be in the broader public interest and part of that analysis must be a determination of the best business case for the government. The government should undertake the traditional cost-benefit analysis of acquisition of a product or service by the government and consider factors such as suitability of the product for the purpose intended, interoperability, reliability, security, functionality and usability, and total cost of ownership (acquisition, training, and conversion costs, and service costs over the life of the product). For example it is not in the best public interest for the government to commit to purchase a non-existent product, or products that are not market-tested and mature (unless, of course, it is supporting research and development). In its *Roadmap for an Open ICT Ecosystem*, the Harvard Berkman Center recommends that policymakers and stakeholders in information and communications technology platforms

> [c]onsider a hierarchy of standards with priority given to mature, widely used, open standards. Where open standards do not exist, favor industry-driven, consensus-oriented standards with as many of the elements of an open standard as possible (see Section I). This will help balance the use

151. *See, e.g.*, *In re* Digital Audio Broadcast Systems and Their Impact on the Terrestrial Radio Broadcast Service, 17 F.C.C.R. 19,990, 20,002 ¶ 34 (Oct. 11, 2002). In this proceeding, the FCC sought to encourage the development of digital broadcasting by AM and FM radio broadcasters. To that end, the FCC selected iBiquity's in-band, on-channel (IBOC) transmission standard. The IBOC standard was supported by most of the largest broadcast group owners, as well as the CEA and the NAB. *See also In re* Advanced Television Systems and Their Impact upon the Existing Television Broadcast Servics, 7 F.C.C.R. 3340, 3358 ¶ 69 (May 8, 1992).

> of open standards with the dynamics of the market and emerging technologies.[152]

In support of the 1994 Department of Defense Memo reforming the Defense Department standards acquisition to implement the Department's transition to open systems, the Department of Defense Open Systems Joint Task Force guidance provided that,

> Overall, you should select the standard that provides the best business case, whether it's de facto or de jure, and that provides your program the best chance for success over the life of the program. . . . Selecting a standard that is too immature may not satisfy functional/performance requirements.[153]

So although there is a willingness to consider immature or untried technologies, there seems to be a widely held preference for more mature and time-tested technologies and standards.

As I have noted, governments have recognized the challenges of converting official records from a paper-based system to that of digital storage and retrieval. Many in both the public and private sectors have sought to address this issue. One solution has become very controversial through the actions of the Commonwealth of Massachusetts and other states as well as national governments outside the United States. In the case of Massachusetts, the Commonwealth has developed a policy to require the OpenDocument file format (recently ratified by OASIS and approved by ISO and IEC), as well as Adobe's PDF (portable document format),[154] as the standard formats for all office documents in certain state agencies as of January 1, 2007.[155]

The policy acknowledges that most documents generated by the government are in Microsoft Word, Lotus Notes, and WordPerfect proprietary formats.[156] Among the policy goals the government is seeking is to shift from these formats to the use of open standard formats for government documents, to gain efficiencies in data management, and to avoid vendor lock-in.[157] Although there are many issues surrounding the development of this policy, one question the government must ask specifically regarding the choice of a format, a central question in the development of the policy, is whether the required format has matured adequately to meet the specific requirements that Massachusetts sets

153. DOSJTF FAQ, *supra* note 121.

154. It is more than simply rhetorically ironic that Adobe refused to license the PDF format to Microsoft for inclusion in Microsoft's Office applications to the same extent it is licensed to other application vendors. Depending on the specifics of this situation, it may place into question whether the PDF format is truly an open standard, available to all qualified potential users on RAND terms.

156. *Id.*

157. *Id.*

out, particularly the public interest in long-term accessibility to government documents. Are there software manufacturers that will maintain applications in the marketplace that will read documents created by government employees generations earlier, and is it reasonable to expect that those products will be in widespread popular use? Is this the best decision the government can make in regard to meeting the important public interest need to assure government documents are available to the public in perpetuity or is this, as author Stephen Breyer put it, a mismatch between an identified problem and its proposed government solution?[158]

As a final consideration in the context of government as market participant, the government should not incur extraordinary costs to the government or the public uncommensurate with the benefit bestowed upon the general public good. In sum, the government can and should consider using its market power and position as regulator to encourage market behavior, but in doing so, the government must act in the context of the general public good.

As a third step in intervention, the government could consider intervening by imposing a mandatory information technology standard, but doing so through a transparent, neutral process. Failing to cajole the market to meet the important government interest, regulatory steps could be taken to mandate a standard to accomplish interoperability. But the government should do so still with an eye to minimal intervention, allowing for market flexibility, and with attention to mitigating the risk of government, or non-market, failure.

A government mandate should set out requirements to achieve interoperability, i.e., *performance standards*, as opposed to specifying a particular *implementation* of an interoperability requirement (some would call this a "design" requirement). Thus, the law would not describe the specific technical means to achieve interoperability, but would have an objective means to assure that the mandated objective ("performance") of interoperability is met. Federal government mandates such as e-911, the Emergency Alert System, and the broadcast flag take this approach. And as is the case of the FCC approach to the broadcast flag, the law should establish a neutral process to determine whether a particular implementation satisfies the objective.

The mandate should also be sufficiently flexible to incorporate efficient means to renew or revise the standard, once established, to assure improvement and compatibility as technology evolves.[159] Generally, "performance"

---

158. BREYER, *supra* note 76. This is an immense issue for the information technology sectors, governments and all record-dependent industries. Imagine a banking industry where customer records do not survive a deceased customer, or an architect or aircraft designer whose documentation disappears before the final product of their work. Much was learned from a 2200-year-old map carved into panels of wood recently found in China. *See Over 2,200-Year-old Map Discovered in N/W China*, PEOPLE'S DAILY, Apr. 30, 2002, *available at* http://english.people.com.cn/200204/30/eng20020430_95013.shtml. It would be a shame if the very technology that enables the storage of vast volumes of data is the ultimate cause of the disappearance of "information age" historical records.

159. Government-imposed design standards are likely to create the greatest

standards yield the best implementations through marketplace competition.[160] For example, where the public interest objective in healthcare records is to ensure universal accessibility by healthcare providers and patients alike, it may be in the public interest that electronic medical records be maintained in a manner that allows for data exchange and access among all authorized healthcare providers and that the records be readily accessible in an electronic format to the patient. It may be appropriate for the government to mandate interoperability so that health care records can be exchanged in this manner. However, to specifically mandate that all records be maintained in a particular digital file format, preempting the market development of standards, may not be.[161]

There are circumstances wherein a government mandate of a specific implementation would be appropriate. These would be circumstances where a standard that is developed and adopted through voluntary, market-driven means needs a government "blessing" to provide for an enforcement mechanism. For example, once industry standards were set for high definition television, it was in the public interest that all televisions sold in the U.S. conform to those standards precisely, lest a consumer purchase a high-definition television without being certain that she will be able to receive and display high-definition channels broadcast in her locale or purchase a video camera with certainty that it will be compatible with other television equipment in her home. Therefore, it is incumbent on the FCC to incorporate into law requirements that all television equipment sold in the United States conform to specific standards.

Even in such circumstances, the government must still act cautiously to avoid ratifying or "blessing" a standard without corresponding ability for the standard to be updated, revised, or otherwise improved upon. In its *DTV Tuner Order*, the FCC demonstrated its willingness to update standards incorporated into its rules to reflect recent marketplace developments:

> We also acknowledge the likelihood that there will be further improvements made to the DTV standards over time and indeed, encourage ATSC and other interested parties to continue their work and efforts in these areas. In this regard, we reaffirm our intention to give significant weight to proposed changes that reflect the kind of broad industry consensus developed through ATSC's standards-making procedures. While it will be necessary to conduct rule making activity to incorporate such changes in the rules, we nonetheless will endeavor to pursue such rule making as quickly as possible, either through our periodic review of the DTV transition or through separate proceedings as

---

opportunity for "government failure," as they are hard to revise quickly, a necessary feature of standards deployed into the rapidly changing information technology landscape.

160. *See* Charles Wolf, Jr., *A Theory of Nonmarket Failure: Framework for Implementation Analysis,* 22 J.L. & ECON. 107, 112-32 (1979) (discussing the variety of ways in which nonmarket interventions raise costs that overwhelm the benefits sought).

161. This is another situation where it may well be that the market develops standards for data exchange that subsequently must be ratified (i.e., mandated) by government to provide for an enforcement mechanism.

may be appropriate.[162]

As I have described, in the cable TV plug-and-play context, the FCC, in the interest of encouraging competition and innovation, put CableLabs, a consortium created by the cable industry, in charge of making initial determinations regarding the use of new output or content protection technologies.[163] In fact, after significant controversy and additional FCC action, many sectors are represented in the CableLabs process[164] and the FCC reserved a greater role for the Commission, creating a process for FCC review ". . . when disputes arise. Any interested party, including but not limited to consumer electronics manufacturers, content providers, information technology companies or consumers, may appeal an initial decision by CableLabs to the Commission. CableLabs shall bear the burden of proof that its initial determination, whether an approval or disapproval, was justified."[165]

The FCC's effort to balance government intervention with marketplace innovation is also evident in the case of the FCC orders addressing the "broadcast flag" content protection technology. The "broadcast flag," a concept approved by the FCC in 2003, is itself a product of marketplace efforts. The initial development of what became the "ATSC flag system occurred in the Broadcast Protection Discussion Subgroup ('BPDG') under the auspices of the Copy Protection Technical Working Group ('CPTWG')," and "[f]rom November 2001 to June 2002, more than 80 representatives from the consumer electronics, information technology, motion picture, cable and broadcast industries took part in the BPDG discussions."[166] Rather than ratifying a specific design standard that was developed in BPDG (the proposed "5C standard" flag), the FCC adopted a performance standard that required devices follow the content-protection rules described by the "flag" on digital content.[167] Corresponding to the development of new products or the entry of new technologies or companies into the marketplace, the FCC periodically approves proprietary technologies that meet the performance requirements of respecting the broadcast flag coding.[168]

The government must reasonably tailor its intervention to address the

market failure and to meet the public interest objective. What constitutes reasonable is something that must be established on a case-by-case basis. However, an incremental and flexible approach as described above will minimize the degree of intervention and give government the ability to first work within the context of the market before overriding the market with a government mandate. In such cases where the government is acting in its capacity as market participant to encourage market behavior, it should do so as a rational participant, examining the business case in support of its market decisions and giving consideration to addressing both the specific public interest at issue and the general public interest responsibilities of the government. Government and industry should act in the first instance to assure adequate public-interest representation within the standards-setting process to potentially obviate the need for direct government intervention.

VII. THE TEST (PART FOUR): MITIGATE THE RISK OF "GOVERNMENT FAILURE"

Even taking an approach of incremental intervention, at each step, the government must consider the potential negative implications of government intervention. Thus, as a final element of the test, in any case where the government is considering intervening into standard-setting, the government must balance the benefit of the intervention against the risk of harm to the public interest and the marketplace should it chose to intervene. In intervening, it must do so in a manner to mitigate and minimize the risk of such harm. The "incremental intervention" approach will minimize the opportunity for harm while maximizing the opportunity for the market to work. Any government intervention must be taken with a close eye on encouraging the market, and failing that, emulating a working marketplace, rather than deviating excessively from the norms of the market.[169] As I have noted, government failure is a risk

169. For example, government should consider the intellectual property rights policies of standards-setting organizations and incorporate such policies into any intervention. *See, e.g.*, AM. NAT'L STANDARDS INST., ANSI ESSENTIAL REQUIREMENTS: DUE PROCESS REQUIREMENTS FOR AMERICAN NATIONAL STANDARDS 9 § 3.1.1 (2006), *available at* http://publicaa.ansi.org/sites/apdl/Documents/Standards%20Activities/American%20National%20Standards/Procedures,%20Guides,%20and%20Forms/ER0106.doc (stating that essential patent holders may indicate that a license will be made available to implementers either on a compensation-free basis or "under reasonable terms and conditions that are demonstrably free of any unfair discrimination"); ECMA, CODE OF CONDUCT IN PATENT MATTERS, § 1.2, *available at* http://www.ecma-international.org/memento/codeofconduct.htm ("A written statement from the patentee is required, according to which he is prepared to grant licenses on a reasonable, non-discriminatory basis."); ETSI INTELLECTUAL PROP. RIGHTS POLICY, 2, *available at* http://www.etsi.org/legal/documents/ETSI_IPRPolicy.pdf (stating that holders of essential IPR must be "prepared to grant irrevocable licenses on fair, reasonable and non-discriminatory terms and conditions under such IPR"); IEEE-SA STANDARDS BD. BYLAWS, *available at* http://standards.ieee.org/guides/bylaws/sect6-7.html#6

> (IEEE standards may include the known use of essential patents and patent applications provided the IEEE receives assurance from the patent holder or

whenever government intervenes in the market, but especially where there are highly technical, interrelated markets, such as in the case of standards setting. Before intervention, the government should examine the potential risk of non-market failure and proceed accordingly.

Should it choose to intervene, the government should mirror market behavior as closely as possible. Intervention should follow, to the greatest extent possible, the norms and guidelines of formal standards-setting organizations. There are many variations on standards-settings processes, even a substantial ongoing evolution. But even in this state of flux, fundamental norms are fairly well-defined, the benefits of working within the traditional processes and organizations are well-defined, and risks of working outside those processes and organizations are well-defined. To generalize briefly,

---

> applicant with respect to patents whose infringement is, or in the case of patent applications, potential future infringement the applicant asserts will be, unavoidable in a compliant implementation of either mandatory or optional portions of the standard [essential patents] . . . . This assurance shall be either (a) A general disclaimer to the effect that the patentee will not enforce any of its present or future patent(s) whose use would be required to implement either mandatory or optional portions of the proposed IEEE standard against any person or entity complying with the standard; or (b) A statement that a license for such implementation will be made available without compensation or under reasonable rates, with reasonable terms and conditions that are demonstrably free of any unfair discrimination. This assurance is irrevocable once submitted and accepted . . . .);

> (If the proposal is accepted on technical grounds, the originator shall ask any holder of such identified patent rights for a statement that the holder would be willing to negotiate worldwide licenses under his rights with applicants throughout the world on reasonable and non-discriminatory terms and conditions. Such negotiations are left to the parties concerned and are performed outside ISO and/or IEC.);

INT'L TELECOMM. UNION, COMMON PATENT POLICY FOR ITS-T/ITU-R/ISO/IEC, § 2.2, *available at* http://www.itu.int/ITU-T/dbase/patent/patent-policy.html ("The patent holder is willing to negotiate licenses with other parties on a non-discriminatory basis on reasonable terms and conditions. Such negotiations are left to the parties concerned and are performed outside the ITU-T/ITU-R/ISO/IEC."); OPEN MOBILE ALLIANCE, LICENSING DECLARATION 1, *available at* http://www.openmobilealliance.org/docs/Member_IPRGuidelines_v53006.pdf ("Upon disclosure of an Essential IPR, the Open Mobile Alliance shall ask the relevant Member to give a declaration that it will license such essential IPR in accordance with the Application Form (i.e. on fair, reasonable and non-discriminatory terms).").

standards-setting organizations adhere to the norms of transparency, openness (participation by all stakeholders), impartiality, rough consensus, voting or another means to identify consensus, a dispute resolution mechanism, avoidance of overlapping or conflicting standards, due process so all views are considered, provision of technical assistance to stakeholders that may not have adequate technical expertise, parties acting in good faith, and fair play. Government action should employ these same principles and processes to the greatest extent possible.

VIII. CONCLUSION

There should be reluctance on the part of government to intervene in the setting of information technology standards (and particularly to mandate a standard that has not been developed and/or widely adopted by the marketplace) because (1) the relevant industries are sophisticated in regard to standards-setting and have many well-developed types of standards, and forums in which to develop standards; (2) the U.S. government has a strong preference for market-developed information technology standards and promotes this preference as a matter of both domestic law and policy and foreign trade policy; (3) international trade agreements limit the degree to which participating governments can mandate standards; and (4) in contrast to the sophistication of the marketplace, the government is rarely as informed, sophisticated in its understanding of the market, or nimble enough to respond to market conditions. Therefore, the risk of government failure is significant, and indeed greatest where the market is young and dynamic, as is the case with regard to the current market affected by information technology standards.

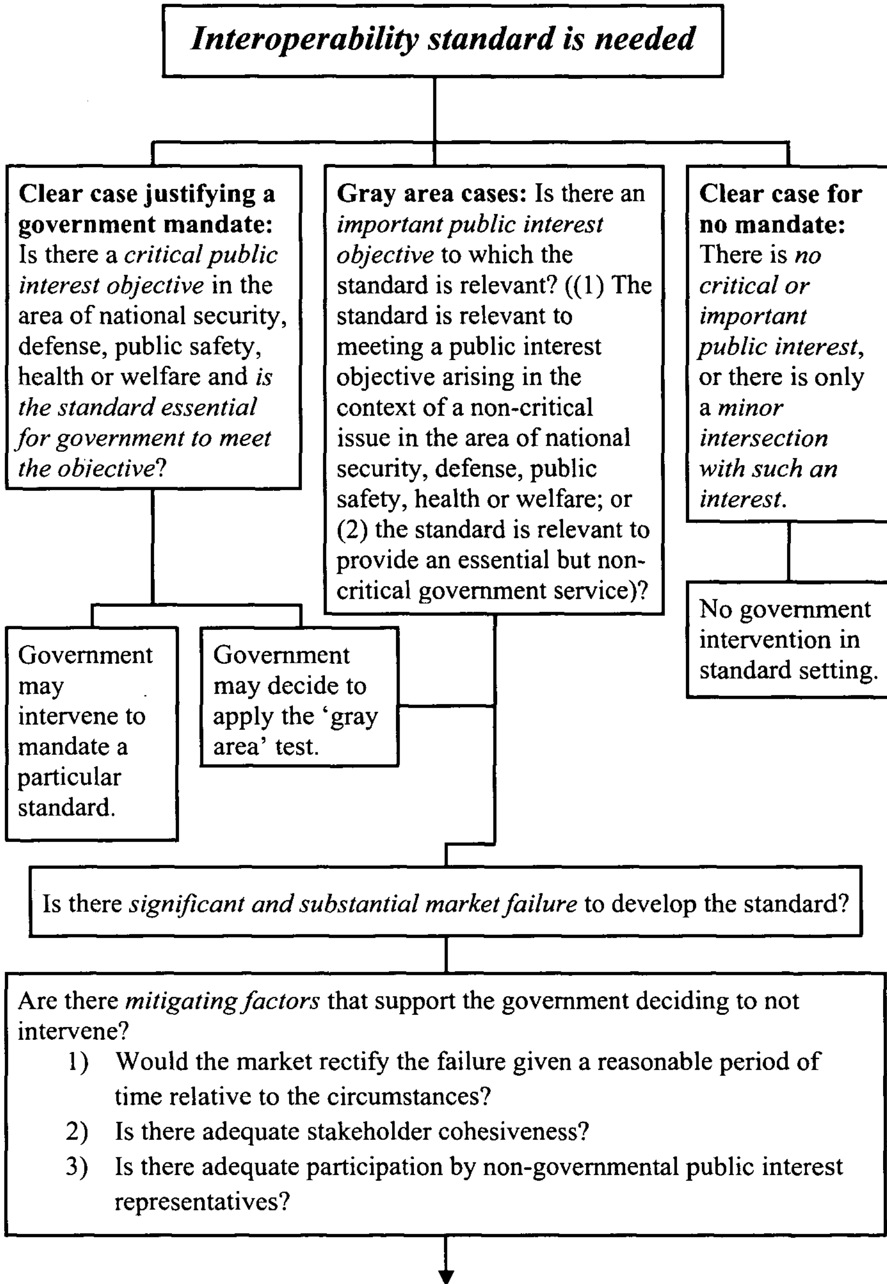
Should the government consider intervening, a substantial analysis should be undertaken. First, the government must determine the category that best characterizes the circumstances at hand. Clear cases for intervention are those in which there is a government responsibility to meet a critical public interest objective and the standard is essential for the government to meet that objective. "Gray area" cases are those in which the information technology standard is relevant to an important public interest objective. Finally, there are some cases that clearly do not present circumstances for government intervention. As to determining whether to intervene, clear cases warrant government intervention if such is needed to address the critical public interest. However, even in the circumstances described herein as a "clear case," the U.S. government, in compliance with federal law and policy would typically adopt a market-developed standard. Given this fact, further analysis, as described for "gray area" cases, may be warranted. In a "gray area" case, there must be a significant and substantial market failure before the government should intervene in the market to meet the important public interest objective. "Significant and substantial" means the market failure has to be proved a barrier to government action to address the important public interest objective.

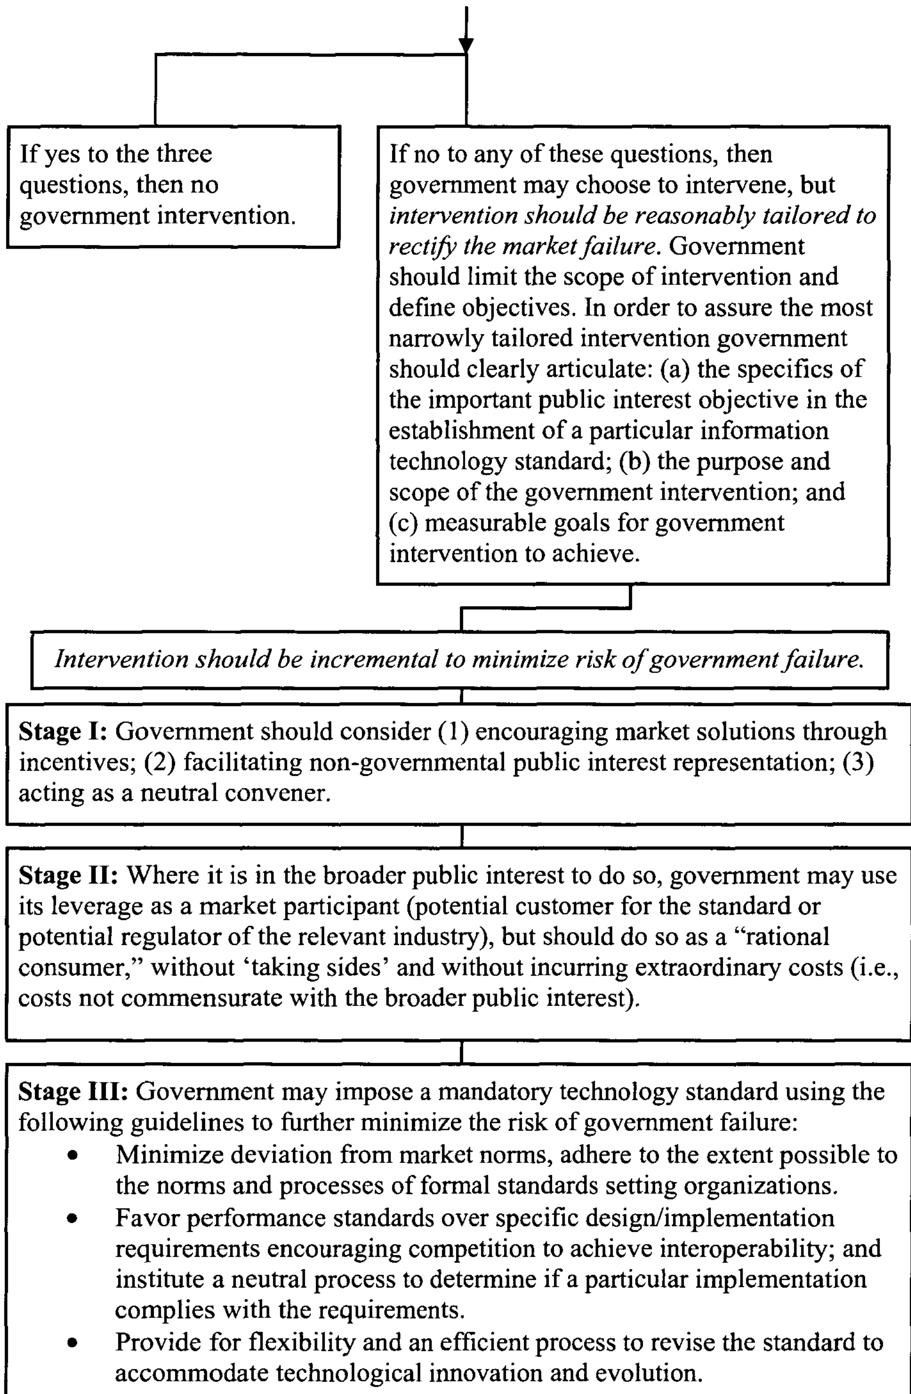
Before intervening, the government should consider mitigating factors, such as whether the market has had a reasonable time to develop the standard and whether stakeholders have adequate avenues for interchange, i.e., adequate forums to act in the specific situation. To minimize the need for direct government intervention in the first instance, government and industry should support credible, informed and engaged non-governmental public interest (i.e., consumer-oriented) representation. This could include financial, technical and organizational support.

Where a government decides to intervene, the intervention must be reasonably tailored to rectify the market's failure to develop a standard that would address the important public interest objective. In the interest of limiting intervention to the degree necessary, the government should intervene using incremental steps. The first step should be to encourage market behavior through incentives. As a second step, the government can use its leverage as a major market participant and potential regulator to influence market behavior; however, government should behave as a rational consumer, balancing the public interest at issue against the general public good. The government should consider at each stage of intervention how best to mitigate the risk of harm of "non-market" or "government failure." Finally, where government does intervene, intervention should reflect the market norms to the greatest extent possible.

In my examination of this topic, there have been very few circumstances that qualify as a potential significant and substantial market failure in the development of a new standard where the standard would be essential to the government's ability to meet its obligation to address a critical public interest objective, or where the standard would be relevant to an important public interest objective. Given the well-established premises I have outlined, there will be very few information technology standards-setting situations that will justify government intervention. Even under circumstances where there is a critical or important public interest objective at stake, once the government examines the role of the particular standard to that public interest objective, and the market behavior regarding the setting of the standard, the government will likely conclude that the circumstances do not call for government intervention. Even so, in light of the growth of the economic and social significance of standards, there will be many opportunities for government to consider its role in this context. But like the bazaar, government's role is typically to police the pickpockets and thieves, and not intervene in the transactions between merchant and customer.

APPENDIX





If yes to the three questions, then no government intervention.
If no to any of these questions, then government may choose to intervene, but *intervention should be reasonably tailored to rectify the market failure.* Government should limit the scope of intervention and define objectives. In order to assure the most narrowly tailored intervention government should clearly articulate: (a) the specifics of the important public interest objective in the establishment of a particular information technology standard; (b) the purpose and scope of the government intervention; and (c) measurable goals for government intervention to achieve.
Intervention should be incremental to minimize risk of government failure.
Stage I: Government should consider (1) encouraging market solutions through incentives; (2) facilitating non-governmental public interest representation; (3) acting as a neutral convener.
Stage II: Where it is in the broader public interest to do so, government may use its leverage as a market participant (potential customer for the standard or potential regulator of the relevant industry), but should do so as a "rational consumer," without 'taking sides' and without incurring extraordinary costs (i.e., costs not commensurate with the broader public interest).
Stage III: Government may impose a mandatory technology standard using the following guidelines to further minimize the risk of government failure:
• Minimize deviation from market norms, adhere to the extent possible to the norms and processes of formal standards setting organizations.
• Favor performance standards over specific design/implementation requirements encouraging competition to achieve interoperability; and institute a neutral process to determine if a particular implementation complies with the requirements.
• Provide for flexibility and an efficient process to revise the standard to accommodate technological innovation and evolution.

NAFTA Article 1105 and the Principles of International Economic Law

TODD WEILER*

Recognizing that it is common practice by international lawyers to cite the decisions of other international tribunals in support of their cases, this Article sets forth an analytical framework for doing so within the area of international economic law. For the purposes of the Article, international economic law is construed as the quasi-constitutional regulation of the actions of public authorities pursuant to obligations undertaken by States through treaty or custom. The Article explains how certain basic principles can be drawn from various sources of international economic law which would allow for different tribunals, interpreting similar provisions in different treaties, to arrive at a coherent conclusion. Using NAFTA Article 1105 as an example, the author demonstrates how this approach will provide clarity and certainty for the operation of what may seem to be amorphous treaty terms.

V. CONCLUSION 84

I. INTRODUCTION

Institutionalized dispute settlement has become a ubiquitous fixture of public international law, particularly within the realm of economic affairs. As the number of trade and investment treaty platforms has rapidly increased over the past forty years, the opportunities to gain access to institutionalized dispute settlement mechanisms have also increased. As the number of international economic law obligations has grown, observers have begun to note how convergence trends are emerging with respect to the adjudication of disputes that cross over treaty platforms.

The goal of this Article is to demonstrate how these convergence trends actually reveal the existence of a unified body of international economic law ("IEL") principles. These principles permit one to speak of IEL as a coherent set of norms, rather than a loosely associated set of treaty rules focused primarily on the regulation of trade in goods. By focusing on the substantive character of these principles, this Article explains how they should be used to inform interpretation of similar treaty provisions across different platforms, thereby encouraging coherence regardless of the economic activity being regulated (be it trade in goods, intellectual property, trade in services, or investment).

There is no better place to witness these convergence trends in substantive IEL than in investor-state arbitrations, which have become an increasingly common fact of economic and regulatory life within the three countries party to the North American Free Trade Agreement ("NAFTA"). This is partly because the same lawyers who have plied their trade in the General Agreement on Tariffs and Trade ("GATT") have found a new venue for the expression of the same legal principles in NAFTA arbitrations. The new venue can be found in arbitral processes that have been the mainstay of international

commercial arbitration for many decades. These processes have been made available to foreign investors because of a unilateral promise made by each NAFTA Party, in NAFTA Article 1122, to arbitrate disputes relating to investors and investments in their respective territories.

Part II of this Article explains how IEL principles should be identified, employing the inductive approach developed four decades ago by Professor Georg Schwarzenberger. Part III looks to WTO law to demonstrate how such principles can indeed be found in the IEL context. Finally, the Article explains how these principles can be used so that the jurisprudence of NAFTA investor-state arbitration remains within the mainstream of international economic law and contributes to its purposive development. NAFTA Article 1105, which requires the NAFTA governments to provide foreign investments with "treatment in accordance with international law,"[1] provides the subject-matter for this exercise.

II. METHODOLOGY

A. *International Economic Law*

There are probably as many definitions of international economic law as there are commentators on it. Ignaz Seidl-Hohenveldern has noted that, in its widest meaning, IEL refers to any rules of public international law which directly concern economic exchanges between the subjects of international law. A more narrow approach would consider IEL to be a mere subset of public international law norms that relate to economic issues. Perhaps because the meaning of the term "economic" is itself so indeterminate, Seidl-Hohenveldern prefers the broader approach, and would include within IEL what some refer to as the modern law merchant (the *lex mercatoria*), even though it essentially represents a form of customary international law amongst non-state actors that regulates their transactions. He would also include the regulation of contracts between individuals and sovereigns, as well as what he refers to as "transnational economic law"— i.e., conflict of laws rules

1. North American Free Trade Agreement, Dec. 17, 1992, U.S.–Can.–Mex., art. 1105, 32 I.L.M. 289, 639 [hereinafter NAFTA].

emanating from the domestic level.[2]

Writing four decades ago, Schwarzenberger considered IEL to be a branch of public international law that was "concerned with the ownership and exploitation of natural resources, production and distribution of goods, invisible international transactions of an economic or financial character, currency and finance, related services," and the actors engaged in such activity.[3] More recently, Jeff Atik has embraced a similar definition, but added international competition law, intellectual property law, and development law to the mix. In fact, Atik has gone even further by suggesting that IEL theory should embrace interdisciplinary approaches and critiques, and concern itself with issues such as "the distribution of wealth and justice and with the preservation of culture, the environment and peace."[4]

Frieder Roessler appears to have avoided defining IEL altogether by focusing instead on three normative models that provide a structure for the "international economic system."[5] Roessler's interdisciplinary approach is also shared by Asif Qureshi, who seems to embrace a very broad definition of IEL—one that encompasses any branch of international or domestic law which is concerned with economic phenomena of international concern.[6]

Much like Schwarzenberger, Joel Trachtman starts with the proposition that IEL is a branch of public international law. He does so, however, in order to focus upon the constitutional character of IEL norms, noting that IEL "provides the functional basis for a new era of international constitutionalization."[7] In Trachtman's view, IEL is an

6. ASIF QURESHI, INTERNATIONAL ECONOMIC LAW 5–8 (1999).

7. Joel P. Trachtman, *The International Economic Law Revolution*, 17 U. PA. J. INT'L ECON. L. 33, 49 (1996). He provides an additional definition of IEL from Jackson: "This phrase can cover a very broad inventory of subjects: embracing the law of economic transactions; government regulation of economic matters; and related legal relations including litigation and international institutions for economic relations." John H. Jackson, *International Economic Law: Reflections on the "Boilerroom" of International Relations*, 10 AM U.J. INT'L L. & POL'Y 595, 596 (1995). Trachtman also provides a broader definition from Petersmann:

> [IEL] presents itself as a conglomerate of private law (including 'law merchant' and 'transnational commercial law'), state law (including 'conflict of laws') and public international law (including supranational integration law as in the EEC)

instrumentality of public international law and depends upon this basis for its constitutional character. Unlike international business law, which Trachtman uses to describe the wider class of norms included by many under the rubric of "international economic law," IEL is composed of sets of norms that are essentially employed to effectively regulate the regulator. Accordingly, the underpinnings of public international law are helpful in that they represent the discourse through which states have long surrendered some element of their sovereign discretion in exchange for whatever collective benefit can be derived by a similar surrender by other states.

However, the character of IEL obligations differs from those of public international law. IEL normally involves the protection of individual rights and/or interests, vis-à-vis actions of the state. States agree (expressly or tacitly) to refrain from exercising their sovereignty in a manner that would be prejudicial to these individual interests because they expect to derive collective benefits from these protections. IEL can thus be seen as firmly grounded in public international law, albeit with a focus on protection of individual rights and interests, which is qualitatively different from many other public international law obligations.[8]

This Article adopts the narrower, more "constitutional," conception of IEL by defining it as that which conditions the exercise of sovereign authority as it affects the economic activities of state and non-state actors, particularly the latter. For the purposes of this Article, IEL obligations are those international rules that are aimed at the protection of individual economic interests. These obligations do not encompass rules that only indirectly affect individual economic interests or that are aimed at the protection or promotion of other interests, such as the closely related areas of international environmental or international labor law.

> with a bewildering array of multilateral and bilateral treaties, executive agreements, 'secondary law' enacted by international organizations, 'gentlemen's agreements' central bank arrangements, declarations of principles, resolutions, recommendations, customary law, general principles of law, de facto-orders, parliamentary acts, governments decrees, judicial decisions, private contracts or commercial usages.

Ernst-Ulrich Petersmann, *International Economic Theory and International Economic Law: On the Tasks of a Legal Theory of International Economic Order*, *in* THE STRUCTURE AND PROCESS OF INTERNATIONAL LAW: ESSAYS IN LEGAL PHILOSOPHY DOCTRINE AND THEORY 227, 251 (R. St. J. MacDonald & Douglas M. Johnston eds., 1983).

8. This is not to say that there are not other fields of public international law possessing obligations designed to protect individual rights and interests. International human rights law, including international labor law, is similarly situated with IEL within the broader field of public international law.

The primary instrument of IEL is the treaty, particularly multi- and bilateral trade and investment protection treaties. These instruments are both the primary source of substantive IEL obligations and the exclusive means through which any IEL obligations, whether derived from treaty or another source of law, such as custom, can be vindicated. Vindication is achieved through recourse to institutionalized dispute settlement.

As Professor Joseph Weiler has recently observed, it would appear that there is "a convergence trend" between various IEL treaty regimes, such as the treaties of the European Union, the WTO, and the NAFTA. Apart from the institutional characteristics which these regimes share (along with their notable differences), Weiler builds a case for the existence of these convergence trends on the level of substantive norms. He suggests that at some point, it may be possible to speak of a "common law of international trade."[9]

As stated above, this Article attempts to show how international economic law can be considered as a coherent body of law, united by a set of shared principles. While this Article focuses on the substantive principles, procedural principles, including those found in evidentiary rules and the conduct of the arbitration, could similarly be applied by various tribunals in conducting the dispute before them.

B. IEL Principles

Schwarzenberger taught that legal principles are "abstractions and generalizations from legal rules or individual cases."[10] Professor Bin Cheng has taught that a legal principle is expressive of a general truth that can be used to guide one's actions, contrasted against legal rules, which are essentially more targeted, practical, and binding.[11] Precisely because they exist at a more general level of abstraction, Qureshi only devotes a paragraph of his book to the subject of IEL principles, concluding that, while their time may one day come, there is simply too much potential "latitude" inherent in their use. Such latitude, Qureshi believes, would provide an IEL tribunal with so

11. BIN CHENG, GENERAL PRINCIPLES OF LAW 24 (1987).

much discretion as to be too readily "prone to abuse."[12]

However, there is a significant difference between the international legal principles of which Schwarzenberger and Cheng have written and the general principles of international law mentioned by Qureshi. The latter are of a different character, and serve a different role, than the former. Qureshi's principles are a source of law, as recalled in Article 38(1) of the Statute of the International Court of Justice ("ICJ Statute"). The principles discussed by Schwarzenberger and Cheng are not sources of law. Rather, they are abstractions from sources of law.

Article 38(1) of the ICJ Statute is the starting point for any analysis of the sources of international law. It provides:

> The Court, whose function is to decide in accordance with international law such disputes as are submitted to it, shall apply:
>
> (a) international conventions, whether general or particular, establishing rules expressly recognized by the contesting States;
>
> (b) international custom, as evidence of a general practice accepted as law;
>
> (c) the general principles of law recognized by civilised nations;
>
> subject to Article 59, judicial decisions and the teachings of the most highly qualified publicists of the various nations, as subsidiary means for the determination of rules of law.[13]

Article 38(1) not only specifies the applicable law in disputes adjudicated before the International Court of Justice ("ICJ"), but is generally considered to be an authoritative statement as to the applicable sources of international law to be used in the resolution of any international dispute, unless the parties to the dispute have specified otherwise.[14]

---

12. Qureshi finds support for his position in the work of Ignaz Seidl-Hohenveldern and Georg Schwarzenberger. *See* SEIDL-HOHENVELDERN, *supra* note 2, at 36; GEORG SCHWARZENBERGER, THE FRONTIERS OF INTERNATIONAL LAW (1962). However, as we shall see, a closer reading of Schwarzenberger tells a different tale.

13. Statute of the International Court of Justice, June 26, 1945, art. 38, 59 Stat. 1055, T.S. No. 993, 3 Bevans 1179.

14. *Id.* For example, as Article 38(2) provides, the parties may agree to have their

Some commentators regard the general principles of law, which are referred to in Article 38(1)(c), as a subsidiary source of international law. This is because such principles exist in the abstract and, accordingly, have not been explicitly relied upon by international tribunals.[15] Such thinking explains why Qureshi devotes so little time to the question. Cheng, however, cautions that Article 38(1)(c) was never intended to provide tribunals with specific rules formulated for practical purposes. Instead, it was intended to permit the ICJ to consider general propositions that underlie various rules and thus, "express the essential qualities of juridical truth itself, in short of law."[16] Cheng also notes that the drafters of the ICJ Statute expressly considered and rejected language that would have imposed any hierarchy on the three primary sources of law.[17]

The principles of Article 38(1)(c) also enjoy certain advantages over other primary sources of law. Any determination of custom requires both proof of intent by a sufficient number of states to be bound by rules, and a sufficient demonstration of general practice supporting such beliefs by those states. In contrast, there is no requirement to demonstrate that any general practice of states exists for the determination of general principles of law. The importance of recognizing such a norm lies not within its legal character implied in international usage, but in the existence of certain fundamental principles that are intrinsically legal in character.[18]

While there are notable dissenters,[19] most commentators acknowledge that tribunals can identify general principles of law, either by conducting a comparative analysis of a representative sample of domestic legal systems or by recourse to international law and practice.[20] Cheng appears to have embraced both approaches, and Cherif Bassiouni notes that the ICJ has done so as well, by drawing on a wide array of international law instruments and techniques in the

---

dispute decided on a more general standard of what they apprehend to be just and fair under the circumstances (i.e., on an *ex aequo et bono* basis).

15. GENNADII MIKHAILOVICH DANILENKO, LAW-MAKING IN THE INTERNATIONAL COMMUNITY 181–85 (1993).

16. CHENG, *supra* note 11, at 24.

17. *Id.* at 20. Accordingly, Cheng concludes that the order in which the three principles appear merely reflects the normal process of thought employed by a decision-maker; however, the three can certainly be considered simultaneously.

18. *Id.* at 23–24.

19. DANILENKO, *supra* note 15, at 186–87. Danilenko seems to dismiss the practice as a "new approach" that is nothing short of an excuse to engage in an international version of judicial activism.

20. M. Cherif Bassiouni, *A Functional Approach to "General Principles of International Law,"* 11 MICH. J. INT'L L. 768, 769 (1990).

process.[21]

Once one determines that the general principles of law do exist on an equal—albeit different—footing with treaty and custom, and once one determines the acceptable methods for articulating their existence, one must still find a role for their application. Qureshi correctly concludes that not much of a role exists in the IEL context. Regardless of whether their role is that of a mere interpretative aid,[22] or as the bedrock norms of international law (and thus their constitutional superstructure), the role of the general principles of international law in any given IEL dispute is likely to be less significant than that of treaty rules or customary international law rules.

A crucial distinction needs to be drawn, however, between the existence and role of "IEL principles," and the existence and role of the general principles of international law in IEL disputes. Principles, as understood by Schwarzenberger, are "abstractions or generalizations from the products of one or several law-creating processes (or 'formal' sources) of international law which are enumerated in Article 38(1)(a)-(c) of the Statute of the World Court."[23] He accordingly taught that legal principles could be abstracted from any of the primary sources of international law, including the more fundamental principles referred to in Article 38(1).

In other words, IEL principles can be based upon custom, treaty, *or* the fundamental general principles of law contained within Article 38(1)(c). They may also be evidenced in the subsidiary sources of international law, the writings of distinguished scholars, and the findings of international tribunals. In order for legal principles to be relevant to any given controversy, they must be abstracted from a relevant source of international law. For example, Schwarzenberger noted that for a legal principle to be relevant to the international lawyer, or to the resolution of an international dispute, it must bear the "hallmark" of one of the three law-creating processes

21. *Id.* at 789.

> 'General Principles' have been identified [by the ICJ and the Permanent Court of International Justice] by examining State conduct, policies, practices, and pronouncements at the international level, which may be different from domestic legal principles. Thus, States' foreign policies, bilateral and multilateral treaties, international pronouncements, collective declarations, writings of scholars, international case law, and international customs, even where unperfected, are valid areas of inquiry from which to determine the existence of 'principles' within the international context.

22. *See id.* at 775; CHENG, *supra* note 11, at 4–5.

23. SCHWARZENBERGER, *supra* note 10, at 73–74.

memorialized in Article 38(1) of the ICJ Statute.[24] Nevertheless, it was also clear to Schwarzenberger that the term "source of law" was merely a metaphor used to encapsulate the basic elements of international law. The practice of the subjects of international law as evidenced through treaty and custom, the decisions of international tribunals, and doctrine, are what practically form the means for the determination of rules of international law.[25] It is from the products of these various law-determining agencies that the primordial matter of IEL principles, i.e., the three "sources of international law," is actually derived.

Regardless of whether one is referring to the principles of IEL or to the general principles of international law, it is fair to say that, because of their level of abstraction, their role in dispute settlement differs from that of a more precise legal rule, such as a treaty obligation. The roles of a principle are to fill the lacunae that exist between more determinative rules and to assist the decision-maker in interpreting more particularized rules properly. The general principles of international law perform these functions as a complement to the application of customary international law,[26] particularly in the absence of a governing treaty rule. IEL principles perform only the latter function because the vast majority of IEL disputes involve the interpretation and application of discrete treaty rules.

IEL principles are best understood as being based upon a mixture of doctrine, judicial decisions, and state practice, as well as being representative of the doctrine to be applied by a tribunal in the instant case. The extent to which any given tribunal may rely upon IEL principles will depend upon the degree to which the area of law in question can be considered more or less "organized." Schwarzenberger observed that when international society is characterized by a lack of systematic organization, tribunals will be less likely to base their decisions on doctrine, as opposed to a strict interpretation of the obligations in question. Alternatively, tribunals will tend to act more "boldly" within the context of an organized legal order because the very fact that a dispute had been submitted to them under such circumstances is "positive evidence of the confidence inspired by the dispute settlement body as a living repository of *lex*

24. *Id.* at 50.

25. *Id.* at 44. Schwarzenberger refers to the creation of these practical sources of law as "law determining agencies."

26. Christopher A. Ford, *Judicial Discretion in International Jurisprudence: Article 38(1)(c) and "General Principles of Law,"* 5 DUKE J. COMP. & INT'L L. 35, 63 (1994).

lata."[27]

Of course, such confidence can be fleeting. Schwarzenberger warned that if international tribunals "show too pronounced a tendency to depart from the appointed task of applying international law, and indulge in the deduction of rules from questionable principles of international law, they risk that States will fight even shyer than they have done in the past of submitting disputes to their decision."[28]

Tribunals have referred to these fundamental principles for centuries. They have thus enunciated legal rules which were relevant to each dispute, but often already latent in the firmament of international law. In other words, they were not "new." The drafters of the ICJ Statute deliberately empowered the Court to "develop and refine the principles of international jurisprudence."[29] As Cheng explained, states "did not intend to add to the armory of the international judge a new adjunct to existing international law,"[30] however, for decades the ICJ has followed an approach to Article 38 under which fundamental principles play an important part in enunciating the applicable legal rules, even if they are not always expressly recognized for their service.[31]

But what of the use of IEL principles? Unlike the general principles of law, IEL principles cannot be used as a substantive source of "new" or even "latent" legal rules. They are restricted exclusively to an interpretative role, to be used in the identification of appropriate legal doctrine which will aid tribunals in interpreting the treaty text. With IEL principles restricted to an interpretative role, there is less potential that their use will generate the kind of consternation described above, although some risk undoubtedly still remains. Such consternation can nonetheless remain when tribunals are seen, usually by the unsuccessful parties in a dispute, as having

27. SCHWARZENBERGER, *supra* note 10, at 66. Schwarzenberger was writing at a time when the institutional role of arbitral panels was in its relative infancy in the field of international economic law. Thus, he was primarily referring to the confidence inspired by the ICJ, as opposed to the plethora of international tribunals operating today. For a list of active international tribunals, visit http://www.pict-pcti.org (last visited Oct. 20, 2003).

28. *Id.* at 74–75.

29. IAN BROWNLIE, PRINCIPLES OF PUBLIC INTERNATIONAL LAW 16 (1998).

30. CHENG, *supra* note 11, at 19.

31. IAN BROWNLIE, THE RULE OF LAW IN INTERNATIONAL AFFAIRS 23 (1998). Bassiouni notes that in the *Chorzow Factory* and *SS Lotus* cases, the PCIJ relied upon both international practice and past international tribunal decisions to identify fundamental principles of law from which it then derived rules that were applied in the cases before it. Bassiouni, *supra* note 20, at 794.

overstepped the bounds of their authority in relying upon a concept that cannot "clearly," or perhaps strictly, be found in the text before them. In such cases, it will undoubtedly be claimed that the tribunal, at the very least, failed to execute its duties by improperly relying on a rule of precedent or, worse yet, created an obligation that simply did not exist.

One example of this phenomenon was the award of a NAFTA tribunal chaired by Sir Eli Lauterpacht, which noted the existence and applicability of the principle of transparency in a dispute between Mexico and an American investor, Metalclad Corporation.[32] NAFTA Article 102(1) sets out the objectives of NAFTA "as elaborated more specifically through its principles and rules, including national treatment, most favored nation ("MFN") treatment and transparency."[33] Recalling a litany of procedural flaws in the process which eventually led to the loss of Metalclad's investment, the tribunal concluded that Mexico had failed to meet its NAFTA Article 1105 obligation to provide "treatment in accordance with international law, including fair and equitable treatment . . . ."[34] Thus, the tribunal stated:

> Mexico failed to ensure a transparent and predictable framework for Metalclad's business planning and investment. The totality of these circumstances demonstrates a lack of orderly process and timely disposition in relation to an investor of a Party acting in the expectation that it would be treated fairly and justly in accordance with the NAFTA.[35]

Lawyers for the governments of Mexico and Canada were able to convince a local Vancouver judge that the *Metalclad* tribunal exceeded its jurisdiction in concluding that an utter lack of transparency can constitute a breach of "fair and equitable treatment," as the term is understood in international law.[36] They were able to do so despite the explicit reference to the transparency principle as an

interpretative device in NAFTA Article 102(1) and the fact that great deference was supposed to be shown to expert tribunals under the applicable arbitration review statute.[37] The *Metalclad* review thus stands as a cautionary tale about the dangers of a tribunal being seen as applying principles, rather than treaty rules, even though the local judge was wrong in substituting his uninformed opinion for that of the tribunal.[38]

Schwarzenberger also cautioned that his inductive approach to international law, upon which this theory of IEL principles is based, was not intended to establish a "cult of precedent" in international law.[39] He suggested only that both diplomats and the ICJ had been known to observe past practice whenever appropriate, and that Article 38(1)(d) of the ICJ Statute certified that the past decisions of international tribunals were a part of the law-determining process. In this regard he is joined by Sir Kenneth Keith, who has observed that Article 59 of the ICJ Statute (which provides that "the decision of the Court has no binding force except between the parties and in respect of that particular case"[40]) was never intended to affect the value of earlier cases as authoritative statements of law.[41]

Provisions similar to Article 59 of the ICJ Statute exist in numerous IEL treaty platforms. For example, NAFTA Article 1136 provides that "an award made by a Tribunal shall have no binding force except between the disputing parties in respect of the particular case."[42] To date, NAFTA tribunals have made frequent reference to previous awards, but have never indicated that previous awards were binding as a matter of legal precedent.[43] Similarly, in the WTO

context, the Appellate Body has stated that the reasoning contained within previously adopted WTO panel and Appellate Body reports is not binding upon future panels, and has made explicit reference to Article 59 of the ICJ Statute by analogy.[44]

Of course, a previous panel report may be useful or relevant, even if it is not legally binding upon future panels. In fact, the Appellate Body has clarified that past reports cannot be disregarded by future panels because they generate "legitimate expectations" among WTO members, as well as individual economic actors, concerning how WTO obligations will be interpreted in the future.[45] The significance of the Appellate Body's approach to past decisions has been chronicled extensively by Raj Bhala, who has observed that this informal rule of precedent is consistently observed by WTO panels and the Appellate Body.[46] David Palmeter and Petros Mavroidis have reached a similar conclusion, noting that the WTO experience mirrors that which has been ongoing in the ICJ for decades, in which panels will never "lightly" consider reversing statements of law contained within previous decisions.[47]

As Palmeter and Mavroidis note, continuity and consistency are essential elements of any legal system.[48] This is especially true for an international dispute settlement body whose decisions may not enjoy the benefit of the same kinds of enforcement mechanisms that are available for domestic courts and tribunals. The legitimacy of a tribunal, and of the treaty regime through which it gains jurisdiction to resolve any given dispute, rests heavily upon the quality of its decision-making process. Accordingly, it should not be surprising that most international tribunals have developed rules of informal precedent, under which both substantive and procedural law doctrines can flourish.

In this regard, Seidl-Hohenveldern has voiced disagreement with the ICJ for its conclusion in the *Barcelona Traction* case that

arbitral jurisprudence could be considered a subsidiary source of law under Article 38(1)(d) of the Statute of the ICJ.[49] A majority of the Court determined that because past arbitral awards were normally based upon each tribunal's interpretation of specific treaty provisions before them, their reasoning could not be considered in future cases. Seidl-Hohenveldern concludes that the same objections could be raised against the ICJ itself or any international tribunal. The more appropriate approach is to determine whether, in any given case, the teachings of a past case are relevant and analogous to the present case. This prescription is even more appropriate for the field of IEL, in which the basic obligations contained within most treaty platforms, such as national treatment and MFN treatment, are substantially similar, and in which multiple tribunals are responsible for repeated applications of the same kinds of treaty provisions.

C. *The Inductive Approach*

The first task in adopting an inductive approach to IEL is to identify the kinds of adjudicators upon whose reasons doctrine should be based. Schwarzenberger wrote that the value of any law-determining mechanism must be based upon objective and intrinsic criteria. He suggested that partiality makes for bad law, myopia makes for bad law, and the degree of skill and technical expertise of the decision-maker matters. Accordingly, Schwarzenberger concluded that the reasoning of an independent, impartial, and tenured adjudicator is to be valued over that of an ad hoc arbitrator whose appointment is measured by less strict standards of independence and impartiality. He notes that an adjudicator's reasons for a decision in one area of law may not be as useful when analogized to another context; he also acknowledges that in cases in which the adjudicator is possessed of a particular expertise, her reasons for decision are also to be valued more highly than those of an arbitrator with a lesser reputation or lacking in experience.[50]

Schwarzenberger advised that "the less these criteria are fulfilled in the case of any particular court or tribunal, the more humbled must be its place in the hierarchy inside its own group."[51] Based upon these considerations, he found that the ICJ and the

49. SEIDL-HOHENVELDERN, *supra* note 2, at 34, citing Barcelona Traction, Light & Power Co. (Belg. v. Spain), 1970 I.C.J. 3, at 40 (Feb. 5).

50. SCHWARZENBERGER, *supra* note 10, at 22–23.

51. *Id.* at 23.

Permanent Court of International Justice ("PCIJ") have "pride of place" in the hierarchy of the adjudicatory international law-determining agencies. Judges were (and are) impartial and independent, and have enjoyed long tenures. ICJ judges operate at the highest of technical standards and possess the greatest level of experience. By contrast, Schwarzenberger posited that ad hoc mixed-claim tribunals would be comparably inferior in terms of the value of their public international law decisions.[52]

However, Schwarzenberger wrote at a time when IEL dispute settlement was in its relative infancy. He also considered what kinds of adjudicators were best suited to generate international law doctrine, rather than a more specific body of law such as IEL. Using his criteria, one can readily appreciate that the WTO Appellate Body has achieved "pride of place" within the field of IEL. It is the only standing tribunal, and it is composed of expert judges and supporting legal staff. The appointment of Appellate Body members is regulated by strict rules that ensure relative independence and impartiality.[53] Finally, the Appellate Body is responsible for the adjudication of a vast array of international trade rules, as well as investment obligations covering the fields of intellectual property and the provision of services. Accordingly, it is possible to consider the Appellate Body as the "Supreme Court" of IEL, in terms of the quality of its decisions (rather than in terms of *stare decisis*).

Given that most other IEL tribunals are established on an ad hoc basis, they cannot possess the same degree of legitimacy as the WTO Appellate Body. However, most treaty-based IEL tribunals are regulated by procedurally fair standards which ensure impartiality and independence, and these tribunals are called upon to consider similar, if not functionally identical, obligations. They are often staffed by academics and practitioners of the highest quality and expertise. Accordingly, their reasons for decision may still be useful in articulating IEL principles.

Having identified the appropriate law-determining agencies (and keeping in mind that treaties themselves are also evidence of law-determining agencies), it is possible to identify the main task of inductive analysis. It is a constant and unremitting process of evaluation and re-evaluation of legal principles. These principles are

---

52. *Id.*

53. *See* Understanding on Rules and Procedures Governing the Settlement of Disputes, Apr. 15, 1994, Marrakesh Agreement Establishing the World Trade Organization, Annex 2, LEGAL INSTRUMENTS—RESULTS OF THE URUGUAY ROUND, vol. 31, 33 I.L.M. 112 (1994) [hereinafter DSU].

articulated and refined by reference to the ever-growing body of material provided by a rapidly increasing number of law-determining agencies.[54]

Even though he was only writing in the shadow of the GATT Kennedy Round, Schwarzenberger identified IEL as one of the areas which held the most promise for application of his inductive approach to particular fields of international law. At a time before the WTO or the NAFTA, he envisaged that an inductive analysis could uncover "a series of optional principles of considerable theoretical significance and practical importance."[55]

Schwarzenberger also appears to have considered some of the dangers inherent in an improper adoption of an inductive approach. First, he was concerned that an inductive approach to international law would be based upon the norms found within a domestic legal system. He considered these legal orders to be "incomparably stronger," with more depth and diversification than could be found on the international plane.[56] For example, while some of the basic norms contained within the European Community's system of laws may be similar, if not identical, to those contained within the WTO or NAFTA context, its level of depth and sophistication is far beyond that of IEL legal orders, and one should accordingly be extremely careful about deriving IEL principles from it.[57]

Schwarzenberger also provided what he clearly considered to be an important caveat for those interested in putting his inductive analysis to use. International lawyers, he wrote, must only be concerned with the evidence for any asserted principle. If the evidence exists, the principle must be laid out in its entirety. If it does not exist, the alleged principle must be rejected. "Aggressive descriptions are no proof of the non-existence of a legal principle, and laudatory epithets no substitute for evidence."[58] Lawyers must accordingly "move behind the law and cannot pretend to lead it."[59] This does not mean that they cannot engage in mapping out the future for the field, merely that a healthy dose of circumspection must be

54. SCHWARZENBERGER, *supra* note 10, at 23.

55. *Id.* at 55. Schwarzenberger identified such would-be principles as "optional" in contrast to the fundamental principles of Article 38(1)(c), which are of a mandatory nature.

56. *Id.* at 137–38.

57. As Joseph Weiler notes, the European legal order is of a far more constitutional character, having moved beyond the creation of a customs union, and is much less a free trade zone or liberalized trade and investment regime.

58. SCHWARZENBERGER, *supra* note 10, at 84.

59. *Id.* at 40.

added to any attempt to apply an inductive analysis to the field of international law.

There is also the lingering concern that even if principles are identified in a sufficiently conservative manner, they might be applied by tribunals in a less than circumspect manner. The following guidelines can be found in the work of the International Law Commission. They appear equally appropriate for any IEL principles derived from application of the inductive method:

> Their suitability for use in any given case hinges on a variety of considerations which have first to be appreciated by the interpreter of the document; the particular arrangement of the words and sentences, their relation to each other and to other parts of the document, the general nature and subject matter of the document, the circumstances in which it was drawn up, etc. Even when a possible occasion for their application may appear to exist, their application is not automatic but depends on the conviction of the interpreter that it is appropriate in the particular circumstances of the case. In other words, recourse to many of these principles is discretionary rather than obligatory and the interpretation of documents is to some extent an art, not an exact science.[60]

Another concern dealt with the relative dearth of international adjudication, which would be required to provide the raw fuel for Schwarzenberger's analysis. His reply was that whether a sufficient number of tribunals exist could not detract from the quality of the approach itself. Moreover, he appeared to anticipate that there would come a time when states would be willing to surrender more of their sovereign discretion, in return for the mutual benefits of international cooperation.[61] Forty years later, states have repeatedly agreed to that bargain, resulting in the establishments of numerous IEL treaty platforms and their respective dispute resolution mechanisms. The time is accordingly ripe to take the inductive approach out for a "test drive."

Before testing the inductive approach by extracting principles from the law-determining agencies of IEL, it is necessary to explain how IEL principles can be used in particular IEL contexts. This

Article focuses first on the WTO regime, by providing examples of how principles can be extracted and applied. Second, it considers the mixed-claim process, including the NAFTA.

III. APPLYING THE INDUCTIVE APPROACH

A. *WTO Law and its Interpretation*

The WTO Appellate Body has proved itself to be particularly concerned about the development of doctrine and the relationship of that doctrine to the wider system of public international law. With its very first decision, *U.S.—Reformulated Gasoline*, it announced that the WTO Agreement was "not to be read in clinical isolation from public international law."[62] Former Appellate Body Judge Ehlermann has noted that "the significance of this statement can hardly be overestimated . . ." and that "the true importance of the interrelationship between the WTO Agreements and public international law will become apparent . . ." only when certain special questions of substantive law, particularly those relating to state responsibility, arise.[63]

Shortly after announcing that a connection exists between public international law and WTO law, the Appellate Body made known its apparently abiding concern about the state of the GATT "*acquis*," in *Japan—Alcohol.*[64] The expression "*acquis*" may be more familiar to European Community lawyers than common lawyers. Essentially, the GATT *acquis*, which is but a part of the larger WTO *acquis*, is the regime of law which underpins the decisions of its law-determining agencies. The WTO *acquis* is not the "common law of world trade," although it clearly bears a close relationship to the methodology of doctrinal development which would normally be associated with the development of the common law. In fact, the Appellate Body's first mention of the *acquis* was a qualifying statement intended to authoritatively confirm that the reports issued by previous GATT and WTO panels, and the Appellate

Body, were not binding precedent, even if adopted by all GATT members (prior to the establishment of the WTO) or by all WTO members through their participation in the WTO Dispute Settlement Body. Rather, past reports were acknowledged as being "an important part of the GATT *acquis*," which generate "legitimate expectations" about the resolution of future disputes and may be considered by future panels.

It seems that the primary purpose for which the expressions GATT and WTO *acquis* have been coined by the Appellate Body was for the development of doctrine. The Appellate Body has thus far made reference to the WTO *acquis* on five occasions. In *U.S.—Shrimp*, the Appellate Body made reference to its initial statement concerning the WTO *acquis* in *U.S.—Reformulated Gasoline*. The Panel in *U.S.—Reformulated Gasoline* considered whether the United States had complied with its original report and recommendations, as modified by the Appellate Body, and "relied" upon the report of the Appellate Body to make its findings. The Appellate Body concluded that the Panel "was right to use it, and right to rely on it."[65] It stated that the Panel was obliged to consider the Appellate Body's views because they were issued in overruling the original panel and, "more important . . . [they were] . . . intended to provide interpretative guidance for future panels."[66] Clearly, the Appellate Body has drawn a very fine line between the binding nature of previous reports and their doctrinal value, particularly in cases where the previous report emanated from the Appellate Body itself.

In *U.S.—Antidumping Act of 1916*, the Appellate Body went so far as to state that a body of "case law" had indeed developed under the GATT and the WTO, permitting a panel to consider and rule upon a measure relating to commerce, which had been enacted, but not yet applied, and which would affect the rights of another member state. The Appellate Body referred to this practice as forming part of the GATT *acquis*, "which, under Article XVI:1 of the *WTO Agreement*, provides guidance to the WTO and therefore, to panels and the Appellate Body."[67] This is an example of the Appellate Body tacitly approving the development of doctrine within the WTO system.

65. WTO Appellate Body Report: *Gasoline, supra* note 62.

66. WTO Appellate Body Report: United States—Import Prohibition of Certain Shrimp and Shrimp Products, Recourse to Article 21.5 of the DSU by Malaysia, WT/DS58/AB/RW, paras. 107–08 (Oct. 22, 2001).

67. WTO Appellate Body Report: United States—Anti-Dumping Act of 1916, WT/DS136/AB/R, WT/DS162/AB/R, para. 61 (Aug. 28, 2000).

The Appellate Body has also taken the opportunity to pass upon a case where, in its opinion, a Panel incorrectly dipped into one stream of jurisprudence that apparently runs through the WTO *acquis*. In *India—Patents II*, the Appellate Body faulted a Panel for incorrectly articulating what the panel referred to as "a well established GATT principle."[68] While some might see the Appellate Body's repudiation of the Panel's reasoning as indicative of a discomfort with the explicit development of WTO doctrine, a closer look at its reasoning suggests that the Appellate Body's concern was with the quality of the Panel's analysis, rather than the fact that it engaged in such an exercise. The Panel had concluded that the "protection of legitimate expectations of Members regarding the conditions of competition is a well-established GATT principle."[69] The Appellate Body disagreed with this conclusion because it was seen as the merging, and confusion, of two separate concepts which *could* be drawn from past decisions. The preservation of the conditions of competition is a market-access concept related to the principle of nondiscrimination. The protection of legitimate expectations is derived from the principle of good faith and arises out of the jurisprudence of non-violation complaints. While the Appellate Body did not use the appropriate principles in identifying these two separate concepts, it gave no indication that it disapproved of the panel's approach—only the quality of its analysis. It stated:

> Article 64.1 of the TRIPS Agreement incorporates by reference Article XXIII of the GATT 1994 as the general dispute settlement provision governing the TRIPS Agreement. Thus, we have no quarrel in principle with the notion that past GATT practice with respect to Article XXIII is pertinent to interpretation of the TRIPS Agreement. However, such interpretation must show proper appreciation of the different bases for action under Article XXIII.[70]

Thus, the Appellate Body can be seen as having endorsed a doctrinal process which not only permits panels to rely upon past practice, but may even require them to consider the relevance of past Appellate Body reports. It permits them to identify rules of conduct based upon this past practice, and to do so across the various sub-

agreements of the WTO—e.g., where GATT practice can inform interpretation and application of the TRIPS Agreement. It even grounds this approach to the WTO *acquis* in the customary international law rules of interpretation,[71] as codified in the Vienna Convention on the Law of Treaties ("VCLT"),[72] which is the approach that appears to have been universally applied in the GATT, WTO, and other IEL tribunals.

B. *The WTO Appellate Body's Approach and the Inductive Approach*

The aforementioned approach is both commendable and understandable, given the tasks assigned to the law-determining agencies of the WTO. In their role as interpreters of the WTO texts, panels and the Appellate Body are obliged to consider the entire *corpus* of WTO obligations as a whole and in a coherent manner.[73] The inductive approach developed by Schwarzenberger overlays the Appellate Body's response to this obligation. As the case law grows and becomes more complex, it will become necessary for adjudicators to employ explicitly an inductive approach to the articulation of principles that can be extracted from it.

The IEL principles drawn from individual cases can naturally be used to inform interpretation of similar treaty text lying within different sections of the WTO Agreements. Building upon this established pattern, one of the most useful applications of the inductive approach will be in consideration of new obligations governing different forms of economic activity, other than trade in goods. For example, the Appellate Body has already chided a panel for attempting to apply a "goods analysis" to the MFN obligation contained within Article II of the General Agreement on Trade in Services ("GATS").[74] However, the Appellate Body did not complete

74. WTO Appellate Body Report: Canada—Certain Measures Affecting the Automotive Industry, WT/DS139/AB/R, WT/DS142/AB/R, paras. 181–84 (May 31, 2000) [hereinafter WTO Appellate Body Report: *Automotive Industry*]. The Appellate Body refers to this obligation as being grounded in the fundamental international law principle of

the analysis and accordingly, the WTO legal community must continue to wait for its first "true" nondiscrimination case in the investment/services context. Ehlermann has also identified the related question of how to treat measures which are touched upon by overlapping WTO obligations as one of the most challenging interpretative issues with which future panels will be faced.[75]

Ehlermann notes that critics of the Appellate Body's recourse to public international law in interpretation of the WTO texts will indicate that one should not have recourse to legal principles (fundamental or otherwise) because they are simply too vague and imprecise. However, the same can often be said of the treaty text. A principled approach grounds the interpretative exercise in the logic of continuity and consistency. Accordingly, while he says that WTO adjudicators will need to be careful not to exceed their jurisdiction in employing such methods, they would likely be forced to turn to them even if they were not explicitly authorized to do so.[76]

The jurisdiction of WTO panels, and of the Appellate Body, to settle disputes which arise between member states, can be found in Articles 3.2, 11 and 19.1 of the WTO Dispute Settlement Understanding ("DSU"), which provide:

> Article 3.2:
>
> The dispute settlement system of the WTO is a central element in providing security and predictability to the multilateral trading system. The Members recognize that it serves to preserve the rights and obligations of Members under the covered agreements, and to clarify the existing provisions of those agreements in accordance with customary rules of interpretation of public international law. Recommendations and rulings of the DSB cannot add to or diminish the rights and obligations provided in the covered agreements.[77]
>
> Article 11:
>
> The function of panels is to assist the DSB in

---

effectiveness, as well as in Articles 3.2, 7 and 19.2 of the DSU.

75. Ehlermann, *supra* note 63, at 630.

76. *Id.* at 618.

77. For greater certainty, this admonition is repeated in Article 19.2, which provides: "In accordance with paragraph 2 of Article 3, in their findings and recommendations, the panel and Appellate Body cannot add to or diminish the rights and obligations provided in the covered agreements."

> discharging its responsibilities under this Understanding and the covered agreements. Accordingly, a panel should make an objective assessment of the matter before it, including an objective assessment of the facts of the case and the applicability of and conformity with the relevant covered agreements, and make such other findings as will assist the DSB in making the recommendations or in giving the rulings provided for in the covered agreements. Panels should consult regularly with the parties to the dispute and give them adequate opportunity to develop a mutually satisfactory solution.
>
> Article 19.1:
>
> Where a panel or the Appellate Body concludes that a measure is inconsistent with a covered agreement, it shall recommend that the Member concerned bring the measure into conformity with that agreement. In addition to its recommendations, the panel or Appellate Body may suggest ways in which the Member concerned could implement the recommendations.[78]

Numerous commentators have correctly noted that these provisions constitute a limited grant of authority for WTO adjudicators to interpret and apply the WTO text.[79] WTO panels and the Appellate Body have been explicitly directed to make recommendations concerning the conformity of member states with the obligations contained within the covered agreements. For greater certainty, they have been admonished twice not to engage in a process of adjudication that might "add to or diminish" the rights and obligations contained within those agreements.

Article 11 of the DSU also focuses adjudicators on the task of undertaking the necessary analysis to assist member states in resolving how the covered agreements apply to the conduct in question. Schoenbaum suggests that because Article 11 also authorizes panels and the Appellate Body, to "make such other

78. DSU, *supra* note 53, arts. 3.2, 11, 19.1.

79. *See, e.g.*, Gabrielle Marceau, *A Call for Coherence in International Law: Praises for the Prohibition Against "Clinical Isolation" in WTO Dispute Settlement*, 33 J. WORLD TRADE 87, 110 (1999); Joel P. Trachtman, *The Domain of WTO Dispute Resolution*, 40 HARV. INT'L L.J. 333, 342 (1999).

findings as will assist the [Dispute Settlement Body ("DSB")]," they are accordingly invested with some kind of residual or implied authority to consult and apply other international instruments as they deem necessary.[80] Pauwelyn supports this approach, suggesting that the applicable international law, unlike an adjudicator's jurisdiction, is not limited under these provisions.[81] Bartels arrives at a similar conclusion by construing Articles 3.2 and 19.2 as mere "conflict rules" that would apply only in cases of direct conflict between international law obligations and WTO obligations.[82]

These arguments do not recognize the general principles of international law as being fundamental in an overriding sense. However, while they are certainly important, and there is a place for their application in interpretation of the WTO texts, there is simply no support in the text of the DSU or in the WTO *acquis* for these propositions. The Appellate Body's reference to public international law in *Japan—Alcohol* was made within the context of its interpretative role under DSU Article 3.2, not Article 11. As Marceau suggests, the role of the phrase "make other findings" is simply to permit the adjudicator to make whatever findings of fact are necessary to properly execute its task.[83]

Marceau's approach to dealing with what are essentially the meta-constitutional arguments of those who would require WTO adjudicators to interpret and apply all international law obligations, rather than only those which appear in the covered agreements, is to characterize the WTO regime as a *lex specialis*, i.e., a self-contained regime.[84] As a self-contained regime, Marceau contends that the WTO would fall outside of the customary rules of state responsibility. This invocation of the concept of a self-contained regime is compelling, but it may go too far. When Marceau states that such

82. Lorand Bartels, *Applicable Law in WTO Dispute Settlement Proceedings*, 35 J. WORLD TRADE 499, 505–09 (2001). An example of such a conflict can be found in WTO Panel Report: Canada—Patent Protection of Pharmaceutical Products, WT/DS114/R, para. 4.38 (Mar. 17, 2000). In that case, the Panel rejected Canada's argument that the NAFTA provisions governing the length of patent terms in any way impacted its interpretation of Article 30 of the TRIPS Agreement.

83. Marceau, *supra* note 73, at 763–64. This would include making findings of fact concerning the existence and relevance of other treaties, not to be applied in favor of WTO obligations, but only to be construed in order to properly apply them. Marceau also disputes the arguments made by Schoenbaum, Bartels and Pauwelyn. *Id.* at 767, 776–77.

84. *Id.* at 756, 766–72.

regimes have "specific rights and obligations that provide for effective remedies in the case of their violation,"[85] one might accordingly consider the WTO to be something more like a closed regime, instead of one which has limited access points. Instead of drawing this conclusion, one should save the *lex specialis* analysis for the compliance structure of the WTO, rather than the substantive and procedural norms it shares with so many other IEL sources.

Accordingly, the only means through which public international law and IEL principles should concern WTO adjudicators is through the application of the customary rules of interpretation under public international law. These rules are received into the WTO solely for the purpose of interpreting a WTO provision in accordance with the express wording of DSU Article 3.2. The WTO Appellate Body has unequivocally stated on numerous occasions that it regards Articles 31 and 32 of the VCLT to be a codification of the applicable rules of customary international law.

VCLT Article 31 is to be applied first, with the subsidiary tools of Article 32 to be employed if the application of Article 31 results in textual ambiguity or absurdity.[86] Article 31 provides:

> 1. A treaty shall be interpreted in good faith in accordance with the ordinary meaning to be given to the terms of the treaty in their context and in the light of its object and purpose.
>
> 2. The context for the purpose of the interpretation of a treaty shall comprise, in addition to the text, including its preamble and annexes:
>
>   (a) any agreement relating to the treaty which was made between all the parties in connexion with the conclusion of the treaty;
>
>   (b) any instrument which was made by one or more parties in connexion with the conclusion of the treaty and accepted by the other parties as an instrument related to the treaty.
>
> 3. There shall be taken into account together with the context:

85. *Id.* at 774.

86. *See* WTO Appellate Body Report: *Gasoline, supra* note 62, at 17; WTO Appellate Body Report: *Alcoholic Beverages, supra* note 44, at 10.

(a) any subsequent agreement between the parties regarding the interpretation of the treaty or the application of its provisions;

(b) any subsequent practice in the application of the treaty which establishes the agreement of the parties regarding its interpretation;

(c) any relevant rules of international law applicable in the relations between the parties.

4. A special meaning shall be given to a term if it is established that the parties so intended.[87]

It should be stressed that while Article 31 contains a laundry list of tools for the interpretation of treaty text, rarely will a tribunal make explicit reference to all of them in deciding a case. In fact, the Appellate Body itself has frequently been attacked for its heavy reliance on literal, textual analyses.[88] Nonetheless, there have been numerous occasions when reliance has been placed on other sources of international law for the interpretation of WTO texts, including the GATT *acquis*. The route for invocation of these sources of law is VCLT Article 31(3)(c).[89] Numerous WTO member states have argued as much, typically for the extraction of relevant rules from applicable international treaties.[90] This approach has been endorsed by Marceau, Howse, and Pauwelyn.

Marceau states that any international law obligations, such as those contained within treaties governing environmental or human rights law, can be considered by a WTO Panel or the Appellate Body using Article 31(3)(c). However, she stresses that such consideration would only be undertaken "to the extent necessary to interpret the covered agreements and to assess compliance with WTO law."[91]

---

87. VCLT, *supra* note 72, 1155 U.N.T.S. at 340.

88. Ehlermann has acknowledged an attempt to defend against these attacks, but the perception remains that the Oxford English Dictionary is all too often the favorite legal source of Appellate Body members. *See* Ehlermann, *supra* note 63, at 615, 638.

89. Marceau considers VCLT Article 31(3)(b) to be the route for reception of other treaties between groups of member states, but it is not clear that such undertakings constitute "subsequent practice" in relation to the "WTO," rather than the independent, unrelated practice of such members. *See* Marceau, *supra* note 73, at 782.

90. *See* WTO Panel Report: United States—Import Prohibition of Certain Shrimp and Shrimp Products, WT/DS58/R (May 15, 1998) [hereinafter WTO Panel Report: *Shrimp*]; *see also* WTO Panel Report: European Communities—Measures Affecting Importation of Certain Poultry Products, WT/DS69/R (Mar. 12, 1998).

91. Marceau, *supra* note 73, at 784.

Pauwelyn acknowledges as much, but asserts that the role of public international law extends deeper into the WTO context. While this approach fails to acknowledge the basic jurisdictional limitations of WTO dispute settlement, it nonetheless recognizes that the relevant "international law" in question is broader than just treaty law.[92]

While implicitly acknowledging the jurisdictional limitations borne by WTO adjudicators, Howse also recognizes the breadth of the applicable "international law" under Article 31(3)(c). In criticizing a WTO Panel for not availing itself of the relevant rules which may be drawn from the applicable international law on hand, he stresses that the "applicable" international law in any given case is that which contains "relevant" rules. This includes rules that can be abstracted from international "soft law."[93] It should also include IEL principles that can be abstracted from the work of law-determining agencies.

In order to maintain intellectual consistency, it would always be useful to explain from which source of "international law" the relevant principles are drawn. The three primary sources of law, as identified in the ICJ Statute, are treaties, customary international law, and the general principles of law. A fourth source of international law is "soft law." While not on par with the primary sources of international law, it nonetheless may provide the material from which principles or rules can be abstracted. IEL principles are derived primarily from the substance of relevant IEL treaties and the jurisprudence of IEL tribunals, although they may also be derived from fundamental principles such as good faith.

To date, there have been five types of principles or general rules to which the WTO Appellate Body and panels have had recourse. Occasionally, reference has been made to Article 3.2 of the DSU and Article 31(3)(c) of the VCLT, but more frequently the connection has been implicit. These types of principles or rules are: (1) interpretative rules; (2) procedural principles; (3) substantive principles; (4) rules specific to the GATT/WTO *acquis*; and (5) IEL principles.

WTO panels and the Appellate Body have made frequent recourse to interpretative principles previously employed in other public international law contexts. Palmeter and Mavroidis note that

92. Pauwelyn, *supra* note 81, at 543.

93. Robert Howse, *The Canadian Generic Medicines Panel: A Dangerous Precedent in Dangerous Times* 3 J. WORLD INTELL. PROP. 493, 504 (2000). Soft law is not really law at all. Rather, it is the "primordial goo" of international law. It can be found in the non-binding declarations of states and international organizations, or in non-binding codes which nonetheless possess a normative element. Soft law is not a source of law, but can be relied upon as evidence to establish the existence of custom or general principles of law.

the principle that an exception to a general rule should be interpreted narrowly has been utilized several times by GATT panels, but rejected more recently by the Appellate Body in *EC—Hormones*.[94] Another panel has considered the applicability of the presumption against the retroactive effect of treaties, contained within VCLT Article 28,[95] while other panels have applied the interpretative principle, stating that a treaty provision should be construed in a manner which avoids conflicts between it and another treaty provision.[96]

Marceau records how numerous procedural principles have been applied by panels and the Appellate Body that have their source in customary international law and practice as well as the general principles of international law.[97] For example, in concluding that private counsel could make submissions on behalf of member states, the Appellate Body made reference to the absence of any prohibition on such activity before other public international law adjudicatory bodies or in customary international law.[98] It also adopted the fundamental principle that the burden of proof rests on the party which asserts a claim or defense for use in the WTO context.[99]

Marceau also notes that in *Brazil—Desiccated Coconut*, the Appellate Body recalled the fundamental principle of due process in explaining the significance of the terms of reference set out for panels under DSU Article 11.[100] Another example of the Appellate Body's

98. *See* WTO Panel Report: European Communities—Regime for the Importation, Sale and Distribution of Bananas, WT/DS27/R/USA (May 22, 1997) [hereinafter WTO Panel Report: *Bananas*].

99. *See* WTO Appellate Body Report: United States—Measures Affecting Woven Wool Shirts and Blouses from India, WT/DS33/AB/R, 14 (Apr. 25, 1997). The Appellate Body adopts an abbreviated comparative approach to the articulation of this particular principle such that it can fairly be regarded as a general principle of law under Article 38(1) of the ICJ Statute. *See* Statute of the International Court of Justice, *supra* note 13, 38(1), 59 Stat. 1055, T.S. No. 993, 3 Bevans 1179.

100. WTO Appellate Body Report: Brazil—Measures Affecting Desiccated Coconut,

recourse to the practice of international tribunals can be found in *Canada—Aircraft*, in which it noted that WTO panels, much like permanent and ad hoc international tribunals, have the authority to draw an adverse factual inference when evidence, which rests exclusively within the hands of one party, is not surrendered at the request of another.[101]

In addition to procedural principles, GATT and WTO panels have also considered the application of substantive principles, such as *estoppel*.[102] The principle of *res judicata* has also been considered by four panels, including one WTO Panel which was asked by India to dismiss a claim that it argued was already determinatively addressed by a previous WTO panel. The panel devoted considerable attention to the issue and ultimately determined that it had the authority to consider and apply the principle in its interpretation of the relevant texts, although it concluded that the principle did not apply in the particular case before it.[103] The Appellate Body has also made reference to the customary international law rules on state responsibility on two separate occasions, in order to interpret and apply a principle of proportionality in the imposition of countermeasures within the context of interpreting Article 5 of the WTO Safeguards Agreement.[104]

As indicated earlier, the WTO Appellate Body has also identified principles from the GATT *acquis* from which rules have been extracted. The first such principle is that of effectiveness. Although this principle is derived from the general approach to interpretation recalled in VCLT Article 31(1), it is nonetheless a hallmark of the Appellate Body's approach to interpretation and thus,

a fundamental element of the WTO *acquis*.[105]

In another case, Guatemala claimed that there existed a rule of international law which had allegedly been accepted by previous GATT panels and would accordingly have formed part of the GATT *acquis*. The claim was considered by the Panel under the rubric of VCLT Article 31(3)(c), but the Panel ultimately rejected it as being unsupported in customary international law and unadopted in the GATT *acquis*.[106] The alleged principle was "harmless error," which would have precluded a finding of noncompliance with Article 5.5 of the Antidumping Agreement because of the likelihood that the matter was of an extremely minor character and caused no harm.[107]

Numerous panels and the Appellate Body have also considered and applied one of the basic principles of IEL—the principle of good faith. The IEL principle of good faith is grounded in all three of the primary sources of international law, as well as the secondary sources identified in Article 38(1)(d) of the ICJ Statute. The IEL principle is more discrete than the general principle of law upon which it is based, and the method of refining it is executed through recourse to more specific IEL treaty provisions and jurisprudence.

WTO adjudicators have provided ample fodder for such an exercise. The Appellate Body has remarked that GATT Article XX is a manifestation of the principle of good faith. It has made similar remarks about other WTO provisions,[108] and it has reached the same conclusion about Article 3.1 of the DSU.[109] In *U.S.—Shrimp*, the Appellate Body explained the significance of good faith as a relevant WTO principle in the following manner:

> The chapeau of Article XX is, in fact, but one expression of the principle of good faith. This principle, at once a general principle of law and a general principle of international law, controls the

105. The principle was first enunciated in WTO Appellate Body Report: *Alcoholic Beverages, supra* note 44, at 23 and, most recently, in WTO Appellate Body Report: European Communities—Trade Description of Sardines, WT/DS231/AB/R, 212 (Sept. 26, 2002).

> exercise of rights by states. One application of this general principle, the application widely known as the doctrine of *abus de droit*, prohibits the abusive exercise of a state's rights and enjoins that whenever the assertion of a right 'impinges on the field covered by [a] treaty obligation, it must be exercised bona fide, that is to say, reasonably.' An abusive exercise by a Member of its own treaty right thus results in a breach of the treaty rights of the other Members and, as well, a violation of the treaty obligation of the Member so acting. Having said this, our task here is to interpret the language of the chapeau, seeking additional interpretative guidance, as appropriate, from the general principles of international law.[110]

Another panel has also considered Article 7 of the TRIPS Agreement as an embodiment of the good faith principle, [111] while yet another has considered application of the principle in interpretation of Article 5.4 of the Antidumping Agreement and Article 11.4 of the Subsidies and Countervailing Measures Agreement.[112] Still another panel has considered the principle of good faith within the context of a nullification and impairment claim under Article 26 of the DSU.[113] Finally, a Panel has even applied teachings from the principle of good faith in application of Article 21.5 of the DSU.[114]

This extensive amount of jurisprudence on the principle of good faith demonstrates that it is widely considered to be a principle of the WTO *acquis*. This jurisprudence can also provide significant guidance as to how it can be employed in other IEL contexts. However, before the principle can be employed in other contexts, it must be demonstrated that other IEL adjudicators are capable of receiving and making use of it in a manner similar to WTO adjudicators.

C. *Application to the Work of NAFTA and Mixed-Claim Tribunals*

While the WTO deserves particular attention as the first-among-equals of IEL, it is but one of many regimes from which it could be said that the greater "IEL *acquis*" is drawn. The WTO regime holds pride of place because of the incredible amount of jurisprudence that it is producing, as well as for the institutional quality of its standing Appellate Body. There are a number of other multilateral trade and investment regimes, however, which deserve further consideration. The NAFTA has generated some trade panel jurisprudence, including one case addressing the MFN treatment standard in the services and investment areas, an issue that arguably has yet to transpire in the WTO context.[115]

More significantly, the NAFTA has also acted as the catalyst for an explosion of investment claims. These claims have been brought under investor-state dispute settlement mechanisms, but many have involved a fusion of legal arguments based upon both international trade and investment jurisprudence. This explosion is not limited to the NAFTA. Over the past few years, the International Centre for the Settlement of Investment Disputes at the World Bank ("ICSID") has seen a torrent of new claims made under Bilateral Investment Treaties ("BITs").[116]

In order for these various kinds of adjudicators to also take part in the iterative process that contributes to the formation and the subsequent application of IEL principles, they must have sufficient jurisdiction under their respective regimes. This jurisdiction is often explicitly set out in the relevant treaty. For example, the NAFTA provides:

> Article 102(2):
>
> The Parties shall interpret and apply the provisions of this Agreement in the light of its objectives set out in paragraph 1 and in accordance with the applicable rules of international law. . . .

115. United States—In the Matter of Cross Border Trucking Services, USA–MEX–98–2008–01 (Feb. 6, 2001), *available at* http://www.sice.oas.org/DISPUTE/nafta/english/U98081ae.asp [hereinafter *Cross Border Trucking*].

116. The ICSID is responsible for the administration of two sets of arbitral rules under which disputes arising from both BIT claims and contracts between states and individuals are arbitrated. The disputes are adjudicated through ad hoc arbitrations conducted by arbitrators appointed either by the disputants or by the ICSID.

Article 1131(1)(A):

> Tribunals established under this Section shall decide the issues in dispute in accordance with this Agreement and applicable rules of international law.[117]

NAFTA panels and investment tribunals have consistently determined that the "applicable rules of international law" are the customary international law rules of treaty interpretation, which have been codified in Articles 31 and 32 of the VCLT.[118] Similar language can be found in numerous other BITs and bilateral trade treaties,[119] and there does not appear to be a single decision by any international trade panel or international investment tribunal that contradicts the VCLT approach adopted by the NAFTA and WTO adjudicators.

Article V of the Claims Settlement Declaration for the Iran-U.S. Claims Tribunal, which has produced a significant jurisprudence on both procedural and substantive IEL issues, provided this Tribunal with discretion to apply "such choice of law rules and principles of commercial and international law as the Tribunal determines to be applicable."[120] Mapp has noted that by virtue of Article V, and the "international nature" of the Tribunal, whenever there was an issue related to state responsibility, the governing law was necessarily international law.[121]

John Collier and Vaughan Lowe report that recourse to "general principles of law" or the "general principles of international law" is commonly provided for in contracts between individuals and sovereigns, at times in combination with recourse to the relevant domestic law.[122] Christstopher Schreuer adds that, regardless of whether the contract or treaty is silent as to choice of law or provides a mixed choice of law clause, tribunals have inevitably employed the

117. NAFTA, *supra* note 1, arts. 102, 1131, 32 I.L.M. at 297, 645.

118. *See, e.g.*, *Cross Border Trucking*, *supra* note 115, para. 221 (including reference to VCLT Art. 31(3)(c)); *see also* Ethyl Corp. v. Canada, Award on Jurisdiction, para. 61, (June 24, 1998), (NAFTA/UNCITRAL), *reprinted in* 38 I.L.M. 708, para. 51 (1999).

119. Similar provisions can also be found in various international agreements, including the Energy Charter Treaty, Dec. 17, 1994, art. 26, 1994 O.J. (L 380) 24, 40, 34 I.L.M. 381, 400, and the Agreement on the Promotion and Protection of Investments, Jan. 25, 1995, Austl.-Phil., art. 12(9), 1995 Austl. T.S. No. 28, which provides that "generally recognized principles of international law" shall be used in interpretation of the treaty text.

120. Iran-United States Claims Tribunal, Claims Settlement Agreement, 20 I.L.M. 230 (1981).

121. WAYNE MAPP, THE IRAN-UNITED STATES CLAIMS TRIBUNAL: THE FIRST TEN YEARS, 1981–1991, at 113 (1993).

122. JOHN COLLIER & VAUGHAN LOWE, THE SETTLEMENT OF DISPUTES IN INTERNATIONAL LAW: INSTITUTIONS AND PROCEDURES 244–45 (1999).

customary international law rules of interpretation and substantive international law principles when rendering their awards.[123] In fact, he goes as far as to suggest that international law principles can find their way into a tribunal's deliberations even when the contract or *compromis* contains a clause which purports to oust international law from being applicable to any given dispute.[124]

Article 42 of the ICSID Convention sets out the governing law for any tribunal, which is necessary given that the choice of law is not always set out in the contract or *compromis*. It provides:

> (1) The Tribunal shall decide a dispute in accordance with such rules of law as may be agreed by the parties. In the absence of such agreement, the Tribunal shall apply the law of the Contracting State party to the dispute (including its rules on the conflict of laws) and such rules of international law as may be applicable.
>
> (2) The Tribunal may not bring in a finding of *non liquet* on the ground of silence or obscurity of the law.
>
> (3) The provisions of paragraphs (1) and (2) shall not prejudice the power of the Tribunal to decide a dispute *ex aequo et bono* if the parties so agree.[125]

Sir Eli Lauterpacht has remarked that tribunals hearing investor-state disputes are often called upon to dispose of matters on the basis of the applicable rules of international law, rather than domestic rules.[126] Others have agreed, although they have not gone so far as to suggest that substantive international law should "trump" domestic law in the event of a conflict between them.[127] Nonetheless, a more recent tribunal, of which Sir Eli Lauterpacht was a member, has concluded that "international law must prevail" to the extent that

125. Convention on the Settlement of Investment Disputes Between States and Nationals of Other States, *opened for signature*, Mar. 18, 1965, 17 U.S.T. 1270, 575 U.N.T.S. 159 (entered into force Oct. 14, 1996) [hereinafter ICSID Convention].

126. Elihu Lauterpacht, *International Law and Private Foreign Investment*, 4 IND. J. GLOBAL LEGAL STUD. 259, 272 (1997).

127. Okezie Chukwumerije, *International Law and Article 42 of the ICSID Convention*, 14 J. INT'L ARB. 79, 95–101 (1997); Ibrahim F.I. Shihata & Antonio R. Parra, *Applicable Substantive Law in Disputes Between States and Private Parties: The Case of Arbitration Under the ICSID Convention*, 9 ICSID REV.-FOREIGN INVEST. L.J. 183, 191–95 (1994).

there may be some inconsistency between applicable domestic and international norms.[128]

Relying on the negotiating history of the ICSID Convention, Schreuer concludes that the "applicable international law" was intended by its drafters to mean the relevant principles and rules to be derived from Article 38(1) of the Statute of the ICJ, with "allowance being made for the fact that Article 38 was designed to apply to interstate disputes."[129] Such "international law" could obviously be derived from the fundamental principles of international law set out in Article 38(1)(c),[130] customary international law, or "the large and rapidly growing numbers of BITs and multilateral treaties dealing with investment . . . ."[131] Of course, any such principles or rules would obviously play only an interpretative role when specific treaty standards were in dispute. In their absence, however, such rules would arguably remain relevant as substantive norms to be applied to the specific facts of the case at hand.

With Article 42(1) of the ICSID Convention, the drafters hopefully understood that allowances might need to be made for the fact that Article 38(1) was intended for application to disputes between states. In this respect, ICSID scholar Christopher Schreuer has suggested that the applicable rules of international law, such as the VCLT, may need to be "adjusted" when applied to the interpretation of a contract between a state and an individual.[132]

Schreuer is correct, but not only with respect to contracts between states and individuals. The disputes that arise under such contracts are as likely to be governed by international commercial law principles which will find their own grounding in the fundamental principles of law and international custom. It is likely that this condition is of particular relevance in the context of disputes arising out of investment protection treaties in which the right is enjoyed by an individual, but its vindication is only possible through an

131. *Id.* at 610–11.

132. *Id.* at 618–19.

agreement between states. This agreement provides for the States' consent to arbitration with that individual.

Given that it is not clear that those who drafted the VCLT intended their work for application to treaties bestowing rights upon individuals, it would appear that IEL treaty interpreters must be careful not to allow themselves to adopt an approach which is too narrow or "Statist" (by implicitly acknowledging too high a degree of primacy to the role of the State in international law and politics today). In other words, their interpretations should take into account the teachings of Breton Woods and Uruguay more so than those of Westphalia. This includes being careful about using VCLT Article 31 to interpret obligations that have a particular nexus to individual rights granted, or interests protected, under that treaty. The project of identifying IEL obligations demonstrates that there are a certain set of universal principles which govern state practice for the benefit of individuals. These IEL principles can be put to use within the Article 31 paradigm, in order to ensure that the special nexus between the state and the individual is respected at all times.

Within the context of BITs and multilateral investment protection regimes such as Chapter 11 of the NAFTA and Article 26 of the Energy Charter Treaty, individuals enjoy a catalogue of rights that protect their commercial interests, as well as a direct mechanism to vindicate them. Within the WTO context, however, there is no direct right of vindication. However, it has been said that individual actors enjoy the "indirect effect" of WTO obligations. As noted in the seminal decision of the Panel in *U.S.—Section 301*:

> 7.75 Providing security and predictability to the multilateral trading system is another central object and purpose of the system which could be instrumental to achieving the broad objectives of the Preamble. Of all WTO disciplines, the DSU is one of the most important instruments to protect the security and predictability of the multilateral trading system and through it that of the marketplace and its different operators. DSU provisions must, thus, be interpreted in the light of this object and purpose and in a manner which would most effectively enhance it. In this respect we are referring not only to preambular language but also to positive law provisions in the DSU itself. Article 3.2 of the DSU provides:
>
> > The dispute settlement system of the WTO is a central element in providing security and

> predictability to the multilateral trading system. The Members recognize that it serves to preserve the rights and obligations of Members under the covered agreements . . . .
>
> 7.76 The security and predictability in question are of "the multilateral trading system." The multilateral trading system is, per force, composed not only of States but also, indeed mostly, of individual economic operators. The lack of security and predictability affects mostly these individual operators.
>
> 7.77 Trade is conducted most often and increasingly by private operators. It is through improved conditions for these private operators that Members benefit from WTO disciplines. The denial of benefits to a Member which flows from a breach is often indirect and results from the impact of the breach on the marketplace and the activities of individuals within it. Sections 301-310 themselves recognize this nexus. One of the principal triggers for U.S. action to vindicate U.S. rights under covered agreements is the impact alleged breaches have had on, and the complaint emanating from, individual economic operators.[133]

The need for an articulation of substantive principles that are specific to the field of IEL is demonstrated by the fact that IEL treaties offer the same kind of unique protection for individuals against the actions of the state, using similar, if not identical, norms. An inductive approach to understanding the evolving doctrine of the WTO *acquis* and the emerging doctrine of "international investment *acquis*" also provides adjudicators with the opportunity to learn from the teachings of their colleagues. These colleagues may have encountered a similar or analogous problem in the past.

When Schwarzenberger first unveiled his inductive approach, there was a dearth of adjudicators and a dearth of law. Today, the

133. WTO Panel Report: United States—Sections 301–310 of the Trade Act of 1974, WT/DS152/R39, (Dec. 22, 1999) (citation omitted). The Panel (composed of David Hawes, Terje Johannessen and Joseph Weiler) continued at paras. 7.78–.79:

> It may, thus, be convenient in the GATT/"WTO" legal order to speak not of the principle of direct effect but of the principle of indirect effect. Apart from this name-of-convenience, there is nothing novel or radical in our analysis. We have already seen that it is rooted in the language of the "WTO" itself. It also represents a GATT/"WTO" orthodoxy confirmed in a variety of ways over the years including panel and Appellate Body reports as well as the practice of Members.

reverse is true. There are many tribunals, providing too much jurisprudence to easily collect or assess, without adopting a principled approach to the articulation of its doctrines. Marceau recognizes this need to find a comprehensive approach within the context of the WTO regime, advocating recourse to VCLT Article 31(3)(c) and the principles that might be drawn from the sources of law which lay within. She did so because such an analysis would permit one to adopt an evolutionary approach to interpretation that would promote coherence.[134] The same reasoning could be extended to cover the entire field of IEL, although certain warnings must be made and hopes must not be set too high.

For example, one should not expect the WTO Appellate Body to make frequent reference to the decisions of non-WTO tribunals for guidance on most substantive areas of GATT law. GATT law is comparatively well-settled, and the Appellate Body is clearly the de facto World Trade Court. Nonetheless, should NAFTA tribunal jurisprudence in the fields of services and investment regulation continue to outstrip that of WTO panels, it would not seem too much to ask that NAFTA awards be considered by WTO panels in the adoption of an inductive approach to as-of-yet "untested" GATS obligations.[135] In so doing, the adjudicator must take care not to "do violence" to the text of the treaty in question, while also taking into account its object and purposes.[136]

One possible way to "do violence" to an IEL treaty provision is to use an inappropriate source of law for the enunciation of an IEL principle. For example, one might be tempted to rely upon the jurisprudence emanating from the European Court of Justice concerning the regulation of the European common market. The danger of doing so lies in the fact that the legal underpinnings of European Community law go far beyond the liberalization of trade and/or investment among sovereign states. It is a constitutional project which, according to Professor Joseph Weiler, has effectively renounced public international law as its "operating system." The

135. The application of GATS Article II has been considered only in the following two panel reports: WTO Appellate Body Report: *Automotive Industry, supra* note 74; WTO Panel Report: *Bananas, supra* note 98. That is essentially the extent of the WTO's services jurisprudence.

136. Ford, *supra* note 26, at 72, citing Wolfgang Friedman, *The Uses of "General Principles" in the Development of International Law*, 57 AM. J. INT'L L. 279, 285 n.134 (1963).

architecture of the European Communities has undergone a metamorphosis, which has forever changed the legal discourse that existed between and among member states.[137] Accordingly, legal concepts emanating from this type of discourse must be treated with tremendous care by the international lawyer who is attempting to identify a few substantive principles applicable within the context of IEL.

IV. NAFTA ARTICLE 1105

With this caveat in place, we can consider some of the practical implications of employing an inductive approach in the NAFTA context. Perhaps the most obvious candidates for application of IEL principles are NAFTA Articles 1102 and 1103, which provide for national treatment and MFN treatment respectively. The national treatment and MFN treatment standards have a long history in IEL treaty law and in GATT, WTO, and mixed-claims tribunal jurisprudence. Obviously, there are lessons to be drawn from these sources. It is not uncommon to find a NAFTA tribunal considering and applying the teachings of the WTO Appellate Body in this context.[138] However, this Article will tackle a potentially more difficult subject: the interpretation of NAFTA Article 1105. This provision requires federal, state, and local governments to provide "treatment in accordance with international law, including fair and equitable treatment and full protection and security" to all qualifying foreign investments.[139]

Article 1105 has probably been the most controversial NAFTA provision in practice, having been considered by five tribunals, with three of them having found that a breach of Article 1105 had occurred. The reaction of NAFTA government officials to these "losses" was to issue an interpretative statement designed to curtail the future application of Article 1105. The impact of this unheralded action was negligible, although this assessment is based

138. *See, e.g.*, Pope & Talbot, Inc. v. Canada, Final Merits Award, paras. 43–63 (Apr. 10, 2001), (NAFTA/UNCITRAL), *available at* http://www.naftaclaims.com.

139. NAFTA Article 1105 clarifies that most NAFTA obligations apply to all levels of government. Investments "qualify" for protection under Article 1105 if they conform to the broad definition of "investment" contained within Article 1139 and are made by a qualifying "investor" (i.e. a national of one of the other two NAFTA countries that owns or controls the investment). *See* NAFTA, *supra* note 1, art. 1105, 32 I.L.M. at 639.

upon only three final awards.[140]

What kind of treatment does Article 1105 require, and how can its interpretation be aided by recourse to the IEL principles derived from an inductive approach? The first part of this question is relatively easy to answer. The second part requires more explanation. Article 1105 establishes that the NAFTA Parties owe a "minimum standard of treatment" to foreign investors who choose to invest in their territories. The adjective "minimum" does not mean that the standard itself is low, i.e., an easy test to meet. Instead, the standard is something below which no government conduct can fall without triggering a successful claim for compensation.

Working in the wake of the NAFTA governments' imposition of their binding interpretation of Article 1105, the NAFTA tribunals have concluded that this treaty-based standard is required of all States as a matter of customary international law.[141] The significance of memorializing the minimum standard in NAFTA Article 1105 lies in the fact that, before NAFTA was signed, Mexico had arguably never agreed to binding international arbitration concerning its potential liability for breaching this standard in virtually any investment context.

What remains to be determined, however, is how this minimum standard will be interpreted in future cases. It should first be noted that the project of applying Article 1105 in any given case may be highly contextual. Accordingly, it may be some time before a sufficient amount of jurisprudence has developed to cover the gamut of situations for which the obligation may be relevant. To be sure, "minimum standard" provisions exist in many of the over 2,500 investment protection treaties that are now in force throughout the world.[142] Any tribunal awards provided under virtually any of these treaties are likely to be of some persuasive value for future litigants and tribunals. But what is the role, if any, for the jurisprudence of the

---

140. *See* Todd Weiler, *NAFTA Chapter 11 Jurisprudence: Coming Along Nicely*, 9 SW. J.L. & TRADE AM. 245 (2003).

141. *See, e.g.*, Pope & Talbot, Inc. v. Canada, Counter Memorial, Second Phase, para. 55 (Oct. 10, 2000), (NAFTA/UNCITRAL), *available at* http://www.naftaclaims.com; *see also* Mondev International Ltd. v. United States, Final Award, paras. 39–42 (Oct. 11, 2002), (NAFTA/ICSID), *available at* http://www.naftaclaims.com.

142. Of course, the wording of all of these provisions is not exactly homogenous. Some minimum standard provisions impose an obligation to accord "fair and equitable treatment" in addition to whatever treatment is required under international law, while others (such as NAFTA Article 1105) subsume the "fair and equitable treatment" obligation within that treatment which is required under international law. Others include "fair and equitable treatment" with no reference to international law at all, while others combine these variations with national treatment and MFN treatment standards.

WTO, as well as other sources of international law? At most, NAFTA tribunals state that recourse can be had to any relevant source of international law, including state practice and doctrine, to understand the content of the minimum standard.[143] They are right, but their approach is unrefined. A more systematic approach is necessary and could be provided through the use of the inductive method.

Employing the inductive approach permits us to take advantage of the most salient principles of an investment dispute, while staying true to the treaty text. NAFTA Article 1105 provides that governments must treat investments "in accordance with international law, including fair and equitable treatment and full protection and security." Other minimum standard provisions are more explicit, such as those found in Canada's Foreign Investment Protection Treaty model, which requires "treatment in accordance with the principles of international law."[144] Others do not mention "international law" at all.[145] Regardless of the minor differences found among these various provisions, it would be elementary to conclude that the best way to explain the meaning of the terms "fair and equitable treatment," as they are informed by international law is to rely on the most relevant principles that could be drawn from "international law"—i.e., customary international law, treaty law, and the general principles of international law. The inductive approach provides the ideal methodology through which to provide such interpretative principles.

There are a number of IEL principles that may prove useful for the interpretation of minimum standards provisions such as NAFTA Article 1105. However, this Article is not a suitable place to describe the character and potential application of all of these principles. Rather, only broad outlines can be provided here. It is important to stress, however, the manner in which this process of identifying principles should be conducted. The process begins by relying on the primary and secondary sources of public international

law, which are often found in the writings of the most highly regarded scholars and jurists. After one identifies the nascent elements of each IEL principle in the generally accepted rules of customary international law and in the fundamental principles of law, one moves to considering how to better specify or limit them.

In other words, one tests these potential principles against the mettle of individual IEL cases and in contemplation of the existing mass of international economic law conventions and soft law. During this latter step of the process, one must conduct the test impartially. It may be that the principle is not borne out in the IEL context, which involves the interests of individual actors as much as it involves the interests of States. The stronger principle is the one that has successfully passed the most difficult tests.

Again, this Article is not the place to fully test these IEL principles. Instead, it will propose three substantive IEL principles that are appropriate for the interpretation of an investment treaty provision, which typically requires a State to act in no less than a "fair and equitable manner" in its regulatory activities. These principles are good faith, due process, and transparency.[146]

A. Transparency

The principle of transparency has been addressed once by the WTO Appellate Body and once by a NAFTA Chapter 11 tribunal. Elements of this principle can also be found in numerous IEL treaty provisions.[147] In *U.S.—Underwear*, the Appellate Body described how the principle of transparency finds expression in GATT Article X:2.[148] Schwarzenberger cautions us, however, not to rush too quickly to the enunciation of a new principle, based merely on a

146. This list is by no means exclusive. For example, one could argue that a principle exists that requires compensation to be paid in cases of detrimental reliance by an investor upon the representations of a government official or agent. Such a principle could be based upon a stream of mixed-claim jurisprudence extending up to the *Metalclad* award, where the investor detrimentally relied on assurances from federal officials concerning the apparently arbitrary demands of a local town council. The principle could also be drawn from a comparative analysis of detrimental reliance laws among the world's legal systems and perhaps a study of the rules of equity, as received into international law. *See* Metalclad Corp. v. United Mexican States (U.S. v. Mex.), 5 ICSID (W. Bank) Reports 209, 226 (2001).

147. SCHWARZENBERGER, *supra* note 10, at 95 (noting that if a principle is explicitly included in a treaty [even if only for declaratory purposes] it may become "more precisely defined. Instead of being a mere abstraction from legal rules, it may itself become a binding rule of wide scope from which other subordinate rules may be legitimately derived. . . .").

148. WTO Appellate Body Report: United States—Restriction on Imports of Cotton and Man-made Fibre Underwear, WT/DS24/AB/R, 19–20 (Feb. 10, 1997).

grouping of similar treaty provisions:

> It is also possible, and, for systematic purposes, helpful, to group together treaty clauses of a similar character under the headings of optional principles and standards. What is not permissible is to derive from such abstractions new rules which are read into the treaty either by way of questionable analogies or as being inherent for systematic or teaching purposes. If such conclusions can be drawn from the interpretation of the intention of the parties to the treaty, this is legitimate, although not necessarily subjective, judicial or quasi-judicial activity. If however, such 'rules' are merely logical deductions from concepts which a number of treaties have in common, this form of law-finding is a notorious example of legal conceptualism (Begriffsjurisprudenz) and amounts to a form of surreptitious law-making.[149]

Fortunately, the Appellate Body carefully noted that the principle of transparency is also related to the fundamental international law principle of "due process."[150] One could also note how the principle of transparency implicitly resides in the jurisprudence of mixed-claim tribunals. For example, in one case, a tribunal awarded damages against a state for imposing a measure which was so lacking in transparency that it effectively deprived a foreign investor of the opportunity to legally protect its investment.[151] Recall that the purpose of enunciating IEL principles is not to create new substantive obligations, but only to assist in the interpretation of existing obligations.

The *Metalclad* case provides an interesting, and wholly justifiable, example of how the transparency principle may be relevant in the investment context. The principle of transparency accordingly appears ripe for further review. Whether its appearance in numerous treaty provisions and the jurisprudence of international tribunals—combined with its relationship to general principles of law such as due process—will be sufficient to establish its status as a relevant IEL principle is a task to be assigned to a future paper.

B. Due Process

The fundamental principle of due process, perhaps known more commonly in other jurisdictions as procedural justice or fairness, has a well-established place in public international law, particularly mixed-claim jurisprudence. Examples can also be found in the jurisprudence of various tribunals, including the WTO Appellate Body[152] and the provisions of virtually every IEL treaty.[153] The best examples, however, are in the "denial of justice" decisions of various mixed-claim tribunals.

Perhaps the best encapsulation of the doctrine of denial of justice is to be found in the views contained within the 1961 Harvard Draft Convention on Responsibility of States for Damage Done on Their Territory to the Person or Property of Foreigners. Article 7 of this document states:

> The denial to an alien by a tribunal or an administrative authority of a fair hearing in a proceeding involving the determination of his civil rights or obligations or of any criminal charges against him is wrongful if a decision or judgment is rendered against him or he is accorded an inadequate recovery. In determining the fairness of any hearing, it is relevant to consider whether it was held before an independent tribunal and whether the alien was denied:
>
> (a) specific information in advance of the hearing of any claim or charge against him;
>
> (b) adequate time to prepare his case;
>
> (c) full opportunity to know the substance and source of any evidence against him and to contest its validity;
>
> (d) full opportunity to have compulsory process for obtaining witnesses and evidence;
>
> (e) full opportunity to have legal representation of his own choice;

---

152. WTO Appellate Body: *Shrimp, supra* note 150, para. 183.

153. *See, e.g.*, General Agreement on Tariffs and Trade, Oct. 30, 1947, art. X, 61 Stat. A-11, 55 U.N.T.S. 187; NAFTA, *supra* note 1, art. 1804, 32 I.L.M. at 681.

(f) free or assisted legal representation on the same basis as nationals of the State concerned or on the basis recognized by the principal legal systems of the world, whichever standard is higher;

(g) the services of a competent interpreter during the proceedings if he cannot fully understand or speak the language used in the tribunal;

(h) full opportunity to communicate with a representative of the government of the State entitled to extend its diplomatic protection to him;

(i) full opportunity to have such a representative present at any judicial or administrative proceeding in accordance with the rules of procedure of the tribunal or administrative agency;

(j) disposition of his case with reasonable dispatch at all stages of the proceedings; or

(k) any other procedural right conferred by a treaty or recognized by the principal legal systems of the world.[154]

The kinds of activities that will constitute a denial of procedural justice would include an effective refusal to hear an interested party,[155] or "a continued absence of seriousness on the part of [the decision-maker]."[156] Professor Edwin Borchard, who wrote the first *Harvard Draft*, summarized the content of the prohibition against procedural denials of justice as follows:

> On the procedural side, we are perhaps in less doubt of the content of the standard, although we must still be satisfied with general principles. Fair courts, readily open to aliens, administering justice honestly, impartially, without bias or political control, seem essentials of international due process. While the details of procedure necessarily vary considerably

> from country to country, certain essential elements of fair trial and objective justice are required of all systems. It is probably less difficult to apply than to define these principles, and we have in their application the aid of innumerable precedents from international practice. In spite of the legislative effort strictly to narrow the conception of denial of justice and the privilege of diplomatic interposition, few foreign countries have been willing to abandon their nationals to the arbitrariness of corrupt courts or administrative bodies.[157]

Borchard's use of the term "due process" is telling. The NAFTA expropriation provision, Article 1110, makes specific reference to "due process" in relation to the application of Article 1105.[158] Further, the term has appeared in numerous draft conventions on the protection of foreign property as well as in many bilateral investment treaties.[159] It connotes a fundamental respect for the rule of law that must be present in the decision-making processes under review. Its use in interpreting the "fair and equitable treatment" standard, particularly in terms of identifying the proper floor below which no conduct should fall, is clear.

C. *Good Faith*

In contrast to its considerable coverage in the context of the WTO, the IEL principle of good faith has yet to be fully addressed by a NAFTA tribunal.[160] Accordingly, the experiences of the WTO may provide guidance to future NAFTA and BIT tribunals interpreting

---

157. Edwin Borchard, *The "Minimum Standard" of the Treatment of Aliens*, 38 MICH. L. REV. 445, 460 (1940).

158. NAFTA, *supra* note 1, art. 1110, 32 I.L.M. at 641–42.

159. In his treatise on the subject of these draft conventions, Professor Schwarzenberger hypothesized that, with the inclusion of the term "due process of law," the drafters of such codifying instruments as the *Abs-Shawcross Convention* and the *OECD Draft Convention* were attempting to acknowledge the role of the minimum standard in consideration of the lawfulness of a taking, as such a principle embodies elements of the Rule of Law. However, he suggested that they would have done better to state more precisely what they had in mind. *See* GEORG SCHWARZENBERGER, FOREIGN INVESTMENTS AND INTERNATIONAL LAW 119, 172 (1969).

160. In his separate opinion in the *Myers* NAFTA claim, Professor Schwartz sketches out some of the investor's arguments as embodying potential breaches of Article 1105, which could include application of principles such as transparency and good faith (although he did not name the latter). *See* S.D. Myers, Inc. v. Canada, (Nov. 13, 2000), 40 I.L.M. 1408, 1484–85 (2001).

provisions such as NAFTA Article 1105. The IEL principle of good faith may be evidenced in the WTO *acquis*, the jurisprudence of the ICJ, and the teachings of the most highly qualified publicists. These devices demonstrate how customary international law doctrines and the general or "fundamental" international law principle of good faith can inform the IEL principle of good faith.

For example, it is common practice in many investment treaties, including the multilateral Energy Charter Treaty, for investors to be permitted to claim damages in cases where a commitment made by the State to the investors is not honored.[161] This obligation obviously relates to the *pacta sunt servanda* rule of customary international law. Another example is the doctrine on abuses of right. This doctrine is based upon the general international law principle of good faith. Its premise is that a State cannot exercise any right under international law, including the liberty to exercise its sovereign regulatory authority, in an arbitrary, discriminatory, or otherwise abusive manner.

As an elemental principle in the ordering of relations between states, good faith provides the glue that largely holds the international order together. Section 711 of the Restatement (Third) of the Foreign Relations Law of the United States establishes the principle of good faith in state responsibility, providing that "a state is responsible under international law for injury to a national of another state caused by an official act or omission that violates . . . a personal right that, under international law, a state is obligated to respect individuals of foreign nationality."[162] As the ICJ noted in the *Anglo-Norwegian Fisheries* case:

> The principle of good faith requires that every right be exercised honestly and loyally. Any fictious exercise of a right for the purpose of evading either a rule of law or a contractual obligation will not be tolerated. Such an exercise constitutes an abuse of the right,

161. *See, e.g.*, European Energy Charter Treaty, Dec. 17 1994, art. 10, 33 I.L.M. 360, 389–390 (1995); Investment Treaty, Jan. 11 1995, U.S.–Alb., art. II:3, *available at* http://www.state.gov/www/issues/economic/bit_abania.pdf.

162. RESTATEMENT (THIRD) OF THE FOREIGN RELATIONS LAW § 711 (1987). Commentary (e) to Section 711 confirms that this provision refers both to the interests of individuals and to the fact that "a juridical person of foreign nationality also enjoys some protection, for instance, against denials of procedural justice" and that "for a juridical person, such violations would normally result in economic injury and fall within clause (c)," which provides that responsibility attaches for acts that unreasonably interfere with "a right to property or other economic interests that, under international law, a state is obligated to respect for persons, natural or judicial, of foreign nationality, as provided in section 712." *Id.*

prohibited by law.[163]

In its merits award, the ICSID tribunal in *AMCO Asia v. Indonesia* has even determined that good faith is a principle upon which an investor could base its claim. The tribunal concluded that an investor should be entitled "to realize the investment, to operate it with a reasonable expectation to make profit and to have the benefit of the incentives provided by law," without suffering the arbitrary exercise of a right which would prevent such enjoyment.[164]

Bin Cheng devoted an entire chapter of his renowned treatise on the principles of international law to the manner in which the doctrine of abuse of rights arises from the principle of good faith. He summarized his view of the doctrine as follows:

> [D]iscretion must be exercised in good faith, and the law will intervene in all cases where this discretion is abused . . . . Whenever, therefore, the owner of a right enjoys a certain discretionary power, this must be exercised in good faith, which means that is must be exercised reasonably, honestly, in conformity with the spirit of the law and with due regard to the interest of others.[165]

> The exercise of a right—or a supposed right, since the right no longer exists—for the sole purpose of causing injury to another is thus prohibited. Every right is the legal protection of a legitimate interest. An alleged exercise of a right not in furtherance of such interest, but with the malicious purpose of injuring others can no longer claim protection of the law.[166]

For his part, Schwarenberger argued that since the theory of abuse of rights was so well ensconced in the principle of good faith and in the customary international law minimum standard of treatment of aliens, it was not even necessary to refer to it as a separate standard (or international tort), except for the "hard core" of the theory. He considered the hard core to include: "the arbitrary or unreasonable exercise of rights or powers within the exclusive

165. CHENG, *supra* note 11, at 132–34.

166. *Id.* at 122.

jurisdiction of States."[167] Schwarzenberger accordingly stated:

> Arbitrariness in any form is—or ought to be—abhorrent to *homo juridicus*. His whole professional outlook is dominated by the attitude that, in the eyes of the law, equal situations require equal remedies.[168]

As Schwarzenberger hinted, what the abuse of rights doctrine can tell us about the interpretation of the "fair and equitable treatment" standard is rather straightforward. States are not permitted to exercise their authority—whether granted by treaty or existing as part of the sovereign right to regulate the affairs of their citizens—in an abusive or discriminatory manner. The telltale sign of an "abuse of right" is a seemingly arbitrary governmental decision which causes damage to the interests of a foreign investor. If state officials can demonstrate that the decision was made in an objective and rational, reasoned manner, they will defeat any claim made under this standard. If they cannot, the arbitrary result must be remedied. One way to guard against arbitrariness and discrimination in governmental decision-making is to promote transparency. The principles work hand in glove to improve the quality of regulatory decision-making.

V. CONCLUSION

When Schwarzenberger first set out his inductive approach to international law, he briefly noted that IEL might be a good candidate for its application. Forty years later, IEL has "grown up," through a proliferation of treaty regimes, jurisprudence and a steadily increasing flow of jurisprudence. The WTO has assumed the role envisaged for the failed International Trade Organization of the postwar Havana Charter. International investment protection has matured as the essentially unenforceable friendship, commerce, and navigation treaties have gradually been replaced by an increasing web of over two thousand BITs, which contain binding investor-state arbitration clauses. When these investment obligations were contained within the multilateral framework of the NAFTA and the Energy Charter Treaty, they were extended between developed economies with heavy cross-border investment flows. The result was the evolution of meaningful self-help for investors.

167. GEORG SCHWARZENBERGER, INTERNATIONAL LAW AND ORDER, 89–90, 99–100 (1971).

168. *Id.* at 100.

Investment lawyers have taken advantage of enhanced electronic access to sources of international law, which were heretofore the province of an exclusive clique of scholars and practitioners. They have also taken advantage of the explosion of norm-generation and dispute settlement taking place in the WTO. The time is accordingly right to enunciate some basic principles of substantive IEL, not only because the material now exists for the inductive approach to work, but because this burgeoning body of law will benefit immensely from the structure and coherence that the approach can provide.

NAFTA Article 1105, with its potentially vague reference to "treatment in accordance with international law," is a natural choice for the application of an inductive approach. The NAFTA experience thus far may only establish that Article 1105 requires the same conduct that is required under customary international law. If so, the content of this "minimum standard" may remain elusive to most onlookers. The remedy to this potential problem is to employ an inductive approach to the wealth of IEL material emanating from the WTO and an increasing number of ad hoc investment tribunals.

In any given case, the relevant IEL principles can be employed to interpret what "fair and equitable treatment" or "treatment in accordance with international law" should mean. The resulting tribunal decision would promote coherence and consistency across treaty platforms, permitting individual economic actors greater security and predictability to conduct their activities. Given that enhanced security and predictability are common goals in most international economic agreements, only such a result would be appropriate.

INCREMENTALISM: ERODING THE IMPEDIMENTS TO A GLOBAL PUBLIC PROCUREMENT MARKET

CHRISTOPHER R. YUKINS & STEVEN L. SCHOONER*

ABSTRACT

Following decades of international negotiations and agreements, the world's multi-trillion-dollar public procurement market appears to be maturing into a free, open international market. To reach that point, nations must lower a broad array of barriers to trade in procurement. As the U.S. experience demonstrates, purchasing agencies, laboring under the constraints of domestic preferences, may effectively seek to promote free trade. At the same time, a variety of international organizations, from the World Trade Organization to Transparency International, have developed tools and instruments—including model codes and explicit nondiscrimination agreements—that ease barriers to trade in procurement. To accelerate the erosion of these barriers, this Article suggests assessing progress in four potentially overlapping steps: nondiscrimination, a political decision; harmonization, an effort to coordinate the international instruments; rationalization, an effort to enhance the efficiency of regimes launched under the international instruments; and, institutionalization, an integration of the evolving international procurement norms into the legal fabric of the nations entering the international free market in procurement.

INTRODUCTION

After centuries of isolationism, the world's public procurement markets are emerging as a progressively integrated, open market. This trend accelerates as nations agree—by treaty, agreement, and practice—to open their respective procurement markets to outside competition. Trade liberalization in this sphere remains controversial,[1] as

Schooner is Senior Associate Dean for Academic Affairs at The George Washington University Law School. © 2007 Christopher R. Yukins and Steven L. Schooner. Both co-direct the law school's Government Procurement Law Program. Earlier versions of this paper were presented at the GEORGETOWN JOURNAL OF INTERNATIONAL LAW's *Global Sourcing and the Global Lawyer* Symposium (Jan. 2007) and at the WEST-THOMSON GOVERNMENT CONTRACTS YEAR IN REVIEW CONFERENCE (Feb. 2007). The authors acknowledge the generous support of the Seymour Herman Faculty Research Fund in Government Procurement Law, and thank Frederick Lawrence for his support and insights, and Maria Aspiazu and Daniel Greenspahn for their diligent research assistance.

1. Because our focus is limited to public procurement, we do not endeavor here to catalogue the literature favoring free trade. Conversely, we remain cognizant that the free trade literature is

many states, particularly developing nations,[2] fear that opening their markets will expose domestic industries to crushing competition. Experience suggests, however, that by opening their procurement markets, nations serve their own procurement systems and domestic economies by gaining access to a richer and more diverse pool of goods and services, often at more competitive prices. Concomitantly, these states benefit as foreign markets open to their own producers. Opening an increasing number of public procurement markets may be the most important development in procurement today. Although it is an encouraging trend, the process likely will require at least a generation to mature.

As this process unfolds, individual states must identify the barriers to foreign contractor entry posed by domestic procurement rules. Public procurement law—especially the legal regimes that govern public contract formation[3]—often erects a dense, twisted web of rules, which

---

not uniformly accepted. *See, e.g.*, David Wessel & Bob Davis, *Pain From Free Trade Spurs Second Thoughts*, WALL ST. J., Mar. 28, 2007, at A1 (noting that a critique of free trade by economist, former Federal Reserve Board vice chairman, and perennial free-trade advocate, Alan S. Blinder "comes as public skepticism about allowing an unfettered flow of goods, services, people and money across borders is intensifying, including some Republicans as well as many Democrats"). Further,

> [Blinder suggests that] a new industrial revolution—communication technology that allows services to be delivered electronically from afar—will put as many as 40 million American jobs at risk of being shipped out of the country in the next decade or two [, and that's] ... "only the tip of a very big iceberg ...." Mr. Blinder's answer is not protectionism .... He wants government to do far more for displaced workers ... [and h]e thinks the U.S. education system must be revamped so it prepares workers for jobs that can't easily go overseas, and is contemplating changes to the tax code that would reward companies that produce jobs that stay in the U.S.

2. For example, an informative contrast to the prevalent Western free-trade literature can be found in the India-based Consumer Unity & Trust Society Centre for International Trade, Economics & Environment ("CUTS CITEE"). CUTS CITEE's "philosophy is 'liberalisation yes, but with safety nets.'" *See generally* CUTS Centre for International Trade, Economics & Environment, http://www.cuts-citee.org/.

3. In the United States, clear legal and pedagogical lines distinguish between the *formation* and the *performance* (or administration or management) of a government contract. Briefly, the formation process begins with acquisition planning, revolves around the government's solicitation (e.g., invitation for bids, request for proposals, or request for quotations), depends in large part upon the government's evaluation criteria (e.g., lowest price technically acceptable, best value, or proven past performance), and concludes with the selection of a contractor and award of a contract. Typical legal challenges during all phases of this process—whether alleging inequities or ambiguities in the solicitation, restrictions on competition, or award improprieties—are known as

may impede (and frequently intimidates) potential foreign entrants. As international instruments focused on public procurement emerged over the past few decades, most were intended, at least in part, to ease those artificial barriers to entry.

At a broad, conceptual level, this market-opening initiative appears to proceed in four somewhat irregular phases. First, and perhaps most controversially, states must embrace *nondiscrimination* as a policy that will, on balance, benefit those nations that adopt it. This is a highly political calculation, and it may take decades for some nations to acknowledge and accept it. Second, to facilitate market-opening, the instruments for international cooperation on procurement should be *harmonized.* This nascent process appears to be gaining momentum through various international agreements and structures. Harmonization itself reduces barriers to trade because it reduces transaction costs for vendors crossing borders. Simultaneously, harmonization eases the transition to a common procurement market, based on common instruments. Third, as states harmonize their public procurement instruments, rather than using the *lowest common denominator* (typically, corruption control) as a baseline, these instruments should be *rationalized* to ensure *optimal* procurement functions. Doing so will pay dividends through enhanced efficiency and, at a political level, will lend the rationalized instruments more legitimacy as a tool for development.[4] Fourth, the regulatory regimes shaped by the instruments should be *institutionalized,* to integrate the new rules into the fabric of

---

bid protests or disappointed offeror litigation. Contrast this with the performance phase, in which the contract, replete with standard remedy-granting clauses intended to anticipate every conceivable contingency, defines the contracting parties' responsibilities to, for example, perform a service or deliver a good in exchange for the payment of money, which fulfills the government's obligation and concludes the relationship. Contract disputes that arise during performance may involve, for example, delays, failure to comply with specifications, and modifications to, or termination of, the contract.

4. Two leading economists put the case for efficient procurement markets this way:

> Efficiency in government procurement is of importance in ensuring that the best value for money is obtained by public entities. Procurement practices also figure prominently in the way that many potential investors and civil society view a country. Ensuring transparency of the procurement process is an important determinant of efficiency insofar as it enhances the contestability of public procurement markets (by giving all qualified potential suppliers a chance to bid). If procurement procedures are opaque and discretionary, the incentive for firms to enter into a market are typically reduced. The same problem arises if it is possible for firms to obtain "preferred status" through bribery of officials and potential entrants do not know how to "play by the rules of the game."

each nation's existing procurement law.

Our aim here is not mere advocacy for open procurement markets, although we favor such a result. The case for open public markets, ultimately, is a simple one for economists, agency procurement officials, and elected officials to make. Rather, our modest goal is to describe the critical legal and practical milestones as the historically chaotic and balkanized collection of protectionist public procurement regimes[5] evolves toward a unified, open, and ultimately global market.

Accordingly, we begin, in Part I, by opining that, despite the never-ending succession of acquisition reform initiatives in the United States and abroad, the most significant development in public procurement today may be the incremental opening of an increasing number of public procurement markets across the globe. Although this nascent trend necessarily will span decades, and no doubt will proceed in fits and starts, we are heartened by what we perceive as increasing momentum. For the trend to accelerate, states must not only identify, but overcome, longstanding and often instinctively erected barriers to entry. Part II discusses the identification of individual states' procurement rules that both explicitly and implicitly serve as barriers to foreign firms' entry into those states' domestic procurement markets. Part III traces the role that certain legal and policy instruments may play in opening world procurement markets. We discuss three types of instruments that, intentionally or fortuitously, may liberalize international procurement markets: (1) model procurement codes or model statements of principle; (2) procurement guidelines imposed by central financial institutions; and (3) binding international agreements or directives that require nondiscrimination. Finally, in Part IV, we offer a rubric or four-stage process through which we expect the global procurement market to pass in order to fully achieve openness. These potentially overlapping stages include: (1) acceptance of nondiscrimination (in lieu of protectionism) as a norm; (2) harmonization of the fundamental aspects of public procurement regimes; (3) rationalization of procurement practices in the pursuit of commonly accepted

This evidence supports the hypothesis that government purchases are home biased.").

aspirations for successful procurement regimes, such as achieving value for money, efficiency, and customer satisfaction (rather than, in contrast, wealth distribution); and (4) institutionalization or the incorporation of harmonized, rationalized agreements into the legal fabric of the states that adopt these procurement practices. We optimistically conclude that liberalized procurement markets will enhance the value of money states expend procuring goods and services and, as a result, will provide better service to the constituencies those states ultimately serve.

I. THE IMPORTANCE OF OPENING THE INTERNATIONAL PROCUREMENT MARKET

There are many reasons to open the international procurement market, including, of course, the sheer size of the market and its impact upon both the public and private sectors.[6] The Organisation for Economic Cooperation and Development ("OECD") estimated that total world procurement amounted to approximately $5.5 trillion in 1998.[7] During fiscal year 2007, the United States federal procurement market alone will account for approximately $400 billion,[8] an amount that reflects continued growth on top of the roughly 75 percent increase experienced from FY2000 to FY2005.

As governments increasingly rely upon the private sector to perform governmental functions, we expect this trend of public procurement

8. "Each year Federal agencies spend nearly $400 billion for a range of goods and services to meet their mission needs." ACQUISITION ADVISORY PANEL, REPORT OF THE ACQUISITION ADVISORY PANEL TO THE OFFICE OF FEDERAL PROCUREMENT POLICY AND THE UNITED STATES CONGRESS 1 (Draft Final Report, Dec. 2006) [hereinafter AAP DRAFT REPORT], *available at* http://www.acquisition.gov/comp/aap/documents/DraftFinalReport.pdf. Of course, these figures exclude procurement by the fifty States, municipalities, and regional authorities.

U.S. FEDERAL PUBLIC PROCUREMENT FISCAL YEARS 2000-2005[9]

Fiscal Year	Transactions (in millions)	Dollars (in billions)	Percentage increase
2005	10.8	$382	10.2
2004	10.5	$346	13.5
2003	11.5	$305	22.1
2002	8.65	$250	6.5
2001	11.4	$234	7.3
2000	9.8	$218	–

growth to continue.[10]

By necessity, market-opening agreements typically are reciprocal. Thus, a nation's decision to open its domestic market will almost always increase that nation's firms' access to the vast international public procurement market. More robust opportunities in industrialized nations' procurement markets suggest that developing nations have more to gain from reciprocal access to procurement markets in industrialized nations.[11] The alternative—leaving a domestic market closed—may impose significant costs on the protectionist nation, both in terms of paying higher prices to less efficient domestic firms or, more often, foreclosing access to superior goods and services. Moreover, protection-

10. The recent draft report from the distinguished Acquisition Advisory Panel chronicled the government's transition, in the span of a single generation, from a purchaser of supplies to a service consumer:

> Services now comprise a greater percentage of the government's acquisition budget. Between 1990 and 1995 the government began spending more on services than goods. Currently, procurement spending on services accounts for more than 60% of total procurement dollars. In FY 2005, DOD obligated more than $141 billion on service contracts, a 72% increase since FY 1999.

11. *See* OECD REPORT, *supra* note 7, at 23, 25 (noting that in 1998, government expenditures in OECD countries totaled $4.7 trillion versus $0.8 trillion in non-OECD nations); *see also* Bernard M. Hoekman & Petros C. Mavroidis, *The World Trade Organization's Agreement on Government Procurement* 4-5 (World Bank Policy Research, Working Paper No. 1429, Mar. 1995), *available at* http://econ.worldbank.org/external/default/main?ImgPagePK=64202990&entityID=000009265_3970311121546&menuPK=64168175&pagePK=64210502&theSitePK=544849&piPK=64210520.

ist policies ignore the realities of the global marketplace, particularly in the context of commercial items, where firms unavoidably depend upon a global supply chain. While the topic remains unsettled and controversial,[12] past studies have identified welfare losses in those countries with high barriers to procurement trade.[13] Indeed, as the U.S. experience discussed below shows, customer agencies may resist domestic preferences more aggressively than their elected leadership, as they more acutely feel the pinch of those welfare losses.

II. PROCUREMENT RULES AS (INHERENTLY UNSTABLE) BARRIERS

Procurement rules serve as explicit and implicit barriers to foreign firms' entry into domestic procurement markets. Professor Sue Arrowsmith's authoritative text, *Government Procurement in the WTO*, describes four relevant categories of procurement rules that serve as barriers to nations' procurement markets. These are: (1) measures to provide domestic industry with a competitive advantage; (2) secondary objectives of a non-economic nature; (3) illegitimate practices including corruption, nepotism, and patronage; and, (4) conventional domestic procurement rules concerned with the "commercial" aspects of procurement and efforts to achieve an efficient domestic procurement process.[14] Drawing on the U.S. experience, we employ this conceptual structure to demonstrate why fissures are emerging in these rules-based barriers.

A. *Measures to Protect Domestic Industry: Assessing Developments Under the Berry Amendment's Specialty Metals Ban*

One common form of trade barrier is those explicit *measures to provide domestic industry with a competitive advantage over foreign competitors.* Historically, "the United States operated significant overt policies, generally embodied in legislation"—the Buy American Act[15] is the most obvious example—"whilst the policies of many of its major trading partners, including most European states, were more covert."[16] The obvious preferences (and barriers) raised by the Buy American Act have, for the most part, been overtaken by the United States' obligations under the World Trade Organization (WTO) Government Procurement Agreement, discussed below.[17]

Throughout the U.S. procurement system, however, less obvious domestic preferences continue to thrive.[18] Recently, for example, the U.S. Congress made substantial revisions to the Berry Amendment,[19] a decades-old piece of legislation which requires the U.S. Department of Defense to purchase certain items only from U.S. producers, including

15. *See generally* 48 C.F.R. § 25.100-.105 (citing 41 U.S.C. §§ 10a - 10d and Exec. Order 10582 (Dec. 17, 1954)). Title 48 of the C.F.R. is the Federal Acquisition Regulation (FAR) system, "established for the codification and publication of uniform policies and procedures for acquisition by all executive agencies. The Federal Acquisition Regulations System consists of the . . . [FAR], which is the primary document, and agency acquisition regulations that implement or supplement the FAR." 48 C.F.R. § 1.101. The current, official version of the FAR is available online through Acquisition Central, *www.acquisition.gov,* the Federal government's single-point-of-entry for the acquisition community, at http://www.acquisition.gov/far/.

> [W]ealth distribution is merely a subset of the larger phenomenon of burdening the procurement process (or, for that matter, the process of governing) with efforts to promote social policies. These social policies, in addition to those that potentially distribute wealth to domestic manufacturers, essential military suppliers, and small (and small disadvantaged and women-owned) businesses, also mandate drug-free workplaces, occupational safety standards, compliance with labor laws, [and] preferences for environmentally friendly purchasing practices . . . .

Id. at 108 n.28.

19. The so-called Berry Amendment was handled as an amendment to appropriations acts for many years, until Congress passed section 832 of the National Defense Authorization Act for Fiscal Year 2002, Pub. L. 107-107, 115 Stat. 1012, 1019 (codified at 10 U.S.C. § 2533(a) (2007)).

clothing and specialty metals, the subject of recent legislation.[20]

With regard to specialty metals, the Berry Amendment poses enormous compliance challenges for the Department of Defense and its contractors.[21] Titanium and certain alloys, for example, are critical to the sophisticated electronics and weapons systems regularly procured by the U.S. military. Yet these and other specialty metals covered by the current ban are often, according to industry, difficult to access in the domestic U.S. market, and the Defense Department has scrambled to make sense of the Berry Amendment's blanket ban.[22]

1. A Troubling but Informative Anecdote

The Berry Amendment's ban on specialty metals offers an interesting case study in domestic-content requirements for several reasons. First, because it calls for domestic specialty metals in a highly mechanized military, the requirement intrudes into almost every corner and crevice of the defense complex, wherever specialty metals are used—from aircraft to weapons to computers. Unlike other domestic-content requirements that simply lend domestic products a price preference (such as the requirements of the Buy American Act), the Berry Amendment wholly bars the Defense Department from buying any item that contains foreign specialty metals absent exceptional circumstances. Second, the pervasive impact of the absolute bar against foreign specialty metals divides the U.S. specialty metals industry from the Defense Department and its major contractors.[23] Third, the debate shows how a global economy reorders the politics of domestic prefer-

23. *See* Roxana Tiron, *U.S. Titanium Industry Defending its Territory*, THE HILL, Mar. 16, 2006, *available at* http://www.hillnews.com/thehill/export/TheHill/News/TheExecutive/031606_titanium.html; Roxana Tiron, *Specialty-Metals Industry Clashes with Defense Giants, Pentagon*, THE HILL, May 16, 2006, *available at* http://www.hillnews.com/thehill/export/TheHill/Business/051606_barry.html; Roxana Tiron, *Glint of Steel in Clash over Specialty Metals*, THE HILL, June 13, 2006, *available at* http://www.hillnews.com/thehill/export/TheHill/Business/061306_berry.html.

ences. Traditionally, most domestic-content requirements have left purchasing agencies uneasily allied with domestic industry. The agencies typically have been willing to bear the additional costs of domestic preferences in order to further other social or political goals. Now, as is discussed below, purchasing agencies' new decision to demand flexibility (rather than slavishly adhere to a domestic preference mandate) highlights the internal fissures that undermine traditional domestic preferences. Agencies and contractors, under pressure to utilize the collective strength of a global supply chain, cannot indefinitely abide arbitrary political demands to accommodate self-interested domestic industries.

2. A Tortured History

The Berry Amendment's absolute bar against specialty metals is so severe and disruptive that the Defense Department has shifted to a stance of cautious opposition to the ban.[24] Throughout 2006, while proposed legislation to amend the Berry Amendment remained stalled in Congress, the Defense Department issued a number of guidance documents to its agencies, and to its contractors, as they struggled to comply with the specialty metals ban.

In February 2006, the U.S. Defense Contract Management Agency (DCMA) issued guidance, updated in March, which emphasized that foreign specialty metals would *not* be accepted in items delivered to the Defense Department, but that—in very limited circumstances—items that contained "nonconforming" specialty metals could be accepted "conditionally," with a corresponding reduction in price.[25] In June 2006—after the House had passed proposed expansions to the specialty metals ban—senior leadership in the Defense Department endorsed the earlier DCMA guidance.[26] The Defense Department's statement of position reflected its continuing concern with the Berry Amendment ban. Although the Under Secretary of Defense acknowl-

25. *See* DCMA, Interim Instruction, Noncompliance with the Preference for Specialty Metals Clause, DFARS 252.225-7014 (Feb. 2006/rev. Mar. 10, 2006), *available at* http://guidebook.dcma.mil/225/instructions.htm.

26. *See* Memorandum from U.S. Under Secretary of Defense Kenneth J. Krieg (June 1, 2006), *available at* http://guidebook.dcma.mil/225/dc06-183USD(AT&L).pdf.

edged "that certain specialty metal parts used in the performance of some defense contracts may be non-compliant with the Berry Amendment," he emphasized that "in some cases, the delay that would be caused by immediately pursuing certain remedies may seriously impact our ability to meet military needs."[27] In memoranda dated August 18, 2006 and September 21, 2006,[28] Shay Assad, the Director of Defense Procurement and Acquisition Policy, issued guidance to Defense agencies on accepting items with non-compliant specialty metals. The August 2006 memorandum acknowledged that compliance could lead to higher costs, and the September 2006 memorandum noted that contractors may be unable to trace their supply chains completely, to keep out all "foreign" specialty metals in items delivered to the Defense Department. Taken together, the 2006 guidance made clear the Defense Department's concern that the specialty metals ban was expensive and disruptive.

Indeed, in a May 2006 statement the Bush administration threatened to veto a draft defense authorization bill that would have substantially broadened the Berry Amendment's requirements if the domestic preferences were enhanced, an extraordinary threat to a then-Republican Congress, in a time of war:

> The Administration strongly opposes legislative provisions . . . that would undermine the longstanding U.S. policy—repeatedly affirmed by Congress—to open U.S. procurement markets to suppliers from allied and friendly countries that open their procurement markets to U.S. suppliers. These sections could jeopardize our military readiness when our objective should be to enhance our ability to get the best capability for the warfighter at the best value for the taxpayer. Such provisions would restrict U.S. suppliers' access to foreign markets; would decrease competition; increase costs for U.S. taxpayers; and unnecessarily add red tape to the procurement process. DoD suppliers rely on global supply chains for materials, often without knowing the country of origin. . . . These . . . sections, which would require domestic sources for all critical items, fail to

Assad, Director, Defense Procurement and Acquisition Policy to Commander, U.S. Special Operations (Aug. 18, 2006), *available at* http://www.acq.osd.mil/dpap/policy/policyvault/2006-1445-DPAP.pdf; Memorandum from Shay D. Assad, Director, Defense Procurement and Acquisition Policy to Commander, U.S. Special Operations (Sept. 21, 2006), *available at* http://www.acq.osd.mil/dpap/policy/policyvault/2006-1788-DPAP.pdf.

> recognize that it is acceptable to rely on dependable foreign sources from allied and friendly countries for many critical items. Unwillingness to rely on such dependable foreign sources would undermine future efforts to build coalitions. . . . In addition, Section 1211 would prohibit procurements from any entity that has exported or transferred certain items linked to the U.S. Munitions List to the People's Republic of China, causing irreparable damage to DoD's efforts to implement a strategy of world-wide engagement with allies and friendly nations. *If the President is presented a bill that includes such provisions, his senior advisors will recommend that he veto the bill.*[29]

As the Bush administration's message reflected, practical and political demands pushed the specialty metals ban directly into the colliding paths of domestic preferences and policy. Despite strong congressional support for the domestic specialty metals industry, the Bush administration fought hard to reduce barriers to the U.S. procurement market because of the forces aligned *against* the specialty metals preference: the need for U.S. agencies to access foreign materials; the additional costs and inefficiency that the preference forces on U.S. prime contractors and their international supply chains (costs that ultimately the United States itself must bear, in large part); and, finally, the severe impact that domestic preferences can have on U.S. foreign policy, which increasingly relies on strong international alliances. This "new triumvirate"—U.S. agencies drawing aggressively on foreign suppliers, a globalized U.S. contractor community, and potentially angry foreign allies—make the Berry Amendment's specialty metals preference inherently unstable.

The Defense Department's opposition to the specialty metals ban forced Congress to revisit the requirement. Caught between competing demands from defense suppliers, the specialty metals industry, and the Defense Department itself, Congress compromised. The John Warner National Defense Authorization Act for fiscal year 2007,[30] which President George W. Bush signed into law on October 17, 2006, contained

29. Office of Mgmt. & Budget, Executive Office of the President, Statement of Administration Policy: H.R. 5122—National Defense Authorization Act for Fiscal Year 2007, at 2 (2006) (emphasis in original), *available at* http://www.whitehouse.gov/omb/legislative/sap/109-2/hr5122sap-h.pdf.

30. John Warner National Defense Authorization Act of 2007, Pub. L. No. 109-364, 120 Stat. 2083 (2006).

several measures intended to ease the Berry Amendment's ban.[31]

Specifically, Section 842 of the act established a new specialty metals provision, which "carved out" specialty metals from the other Berry Amendment prohibitions (textiles, etc.).[32] The new statute defined specialty metals in accord with standing Defense Department rules,[33] but left open the possibility that other metals will be added in the future based on studies of critical materials by a special board created in the Department of Defense. The new statute gave the Defense Department authority to waive the specialty metals ban if insufficient domestic specialty metals are available or if contractors could reasonably explain noncompliance. The statute also exempted smaller procurements (under $100,000), purchases of electronic components of "de minimis" value, and sole-source procurements done under "unusual and compelling urgency."[34]

Most importantly from an international trade perspective, the new statute left in place the exemptions created by treaty and agreement for those specialty metals incorporated into defense items in qualifying nations. This is an anomalous and telling exception in a highly-industrialized nation,[35] for it means that the specialty metals ban does *not* impede U.S. trading partners' in exporting *completed defense items* to the United States, even if those items contain foreign specialty metals. Instead, the ban is meant to—and does—impede only transnational trade in a material, *i.e.,* specialty metals.

In passing the new statute, however, Congress opted not to treat the Berry Amendment as a blunt tool to enrich the domestic specialty metals industry—that would be difficult to sustain politically, given the disruption it causes defense production—but rather as a means of ensuring U.S. access to specialty metals in a time of war. As an extension of that "supply chain" rationale, Congress created a new board that will assess the strategic imperatives for the specialty metals ban. Congress' new emphasis on sheltering a strategic supply chain, rather than simply protecting U.S. industry, arguably set a new tone in domestic preferences, one that may shape future policy debates. Unfortunately, the legislation also left a number of questions unanswered.

On December 6, 2006, Shay Assad, Director of Defense Procurement

and Acquisition Policy, issued guidance to implement the new legislation. This guidance, issued in the form of a class deviation[36] to existing regulations,[37] will remain in place until rescinded or supplanted by a revised regulation.[38] The new guidance resolves several ambiguities in the recent defense authorization act, though it is almost certainly not the last word on this topic.

3. Tiering: Enhanced Complexity Rather Than Optimal Policy?

The December 6, 2006 class deviation created a curious "tiering" of specialty metals compliance, which seems to borrow loosely from other domestic-content regimes. It is reminiscent of the Federal Transit Administration's "Buy American" regulations, for example, which require that all manufactured products used in federally funded projects be manufactured in the United States, and that all *components* of those manufactured products—but not necessarily all *sub*components—also be of U.S. origin.[39] The tiers would apply to contracts in six key categories of contracts: (1) aircraft, (2) missile and space systems, (3) ships, (4) tank and automotive items, (5) weapon systems, and (6) ammunition.[40] The new "tiering" prescription, taken in conjunction with the Alternate I version of a new Defense Federal Acquisition Regulation Supplement (DFARS) clause,[41] to be used in the six key

---

38. *See, e.g.*, David M. Nadler, Harvey G. Sherzer & Michael C. Mateer, Feature Comment, *New Department of Defense Berry Amendment Guidance—Some Answers and More Questions*, 48 GOV'T CONTRACTOR ¶ 435 (2006).

39. *See* 49 C.F.R. § 661.5(d)(2) (2007).

40. These six categories date back at least to the early 1970s, when then-Secretary of Defense Melvin Laird focused Berry Amendment specialty metals enforcement on these categories because they encompass most of the specialty metals purchased by the Defense Department.

41. DFARS 252.225-7014, 48 C.F.R. § 252.225-7014 (deviation). As is noted further below, the controversy over specialty metals is likely to continue for some time. The Defense Department's December 2006 action was followed by Defense Department "non-availability" determinations that there were not adequate domestic sources of specialty metals for circuit cards and fasteners; those determinations are available at http://guidebook.dcma.mil/225/instructions.htm ("cancel" password). The House Armed Services Committee responded in May 2007 with a number of provisions which seemed specifically intended to constrain the use of foreign specialty metals. *See* National Defense Authorization Act for Fiscal Year 2008, H.R. 1585, 110th Cong., 1st Sess. (as

categories of contracts, mean that the Berry Amendment specialty metals ban will extend only to:

- End products, *i.e.*, supplies delivered under a line item of a contract;
- "First-tier components," defined as "first-tier parts and assemblies that are incorporated directly into the end product"; and
- "Second-tier components," in turn defined as parts and assemblies "that are incorporated directly into a first-tier component."

The Defense Department's "tiering" approach also follows the conceptual structure of the Federal Acquisition Regulation (FAR), which defines "end products" ("articles, materials, and supplies to be acquired for public use") and "components" ("an article, material, or supply incorporated directly into an end product")[42]—though the FAR definition does not seem to contemplate "second-tier" components.

The "tiering" approach adopted by the Defense Department may reflect a practical concern that haunts the Berry Amendment specialty metals requirements: the concern, for example, that a small bolt containing Russian titanium, if installed in an otherwise compliant fighter jet, could disrupt delivery of that aircraft. By applying the Berry Amendment ban only to "end products" and "first- and second-tier" components, the Defense Department's latest guidance avoids that practical concern because the small "noncompliant" bolt in our example presumably would not fall into any of those categories.

Even this simple example of the Russian titanium bolt, however, exposes how hard the Defense Department strained to accommodate dueling demands—legislative protectionism and a global supply chain. The example suggests that the compromise drawn by the Defense Department ultimately may not be sustainable. How is one to determine whether the hypothetical "noncompliant" bolt is a "first-tier" or "second-tier" component? Unlike an "end product," which one assumes would be listed in a contractual schedule of items to be delivered, assigning "tiers" to components is a hugely subjective exercise.

---

reported out of the House Armed Services Committee, May 11, 2007), at § 809 (which would "clarify" requirements relating to specialty metals), § 845 (which would "level" the competitive advantage enjoyed by certain foreign users of specialty metals), and § 846 (which would call for formal rulemaking before the DoD exempted contracts from specialty metals requirements on a class basis). The Bush administration threatened to veto the legislation if it passed with these domestic preferences in place. *See* Statement of Administration Policy, H.R. 1585—National Defense Authorization Act for Fiscal Year 2008, at 1 (May 16, 2007), *available at* http://www.whitehouse.gov/omb/legislative/sap/110-1/hr1585sap-h.pdf.

42. 48 C.F.R. § 25.003 (2007).

The examples provided with the December 2006 class deviation indicate that "tiers" do *not* correspond to levels of prime- and subcontractors; thus, per the example provided by the Defense Department, a *prime* contractor may contract for and deliver to the government a "first-tier component." The examples suggest that first- and second-tier components are instead defined *functionally*, rather than by the level of contractor (or subcontractor) supplying the item. The Defense Department guidance states that a first-tier component (a rocket motor, in the example) is incorporated directly into an end product (the rocket), and a second-tier component (a power supply for the rocket motor, in the example) is incorporated directly into a first-tier component. This "functional" approach makes a great deal of sense, for if the Defense Department had taken a "contractor-tier" approach—if, for example, materials from "third-tier" subcontractors automatically qualified as "third-tier" components (and thus fell outside the Berry Amendment ban)—prime contractors would simply fragment the supply chain into many more contractual layers in order to avoid Berry Amendment compliance costs.

On its face, this "functional" approach also seems simple to implement: it merely means identifying "end products" to be delivered under a contract, and then, like unpacking Russian *matryoshka* dolls, determining which "tier" of component may include noncompliant specialty metals. Under the Defense Department class deviation, only the first and second tiers of components will be relevant.

In fact, however, the Defense Department's "tiering" approach leaves a great deal of uncertainty. In a highly complex weapon system, it is often very difficult to determine at what "tier" a specific item falls. Is a "tier" an aircraft door or the aircraft's entire fuselage, for example? This uncertainty will generate substantial costs and inefficiencies as contractors and suppliers haggle over the metaphysics of "tiers" in order to allocate the risks and costs of Berry Amendment compliance.

At the same time, however, the uncertainty in interpretation will leave the Defense Department and its contractors significant flexibility in interpreting the Berry Amendment's specialty metals ban—flexibility that ultimately may allow for narrow interpretations of the ban. The confusion over defining "tiers" of components also means that it will be difficult to punish noncompliance as fraud, a threat which normally cows contractors into strict compliance in the U.S. system. In the end, the Defense Department's decision to inject flexibility into Berry Amendment compliance reflects the internal fissures that undermine traditional domestic preferences: agencies and contractors, under pressure to draw on a global supply chain, are resisting political

demands to accommodate domestic industries.

B. *Secondary, Non-Economic Objectives As Barriers: Assessing Accessibility Requirements in Information Technology*

The next category of rules-based barriers is secondary objectives of a non-economic nature. As Arrowsmith describes them, "[s]econdary policies (or, in United States terminology, 'collateral' policies) are those that do not relate to the main object of the procurement . . . for example, a policy of placing government contracts with disadvantaged ethnic groups to promote racial equality."[43] These "secondary" or "collateral" policies, which typically are used to identify favored contractors, or weigh in the decision to award a contract, can erect substantial barriers to entry to a procurement market. Intentionally or not, these collateral policies may discriminate in favor of domestic industry. Furthermore, when integrated into a complex procurement process, collateral policies almost invariably increase contracting officials' discretion, and thus diminish transparency and increase the threat of corruption.[44]

One intriguing example in this sphere is the collateral (or "secondary") procurement policy of requiring that government agencies generally purchase only information technology that is accessible to persons with disabilities. This requirement, now enshrined in U.S. federal procurement rules,[45] proves particularly relevant because the European Union is considering a similar accessibility requirement for

Stark, Feature Comment, *The FAR Rule on EIT Accessibility Under Section 508—Nine Months Later*, 44 GOV'T CONTRACTOR ¶ 149 (2002); Christopher R. Yukins, *Making Federal Information Technology Accessible: A Case Study in Social Policy and Procurement*, 33 PUB. CONT. L.J. 667 (2004).

procurements in its member states.[46]

As in the United States, the goal of the European effort is to leverage government procurement to increase accessibility across the information technology marketplace, both inside and outside government.[47] The European "eAccessibility" initiative, like the accessibility initiative in the U.S. procurement system, is thus a typical "collateral" policy imported into the procurement system: a social goal carried out through the procurement process, but not directly related to the procurement system's core mission. Although the European initiative is several years behind the United States' effort, there is every indication that the European Union will follow much the same path, and promulgate technical standards for accessibility that European agencies will have to follow in purchasing information technology and communications equipment. The U.S. experience is therefore important in predicting the trade impact that a matching regime might have in Europe.

In principle, the U.S. accessibility requirements could have proven terribly discriminatory against foreign suppliers. Unlike the European initiative, which seeks to build on harmonized international accessibility standards,[48] the U.S. accessibility standards-writers did not simply rely on industry standards, but in many instances crafted their own specific standards under Section 508 of the Rehabilitation Act.[49] Foreign vendors thus faced a real risk that their electronics and information technology products, not developed in accordance with the unique U.S. standards under Section 508, would be excluded from the U.S.

procurement market.

In practice, however, the U.S. accessibility standards proved less restrictive than expected for both domestic and foreign vendors. The U.S. accessibility standards were overtaken by changes in technology and hampered by their incompatibility with emerging international standards.[50] The accessibility standards left numerous loopholes for agencies and vendors,[51] and in implementing the standards in procurement, agencies have not been aggressive in forcing accessibility.[52] Vendors, for their part, have proven reluctant to challenge agencies or competitors on accessibility through bid protests or otherwise.

The agencies' slow implementation of accessibility requirements may be due to the sheer complexity of the standards, but is also likely due, in part, to agencies' resistance to "collateral" policies that distract from the agencies' core missions.[53] For many of the same reasons that agencies resist traditional domestic preferences such as the Berry Amendment's specialty metals ban—agencies' reluctance to incur additional costs, suffer delay, or lose focus in procuring best value—agencies are likely to resist collateral (or "secondary") policies in procurement. This is not, of course, to argue that collateral policies are not important in procurement, or to suggest that they will not work, in practice, to discriminate against foreign suppliers, which are generally less familiar with how those policies are implemented in procurement systems. The point instead is that the protectionist impact of these discriminatory collateral policies—and the impulse to accommodate them in the first place—will likely be muted by agencies' stubborn reluctance to implement preferences and policies that are not, at bottom, the agencies' own.

C. *"Illegitimate Practices" as a Barrier to Entry: The Boeing-Druyun Debacle*

The third category of barriers to procurement markets stems from "illegitimate practices." This category, Arrowsmith argues, "consists of corruption, nepotism and patronage (the use of procurement to

50. *See* Wade-Hahn Chan, *Advisory Committee Faces Major Hurdles with Section 508 Revision*, FED. COMPUTER WK., Nov. 15, 2006, *available at* http://www.fcw.com/article96831-11-15-06-Web.

53. *See* Margaret A.T. Reed, *Agencies Still on the Learning Curve*, FED. COMPUTER WK., Aug. 11, 2003, *available at* http://www.fcw.com/article80520-08-11-03-Print.

reward political supporters)." Most of these practices are patently illegal and unethical, which sets them apart from the generally legal discriminatory practices discussed above, such as traditional domestic-content requirements and "collateral" socioeconomic policies. Corruption, in contrast, is clearly illegal. Patronage, however, makes a harder case; Arrowsmith points out "in the case of patronage the line between the legitimate and the illegitimate uses of procurement may be difficult to draw and is different in different national systems."[54]

The corruption of Darleen Druyun, a senior U.S. Air Force procurement official, captured the attention of the U.S. procurement community[55] and prominently illustrated discriminatory illegitimate practices.[56] Ms. Druyun was the senior civilian procurement official in the Air Force, and had accumulated extraordinary powers over the decades she spent in its procurement system.[57] As part of a broader investigation into an Air Force procurement involving a potential lease of refueling tankers—driven, in part, by Senator John McCain's (R-AZ) concern for apparent waste in the procurement—it emerged that Ms. Druyun had negotiated her later employment with the Boeing Com-

56. Sadly, the Druyun scandal proved a mere harbinger for, among others, Representative Randy "Duke" Cunningham, who:

> demanded, sought, and received at least $2.4 million in illicit payments and benefits . . . including cash, checks, meals, travel, lodging, furnishings, antiques, rugs, yacht club fees, boat repairs and improvements, moving expenses, cars, and boats; . . . used his public office and took other official action to pressure and influence [DoD] personnel to award and execute government contracts in a manner that would benefit [his coconspirators] . . . because of his receipt of the above-described payments and benefits, and not because using [these firms] was in the best interest of the country[.]

Plea Agreement for Defendant Randall Harold Cunningham, *United States v. Cunningham*, Crim. No. 05cr2137-LAB (S.D. Cal. Nov. 23, 2005), *available at* http://news.findlaw.com/wp/docs/crim/uscnnghm112805plea.pdf. Even before it became clear that the sensational Cunningham allegations were true, it was apparent that a strong message regarding the importance of integrity was not emanating from the highest levels of government. *See, e.g.*, Steven L. Schooner, Viewpoint, *Procurement Proper*, 37 GOV'T EXEC. 70 (Aug. 15, 2005), http://www.govexec.com/features/0805-15/0805-15advp.htm.

57. *See, e.g.*, Leslie Wayne, *The Scandal of the Pentagon's "Dragon Lady,"* INT'L HERALD TRIB., Oct. 9, 2004, at 16.

pany at the same time she was negotiating with Boeing on the tanker procurement, in violation of 18 U.S.C. § 208. She pleaded guilty and served nine months in federal prison. Boeing ultimately paid a record fine of $615 million to resolve various allegations stemming from procurement improprieties, including its dealings with Ms. Druyun.[58]

For our purposes here, the Druyun case is interesting because she improperly and corruptly favored Boeing, a domestic supplier, over a foreign supplier, European Aeronautic Defense and Space Company (EADS).[59] But it was not discrimination against a foreign supplier that landed Ms. Druyun in prison. Rather, it was the *corruption, her personal self-dealing*, that triggered the discrimination and landed Ms. Druyun in jail. Indeed, any discriminatory favoritism Ms. Druyun afforded Boeing would have been against a backdrop of fervent domestic support for Boeing, a leading U.S. manufacturer.[60] What the Druyun case illustrates is that an anti-corruption legal regime—even one as strong and mature as that of the United States'—can attack only corruption, and can do little (if anything) to dissipate anti-foreign discrimination that can, in effect, block access to a procurement market.[61] The good news,

---

58. *See, e.g.*, Press Release, U.S. Dep't of Justice, Boeing to Pay United States Record $615 Million to Resolve Fraud Allegations (June 30, 2006), http://www.usdoj.gov/opa/pr/2006/June/06_civ_412.html; Tony Capaccio & Robert Schmidt, *Boeing to Pay Record Settlement*, S. FLA. SUN-SENTINEL, July 1, 2006, at 14B.

59. *See* Supplemental Statement of Facts, *United States v. Druyun*, Crim. No. 04-150-A, at 2-3 (E.D. Va. 2004), *available at* http://www.govexec.com/pdfs/druyunpostpleaadmission.pdf. According to this document,

> In negotiations with Boeing concerning the lease agreement for 100 Boeing KC 767A tanker aircraft, the defendant agreed to a higher price for the aircraft than she believed was appropriate. The defendant did so, in her view, as a "parting gift to Boeing" and because of her desire to ingratiate herself with Boeing, her future employer. The defendant also now acknowledges providing to Boeing during the negotiations what at the time she considered to be proprietary pricing data supplied by another aircraft manufacturer [presumably EADS].

60. *See* James Wallace, *Tanker Wars: Boeing Challenged*, SEATTLE POST-INTELLIGENCER, June 1, 2006, at A1, *available at* http://seattlepi.nwsource.com/business/272243_tankers01.html.

61. European aerospace executives and trade proponents must have been troubled, for example, when Senator John McCain released a number of e-mails related to the Boeing tanker-lease deal, including this April 16, 2003 exchange. Michael W. Wynne, then-Under Secretary of Defense for Acquisition, wrote: "They [Airbus] came in a couple of weeks ago and offered to build the majority [of the tankers] here in America .... I am not sure where this will lead, but the benefits of competition may be revealing." The Secretary of the Air Force, John

however, is that an effective anti-corruption regime, such as that in the United States,[62] can help tamp down discrimination (and thus help open a domestic procurement market) by deterring corruption that would otherwise fuel the fires of discrimination; that, in turn, can yield substantial welfare benefits for the purchasing nation.[63]

D. *Restrictions Directed to Agencies' Procurement Objectives: Framework Agreements and Interagency Contracting*

The fourth category of barriers stems from measures "concerned with the 'commercial' aspects of procurement. . .and an efficient procurement process." Arrowsmith cautions that these measures, while ostensibly intended only to improve the procurement system, may, in practice, have deep discriminatory effects.[64]

In the U.S. procurement market, the best current example of this type of indirect barrier is framework contracting.[65] In the U.S. federal arena, framework agreements are known as "indefinite delivery/ indefinite quantity" (IDIQ) contracts, "government-wide acquisition contracts" (GWACs), or "Multiple Award Schedules" (MAS) contracts, depending on the agency or context in which they arise. For purposes of common understanding, however, this Article uses the more descriptive European term, "framework agreements."[66]

Roche, replied: "Mike, you must be out of your mind!!! . . . We won't be happy with your doing this!" 150 CONG. REC. S11776, S11780 (Nov. 20, 2004). This is an important reminder that, as at least one post-scandal review panel concluded, procurement rules alone are insufficient; leadership plays a critical role in implementing policy. *See generally* DEF. SCI. BD., REPORT OF THE DEFENSE SCIENCE BOARD TASK FORCE ON MANAGEMENT OVERSIGHT IN ACQUISITION ORGANIZATIONS (March 2005), *available at* http://www.acq.osd.mil/dsb/reports/2005-03-MOAO_Report_Final.pdf.

62. This is not to suggest that the current oversight regime in the United States is fully effective. Failure to invest in appropriate personnel to staff the U.S. procurement regime has led to an increasingly distressing string of scandals and failures that, we expect, will result in congressional action (and potential over-reaction) for the foreseeable future. *See generally* Steven L. Schooner, *Contractor Atrocities at Abu Ghraib: Compromised Accountability in a Streamlined, Outsourced Government*, 16 STAN. L. & POL'Y REV. 549, 550 n.3, 557-61 (2005).

63. *See, e.g.*, Simon J. Evenett & Bernard M. Hoekman, *Government Procurement: Market Access, Transparency, and Multilateral Trade Rules* 18-19 (World Bank Policy Research, Working Paper No. 3195, Jan. 2004), *available at* http://ssrn.com/abstract=342380 (analyzing theoretical economic impact of gains in transparency).

64. *See* ARROWSMITH, *supra* note 13, at 17-18.

65. This review of framework contracting draws on discussion papers presented by Christopher Yukins at The George Washington University Law School (Sept. 2005) and at the conference of the Federal Circuit Bar Association (Washington, D.C., May 2006).

66. *See, e.g.*, Sue Arrowsmith, *The Past and Future Evolution of EC Procurement Law: From Framework to Common Code*, 35 PUB. CONT. L.J. 337, 348-49, 362 (2006) (discussing regulation of

Under framework contracting, a procuring agency (often a centralized purchasing agency) generally will compete and award multiple standing contracts, or "framework" agreements. To win those contracts, vendors typically propose unit prices for specific goods or services; at the time of award, however, there is no certainty as to the actual number of items or hours that will be ordered.

As requirements arise, a customer agency—which may not be the agency that actually holds the contract, for that may be a centralized purchasing agency—will actually issue a task or delivery order against a standing contract. That order may be competed among the various holders of the standing contracts; the extent of competition varies enormously, depending on the applicable rules and agency procedures. There may be no effective competition at all (the worst-case scenario). Further, there may be little to no transparency to the order: in many cases, the requirement is never announced, the competition (if any) is held privately among the standing contract holders, and the order is issued with no public disclosure.

In theory, these types of contracts should provide more competition because framework agreements, as noted, are *presumptively* awarded to multiple suppliers at initial award, and U.S. regulations require that, after initial award, each of these multiple suppliers must be afforded a "fair opportunity" to compete for subsequent orders awarded under the framework agreements. In practice, however, too often suppliers are denied that fair opportunity to compete, even if they hold standing contracts.[67]

Agencies can avoid competition—and thus deny suppliers the "fair opportunity to compete"—by abusing certain exceptions authorized by the Federal Acquisition Regulation (FAR). Furthermore, the Government Accountability Office (GAO) has found that even if multiple-award contractors are theoretically given a fair opportunity to compete, practical considerations often make it impossible for non-incumbent contractors to respond in time to be eligible for award.[68]

---

framework agreement under new European procurement directives); Sue Arrowsmith, *Framework Purchasing and Qualification Lists under the European Procurement Directives (Parts I & II)*, 8 PUB. PROC. L. REV. 115, 161, 168 (1999).

CONTRACTOR ¶ 431 (Nov. 6, 2002) (citing U.S. DEP'T OF DEF., OFFICE OF INSPECTOR GEN., MULTIPLE AWARD CONTRACTS FOR SERVICES, REPORT NO. D-2001-189 (Sept. 30, 2001) [hereinafter MULTIPLE AWARD CONTRACTS]).

68. *See* U.S. GEN. ACCOUNTING OFFICE, REPORT NO. GAO/NSIAD-00-56, FEW COMPETING PROPOSALS FOR LARGE DOD INFORMATION TECHNOLOGY ORDERS 10 (Mar. 2000), *available at* http://www.gao.gov (search "Keyword or Report #" for "NSIAD-00-56").

Collusion, or at least calculation, seems to play a part in this loss of competition. A report from the Defense Department's Inspector General showed that multiple-award framework agreements had been used on at least one occasion to create an illusion of competition, when in reality the customer agency had already selected a preferred contractor or knew that two contractors had agreed not to compete against each other. The audit report revealed that two-thirds of the contracting organizations reviewed "awarded task orders on a directed-source basis because the program offices preferred to work with a specific contractor."[69]

A number of reports have suggested why agency officials collude to reduce competition under task-order contracts. Centralized purchasing agencies, which establish the framework agreements in the first instance, will feel pressure to accommodate customer agencies by allowing tasks to be awarded to those customer agencies' favored contractors. To ease award to a favored contractor—often the incumbent contractor—the contracting agency may (1) fail to notify other vendors (other framework agreement holders) of an available task, (2) provide inadequate notice, (3) fail to provide useful specifications, (4) impose biased technical requirements, (5) allow a slanted evaluation of offers, (6) inadequately assess the reasonableness of the favored vendor's proffered price,[70] or (7) ignore the many other rules meant to ensure vigorous, transparent competition.[71]

These failures in competition are compounded, and shrouded, by a lack of transparency and accountability. As an example, although traditionally all federal business opportunities over $25,000 had to be advertised,[72] neither requirements nor awards under U.S. framework agreements must be published.[73]

Indeed, even the *existence* of task-order contracts is not currently published. Although FAR Subpart 5.6 requires publication of a list of

interagency framework agreements, as of February 1, 2006 that list, which is to be published at www.contractdirectory.gov, had been disabled. Customer agencies instead must rely on vendors and centralized purchasing agencies to search out these contracting vehicles in an all-too-invisible marketplace that relies on relationships more than on competition, and which raises obvious dangers of corruption.[74] Nor are there effective institutional checks on this marketplace of relationships, for many orders under task-order contracts are exempt from protest.[75]

These failures in transparency and competition have prompted many calls for reform of task-order contracts,[76] and Congress and the agencies have responded with a number of incremental efforts at reform.[77] The Acquisition Advisory Panel, a blue-ribbon panel launched in 2003, recently issued a nearly 500-page draft report, much of which focused on problems (and possible solutions) regarding these types of contracts.[78] Despite these efforts, however, the core problems with task-order contracting in the United States—minimal transparency, diluted competition, and inadequate review—remain unresolved.

The framework agreements and their associated problems are not unique to the United States. As the discussion above notes, in the federal system in the United States, orders under a master framework agreement need not be publicized for competition or award. Similarly, under the recent European Union procurement directives, once a framework agreement is in place, the "mini-competitions" between multiple awardees for the follow-on contracts need not be publicized.[79] Guidance published by the U.K. Office of Government Commerce

They are designed to promote efficiency and effectiveness and to minimise credit risk in the implementation of the Bank's lending and investment operations.").

indicates that, if the original agreement is publicized in the *Official Journal of the European Communities*, subsequent contracts competed under that agreement need not be advertised.[80] Unlike the U.S. system, the European directive contemplates an initial "framework agreement" and then a series of "contracts," to be issued under the framework agreement.[81]

There are subtle distinctions in terminology, but not necessarily in substance, between the U.S. and European rules systems.[82] As in the United States, requirements need only be competed among the standing awardees under the EU framework agreements.[83] Indeed, under the EU system there may be even less competition. While U.S. rules on competition contemplate affording all the master contract holders a "fair opportunity to compete" for individual orders,[84] the EU directive countenances award of an order (a "contract") without further competition among the standing framework contractors, if it is possible to make an award per the terms already "laid down in the [original] framework agreement."[85]

All of the problems presented by framework contracting—the loss of transparency and competition, and the profound incentives (and opportunities) for favoritism and corruption—raise serious potential barriers to foreign vendors. As a threshold matter, a foreign vendor

80. *See* U.K. Office of Gov't Commerce, *Framework Agreements and EC Developments* ¶ 9 (2004), *available at* http://www/ogc.gov/documents/Framework_Agreements_and_EC_Developments.doc ("It is far better, therefore, to advertise the framework itself, so that there is no need to consider the need for advertising as each call-off comes up."); *cf.* FAR, 48 C.F.R. § 16.505(b)(4) (record required only in contract file). *See generally* Sue Arrowsmith, *Framework Agreements under the UK Procurement Regulations: Denfleet v. NHS Purchasing and Supply Agency*, 14 PUB. PROC. L. REV. NA86 (2005); Arrowsmith, *Framework Purchasing, supra* note 66, at 123 (attributing an increasing use of electronic media and electronic ordering to the increased importance of framework agreements).

81. *See* Council Directive 2004/18, On the Coordination of Procedures for the Award of Public Works Contracts, Public Supply Contracts and Public Service Contracts, art. 32, 2004 O.J. (L 134) 114 [hereinafter Public Works Directive], *available at* http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=CELEX:32004L0018:EN:NOT. See generally Steven L. Schooner & Christopher R. Yukins, *Emerging Policy and Practice Issues*, a paper presented at the West-Thomson Government Contracts Year in Review Conference in February, 2005, *available at* http://papers.ssrn.com/sol3/papers.cfm?abstract_id=663464.

82. In the United States' federal system, as noted, the initial award is for a competitive "contract," but then task and delivery *orders—not* contracts—are issued against that master contract. *See* FAR, 48 C.F.R. §§ 16.501, 16.505 (2007). Thus, there is a subtle difference in nomenclature: U.S. agencies issue "task orders" under a master contract, while European agencies will issue "contracts" under a master framework agreement.

83. *See* Public Works Directive, *supra* note 81, art. 12.

84. *See* FAR, 48 C.F.R. § 16.505(b)(1) (2007).

85. *See* Public Works Directive, *supra* note 81, art. 32, ¶ 4.

new to the market must learn of the framework agreements' importance. Because opportunities and awards under framework agreements are not publicized, however, it is difficult for any newcomer to discern their importance. Notably, even seasoned U.S. observers were surprised when the Acquisition Advisory Panel, an independent commission, reported that fully forty percent of the nearly-$400 billion U.S. procurement market are handled through interagency framework agreements.[86]

Once a foreign vendor does finally appreciate the importance of framework agreements, the vendor faces a practical problem of actually joining one. Most framework arrangements in the United States are "closed" once the initial contracts are awarded, typically for terms of up to five to ten years. An exception is the General Services Administration's Multiple Award Schedules (MAS) contracts, which are always "open": a vendor willing to submit to the three- to six-month negotiation process may always submit an offer to join the MAS contracts. There is no true "competition," in the strictest sense, to join the GSA MAS arrangement; instead, the vendor must disclose its commercial pricing, and generally must commit to keep its MAS prices at a level below its commercial prices over the term of the MAS contract, which may be extended up to twenty years (through five-year options). As a result of this "open" approach, literally thousands of vendors have joined the GSA MAS system.

The "open" system used by the GSA MAS contracts eliminates one barrier to entry for foreign vendors—the problem of arriving too late, after the standing agreements are in place—but raises other, far less obvious barriers to the naïve foreign vendor. Over decades of practice, the MAS negotiation process has evolved into an arcane and highly sophisticated art form. Because the MAS vehicle is always "open," and there is no real competition *between* vendors to join, a vendor's commercial pricing is the key benchmark for the vendor's MAS pricing. As a result, in negotiating prices under MAS contracts, vendors must struggle artfully to distinguish their commercial discounts, both before and after award. Otherwise, low commercial prices may "choke" the prices allowed under the MAS contract; at the same time, vendors must be concerned that the MAS pricing structure (in essence, a "most favored nation" pricing structure) will restrict their ability to lower their commercial prices. In sum, therefore, the arcane rules of pricing under the GSA MAS contracts raise their own, maddening barrier to foreign

86. *See* AAP DRAFT REPORT, *supra* note 8, at 3.

vendors that seek to enter the U.S. market.

Even if a foreign vendor has discovered framework contracting, has identified a viable framework arrangement to join, and has passed through the contracting process, the vendor must still survive in the brutal and shadowy world of "call-off" competitions. As noted, agencies are *not* required to publicize opportunities to be let through standing contracts. Depending on the applicable rules and circumstances, the customer agencies *may* solicit competition from those that hold standing framework agreements; in some cases, however, the agency may not. When the competition for an order is held, the agency may keep its stated criteria for award to a breezy minimum, and, because debriefings and protests often are not required, the agency's discretionary award decision may be completely immune from challenge or review. To add insult to injury, the data on the award may be spotty, and the terms used—because the standing contracts are generically crafted with little particularity—may well favor a savvy, incumbent contractor.

In both principle and practice, therefore, framework agreements pose a very real barrier to international trade.[87] More broadly, they show how pernicious these types of rules-based barriers can be: where agencies are enticed by "efficiency" (or other gains), customer agencies (and their central purchasing cohorts) may well embrace a procurement device that is, in practice, grotesquely discriminatory. The agencies will *not,* in this instance, serve as a counterweight to discrimination. Unlike other categories of barriers to procurement across borders—classic domestic-content requirements, collateral socioeconomic requirements, or illegitimate practices—here there is no institutional resistance to the barrier: the government agencies, normally natural proponents of reducing barriers, will instead *foster* the barriers in their eagerness to grasp some other institutional goal, such as efficiency. For these types of barriers, therefore, the pressure for reform—and for reducing the barriers to trade—probably must come from outside the procurement system's own institutions.

III. Instruments to Open the International Procurement Market

Having described the potential of an open international procurement market, and the obstacles to achieving it, we turn now to the various types of instruments that might be used to open that market. Public procurement policymakers might recoil at the menu we offer to

87. *Cf.* Arrowsmith, *supra* note 13, at 271-75 (discussing framework purchasing under the GPA).

the extent that none of these vehicles is a typical tool used to effectuate public procurement policy. For example, in the United States, procurement policy and practice are, *inter alia,* framed by legislation both authorizing action and appropriating money to pursue objectives, implemented by regulation, clarified and embellished upon in policy documents, interpreted through adjudicatory actions (*e.g.*, bid protests, contract disputes, and criminal indictments and prosecutions, some of which produce publicly available precedential opinions), and commented upon by scholars and practitioners in books, journal articles, and in the trade press. But experience suggests that in the United States, as in other nations, procurement policy and law tend to be grudgingly reconciled with, rather than driven by, norm-creating global procurement instruments.

For our purposes here, there are at least three basic types of instruments that may help liberalize international procurement markets:

- *Model procurement codes, or model statements of principle or best practices,* that discourage discrimination, either explicitly or by discouraging indirect barriers to trade. The United Nations Commission on International Trade Law (UNCITRAL) Model Law on Procurement of Goods, Construction and Services falls within this category. Less obvious models include the Organisation for Economic Cooperation and Development (OECD) procurement assessment tool, and the "Integrity Pacts" fostered by Transparency International.
- *Procurement guidelines imposed by central financial institutions.* Procurement guidelines issued by the World Bank or the regional development banks are examples of this category.
- *Binding international agreements or directives that require nondiscrimination,* both explicitly and implicitly by barring various recognized indirect barriers to international procurement. These include, of course, the World Trade Organization (WTO)'s Government Procurement Agreement.

We will address each of these only briefly, with due regard for the extensive literature already available regarding many of these instruments. Of course, our list is not exhaustive. In his 2005 essay, *The Global Procurement Harmonisation Initiative,*[88] Attila Kovacs canvassed many of these instruments in his effort to chart a path forward for harmoniza-

88. Attila Kovacs, *The Global Procurement Harmonisation Initiative,* 14 PUB. PROC. L. REV. 15 (2005).

tion of procurement codes worldwide. Frankly, Kovacs' vision is far more ambitious than ours. Where he aspires to a form of global uniformity, through thoroughly harmonized global procurement codes, we do not share his optimism.[89] Rather, we merely seek to identify an instrument or instruments that could be used, much like a constitution, to shape individual nations' procurement codes in a common fashion in order to open markets and reduce discrimination. In the end, Kovacs is right to press for more thorough harmonization, because dissonance between countries' procurement codes is inefficient and poses barriers to entry. Arrowsmith calls these inefficiencies "structural restrictions," which raise practical barriers to entry as foreign vendors run headlong into dense and alien procurement regimes.[90] As a practical and political matter, however, we sense that any semblance of true procurement code harmonization is at least a generation away. For now, therefore, progress will stem from instruments that impose common norms on hugely disparate procurement regimes.

A. *Model Codes and Principles*

Internationally, the most commonly recognized model procurement code is the 1994 UNCITRAL Model Law on Procurement of Goods, Construction and Services.[91] According to UNCITRAL, at least seventeen nations have modeled at least some part of their procurement

89. Our cynicism stems not only from the vagaries of global cooperation and convergence, but also from domestic experience. More than two decades have passed since the putatively uniform U.S. Federal Acquisition Regulation (FAR) system first became effective, on April 1, 1984. *See generally* JAMES F. NAGLE, A HISTORY OF GOVERNMENT CONTRACTING, Ch. 22, "The Modern Era: A Sea of Paperwork" (1992) (discussing the evolution of the uniform regulation system). Since then, Balkanization has reigned. For example, the mid-1990's witnessed a tsunami of procurement reforms intended to make the procurement system less bureaucratic and more businesslike. Wide-reaching reform statutes, such as the Federal Acquisition Streamlining Act of 1994, Pub. L. No. 103-355, 108 Stat. 3243, the Federal Acquisition Reform Act of 1996 (FARA), Pub. L. No. 104-106, Division D, §§ 4001-4402, 110 Stat. 642, and the Information Technology Management Reform Act of 1995 (ITMRA), Pub. L. No. 104-106, Division E, §§ 5001-5703, 110 Stat. 679 (1996) (FARA and ITMRA are now jointly known as the Clinger-Cohen Act), were implemented by new and revised regulations, dramatically altering the Federal procurement landscape. And the calls for reform continue unabated.

90. *See* ARROWSMITH, *supra* note 13, at 18.

91. UNCITRAL, UNCITRAL MODEL LAW ON PROCUREMENT OF GOODS, CONSTRUCTION AND SERVICES WITH GUIDE TO ENACTMENT (1994), *available at* http://www.uncitral.org/uncitral/en/uncitral_texts/procurement_infrastructure/1994Model.html. Christopher Yukins serves as an expert to the current initiative to revise and update the UNCITRAL model law.

codes on its model law.[92] The UNCITRAL model law, currently being updated,[93] is regularly cited as a template for reform.[94]

The UNCITRAL model law is not necessarily a tool for opening international procurement markets, as it contemplates domestic preferences.[95] But because it offers a comprehensive set of rules to frame an efficient procurement process, the UNCITRAL model is an important tool for harmonizing nations' procurement codes.[96] Harmonization is, itself, a significant step forward in opening markets because consistency between procurement regimes reduces costs for vendors that seek to compete across borders, and for nations trying to improve their own procurement systems.

There are other interesting models for procurement emerging internationally. The first is an initiative coordinated by the OECD to foster better practices in procurement, as part of the OECD's broader effort to encourage development and sound governance. The OECD is made up of industrialized donor nations, and the assessment tools it is creating are intended, at least in part, to ensure that developing nations use development funds in a sound, transparent manner.[97] The OECD *Methodology for Assessment of National Procurement Systems*[98] is not directed primarily to opening procurement markets: the OECD methodology only discourages (and does *not* bar) discrimination,[99] and the purpose of the tool is to help developing nations build capacity for

development,[100] not necessarily to open markets.

Another interesting model for harmonization is the "Integrity Pacts" being sponsored by Transparency International, a leading international organization battling corruption.[101] Transparency International's Integrity Pacts include agreements to be entered into by the purchasing agency and all bidders. Per those agreements, none of the parties is to engage in bribery or collude with competitors during formation or administration of the subject contract, and a monitoring system is to be put in place to ensure compliance.[102] These Integrity Pacts, however, are focused primarily on ensuring integrity, are limited to specific projects or procurements rather than state-wide regimes, and are not likely to serve as ready instruments to open international markets.

B. *Procurement Guidelines of Development Banks*

Another source of guidance and potential liberalization for procurement regimes worldwide derives from the guidelines from the World Bank and the regional development banks,[103] to which borrower nations generally must conform in order to qualify for financing.[104]

> When the World Bank provides financing to its member countries for investment projects, each project is governed by a legal agreement between the World Bank and the government agency who receives the funds. One of the key obligations in the 'loan agreement' is that governments abide by the Bank's procurement policies as detailed in the *Guidelines: Procurement under IBRD Loans and IDA Credits* and the *Guidelines: Selection and Employment of Consultants by World Bank Borrowers.*

Id. See also Juan Rovira, *Trade Agreements, Intellectual Property, and the Role of the World Bank in Improving Access to Medicines in Developing Countries*, 4 YALE J. HEALTH POL'Y L. & ETHICS 401 (2004)

Development banks routinely impose minimum procurement rules to ensure transparency, competition, and integrity in the projects they fund.

The World Bank's guidelines, for example, help open procurement markets by requiring that vendors from all nations be allowed an opportunity to provide goods and services,[105] though the guidelines also allow for certain domestic preferences for goods from borrower nations.[106] Moreover, the World Bank's procurement guidelines apply, by their terms, only to the contracts supported with World Bank funding.[107] Because they simultaneously stipulate open markets but allow for some measure of domestic protectionism to help economies recover, the procurement guidelines promulgated by the World Bank and the other banks, while an important means of opening international procurement markets, are not likely to bring about worldwide reform. The purpose of the various banks' guidelines is simply to ensure that the banks' funds are well spent—not to force open the procurement process of reluctant borrower nations.[108] The development banks' guidelines are not, therefore, necessarily the shortest path to an international open market in procurement.

C. *Treaties and Directives: International and Regional*

As neither model codes nor the procurement guidelines of international development banks will likely bring about open international

108. *See, e.g.*, EBRD—Policies, *supra* note 79 ("The EBRD's Procurement Policies and Rules are based on the fundamental principles of non-discrimination, fairness and transparency. They are designed to promote efficiency and effectiveness and to minimise credit risk in the implementation of the Bank's lending and investment operations.").

public procurement markets, we look now to treaties and similar international instruments directed specifically to opening regional or international spheres of free trade in procurement to affect this desired outcome.

The central example of this type of agreement is the World Trade Organization's Agreement on Government Procurement (GPA).[109] The GPA is a plurilateral agreement that binds only member nations.[110] Per Article III of the agreement, the two basic principles at the core of the GPA are *non-discrimination* (no discrimination amongst covered foreign suppliers, goods or services) and *national treatment* (foreign suppliers, goods and services are to receive treatment no less favorable than that accorded locals).[111] The substantive provisions of the GPA—those that prescribe procurement rules to root out discrimination rather than those that describe the agencies, goods and services covered—were recently revised, and the proposed text of the revised GPA was published in December 2006.[112]

---

109. Although the agreement's technical name in the WTO is the "Agreement on Government Procurement," in the United States, the GPA is commonly referred to as the "Government Procurement Agreement," *see, e.g.*, FAR, 48 C.F.R. 25.400(a)(1), and for consistency's sake we will use the common acronym "GPA"—also used by the WTO—here. For a comparative discussion of the GPA and other initiatives in international agreements on procurement trade, see Simon J. Evenett, *Is There a Case for New Multilateral Rules on Transparency in Government Procurement?* (2003), *reprinted in* EVENETT & HOEKMAN, *supra* note 12, at 147. For histories of the GPA and its predecessor agreements, see Robert D. Anderson, *Policy and Legal Frameworks for Open Procurement Markets: The Role of the WTO* (paper for presentation at the West/Thomson Government Contracts Year in Review Conference, Washington, D.C., Feb. 2007) (copy on file with authors); Annet Blank & Gabrielle Marceau, *The History of the Government Procurement Negotiations Since 1945* (1996), *reprinted in* EVENETT & HOEKMAN, *supra* note 12, at 3; ARROWSMITH, *supra* note 13, at 25-47; Gerard De Graaf & Matthew King, *Towards a More Global Government Procurement Market: The Expansion of the GATT Government Procurement Agreement in the Context of the Uruguay Round*, 29 INT'L LAW. 435 (1995); Michael T. Janik, *A U.S. Perspective on the GATT Agreement on Government Procurement*, 20 GEO. WASH. J. INT'L L. & ECON. 491 (1987).

110. These currently include Canada, the European Communities (including its 25 member States: Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxemburg, Malta, Netherlands, Poland, Portugal, Slovak Republic, Slovenia, Spain, Sweden, and the United Kingdom), Hong Kong China, Iceland, Israel, Japan, Korea, Liechtenstein, Netherlands with respect to Aruba, Norway, Singapore, Switzerland, and the United States.

111. *See, e.g.*, Hoekman & Mavroidis, *supra* note 11, at 4-5. Here, we use the term "nondiscrimination" more broadly, to describe a general policy of not discriminating against foreign suppliers in procurement.

112. *See, e.g.*, *Greater Clarity is Focus of Updated WTO GPA*, 3 INT'L GOV. CONTRACTOR ¶ 102 (Dec. 2006). For a discussion of proposed areas of reform in the GPA, see Sue Arrowsmith, *Reviewing the GPA: the Role and Development of the Plurilateral Agreement after Doha*, 5 J. INT'L ECON. L. 761 (2002).

In parallel with the GPA, the United States and other states have entered into bilateral and multilateral free trade agreements (FTAs) which include commitments to open procurement markets.[113] While these types of bilateral and multilateral agreements typically provide for nondiscrimination and may spur broader liberalization,[114] the agreements, by their terms, are limited in scope and cannot create a truly international open procurement market.

Another model of a market-opening international accord is the European procurement directives; indeed, many aspects of the GPA originally came from earlier European directives.[115] As Arrowsmith noted, the European directives, like the WTO's Agreement on Government Procurement, offer a "skeletal" set of requirements for member states' procurement systems; these minimum requirements are designed to eliminate barriers between the European member states' procurement markets. Over time, the European directives have become more prescriptive. Given additional force by interpretive rulings from the European Court of Justice, the European directives have evolved into something much closer to a common code for the European member states.[116] This evolution toward a common, harmonized code has been driven, in important part, by a continuing desire in the European central institutions to eliminate discriminatory procurement rules that impede trade between member states.[117]

Another example of a regional directive is that of the Common Market for Eastern and Southern Africa (COMESA). With support from the African Development Bank, COMESA has been developing its

own procurement directives to facilitate procurement in and among its member states.[118] While that effort remains in process, it illustrates both promise and risk: it shows the hoped-for benefit of harmonized procurement schemes outside the highly industrialized world, but it also raises a risk of a balkanized international patchwork of regional procurement regions. We will return, below, to the question of harmonization.

IV. Achieving a Global Procurement Market: Four Steps

Having reviewed the barriers to international procurement, and the instruments available to reduce them, we turn now to four critical steps needed for the global procurement market to fully achieve openness. While it might prove convenient for this process to proceed in an orderly, linear fashion, it is more likely that passage through the four stages will be irregular, overlapping, disorderly, and perhaps even chaotic. Nonetheless, we sense that all four steps are necessary for a global procurement regime to enjoy credibility at home and abroad, to provide customer satisfaction, and to produce value for money in an efficient and consistent manner.

The first step, logically, is the political decision to embrace value-based outcomes, reject domestic preferences, and ultimately accept nondiscrimination as a norm, or as a universally accepted procurement "best practice". Of course, such a decision must overcome deep native protectionism. The second step is harmonization, because uniformity (in vocabulary and practice) generates efficiencies not only for buyers but for sellers. To be clear, as pragmatists, we neither expect nor

---

advocate for standardization or harmonization of entire procurement codes. Rather, we anticipate continuing harmonization of central agreements—such as the WTO's Agreement on Government Procurement—which in turn shape individual nations' procurement codes. The third step is rationalization, the process of ensuring that the instruments being relied upon by individual states to open markets do, in fact, produce a legislative and regulatory template for procurement procedures which are fundamentally sound (*e.g.*, reflect best practices) and which produce efficient, value-based results. The final step we envision is institutionalization, the process of transitioning harmonized, rationalized agreements from empty rhetoric (or toothless legal regimes) into properly-implemented policies and practices that become integrated into the fabric of the states that join those agreements.

We recognize that, to some extent, each of the four stages could serve to reinforce another. For example, we assume that, if a state affirmatively embraces harmonization, we expect that rationalization and institutionalization might (but need not necessarily) naturally follow. At the same time, we concede that, for a number of reasons, the process might implode during any of the four stages.

A. *Intermezzo: Of Political Will and Stakeholders*

Any discussion of political decision-making must begin with, and in large part depends upon, an understanding of, or at least familiarity with, the various affected interest groups or stakeholders. We have long perceived that this fundamental issue—identifying and understanding the interests and priorities of the various stakeholders in public procurement—is a critical yet under-explored piece of the public procurement policy puzzle. Unfortunately, this topic is beyond the scope of this article. Nonetheless, we pause here to catalogue some of the major players, because it is axiomatic that the political decision-making process will be influenced, nay, skewed, as constituencies exert effort to further their own interests.

From the perspective of contract law, it seems logical to begin by identifying the interested parties; there are *buyers*—here, governments, agencies, ministries, or purchasing officials—and *sellers*—contractors, vendors, or suppliers, publicly traded or closely held, whether for profit (which represents the lion's share) or not for profit. Within the seller or contractor community, we tend to distinguish truly *commercial firms* from those primarily *non-commercial* firms that sell exclusively to, and thus entirely depend upon, the government; and further, particularly

for this purpose, *domestic* from *foreign* firms.[119] On the buyer side, the government's interest may vary as we focus upon the interests of the *end user* (e.g., the pilot of a military aircraft, a judge working in a federal court house), the *source of funds* (whether the *head of agency*, tasked with achieving specific missions or mandates, or the legislative appropriator) seeking to allocate scarce resources among unlimited demands for government services, or various *accountability organizations* (such as audit or oversight instrumentalities tasked with protecting the public fisc).[120] The nature of public procurement requires inclusion of the *public* or *citizens* (individually or collectively), as *taxpayers* (whose funds are being spent) or as *consumers* (or recipients of government services), in the roster of relevant parties.

Further, particularly in an open, democratic society, *special interests* play a key role as they compete for their "piece of the procurement pie." In the United States, a short list of these interests might include small businesses, women-owned businesses, minority-owned firms, service-disabled veteran-owned firms, commercial firms, domestic producers, labor unions, firms located in areas of high unemployment, and environmentally-friendly procurement advocates.[121] Finally, for our

---

119. Experience suggests further subdivision to the extent that, for some purposes, the distinction between domestic and foreign firms may depend upon, for example, ownership or location of the corporate headquarters or, in other circumstances, where the work is performed. *See generally* 48 C.F.R. § 25.003 (2007) ("'Domestic end product' means—(1) An unmanufactured end product mined or produced in the United States; or (2) An end product manufactured in the United States, if the cost of its components mined, produced, or manufactured in the United States exceeds 50 percent of the cost of all its components. . . .").

120. A simple anecdote offers a window into the range of competing interests. A legislator responsible for defense appropriations must make difficult decisions relating to, for example, air superiority; the legislator must balance the number of aircraft to buy and the amount of resources to be invested in maximizing a given aircraft's speed, agility, range, or ability to carry armaments. A legislator might reasonably conclude that a greater number of less potent aircraft would increase the likelihood of mission success (and taxpayers, as a whole, may or may not agree). Contrast this with a customer satisfaction model focused upon the government's end user, the fighter pilot (or wing commander) who would typically (for obvious reasons) express a strong preference for the maximum amount of speed, agility, range, and ability to carry armaments without regard for price. Of course, these considerations could become increasingly hypothetical as the military increases its reliance upon U.A.V.'s or unmanned aerial vehicles. *See, e.g.*, Charles Duhigg, *The Pilotless Plane That Only Looks Like Child's Play*, N.Y. TIMES, Apr. 15, 2007, at BU1 ("For years, . . . U.A.V.'s, . . . were pariahs within the military industry, [which . . .] saw them as threats to the status quo . . . . 'For a long time, the only thing most generals could agree on was that they didn't want any unmanned vehicles,' says Senator John W. Warner, the Virginia Republican who is a member of the Senate Armed Services Committee. 'Now everyone wants as many as they can get.'").

121. See, e.g., the discussion of wealth distribution in Schooner, *supra* note 18.

purposes, this discussion could not be complete without recognition of the facilitators of transparency, the *media* outlets (print, electronic, audio, visual, etc.) that not only educate the public (taxpayers and vendors alike) but perform a valuable third-party oversight role in the procurement process.

B. *Nondiscrimination*

The first and most political step is to embrace nondiscrimination by deciding to open a state's domestic procurement market to international competition. Practically speaking, there is no way in a modern, globalized economy to seal off any domestic procurement system completely; any modern government relies, to some extent, on foreign vendors for goods or services.[122] The decision is one of degree, then, but the experience of most nations—including the United States—is that opening a domestic procurement market can be politically wrenching and difficult, with considerations that carry well beyond the procurement rules themselves.[123]

As the discussion of the U.S. experience above reflected, market opening can be driven by unexpected proponents in the agencies themselves. Agency personnel—the customers affected by market barriers—may push to reduce domestic preferences because of the difficulty of compliance,[124] because of annoyed indifference to a collateral social goal that is impeding trade,[125] or simply because trade-impeding corruption will be prosecuted and destroyed as matter of course.

Some benefits weighing in favor of an open domestic procurement market were discussed above. But, for less obvious reasons, joining a liberalizing international regime may prove very useful for regimes with a procurement system riddled with inefficient standards and

125. *See* Accessibility Requirements discussion, *supra* Part II.B.

requirements. Opening and subjecting domestic markets to international standards for sound procurement may incidentally clear away those inefficient domestic procurement practices.[126]

The costs of opening procurement markets are usually highly specific to individual nations because those nations are typically using protectionist procurement policies to shelter strategic domestic industries. What is common across the globe, however, is that the nondiscrimination decision to open a domestic procurement market can typically be highly centralized and made by a few key decisionmakers. That is not always true, of course; the debate over whether to discriminate against foreign specialty metals has drawn in many hundreds of stakeholders across the U.S. procurement market. In principle, however, nondiscrimination can be tightly controlled by a political elite, unlike harmonization, rationalization, and institutionalization, discussed below.

C. *Harmonization*

The next step is to harmonize international instruments for opening markets.[127] Harmonization need not be overly specific, but requires a common set of carefully defined "bounding" rules or a "constitution," such as the GPA or the EU Directives.

Harmonization may seem, to some, a radical idea. If the goal of these instruments is simply to open markets which are at very different stages of development, one might argue that harmonizing the instruments—aligning the WTO GPA and the COMESA procurement directives, for

---

126. *See* Victor Mosoti, *The WTO Agreement on Government Procurement: A Necessary Evil in the Legal Strategy for Development in the Poor World?*, 25 U. PA. J. INT'L ECON. L. 593 (2004). Mosoti notes:

> What is distressing, however, is that some of the poorer countries' decision not to sign the WTO GPA seems guided by priorities that are defeated by other factors inherent in these countries, and have nothing to do with a careful and honest assessment of what the nations really stand to gain or lose by signing. In offering the explanation that they would like to shield their domestic suppliers from external competition for government tenders, and nurture various strategic sectors, these countries are deliberately missing the point. They are being bled to ruination by terribly warped procurement laws and policies.

Id. at 596.

127. *See, e.g.*, Arrowsmith, *supra* note 94, at 23-24 (discussing need for harmonization); Sue Arrowsmith, *Transparency in Government Procurement* (2003), *reprinted in* EVENETT & HOEKMAN, *supra* note 12, at 126, 137 (discussing lack of transparency in rules as an independent barrier to foreign vendors).

example—is beside the point. Harmonization is essential, though, if progress is to continue in opening world procurement markets.[128] At the broadest level, harmonization will help to transfer lessons learned between different systems which are now relying on different integrative instruments. At the same time, and through the same process, harmonization will help to highlight the nagging problems buried in those instruments; this will be the first step towards "rationalization," discussed below.

If, as seems likely, harmonization centers on the WTO Government Procurement Agreement, harmonization will afford additional benefits. Integrating strands of many international procurement instruments through a revised GPA will help to win over those who fear that the GPA is merely a hegemonic instrument for opening markets, and not a tool for improving procurement systems in the developing world.

Realistically, harmonization (as suggested above) is likely to occur through the WTO Government Procurement Agreement, in part for purely practical reasons: the United States' federal procurement market is by far the largest national procurement market in the world, and under U.S. law, the GPA in essence creates a "walled garden" excluding those *outside* the GPA. Under U.S. law, generally only GPA members and those nations with bilateral arrangements with the United States may trade freely into the U.S. procurement market. Thus, under the Trade Agreements Act,[129] as implemented by the Federal Acquisition Regulation,[130] U.S. government contracting personnel may (subject to certain exceptions) purchase goods and services *only* from nations that are members of the GPA or have joined the United States in regional or bilateral arrangements, such as the North American Free Trade Agreement (NAFTA). This legal "walled garden" which generally affords non-discrimination only to those nations *inside* the GPA (or inside other, typically bilateral, U.S. agreements) is explicitly designed to encourage other nations to join agreements with the United States to open their procurement markets.[131]

---

128. *Cf.* 19 U.S.C. § 2514(a) (President is to press for harmonization to encourage broader opportunities in international procurement trade).

129. *See generally* 19 U.S.C. §§ 2511-2518. *See also* 19 U.S.C. § 2511(a), (b); 19 U.S.C. § 2512.

130. *See* FAR, 48 C.F.R. § 25.403(c) (2007).

131. *See* 19 U.S.C. § 2512; Angela B. Styles, Robert K. Huffman & Lara Covington, *GSA Trade Agreements Certification: an Ambush for Commercial Providers*, 41 PROCUREMENT LAW. 1 (2006) (discussing serious potential fraud liability for vendors that provide goods from non-GPA nations); John A. Howell, *The Trade Agreements Act of 1979 Versus the Buy American Act: The Irresistible Force Meets the Immovable Object*, 35 PUB. CONT. L.J. 495 (2006); Thomas C. Lowinger, *Discrimination*

In order to access the U.S. procurement market developing nations will either need to join a bilateral free trade agreement with the United States (which is growing increasingly difficult, because the President will likely soon lose his "fast-track" negotiation authority), or—more likely—to join the GPA. The opportunity offered by the huge U.S. procurement market thus makes it more likely that developing nations will, over time, be drawn to the GPA; on balance, therefore, harmonization in public procurement is more likely to progress under the GPA.

Unlike nondiscrimination, which is typically a political decision made to further carefully calculated political and economic goals, harmonization is a more technical endeavor, as experts work to harmonize different regimes' procurement rules. Harmonization is more technically complex, however, if the goal is not just to harmonize nondiscrimination agreements, but also to create a technically advanced set of procurement rules—if, in other words, harmonization is to evolve naturally into rationalization, the logical next step in this process. If that broader harmonization is to succeed, the harmonization process should be fully transparent, and there must be robust communication between the various organizations developing international standards for procurement.

D. *Rationalization*

Rationalization involves improving international instruments to maximize efficiency in procurement systems. It can enhance domestic welfare and facilitate international trade, but poses a challenge to the GPA and other market-opening instruments. If the goal is only to harmonize international commitments not to discriminate, that can be done in a few paragraphs; harmonization is relatively simple, and no real rationalization is needed, because the states joining the instrument will be agreeing only to foreswear discrimination.

If the goal is broader, though, to agree to reduce irrational barriers to efficient procurement, "rationalization" becomes much more complicated and difficult. It means reopening the international instruments to reduce explicit and hidden barriers to international procurement—and, in the process, to improve the efficiency of procurement

---

in Government Procurement of Foreign Goods in the U.S. and Western Europe (1976), *reprinted in* EVENETT & HOEKMAN, *supra* note 12, at 319, 326 (earlier study suggests that GPA and Trade Agreements Act, which came later, had important impact on U.S. procurement in neutralizing discrimination under the Buy American Act, for 1976 study suggested "that the 'Buy American' policy has had a significant impact in curtailing U.S. government procurement of imports").

systems in each of the signatory states. This is a very sophisticated, technical undertaking requiring extensive data on the member nations' existing procurement regimes, on how advanced those procurement systems are, and on the procurement strategies that those member nations should (and should not) rely upon.[132] Drawing a common regulatory thread among the member states—setting a lowest common denominator for fair procurement by international agreement—is difficult,[133] but not impossible.

An example illustrates the promise and perils of rationalization. As noted above, "framework" agreements have emerged as a critical issue in U.S. and European procurement systems. Framework agreements offer enormous promise by allowing agencies (often centralized procurement agencies) to establish standing contracts for commodity goods and services that reduce the time, expense and frustrations normally part of government procurement. Yet absent careful regulation, framework agreements can erode nondiscrimination commitments by quietly destroying the competition and transparency that are vital to a truly open procurement regime. In the United States, framework agreements have swallowed up billions of dollars in largely noncompetitive, nontransparent procurement, creating an invisible "gap" in the U.S. commitment to open its procurement market to its

132. For example, less developed procurement regimes, in an effort to minimize corruption, maximize competition, and increase transparency, tend to favor publicly disclosed bids or tenders with low price determining contractor success. More advanced regimes tend to employ "alternative means of competitive procurement that are better suited to the production of . . . complex goods and services—competitive negotiation techniques—[that] are more susceptible to subjectivity, bias, favouritism, and corruption." *See generally* Joshua I. Schwartz, *Learning From the United States' Procurement Law Experience: On "Law Transfer" And Its Limitations*, 11 PUB. PROC. L. REV. 115, 119 (2002). Schwartz suggests that:

> [T]he progression . . . from tendering systems in which the primary criterion for award of a contract among the field of competitors is the lowest price, to a best value system in which a much more extensive list of criteria is assessed to evaluate the quality of the goods or services offered, is one that developing procurement systems may be well advised to retrace, rather than race to the (temporary) end-state of best value procurement.

Id. at 121.

133. While corruption control is a common and entirely reasonable metric upon which to judge a procurement regime, Schwartz recognizes "that rigidly controlled procurement often fails to allow procurement officers to achieve good results for the government, especially in a dynamic environment." *Id.* at 120. Moreover, procurement reform always entails a balancing act. *See also* Schooner, *supra* note 18.

trading partners.

A simple international nondiscrimination agreement would not need to address framework agreements; indeed, even the recently revised GPA does not do so. That begs the question, however, of how to resolve framework agreements' potentially corrosive effect on international trade and member nations' own procurement systems. Rationalization of the GPA (or any other international instrument) would require assessing framework agreements' benefits and risks, and setting benchmarks for acceptable standards. By doing so, rationalization would enhance the GPA *and* the procurement systems of its member nations, improving both international trade and domestic efficiency. The GPA would gain legitimacy in the eyes of nonmember nations as a result, no longer viewed as merely as a wedge to open their domestic procurement markets to international vendors, but as a reliable tool for enhancing their own procurement regimes.

E. *Institutionalization*

The last step in opening public procurement markets, after harmonization and rationalization, is what we call here "institutionalization." As international procurement instruments expand their reach and address more complex barriers to trade, the key challenge will be to "institutionalize" the commitments those instruments make by working them into the fabric of member nations' procurement regimes.[134] There are a number of tools to "institutionalize," from training procurement officials and private firms in commonly accepted practices from open, competitive procurement regimes, to building states' institutional capacity to oversee and manage procurement. One of the readiest tools to ensure "institutionalization" would be a remedial means for competitors—prospective contractors—to enforce states' commitments.[135] The United States' experience in this regard shows the value of an effective remedies system in "institutionalization," and the shortcomings in the current treaty structure.

In the United States, concerned vendors may quite easily challenge the terms of a solicitation or award as discriminatory or illegal. There

134. *See, e.g.*, UNCITRAL MODEL LAW, *supra* note 91, at Guide to Enactment ¶¶ 36-40 (noting suggested steps for implementing UNCITRAL model law).

135. *See generally* Daniel I. Gordon, *Constructing a Bid Protest Process: the Choices that Every Procurement Challenge System Must Make*, 35 PUB. CONT. L. J. 427 (2006); Harvey Gordon, Shane Rimmer & Sue Arrowsmith, *The Economic Impact of the European Union Regime on Public Procurement: Lessons for the WTO* (1998), *reprinted in* EVENETT & HOEKMAN, *supra* note 12, at 431, 453 (arguing for effective remedies regime for enforcement).

are at least three established fora for such challenges, which are known as "bid protests" in the United States: the Government Accountability Office (which hears more than a thousand such challenges each year), the U.S. Court of Federal Claims (which hears far fewer), and the contracting agencies themselves (which generally do not publish statistics on agency-level protests).[136] A vendor may bring a bid protest in any of these fora, and can generally rely on a prompt and objective review of the vendor's concerns with appropriate remedies. Over many decades, the U.S. bid protest system has evolved into an effective means of ensuring competition, transparency, integrity, and accountability in the federal procurement system.[137] By affording a ready enforcement mechanism to vendors when the law is not followed, this mature bid protest system thus "institutionalizes" the procurement rules into the daily workings of the procurement system.

Current international instruments do not necessarily afford vendors (or other stakeholders) the same ready means of protest. The GPA, for example, requires that member states incorporate its requirements into their national laws and establish a forum to hear protests regarding violations of national law ("national challenge procedures"), but does *not* require that vendors be allowed to protest violations of the GPA.[138] Thus, if a member state violates the GPA and there is no corresponding violation of domestic law, the injured vendor's only recourse under the GPA is to complain to the vendor's government, which in turn may seek relief from the discriminating government.[139] The U.S. Commerce Department describes this process on its website by suggesting that government officials can help injured vendors understand their rights under the GPA, ask foreign officials to review the matter, or invoke the WTO dispute settlement process as a last

136. We view this election of forum as a historical oddity, and do not, as a matter of policy, suggest that it is efficient or optimal. Indeed, one of us has criticized the current regime at length. Steven L. Schooner, *The Future: Scrutinizing the Empirical Case for the Court of Federal Claims*, 71 GEO. WASH. L. REV. 714, 755-56, 768-70 (2003); Steven L. Schooner, Feature Comment, *Watching The Sunset: Anticipating GAO's Study Of Concurrent Bid Protest Jurisdiction in the COFC and the District Courts*, 42 GOV'T CONTRACTOR ¶ 108 (2000).

137. Indeed, we view this as a crucial form of third-party oversight of the procurement process. Steven L. Schooner, *Fear of Oversight: the Fundamental Failure of Businesslike Government*, 50 AM. U. L. REV. 627, 691-93 (2001).

138. *See* ARROWSMITH, *supra* note 13, at 386 (noting that if a member state has failed to incorporate a GPA requirement into domestic law, the injured vendor may in effect have no recourse through "national challenge" procedures based on national law).

139. *Id.* at 358-84 (discussing the process under the WTO Dispute Settlement Mechanism).

resort.[140]

As the Commerce Department's explanation suggests, instead of bringing a direct protest, the vendor must ask its home government to intervene with the offending government, and then, if that fails, to invoke the dispute process under the WTO.[141] It is extremely unlikely, however, that a system this unwieldy will truly institutionalize the GPA. Indeed, in its decade of existence, there have been only three matters brought under the current Government Procurement Agreement,[142] two of which (the consolidated matters relating to United States procurement) ended before decision, when the issue, a Massachusetts boycott against Myanmar, was addressed by the U.S. Supreme Court.[143]

Notably, possibly the most publicized event in the GPA's nondiscrimination regime—the United States' December 2003 announcement[144]

144. See Paul Wolfowitz, Deputy Secretary of Defense, Determination and Findings (Dec. 5, 2003), stating, *inter alia*, that "essential security interests of the United States" necessitated that competition for a projected $18.6 billion in contracts to "upgrade and rebuild [Iraq's] electrical sector, public works and water, military courts and borders, building, housing and health, transportation, communications, and oil infrastructure" be limited to firms from the U.S., Iraq, and "coalition partners and force contributing nations." This action was noteworthy, not only because no nation formally challenged it, but also because, as a matter of U.S. law, Deputy Secretary Wolfowitz may have lacked the authority to execute it. See generally 10 U.S.C. § 2304(c)(7), as implemented by 48 C.F.R. § 6.302-7 (2007), indicating that: "*Limitations*. . . . A written determination to use this authority shall be made . . . by . . . The Secretary of Defense . . . or . . . [t]he head of any other executive agency. This authority may not be delegated." See also 48 C.F.R. § 206.302-7, "*Limitations*. For the defense agencies, the written determination to use this authority must be made by the Secretary of Defense." (Emphasis in the original.)

that it would not open prime contracts for Iraqi reconstruction to prime contractors from nations, including GPA member nations, that did not join the coalition that invaded Iraq—was apparently never raised in a WTO proceeding.[145] Political concerns may overwhelm even serious violations of the GPA, and the enforcement mechanism currently in place holds little guarantee of "institutionalizing" the GPA's rules; member states are, for most practical purposes, on their honor to bring their procurement systems into compliance with the GPA. As the international procurement system matures, therefore, and as the GPA's rules become a more central part of states' procurement regimes, it may prove vitally important to expand vendors' ability to bring "challenges" directly under the GPA.

V. Conclusion: A Global Public Procurement Regime?

The barriers that normally impede world procurement trade—classic domestic preferences, distorting and inefficient collateral social policies, corruption, self-serving agency "efficiencies" in procurement, and structural barriers to entry—are slowly eroding in the face of numerous international instruments, including various forms of agreements and guidance that are helping the world procurement market integrate. Although many nations continue to resist liberalization in procurement, a pattern of steps (a plan of action, really, to effect nondiscrimination) is beginning to emerge. To accept nondiscrimination as a norm—the fundamental predicate to a global procurement market—and to permit procurement regimes to operate more smoothly, the instruments used for guiding liberalization should be harmonized, with an eye to rationalizing those instruments to improve efficiency. Unlike the political decision to liberalize, which may be driven by a political elite, harmonization and rationalization require a much broader effort. The effort, in principle, should engage and coordinate the many technical, legal, and trade experts responsible for improving the instruments. Once harmonized and rationalized, the guiding instrument(s) should be institutionalized, through training, capacity building, and, where appropriate, challenge mechanisms. Such institutionalization involves an even broader orbit of technical, legal, and

145. *See, e.g.*, Christian Pitschas, *World Trade Organisation/United States: Award of Prime Contracts for Infrastructure Reconstruction in Iraq—an Assessment under the WTO Agreement on Government Procurement*, 13 PUB. PROC. L. REV. NA85 (2004); Owen Bonheimer, *The Duty to Prevent Waste of Iraqi Assets During Reconstruction: Taming Temptation Through ICJ Jurisdiction*, 34 PUB. CONT. L.J. 673, 692 (2005).

procurement personnel, as a procurement system at large is recast for an open market. The cycle of improvement can then turn full circle as challenges and other reviews disclose faults in the system that can be improved—both to assure international vendors of the procurement system's integrity and, equally importantly, to ensure that the system evolves towards efficient procedures that will produce optimal outcomes. Thus, opening procurement markets should, at least in principle, both enhance the value of goods and services bought, and strengthen the liberalizing procurement systems themselves.

procedures of entities operating in the water, energy, transport and telecommunications sectors (OJ 1990 L 297, p. 1) and to comply with the principle of equal treatment, which underlies all the rules on procedures for the award of public contracts,

THE COURT (Fifth Chamber),

composed of: D. A. O. Edward (Rapporteur), President of the Chamber, J. C. Moitinho de Almeida, C. Gulmann, P. Jann and L. Sevón, Judges,

Advocate General: C. O. Lenz,
Registrar: H. A. Rühl, Principal Administrator,

having regard to the Report for the Hearing,

after hearing oral argument from the parties at the hearing on 13 July 1995,

after hearing the Opinion of the Advocate General at the sitting on 12 September 1995,

gives the following

Judgment

1 By application lodged at the Court Registry on 11 March 1994, the Commission of the European Communities brought an action under Article 169 of the EC Treaty for a declaration that, by taking into account, in the procedure for the award of a public contract by the Société Régionale Wallonne du Transport (SRWT), amendments made to one of the tenders after the opening of those tenders, by admitting

to the procedure for the award of the contract a tenderer who did not meet the selection criteria laid down in the contract documents and by accepting a tender which did not meet the criteria for the award of the contract laid down in the contract documents, the Kingdom of Belgium has failed to fulfil its obligations under Council Directive 90/531/EEC of 17 September 1990 on the procurement procedures of entities operating in the water, energy, transport and telecommunications sectors (OJ 1990 L 297, p. 1, hereinafter 'the Directive') and to comply with the principle of equal treatment, which underlies all the rules on procedures for the award of public contracts.

The Directive

2 The 32nd and 33rd recitals in the preamble to the Directive state that the rules to be applied by the entities concerned should establish a framework for sound commercial practice and leave a maximum of flexibility and that, as a counterpart for such flexibility and in the interest of mutual confidence, a minimum level of transparency must be ensured.

3 Article 2 of the Directive mentions, as one of the contracting entities to which the Directive applies, public undertakings operating a network providing a public bus service. Under the second subparagraph of Article 2(2)(c) such a network exists where the service is provided under operating conditions laid down by a competent authority of a Member State, such as conditions on the routes to be served, the capacity to be made available or the frequency of the service.

4 Article 4(1) provides that, when awarding supply contracts, the contracting entities are to apply procedures which are adapted to the provisions of the Directive.

5 Article 4(2) states that contracting entities are to ensure that there is no discrimination between different suppliers or contractors.

6 Article 27(2) provides that where the contract is to be awarded to the most economically advantageous tender '... contracting entities shall state in the contract documents or in the tender notice all the criteria they intend to apply to the award, where possible in descending order of importance'.

7 Finally, Article 27(3) states:

'Where the criterion for the award of the contract is that of the most economically advantageous tender, contracting entities may take account of variants which are submitted by a tenderer and meet the minimum specifications required by the contracting entities. Contracting entities shall state in the contract documents the minimum specifications to be respected by the variants and any specific requirements for their presentation. Where variants are not permitted, they shall so indicate in the contract documents.'

8 A joint statement by the Council and the Commission concerning Article 15 of the Directive (OJ 1990 L 297, p. 48) provides:

'*The Council and the Commission* state that in open and restricted procedures all negotiation with candidates or tenderers on fundamental aspects of contracts, variations in which are likely to distort competition, and in particular on prices, shall be ruled out; however, discussions with candidates or tenderers may be held but only for the purpose of clarifying or supplementing the content of their tenders or the requirements of the contracting entities and provided this does not involve discrimination.'

The facts

9 By a tender notice published in the supplement to the *Official Journal of the European Communities* of 22 April 1993 (OJ 1993 S 78, p. 76), the SRWT, which is based in Namur (Belgium), issued an invitation to tender for the award, under an open procedure, of a public contract for the supply of 307 standard vehicles. That contract, for an estimated sum of over BFR 2 000 000 000 (excluding VAT) and divided into eight lots, was to be performed over a period of three years.

10 The contract documents consisted of the *Cahier des Charges Type No 1* (hereinafter 'the general conditions') and the *Cahier Spécial des Charges No 545* (hereinafter 'the special conditions'), which amended the general conditions in certain respects.

11 Point 20.2 of the special conditions provided that the contract was to be awarded to the most economically advantageous tender. That tender would be selected on the basis of an evaluation of the tenders by reference to the award criteria under headings which are set out in point 59 of the Advocate General's Opinion. An evaluation was to be made, in particular, of the basic price of the bus, increased by the price of variants taken into account and then adjusted in accordance with the advantages and disadvantages resulting from the application of ten technical assessment criteria (hereinafter 'the technical criteria').

12 The SRWT expressly requested potential tenderers to propose certain variants concerning the financial structure of the contract, such as staggered payment terms, lease or hire of the vehicles.

13 As regards the technical criteria, the special conditions laid down, under each heading, a formula enabling the SRWT to allocate for certain features of the buses

offered a notional bonus or penalty in 'francs fictifs', the amount of which depended on the variables of the formula and was to be added to or deducted from the basic price.

14 After sending the contract documents to the interested parties, the SRWT issued three notices of amendment, dated 30 April, 5 May and 28 May 1993, rectifying and clarifying the contract documents in certain respects. In the second notice the SRWT clarified certain aspects of the contract documents relating to the minimum number of seated places, the desired total number of places, the maximum height of the floor and the formula for calculating one of the notional penalties. Each notice stated that tenderers had to indicate clearly in their tenders that they had received the notices of amendment and that they had taken them into account.

15 By 7 June 1993, the date fixed by the tender notice for both the receipt and the public opening of tenders, the following five companies had submitted tenders: EMI (Aubange), Van Hool (Koningshooikt), Mercedes-Belgium (Brussels), Berkhof (Roeselaere) and Jonckheere (Roeselaere).

16 The SRWT examined those tenders during June and July 1993. A memorandum dated 24 August 1993, drawn up for the meeting of the *conseil d'administration* on 2 September 1993, recommended the award of Lot No 1 to Jonckheere and Lots Nos 2 to 6 to Van Hool.

17 In the meantime, on 3, 23 and 24 August 1993 EMI had sent to the contracting entity three 'supplementary' notes commenting on certain points of its initial tenders, in particular fuel consumption, the frequency of engine and gearbox replacements, and certain aspects of the technical quality of the material offered.

18 After examining those three notes, the technical department of the contracting entity drew up a memorandum on 31 August 1993 stating that EMI's supplementary notes contained changes to its initial tenders and could not therefore be taken into account. The proposals for the award of contracts in the memorandum drawn up for the meeting on 2 September 1993 should therefore still stand.

19 At the meeting on 2 September 1993 the *conseil d'administration* took the view that it had insufficient information to adopt a final decision. In particular it was unsure whether it could take EMI's three supplementary notes into account and decided to ask for a legal opinion on that question from the Walloon Minister of Transport.

20 By letter of 14 September 1993 the Walloon Minister of Transport replied that, as regards most of the points mentioned, no legal problem would be raised by taking into account EMI's three supplementary notes. He therefore suggested that the file be re-examined in the light of his observations.

21 On 28 September 1993 the SRWT requested EMI to confirm the fuel consumption figures indicated in its supplementary note of 24 August 1993 and also the frequency of the engine and gear box replacements referred to in the supplementary note of 23 August 1993. By letter of 29 September 1993 EMI confirmed that the information it had supplied was correct.

22 Following that confirmation, the SRWT undertook a fresh comparison of the tenders, taking into account the content of the three supplementary notes. A memorandum prepared for the meeting of the *conseil d'administation* on 6 October 1993 proposed awarding Lot No 1 to Jonckheere and Lots Nos 2 to 6 to EMI.

23 At its meeting on 6 October 1993 the *conseil d'administration* decided, first, to adopt those proposals and thus award Lot No 1 to Jonckheere and Lots Nos 2 to 6 to EMI and, secondly, to postpone until 1996 an order for 30 vehicles.

24 On the same day, Van Hool applied to the Belgian Conseil d'État for an order suspending the operation of that decision under the emergency procedure. That application was dismissed by judgment of 17 November 1993.

25 On 30 November 1993 the Commission, with which Van Hool had lodged a complaint, gave the Kingdom of Belgium formal notice to submit its observations pursuant to Article 169 of the Treaty. By letter of 15 December 1993 the Belgian Government stated that the allegation that it had failed to fulfil its obligations was unfounded. The Commission was not satisfied by that reply and delivered a reasoned opinion to the Belgian Government, requesting it to intervene with the competent authorities to suspend the legal effects of the contract concluded between the SRWT and EMI. In its reply to that opinion, the Belgian Government claimed that the Commission had not proved any failure to fulfil obligations.

26 On 11 March 1994 the Commission brought the present action and applied for interim measures to suspend both SRWT's decision to award the contract and the measures implementing that decision. That application was dismissed by order of 22 April 1994.

27 By letter of 9 June 1995 the Commission abandoned its second plea, which alleged that the Kingdom of Belgium had accepted tenders from EMI which did not meet the selection criteria laid down in the special conditions.

28 The application, as so amended, seeks a declaration that the Kingdom of Belgium has failed to fulfil its obligations under the Directive and to comply with the principle of equal treatment of tenderers which underlies all the rules on procedures for the award of public contracts, in that, in the procedure for the award of a public contract by the SRWT,

— it took into account amendments made to one of the tenders after the opening of tenders, and

— it accepted a tender which did not meet the criteria for the award of the contract laid down in the contract documents.

29 Before examining those heads of complaint it is necessary to consider the Belgian Government's claim that the Directive does not apply in the present case.

The applicability of Community law

30 It is not disputed that the SRWT is a public undertaking operating a network providing a public bus service within the meaning of Article 2 of the Directive and that it therefore had to comply with the rules of the Directive, in conformity with Article 4, when it awarded the contract for the supply of the eight lots of buses at the origin of this action.

31 However, since all the tenderers are Belgian companies, the Belgian Government claims that the case concerned a purely internal situation to which Community law did not apply.

32 That argument cannot be accepted.

33 The obligation imposed on contracting entities by Article 4(1) of the Directive is not subject to any condition concerning the nationality or seat of tenderers. Moreover, as the Advocate General has pointed out in point 24 of his Opinion, it is always possible that undertakings established in other Member States may be concerned directly or indirectly by the award of a contract. The procedure laid down by the Directive must therefore be observed irrespective of the nationality or seat of the tenderers.

34 In the course of the procedure the Belgian Government also claimed that the contracting entity was not obliged to award the contract through an open procedure. It could have chosen a negotiated procedure and its conduct would have been in conformity with such a procedure.

35 Suffice it to state that, although under Article 15(1) of the Directive contracting entities obliged to apply the procedures in the Directive do indeed have a degree of choice regarding the procedure to be applied to a contract, once they have issued an invitation to tender under one particular procedure, they are required to observe the rules applicable to it, until the contract has been finally awarded.

The heads of complaint

36 The Commission considers that, by taking into account information submitted to it in EMI's three supplementary notes concerning, in particular, fuel consumption, the frequency of engine and gear box replacements, and certain aspects of the

technical quality of the material offered, EMI breached the principle of the equal treatment of tenderers.

37 As regards fuel consumption, the Commission complains that, when evaluating the tenders, the Kingdom of Belgium took into account the new consumption indicated by EMI to the SRWT after the opening of the tenders, which had been changed from the figure in its initial tenders.

38 As regards the frequency of engine and gear box replacements, the Commission complains that the Kingdom of Belgium took into account information supplied by EMI after the opening of tenders, which amended its initial tenders and also failed to comply with the prescriptive requirements of the contract documents.

39 As regards the technical quality of the material offered, the Commission considers that, when evaluating EMI's tenders, the SRWT wrongly took into account matters not included amongst the award criteria.

Fuel consumption

40 Point 20.2.2.1 of the special conditions provides:

'20.2.2.1 Fuel consumption

When comparing tenders, a notional advantage equivalent to the value of 6 000 litres of diesel for a standard bus (official price at the date of the opening of tenders) will be awarded for each whole litre per 100 km difference between the fuel consumption guaranteed in the tender (including tolerance) under the test cycle laid down in Annex 10 to these contract documents and the fuel consumption of the vehicle with the highest consumption.'

41 Under the conditions laid down in that annex, the test was to be performed with a vehicle loaded with a weight corresponding to the minimum number of passengers.

42 In its original tenders, EMI indicated a fuel consumption of 54 litres per 100 km in respect of Lots Nos 2 to 6. However, in Note No 1 (hereinafter 'Note 1') annexed to its tenders EMI claimed that, since consumption of 54 litres per 100 km had been obtained in tests on a vehicle which had not been run in and was not particularly well-tuned, the consumption which would be recorded with a vehicle which was both run in and optimally tuned could be reduced by 5 to 8% in relation to the consumption indicated in its tenders.

43 EMI also confirmed in its initial tenders that it had received the three notices of amendment and that it had taken them into account.

44 The SRWT carried out a first evaluation of the tenders on the basis of the fuel consumption indicated by EMI in its initial tenders, namely 54 litres per 100 km. Since it had the highest fuel consumption of all the tenders submitted for those lots, that consumption was, according to the method of calculation stipulated in the special conditions, to be used as the basis for evaluating the notional advantages of the other tenders. It is clear from Annexes 5 and 6 to the memorandum drawn up for the meeting of 2 September 1993 that in the course of that evaluation EMI's tenders were not accorded any notional advantage in respect of fuel consumption, whereas all the other tenderers were accorded such advantages, calculated by reference to the consumption indicated by EMI.

45 In its first supplementary note of 3 August 1993, EMI informed the SRWT of its interpretation of the purport of notice of amendment No 2. EMI claimed that, as a consequence of that notice, the total number of places stipulated in the special conditions as an absolute contractual requirement had been waived. That waiver affected the calculation of fuel consumption, since the equal treatment of tenderers logically required that the calculation be made on the basis of maximum authorized weight. It concluded that, for its data to be compared with those of the other tenderers, it was necessary to take into account the consumption indicated in its initial tenders, reduced by 8%.

46 Thereafter, in its supplementary note of 24 August 1993, EMI informed the SRWT, after referring to the contents of Note 1, that it had carried out further tests, this time under optimal conditions, and that these had shown a fuel consumption for its tenders relating to Lots Nos 2 to 6 of 45 litres per 100 km, representing a reduction of 16.7% on the consumption of 54 litres per 100 km. EMI requested the SRWT to take that new consumption into account when evaluating its tenders.

47 The Belgian Government has confirmed that SRWT did take that new consumption into account when awarding the contract to EMI.

48 Since EMI's new fuel consumption was no longer the highest, the SRWT re-evaluated the notional advantages awarded to all the tenderers. Annexes 1 and 2 to the memorandum drafted for the meeting of 6 October 1993 show that in the second evaluation the notional advantages of tenderers other than EMI were reduced in relation to those awarded on the first evaluation, so that Jonckheere no longer had any notional advantages, whereas EMI's tenders were awarded an advantage.

49 The Commission considers that SRWT breached the principle of the equal treatment of tenderers by taking into account, when allocating the contract, the data

supplied by EMI in its supplementary note of 24 August 1993 which amended, after the opening of tenders, the consumption initially indicated by EMI.

50 The Belgian Government submits, first, that the principle of equality of treatment actually required EMI's correction of its fuel consumption to be taken into account in the award of the contract, since the other tenderers had indicated already optimized results in their initial tenders. Secondly, it points out that fuel consumption is objective and verifiable; the amendment was therefore not a matter of choice, nor was it made after negotiations with the contracting entity. Finally, the change had no effect on the technical characteristics of the vehicle or its engine and EMI's initial tenders were not therefore amended.

51 It is to be noted at the outset that in Case C-243/89 *Commission* v *Denmark* [1993] ECR I-3353 (the 'Storebaelt case'), at paragraph 33, the Court held that the duty to observe the principle of equal treatment of tenderers lies at the heart of Council Directive 71/305/EEC of 26 July 1971 concerning the coordination of procedures for the award of public works contracts (OJ, English Special Edition 1971 (II), p. 682).

52 As is shown by Article 4(2) the position is the same in the case of the Directive in question here.

53 Furthermore, the 33rd recital in the preamble shows that the Directive aims to ensure a minimum level of transparency in the award of the contracts to which it applies.

54 The procedure for comparing tenders therefore had to comply at every stage with both the principle of the equal treatment of tenderers and the principle of transparency so as to afford equality of opportunity to all tenderers when formulating their tenders.

55 When, as in the present case, a contracting entity opts for an open procedure, such equality of opportunity is ensured by the requirement under Article 16(1)(a) of the Directive for the contracting entity to act in accordance with Annex XII A of the Directive. It must therefore both set a final date for receipt of tenders, so that all tenderers have the same period after publication of the tender notice within which to prepare their tenders, and set the date, hour and place of opening tenders, which also reinforces the transparency of the procedure, since the terms of all the tenders submitted are revealed at the same time.

56 When a contracting entity takes into account an amendment to the initial tenders of only one tenderer, it is clear that that tenderer enjoys an advantage over his competitors, which breaches the principle of the equal treatment of tenderers and impairs the transparency of the procedure.

57 In the present case it is not disputed that, first, the reduction in fuel consumption indicated by EMI in its supplementary note of 24 August 1993 considerably exceeded the limit of 8% referred to by EMI in Note 1 annexed to its initial tenders and, secondly, that in its final comparison of the tenders the SRWT took into account that last figure of consumption.

58 Without it even being necessary to decide whether the SRWT could have taken into account the new consumption indicated by EMI in its supplementary note of 3 August 1993, which was within the 8% limit stipulated in its tender, the fact that that limit was exceeded shows that the new consumption of 45 litres per 100 km constituted an amendment of EMI's initial tenders. Indeed, in its supplementary notes EMI referred to points in the notices of amendment, which it claimed to

have taken into account in its initial tender, and did not explain why its new tests could not have been carried out before the final date for receipt of tenders. It follows that the consumption of 45 litres per 100 km should not on any view have been taken into account.

59 Moreover, the taking into account of those figures placed the other tenderers at a disadvantage by changing the amount of notional advantages resulting from the first comparison of tenders, thus affecting their ranking.

60 It must therefore be held that, by taking into account information on fuel consumption submitted by EMI in its supplementary note of 24 August 1993 and, therefore, after the opening of tenders, the Kingdom of Belgium failed to fulfil its obligations under the Directive.

The frequency of engine and gear box replacements

61 Point 20.2.2.2 of the special conditions provides:

'20.2.2.2 Assembly and dismantling times, price of spare parts

The tenderer shall set out the prices of spare parts and the assembly and dismantling times of the items listed in Annex 23.

In conformity with the table in Annex 23, a notional penalty will be applied automatically to all tenders to take account of maintenance costs.'

62 According to the table in Annex 23 a notional penalty was to be imposed in regard to the maintenance costs of only 45 components of the bus. For each component mentioned, that penalty was calculated by reference to a formula in which the variables were the number of identical items of that component in the bus, the dismantling time, the assembly time, the price and the foreseeable number of replacements of the component.

63 However, for the purposes of calculating the notional penalty, Annex 23 of the special conditions asked tenderers to indicate figures for only the first three variables. As regards the foreseeable number of replacements, Annex 23 set out, on the basis of SRWT's experience, a fixed number for each component, the figures for engine and gear box replacement being two and three respectively. Potential tenderers were therefore not asked to state the foreseeable number of replacements for those two components.

64 In conformity with the terms of Annex 23, EMI did not, when completing the table provided, indicate any proposal regarding the foreseeable number of replacements for the components mentioned. However, in its supplementary note of 23 August 1993 it stressed to the SRWT that provision should be made for only one engine and 1.25 gear boxes when using its buses and that the figures fixed by the SRWT in Annex 23 should not, therefore, be applied to its tenders.

65 The Belgian Government accepts that, when the SRWT calculated the notional penalty for EMI's tenders, the SRWT used those new figures instead of the figures appearing in the table in Annex 23, whereas when calculating the notional penalties for all other tenders it applied the latter figures.

66 The Commission considers that such conduct infringes the principle of equal treatment of tenderers in two respects. First, by taking the figures in question into account when awarding the contract, the SRWT allowed one of the tenderers to amend the terms of its initial tenders after they had been opened. Secondly, since those new figures did not comply with the prescriptive requirements of the table in Annex 23, the SRWT awarded the contract to a tenderer in disregard of the award criteria it had itself laid down in the special conditions.

67 As regards the first of those complaints, the Commission considers that if, following the observations submitted by EMI, the SRWT believed that, in the light of the tenders lodged, the prescriptive requirements it had laid down were wrong, it could have amended them by offering the other tenderers the same opportunity to depart from them. However, since it gave such an opportunity only to EMI, it breached the principle of equal treatment of tenderers.

68 The Belgian Government considers that EMI did not amend its initial tenders, since the material offered remained precisely the same. All the other tenderers could also have informed the SRWT that the performance of their buses exceeded the requirements of Annex 23. It concludes that, if the SRWT could not take the figures in question into account, it would be precluded from taking into consideration the advantages of vehicles of more recent design.

69 It should be recalled that Annex 23 of the special conditions did not ask tenderers to indicate the frequency of spare part replacements for their buses. On the contrary, the SRWT had fixed a figure for that element in respect of each component in the table. Moreover, in point 20.2.2.2 of the special conditions the SRWT had stated that a notional penalty would be applied to all tenders 'in accordance with the table in Annex 23'. The figures in that table must therefore be considered to be prescriptive requirements of the special conditions.

70 The Court held in the *Storebaelt* case, at paragraph 37, that when a contracting entity had laid down prescriptive requirements in the contract documents, observance of the principle of equal treatment of tenderers required that all the tenders must comply with them so as to ensure objective comparison of the tenders.

71 Accordingly, the requirements of Annex 23 continued to be applicable to all the tenders and those tenders had to comply with them. It must therefore be held that EMI was not entitled to 'amend' the terms of its initial tenders regarding those requirements and that the SRWT was not entitled to calculate EMI's notional penalties by reference to its new figures, which did not correspond to the prescriptive requirements of the special conditions.

72 The fact that EMI's new figures were taken into account necessarily gave it a real advantage when the tenders were compared. According to Annex 23, the figure relating to the frequency of spare part replacements acts, for the purposes of calculating the notional penalty, as a multiplier of the other figures provided by the tenderers relating to costs. As regards EMI's notional penalty, the SRWT used a figure for the number of replacements which was lower than that laid down in Annex 23 and, therefore, lower than those used in the calculation for the other tenders. The notional penalty for the maintenance of the components in question in EMI's buses was therefore obtained by using a lower multiplier.

73 Since the SRWT permitted only EMI to disregard the requirements in question, it is not necessary to decide whether the Commission is correct in considering that the SRWT could after opening the tenders have altered the prescriptive requirements fixed by the contract documents, giving all tenderers the same opportunity to disregard those requirements.

74 It must therefore be held with regard to this part of the complaint that, by awarding the contract to EMI on the basis of figures which did not correspond to the prescriptive requirements of Annex 23 of the special conditions for calculating its

notional penalty for maintenance costs for engine and gear box replacement, the SRWT infringed the award criteria laid down in the special conditions and also the principle of equal treatment of tenderers. The Kingdom of Belgium therefore failed to fulfil the obligations which the directive imposes on it in that regard.

The technical quality of the material offered

75 In its supplementary note of 3 August 1993 EMI claimed that 'the day-to-day running' of the buses it offered 'enables significant savings' to be made by the operator. EMI drew up two lists of features of the bus which enabled those savings to be made (hereinafter 'the cost-saving features').

76 The first list, entitled 'Quantifiable features', concerned the cantilever seats offered, a mechanism for demisting the side windows, and a special modular assembly system. EMI indicated, for each of those features, the financial advantage which would result during the lifetime of each bus, namely BFR 480 000, BFR 240 000 and BFR 100 000 respectively.

77 The second list, entitled 'Non-quantifiable features', included eight features which contributed to 'cost-savings', although EMI did not evaluate them in its initial tenders or in its supplementary note of 3 August 1993.

78 The Commission contends that the SRWT took those cost-saving features into account when deciding to award the contract to EMI, although they did not appear in the award criteria listed in the tender notice or in the contract documents. Under Article 27(2) of the Directive, which applies in the present case, only the criteria stated in the tender notice or in the contract documents should have

been taken into account by the SRWT when awarding the contract. Furthermore, the SRWT took account of those features solely when assessing EMI's tenders, while for the other tenders it applied strictly the award criteria set out in point 20.2 of the special conditions. That conduct breached, once again, the principle of equal treatment.

79 In the memorandum drawn up for the meeting of 6 October 1993 SRWT's management referred to all those cost-saving features when recommending the award of Lots Nos 2 to 6 to EMI. It stated, in the reasons for its recommendation in respect of Lot No 2, that the cost-saving features had 'a not inconsiderable financial impact', so that they were 'likely to have a favourable influence on the vehicle's operating costs, to an extent greatly exceeding the financial difference resulting solely from the valuation criteria adopted'.

80 According to the file, as regards Lots Nos 4, 5 and 6, the comparison of tenders solely on the basis of the award criteria laid down in point 20.2 of the special conditions had led to one of Van Hool's tenders being placed first, whereas one of EMI's tenders, even taking into account the figures supplied by it in its supplementary notes regarding fuel consumption and engine and gear box replacements, was placed second. The differences between the best tenders of Van Hool and the second-placed tenders of EMI amounted to BFR 294 799, BFR 471 513 and BFR 185 897 respectively for the three lots. However, after the cost-saving features had been taken into account, that initial ranking was reversed, so that, despite those differences, an EMI tender replaced the Van Hool tender as the tender recommended for those lots.

81 The Belgian Government has formally accepted that all the cost-saving features were taken into account in the decision to award the contract and that this had a decisive influence on the choice of EMI as supplier for Lots Nos 2 to 6.

82 The Belgian Government observes that point 20.2.1 of the special conditions expressly permitted the SRWT to take account of any suggestions, such as the cost-saving features. Moreover, Article 27(3) of the Directive also authorized the SRWT to take account of such suggestions, provided that they met the minimum specifications required.

83 It adds that the cost-saving features, which were in conformity with the minimum specifications in the contract documents, were not evaluated when the tenders were compared, but were taken into account as un-quantified comfort and quality features, leading to the conclusion that, taken as a whole, EMI's offer was economically the most advantageous. Furthermore, both the tender notice and the special conditions referred to the technical qualities of the material offered as being a criterion of award. It concludes that the SRWT was therefore entitled to take account of the cost-saving features at issue.

84 The Commission accepts that tenderers have the right to submit variants and that those variants may be taken into account by a contracting entity, provided, however, that the principle of equal treatment is observed. It contends that it was not observed in the present case, since the derogation from the criteria laid down in the special conditions resulted in an advantage being granted only to EMI.

85 The Court finds that the cost-saving features were not amongst the award criteria adopted by the SRWT for the award of the contract.

86 Admittedly the headings for the award criteria set out in point 20.2 of the special conditions could be interpreted — if no regard is had to the subsequent definitions — as having a wide scope (see, for example, in point 20.2.2.4 of the special conditions, the heading for the seven technical criteria, namely 'the technical qualities of the material offered'), so that, as the Belgian Government submits, all the characteristics relating to the technical qualities of the material offered would be relevant when comparing the tenders.

87 However, the SRWT itself defined all the technical criteria using a precise formula set out under each heading (see paragraph 13 of this judgment). Accordingly, the scope of the technical criteria, whatever the wording of the headings, was restricted by the formulas used by the SRWT to define them.

88 The requirement under Article 27(2) of the Directive for the contracting entities to state 'in the contract documents or in the tender notice all the criteria they intend to apply to the award, where possible in descending order of importance' is intended precisely to inform potential tenderers of the features to be taken into account in identifying the economically most advantageous offer. All the tenderers are thus aware of the award criteria to be satisfied by their tenders and the relative importance of those criteria. Moreover, that requirement ensures the observance of the principles of equal treatment of tenderers and of transparency.

89 Furthermore, although Article 27(3) of the Directive does indeed enable contracting entities to take account of variants, that provision must be interpreted in the light both of the principles underlying the Directive and of Article 27(2). Accordingly, in order to ensure that a contract is awarded on the basis of criteria known to all the tenderers before the preparation of their tender, a contracting entity can take account of variants as award criteria only in so far as it expressly mentioned them as such in the contract documents or in the tender notice.

90 As regards the Belgian Government's submissions concerning the taking into account of 'suggestions', suffice it to note that Article 27(3) of the Directive recognizes only the taking into account of variants, not suggestions. Moreover, the Directive makes no reference to them as award criteria and, consequently, such suggestions cannot be taken into account by a contracting entity when awarding the contract either.

91 In the present case it is sufficient to find that the principles of equal treatment of tenderers and of transparency of the procedure have not been observed and it is not therefore necessary to decide whether the rule laid down in Article 27(2) of the Directive precludes a contracting entity from changing its award criteria during the course of the procedure, provided that it observes those principles.

92 It is clear that, for Lots Nos 4, 5 and 6, the SRWT applied, in the case of EMI alone, the cost-saving features suggested by EMI to offset the financial differences, amounting to BFR 294 799, BFR 471 513 and BFR 185 897, between the tenders of Van Hool in first place and those of EMI placed second. Even if, as the Belgian Government submits, the SRWT did not allocate a precise value to the cost-saving features, EMI provided it with a list of 'Quantifiable features' (see paragraph 76 of this judgment), the total amount of which for each lot (BFR 820 000) more than sufficed to offset those differences.

93 On the other hand, as regards Lots Nos 2 and 3, it is evident from the memorandum drawn up for the meeting of 6 October 1993 that the tenders of EMI at issue were in first place even before the SRWT had taken the cost-saving features into account. The SRWT could not therefore have attached decisive importance to the cost-saving features relating to those lots, since EMI's tenders were already regarded as the most economically advantageous. This part of the complaint has not therefore been established.

94 It must be concluded that, by taking into account, in its comparison of tenders for Lots Nos 4, 5 and 6, the cost-saving features suggested by EMI without having referred to them in the contract documents or in the tender notice, by using them to offset the financial differences between the tenders in first place and those of EMI placed second and by accepting some of EMI's tenders as a result of taking those features into account, the Kingdom of Belgium failed to fulfil its obligations under the Directive.

95 Accordingly, the Court finds that

— by taking into account information on fuel consumption submitted by EMI in its supplementary note of 24 August 1993 and, therefore, after the opening of tenders,

— by awarding the contract to EMI on the basis of figures which did not correspond to the prescriptive requirements of Annex 23 of the special conditions for calculating the notional penalty of EMI for maintenance costs in respect of engine and gear box replacement,

— by taking into account, when comparing the tenders for Lots Nos 4, 5 and 6, the cost-saving features suggested by EMI without having referred to them in the contract documents or in the tender notice, by using them to offset the financial differences between the tenders in first place and those of EMI placed second, and by accepting some of EMI's tenders as a result of taking those features into account,

the Kingdom of Belgium has failed to fulfil its obligations under the Directive.

Costs

96 Under Article 69(2) of the Rules of Procedure, the unsuccessful party is to be ordered to pay the costs if they have been applied for in the successful party's pleadings. Since the Kingdom of Belgium has been unsuccessful and the Commission has applied for costs, the former must be ordered to pay the costs.

On those grounds,

THE COURT (Fifth Chamber)

hereby:

1. **Declares that, by taking into account, in the procedure for the award of a public contract by the Société Régionale Wallonne du Transport, information on fuel consumption submitted by EMI in its supplementary note of 24 August 1993 and, therefore, after the opening of tenders, by awarding the contract to EMI on the basis of figures which did not correspond to the prescriptive requirements of Annex 23 of the special conditions for calculating the notional penalty of EMI for maintenance costs in respect of engine and gear box replacement, by taking into account, when comparing the tenders for Lots Nos 4, 5 and 6, the cost-saving features suggested by EMI without having referred to them in the contract documents or in the tender notice, by using them to offset the financial differences between the tenders in first place and those of EMI placed second, and by accepting some of EMI's tenders as a result of taking those features into account, the Kingdom of Belgium has failed to fulfil its obligations under Council Directive 90/531/EEC of 17 September 1990 on the procurement procedures of entities operating in the water, energy, transport and telecommunications sectors;**

2. **Orders the Kingdom of Belgium to pay the costs.**

Dimensions of Transparency: The Building Blocks for a New Legal Principle?

Prof. Dr. Sacha Prechal & Dr. Madeleine de Leeuw

Professor of European law and lecturer/researcher in European law, Utrecht University, Europa Instituut, The Netherlands

Abstract

This short article explores a number less well-known aspects of the principle of transparency in so far as it emerges in the relationship between public authorities and individuals . The debate about transparency was, until know, strongly focused on transparency in the sense of openness of government and access to EU documents. The phenomenon is, however, much broader, cutting across various fields and levels of EU. Are we facing a process of a new legal principle coming into being?

1 Introduction

Ever since the 1990s transparency has gained considerable attention in the EU context. The most familiar and also the most developed dimension of transparency is openness in the decision-making process, and in particular access to documents. There are, indeed, other elements included in transparency, such as the clarity of procedures, clear drafting, the publication and notification of legislation/decisions and the duty to give reasons.

These elements manifest themselves on different levels. On the political – or perhaps constitutional – level they are often linked to the fundamental notions of democracy, legitimacy and accountability. There is, however, the more concrete level of administration and, arguably, transparency also plays a role between private individuals. As examples we could mention the extensive transparency and information obligations in EU financial markets regulation or, in a completely different area, the directive 'on an employer's obligation to inform employees of the conditions applicable to the contract or employment relationship.'[1] We are not going to address this dimension as we will confine ourselves to the relationships between public authorities and individuals (which may indeed be undertakings). To this, one may also add another distinction: the EU level and the level of the Member States. As

* The present short article is directly based on a more extensive study which is going to be published, in 2008, as a contribution to U. Bernitz, C. Cardner and J. Nergelius (eds.), *General Principles of Community Law in the Process of Development*, Kluwer Law International.

1 Directive 91/533, OJ 1991 L 288/32.

we will show, EU law-inspired transparency is increasingly relevant on both levels.

The various elements of transparency are relatively open-ended and have to be honed down in the context of the more specific areas of application in order to produce some concrete results. Clarity of legislative texts, for instance, is something which is different from the clarity of an individual decision. Nevertheless, the question should be asked whether these elements do not constitute separate building blocks of an overarching principle of transparency. To some extent one may compare this with the right of defence, a general principle of Community law, which in fact is also 'built up' from a number of sub-principles, such as the right to be informed, the right to be heard, the right not to incriminate oneself, the right to legal assistance and legal privilege.[2]

An interesting phenomenon in this respect is that there is a considerable overlap of the various elements of transparency or the – often loosely used – notion of transparency itself with other principles. In many respects transparency or its elements seem rather to support other general principles of law, instead of having a self-standing meaning. We will illustrate this interplay with a number of examples. On the basis of this brief discussion, we will reflect on the question whether transparency is emerging as a new general principle of EU law.

2 Transparency and the Principle of Sound Administration

Transparency in the sense of access to a person's file, which may be considered as an individual manifestation of access to documents in general, is explicitly recognised in Article 41(2) of the Charter of Fundamental Rights as a part of the right to good administration. Although access to a file is often linked to the right of defence, in the Charter it was included under the broader heading of good administration.

The *Natural health* case[3] illustrates another aspect of transparency, namely the need to have clear procedures. At the same time it also provides a fine example of how the principle guides the interpretation of legislation, aiming, *inter alia*, at the avoidance of an outright conflict. This case concerned, as far as is relevant, the legality of a procedure, provided under Directive 2002/46[4], to be followed when a decision has to be taken as to whether certain vitamins and minerals in food supplements may be placed

[4] Directive 2002/46 (approximation of the laws of the Member States relating to food supplements), OJ 2002 L 183/51.

on the market, i.e. included in a so-called 'positive list'. AG Geelhoed was of the opinion that the 'procedure, in so far as it may exist and in so far as it may deserve this title, has the transparency of a black box: no provision is made for parties to be heard, no time-limits apply in respect of decision-making; nor, indeed, is there any certainty that a final decision will be taken.'[5] In his view, since the Directive lacked appropriate and transparent procedures for its application, it infringed the principle of proportionality and was, therefore, invalid.[6] The ECJ did not agree with this and found that the procedure was indeed legal. However, it did point out that '[I]t would, no doubt, have been desirable ... for the directive to have included provisions which in themselves ensured that that stage [*the critical stage of the procedure, including the consultation of the European Food Safety Authority (EFSA) – SP/ MdL*] be completed transparently and within a reasonable time.'[7] The lack of such provisions had to be compensated by the Commission. By virtue of the implementing powers conferred on it by Directive 2002/46, it had to adopt, in accordance with the principle of sound administration, the measures necessary to ensure that the consultation stage with the EFSA is carried out transparently and within a reasonable time.

In the area of state aid, it follows from the legislation and the case law that decisions must be taken without delay and must be addressed to the Member States concerned in the interest of transparency and legal certainty.[8] Therefore, a failure to notify the Commission's decision to the Member State concerned can in certain circumstances justify the annulment of an act of a Community institution.[9] However, in some cases the obligations of the Commission may extend further: according to the CFI, the Commission may be bound in accordance with its duty of 'sound administration' or 'sound administration and transparency' to inform the complainant of its decisions or its consequences.[10]

3 Transparency and the Principle of Legal Certainty

The marriage between legal certainty and transparency entails at least two different aspects. For a part it coincides with the requirements of the clarity and unambiguous nature of legal texts. In this respect,

[5] Point 85 of the Opinion.

[6] Proportionality played a role in the sense that objectives of the Directive could have been achieved by less restrictive solutions than the approach taken by the Community legislature.

[7] Para. 81 of the judgment.

together with the requirement of publication, it strongly supports the cognizability of the law. For another part, in so far as it militates in favour of policy rules and perhaps even their codification in binding acts, at a certain moment it helps to make policy action predictable in the case of broad discretionary powers. Here it serves as one of the safeguards against discretion ending up as arbitrariness.

According to well-established Luxembourg case law, Community legislation must be certain and its application must be foreseeable by individuals. It is here, in particular, that the principle of legal certainty requires every measure of the institutions having legal effects to be clear and precise and brought to the notice of the person concerned. The latter must be able to know the extent of the obligations which it imposes on him/her.[11] Although the required clarity, precision and notification or publication undoubtedly also pertain to transparency, as a rule they are treated as a matter of legal certainty. However, since more recent times, transparency seems to 'sneak in' discretely, either in the judgments or at least is the opinions of Advocates General.

In case C-110/03, *Belgium* v. *Commission*,[12] the Belgian government sought the annulment of (group) Regulation 2204/2002.[13] It argued that the fifth recital in the preamble to Regulation 994/98 (the enabling regulation) requires exemption regulations to increase transparency and legal certainty, but that Regulation 2204/2002 on aid to employment is completely lacking in clarity in terms of both context and content. The AG first noted that the preamble or introductory recitals are not binding, and therefore any failure to take the principle of transparency and legal certainty into account cannot lead to the annulment of the Regulation. However, according to the AG, "both the principle of transparency and legal certainty must be respected by the legislature as sources of Community law, and a failure to do so would, under article 230 EC constitute an infringement, irrespective of whether they are referred to in the preamble to Regulation 994/98".[14] The AG subsequently analyzed whether the Regulation lacks transparency in the sense of "the quality of being clear, obvious and understandable without doubt or ambiguity".[15] In the end he was satisfied that there was no breach.

The ECJ did not refer to the principle of transparency as it found that the Belgian argument as to the Regulation's lack of clarity in reality concerned a breach of the general principle of legal certainty. From the case it can be deduced that the ECJ may, at most, consider transparency only as an element of the principle of legal certainty.

13 Commission Regulation 2204/2002 (on the application of Articles 87 and 88 of the EC Treaty to State aid for employment), OJ 2002 L 337/3.

14 Point 36.

15 Point 44

However, in Case *C-149/96*[16] the Court took a slightly different position. Portugal argued, in this case, that the principle of transparency had been breached "because the contested decision approves Memoranda of Understanding which [were] not adequately structured and [were] drafted in obscure terms which prevent a normal reader from immediately grasping all their implications, in particular as regards their retroactive application".[17] The ECJ dismissed this argument, however, not because Portugal could not rely on the principle of transparency, but because it found the decision to be clear in every relevant aspect.

Similarly, in the case law on the proper implementation of directives, which is, as is well known, strongly influenced by the principle of legal certainty, transparency sometimes features as a separate requirement. Thus, for instance, according to Case *C-417/99*, provisions of directives must be implemented in national law "with precision, clarity and transparency required in order to comply fully with the requirement of legal certainty".[18] Or the provisions must be "... capable of creating a situation which is sufficiently precise, clear and transparent to enable individuals to ascertain their rights and obligations".[19] This case law also illustrates how transparency may also permeate the law at the national level.

As to the second aspect, the area of state aid and competition provides some good examples. In this field the Commission attaches – as it has done since the mid-1990s – great importance to the transparency and predictability of its policy. This has resulted in the adoption and publication by the Commission of numerous soft-law instruments such as notices, communications, frameworks, guidelines, and codes, but also legislation on the application of the rules in those sectors by the Commission.

For example, in the field of state aid the Commission has adopted guidelines concerning aid to employment.[20] The guidelines explained that their objective is to clarify the interpretation of Articles 92 and 93 (now articles 87 and 88) of the Treaty with regard to State aid in the field of employment in order to ensure *greater transparency* of notification decisions under Article 93 of the Treaty. In case *C-310/99* the ECJ explained that such guidelines, setting out the approach that the Commission proposes to follow, help to ensure that it acts in a manner which is transparent, foreseeable and consistent with legal certainty.[21]

[17] Para. 55.

[18] Case C-417/99 *Commission* v. *Spain* [2001] ECR I-6015, para. 40.

[19] Case C-177/04 *Commission* v. *France* [2006] ECR I-2461, para 48.

[20] OJ 1995 C 334/4. These guidelines have ceased to exist from the date of the entry into force of Commission Regulation 2204/2002 of 12 December 2002 on the application of articles 87 and 88 of the EC Treaty to state aid to employment, OJ 2002 L 337/3.

[21] Case C-310/99 *Italian Republic* v. *Commission*[2002] ECR I-2289.

Another illustration is the guidelines on the method of setting fines imposed pursuant to article 15(2) of Regulation 17/62 and article 65(5) ECSC in competition cases.[22] For many years the Commission has been criticised for the opaque manner in which it calculated fines in competition cases.[23] Before the adoption of the guidelines, undertakings were required to commence court proceedings to know the method for calculating fines imposed upon them. However, this lack of transparency did not, in the opinion of the ECJ, amount to a violation of the obligation to provide reasoned decisions.[24] It follows from the preamble to the guidelines that they were adopted with a view to ensuring the *transparency and impartiality* of the Commission's decisions in that area (recital 1). According to the ECJ, the guidelines also ensure legal certainty on the part of the undertakings themselves.[25] By making the criteria for the setting of fines public, the Commission shall impose similar fines on undertakings which violate competition rules in similar circumstances.

In other – more general – terms, by clearly setting out in what way the Commission shall exercise its discretionary powers, it makes this exercise visible, clear and understandable, i.e. transparent. In this way, it becomes possible to foresee the behaviour of the institution and to achieve legal certainty. The fact that many rules regarding the Commission's discretionary exercise of powers in the area of state aid and competition are laid down in soft-law instruments, such as guidelines, does not mean that the Commission can deviate there from whenever it pleases. The Court has ruled that the Commission, by adopting and publishing rules of conduct designed to produce external effects, has imposed a limit on the exercise of its discretion and cannot depart from those rules under pain of being found, where appropriate, to be in breach of the general principles of law, such as equal treatment or the protection of legitimate expectations.[26] By setting out in detail the procedural rules, it is prevented that the Commission acts in a

---

[22] OJ 1998 C 9/3. The guidelines have now been replaced by new ones adopted pursuant Regulation 1/2003. Guidelines on the method of setting fines imposed pursuant to Article 23(2)(a) of Regulation No. 1/2003, OJ 2006 C 210/3.

[23] See in particular Case T-148/89 *Tréfilunion* v. *Commission* [1995] ECR II-1063.

[24] See C-248/98 *P NV Koninklijke KNP BT* v. *Commission* [2000] ECR I-9641.

[25] See, for example, Case C-167/04 P *JCB Service* v. *Commission* [2006] ECR I-8935. The link between transparency, foreseeability and legal certainty has also been made by the ECJ in respect of the guidelines published by the Commission setting out the amount of lump-sum or penalty payments which it intends to propose to the Court that they should be calculated in the light of Article 228(2) EC. See C-177/04 *Commission* v. *French Republic* [2006] ECR I-2461.

[26] See Joined cases C-189/02 P, C-202/02 P, C-205/02 P to C-208/02 P and C-213/02 P *Dansk Rørindustri A/S and Others* v. *Commission* [2005] ECR I-5425, par. 211. This case concerned the Guidelines on setting fines.

partial and non-objective manner. Therefore, we submit that transparency here functions as a mechanism to prevent arbitrary behaviour on the part of the institution in question.

4 Transparency and the Principle of Equal Treatment

Most clearly elaborated seems to be the relationship between transparency and non-discrimination, in particular where is aims to safeguard objectivity and non-discrimination in public procurement[27] and comparable – in particular public concessions – procedures.

The first contours of transparency in public procurement can be found in the judgment in Case C-87/94 *Commission* v. *Belgium*, in which the Court held, on the basis of the text of Directive 90/531, that the procedure for comparing tenderers had to comply at every stage with both the principle of the equal treatment of tenderers and the principle of transparency. The relationship between equality of treatment and transparency was elaborated in more detail in a number of cases, first in public procurement cases – on the national[28] and EU level[29] – but soon also in relation to concessions, which are outside the scope of the public procurement directives[30] or in cases which are below the thresholds of the procurement directives.[31] This 'spillover' from procurement to concessions was possible precisely because the link established between equal treatment or non-discrimination and transparency. As the ECJ pointed out, the principle of equal treatment underlies both the EC public procurement rules and the free movement rules of the internal market which govern, *inter alia*, the award of concessions.[32]

The relationship between equal treatment and transparency is not entirely clear. In some cases the principle of equal treatment and non-

[27] I.e. the four procurement directives are Directive 93/36 (supplies), OJ 1993 L 199/1, Directive 93/37 (works), OJ 1993 L 199/54, Directive 92/50 (services), OJ 1992 L 209/1 and Directive 93/38 (utility sectors), OJ 1993 L 199/84. These have been recently replaced by Directive 2004/18 (procedures for the award of public works contracts, public supply contracts and public service contracts), OJ 2004 L 134/114 and Directive 2004/17 (procurement procedures of entities operating in the water, energy, transport and postal services sectors), OJ 2004 L 134/1.

[28] See, for instance, Case C-275/98 *Unitron* [1999] ECR I-8291 and Case C-470/99 *Universale Bau* [2002] ECR I-11617.

[29] Cf. Joined Cases T-191/96 and T-106/97 *Succhi de fruttta* [1999] ECR II-3181 and Case T-183/00 *Strabag Benelux NV* [2003] ECR II-135.

[30] Cf. Case C-324/98 *Telaustria* [2000] ECR I-10745 and Case C-231/03 *Coname* [2005] ECR I-7287.

[31] Case C-6/05 *Medipac*, judgment of 14 June 2007, nyr. in ECR.

[32] Cf. for instance Case C-470/99 *Universale-Bau* [2002] ECR I-1617, Case C-231/03 *Coname* [2005] ECR I-7287 and Case C-458/03 *Parking Brixen* [2005] ECR I-8612.

discrimination is said to imply an obligation of transparency.[33] The judgment in *Coname* clarifies that non-compliance with transparency requirements amounts to a violation of the rule against discrimination.[34] In *Succhi di Frutta* the principle of transparency is referred to as the 'corollary' of the principle of equal treatment between tenderers.[35] However, there are also cases which may suggest that transparency and equal treatment are to be considered as two separate principles which exist alongside each other.[36] In any case, while, on the one hand, there is a very close link between the principle of equal treatment and transparency, on the other transparency also has, in certain respects, a more specific meaning of its own. It requires, *inter alia*, the clear and unambiguous drafting of the conditions for and the rules on the award procedure. The selection and award criteria must be formulated in such a way as to allow all reasonably well-informed and normally diligent tenderers to interpret them in the same way.[37] The adjudicating authority must interpret the selection and award criteria in the same way throughout the entire procedure and must apply them objectively and uniformly to all tenderers.[38] The substantive and procedural conditions concerning participation in a contract, including criteria for selecting candidates and those for awarding the contract must be clearly defined in advance and made known to the persons concerned.[39] In principle, no new criteria or specifications may subsequently be taken into account.[40] There should be at least a certain a degree of publicity or advertising in order to enable the market in question to be opened up to competition.[41]

---

[33] Cf. for instance Case C-19/00 *SIAC* [2001] ECR I-7725 and Case C-410/04 *ANAV* [2006] ECR I-3303.

[34] Case C-231/03 *Coname* [2005] ECR I-7287.

[35] Case C-496/99 P *Succhi di frutta* [2004] ECR I-3801; or principle transparency flows from principle of equal treatment: cf. C-340/02 *Commission* v. *France* [2004] ECR I-9845.

[36] For instance Case C-458/03 *Parking Brixen* [2005] ECR I-8612, para. 50 or Case C-448/01 *Wienstrom* [2003] ECR I-14527, para. 58.

[37] Case C-19/00 *SIAC* [2001] ECR I-7725 and Case C-448/01 *Wienstrom* [2003] ECR I-14527.

[38] Cf. Case C-19/00 *SIAC* [2001] ECR I-7725 and Case C-448/01 *Wienstrom* [2003] ECR I-14527. Case C-6/05 *Medipac*, judgment of 14 June 2007, nyr. in ECR goes in the same direction.

[39] For instance Case C-470/99 *Universale-Bau* [2002] ECR I-1617 and Joined Cases C-226/04 and C-228/04 *La Cascina* [2006] ECR I-1347.

[40] Cf. Case C-6/05 *Medipac*, judgment of 14 June 2007, nyr. in ECR (unless, for instance, the health and safety of patients is at stake, as was arguably the case in Medipac. Then, however, the appropirate procedures, where present, have to be followed).

[41] A question under discussion for some time now is how to flesh out the 'sufficient degree of publicity' since it can hardly be the purpose of this case law to oblige all contract awards to be publicly announced. For a disussion of this question see, for instance, the Opinion of AG Sharpston, of 18 January 2007, in Case C-195/04 *Commission* v. *Finland* and the Opinion of AG Stix-Hackl, of 14 Septemebr 2006, in case C-532/03 *Commission* v. *Ireland*. Cf. also the

The principle of equal treatment is said to imply an obligation of transparency for mainly two reasons. The first is the *creation* of equality of opportunity, thus to place all potential bidders on an equal footing. According to the ECJ transparency affords all interested parties equality of opportunity in formulating the terms of the applications for and participation in the tenders. The absence of any transparency may amount to indirect discrimination on the ground of nationality which is prohibited by the Treaty, in particular under Articles 43 and 39.[42]

The second reason is to facilitate the control of compliance with the principle of equal treatment. The ECJ stresses in its case law that transparency enables the contracting or concession-granting authorities to ensure that the principles of equal treatment and non-discrimination are complied with,[43] and the impartiality of procurement procedures are to be reviewed.[44] In other terms, as we understand it, such control must be possible *during* the award procedure and *ex post*. Without transparency, it is not very feasible for both the tenderers and the authorities to verify whether the principle of equal treatment has been complied with.[45]

The fact that transparency must make it possible to review whether the principle of non-discrimination has been observed illustrates, in our view, that transparency precedes non-discrimination and in this sense it can be separated from equal treatment. Another indication to consider transparency as a principle independent from equality and non-discrimination is that it is also 'intended to preclude any risk of favouritism or arbitrariness on the part of the contracting authority.'[46] In brief, in some respects transparency seems to extend beyond what non-discrimination requires. The – partly – independent nature of transparency also seems to be underlined in recent public procurement legislation. In two directives from 2004, transparency

Commission's Interpretative [*and not entirely unambiguous- SP/MdL*] Communication on the Community law applicable to contract awards not or not fully subject to the provisions of the Public Procurement Directives, OJ 2006 C 179/2.

[42] Case C-231/03 *Coname* [2005] ECR I-7287, para. 17 and 18.

[43] Case C-458/03 *Parking Brixen* [2005] ECR I-8612, para. 49 and Case C-324/98 *Telaustria* [2000] ECR I-10745, para. 61.

[44] Case C-458/03 *Parking Brixen* [2005] ECR I-8612, para. 49 and Case C-324/98 *Telaustria* [2000] ECR I-10745, para. 62.

[45] Some cases may suggest that what is at stake is mainly control by the authorities. However, also tenderers have some interest in control. Indeed, such a broader interpretation seems to be the correct one. Cf. Case C-26/03 *Stadt Halle* [2005] ECR I-1, para. 39: "The obligation of transparency, to which the contracting authority is subject in order to make it possible to verify that the Community rules have been complied with (*HI*, paragraph 45), should be noted in this respect."

[46] Case C-496/99 P *Succhi di frutta* [2004] ECR I-3801, para. 111 and Case C-6/05 *Medipack*, judgment of 14 June 2007, nyr. in ECR, para. 53.

has been codified alongside the requirements of equal treatment and non-discrimination.[47]

An interesting aspect of the close link between transparency and the principles of equal treatment and non-discrimination is the potential to spread out to other areas of the law, beyond public procurement and concession contracts. Since equality of treatment and non-discrimination underpin the fundamental Treaty freedoms, it is not difficult to imagine that equal treatment may serve as a vehicle for extending the scope of transparency requirements. After all, the transparency requirements apply to concessions exactly because these are governed by the Treaty provisions on the free movement of services and establishment. The effects may and do, however, reach further, in particular where other aspects of market access are at issue.

In EU legislation, the coupling of transparency and non-discrimination can be found, for instance, in directives concerning liberalization of network sectors, such as Article 7(3) of Directive 2002/20 (authorisation of electronic communications networks and services),[48] Article 6 of Directive 2003/54 (common rules for the internal market in electricity),[49] Articles 9 and 11 of Directive 2002/21 (common regulatory framework for electronic communications networks and services – the Framework Directive)[50] or Article 9 Directive 97/67 (internal market for Community postal services).[51]

Another example of the codification of transparency in relation to market access in a more general fashion can be found in the Services Directive.[52] In so far as this Directive allows for authorisation schemes, justified by overriding reasons relating to public interest (Article 9), the latter must 'be based on criteria which preclude the competent authorities from exercising their power of assessment in an arbitrary manner.' (Article 10) According to Section 2 of Article 10, these criteria shall, *inter alia*, be '(a) non-discriminatory; ... (d) clear and unambiguous; ... (f) made public in advance; (g) transparent and accessible.'[53] Interesting in the Service Directive is also Article 12, which deals with a limited number of authorisations being available due to the scarcity of natural resources or technical capacity. The Member States are bound to apply a selection procedure to potential candidates which

[47] Directive 2004/18 (procedures for the award of public works contracts, public supply contracts and public service contracts), OJ 2004 L 134/114, Article 2 and Directive 2004/17 (procurement procedures of entities operating in the water, energy, transport and postal services sectors), OJ 2004 L 134/1, Article 10.

[48] OJ 2002 L 108/21.

[49] OJ 2003 L 176/37.

[50] OJ 2002 L 108/33.

[51] OJ 1998 L 15/14.

[52] Directive 2006/123 (services in the internal market), OJ 2006 L 376/36.

[53] Indeed, one may here wonder what meaning is left for transparency itself where it features alongside the requirements of clarity and unambiguity, accessibility and being made public in advance.

'provides full guarantees of impartiality and transparency, including, in particular, adequate publicity about the launch, conduct and completion of the procedure.' Article 13(1) provides that authorization procedures and formalities shall be 'clear, made public in advance and be such as to provide the applicants with a guarantee that their application will be dealt with objectively and impartially.'

5 Some Conclusions

Until now, only transparency in the sense of 'access to documents' has been generally considered as a serious nominee for being accepted as a general principle of Community law.[54] However, our brief exploration illustrates that transparency as a legal principle 'in gestation' may cover a much broader area of the law. In many respects it may be too early to recognize transparency as a self-standing principle of law. The various elements need to be crystallized in more detail and have to gain – partly in that same process – more autonomy.

To an extent it is possible to identify a number of recurring core elements of transparency, despite the different 'colouring in' depending on the context: clear language, physical access to information and, closely linked to that, publication or notification, the predictability of public authorities' actions/behaviour, and consistency in the interpretation and application of the law. This may sometimes require the drafting of policy rules which curtail the use of the discretionary powers of the authority concerned. However, the very concrete meaning of the various elements are still very much in a process of taking shape, either in case law or in legislation. The still uncertain content of transparency may also explain why transparency is often linked to other well-established principles of law. The coupling of transparency with another principle also depends on the area or context in which transparency is invoked.

The moulding process which is discretely going on is particularly confusing in the sense that transparency emerges on so many levels. Sometimes it appears next to other legal principles or, occasionally, instead of an established principle. In other situations it is presented as an element of a principle of law, for instance, alongside clarity and precision when legal certainty is at stake. Yet, in other cases any reference to transparency is lacking. Again in other cases it is suggested that transparency includes clarity and precision.

In any case, transparency seems to overlap – partially or completely – with certain elements in other legal principles. How must we asses this? In part, transparency here builds upon existing legal values, such as legal

[54] P. Craig and G. de Búrca, *EU Law: Text, Cases and Materials*, Fourth Edition, Oxford University Press, Oxford 2007, p. 567, referring to K. Lenaerts.

certainty and equality of treatment. At the same time it further elaborates these values. However, as it also leads to a new amalgamation of these elements, it provides a new – integrated – perspective and, potentially, new dynamics.

I. INTRODUCTION

1. This dispute arises out of the activities of the Claimant, Metalclad Corporation (hereinafter "Metalclad"), in the Mexican Municipality of Guadalcazar (hereinafter "Guadalcazar"), located in the Mexican State of San Luis Potosi (hereinafter "SLP"). Metalclad alleges that Respondent, the United Mexican States (hereinafter "Mexico"), through its local governments of SLP and Guadalcazar, interfered with its development and operation of a hazardous waste landfill. Metalclad claims that this interference is a violation of the Chapter Eleven investment provisions of the North American Free Trade Agreement (hereinafter "NAFTA"). In particular, Metalclad alleges violations of (i) NAFTA, Article 1105, which requires each Party to NAFTA to "accord to investments of investors of another Party treatment in accordance with international law, including fair and equitable treatment and full protection and security"; and (ii) NAFTA, Article 1110, which provides that "no Party to NAFTA may directly or indirectly nationalize or expropriate an investment of an investor of another Party in its territory or take a measure tantamount to nationalization or expropriation of such an investment ('expropriation'), except: (a) for a public purpose; (b) on a non-discriminatory basis; (c) in accordance with due process of law and Article 1105(1); and (d) on payment of compensation in accordance with paragraphs 2 through 6". Mexico denies these allegations.

II. THE PARTIES

A. The Claimant

2. Metalclad is an enterprise of the United States of America, incorporated under the laws of Delaware. Eco-Metalclad Corporation (hereinafter "ECO") is an enterprise of the United States of America, incorporated under the laws of Utah. ECO is wholly-owned by Metalclad, and owns 100% of the shares in Ecosistemas Nacionales, S.A. de C.V. (hereinafter "ECONSA"), a Mexican corporation. In 1993, ECONSA

purchased the Mexican company Confinamiento Tecnico de Residuos Industriales, S.A. de C.V. (hereinafter "COTERIN") with a view to the acquisition, development and operation of the latter's hazardous waste transfer station and landfill in the valley of La Pedrera, located in Guadalcazar. COTERIN is the owner of record of the landfill property as well as the permits and licenses which are at the base of this dispute.

3. COTERIN is the "enterprise" on behalf of which Metalclad has, as an "investor of a Party", submitted a claim to arbitration under NAFTA, Article 1117.

4. In these proceedings, Metalclad has been represented by:

Clyde C. Pearce, Esq.
Law Offices of Clyde C. Pearce
1418 South Main Street
Suite 201
Salinas, California 93908
USA.

B. The Respondent

5. The Respondent is the Government of the United Mexican States. It has been represented by:

Lic. Hugo Perezcano Diaz
Consultor Juridico
Subsecretaria de Negociaciones Comerciales Internacionales
Direccion General de Consultoria Juridica de Negociaciones
Secretaria de Comercio y Fomento Industrial
Alfonso Reyes No.30, Piso 17
Colonia Condesa
Mexico, Distrito Federal, C.P. 06149
Mexico.

III. OTHER ENTITIES

6. The Town Council of Guadalcazar, SLP, is the municipal government of Guadalcazar, the site of the landfill project. While neither Guadal-

cazar nor SLP are named as Respondents, Metalclad alleges that Guadalcazar and SLP took some of the actions claimed to constitute unfair treatment and expropriation violative of NAFTA.

IV. PROCEDURAL HISTORY

7. On October 2, 1996, Metalclad delivered to Mexico a Notice of Intent to Submit a Claim to Arbitration in accordance with NAFTA, Article 1119, thereby instituting proceedings on behalf of its wholly owned enterprise, COTERIN, for purposes of standing under NAFTA, Article 1117. On December 30, 1996, Metalclad delivered to Mexico a written consent and waiver in compliance with NAFTA, Article 1121(2)(a) and (b).

8. On January 2, 1997, and pursuant to the NAFTA, Article 1120, Metalclad filed its Notice of Claim with the International Centre for Settlement of Investment Disputes (hereinafter "ICSID"),[1] and requested the Secretary-General of ICSID to approve and register its application and to permit access to the ICSID Additional Facility.

9. On January 13, 1997, the Secretary-General of ICSID informed the parties that the requirements of Article 4(2) of the ICSID Additional Facility Rules had been fulfilled and that Metalclad's application for access to the Additional Facility was approved. The Secretary-General of ICSID issued a Certificate of Registration of the Notice of Claim on that same day.

10. On May 19, 1997, the Tribunal was constituted. The Secretary-General of ICSID informed the parties that the Tribunal was "deemed to have been constituted and the proceedings to have begun" on May 19, 1997, and that Mr. Alejandro A. Escobar, ICSID, would serve as Secretary to the Tribunal. All subsequent written communications between the Tribunal and the parties were made through the ICSID Secretariat.

---

[1] Under NAFTA, Article 1120(1)(b), a disputing investor may submit its claim to arbitration under the Additional Facility Rules of ICSID provided that either the disputing Party whose measure is alleged to be a breach referred to in Article 1117 (in this case, Mexico) or the Party of the investor (in this case, the United States of America), but not both, is a party to the ICSID Convention. The United States of America is a party to the ICSID Convention; Mexico is not. Hence the Additional Facility Rules of ICSID appropriately govern the administration of these proceedings.

11. The first session of the Tribunal was held, with the parties' agreement, in Washington, D.C. on July 15, 1997. In accordance with Article 21 of the ICSID Arbitration (Additional Facility) Rules (hereinafter "the Rules"), the Tribunal then determined that the place of arbitration would be Vancouver, British Columbia, Canada. The parties accepted that determination by the Tribunal.

12. Numerous requests for production of documents were exchanged by the parties, some of which were allowed, and some of which were disallowed, particularly those that came later in the proceedings. Through instructions given by its President,[2] the Tribunal issued a ruling on April 27, 1999, relating to Mexico's April 14, 1999 Request for Production of Documents. The President of the Tribunal indicated that he could not, at that stage of the case, decide the extent to which the requested documents and materials might be relevant to the case, but ordered Metalclad to produce the documents at issue and noted that Metalclad might seek an award of costs related to the production should the requests be adjudged unreasonable or improper. No such finding has been made.

13. On September 10, 1997, pursuant to NAFTA, Article 1134 providing for interim measures of protection and Article 28 of the Rules providing for Procedural Orders, Mexico filed a Request for a Confidentiality Order seeking a formal order that the proceedings be confidential. Metalclad filed its response on October 9, 1997. On October 27, 1997, the Tribunal issued a determination, which in its material part reads as follows:

> "There remains nonetheless a question as to whether there exists any general principle of confidentiality that would operate to prohibit public discussion of the arbitration proceedings by either party. Neither the NAFTA nor the ICSID (Additional Facility) Rules contain any express restriction on the freedom of the parties in this respect. Though it is frequently said that one of the reasons for recourse to arbitration is to avoid publicity, unless the agreement between the parties incorporates such a limitation,

[2] At the first session of the Tribunal, of July 15, 1997, the parties agreed that the President of the Tribunal should have the power to determine procedural matters.

> each of them is still free to speak publicly of the arbitration. It may be observed that no such limitation is written into such major arbitral texts as the UNCITRAL Rules or the draft Articles on Arbitration adopted by the International Law Commission. Indeed, as has been pointed out by the Claimant in its comments, under United States security laws, the Claimant, as a public company traded on a public stock exchange in the United States, is under a positive duty to provide certain information about its activities to its shareholders, especially regarding its involvement in a process the outcome of which could perhaps significantly affect its share value.
>
> "The above having been said, it still appears to the Arbitral Tribunal that it would be of advantage to the orderly unfolding of the arbitral process and conducive to the maintenance of working relations between the Parties if during the proceedings they were both to limit public discussion of the case to a minimum, subject only to any externally imposed obligation of disclosure by which either of them may be legally bound".

14. On October 14, 1997, Metalclad filed its Memorial. On December 17, 1997, Mexico filed a Request for an Extension of Time for the filing of its Counter-memorial. Metalclad filed an Opposition to the requested extension, Mexico filed a Reply and Metalclad filed a Rejoinder. On January 7, 1998, the Tribunal granted Mexico's request for an extension and ordered that Mexico's Counter-Memorial be filed February 17, 1998.

15. On February 17, 1998, Mexico filed its Counter-Memorial without objection. Certain exhibits of Mexico's Counter-Memorial were filed May 22, 1998, and Mexico's translations of certain exhibits were filed with the Claimant on July 17, 1998 and with the Secretariat on July 20, 1998.

16. On February 20, 1998, Metalclad filed a Motion for Sanctions regarding Mexico's "untimely" filing of its Counter-Memorial. Metalclad objected to Mexico's failure to submit translations of all pertinent documents with the Counter-Memorial on the date due and set by previous

Order of the Arbitral Tribunal. Mexico filed an Opposition to the Motion for Sanctions, to which Metalclad filed a Reply and Rejoinder, to which Mexico filed an additional Opposition. On March 31, 1998, the Tribunal denied Metalclad's Motion for Sanctions and stated that non-acceptance of the Counter-Memorial and/or the exclusion of certain documents from consideration would be excessive under the circumstances. The Tribunal further stated that it had been "unable to identify significant, if any, harm suffered by the Claimant by reason of the delay in the filing of the translations".

17. On April 6, 1998, Metalclad filed a Request to Submit a Reply to Mexico's Counter-Memorial, to which Mexico filed an Opposition. On April 20, 1998, the Tribunal granted Metalclad's Request to Submit a Reply, and ordered Metalclad to file the same by June 30, 1998. In its Order, the Tribunal noted that the date for Mexico's Rejoinder would be set after the Tribunal had considered the Reply.

18. On June 22, 1998, Metalclad filed a Motion for Additional Time to File its Reply, to which Mexico filed a Response. On June 29, 1998, the Tribunal granted Metalclad's Motion for Additional Time and ordered the Reply to be filed August 6, 1998. On July 28, 1998, the Tribunal granted the Claimant's request for a further extension of the time period for filing its Reply until August 21, 1998.

19. On August 21, 1998, Metalclad filed its Reply without objection. Transcriptions of portions of the American Appraisal Associate's ("AAA") Expert Report were filed September 3, 1998. Translations of the Reply were filed September 22, 1998 and translations of the AAA Expert Report were filed September 28, 1998.

20. On October 5, 1998, Mexico filed Observations regarding Metalclad's Reply. Metalclad filed a Reply to the Observations, to which Mexico filed a Reply. On November 13, 1998, the Tribunal denied Mexico's requests for exclusion of certain information submitted with the Reply and for the award of costs at that point in time. The Tribunal ordered Mexico to file its Rejoinder by March 19, 1999.

21. On February 22, 1999, Mexico filed a Request for an Extension of Time for the Filing of its Rejoinder. On March 4, 1999, the Tribunal granted Mexico's Request for an Extension of Time and ordered Mexico to

file the Rejoinder by April 19, 1999. In the same Order, the Tribunal set the pre-hearing conference for the marshalling of the evidence for July 6, 1999 in Washington, D.C. The Tribunal also ordered the parties' witness lists to be filed by June 11, 1999, together with an outline of each witness's testimony and an estimate of time for each party's presentation of its case and for the examination of witnesses. The Tribunal further set the hearing on the merits for August 30, 1999.

22. On March 11, 1999, Mexico filed a Request for Production of Documents. Metalclad filed a Response to Mexico's Request, to which Mexico filed a Reply. On April 14, 1999, Mexico then filed a request for an extension of one month in the time for filing its Rejoinder. On April 16, 1999, the Tribunal granted in part Mexico's Request for an Extension and ordered that the Rejoinder be filed by May 3, 1999. The Tribunal further extended the time for the parties to submit their marshalling of the evidence briefs to June 18, 1999. On May 3, 1999, Mexico filed its Rejoinder.

23. During the written phase of the pleadings, statements from the following persons were submitted by the Parties: **by Metalclad** – American Appraisal Associates, Augustina Armijo Bautista, Kevin C. Brennan, Gustavo Carvajal Isunza, Francisco Castillo Ayala, Centro JURICI, Ramon Chavez Quirarte, Anthony Dabbene, Daniel de la Torre, Jorge de la Torre, Lee A. Deets, William E. Gordon, Javier Guerra Cisneros, Bruce H. Haglund, Jaime E. Herrera, Ambassador James R. Jones, Grant S. Kesler, Ariel Miranda Nieto, Paul Mitchener, T. Daniel Neveau, Herbert L. Oakes Jr., Sandra Ray-Baucom, David Robinson, Sergio Reyes Lujan, Humberto C. Rodarte Ramon, Mario Salgado de la Sancha, Leland E. Sweetser, Anthony Talamantez, Mike Tuckett, Roy Zanatta; **by Mexico** – Luis Manuel Abella Armella, Sergio Aleman Gonzalez, Rene Altamirano Perez, Salomon Avila Perez, Antonio Azuela de la Cueva, Fernando Bejarano, Alan Borner, John C. Butler III, Julia Carabias Lillo, Juan Carrera Mendoza, José Ramón Cossío Díaz, Pablo Cruz Llañez, Kevin Dages, Jaime de la Cruz Nogueda, Jose Mario de la Garza Mendizabal, Carlos de Silva, Fernando Diaz-Barriga Martinez, Hector Raul Garcia Leos, Jorge Adolfo Hermosillo Silva, Francisco Enrique Hernandez Sanchez, Sergio Lopez Ayllon, Joel Milan, Pedro Medellin Milan, Hermilo Mendez Aguilar, Angelina Nunez, Santiago Oñate Laborde, Rogelio Orta Campos, Jose Antonio Ortega Rivero, Praxedis Palomo Tovar, Officials of PRODIN, Leonel Ramos Torres, Ronald E. Robertson, Aurelio Romo Navarro, Juan

Antonio Romo, Horacio Sanchez Unzueta, Leonel Serrato Sanchez, Ulises Schmill Ordonez, Marcia Williams, Ramiro Zaragoza Garcia, Mark Zmijewski.

24. As permitted by NAFTA, Article 1128, Canada made a written submission to the Tribunal on July 28, 1999. Although Canada does not have any specific commercial interest in the dispute in this case, the submission addressed the interpretation of NAFTA, Article 1110 relating to expropriation and compensation. Specifically, Canada rejected Metalclad's suggestion that NAFTA, Article 1110 is a codification of the United States' position on the rules of international law regarding expropriation and compensation.

25. With the agreement of the parties, a hearing was held in Washington, D.C. from August 30, 1999 through September 9, 1999, at which both parties appeared and presented witnesses. The Tribunal directed that only those portions of the written submissions that were disputed were to be introduced at the hearing. Witnesses called by Metalclad for cross-examination were Julia Carabias Lillo, Horacio Sanchez Unzuetta, Pedro Medellin Milan, Leonel Ramos Torres, Marcia Williams and John Butler III; witnesses called for cross-examination by Mexico were Grant S. Kesler, Gustavo Carvajal Isunza, Anthony Dabbene, Lee A. Deets and Daniel T. Neveau.

26. The Tribunal posed questions to the parties, which were addressed by the parties in their post-hearing briefs submitted on November 9, 1999. Full verbatim transcripts were made of the hearing and distributed to the parties.

27. As permitted by NAFTA, Article 1128, the United States made a written submission to the Tribunal on November 9, 1999. Although the United States does not have any specific commercial interest in the dispute in this case, the submission set forth the United States' position that the actions of local governments, including municipalities, are subject to NAFTA standards. The United States also submitted that the NAFTA, Article 1110, term "tantamount to expropriation" addressed both measures that directly expropriate and measures tantamount to expropriation that thereby indirectly expropriate investments. The United States rejected the suggestion that the term "tantamount to expropriation" was intended to

create a new category of expropriation not previously recognized in customary international law.

V. FACTS AND ALLEGATIONS

A. The Facilities at Issue

28. In 1990 the federal government of Mexico authorized COTERIN to construct and operate a transfer station for hazardous waste in La Pedrera, a valley located in Guadalcazar in SLP. The site has an area of 814 hectares and lies 100 kilometers northeast of the capital city of SLP, separated from it by the Sierra Guadalcazar mountain range, 70 kilometers from the city of Guadalcazar. Approximately 800 people live within ten kilometers of the site.

29. On January 23, 1993, the National Ecological Institute (hereinafter "INE"), an independent sub-agency of the federal Secretariat of the Mexican Environment, National Resources and Fishing (hereinafter "SEMARNAP"), granted COTERIN a federal permit to construct a hazardous waste landfill in La Pedrera (hereinafter "the landfill").

B. Metalclad's Purchase of the Site and its Landfill Permits

30. Three months after the issuance of the federal construction permit, on April 23, 1993, Metalclad entered into a 6-month option agreement to purchase COTERIN together with its permits, in order to build the hazardous waste landfill.

31. Shortly thereafter, on May 11, 1993, the government of SLP granted COTERIN a state land use permit to construct the landfill. The permit was issued subject to the condition that the project adapt to the specifications and technical requirements indicated by the corresponding authorities, and accompanied by the General Statement that the license did not prejudge the rights or ownership of the applicant and did not authorize works, constructions or the functioning of business or activities.

32. One month later, on June 11, 1993, Metalclad met with the Governor of SLP to discuss the project. Metalclad asserts that at this meeting it obtained the Governor's support for the project. In fact, the

Governor acknowledged at the hearing that a reasonable person might expect that the Governor would support the project if studies confirmed the site as suitable or feasible and if the environmental impact was consistent with Mexican standards.

33. Metalclad further asserts that it was told by the President of the INE and the General Director of the Mexican Secretariat of Urban Development and Ecology (hereinafter "SEDUE")[3] that all necessary permits for the landfill had been issued with the exception of the federal permit for operation of the landfill. A witness statement submitted by the President of the INE suggests that a hazardous waste landfill could be built if all permits required by the corresponding federal and state laws have been acquired.

34. Metalclad also asserts that the General Director of SEDUE told Metalclad that the responsibility for obtaining project support in the state and local community lay with the federal government.

35. On August 10, 1993, the INE granted COTERIN the federal permit for operation of the landfill. On September 10, 1993, Metalclad exercised its option and purchased COTERIN, the landfill site and the associated permits.

36. Metalclad asserts it would not have exercised its COTERIN purchase option but for the apparent approval and support of the project by federal and state officials.

C. Construction of the Hazardous Waste Landfill

37. Metalclad asserts that shortly after its purchase of COTERIN, the Governor of SLP embarked on a public campaign to denounce and prevent the operation of the landfill.

38. Metalclad further asserts, however, that in April 1994, after months of negotiation, Metalclad believed it had secured SLP's agreement to support the project. Consequently, in May 1994, after receiving an eighteen-month extension of the previously issued federal construction

[3] SEDUE is the predecessor organization to SEMARNAP.

permit from the INE, Metalclad began construction of the landfill. Mexico denies that SLP's agreement or support had ever been obtained.

39. Metalclad further maintains that construction continued openly and without interruption through October 1994. Federal officials and state representatives inspected the construction site during this period, and Metalclad provided federal and state officials with written status reports of its progress.

40. On October 26, 1994, when the Municipality ordered the cessation of all building activities due to the absence of a municipal construction permit, construction was abruptly terminated.

41. Metalclad asserts it was once again told by federal officials that it had all the authority necessary to construct and operate the landfill; that federal officials said it should apply for the municipal construction permit to facilitate an amicable relationship with the Municipality; that federal officials assured it that the Municipality would issue the permit as a matter of course; and that the Municipality lacked any basis for denying the construction permit. Mexico denies that any federal officials represented that a municipal permit was not required, and affirmatively states that a permit was required and that Metalclad knew, or should have known, that the permit was required.

42. On November 15, 1994, Metalclad resumed construction and submitted an application for a municipal construction permit.

43. On January 31, 1995, the INE granted Metalclad an additional federal construction permit to construct the final disposition cell for hazardous waste and other complementary structures such as the landfill's administration building and laboratory.

44. In February 1995, the Autonomous University of SLP (hereinafter "UASLP") issued a study confirming earlier findings that, although the landfill site raised some concerns, with proper engineering it was geographically suitable for a hazardous waste landfill. In March 1995, the Mexican Federal Attorney's Office for the Protection of the Environment (hereinafter "PROFEPA"), an independent sub-agency of SEMARNAP, conducted an audit of the site and also concluded that, with proper engi-

neering and operation, the landfill site was geographically suitable for a hazardous waste landfill.

D. Metalclad is Prevented from Operating the Landfill

45. Metalclad completed construction of the landfill in March 1995. On March 10, 1995, Metalclad held an "open house," or "inauguration," of the landfill which was attended by a number of dignitaries from the United States and from Mexico's federal, state and local governments.

46. Demonstrators impeded the "inauguration," blocked the entry and exit of buses carrying guests and workers, and employed tactics of intimidation against Metalclad. Metalclad asserts that the demonstration was organized at least in part by the Mexican state and local governments, and that state troopers assisted in blocking traffic into and out of the site. Metalclad was thenceforth effectively prevented from opening the landfill.

47. After months of negotiation, on November 25, 1995, Metalclad and Mexico, through two of SEMARNAP's independent sub-agencies (the INE and PROFEPA), entered into an agreement that provided for and allowed the operation of the landfill (hereinafter "the *Convenio*").

48. The *Convenio* stated that an environmental audit of the site was carried out from December, 1994 through March, 1995; that the purpose of the audit was to check the project's compliance with the laws and regulations; to check the project's plans for prevention of and attention to emergencies; and to study the project's existing conditions, control proceedings, maintenance, operation, personnel training and mechanisms to respond to environmental emergencies. The *Convenio* also stated that, as the audit detected certain deficiencies, Metalclad was required to submit an action plan to correct them; that Metalclad did indeed submit an action plan including a corresponding site remediation plan; and that Metalclad agreed to carry out the work and activities set forth in the action plan, including those in the corresponding plan of remediation. These plans required that remediation and commercial operation should take place simultaneously within the first three years of the landfill's operation. The *Convenio* provided for a five-year term of operation for the landfill, renewable by the INE and PROFEPA. In addition to requiring remediation, the *Convenio* stated that Metalclad would designate 34 hectares of its property as a buffer zone for the conservation of endemic species. The

Convenio also required PROFEPA to create a Technical-Scientific Committee to monitor the remediation and required that representatives of the INE, the National Autonomous University of Mexico and the UASLP be invited to participate in that Committee. A Citizen Supervision Committee was to be created. Metalclad was to contribute two new pesos per ton of waste toward social works in Guadalcazar and give a 10% discount for the treatment and final disposition of hazardous waste generated in SLP. Metalclad would also provide one day per week of free medical advice for the inhabitants of Guadalcazar through Metalclad's qualified medical personnel, employ manual labor from within Guadalcazar, and give preference to the inhabitants of Guadalcazar for technical training. Metalclad would also consult with government authorities on matters of remediation and hazardous waste, and provide two courses per year on the management of hazardous waste to personnel of the public, federal, state and municipal sectors, as well as social and private sectors.

49. Metalclad asserts that SLP was invited to participate in the process of negotiating the *Convenio*, but that SLP declined. The Governor of SLP denounced the *Convenio* shortly after it was publicly announced.

50. On December 5, 1995, thirteen months after Metalclad's application for the municipal construction permit was filed, the application was denied. In doing this, the Municipality recalled its decision to deny a construction permit to COTERIN in October 1991 and January 1992 and noted the "impropriety" of Metalclad's construction of the landfill prior to receiving a municipal construction permit.

51. There is no indication that the Municipality gave any consideration to the construction of the landfill and the efforts at operation during the thirteen months during which the application was pending.

52. Metalclad has pointed out that there was no evidence of inadequacy of performance by Metalclad of any legal obligation, nor any showing that Metalclad violated the terms of any federal or state permit; that there was no evidence that the Municipality gave any consideration to the recently completed environmental reports indicating that the site was in fact suitable for a hazardous waste landfill; that there was no evidence that the site, as constructed, failed to meet any specific construction requirements; that there was no evidence that the Municipality ever required or issued a municipal construction permit for any other construction project

in Guadalcazar; and that there was no evidence that there was an established administrative process with respect to municipal construction permits in the Municipality of Guadalcazar.

53. Mexico asserts that Metalclad was aware through due diligence that a municipal permit might be necessary on the basis of the case of COTERIN (1991, 1992), and other past precedents for various projects in SLP.

54. Metalclad was not notified of the Town Council meeting where the permit application was discussed and rejected, nor was Metalclad given any opportunity to participate in that process. Metalclad's request for reconsideration of the denial of the permit was rejected.

55. In December 1995, shortly following the Municipality's rejection of Metalclad's permit application, the Municipality filed an administrative complaint with SEMARNAP challenging the *Convenio*. SEMARNAP denied the Municipality's complaint.

56. On January 31, 1996, the Municipality filed an *amparo* proceeding in the Mexican courts challenging SEMARNAP's dismissal of its *Convenio* complaint. An injunction was issued and Metalclad was barred from conducting any hazardous waste landfill operations. The *amparo* was finally dismissed, and the injunction lifted, in May 1999.

57. On February 8, 1996, the INE granted Metalclad an additional permit authorizing the expansion of the landfill capacity from 36,000 tons per year to 360,000 tons per year.

58. From May 1996 through December 1996, Metalclad and the State of SLP attempted to resolve their issues with respect to the operation of the landfill. These efforts failed and, on January 2, 1997, Metalclad initiated the present arbitral proceedings against the Government of Mexico under Chapter Eleven of the NAFTA.

59. On September 23, 1997, three days before the expiry of his term, the Governor issued an Ecological Decree declaring a Natural Area for the protection of rare cactus. The Natural Area encompasses the area of the landfill. Metalclad relies in part on this Ecological Decree as an additional element in its claim of expropriation, maintaining that the Decree effectively and permanently precluded the operation of the landfill.

60. Metalclad also alleges, on the basis of reports by the Mexican media, that the Governor of SLP stated, that the Ecological Decree "definitely cancelled any possibility that exists of opening the industrial waste landfill of La Pedrera".

61. Metalclad also asserts that a high level SLP official, with respect to the Ecological Decree and as reported by Mexican media, "expressed confidence in closing in this way, all possibility for the United States firm Metalclad to operate its landfill in this zone, independently of the future outcome of its claim before the Arbitral Tribunals of the NAFTA treaty".

62. The landfill remains dormant. Metalclad has not sold or transferred any portion of it.

63. Mexico denies each of these media accounts as they relate to the Ecological Decree.

64. Mexico also maintains that consideration of the Ecological Decree is outside the jurisdiction of the Tribunal because the Decree was enacted after the filing of the Notice of Intent of Arbitration. More particularly, Mexico argues that NAFTA, Article 1119, entitled "Notice of Intent to Submit a Claim", precludes claims for breaches that have not yet occurred, relying on the language in that Article which states that:

> "The disputing investor shall deliver to the disputing Party written notice of its intention to submit a claim to arbitration at least 90 days before a claim is submitted, which notice shall specify:
>
> . . .
>
> (b) The provisions of [the NAFTA] alleged to have been breached and any other relevant provisions.
>
> (c) The issues and factual basis for the claim."

Mexico further invokes NAFTA, Article 1120 which requires that six months elapse between the events giving rise to a claim and the submission of the claim. On the basis of these two Articles, Mexico argues that a claimant must ensure its claim is ripe at the time it is filed. At the same time, Mexico does not exclude the possibility that amendments to a claim

may be made. Rather, Mexico initially asserted that in order to ensure fairness and clarity, amendment of a claim or the presentation of an ancillary claim within Article 48 of the Additional Facility Rules should be the subject of a formal application and the required amendment should be stated clearly. Later, Mexico adjusted its position in its post-hearing brief in which it argues that Section B of Chapter Eleven does not contemplate the amendment of ripened claims to include post-claim events. Mexico contends that Section B of Chapter Eleven modifies the Additional Facility Rules as regards the amendment of claims and the filing of ancillary claims, making Article 48 of the Additional Facility Rules inapplicable.

65. Metalclad's position is that Mexico's analysis of Articles 1119 and 1120 is artificial, and that the six month rule merely sets forth an initial rule for claim eligibility designed to foster exhaustion of pre-arbitral methods of dispute resolution. In support of its position, Metalclad invokes NAFTA, Article 1118, which provides that disputing parties should first attempt to settle a claim through consultation or negotiation. Metalclad further adduces policy reasons in support of its right to base its claim on acts occurring after submission of its Notice of Claim. First, Metalclad argues that policies related to the administration of justice support its position. In particular, it argues that an inability to rely on post-Notice of Claim acts would deprive parties of redress concerning a period during which a State might be most inclined to disregard its treaty obligations. Second, Metalclad argues that requiring a claimant to forego or defer the airing of subsequent, related, breaches would be inconsistent with NAFTA's stated aim of creating effective procedures for the resolution of its disputes. Such an interpretation, Metalclad suggests, would create serious inefficiencies by requiring the claimant to bring related actions *seriatim* and that those actions would be subject to *res judicata* principles to a Claimant's detriment. Metalclad also argues that injustice would result because claimants will choose, for financial and other reasons, not to start a fresh NAFTA action and tribunals would be unable to consider acts of bad faith occurring during the arbitration. Third, Metalclad maintains that its view is consistent with the ICSID Arbitral Tribunal's broad jurisdiction. Metalclad points out that the texts mentioned in NAFTA, Article 1120, allow for amendment of claims and cites Article 48 of the Rules as allowing for incidental or additional claims provided that such claims are within the scope of the arbitration agreement of the parties. Metalclad concludes that the policies underlying NAFTA, Articles 1119 and 1120, are fulfilled once

the appropriate periods have passed prior to submission of the claim and that the Respondent is not prejudiced by the amendments, provided that they are made no later than the Claimant's Reply and that the Respondent is permitted a Rejoinder.

66. The Tribunal accepts Mexico's contention that a case may not be initiated on the basis of an anticipated breach. However, the Tribunal cannot accept Mexico's interpretation and application of the time limits set out in the NAFTA. Metalclad properly submitted its claim under the Additional Facility Rules as provided under NAFTA, Article 1120. Article 1120(2) provides that the arbitration rules under which the claim is submitted shall govern the arbitration except to the extent modified by Section B of Chapter Eleven. Article 48(1) of the Rules clearly states that a party may present an incidental or additional claim provided that the ancillary claim is within the scope of the arbitration agreement of the parties.

67. The Tribunal does not agree with Mexico's post-hearing position that Section B of Chapter Eleven modifies Article 48 of the Rules. The Tribunal believes it was not the intent of the drafters of NAFTA, Articles 1119 and 1120, to limit the jurisdiction of a Tribunal under Chapter Eleven in this way. Rather, the Tribunal prefers Mexico's position, as stated in its Rejoinder, that construes NAFTA Chapter Eleven, Section B, and Article 48 of the Rules as permitting amendments to previously submitted claims and consideration of facts and events occurring subsequent to the submission of a Notice of Claim, particularly where the facts and events arise out of and/or are directly related to the original claim. A contrary holding would require a claimant to file multiple subsequent and related actions and would lead to inefficiency and inequity.

68. The Tribunal agrees with Mexico that the process regarding amendments to claims must be one that ensures fairness and clarity. Article 48(2) of the Rules ensures such fairness by requiring that any ancillary claim be presented not later than the Claimant's Reply. In this matter, Metalclad presented information relating to the Ecological Decree and its intent to rely on the Ecological Decree as early as its Memorial. Mexico subsequently filed its Counter-Memorial and Rejoinder. The Ecological Decree directly relates to the property and investment at issue, and Mexico has had ample notice and opportunity to address issues relating to that Decree.

69. The Tribunal thus finds that, although the Ecological Decree was issued subsequent to Metalclad's submission of its claim, issues relating to it were presented by Metalclad in a timely manner and consistently with the principles of fairness and clarity. Mexico has had ample opportunity to respond and has suffered no prejudice. The Tribunal therefore holds that consideration of the Ecological Decree is within its jurisdiction but, as will be seen, does not attach to it controlling importance.

VI. APPLICABLE LAW

70. A Tribunal established pursuant to NAFTA Chapter Eleven, Section B must decide the issues in dispute in accordance with NAFTA and applicable rules of international law. (*NAFTA Article 1131*(*1*)). In addition, NAFTA Article 102(2) provides that the Agreement must be interpreted and applied in the light of its stated objectives and in accordance with applicable rules of international law. These objectives specifically include transparency and the substantial increase in investment opportunities in the territories of the Parties. (*NAFTA Article 102*(*1*)(*c*)). The Vienna Convention on the Law of Treaties, Article 31(1) provides that a treaty is to be interpreted in good faith in accordance with the ordinary meaning to be given to the terms of the treaty in their context and in the light of the treaty's object and purpose. The context for the purpose of the interpretation of a treaty shall comprise, in addition to the text, including its preamble and annexes, any agreement relating to the treaty which was made between all the parties in connection with the conclusion of the treaty. (*Id., Article 31(2)(a)).* There shall also be taken into account, together with the context, any relevant rules of international law applicable in the relations between the parties. (*Id., Article 31(3)).* Every treaty in force is binding upon the parties to it and must be performed by them in good faith. (*Id., Article 26).* A State party to a treaty may not invoke the provisions of its internal law as justification for its failure to perform the treaty. (*Id., Article 27).*

71. The Parties to NAFTA specifically agreed to "ENSURE a predictable commercial framework for business planning and investment". (*NAFTA Preamble, para. 6 (emphasis in original))*. NAFTA further requires that "[e]ach Party shall ensure that its laws, regulations, procedures, and administrative rulings of general application respecting any matter covered by this Agreement are promptly published or otherwise made available in

such a manner as to enable interested persons and Parties to become acquainted with them". *Id. Article 1802.1.*

VII. THE TRIBUNAL'S DECISION

72. Metalclad contends that Mexico, through its local governments of SLP and Guadalcazar, interfered with and precluded its operation of the landfill. Metalclad alleges that this interference is a violation of Articles 1105 and 1110 of Chapter Eleven of the investment provisions of NAFTA.

A. Responsibility for the conduct of state and local governments.

73. A threshold question is whether Mexico is internationally responsible for the acts of SLP and Guadalcazar. The issue was largely disposed of by Mexico in paragraph 233 of its post-hearing submission, which stated that "[Mexico] did not plead that the acts of the Municipality were not covered by NAFTA. [Mexico] was, and remains, prepared to proceed on the assumption that the normal rule of state responsibility applies; that is, that the Respondent can be internationally responsible for the acts of state organs at all three levels of government". Parties to that Agreement must "ensure that all necessary measures are taken in order to give effect to the provisions of the Agreement, including their observance, except as otherwise provided in this Agreement, by state and provincial governments". (*NAFTA Article 105*). A reference to a state or province includes local governments of that state or province. (*NAFTA Article 201(2)*). The exemptions from the requirements of Articles 1105 and 1110 laid down in Article 1108(1) do not extend to states or local governments. This approach accords fully with the established position in customary international law. This has been clearly stated in Article 10 of the draft articles on state responsibility adopted by the International Law Commission of the United Nations in 1975 which, though currently still under consideration, may nonetheless be regarded as an accurate restatement of the present law: "The conduct of an organ of a State, of a territorial government entity or of an entity empowered to exercise elements of the Governmental authority, such organ having acted in that capacity, shall be considered as an act of the State under international law even if, in the particular case, the organ exceeded its competence according to internal law or contravened instructions concerning its activity". (*Yearbook of the International Law Commission*, 1975, vol. ii, p.61).

B. NAFTA Article 1105: Fair and equitable Treatment

74. NAFTA Article 1105(1) provides that "each Party shall accord to investments of investors of another Party treatment in accordance with international law, including fair and equitable treatment and full protection and security". For the reasons set out below, the Tribunal finds that Metalclad's investment was not accorded fair and equitable treatment in accordance with international law, and that Mexico has violated NAFTA Article 1105(1).

75. An underlying objective of NAFTA is to promote and increase cross-border investment opportunities and ensure the successful implementation of investment initiatives. (*NAFTA Article 102(1)*).

76. Prominent in the statement of principles and rules that introduces the Agreement is the reference to "transparency" (*NAFTA Article 102(1)*). The Tribunal understands this to include the idea that all relevant legal requirements for the purpose of initiating, completing and successfully operating investments made, or intended to be made, under the Agreement should be capable of being readily known to all affected investors of another Party. There should be no room for doubt or uncertainty on such matters. Once the authorities of the central government of any Party (whose international responsibility in such matters has been identified in the preceding section) become aware of any scope for misunderstanding or confusion in this connection, it is their duty to ensure that the correct position is promptly determined and clearly stated so that investors can proceed with all appropriate expedition in the confident belief that they are acting in accordance with all relevant laws.

77. Metalclad acquired COTERIN for the sole purpose of developing and operating a hazardous waste landfill in the valley of La Pedrera, in Guadalcazar, SLP.

78. The Government of Mexico issued federal construction and operating permits for the landfill prior to Metalclad's purchase of COTERIN, and the Government of SLP likewise issued a state operating permit which implied its political support for the landfill project.

79. A central point in this case has been whether, in addition to the above-mentioned permits, a municipal permit for the construction of a hazardous waste landfill was required.

80. When Metalclad inquired, prior to its purchase of COTERIN, as to the necessity for municipal permits, federal officials assured it that it had all that was needed to undertake the landfill project. Indeed, following Metalclad's acquisition of COTERIN, the federal government extended the federal construction permit for eighteen months.

81. As presented and confirmed by Metalclad's expert on Mexican law, the authority of the municipality extends only to the administration of the construction permit, ". . .to grant licenses and permits for constructions and to participate in the creation and administration of ecological reserve zones . . .". (*Mexican Const. Art. 115, Fraction V*). However, Mexico's experts on constitutional law expressed a different view.

82. Mexico's General Ecology Law of 1988 (hereinafter "LGEEPA") expressly grants to the Federation the power to authorize construction and operation of hazardous waste landfills. Article 5 of the LGEEPA provides that the powers of the Federation extend to:

> V. [t]he regulation and control of activities considered to be highly hazardous, and of the generation, handling and final disposal of hazardous materials and wastes for the environments of ecosystems, as well as for the preservation of natural resources, in accordance with [the] Law, other applicable ordinances and their regulatory provisions.

83. LGEEPA also limits the environmental powers of the municipality to issues relating to non-hazardous waste. Specifically, Article 8 of the LGEEPA grants municipalities the power in accordance with the provisions of the law and local laws to apply:

> [l]egal provisions in matters of prevention and control of the effects on the environment caused by generation, transportation, storage, handling treatment and final disposal of solid industrial wastes which are not considered to be hazardous in accordance with the provisions of Article 137 of [the 1988] law. (Emphasis supplied).

84. The same law also limits state environmental powers to those not expressly attributed to the federal government. *Id., Article 7.*

85. Metalclad was led to believe, and did believe, that the federal and state permits allowed for the construction and operation of the landfill. Metalclad argues that in all hazardous waste matters, the Municipality has no authority. However, Mexico argues that constitutionally and lawfully the Municipality has the authority to issue construction permits.

86. Even if Mexico is correct that a municipal construction permit was required, the evidence also shows that, as to hazardous waste evaluations and assessments, the federal authority's jurisdiction was controlling and the authority of the municipality only extended to appropriate construction considerations. Consequently, the denial of the permit by the Municipality by reference to environmental impact considerations in the case of what was basically a hazardous waste disposal landfill, was improper, as was the municipality's denial of the permit for any reason other than those related to the physical construction or defects in the site.

87. Relying on the representations of the federal government, Metalclad started constructing the landfill, and did this openly and continuously, and with the full knowledge of the federal, state, and municipal governments, until the municipal "Stop Work Order" on October 26, 1994. The basis of this order was said to have been Metalclad's failure to obtain a municipal construction permit.

88. In addition, Metalclad asserted that federal officials told it that if it submitted an application for a municipal construction permit, the Municipality would have no legal basis for denying the permit and that it would be issued as a matter of course. The absence of a clear rule as to the requirement or not of a municipal construction permit, as well as the absence of any established practice or procedure as to the manner of handling applications for a municipal construction permit, amounts to a failure on the part of Mexico to ensure the transparency required by NAFTA.

89. Metalclad was entitled to rely on the representations of federal officials and to believe that it was entitled to continue its construction of the landfill. In following the advice of these officials, and filing the municipal permit application on November 15, 1994, Metalclad was merely acting prudently and in the full expectation that the permit would be granted.

90. On December 5, 1995, thirteen months after the submission of Metalclad's application – during which time Metalclad continued its open and obvious investment activity – the Municipality denied Metalclad's application for a construction permit. The denial was issued well after construction was virtually complete and immediately following the announcement of the *Convenio* providing for the operation of the landfill.

91. Moreover, the permit was denied at a meeting of the Municipal Town Council of which Metalclad received no notice, to which it received no invitation, and at which it was given no opportunity to appear.

92. The Town Council denied the permit for reasons which included, but may not have been limited to, the opposition of the local population, the fact that construction had already begun when the application was submitted, the denial of the permit to COTERIN in December 1991 and January 1992, and the ecological concerns regarding the environmental effect and impact on the site and surrounding communities. None of the reasons included a reference to any problems associated with the physical construction of the landfill or to any physical defects therein.

93. The Tribunal therefore finds that the construction permit was denied without any consideration of, or specific reference to, construction aspects or flaws of the physical facility.

94. Moreover, the Tribunal cannot disregard the fact that immediately after the Municipality's denial of the permit it filed an administrative complaint with SEMARNAP challenging the *Convenio.* The Tribunal infers from this that the Municipality lacked confidence in its right to deny permission for the landfill solely on the basis of the absence of a municipal construction permit.

95. SEMARNAP dismissed the challenge for lack of standing, which the Municipality promptly challenged by filing an *amparo* action. An injunction was issued, and the landfill was barred from operation through 1999.

96. In 1997 SLP re-entered the scene and issued an Ecological Decree in 1997 which effectively and permanently prevented the use by Metalclad of its investment.

97. The actions of the Municipality following its denial of the municipal construction permit, coupled with the procedural and substantive deficiencies of the denial, support the Tribunal's finding, for the reasons stated above, that the Municipality's insistence upon and denial of the construction permit in this instance was improper.[4]

98. This conclusion is not affected by NAFTA Article 1114, which permits a Party to ensure that investment activity is undertaken in a manner sensitive to environmental concerns. The conclusion of the *Convenio* and the issuance of the federal permits show clearly that Mexico was satisfied that this project was consistent with, and sensitive to, its environmental concerns.

99. Mexico failed to ensure a transparent and predictable framework for Metalclad's business planning and investment. The totality of these circumstances demonstrates a lack of orderly process and timely disposition in relation to an investor of a Party acting in the expectation that it would be treated fairly and justly in accordance with the NAFTA.

100. Moreover, the acts of the State and the Municipality – and therefore the acts of Mexico – fail to comply with or adhere to the requirements of NAFTA, Article 1105(1) that each Party accord to investments of investors of another Party treatment in accordance with international law, including fair and equitable treatment. This is so particularly in light of the governing principle that internal law (such as the Municipality's stated permit requirements) does not justify failure to perform a treaty. (*Vienna Convention on the Law of Treaties, Arts. 26, 27*).

101. The Tribunal therefore holds that Metalclad was not treated fairly or equitably under the NAFTA and succeeds on its claim under Article 1105.

[4] The question of turning to NAFTA before exhausting local remedies was examined by the parties. However, Mexico does not insist that local remedies must be exhausted. Mexico's position is correct in light of NAFTA Article 1121(2)(b) which provides that a disputing investor may submit a claim under NAFTA Article 1117 if both the investor and the enterprise waive their rights to initiate or continue before any administrative tribunal or court under the law of any Party any proceedings with respect to the measure of the disputing Party that is alleged to be a breach referred to in NAFTA Article 1117.

C. NAFTA, Article 1110: Expropriation

102. NAFTA Article 1110 provides that "[n]o party shall directly or indirectly . . . expropriate an investment . . . or take a measure tantamount to . . . expropriation . . . except: (a) for a public purpose; (b) on a non-discriminatory basis; (c) in accordance with due process of law and Article 1105(1); and (d) on payment of compensation . . . ." "A measure" is defined in Article 201(1) as including "any law, regulation, procedure, requirement or practice".

103. Thus, expropriation under NAFTA includes not only open, deliberate and acknowledged takings of property, such as outright seizure or formal or obligatory transfer of title in favour of the host State, but also covert or incidental interference with the use of property which has the effect of depriving the owner, in whole or in significant part, of the use or reasonably-to-be-expected economic benefit of property even if not necessarily to the obvious benefit of the host State.

104. By permitting or tolerating the conduct of Guadalcazar in relation to Metalclad which the Tribunal has already held amounts to unfair and inequitable treatment breaching Article 1105 and by thus participating or acquiescing in the denial to Metalclad of the right to operate the landfill, notwithstanding the fact that the project was fully approved and endorsed by the federal government, Mexico must be held to have taken a measure tantamount to expropriation in violation of NAFTA Article 1110(1).

105. The Tribunal holds that the exclusive authority for siting and permitting a hazardous waste landfill resides with the Mexican federal government. This finding is consistent with the testimony of the Secretary of SEMARNAP and, as stated above, is consistent with the express language of the LGEEPA.

106. As determined earlier (see above, para 92), the Municipality denied the local construction permit in part because of the Municipality's perception of the adverse environmental effects of the hazardous waste landfill and the geological unsuitability of the landfill site. In so doing, the Municipality acted outside its authority. As stated above, the Municipality's denial of the construction permit without any basis in the proposed physical construction or any defect in the site, and extended by its subsequent administrative and judicial actions regarding the *Convenio*,

effectively and unlawfully prevented the Claimant's operation of the landfill.

107. These measures, taken together with the representations of the Mexican federal government, on which Metalclad relied, and the absence of a timely, orderly or substantive basis for the denial by the Municipality of the local construction permit, amount to an indirect expropriation.

108. The present case resembles in a number of pertinent respects that of *Biloune, et al. v. Ghana Investment Centre, et al.,* 95 I.L.R.183, 207-10 (1993) (Judge Schwebel, President; Wallace and Leigh, Arbitrators). In that case, a private investor was renovating and expanding a resort restaurant in Ghana. As with Metalclad, the investor, basing itself on the representations of a government affiliated entity, began construction before applying for a building permit. As with Metalclad, a stop work order was issued after a substantial amount of work had been completed. The order was based on the absence of a building permit. An application was submitted, but although it was not expressly denied, a permit was never issued. The Tribunal found that an indirect expropriation had taken place because the totality of the circumstances had the effect of causing the irreparable cessation of work on the project. The Tribunal paid particular regard to the investor's justified reliance on the government's representations regarding the permit, the fact that government authorities knew of the construction for more than one year before issuing the stop work order, the fact that permits had not been required for other projects and the fact that no procedure was in place for dealing with building permit applications. Although the decision in *Biloune* does not bind this Tribunal, it is a persuasive authority and the Tribunal is in agreement with its analysis and its conclusion.

109. Although not strictly necessary for its conclusion, the Tribunal also identifies as a further ground for a finding of expropriation the Ecological Decree issued by the Governor of SLP on September 20, 1997. This Decree covers an area of 188,758 hectares within the "Real de Guadalcazar" that includes the landfill site, and created therein an ecological preserve. This Decree had the effect of barring forever the operation of the landfill.

110. The Tribunal is not persuaded by Mexico's representation to the contrary. The Ninth Article, for instance, forbids any work inconsistent

with the Ecological Decree's management program. The management program is defined by the Fifth Article as one of diagnosing the ecological problems of the cacti reserve and of ensuring its ecological preservation. In addition, the Fourteenth Article of the Decree forbids any conduct that might involve the discharge of polluting agents on the reserve soil, subsoil, running water or water deposits and prohibits the undertaking of any potentially polluting activities. The Fifteenth Article of the Ecological Decree also forbids any activity requiring permits or licenses unless such activity is related to the exploration, extraction or utilization of natural resources.

111. The Tribunal need not decide or consider the motivation or intent of the adoption of the Ecological Decree. Indeed, a finding of expropriation on the basis of the Ecological Decree is not essential to the Tribunal's finding of a violation of NAFTA Article 1110. However, the Tribunal considers that the implementation of the Ecological Decree would, in and of itself, constitute an act tantamount to expropriation.

112. In conclusion, the Tribunal holds that Mexico has indirectly expropriated Metalclad's investment without providing compensation to Metalclad for the expropriation. Mexico has violated Article 1110 of the NAFTA.

VIII. QUANTIFICATION OF DAMAGES OR COMPENSATION

A. Basic Elements of Valuation

113. In this instance, the damages arising under NAFTA, Article 1105 and the compensation due under NAFTA, Article 1110 would be the same since both situations involve the complete frustration of the operation of the landfill and negate the possibility of any meaningful return on Metalclad's investment. In other words, Metalclad has completely lost its investment.

114. Metalclad has proposed two alternative methods for calculating damages: the first is to use a discounted cash flow analysis of future profits to establish the fair market value of the investment (approximately $90 million); the second is to value Metalclad's actual investment in the landfill (approximately $20–25 million).

115. Metalclad also seeks an additional $20–25 million for the negative impact the circumstances are alleged to have had on its other business operations. The Tribunal disallows this additional claim because a variety of factors, not necessarily related to the La Pedrera development, have affected Metalclad's share price. The causal relationship between Mexico's actions and the reduction in value of Metalclad's other business operations are too remote and uncertain to support this claim. This element of damage is, therefore, left aside.

116. Mexico asserts that a discounted cash flow analysis is inappropriate where the expropriated entity is not a going concern. Mexico offers an alternative calculation of fair market value based on COTERIN's "market capitalization". Mexico's "market capitalization" calculations show a loss to Metalclad of $13-15 million.

117. Mexico also suggests a direct investment value approach to damages. Mexico estimates Metalclad's direct investment value, or loss, to be approximately $3-4 million.

118. NAFTA, Article 1135(1)(a), provides for the award of monetary damages and applicable interest where a Party is found to have violated a Chapter Eleven provision. With respect to expropriation, NAFTA, Article 1110(2), specifically requires compensation to be equivalent to the fair market value of the expropriated investment immediately before the expropriation took place. This paragraph further states that "the valuation criteria shall include going concern value, asset value including declared tax value of tangible property, and other criteria, as appropriate, to determine fair market value".

119. Normally, the fair market value of a going concern which has a history of profitable operation may be based on an estimate of future profits subject to a discounted cash flow analysis. *Benvenuti and Bonfant Srl v. The Government of the People's Republic of Congo*, 1 ICSID Reports 330; 21 I.L.M. 758; *AGIP SPA v. The Government of the People's Republic of Congo*, 1 ICSID Reports 306; 21 I.L.M. 737.

120. However, where the enterprise has not operated for a sufficiently long time to establish a performance record or where it has failed to make a profit, future profits cannot be used to determine going concern or fair

market value. In *Sola Tiles, Inc. v. Iran (1987)* (14 Iran-U.S.C.T.R. 224, 240-42; 83 I.L.R. 460, 480-81), the Iran-U.S. Claims Tribunal pointed to the importance in relation to a company's value of "its business reputation and the relationship it has established with its suppliers and customers". Similarly, in *Asian Agricultural Products v. Sri Lanka* (4 ICSID Reports 246 (1990) at 292), another ICSID Tribunal observed, in dealing with the comparable problem of the assessment of the value of good will, that its ascertainment "requires the prior presence on the market for at least two or three years, which is the minimum period needed in order to establish continuing business connections".

121. The Tribunal agrees with Mexico that a discounted cash flow analysis is inappropriate in the present case because the landfill was never operative and any award based on future profits would be wholly speculative.

122. Rather, the Tribunal agrees with the parties that fair market value is best arrived at in this case by reference to Metalclad's actual investment in the project. Thus, in *Phelps Dodge Corp. v. Iran* (10 Iran-U.S. C.T.R. 121 (1986)), the Iran-U.S. Claims Tribunal concluded that the value of the expropriated property was the value of claimant's investment in that property. In reaching this conclusion, the Tribunal considered that the property's future profits were so dependent on as yet unobtained preferential treatment from the government that any prediction of them would be entirely speculative. (*Id. at 132-33*). Similarly, in the *Biloune* case (see above), the Tribunal concluded that the value of the expropriated property was the value of the claimant's investment in that property. While the Tribunal recognized the validity of the principle that lost profits should be considered in the valuation of expropriated property, the Tribunal did not award lost profits because the claimants could not provide any realistic estimate of them. In that case, as in the present one, the expropriation occurred when the project was not yet in operation and had yet to generate revenue. (*Biloune,* 95 I.L.R. at 228-229). The award to Metalclad of the cost of its investment in the landfill is consistent with the principles set forth in *Chorzow Factory (Claim for Indemnity) (Merits), Germany v. Poland, P.C.I.J. Series A., No. 17 (1928) at p.47,* namely, that where the state has acted contrary to its obligations, any award to the claimant should, as far as is possible, wipe out all the consequences of the illegal act and reestablish the situation which would in all probability have existed if that act had not been committed (the *status quo ante).*

123. Metalclad asserts that it invested $20,474,528.00 in the landfill project, basing its value on its United States Federal Income Tax Returns and Auditors' Workpapers of Capitalized Costs for the Landfill reflected in a table marked Schedule A and produced by Metalclad as response 7(a)A in the course of document discovery. The calculations include landfill costs Metalclad claims to have incurred from 1991 through 1996 for expenses categorized as the COTERIN acquisition, personnel, insurance, travel and living, telephone, accounting and legal, consulting, interest, office, property, plant and equipment, including $328,167.00 for "other".

124. Mexico challenges the correctness of these calculations on several grounds, of which one is the lack of supporting documentation for each expense item claimed. However, the Tribunal finds that the tax filings of Metalclad, together with the independent audit documents supporting those tax filings, are to be accorded substantial evidential weight and that difficulties in verifying expense items due to incomplete files do not necessarily render the expenses claimed fundamentally erroneous. *See Biloune,* 95 I.L.R. at 223-24.

125. The Tribunal agrees, however, with Mexico's position that costs incurred prior to the year in which Metalclad purchased COTERIN are too far removed from the investment for which damages are claimed. The Tribunal will reduce the Award by the amount of the costs claimed for 1991 and 1992.

B. "Bundling"

126. Some of the subsequent costs claimed by Metalclad involve what has been termed "bundling". "Bundling" is an accounting concept where the expenses related to different projects are aggregated and allocated to another project. Metalclad has claimed as costs related to the development at La Pedrera earlier costs incurred on certain other sites in Mexico. While not taking any decision in principle regarding the concept of bundling as it may be applicable to other situations (for example in the oil industry where the costs in relation to a "dry hole" may in part be allocated to the cost of exploring for and developing a successful well), the Tribunal does not consider it appropriate to apply the concept in the present case. The Tribunal has reduced accordingly the sum payable by the Government of Mexico.

C. Remediation

127. The question remains of the future status of the landfill site, legal title to which at present rests with COTERIN. Clearly, COTERIN's substantive interest in the property will come to an end when it receives payment under this award. COTERIN must, therefore, relinquish as from that moment all claim, title and interest in the site. The fact that the site may require remediation has been borne in mind by the Tribunal and allowance has been made for this in the calculation of the sum payable by the Government of Mexico.

D. Interest

128. The question arises whether any interest is payable on the amount of the compensation. In providing in Article 1135(1) that a Tribunal may award "monetary damages and any applicable interest", NAFTA clearly contemplates the inclusion of interest in an award. On the basis of a review of the authorities, the tribunal in *Asian Agricultural Products v. Sri Lanka* (4 *ICSID Reports* 245) held that "interest becomes an integral part of the compensation itself, and should run consequently from the date when the State's international responsibility became engaged" (*ibid.* p.294, para. 114). The Tribunal sees no reason to depart from this view. As has been shown above, Mexico's international responsibility is founded upon an accumulation of a number of factors. In the circumstances, the Tribunal considers that of the various possible dates at which it might be possible to fix the engagement of Mexico's responsibility, it is reasonable to select the date on which the Municipality of Guadalcazar wrongly denied Metalclad's application for a construction permit. The Tribunal therefore concludes that interest should be awarded from that date until the date 45 days from that on which this Award is made. So as to restore the Claimant to a reasonable approximation of the position in which it would have been if the wrongful act had not taken place, interest has been calculated at 6% p.a., compounded annually.

E. Recipient

129. As required by NAFTA, Article 1135(2)(b), the award of monetary damages and interest shall be payable to the enterprise. As required by NAFTA, Article 1135(2)(c), the award is made without prejudice to any right that any person may have in the relief under applicable domestic law.

IX. COSTS

130. Both parties seek an award of costs and fees. However, the Tribunal finds that it is equitable in this matter for each party to bear its own costs and fees, as well as half the advance payments made to ICSID.

X. AWARD

131. For the reasons stated above, the Tribunal hereby decides that, reflecting the amount of Metalclad's investment in the project, less the disallowance of expenses claimed for 1991 and 1992, less the amount claimed by way of bundling of certain expenses, and less the estimated amount allowed for remediation, plus interest at the rate of 6% compounded annually, the Respondent shall, within 45 days from the date on which this Award is rendered, pay to Metalclad the amount of $16,685,000.00. Following such period, interest shall accrue on the unpaid award or any unpaid part thereof at the rate of 6% compounded monthly.

Made as at Vancouver, British Columbia, Canada, in English and Spanish.

THE TRIBUNAL

Constituted as indicated above,

Having conducted its deliberations,

Issues the following award:

A. Introduction

1. The Claimant, Técnicas Medioambientales, TECMED S.A., is a commercial company organized under Spanish law, domiciled in Madrid, Spain. It is represented in this arbitration proceeding by:

Mr. Juan Carlos Calvo Corbella
Técnicas Medioambientales TECMED S.A.
Albasanz 16 – 1a planta
28037 Madrid, Spain

Ms. Mercedes Fernández
Mr. Juan Ignacio Tena García
Jones, Day, Reavis & Pogue abogados
Velázquez 51 – 4a planta
28001 Madrid, Spain

2. The Respondent is the Government of the United Mexican States, represented in this arbitration proceeding by:

Mr. Hugo Perezcano Díaz
Consultor Jurídico
Dirección General de Consultoría Jurídica
de Negociaciones Comerciales
Subsecretaría de Negociaciones Comerciales Internacionales
Secretaría de Economía
Alfonso Reyes No. 30, piso 17
Colonia Condesa
Mexico, D.F., C.P. 06179, Mexico

3. This Award decides on the merits of the dispute between the parties in accordance with Article 53 of the Arbitration Additional Facility Rules (Arbitration Rules) of the International Centre for Settlement of Investment Disputes.

B. Procedural History

4. On July 28, 2000, the Claimant filed with the Secretariat of the International Centre for Settlement of Investment Disputes ("ICSID") an application for approval of access to the Additional Facility and a request for arbitration against the Respondent in accordance with the Additional Facility Rules for the Administration of Proceedings by the Secretariat of the International Centre for Settlement of Investment Disputes (hereinafter referred to as the "Rules") and under the provisions of the Agreement on the Reciprocal Promotion and Protection of Investments signed by the Kingdom of Spain and the United Mexican States (hereinafter referred to as the "Agreement"). The Agreement entered into force for both countries on December 18, 1996. The Claimant is the parent company in Spain of TECMED, TECNICAS MEDIOAMBIENTALES DE MEXICO, S.A. de C:V. ("Tecmed"), a company incorporated under Mexican law, and holds over 99% of the shares of such company. Additionally, Tecmed holds over 99% of the shares of CYTRAR, S.A. DE C.V. ("Cytrar"), a company incorporated under Mexican law through which the investment giving rise to the disputes leading to these arbitration proceedings was made.

5. On August 28, 2000, the Acting Secretary-General of ICSID, pursuant to Article 4 of the Rules, notified the Claimant that access to the Additional Facility Rules had been approved with respect to this case and that the notice of institution of arbitration proceedings had been registered; he then sent the certificate of registration to the parties and forwarded copies of the notice of institution of arbitration proceedings to the Respondent.

6. On October 2, 2000, the Claimant notified the Centre of the appointment of Professor José Carlos Fernández Rosas as arbitrator and of its consent for the Parties to appoint as arbitrator a person of the same nationality of the Party making the proposal.

7. On November 7, 2000, the Respondent notified the Centre of the appointment of Mr. Guillermo Aguilar Alvarez as arbitrator and nominated Mr. Albert Jan van den Berg as President of the Arbitral Tribunal.

8. On November 29, 2000, the Claimant objected to the nomination of Mr. van den Berg and proposed instead that the Parties request their designated arbitrators to appoint the President of the Arbitral Tribunal, which was accepted by the Respondent.

9. On January 30, 2001, the ICSID Secretariat informed that Mr. Fernández Rosas and Mr. Aguilar Alvarez had appointed Dr. Horacio A. Grigera Naón as President of the Arbitral Tribunal. On February 2, 2001, the Claimant confirmed its agreement to this appointment and, in its communication dated February 22, 2001, the Respondent notified the Centre of its agreement to the President's appointment.

10. On March 13, 2001, the Centre's Acting Secretary-General informed the parties that, as from that date, the Arbitral Tribunal was deemed to have been constituted and the proceedings to have begun.

11. The first session of the Arbitral Tribunal with the parties was held in Paris, France on May 7, 2001. During the course of the session, procedural rules applicable to these

proceedings were established and the schedule for the submission of memorials by the Parties was fixed, among other things.

12. On September 4, 2001, the Claimant filed its memorial.

13. On November 16, 2001, the Respondent made certain observations regarding opinions alleged to have been given by Mr. Aguilar Alvarez in another arbitration proceeding which, in the Respondent's view, also involved legal matters to be debated in this arbitration proceeding.

14. On November 16, 2001, Lic. Aguilar Alvarez submitted his resignation as arbitrator in these proceedings, upon which, in a letter of the same date, the ICSID Secretariat served notice of the suspension of the proceedings until the vacancy created by Mr. Aguilar Alvarez's resignation was filled.

15. On November 20, 2001, the Arbitral Tribunal accepted the resignation of Mr. Aguilar Alvarez.

16. On December 14, 2001, the Respondent served notice of the appointment of Mr. Carlos Bernal Verea in replacement of Mr. Guillermo Aguilar Alvarez.

17. On December 17, 2001, the ICSID Secretariat informed that Mr. Carlos Bernal Verea had accepted his appointment by the Respondent to serve as arbitrator in these proceedings and as from such date deemed the Arbitral Tribunal to have been reconstituted and the arbitration proceedings to have resumed.

18. On January 22, 2002, the Arbitral Tribunal issued a procedural order deciding certain procedural matters raised by the Parties and extended the deadline for the submission of the Respondent's counter-memorial until February 4, 2002.

19. Following a new request by the Respondent in its written communication of January 31, 2002, on February 1, 2002, the Arbitral Tribunal extended the deadline for the submission of the Respondent's counter-memorial until February 11, 2002.

20. The Respondent's counter-memorial was received on February 11, 2002. On February 19, 2002, the Respondent enclosed a list of the facts alleged in the memorial that were recognized by the Respondent in its counter-memorial and those that were not.

21. On March 7, 2002, the Arbitral Tribunal issued Procedural Order No. 1, fixing the week of May 20, 2002 for the Evidentiary Hearing to be held in Washington, D.C., USA, dispensing with the submission of a reply and rejoinder by the Parties, establishing guidelines for holding the hearing and setting June 28, 2002 as the deadline for the Parties to submit their closing statements after the hearing.

22. Following new requests and exchanges between the Parties in the notes of the Respondent and Claimant dated March 13 and 21, 2002, respectively, the Arbitral Tribunal issued its Procedural Order No. 2, which —in addition to specifying certain additional

matters in relation to the hearing scheduled for the week of May 20 – provided that, at the end of the hearing on May 24, 2003, the Parties could address the Arbitral Tribunal orally, and extended the deadline for the submission of closing statements until July 15, 2002.

23. On April 29, 2002, the Secretariat of ICSID notified the Parties of the agenda issued by the Arbitral Tribunal for the conduct of the hearing.

24. The hearing was held in Washington, D.C., at the seat of ICSID. It began in the morning of May 20, 2002, and ended on May 24, 2002, after the Parties addressed the Arbitral Tribunal orally.

25. A stenographic transcript of the hearing was made, which lists the following persons as having been present at the hearing:

Members of the Arbitral Tribunal

1. Dr. Horacio A. Grigera Naón, President

2. Prof. José Carlos Fernández Rozas

3. Mr. Carlos Bernal Verea

Secretary of the Arbitral Tribunal

4. Ms. Gabriela Alvarez Avila

Técnicas Medioambientales TECMED S.A.

5. Mr. Juan Carlos Calvo Corbella

6. Ms. Mercedes Fernández

7. Mr. José Daniel Fernández

The United Mexican States

8. Mr. Hugo Perezcano Díaz

9. Mr. Luis Alberto González García

10. Ms. Alejandra Treviño Solís

11. Mr. Sergio Ampudia

12. Mr. Carlos García

13. Mr. Rolando García

14. Cameron Mowatt, Esq.

15. Stephen Becker, Esq.

16. Sanjay Mullick, Esq.

17. Ms. Jacqueline Paniagua

18. Lars Christianson, Engineer

19 Ms. Ruth Benkley

20. Francisco Maytorena Fontes, Engineer

21. Christopher Thomas, Esq.

26. The hearing was held in accordance with the agenda fixed by the Arbitral Tribunal and within the time limit set for the Parties in Procedural Order No. 2 for the examination of witnesses and experts.

27. The following witnesses and experts were heard at the hearing after the opening statements made by the Claimant and the Respondent, respectively.

Offered by the Claimant

José Luis Calderón Bartheneuf

Javier Polanco Gómez Lavin

Enrique Diez Canedo Ruiz

José María Zapatero Vaquero

Jesús M. Pérez de Vega

Luis R. Vera Morales

José Visoso Lomelín

Offered by the Respondent

Alfonso Camacho Gómez

Cristina Cortinas de Nava

Jorge Sánchez Gómez

Lars Christianson

28. During the course of the hearing, the Arbitral Tribunal decided to agree to the inclusion of documents introduced by either the Respondent or the Claimant during the hearing. It further decided —after dismissing the Respondent's objections in this regard— to agree to the inclusion of certain documents submitted in support of the statement made by Mr. Jesús M. Pérez de Vega as an expert proposed by the Claimant; nevertheless, it gave the Respondent an opportunity to examine such documents and exercise its right to question the expert once the inclusion of such documents had been decided. However, the Respondent declined to exercise such right.

29. At the end of the hearing, the Arbitral Tribunal heard the oral presentations made by the Parties, each of which was allowed 90 minutes.

30. On August 1, 2002, the Claimant and the Respondent submitted their respective closing statements.

31. In a note dated July 31, 2002, the Respondent had explained the reasons why it was annexing to its closing statement a "Declaration of Lars Christianson, Engineer", accompanied by exhibits.

32. In a note dated August 2, 2002, the Claimant objected to the inclusion of such declaration and exhibits.

33. In its procedural order of August 12, 2002, the Arbitral Tribunal decided to agree to the inclusion of such statement and exhibits, not as part of the evidence offered and produced, but as part of the Respondent's closing statement.

34. By note dated April 9, 2003, the Secretariat of ICSID notified the Parties that the Arbitral Tribunal had declared the proceedings closed in accordance with Article 45 of the Rules.

C. Summary of Facts and Allegations presented by the Parties

35. The Claimant's claims are related to an investment in land, buildings and other assets in connection with a public auction called by Promotora Inmobiliaria del Ayuntamiento de Hermosillo (hereinafter referred to as "Promotora"), a decentralized municipal agency of the Municipality of Hermosillo, located in the State of Sonora, Mexico. The purpose of the auction was the sale of real property, buildings and facilities and other assets relating to "Cytrar", a controlled landfill of hazardous industrial waste. Tecmed was the awardee, pursuant to a decision adopted by the Management Board of Promotora on February 16, 1996. Later on, the holder of Tecmed´s rights and obligations under the tender came to be Cytrar, a company organized by Tecmed for such purpose and to run the landfill operations.

36. The landfill was built in 1988 on land purchased by the Government of the State of Sonora, in the locality of Las Víboras, within the jurisdiction of the Municipality of Hermosillo, State of Sonora. The landfill had a renewable license to operate for a five-year term as from December 7, 1988, issued by the Ministry of Urban Development and Ecology (SEDUE) of the Federal Government of Mexico to Parques Industriales de Sonora, a decentralized agency of the Government of the State of Sonora. During this period, the landfill operator was not this agency but another entity, Parque Industrial de Hermosillo, another public agency of the State of Sonora. Ownership of the landfill was then transferred to a decentralized agency of the Municipality of Hermosillo, Confinamiento Controlado Parque Industrial de Hermosillo O.P.D.; in this new phase, it had a new authorization to operate for an indefinite period of time. Such authorization had been granted on May 4, 1994, by the Hazardous Materials, Waste and Activities Division of the National Ecology Institute of Mexico (hereinafter referred to as INE), an agency of the Federal Government of the United Mexican States within the Ministry of the Environment, Natural Resources and Fisheries (SEMARNAP), which cancelled the previous authorization, granted on December 7, 1988. INE —both within the framework of SEDUE as well as of its successor SEMARNAP— is in charge of Mexico's national policy on ecology and environmental protection, and is also the regulatory body on environmental issues.

37. Upon the liquidation and dissolution of the above-mentioned decentralized agency, ordered by the Governor of the State of Sonora on July 6, 1995, in mid-1995, the assets of the landfill became the property of the Government of the State of Sonora. Subsequently, on November 27, 1995, through a donation agreement entered into between that Government and the Municipality of Hermosillo, the property was transferred to Promotora.

38. In a letter dated April 16, 1996, confirmed by letters of June 5, August 26 and September 5, 1996, Tecmed made a request to INE for the operating license of the landfill —then in the name of Confinamiento Controlado Parque Industrial de Hermosillo O.P.D.— to be issued in the name of Cytrar. The Municipality of Hermosillo supported this request in its note to INE dated March 28, 1996, requesting INE to provide all possible assistance in connection with the name change procedure in the operating license in favor of Tecmed or of the company organized by it. In an official letter of September 24, 1996, INE notified

Cytrar, in connection with the application to change the name of the entity from Promotora to Cytrar, that Cytrar had been registered with INE. The official letter was then returned by Cytrar to INE as requested by INE after having been issued, and replaced by another one of the same date to which the authorization relating to the landfill was attached, dated November 11, 1996, stating the new name of the entity. Such authorization could be extended every year at the applicant's request 30 days prior to expiration. It was so extended for an additional year, until November 19, 1998.

39. The arbitration claim seeks damages, including compensation for damage to reputation, and interests in connection with damage alleged to have accrued as of November 25, 1998, on which date INE rejected the application for renewal of the authorization to operate the landfill, expiring on November 19, 1998, pursuant to an INE resolution on the same date, whereby INE further requested Cytrar to submit a program for the closure of the landfill. Subsidiarily, the Claimant has requested restitution in kind through the granting of permits to the Claimant enabling it to operate the Las Víboras landfill until the end of its useful life, in addition to compensation for damages.

40. The Claimant further argues that the successive permits granted by INE to Cytrar in connection with the operation of the landfill constitute a violation of the conditions on which the Claimant made its investment because (i) such permits, both as regards their duration as well as the conditions to which they were subject, were different from the permit given for operation of the landfill at the time the investment was made; and (ii) the price paid by Cytrar included the acquisition of intangible assets which involved the transfer to Cytrar of existing permits to operate the landfill and under which such landfill was being operated at the time of making the investment, and not the ones ultimately granted to it. The Claimant argues that such a violation of conditions also involves a violation of, among other provisions, Articles 2 and 3(1) of the Agreement and a violation of Mexican law. However, the Claimant states that it is not seeking in these arbitration proceedings a pronouncement or declaration regarding the lawfulness or unlawfulness, legality or illegality of acts or omissions attributable to the Respondent in connection with permits or authorizations relating to the operation of the Las Víboras landfill prior to the INE resolution of November 19, 1998, which terminated Cytrar's authorization to operate the landfill, considered in isolation, although it highlights the significance of such acts or omissions as preparatory acts for subsequent conduct attributable to the Respondent which, according to the Claimant, is in violation of the Agreement or facilitated such conduct.

41. The Claimant argues that the refusal to renew the landfill's operating permit, contained in the INE resolution of November 25, 1998, constitutes an expropriation of its investment, without any compensation or justification thereof, and further constitutes a violation of Articles 3(1), 3(2), 4(1), 4(5), 5(1), 5(2) and 5(3) of the Agreement, as well as a violation of Mexican law. According to the Claimant, such refusal would frustrate its justified expectation of the continuity and duration of the investment made and would impair recovery of the invested amounts and the expected rate of return.

42. The Claimant alleges that the conditions of the tender and the invitation to tender, the award or sale of the landfill or of the assets relating thereto and the investment made by the Claimant were substantially modified after the investment was made for reasons

attributable to acts or omissions of Mexican municipal, state and federal authorities. The Claimant claims that such modifications, with detrimental effects for its investment and which allegedly led to the denial by the Federal Government of an extension to operate the landfill, are, to a large extent, due to political circumstances essentially associated to the change of administration in the Municipality of Hermosillo, in which the landfill is physically situated, rather than to legal considerations. Specifically, the Claimant attributes such changes to the result of the election held in Mexico in July 1997, one of the consequences of which was the taking of office of a new Mayor of the Municipality of Hermosillo and similar changes in other municipal governments in the State of Sonora. According to the Claimant's allegations, the new authorities of Hermosillo encouraged a movement of citizens against the landfill, which sought the withdrawal or non-renewal of the landfill's operating permit and its closedown, and which also led to confrontation with the community, even leading to blocking access to the landfill. The authorities of the State of Sonora, where the Municipality of Hermosillo is located, are alleged to have expressly supported the position adopted by the Municipality.

43. The Claimant argues that the Federal Government yielded to the combined pressure of the municipal authorities of Hermosillo and of the State of Sonora along with the community movement opposed to the landfill, which, according to the Claimant, led to the INE Resolution of November 25, 1998, referred to above. This Resolution denied Cytrar authorization to operate the landfill and ordered its closedown. The Claimant argues that INE's refusal to extend the authorization to operate the landfill is an arbitrary act which violates the Agreement, international law and Mexican law. It further denies any misconduct or violation on its part of the terms under which the landfill permit was granted and which could justify a refusal to extend the authorization. The Claimant alleges that certain breaches of the conditions of the permit that expired on November 19, 1998, which was subsequently not extended by INE, did not warrant such an extreme decision. The Claimant points out that such breaches had been the subject matter of an investigation conducted by the Federal Environmental Protection Attorney's Office ("PROFEPA"), which, like INE, is an agency within the purview of SEMARNAP, but with powers, among other things, to monitor compliance with federal environmental rules and to impose sanctions, which may include a revocation of the operating license. It also stresses that PROFEPA had not found violations of such an extent that they might endanger the environment or the health of the population or which justified more stringent sanctions than the fines eventually imposed on Cytrar by PROFEPA as a result of its investigations.

44. The Claimant stresses the commitment of Cytrar, with the support of Tecmed, as from July 3, 1998, to relocate the hazardous waste landfill operation to another site on the basis of agreements reached with federal, state and municipal authorities as of such date, and denies the allegation that the fact that such relocation had not yet taken place at the time the extension of Cytrar's permit was refused could be validly argued among the grounds referred to by INE in its resolution of November 1998 denying the extension. The Claimant points out that Cytrar, with the support of Tecmed, subsequently added to its commitment to relocate the landfill another commitment to pay the costs and economic consequences involved in such relocation, and further denies that the delay or failure to relocate was attributable to it. The Claimant insists that the only condition to which Cytrar subjected its relocation commitment was that, pending such relocation, operation by Cytrar of the Las

Víboras landfill and the relevant operating permit should continue, and that such condition is a part of the relocation agreement entered into with the federal, state and municipal authorities of the Respondent. At any rate, the Respondent argues that Cytrar unsuccessfully applied to INE for a limited extension of its permit to operate the Las Víboras landfill (five months as from November 19, 1998), in order to come to an agreement, within such term, on the identification of the site to which the landfill operation would be relocated and to carry out the relocation.

45. According to the Claimant, the expropriation act and other violations of the Agreement which it deems to have suffered, have caused the Claimant to sustain a complete loss of the profits and income from the economic and commercial operation of the Las Víboras landfill as an on going business. Therefore the damage sustained includes the impossibility of recovering the cost incurred in the acquisition of assets for the landfill, its adaptation and preparation and, more generally, the investments relating to or required for this kind of industrial activity, including, but not limited to, constructions relating to the landfill; lost profits and business opportunities; the impossibility of performing contracts entered into with entities producing industrial waste, thus leading to termination of such contracts and to possible claims relating thereto; and the injury caused to the Claimant and to its subsidiaries in Mexico due to the adverse effect on its image in that country, with the consequent negative impact on the Claimant's capacity to expand and develop its activities in Mexico.

46. The Respondent, after pointing out that it does not consider that the powers of INE to deny the landfill's operating permit are regulated but discretionary, denies that such denial was a result of an arbitrary exercise of such discretionary powers. The Respondent claims that denial of the permit is a control measure in a highly regulated sector and which is very closely linked to public interests. Accordingly, the Respondent holds that such denial seeks to discourage certain types of conduct, but is not intended to penalize. The Respondent stresses that the matters debated in these arbitration proceedings are to be solved in a manner consistent with the provisions of the Agreement and of international law.

47. The Respondent denies that the subject matter of the tender and subsequent award to Tecmed was a landfill, understood as a group or pool of tangible and intangible assets including licenses or permits to operate a controlled landfill of hazardous waste. The Respondent argues that the assets tendered and sold by Promotora solely include certain facilities, land, infrastructure and equipment, but no permits, authorizations or licenses. With regard to the documents signed by Promotora, Tecmed and Cytrar in connection with the public auction of the assets relating to the landfill, the Respondent further argues that (i) the obligation or responsibility to obtain permits, licenses or authorizations to operate the landfill was vested in Cytrar; (ii) Promotora did not attempt to obtain or provide such permits, licenses and authorizations for the benefit of or in the name of Cytrar, of the Claimant or of Tecmed, nor did it guarantee that they would be obtained; (iii) Promotora's only commitment in this regard was to ensure that Cytrar could operate the landfill under the existing permits, authorizations or licenses, which remained vested in Confinamiento Parque Industrial de Hermosillo O.P.D. until Cytrar obtained its own permits, authorizations or licenses; (iv) it was always clear to Cytrar that it would require its own licenses, authorizations or permits in order to operate the landfill; and (v) neither Cytrar nor

Tecmed contacted the competent federal authorities for information regarding the possibility of transferring existing authorizations or permits. The Respondent denies the claim that the amount of $ 24,047,988.26 (Mexican Pesos) was paid as price for the permits or authorizations to operate the landfill, or that Promotora's related invoice reflects the reality of the tender and of the subsequent sales transaction.

48. The Respondent challenges the Arbitral Tribunal's jurisdiction to decide in connection with conduct attributable or attributed to the Respondent which occurred before the entry into force of the Agreement, or that any interpretation thereof —particularly Article 2(2), which extends the application of the Agreement to investments made prior to its entry into force— could lead to a different conclusion. Likewise, based on Title II.5 of the Appendix to the Agreement, the Respondent rejects the Arbitral Tribunal's jurisdiction over acts or omissions attributed or attributable to the Respondent which were or could have been known to the Claimant, together with the resulting damages, prior to a fixed 3-year period, calculated as from the commencement date of this arbitration pursuant to the Agreement. The Respondent further denies that the conduct allegedly in violation of the Agreement attributed to the Respondent caused any damage to the Claimant, so the Claimant's claims would not fulfill the requirements of Title II.4 of the Appendix to the Agreement.

49. The Respondent claims that the granting and conditions of the license of November 11, 1996, were within the statutory powers of INE, and that such conditions were similar to the ones governing other permits granted by INE at the time. The Respondent stresses the negative attitude of the community towards the landfill due to its location and to the negative and highly critical view taken by the community with regard to the way Cytrar performed its task of transporting and confining the hazardous toxic waste originating in the former lead recycling and recovery plant of Alco Pacífico de México, S.A. de C.V. (hereinafter referred to as "Alco Pacífico"), located in Tijuana, Baja California, which would highlight the importance of demanding strict compliance with the new operating permit granted by INE to Cytrar on November 19, 1997.

50. The Respondent alleges that the municipal, state and federal authorities, as well as the security forces and courts of law addressed by Cytrar, acted diligently and in a manner consistent with the Respondent's obligations under the Agreement to offer protection to Cytrar, to its personnel and to the Claimant's investment relating to the landfill, in view of the different forms of social pressure exercised by groups or individuals opposed to the landfill, as well as to finding solutions to the problems resulting from such social pressure. The Respondent further denies that any acts or omissions on the part of such groups or individuals or any liability arising out of such acts or omissions are attributable to the Respondent under the Agreement or under international law. The Respondent underscores the distinct duties performed by PROFEPA and INE, and points out that only INE is competent to decide whether or not to renew an expired permit, based on an assessment of different elements and circumstances exclusively pertaining to INE. The Respondent therefore argues that it is irrelevant that PROFEPA did not revoke Cytrar's permit relating to the Landfill or that it did not close it down due to considerations taken into account by INE in order to decide not to extend the authorization, or that PROFEPA did not find that such matters were significant enough to justify more serious sanctions other than a fine.

However, the Respondent highlights the growing number of violations committed by PROFEPA in Cytrar's operation of the landfill.

51. The Respondent ultimately concludes that there is no conduct on the part of municipal, state or federal authorities of the United Mexican States in connection with Cytrar, Tecmed, the Claimant, the landfill or the Claimant's investments which constitutes a violation of the Agreement pursuant to its provisions or to the provisions of Mexican or international law. It specifically denies that refusing to give a new permit to Cytrar to operate the landfill is in the nature of an expropriation or that there has been a violation of Article 5 of the Agreement. The Respondent also denies that the Claimant suffered discrimination or that it was denied national treatment in violation of Article 4 of the Agreement. The Respondent denies having violated Article 2(1) of the Agreement regarding promotion or admission of investments or having committed any violation of Article 3 of the Agreement. Finally, the Respondent challenges the calculation basis for the compensation sought by the Claimant, which it considers absolutely inappropriate and inordinate.

D. Preliminary Matters

52. The Arbitral Tribunal will first examine the issues which, due to their nature or connection with its jurisdiction to decide this case or due to their close connection with other matters relating to the decisions that the Tribunal must make on the merits of the disputes between the Parties, need to be decided previously. Such matters are (i) the Respondent's challenges to the Arbitral Tribunal's jurisdiction; (ii) the Respondent's challenges to the timely submission by the Claimant of some of its claims; and (iii) the price and scope of the acquisition by Cytrar and Tecmed of assets relating to the Las Víboras landfill.

I. Jurisdiction of the Arbitral Tribunal

53. The Claimant argues,[1] based on Article 2(2) of the Agreement, that the Agreement applies retroactively to the Respondent's conduct prior to the effective date of the Agreement. Such provision stipulates that the Agreement "…shall also apply to investments made prior to its entry into force by the investors of a Contracting Party". According to the Claimant, under this provision, the Agreement covers all conduct or events relating to the investment giving rise to the disputes of this arbitration which took place before December 18, 1996, the entry into force of the Agreement pursuant to Article 12 thereof. Article 12 provides that the Agreement will enter into force on the date of mutual notification between the Contracting Parties of compliance with constitutional requirements for the entry into force of international agreements. Title X of the Appendix to the Agreement shows that this took place on December 18, 1996. The Claimant also alleges, based on Article 18 of the United Nations Vienna Convention of 1969 on the Law of Treaties (hereinafter referred to as the "Vienna Convention"),[2] that the Respondent was

[1] Memorial, p. 84, note 109.
[2] United Nations Conference on the Law of Treaties, First and Second Sessions, Official Records-Documents of the Conference, A/CONF.39/11/Add.2, or 1155 U.N.T.S. 331.

bound, even before entry into force of the Agreement, to "…refrain from acts which would defeat the object matter and purpose…" of the Agreement.[3]

54. The Respondent, in turn,[4] contends that this Arbitral Tribunal has no jurisdiction *ratione temporis* to consider the application of the Agreement to the Respondent's conduct prior to December 18, 1996. The Respondent alleges that any other interpretation would be inconsistent with the principle of non-retroactive application of treaties embodied in Article 28 of the Vienna Convention and with a basic rule of international law. In other words, the Respondent does not recognize the Arbitral Tribunal's jurisdiction to decide in connection with matters or conduct taking place prior to such date.[5]

55. The Arbitral Tribunal does not deem it appropriate to establish the meaning, in abstract or general terms, of "retroactive application" of a legal provision, an expression that does not appear to meet generally accepted criteria.[6] Therefore, in this regard, in addition to following the claims of the Parties as indicated below, the Tribunal will follow the text of the Agreement itself and the rules governing the interpretation of treaties.[7]

56. Based on the standards that have just been defined, consideration of whether the Agreement is to be applied retroactively must first be determined in light of the claims of the Parties. The mandate of an arbitration tribunal is subject to limitations, among them those arising out of disputed issues specifically referred to it by the Parties in their claims. An arbitral tribunal cannot decide more or less than is necessary to settle the disputes referred to it. There is no doubt that the Parties have opposing views as to whether the Agreement applies retroactively or not, and they have extensively argued this point[8] —all the more reason to examine this matter in light of the express requests and arguments of the Parties.

57. The Respondent's conduct prior to December 18, 1996, complained about by the Claimant, essentially consisted of (a) failure to transfer to Cytrar the permit already existing for the operation of the landfill or failure to grant to Cytrar a permit equal or equivalent to such permit, particularly as regards its indefinite duration;[9] and (b) INE's alleged

[3] In 109, p. 85 of its memorial, the Claimant misquotes Article 28 of the Vienna Convention, when in fact the correct reference, based on the text and content of such note, should have been to Article 18 of the Convention.

[4] Counter-memorial, pp. 116-120; 414 *et seq*.

[5] The text and case quoted on page 117, 418 of the counter-memorial and note 327, clearly evidence that the Respondent challenges the jurisdiction of the Arbitral Tribunal to the extent stated above.

[8] Counter-memorial, pp. 116-120, 414 *et seq*. Claimant's closing statement, pp. 93-97. Respondent's closing statement, pp. 4-6; 13 *et seq*.

[9] These events took place as follows: the first one on September 24, 1996 (note from INE to Cytrar informing that "it had been duly registered"), document A42, and the second one some time later, upon INE replacing the note by a new one on even date and with a substantially identical text, except that the new note evidences

ambiguous conduct, in that it first included Cytrar in an INE register in terms that could be deemed to be a transfer to Cytrar of the existing unlimited permit, subsequently revoking it by replacing it with another one, limited in its initial duration (a year) and the subsequent renewal of which was subject to approval by INE.[10].

58. In its memorial, the Claimant states as follows with regard to the conduct of INE with respect to the exchange or replacement of operating permits for the landfill:

However, this fact, although serious when we know what happened subsequently, did not cause immediate prejudice to the claimant which, after all, was still entitled to operate the Landfill acquired.[11]

Nevertheless, the Claimant highlights the following in this regard:

…the unwarranted change in the conditions of operation and as a result of a new and different permit being issued, unrelated to the plans and guarantees existing as of the time of the investment, is truly a discriminatory measure without any legal foundation, expressly prohibited by Article III of the ARPPI (Agreement on the Reciprocal Promotion and Protection of Investments).[12]

And a little later:

It should not be understood that the conversion of an authorization for an unlimited period of time into a temporary one legitimized or enabled the subsequent resolution contrary to renewal. That resolution of INE, challenged in this arbitration, is illegal and unlawful just like a revocation of the license on the same grounds. It is, however, beyond doubt that the precariousness (due to the short duration) and provisional nature of an authorization for such a limited time are greater than in the case of an authorization for an unlimited period of time.[13]

In connection with the same point, the Claimant explains the following:

However, CYTRAR, S.A. de C.V. and TECMED had an authorization covering the operation of the landfill and were not in a position to make complaints that could “displease” the competent officials. Still, in spite of undeniable differences between an authorization for an unlimited duration and a temporary one, the one granted in 1996 was a legitimate and sufficient title, operation of the landfill continued uninterruptedly and relations between the personnel of the companies and the representatives of the Administration were cordial and fluid. Everyone’s intent was that the landfill should operate and be managed appropriately and that it should last. At the time, at least for the Claimant, it was unthinkable that it would be unlawfully deprived of its lawfully obtained authorization only two years later.[14]

---

the granting of a new permit and notifies it to Cytrar (this permit, for a year and renewable, was dated November 11, 1996) as an annex, documents A43 and A44, Memorial, pp. 40-45; 107-109. Claimant’s closing statement, pp. 30-38.

[10] Claimant’s closing statement, pp. 110-115.

[11] Memorial, p. 42.

[12] Memorial, p. 108.

[13] Memorial, p. 109.

[14] Memorial, pp. 44-45. This was later reaffirmed by the Claimant when referring to the authorization granted by INE for the operation of the landfill by Cytrar, of November 19, 1997: “At any rate, we shall reiterate what has already been stated regarding the sufficiency of both authorizations to make operation of the landfill lawful and the practical considerations that caused CYTRAR S.A. de C.V. and TECMED to refrain from expressly protesting such changes in the conditions. The landfill continued to be operational; its duration potential, which depended on its useful life, had not been altered; and the competent authorities had expressed

Referring to INE's refusal to renew the authorization granted on November 19, 1997, the Claimant states that:

This is precisely the violation challenged in this arbitration —an Official Letter of the National Ecology Institute which deprived Cytrar, S.A. de C.V. of the asset that was the basis of its exclusive activity. A definitive and fundamental act accompanied by a number of proximate, previous and subsequent acts which completed the multiple violation of the ARPPI and which are claimed against in this arbitration.[15]

The Claimant further states:

However, the necessary accuracy with which the facts have been dealt in this memorial shows how the respondent's breach did not materialize in a single act, but was gradually prepared, implemented and strengthened until it was finally consummated in the act of refusing renewal.

It was certainly the refusal that caused damage and definitively prevented this company from obtaining a legitimate return on its investment. The preceding acts, particularly the ones leading to adverse modifications of the terms of the authorization, are in the nature of acts prior to that decisive breach which caused the damage for which compensation is requested. But the truth is that, although there is a difference between the operation of a landfill under a temporary authorization and under a license for an unlimited duration, in both cases there exists a title to undertake and lawfully continue operations, and the day-to-day activities are not curtailed by such time limitations.[16]

In connection with the refusal to renew the authorization of November 19, 1997, the Claimant further points out the following:

Therein lies the respondent's essential breach, which has caused the damage for which compensation is requested in this arbitration.[17]

Referring to the fair and equitable treatment under international law guaranteed by Article 4(1) of the Agreement, the Claimant claims that it encompasses the duty to act transparently and respecting the legitimate trust generated in the investor. In this regard, the Claimant states the following:

In sum, the legitimate trust generated in TECMED inducing it to make the investment was violated and seriously trampled upon. First, as a result of the change in the landfill's operating conditions and, subsequently and definitively, through the measure that led to its immediate standstill.

If Mexican law were to protect and permit the conversion of unlimited permits into annual ones, which we deny, the least that could be said is that such legislation is completely lacking in transparency, since none of its provisions specifies that licenses are limited in duration.[18]

The Claimant also argues that the replacement of the existing unlimited duration license, which in the past was given to state investors (municipal investors or investors from the

---

no reservations with regard to the landfill or operation thereof, nor had they expressed any intention that might affect the extent or duration of such operation": Memorial, pp. 47-48.

[15] Memorial, p. 53.

[16] Memorial, p. 103-104.

[17] Memorial, p. 112.

[18] Memorial, p. 122.

State of Sonora) by a limited duration license when it was granted to Cytrar constituted a violation of the fair and equitable treatment guarantee set forth in Article 4(5) of the Agreement.[19]

Finally, the Claimant summarizes its claims as follows:

> A declaration is sought from the Arbitral Tribunal regarding the breach committed by the United Mexican States as a result of the actions and decisions stated in this memorial, both as regards the breach itself and in connection with acts in preparation of such breach…[20]

After listing the main breaches of the Agreement alleged by the Claimant against the Respondent, which include "the substantial change in the conditions governing the operation of the landfill…" as a result of the replacement of the authorization existing at the time of making the investment and "…particularly due to the conversion of an unlimited duration permit into an annual or annually renewable one",[21] the Claimant summarizes its claims as follows:

> Such acts prepare and constitute an express, serious and blatant breach of the duty to protect foreign investments, declared in Article II of the ARPPI and of the duty to offer fair and equitable treatment to foreign investors, pursuant to Article IV of the Agreement; non-renewal is a measure having equivalent effects to the type of expropriation provided for in Article V of the ARPPI, carried out for political reasons and interests contrary to the public interest and without appropriate compensation.[22]

59. In its closing statement, the Claimant gives additional details of its requests and claims. Regarding the replacement of the unlimited duration license to operate the Landfill by a one-year license, and in view of the Respondent's statement that the Claimant's claims also seek to hold the Respondent liable for such replacement, the Claimant states as follows:

> This is absolutely false. Suffice it to look at the request for relief in the claim, which contains the Claimant's claims, to understand that the only declaration of breach sought from the Arbitral Tribunal relates to the refusal to renew the license for the operation of the CYTRAR Landfill.
>
> Certainly, the Claimant has provided an account, and informed the Tribunal, of other facts occurring prior to November 25, 1998, because they are relevant and clearly illustrate the attitude and conduct of the Mexican authorities, but the Claimant has not requested a declaration of breach or liability in respect of only one of them.[23]

The Claimant then adds:

> In sum, we hold that the act in connection with which an award is requested in this arbitration is the refusal to renew the permit with respect to the Landfill of Cytrar, aside from the fact that the Tribunal needs to know and assess the meaning of previous acts and measures of the Mexican authorities.

[22] Memorial, pp. 139-140.
[23] Claimant's closing statement, p. 93.

This claim is fully and expressly supported by the provisions on retroactivity contained in the ARPPI between Spain and Mexico, and does not need to rely on any other conventions.[24]

The Claimant further states that:

We stress that the only violation of the ARPPI requested to be penalized by the Tribunal is the decision not to renew the license, which caused the damage sustained by TECMED […] However, this does not prevent, but rather determines, that the Arbitral Tribunal should examine and assess the preceding and even subsequent acts of the Mexican authorities.[25]

60. The Arbitral Tribunal sees a certain fluctuation in the Claimant's position as to whether the Respondent's conduct prior to December 18, 1996, can be taken into account in order to determine whether the Respondent has violated the Agreement. In any case, the Arbitral Tribunal concludes that the Claimant does not include in its claims submitted to this Tribunal acts or omissions of the Respondent prior to such date which, considered *in isolation*, could be deemed to be in violation of the Agreement prior to such date.

61. A more difficult issue is whether such acts or omissions, combined with acts or conduct of the Respondent after December 18, 1996, constitute a violation of the Agreement after that date.

62. The Claimant's considerations, particularly detailed in its memorial and transcribed in paragraph 58 above, show that the Claimant, in order to determine whether there has been a violation of the Agreement, holds that the investment and the Respondent's conduct are to be considered as a process and not as an unrelated sequence of isolated events. This position of the Claimant would have two consequences. The first one is that the Respondent, prior to December 18, 1996, and through the conduct of different agencies or entities in the state structure, gradually but increasingly appears to have weakened the rights and legal position of the Claimant as an investor. Such conduct would appear to have continued after the entry into force of the Agreement, and would have resulted in the refusal to extend the authorization on November 25, 1998, which would have caused the concrete damage suffered by the Claimant as a result of such conduct. The common thread weaving together each act or omission into a single conduct attributable to the Respondent is not a subjective element or intent, but a converging action towards the same result, i.e. depriving the investor of its investment, thereby violating the Agreement. The second consequence is that, before getting to know the final result of such conduct, this conduct could not be fully recognized as a violation or detriment for the purpose of a claim under the Agreement,[26] all the more so if, at the time a substantial part of such conduct occurred, the provisions of the Agreement could not be relied upon before an international arbitration tribunal because the Agreement was not yet in force.

---

[24] Claimant's closing statement, p. 97.

[25] Claimant´s closing statement, p. 98.

[26] Whether it be conduct that continues in time, or a complex act whose constituting elements are in a time period with different durations, it is only by observation as a whole or as a unit that it is possible to see to what extent a violation of a treaty or of international law rises or to what extent damage is caused: J. Crawford, *The International Law Commission's Articles on State Responsibility* (Cambridge University Press, 2002), pp. 136-137; 143.

63. Clearly, the basic principle in international law is that unless there is a different interpretation of the treaty or unless otherwise established in its provisions, such provisions are not binding in connection with an act or event which took place or a situation that ceased to exist before the date of its entry into force.[27] The burden of proving the existence of any exception to the principle of non-retroactive application established therein naturally lies with the party making the claim.

64. Although the Agreement applies to investments existing as of the date of its entry into force —which suggests as a logical conclusion that the situations surrounding investments existing at the time do not escape its provisions—, the way the provisions on which the Claimant relies are drafted suggests that application thereof is forward-looking. Thus, for example,[28] Article 3(1) of the Agreement:

Each Contracting Party *shall offer* full protection and security…[…] and *shall not hinder*[29] […] the management, maintenance, development, use, enjoyment, expansion, sale or, as the case may be, the liquidation of such investments.

The same can be said about Article 3(2) of the Agreement:

Each Contracting Party, within the framework of its own legislation, *shall grant*[30] any authorizations needed in connection with the investments…

Or about Article 4(1) and (2) with regard to fair and equitable treatment:

Each Contracting Party *shall guarantee*[31] fair and equitable treatment in its territory pursuant to international law for investments made by investors from another Contracting Party […]. Such treatment *shall not be* less favorable than that afforded in similar circumstances by each Contracting Party to investments made in its territory by investors from a third party state.

The same is found in Article 4(5) in connection with national treatment:

…each Contracting party *shall offer*[32] to investors from the other Contracting Party treatment no less favorable than that afforded to its own investors.

Or in Article 5(1) in connection with nationalization or expropriation:

Nationalization, expropriation or any other measure of similar effects […] *which may be adopted*[33] by the authorities of a Contracting Party against investments in its territory made by investors from the other Contracting Party…

[32] Emphasis added by the Arbitral Tribunal.
[33] Emphasis added by the Arbitral Tribunal.

65. The continuous use of the future tense, which connotes the undertaking of an obligation linked to a time period, rules out any interpretation to the effect that the provisions of the Agreement, even in relation to investments existing as of the time of its entry into force, apply retroactively.[34]

66. However, it should not necessarily follow from this that events or conduct prior to the entry into force of the Agreement are not relevant for the purpose of determining whether the Respondent violated the Agreement through conduct which took place or reached its consummation point *after* its entry into force. For this purpose, it will still be necessary to identify conduct —acts or omissions— of the Respondent after the entry into force of the Agreement constituting a violation thereof.

…events or conduct prior to the entry into force of an obligation for the respondent State may be relevant in determining whether the State has subsequently committed a breach of the obligation. But it must still be possible to point to conduct of the State after that date which is itself a breach.[35]

In broader terms, Article 28 of the Vienna Convention reads as follows on this matter:

If, however, an act or fact or situation which took place or arose prior to the entry into force of a treaty continues to occur or exist after the treaty has come into force, it will be caught by the provisions of the treaty.(United Nations Conference on The Law of Treaties, First and Second Sessions, Official Records (Documents of the Conference, Draft Articles on the Law of Treaties with Commentaries, as adopted by the International Law Commission at its Eighteenth Session), pag. 32, (3) (United Nations publication, Sales No.:E.70V.5, A/CONF.39/11/Add.2))

67. In view of the above precedents and of the Claimant's specific requests, the Arbitral Tribunal will not consider any possible violations of the Agreement prior to its entry into force on December 18, 1996, as a result of isolated acts or omissions that took place previously or of conduct by the Respondent considered in whole as an isolated unit and that went by before such date. In order to reach such conclusion, a relevant fact is that Cytrar, Tecmed and the Claimant did not choose to make any claim in connection with conduct occurring prior to December 18, 1996, not even through a note addressed to the relevant Mexican authorities stating their objections to the measures or resolutions adopted,[36] although they were not under any violence or pressure at the time preventing them from doing so.

---

[34] Decision on Jurisdiction in *Tradex Hellas S.A. v. Republic of Albania*, December 24, 1996, ICSID case No.Arb/94/2, p. 191, http:www.worldbank.org/icsid/cases/tradex_decision.pdf.

[35] Award in *Mondev International Ltd. v. United States of America* (ICSID Case No. ARB(AF)/99/2), 70, p. 23, www.naftalaw.org.

[36] For instance, the Claimant chose not to make any claim in connection with the replacement of its operating permits in order not to damage its relationship with the Mexican authorities: see transcript of the Claimant's statements in paragraph 58. As pointed out by the arbitral tribunal in the case Kuwait and the American Independent Oil Company (Aminoil), 21 I.L.M. p. 976 et seq. (1982), 44, p. 1008: "In truth, the Company made a choice; disagreeable as certain demands might be, it considered that it was better to accede to them because it was still possible to live with them. The whole conduct of the Company shows that the pressure it was under was not of a kind to inhibit its freedom of choice. The absence of protest during the years following […], confirms the non-existence, or else the abandonment, of this ground of complaint." See also I. Brownlie, *Principles of International Law* (5th Ed., Oxford University Press, 1998), p. 642-644.

68. On the other hand, conduct, acts or omissions of the Respondent which, though they happened before the entry into force, may be considered a constituting part, concurrent factor or aggravating or mitigating element of conduct or acts or omissions of the Respondent which took place after such date do fall within the scope of this Arbitral Tribunal's jurisdiction. This is so, provided such conduct or acts, upon consummation or completion of their consummation after the entry into force of the Agreement constitute a breach of the Agreement, and particularly if the conduct, acts or omissions prior to December 18, 1996, could not reasonably have been fully assessed by the Claimant in their significance and effects when they took place, either because as the Agreement was not in force they could not be considered within the framework of a possible claim under its provisions or because it was not possible to assess them within the general context of conduct attributable to the Respondent in connection with the investment, the key point of which led to violations of the Agreement following its entry into force.

69. The Arbitral Tribunal is aware that the Claimant, relying on the decision in the case *Emilio Agustín Mafezzini v. Kingdom of Spain,*[37] refers in its closing statement to the most favored nation treatment provided for in Article 8(1) of the Agreement in order to enable retroactive application in view of the more favorable treatment in connection with that matter which would be afforded to an Austrian investor under the bilateral treaty on investment protection between the United Mexican States and Austria of June 29, 1998. The Arbitral Tribunal will not examine the provisions of such Treaty in detail in light of such principle, because it deems that matters relating to the application over time of the Agreement, which involve more the time dimension of application of its substantive provisions rather than matters of procedure or jurisdiction, due to their significance and importance, go to the core of matters that must be deemed to be specifically negotiated by the Contracting Parties. These are determining factors for their acceptance of the Agreement, as they are directly linked to the identification of the substantive protection regime applicable to the foreign investor and, particularly, to the general (national or international) legal context within which such regime operates, as well as to the access of the foreign investor to the substantive provisions of such regime. Their application cannot therefore be impaired by the principle contained in the most favored nation clause.[38]

70. In assessing the Respondent's conduct, for the purpose of and with the scope provided for in paragraph 68 above, the Arbitral Tribunal shall take into account the principle of good faith, both as the general expression of a principle of international law embodied in Article 26 of the Vienna Convention and in its particular manifestation embodied in Article 18 of such Convention[39] with respect to the Respondent's conduct between June 23, 1995

---

[37] ICSID Case No. ARB/97/7, decision on jurisdiction of January 25, 1999, http://www.worldbank.org/icsid/cases/awards.htm.

[38] *Ibid*., *Maffezini case*, Decision on jurisdiction, p. 25-26, 62-63.

[39] Regarding the importance of the principle of good faith within the framework of the law of treaties, including the period between signing and ratification, see R. Kolb, *La bonne foi en droit international public*, Presses Universitaires de France, 179-207 (2000). Article 18 of the Vienna Convention arises out of a general rule of international law based on good faith, which it expresses; it is therefore independent, and does not constitute an exception to the principle of non-retroactive application of treaties: I. Sinclair, *The Vienna Convention on the Law of Treaties*, p. 99, Manchester University Press (2nd Edition, 1984).

—the date on which the Agreement was signed by the Contracting Parties— and the date of its entry into force mentioned above,[40] in that such Article provides that:

A State shall refrain from acts that defeat[41] the object and purpose of a treaty when:

a) it has signed the treaty or has exchanged instruments constituting the treaty subject to ratification, acceptance or approval, until it shall have made its intention clear not to become a party to the treaty…

71. Writings of publicists point out that Article 18 of the Vienna Convention does not only refer to the intentional acts of States but also to conduct which falls within its provisions,[42] which need not be intentional or manifestly damaging or fraudulent to go against the principle of good faith, but merely negligent or in disregard of the provisions of a treaty or of its underlying principles, or contradictory or unreasonable in light of such provisions or principles. It should be noted that the principle inspiring such article has been applied in order to settle, through international arbitration, disputes between States and individuals which, in order to be decided, required a pronouncement on obligations of the former vis-à-vis the latter based on the law of treaties. The Mixed Greek-Turkish Arbitral Tribunal, in the case *A.A. Megalidis v. Turkey,*[43] stated:

qu´il est de principe que déjà avec la signature d´un Traité et avant sa mise en vigueur, il existe pour les parties contractantes une obligation de ne rien faire qui puisse nuire au Traité en diminuant la portée de ses clauses.

Qu´il est intéressant de faire observer que ce principe –lequel en somme n´est qu'une manifestation de la bonne foi qui est la base de toute loi et de toute convention- a reçu un certain nombre d´applications…[44]

II. Timely submission by the Claimant of its Claims against the Respondent

72. In Chapter III of its counter-memorial, in a general section entitled "C. Objections regarding Jurisdiction", the Respondent introduces defenses based on the Claimant's claims allegedly not satisfying the requirements of Title II(4) and Title II(5) of the Appendix to the Agreement, for which reason this Arbitral Tribunal would be prevented from dealing with such claims.

Title II(4) of the Appendix to the Agreement provides the following:

An investor from a Contracting Party may, either on its own behalf or representing a company owned by it or under its direct or indirect control, refer to arbitration a claim on the grounds that the other Contracting Party

[40] See comment at the International Law Commission (United Nations Conference on the Law of Treaties, Official Records, Documents of the Conference, United Nations Publication A/CONF.39/11/Add.2), p. 22.
[41] It should be noted that the English version of this provision uses the expression *"defeat the object"*, which is not strictly equivalent to the notion of "frustrate" in English or "frustrar" in Spanish.
[42] A. Remiro Brotóns, *Derecho Internacional Público*. 2 Derecho de los Tratados (Tecnos, Madrid, 1987), p. 246.
[43] Annual Digest of Public International Law Cases (1927-1928) [A. Mc Nair & H. Lauterpacht Editors], Vol. 4 (1931), 272, p. 395.
[44] Lord McNair, *The Law of Treaties* (Clarendon Press, Oxford, 1961), p. 202.

has violated an obligation under this Agreement, as long as the investor or its investment have suffered a loss or damage by reason or as a consequence of the breach.

Title II(5) of the Appendix to the Agreement provides the following:

The investor may not submit a claim under this Agreement if more than three years have elapsed since the date on which the investor had or should have had notice of the alleged violation, as well as of the loss or damage sustained.

73. In the opinion of the Arbitral Tribunal, the defenses filed by the Respondent, relying on Title II(4) and (5) of the Appendix to the Agreement, do not relate to the jurisdiction of the Arbitral Tribunal but rather to (non)compliance with certain requirements of the Agreement governing the admissibility of the foreign investor's claims. The Arbitral Tribunal notes that to the extent such defenses have been filed with respect to claims referring to conduct or acts or omissions of the Respondent which are excluded from the Arbitral Tribunal's jurisdiction or from the substantive scope of application of the Agreement pursuant to the decision contained in paragraphs 67 and 68 of this award, any determination as to whether such claims fulfill the requirements of Title II(4) and (5) of the Appendix to the Agreement would be superfluous.

74. When it comes to the Claimant's claims falling within the scope of this arbitration and of the provisions of the Agreement, the Arbitral Tribunal will decide if the admissibility requirements set forth in Title II(4) and (5) of the Appendix to the Agreement have been complied with or not with respect to the acts on which such claims are based, together with the remaining considerations or matters to be taken into account by the Arbitral Tribunal in deciding on the merits of the allegations of the Parties in this award. If the acts under review are deemed by the Arbitral Tribunal to be a part of more general, and not merely isolated conduct, the Arbitral Tribunal reserves the power to consider that the time when it will assess whether such acts have caused losses or damage for the purposes of Title II(4) of the Appendix to the Agreement, or whether they were deemed by the Claimant to be a breach of the Agreement or damaging within the three-year term provided for in Title II(5), will not be earlier than the point of consummation of the conduct encompassing and giving an overarching sense to such acts. In any case, and within the general framework of considerations already made when deciding whether the provisions of the Agreement are to be applied retroactively or not, the Arbitral Tribunal is of the view that Title II(4) and (5) of the Appendix to the Agreement contains requirements relating to the substantive admissibility of claims by the foreign investor, i.e. its access to the substantive protection regime contemplated under the Agreement. Consequently, such requirements are necessarily a part of the essential core of negotiations of the Contracting Parties; it should therefore be presumed that they would not have entered into the Agreement in the absence of such provisions. Such provisions, in the opinion of the Arbitral Tribunal, therefore fall outside the scope of the most favored nation clause contained in Article 8(1) of the Agreement.

III. The Scope of the Purchase Transaction

75. The Claimant alleges, mainly on the basis of documents signed with Promotora in the process of award and transfer of the assets under which it operated the landfill of hazardous waste physically located in Las Víboras, Municipality of Hermosillo, State of Sonora, that what the Claimant acquired through that process was actually a pool of personal and real property and intangibles, the latter consisting of permits issued by municipal and federal authorities of the Respondent which enabled and empowered the Claimant to operate the Las Víboras site as a hazardous waste landfill. According to the Claimant, out of the total price of $34,047,988.26 (Mexican Pesos) paid to Promotora for the acquisition of the assets relating to the landfill, the most substantial part, $24,047,988.26 (Mexican Pesos), was paid by the Claimant in kind —by closing down an existing landfill for urban waste and constructing and advising in respect of the operation of a new landfill for the same purpose— in exchange for the permits and authorizations to operate the Las Víboras site as a landfill for hazardous waste.[45] Both the landfill that was closed down as well as the new one currently in operation are located in land owned by the Municipality of Hermosillo, under the jurisdiction of that Municipality and this location is other than the site for landfill of hazardous waste at Las Víboras, acquired by the Claimant as a result of the public bidding.[46]

76. The Respondent, on the other hand, argues that Promotora only tendered and sold to the Claimant a pool of personal and real property "relating to the Industrial Park" of the city of Hermosillo, which did not include permits or licenses to operate the landfill.[47] According to the Respondent, the public bidding and award of assets relating to the landfill at the Las Víboras site to Tecmed and Cytrar also included acquisition by another company of the Tecmed group of a concession for a landfill —a municipal dump also situated in the Municipality of Hermosillo—, for which Cytrar allegedly paid the above-mentioned amount of $ 24,047,988.26 (Mexican Pesos). The Respondent specifically argues the following:

Tecmed (Mexico) acquired two things in the tender of February 1996. A pool of personal and real property relating to the landfill of hazardous waste, which consisted of a piece of land, existing constructions and machinery and equipment clearly described in the supporting documents of the transaction. It paid 10 million pesos in cash for them, as reflected in the financial statements submitted in these proceedings.

Secondly, it acquired the concession of a landfill, the municipal dump, for which it offered 24 million pesos, a concession which it still holds and continues to operate. What Dr. Calvo Corbella said a moment ago is true, not in respect of Cytrar but in respect of the company [sic], as confirmed by engineer Polanco, who attended the Tecmed (Mexico) tender. This was also confirmed by engineer Diez-Canedo, in reply to a question I expressly made when I asked him if, in addition to the amount of ten million pesos, he had offered a non-monetary contribution consisting of the construction and comprising the general facilities and the first phase of operations. Engineer Díaz Canedo answered that that was true.[48]

[45] Memorial, pp. 20-40. Claimant's closing statement, pp. 10-30.
[46] Declaration of Javier Polanco Gómez Lavin, Hearing of May 20-24, 2002; transcription of May 20, 2002, pp. 31 overleaf/33.
[47] Counter-memorial, pp. 24-31; Nº 90 *et seq.*
[48] Oral statement by the Claimant at the Hearing of May 20, 2002, transcript of May 24, 2002, pp. 27-28.

In sum, the Respondent not only holds that that amount, or contribution in kind valued at such amount, was not paid or made in exchange for intangible assets (the permits, authorizations or licenses to which Claimant refers), but also that it was not even a part of the price paid for assets relating to the landfill in Las Víboras. According to the Respondent, such amount or contribution was paid or made in exchange for the concession to operate the urban waste landfill of Hermosillo.

77. Based on the allegations of the Parties and of the facts presented before this Arbitral Tribunal, it is to be concluded that the award, the public bidding and sales transaction of assets relating to the Las Víboras landfill and the rights and obligations for each of the parties to such transaction and resulting therefrom were embodied in different instruments requiring joint consideration in order to determine the scope of the operation and its effects.

78. The award by Promotora of assets relating to the Las Víboras landfill to Tecmed as a result of the tender of such assets by Promotora was followed by the signing of a "promise to sell" contract dated February 20, 1996, entered into between Promotora and Tecmed, the fourth clause of which provides that at the time of executing the notarial deed of conveyance, the assets conveyed would include copies of permits, licenses and authorizations relating to the assets specified in the agreement.[49] In item or representation No. IIII of such instrument, it is stated that the Board of Directors of Promotora unanimously approved the following proposal:

> Price offer for the purchase of Cytrar, alternative number two, consisting of 10 million pesos plus a non-monetary contribution to the Municipality of Hermosillo in the form of a project for the construction of and advice in connection with the operation of the new landfill in accordance with the attached project which comprises the general facilities and their first phase of operation, including the closedown of the current landfill, services valued at $ 24,155,185.00 (Mexican Pesos). Total offer: $34,155,185 (Mexican Pesos).

The second clause of the document stipulates that part of the price - $ 10,000,000 (Mexican Pesos)- would be paid in cash, part upon signing the promise to sell and part upon signing the notarized deed of conveyance of the tendered real property, with the balance, amounting to $24,155,185.00 (Mexican Pesos), to be paid in kind, by providing the service of closing down the existing landfill and constructing and providing advice in connection with the operation of a new one as mentioned above and referred to in item or representation number III of the "promise to sell" contract. As regards payment in kind of that part of the price, the second clause of the promise to sell expressly states as follows:

> The difference relates to the cost of constructing a new landfill and closing down the existing one, in accordance with the approved proposal, which would be at the time of completing the construction of the new landfill to the satisfaction of Promotora Inmobiliaria of the Municipality of Hermosillo based on the construction project submitted by the buyer, upon which time the reservation of ownership would end; in the case of sale of the personal property located in the "landfill", it will be billed by seller to buyer upon formalization of the final transaction, such formalities being the responsibility of Promotora Inmobiliaria of the Municipality of Hermosillo.

In turn, the fifth clause of the "promise to sell" contract provides the following:

[49] Document A23.

The parties specify that as from now the use to be given to the hazardous waste landfill shall be precisely that, failing which the property will revert back to the seller, in which case the buyer shall automatically forfeit any advances or payments made, unless the buyer "Tecmed, Técnicas Medioambientales de México S.A. de C.V." fails to obtain the government permits and licenses required for lawful operation, in which case it may change the mode of operation by using the existing original license for operation of the landfill by "Tecmed, Técnicas Medioambientales de México S.A. de C.V.".

79. In addition to the above, on the same date, Promotora, Tecmed and Cytrar entered into an agreement "to determine the method and terms of payment of the consideration arising out of the 'promise to sell' contract with reservation of ownership, dated February 20, 1996".[50] Under such agreement, the total price to be paid by Cytrar amounted to $ 24,047,988.26 (Mexican Pesos), broken down as follows: $6,277,409.50 (Mexican Pesos) for land and constructions; $237,034.00 (Mexican Pesos) for machinery and equipment; $24,047,988.26 (Mexican Pesos) for intangibles. The agreement sets forth that Promotora shall issue an invoice covering the intangibles and that Cytrar shall issue invoices for the part of the price payable through the construction of the new landfill and closedown of the Hermosillo municipal dump, such invoices to be issued upon completion of the works. Clauses three and four of the agreement specifically provide the following:

Third: Promotora Inmobiliaria of the Municipality of Hermosillo OPD further undertakes to issue an invoice for the intangibles upon full compliance by Cytrar S.A. de C.V. of the obligation set forth in clause two of the above-mentioned agreement of February 20, 1996. The invoice value will be $24,047,988.26 (Mexican Pesos) plus $ 3,607,198.24 (Mexican Pesos) VAT, totaling $ 27,655,186.50 (Mexican Pesos).

Fourth: Cytrar S.A. de C.V. agrees to the terms of the preceding clauses and in turn undertakes to issue invoices for the part it will pay with the construction and delivery of the new landfill of the Municipality of Hermosillo and the closedown of the current municipal dump. Such invoices will be issued upon formal delivery of the works.

80. Finally, pursuant to the award conditions, through a notarial deed of March 27, 1996,[51] Cytrar acquired from Promotora the real property, constructions and personal property relating to the landfill. Item or representation number 1 of the deed specifies that the seller (Promotora). "..tendered various assets held by it, in particular the 'hazardous waste landfill situated at the Las Víboras' site in the Hermosillo Industrial Park." In item or representation II of such deed, reference is made to the meeting of the Board of Directors of Promotora, which unanimously approved the proposal submitted by Tecmed on the following terms:

"Price Offer for Acquisition of Cytrar", alternative number two, consisting of $10,000,000 (ten million pesos), plus a non-monetary contribution to the Municipality of Hermosillo, approval recorded in minutes, stating that it was unanimous, and including the closedown of the current landfill, the project and the construction of the first phase of the new landfill, pursuant to the resolutions approving performance, issued by the Board of Directors…"

The requirements for approval by the Board of Directors of Promotora include, as point c) of item or representation II the following:

---

[50] Document A24.

[51] Document A25.

Identifying the responsibility of each party and the timing for obtaining operating licenses.

The second clause of the deed states a cash amount of $ 10,000,000 (Mexican Pesos) as the price, which is broken down into different amounts paid for the constructions already existing, personal property and land. Such clause also provides that:

… regardless of the price fixed, the PURCHASER undertakes to perform non-monetary obligations consisting of the project and construction of the first phase of the new landfill and closedown of the existing one, to the satisfaction of "Promotora Inmobiliaria of the Municipality of Hermosillo", in accordance with the approved proposal.

The fourth clause of the deed provides that the reservation of ownership subject to which the sale is made will be lifted

…upon completion of the construction works for the new landfill and the closing down of the existing one, to the entire satisfaction of "Promotora Inmobiliaria of the Municipality of Hermosillo", in accordance with the approved proposal.

Clause 5a) of the deed provides that the transferee (Cytrar) must undertake to perform its obligations under the public bidding in full, including the following obligations:

Specification that the acquired assets will be used solely as a landfill for hazardous waste, failing which they shall revert back to Promotora Inmobiliaria of the Municipality of Hermosillo, and any payments made will be forfeited, if the buyer "Cytrar" S.A. de C.V. should fail to obtain the government permits and licenses required for lawful operation; in such case, the mode of operation may be changed by using the existing original license for operation of the landfill by "Cytrar" S.A. de C.V.

Clause 5d) also provides that:

The steps required to be taken in order to obtain the government permits and licenses necessary for operation of the hazardous waste landfill shall be the sole responsibility of the transferee, Promotora Inmobiliaria of the Municipality of Hermosillo hereby being released from any liability with regard to the official authorizations required to be requested from the Municipality of Hermosillo. Promotora Inmobiliaria will lend its support to secure approval.

81. In a rectifying notarial deed of December 16, 1996,[52] Promotora and Cytrar corrected the amount of the part of the price relating to the acquisition of the real property as described in the original deed of conveyance of March 27, 1996, which was thus rectified and fixed at $ 6,132,530 (Mexican Pesos), but the prices for the other items were not rectified. The deed also specified that real property and intangibles would be invoiced separately as follows:

As specified in the agreement signed between the parties on March 20, 1996, which fixes the terms and conditions under which the transaction will be settled, an involuntary error led to a mistaken and insufficient breakdown of values and calculation of Value Added Tax, AS THE TECHNICAL DESCRIPTION[53] of such assets WAS NOT TAKEN INTO ACCOUNT, i.e. the necessary topographic survey and description of

[52] Document A26.
[53] Emphasis in the original.

constructions and intangibles, since it was agreed that personal property and intangibles would be invoiced separately.

82. In a service contract of March 28, 1996,[54] between Promotora and Cytrar, in consideration of Cytrar's provision of "environmental advice services to the Municipality of Hermosillo" (clause 6), Promotora undertook, among other things (clause 2 d), to:

Keep in force any federal, state and municipal licenses and other permits required for operation of the landfill.

83. After the contribution in kind provided for as part of the purchase price of the assets relating to the landfill having been made, and apparently pursuant to the procedure set forth in the second clause of the "promise to buy" contract of February 20, 1996, the third and fourth clauses of the agreement regarding the method and terms of payment on the same date and the rectifying notarially-recorded deed of December 16, 1996, Promotora issued on July 24, 1997, Invoice No. 304 to Cytrar[55] for the amount of $24,047,988.26 (Mexican Pesos) plus the applicable value added tax (VAT). The invoice comprises:

An authorization granted by the National Ecology Institute for the operation of a controlled landfill, through the collection, transport, treatment, temporary storage, and disposal of hazardous waste; the authorization also includes an authorization for soil use on the part of the Municipality of Hermosillo.

84. The different provisions laid down above and included in several documents signed by Promotora and Tecmed or Cytrar to record their mutual rights and obligations in connection with the sale and operation of the Las Víboras landfill show that performance of the works and services that were the responsibility of Cytrar relating to the landfill of urban waste, valued at $ 24,047,988.26 (Mexican Pesos), was a payment in kind that was part of the consideration to be furnished by Cytrar for the award and sale to it of different assets for Cytrar to operate the hazardous waste landfill at Las Víboras; in other words, it was part of the price for which the assets of the Las Víboras landfill were awarded and sold to Tecmed and ultimately to Cytrar. So much so that the reservation of ownership to which such sale was subject would only terminate when such consideration had been furnished in full.[56] The audited financial statements of Cytrar as of December 31, 1997 enclosed with the expert witness report of American Appraisal[57] offered by the Claimant, particularly note 6, leads to the same conclusion; no evidence to the contrary has been provided based on the accounting books of Promotora or on statements of its management that took part in the sale of assets relating to the hazardous waste landfill of Las Víboras, nor evidence of any judicial challenges, for fiscal or any other reasons, with respect to the part of the sales price paid in kind, or the value or amount thereof, or the public tender offer proposed by Tecmed on the basis of such price, or its division into a cash component and a component in kind, nor denying that such payment in kind is all part of the price payable for assets relating to the Las Víboras landfill. The expert witness proposed by the Respondent does not state otherwise in his reports, when he says that "The urban waste landfill was an operation arising out of the payment in kind to be made by Tecmed for the acquisition of Cytrar".[58]

[54] Document A33.
[55] Document A31
[56] Deed of purchase and sale of March 27, 1996, fourth clause (Document A25).
[57] Document A117.
[58] Report by Fausto García y Asociados, p. 26.

85. It is the view of the Arbitral Tribunal that the minutes of the board meeting of Promotora of March 15, 1996,[59] which reflect Promotora's decision to approve the offer made by Tecmed, clearly establish, in accordance with alternative 2 of the Tecmed acquisition offer,[60] that the contribution in kind, valued at $ 24,155,185.00 (Mexican Pesos), which was to take place through the performance of different works and services relating to the municipal dump of Hermosillo for urban waste, was part of the price paid for the assets of the Las Víboras landfill, concerned with hazardous waste, as can be read on the second page of the minutes:

> In item two, RODOLFO SALAZAR PLATT (an engineer) reads out the resolution adopted at the preceding meeting which reads (verbatim): After these reviews, the Board declares the following proposal to be unanimously approved: "Price offer for the acquisition of CYTRAR, alternative 2 (two), consisting of $10,000,000.00 (TEN MILLION MEXICAN PESOS) and a non-monetary contribution to the Municipality of Hermosillo in the form of a construction project and provision of advice to the operation of the new landfill in accordance with the enclosed project, which comprises the general installations and the first phase of operation. It includes the closing of the current landfill, work valued at $24,155,185.00 (Mexican Pesos) [….] Total value of offer is $34,155,185.00 (Mexican Pesos) [….], the opinion of the full Board being that it is the most convenient offer from the economic and technical point of view and that it is beneficial for all the community of Hermosillo.

86. There is no doubt that payment of the sales price was to be made by the purchaser of the tendered assets,[61] regardless of the individual or corporation holding or being the beneficiary of the concession for the operation of the Hermosillo urban waste landfill, and that such obligation was vested in Cytrar.[62] The approval of the tender by Promotora's management board already contemplated the acquisition by Cytrar of the Las Víboras landfill assets awarded to Tecmed, and further that Cytrar should become "..a joint and several obligee with respect to the rights and obligations acquired by the successful awardee…",[63] without excluding from such obligations the ones relating to the furnishing of the consideration in kind, referred to above. The declaration of Mr. Javier Polanco Gómez Lavín —which has not been challenged or refuted in this regard by any other evidence produced in this arbitration— confirms the above.[64]

87. Having been concluded that the consideration in kind to be furnished by the purchaser of the assets relating to the hazardous waste landfill of Las Víboras in connection with the urban waste landfill of the Municipality of Hermosillo is part of the purchase price of such assets, it remains to be determined to what extent all or part of such consideration is allocable to the acquisition of the intangible assets referred to by the Claimant.

88. A rational and logical interpretation of the documentation presented by the Parties shows that what Promotora, on the one hand, and Tecmed and Cytrar, on the other, had in

---

[60] Document A17

[61] Page 5, notarial deed of conveyance, document A25.

[62] Second clause of the "promise-to-buy" contract (document A23); third clause of the Agreement (document A24).

[63] Document A21, p. 4

[64] Declaration of Javier Polanco Gómez Lavín, transcript of the Hearing for the Production of Evidence of May 20-24, 2002, section on May 20, 2002, pp. 31-33.

mind when entering into the agreement (from the standpoint of the latter, also when contemplating an investment in Mexico and in the Las Víboras landfill), was not simply the transfer of certain personal and real property but also to create the means for Cytrar to be able to operate the Las Víboras site as a hazardous waste landfill —i.e. to accomplish a public use purpose fully consistent with the activity that this landfill had been serving since its beginning in 1988— and to continue the same activity. Such were necessarily the legitimate expectations of Cytrar and of the Claimant, not only because the site and facilities being acquired as well as the commitments in terms of use and operation undertaken upon doing so, were to serve the normal purpose of operations of Tecmed and Cytrar, but also because the documentation of the tender whereby Tecmed was awarded the landfill assets, and the subsequent documentation signed with Promotora, highlighted that this was the only possible use for the assets being acquired, to such an extent that they would revert to Promotora if Cytrar failed to use them for the exclusive public use purpose for which such assets had been earmarked long before. This was, certainly, the expectation of Promotora and of the Municipality of Hermosillo, which controlled it, as they were both certainly interested in ensuring that the assets of the Las Víboras landfill continued being allocated to the hazardous waste landfill in view of their having been set aside for the protection of the environment and public health, as evidenced by the conditions of the tender of the assets of the landfill[65] and the terms and conditions of the documents whereby the sale was executed.[66] For example, paragraph eleven of the tender specifications required (and this requirement was fulfilled) that the notarial deed of conveyance include a clause whereby the purchaser agreed to include as an advisor, appointed by the Municipality of Hermosillo, with a voice but no vote, on an "indefinite and irrevocable" basis, in addition to ensuring that the landfill would be operated in accordance with the highest national and international standards. The Respondent points out[67] that this clause evidences

> the interest and powers of the Municipality, as a government agency formed by representatives elected by the people, by and for the purpose of supervising the proper operation of the landfill in accordance with the highest applicable national and international standards.

The appointment of the advisor was thus directly linked to the Municipality's interest in ensuring that the assets purchased should be treated as a unit for landfill of hazardous waste pursuant to the legal provisions, which was obviously not possible without the permits authorizing the operation.

89. Promotora could not, in good faith, impose such a drastic requirement or such a harsh sanction on Cytrar as the reversion to Promotora of the assets relating to the Las Víboras landfill if Cytrar was not authorized to use them in accordance with the agreed use, without assuming that access to the permits and licenses for the operation of the Las Víboras landfill in a manner consistent with their historical use was a fundamental part of the operation and of the expectations of Cytrar, Tecmed and, ultimately, the Claimant, and without assuming certain commitments to vest Cytrar with minimum rights that would prevent an outcome as adverse to such expectations and interests as the reversion of assets

[65] Document A16, paragraph 6.
[66] Document A25, notarial deed of March 27, 1996, fifth clause.
[67] Counter-memorial, pp. 24-25, 95.

and at the same time the loss of amounts paid in cash or consideration furnished until then as payment of the price. Neither could INE ignore that the real property and tangible personal property relating to the Las Víboras landfill —and the investment relating to the Las Víboras landfill— would be devoid of economic value if Cytrar did not obtain the permits, licenses or authorizations required for operation. The note of the Municipality of Hermosillo addressed to INE on March 28, 1996,[68] whereby the Municipality "most respectfully" requests the Institute

> to provide to TECMED Técnicas Medioambientales de México, S.A. de C.V., or to the company organized by it to operate the landfill, all necessary assistance to comply with the formalities for changing the name appearing in the operating license, which is currently Confinamiento Controlado Parque Industrial de Hermosillo[69]

not only confirms the above, but also evidences that no doubts were being cast as to the fact that the change of the license holder's name was considered to be the lawful, normal and logical procedure in order to ensure that Cytrar could operate the Las Víboras site in accordance with the purpose mandated to it under the tender, sale and transfer documents.

90. However, Promotora did not guarantee to Cytrar or to Tecmed that Cytrar would obtain from INE the outcome certainly desired by Cytrar and apparently –at least at that time- by Promotora and by the Municipality of Hermosillo, i.e. that Cytrar would secure an authorization to operate a hazardous waste landfill at Las Víboras, or, if granted, that such authorization would conform to certain expected requirements such as its duration. Promotora did not guarantee to Cytrar either that the transfer to the latter's name of the license given to Confinamiento Controlado Parque Industrial de Hermosillo O.P.D. would definitely take place. This does not, however, mean that Promotora was not willing to maintain the existing permits and licenses and their potential use by Cytrar in the event that that authorization or transfer did not materialize, as evidenced in clause 5 (a) of the contract of sale of March 27, 1996, between Promotora and Cytrar, mentioned above. Nor does it mean that Cytrar, through the transaction entered into with Promotora, only acquired real property and tangible personal property considered as such in isolation, i.e. unrelated to their historical and structural use and to the functional and economic dimension intimately associated to such use. As stated by Tecmed in its offer when it made it conditional to obtaining the authorizations for the use of such assets as a hazardous waste landfill,[70] neither Tecmed nor Cytrar would have acquired the assets without access to the authorizations and permits that would enable them to use them for a hazardous waste landfill. Accordingly, pursuant to clause five of the promise to sell contract signed with Tecmed on February 20, 1996, and clause 5 a) of the notarially recorded deed executed by Promotora, Tecmed and Cytrar on March 27, 1996 (transcribed above), Promotora consented to the potential use, in the case of the first document, by Tecmed, and in the second case, by Cytrar, of the existing licenses, authorizations or permits (mainly the authorization granted by INE on May 4, 1994, to Confinamiento Controlado Parque Industrial de Hermosillo O.P.D.) in the event of the failure of – as applicable – Cytrar or Tecmed to obtain the permits, licenses or authorizations required for the operation of the

[68] Document A41.
[69] Emphasis in the original.
[70] Document A17.

landfill. Under clause 2 d) of the service contract of March 28, 1996, Promotora also undertook to keep current the existing licenses and authorizations, including the federal ones, for the operation of the Las Víboras landfill until Cytrar could do so on its own. These provisions show beyond any doubt that access by Cytrar to the licenses, authorizations or permits enabling it to operate the landfill was a central part of the tender and acquisition of assets relating to the Las Víboras landfill and of the expectations of Tecmed and Cytrar when the decision was made to invest in the landfill.

91. The documentation produced evidences that such licenses, authorizations and permits, and the right to use them for the operation of the Las Víboras landfill were vested in Promotora as a result of the winding-up of Confinamiento Controlado.[71] Accordingly, and also in view of the precedent of such landfill having already been operated by an entity other than that authorized,[72] it is also inferred that Promotora could allow the operation of the Las Víboras landfill by third parties under such authorizations, licenses or permits (to the extent such third parties adapted their operation to the framework allowed thereunder), as well as the transfer to third parties of the real property and tangible personal property of the Las Víboras landfill. This is a logical conclusion not only from a functional point of view, because the personal and real property of such landfill cannot be put to use for the benefit of the public or to the advantage of the community in accordance with or pursuant to the function on the basis and in furtherance of which they are technically structured and organized as an autonomous unit, without the required authorizations, licenses or permits, but also from an economic or business point of view, as the value of the real property and tangible personal property of the landfill —which, in practical terms, have been invalidated for any use other than the landfill of hazardous waste— depends on the existence or subsistence of such authorizations, licenses and permits. Consequently, from the perspective of Promotora, the price of those assets is, at the time of sale, enhanced by the possibility of use under such authorizations or permits. It should therefore be concluded that the consideration in kind valued at $ 24,155,185.00 (Mexican Pesos) was paid as a lump sum in consideration of, on the one hand, Promotora's undertakings relating to the maintenance of the licenses, permits and authorizations and of their being made available to Cytrar for the operation, as a hazardous waste landfill, of the Las Víboras site and other assets allocated to it in the event of Cytrar not obtaining new authorizations or licenses,[73] or the transfer to Cytrar of existing ones; and on the other hand, in recognition of the higher value of the real property and tangible personal property acquired in anticipation of the expectation to use them under such authorizations, permits and licenses and, consequently, as part of the purchase price of such personal and real property, as such value was not just

[71] Administrative record of the winding-up of Confinamiento Controlado Parque Industrial de Hermosillo O.P.D. of August 31, 1995, Point IV, Annex No. 15 (Document A13); donation contract between the Government of the State of Sonora and Promotora, evidencing transfer to Promotora of the personal property listed in the record, which in Point IV, Annex 15, includes a list of permits for operation of the Las Víboras landfill, including the authorization granted by INE on May 4, 1994 (Document A14, introductory paragraphs III and IV; third clause).

[72] See paragraph 36 of this award.

[73] Regardless of the way in which this commitment on the part of Promotora should be complied with, even if compliance was as suggested by the Respondent: Cytrar being hired by Promotora –the latter, as holder of the authorizations, licenses and permits for the operation of the Las Víboras landfill- for Cytrar to operate it under them ("Admissions and Denials", pleading filed by the Respondent, p. 25).

their inherent value but also the value resulting from the possibility of being functionally applied to the storage and management of hazardous waste within the framework of a legally authorized landfill operation. From this perspective, payment of a higher price is justified by the expectation of Tecmed and Cytrar —highlighted by the expert witness appointed by the Respondent— at the time of the tender and sale of the assets relating to the Las Víboras landfill and of their acquisition by such companies, to use it "with an "unlimited duration" license".[74] It has also been established that the part in kind of the purchase price for the landfill was fully paid by its purchaser, Cytrar.

92. Upon replacement of the first official letter of INE dated September 24, 1996, by a subsequent new letter of the same date, but accompanied by an INE authorization, different not only in terms of its duration and in other respects, but which also revoked the existing authorization that had been issued to Confinamiento Controlado Parque Industrial de Hermosillo OPD under which the landfill had operated since May 4, 1994, an important change in the existing situation took place, because Promotora could no longer make such authorization available to Cytrar, nor would Cytrar probably be able to hold Promotora responsible because presumably, under both the "promise-to-buy" contract of February 20, 1996 and the notarial deed of March 27, 1996, Cytrar could only demand the performance of Promotora's obligation to make the 1994 license available if Cytrar had failed to obtain a license "required for the lawful operation of the landfill". Although of limited duration, the license of November 11, 1996, obtained by Cytrar from INE enabled the legal operation of the landfill and therefore did not give Cytrar rights against Promotora under the deed. In any event, this Arbitral Tribunal is not called to decide on these issues.

E. The Merits of the Dispute

93. The Claimant alleges that the Respondent's conduct violates the following provisions of the Agreement:

1) Article 2(1) on the promotion and admission of investments;

2) Article 3 on protection of investments;

3) Article 4(1) on fair and equitable treatment;

4) Article 4(2) on the most favorable treatment;

5) Article 4(5) on national treatment; and

6) Article 5 on nationalization and expropriation.

94. The Arbitral Tribunal deems it appropriate to consider and resolve upon the issues referred to above in the following order:

[74] Report of Fausto García y Asociados, p. 48.

1) The obligation to refrain from expropriating or nationalizing in violation of the Agreement;

2) The obligation to assure fair and equitable treatment in accordance with international law; and

3) The obligation to grant full security and protection to investments under international law, and the other violations to the Agreement alleged by the Claimant.

I. Expropriation

95. The Claimant alleges that, when the INE did not renew the permit to operate the Las Víboras Landfill (the «Landfill») through its resolution dated November 25, 1998 (hereinafter the «Resolution»), it expropriated the Claimant's investment and that such expropriation has caused damage to the Claimant. The Claimant relates the expropriation —which according to the Claimant is the exclusive cause of the damage— to the prior actions of a number of organizations and entities at the federal, state and municipal levels, and also states that those actions are attributable to the Respondent and that they are adverse to the Claimant's rights under the Agreement and to the protection awarded to its investment thereunder. The Claimant further alleges that those actions objectively facilitated or prepared the subsequent expropriatory action carried out by INE.

96. The Claimant alleges that the Agreement protects foreign investors and their investments from direct and indirect expropriation; i.e. not only expropriation aimed at real or tangible personal property whereby the owner thereof is deprived of interests over such property, but also actions consisting of measures tantamount to an expropriation with respect to such property and also to intangible property. The Claimant states that, as the resolution deprived Cytrar of its rights to use and enjoy the real and personal property forming the Landfill in accordance with its sole intended purpose, the Resolution put an end to the operation of the Landfill as an on going business exclusively engaged in the landfill of hazardous waste, an activity that is only feasible under a permit, the renewal of which was denied. Therefore, Cytrar alleges that it was deprived of the benefits and economic use of its investment. The Claimant highlights that without such permit the personal and real property had no individual or aggregate market value and that the existence of the Landfill as an on going business, as well as its value as such, were completely destroyed due to such Resolution which, in addition, ordered the closing of the Landfill.[75]

97. The Respondent alleges that INE had the discretionary powers required to grant and deny permits, and that such issues, except in special cases, are exclusively governed by domestic and not international law. On the other hand, the Respondent states that there was no progressive taking of the rights related to the permit to operate the Las Víboras landfill by means of a legislative change that could have destroyed the *status quo,* and that the Resolution was neither arbitrary nor discriminatory. It also states that the Resolution was a regulatory measure issued in compliance with the State's police power within the highly regulated and extremely sensitive framework of environmental protection and public

[75] Memorial, p. 53.

health. In those circumstances, the Respondent alleges that the Resolution is a legitimate action of the State that does not amount to an expropriation under international law.[76]

98. The Claimant affirms that the Resolution is arbitrary because the reasons invoked therein to deny the renewal of the permit that had been granted on November 19, 1997 (the «Permit»), under which the Claimant had operated the Landfill over the last year, are not proportional to the decision not to renew the Permit.

99. The Resolution[77] refuses renewal of the Permit on the following grounds: (i) the Landfill was only authorized to receive waste from agrochemicals or pesticides or containers and materials contaminated with such elements; (ii) PROFEPA's delegates in Sonora had informed, in the official communication dated November 11, 1998,[78] that the waste confined far exceeded the landfill limits established for one of the Landfill's active cells, cell No. 2; (iii) the Landfill temporarily stored hazardous waste destined for a place outside the Landfill, acting as a «transfer center», an activity for which the Landfill did not have the required authorization; Cytrar was requested on October 16, 1997 to file reports in connection with this activity, but to date the relevant authorization had not been issued; and (iv) liquid and biological-infectious waste was received at the Landfill, an activity that was prohibited and that amounted to a breach of the obligation to notify in advance any change or modification in the scope of the Permit, and to unauthorized storage at the Landfill of liquid and biological-infectious waste. The Resolution also textually provides as follows:

Furthermore, CYTRAR S.A. de C.V. agreed with the different levels of the Federal, State and Municipal Government and communicated to the public the relocation of the landfill.

100. The Claimant challenges those statements because, among other things, the excess of the authorized landfill levels of cell no. 2 was the subject matter of an investigation and an audit by PROFEPA, as a result of which a fine was imposed on Cytrar by means of an official communication dated December 16, 1999.[79] That fine was a minor penalty, substantially smaller than the maximum fine established by law. The Claimant also highlights that the official communication issued by PROFEPA to impose the fine stated that the infringement did not have a «significant effect on public health or generate an ecological imbalance».[80] The Claimant also stated that in another similar official communication issued by PROFEPA,[81] in which a fine was imposed on Cytrar for a number of infringements —including acting as a temporary storage of hazardous waste to be sent to other companies and operating as a transfer center, circumstances that were invoked by INE in the Resolution that denied the renewal of the Permit—[82], PROFEPA expressly stated that

[81] Official communication No. PFPA-DS-UJ-1105/99 dated May 25, 1999. Document A63.
[82] PROFEPA's official communication already cited, page 55, paragraph (ah). Document A63.

… the infringements committed by the company involved are not sufficient to immediately cancel, suspend or revoke the permit for carrying out hazardous material and/or waste management activities, nor do they have an impact on public health or generate an ecological imbalance.[83]

101. The Claimant also states that, through the notes dated June 25[84] and July 15[85] 1998, Cytrar had already requested from INE the permit to expand cell No. 2 of the Landfill and build another cell. INE replied to this request on October 23, 1998,[86] stating, among other things, that the expansion request would be resolved together with the decision on renewal of the Permit. The Claimant claims that this decision adversely affected it because INE partly used the same reasons for which it already knew that the authorization to expand cell No. 2 would be denied (the same reasons used by PROFEPA to impose a fine on Cytrar by means of an official communication dated December 16, 1999, mentioned above), but deferred its decision to be able to use those reasons as the grounds for the Resolution under which INE refused to renew the Permit.[87]

102. The Claimant also states that in the letter dated September 5, 1996,[88] upon requesting «the change of name», Tecmed had reported to INE, among other things, that the processes carried out at the Landfill included the collection of waste in a specialized means of transportation, the preparation, packaging and labelling of waste for its subsequent transportation and the «temporary storage of waste (oil and solvents)» and that INE made no objection or reservation. Tecmed also reported that the operation of the transfer center and temporary storage of biological-infectious waste at the Landfill was not carried out by Cytrar, but by an affiliate, Técnicas Medioambientales Winco S.A. de CV,[89] which was authorized to engage in those activities at that site under a permit granted by INE for that purpose,[90] circumstances that could not be ignored by INE upon issuing the Resolution.

103. The Respondent highlights that Cytrar had not met the requirements to allow INE to evaluate an authorization to expand cell No. 2, since Cytrar had not submitted the related plans. The Respondent also states that as Cytrar had not submitted these plans and, regardless of such a breach, had commenced the cell's expansion activities, Cytrar had not complied with one of the Permit's conditions. The Respondent states that on October 23, 1998, INE requested additional information from Cytrar to decide on the expansion of cell No. 2 and on the construction of cell No. 3, and requested that Cytrar present the engineering project and the related drawings.[91] The Claimant complied with such requirement on November 4, 1998.[92]

104. The Respondent also refers to a number of circumstances related to the Landfill and its operation. The Claimant also refers to such circumstances, and substantial evidence has

[92] Counter-memorial, p. 79, 287; document D146.

been produced in that regard. Such circumstances underlie the Resolution or had a significant effect thereon, although not all such circumstances have been mentioned in the text of the Resolution.

105. According to the Respondent, those circumstances are:[93]

1) the site of the Landfill did not comply with applicable Mexican regulations in terms of its location and characteristics;

2) in 1998, Cytrar had committed a number of irregularities while operating the Landfill, mainly related to the transportation of waste from Alco Pacífico, and such irregularities triggered strong community pressure against the Landfill;

3) Mexican authorities, mainly from the Municipality of Hermosillo, expressed their doubts as to the Landfill's operations;

4) there was the risk that community pressure might increase if operation of the Landfill continued; and

5) Since 1997 Cytrar had reportedly been aware that community pressure suggested that the operation of the Landfill was not feasible due to its location, and that is why it agreed to relocate it at its own cost.

106. The opposing community groups claimed that the Landfill was only 8 km from the urban center of Hermosillo, and that such proximity breached the regulations that required a distance of at least 25 km from any settlement of more than 10,000 residents. Legally, however, such circumstance could not be invoked against Cytrar because the Landfill had been located and authorized to operate at such site before the adoption of such regulations, which are not retroactive. Reportedly, in deciding to refuse to renew the Permit, INE took into account the fact that the location of the site did not comply with the regulations as well as the resulting community pressure.[94]

107. The Parties agree that community opposition to the Landfill was due not to the manner in which Cytrar operated it, but to the transportation to the Landfill of contaminated and abandoned soil from the Alco Pacífico plant located in the state of Baja California, Mexico. Owing to a series of events that are not relevant at this point, Cytrar was in charge of the collection, transportation and landfill of Alco Pacifico's hazardous waste and contaminated soil pursuant to an agreement dated November 19, 1996, executed between PROFEPA, Los Angeles County, USA, Fomento de Ingeniería S.A. de C.V. (Fomín) and Cytrar.[95] Fomín was entrusted with the supervision of the transportation and discharge services that Cytrar had to provide under such agreement, in compliance with the contract and the applicable legal provisions, and had to report its findings to PROFEPA. The shipments of toxic materials and soil destined for the Landfill began under an initial transport permit

[93] Counter-memorial, pp. 88-89, 315.
[94] Memorial, pp. 72-74; Counter-memorial, p. 89, 315-316.
[95] Document D64

issued by INE[96] in early 1997.[97] In view of the claims of the community, PROFEPA conducted inspections of the trucks in October 1997, which essentially determined that there were open hazardous material packaging bags. PROFEPA therefore adopted urgent measures for Cytrar to rectify the situation, which were complied with by Cytrar. There were similar situations in November 1997, and, at the time, in addition to adopting urgent measures affecting Cytrar, PROFEPA applied a fine to Cytrar.[98] In April 1998, PROFEPA found some irregularities in the discharge of Alco Pacífico's waste and levied a fine on Cytrar, stating that «there are circumstances that pose or may pose a risk to the environment or to health». A similar situation was found in May 1998 in connection with the transportation and discharge of waste from the company Siderúrgica de California, which also gave rise to the issuance of urgent measures by PROFEPA, which were also complied with by Cytrar.[99]

108. The community's opposition to the Landfill, in its public manifestations, was widespread and aggressive, as evidenced by several events at different times. In November 1997, the association *Alianza Cívica de Hermosillo* (Hermosillo's Alliance for Civic Affairs) publicly denounced Cytrar's "actions and omissions" particularly in connection with waste transportation from Alco Pacífico, and requested that Cytrar's permit to operate the Landfill be cancelled and the extension thereof be denied.[100] Also in November[101] "...around 200 people organized a demonstration, marching to the landfill and closing it down symbolically… ", and then, a meeting was held with federal, state, and municipal public officials including the President of INE, the Deputy Director of the PROFEPA Environmental Audit Bureau, the Minister of SEMARNAP and representatives of the community organizations. In December 1997, the association *Academia Sonorense de Derechos Humanos* (Sonora Human Rights Academy) filed a criminal complaint against Cytrar for the commission of acts that could be defined as "environmental crimes".[102] In January 1998, the same association " ...filed a challenge... " against the Municipality of Hermosillo for the permit granted by that Municipality in 1994 to operate the Landfill.[103] In late January 1998 "...members of the community and of the different community organizations ...." organized a blockade of the Landfill which lasted until March 7, 1998, when the police intervened under orders of the Attorney's General Office. After the police intervention, the community organizations that questioned such measures organized a sit-in at Hermosillo's Town Hall[104] that lasted 192 days. By late March 1998, the same opposition groups issued a communication condemning the actions of the authorities that had put an end to the blockade of the Landfill.[105] In April 1998, a group of demonstrators attempted to block access to the Landfill but the police thwarted this action.[106] In

September 1998, a certain *Asociación de Organismos No Gubernamentales en Lucha contra el CYTRAR* (Association of NGOs Against CYTRAR) filed a claim before the State Commission of Human Rights against the authorities of the State of Sonora and the Municipality of Hermosillo for having intervened to put an end to the 192-day sit-in organized at the Town Hall[107]. In October 1998, a "family demonstration for the defense of health and dignity" and against "the landfill and the authorities' position in that regard" was organized and a public communication contrary to the Landfill was issued.[108] According to the news media, about 400 people participated in the demonstration.[109] In November 1998, community organizations submitted a petition to the local office of SEMARNAP so that expressions of such associations and individual citizens be considered upon evaluating the renewal of the Permit. During that period —as evidenced by the "Press Dossier (I)" included in the documents offered by the Claimant—[110] these developments were covered by the local press and Hermosillo's radio and television.

109. The authorities of the Municipality of Hermosillo were the direct target of "community pressure". The Municipality was one of INE's interlocutors at the time of consideration of the Permit's renewal. In view of the pressure that questioned the Municipality's grant of the permit to use the land where the Landfill was operated, the Municipality rendered an opinion on March 31, 1998, which explained that at the time of granting such permit the current legal provisions were not applicable and that those provisions came into force subsequently, establishing a minimum distance between landfills and urban centers which the Landfill did not comply with. However, the Municipality expressed its agreement with the community about the need to relocate Cytrar's hazardous waste landfill operation to a different site and its support to conduct an audit of operations to determine whether the Landfill's operation entailed any risks. That same day, the Health Commission of the Municipality rendered an opinion confirming that, although Cytrar's operation at the Las Víboras site met the legal requirements for functioning and there were no "legal, ethical or logical arguments" to seek the closing of the Landfill, all necessary efforts should be made to relocate Cytrar's operations. After this, several other decisions to the same effect were issued by the Municipality, additionally highlighting that only the federal Mexican authorities were competent in " ...events relating to toxic waste".[111] INE also consulted with the Municipality on November 18, 1998 about Cytrar's requests to, among other things, expand cell No. 2 and build another one. The Municipality did not agree to the construction of a third cell, but accepted expansion subject to:[112]

> ....a detailed and legal relocation commitment agreed upon between the three levels of Government and the company

and provided that:

...a commission with representatives from each party be formed; and that, prior to that, an audit of operations be conducted and the final close down of the landfill be carried out; and that it would have to be made clear that that would be the last authorization for the current site.

The consultation with the Municipality and with the authorities of the State of Sonora and its results have been summarized as follows in the declaration of Dra. Cristina Cortinas de Nava,[113] who was at the time INE's General Director for Hazardous Materials, Waste and Activities and issued the Resolution, during the Hearing held from May 20 to May 24, 2002:

.... the gentleman is right to point out that I consulted with the municipal authority and with the state authority before making my decision about the company's application for an authorization to expand its capacity while relocation was pending[…]. Let me inform you that the reply that I obtained from the authorities was "let them fill in the cell, that's all right. But don't let them build anything else because we have waited too long for their relocation to allow them to have more space at the site they are at".

110. The relocation of Cytrar's operations as a response to community pressure was therefore also one of the factors taken into account by INE, and mentioned incidentally in the Resolution, upon deciding whether to renew the Permit. By late 1997, owing to the community pressure against the Landfill, Cytrar and the Municipality of Hermosillo started negotiations about the relocation, which, indeed, entailed the final close down of the hazardous waste landfill operation at the Las Víboras site, and that was undoubtedly the aim pursued by the community groups and the authorities of the Municipality. The relocation and the final close down of the Landfill, as it has been seen, were also the express claims of the Municipality of Hermosillo, apparently in response to the complaints about the Landfill and Cytrar's operation described above. The Claimant underscores that, as from the commencement of the negotiations, it did not object to the relocation but accepted it on the condition that a new site be identified before closing the operation at Las Víboras, and that the continuity of the operation at the new site and premises be guaranteed with the necessary permits.[114] On March 16, 1998, in a notice published by the local press, Cytrar ratified, among other things, its agreement to relocate its operation.[115] On July 3, 1998, at a meeting called by the Governor of the State of Sonora and attended by the Minister of SEMARNAP, Ms. Julia Carabias Lillo and the authorities of the Municipality of Hermosillo, Cytrar was informed of a joint declaration issued by the federal, state and municipal authorities stating that although the inspections conducted did not provide "...evidence of any risk to health and the ecosystems..." arising out of the Landfill, the relocation was necessary to "secure environmental safety in view of the rapid urban growth of Hermosillo, provide a response to the concerns that had been expressed and guarantee, in the long term, the environmental infrastructure to handle and dispose of industrial waste".[116]

The declaration also states that:

…As a consequence, the present landfill operated by CYTRAR shall cease to operate as soon as the new premises are ready to start operations…

111. Later, IMADES (Sonora's Environmental and Sustainable Development Institute), a government entity, focused on the search for a new site in the State of Sonora on the basis of a broader and more ambitious landfill proposal as to the scope, activities and functions related to the landfill of hazardous waste, or CIMARI (integral center for the management of industrial waste).[117] By October 1998, IMADES had "... shortlisted three possible areas...". After visiting the sites, together with Cytrar, INE considered that, with the approval of Cytrar, "carrying out the applicable studies" in a site located in the Municipality of Benjamín Hill[118] would be feasible.

112. When INE considered the renewal of the Permit, the relocation had not taken place and, reportedly, the final relocation site had not been identified, i.e. a site which had tested positive to all feasibility studies for the purpose for which it would be used, and a site qualified to be authorized as hazardous waste landfill. On November 9, 1998, a few days before issuance of the Resolution, Cytrar sent a note to the Governor of the State of Sonora —following the procedure stated by INE through the official communication of October 23, 1998, sent by Dr. Cristina Cortinas Nava—[119] ratifying its relocation commitment, stating also that it would relocate to any site indicated to it. In this note Cytrar also expressed that it would assume all costs related to the acquisition of the land, constructions and transfer of the landfill's waste to the new site, all the above without resigning to its position that the Permit should remain in full force and effect until the relocation had effectively taken place.[120] Similar commitments were reaffirmed by Tecmed in the notes dated November 12, 1998, to Julia Carabias Lillo, head of SEMARNAP,[121] and November 17, 1998, to Dr. Cristina Cortinas Nava, INE's General Director of Hazardous Materials, Waste and Activities.[122] This last note was also sent by Cytrar to Sonora's governor and to the mayor of the Municipality of Hermosillo by means of communications where Cytrar highlighted its relocation commitment included in point 7 of the original note.[123] After issuance of the Resolution that denied the renewal of the Permit, there were a number of discussions and actions, which involved Tecmed, intended to carry out the relocation. These discussions and actions extended to January 2000 but have currently ceased.[124]

113. The Agreement does not define the term "expropriation", nor does it establish the measures, actions or behaviors that would be equivalent to an expropriation or that would

have similar characteristics. Although formally an expropriation means a forcible taking by the Government of tangible or intangible property owned by private persons by means of administrative or legislative action to that effect, the term also covers a number of situations defined as *de facto* expropriation, where such actions or laws transfer assets to third parties different from the expropriating State or where such laws or actions deprive persons of their ownership over such assets, without allocating such assets to third parties or to the Government.[125]

114. Generally, it is understood that the term "…equivalent to expropriation…" or "tantamount to expropriation" included in the Agreement and in other international treaties related to the protection of foreign investors refers to the so-called "indirect expropriation" or "creeping expropriation", as well as to the above-mentioned *de facto* expropriation.[126] Although these forms of expropriation do not have a clear or unequivocal definition, it is generally understood that they materialize through actions or conduct, which do not explicitly express the purpose of depriving one of rights or assets, but actually have that effect. This type of expropriation does not necessarily take place gradually or stealthily — the term "creeping" refers only to a type of indirect expropriation—and may be carried out through a single action, through a series of actions in a short period of time or through simultaneous actions. Therefore, a difference should be made between creeping expropriation and *de facto* expropriation,[127] although they are usually included within the broader concept of "indirect expropriation" and although both expropriation methods may take place by means of a broad number of actions that have to be examined on a case-by-case basis to conclude if one of such expropriation methods has taken place.[128]

115. To establish whether the Resolution is a measure equivalent to an expropriation under the terms of section 5(1) of the Agreement, it must be first determined if the Claimant, due to the Resolution**,** was radically deprived of the economical use and enjoyment of its investments, as if the rights related thereto —such as the income or benefits related to the Landfill or to its exploitation— had ceased to exist. In other words, if due to the actions of the Respondent, the assets involved have lost their value or economic use for their holder and the extent of the loss.[129] This determination is important because it is one of the main elements to distinguish, from the point of view of an international tribunal, between a regulatory measure, which is an ordinary expression of the exercise of the state's police power that entails a decrease in assets or rights, and a *de facto* expropriation that deprives

[125] Award dated August 30, 2000, in ICSID case No. ARB(AF)/97/1 *Metalclad v. United Mexican States*, 16 Mealey's International Arbitration Report (2000), pp. A-1 *et seq*.; p. A-13 (p. 33 of the award, 103): «Thus, expropriation [...] includes not only open, deliberate and acknowledged takings of property, such as outright seizure or formal or obligatory transfer of title in favor of the host State, but also covert or incidental interference with the use of property which has the effect of depriving the owner, in whole or in significant part, of the use or reasonably-to-be expected economic benefit of property even if not necessarily to the obvious benefit of the host State. »

those assets and rights of any real substance. Upon determining the degree to which the investor is deprived of its goods or rights, whether such deprivation should be compensated and whether it amounts or not to a *de facto* expropriation is also determined. Thus, the effects of the actions or behavior under analysis are not irrelevant to determine whether the action or behavior is an expropriation. Section 5(1) of the Agreement confirms the above, as it covers expropriations, nationalizations or

...any other measure with similar characteristics or *effects*...[130]

The following has been stated in that respect:

In determining whether a taking constitutes an «indirect expropriation», it is particularly important to examine the effect that such taking may have had on the investor's rights. Where the effect is similar to what might have occurred under an outright expropriation, the investor could in all likelihood be covered under most BIT provisions.[131]

116. In addition to the provisions of the Agreement, the Arbitral Tribunal has to resolve any dispute submitted to it by applying international law provisions (Title VI.1 of the Appendix to the Agreement), for which purpose the Arbitral Tribunal understands that disputes are to be resolved by resorting to the sources described in Article 38 of the Statute of the International Court of Justice[132] considered, also in the case of customary international law, not as frozen in time, but in their evolution.[133] Therefore, it is understood that the measures adopted by a State, whether regulatory or not, are an indirect *de facto* expropriation if they are irreversible and permanent and if the assets or rights subject to such measure have been affected in such a way that "…any form of exploitation thereof…" has disappeared; i.e. the economic value of the use, enjoyment or disposition of the assets or rights affected by the administrative action or decision have been neutralized or destroyed.[134] Under international law, the owner is also deprived of property where the use or enjoyment of benefits related thereto is exacted or interfered with to a similar extent, even where legal ownership over the assets in question is not affected, and so long as the deprivation is not temporary. The government's intention is less important than the effects of the measures on the owner of the assets or on the benefits arising from such assets affected by the measures; and the form of the deprivation measure is less important than its actual effects.[135] To determine whether such an expropriation has taken place, the Arbitral Tribunal should not

.... restrict itself to evaluating whether a formal dispossession or expropriation took place, but should look beyond mere appearances and establish the real situation behind the situation that was denounced.[136]

117. The Resolution meets the characteristics mentioned above: undoubtedly it has provided for the non-renewal of the Permit and the closing of the Landfill permanently and irrevocably, not only due to the imperative, affirmative and irrevocable terms under which the INE's decision included in the Resolution is formulated, which constitutes an action — and not a mere omission— attributable to the Respondent, with negative effects on the Claimant's investment and its rights to obtain the benefits arising therefrom, but also because after the non-renewal of the Permit, the Mexican regulations issued by INE become fully applicable. Such regulations prevent the use of the site where the Landfill is located to confine hazardous waste due to the proximity to the urban center of Hermosillo. Since it has been proved in this case that one of the essential causes for which the renewal of the Permit was denied was its proximity and the community pressure related thereto, there is no doubt that in the future the Landfill may not be used for the activity for which it has been used in the past and that Cytrar's economic and commercial operations in the Landfill after such denial have been fully and irrevocably destroyed, just as the benefits and profits expected or projected by the Claimant as a result of the operation of the Landfill. Moreover, the Landfill could not be used for a different purpose since hazardous waste has accumulated and been confined there for ten years. Undoubtedly, this reason would rule out any possible sale of the premises in the real estate market. Finally, the destruction of the economic value of the site should be assessed from the investor's point of view at the time it made such an investment. In consideration of the activities carried out, of its corporate purpose and of the terms and conditions under which assets related to the Landfill were acquired from Promotora, the Claimant, through Tecmed and Cytrar, invested in such assets only to engage in hazardous waste landfill activities and to profit from such activities. When the Resolution put an end to such operations and activities at the Las Víboras site, the economic or commercial value directly or indirectly associated with those operations and activities and with the assets earmarked for such operations and activities was irremediably destroyed. The above conclusions are not jeopardized by the fact that the Resolution has not prevented Cytrar from continuing operating the Landfill until completion of the authorized installed capacity existing as of the Resolution's date. Such limited, temporary and partial continuation of operation of the Landfill does not modify the definitive and detrimental effects of the Resolution with respect to the long-term investment made in the Landfill. As far as the effects of such Resolution are concerned, the decision can be treated as an expropriation under Article 5(1) of the Agreement.

118. However, the Arbitral Tribunal deems it appropriate to examine, in light of Article 5(1) of the Agreement, whether the Resolution, due to its characteristics and considering not only its effects, is an expropriatory decision.

119. The principle that the State's exercise of its sovereign powers within the framework of its police power may cause economic damage to those subject to its powers as administrator without entitling them to any compensation whatsoever is undisputable. Another undisputed issue is that within the framework or from the viewpoint of the

[136] Interamerican Court of Human Rights, *Ivcher Bronstein Case (Baruch Ivcher Bronstein vs. Peru),* judgment of February 6, 2001, 124, p. 56; www.corteidh.or.cr.

domestic laws of the State, it is only in accordance with domestic laws and before the courts of the State that the determination of whether the exercise of such power is legitimate may take place. And such determination includes that of the limits which, if infringed, would give rise to the obligation to compensate an owner for the violation of its property rights.

120. However, the perspective of this Arbitral Tribunal is different. Its function is to examine whether the Resolution violates the Agreement in light of its provisions and of international law. The Arbitral Tribunal will not review the grounds or motives of the Resolution in order to determine whether it could be or was legally issued. However, it must consider such matters to determine if the Agreement was violated. That the actions of the Respondent are legitimate or lawful or in compliance with the law from the standpoint of the Respondent's domestic laws does not mean that they conform to the Agreement or to international law:[137]

An Act of State must be characterized as internationally wrongful if it constitutes a breach of an international obligation, even if the act does not contravene the State's internal law – even if under that law, the State was actually bound to act that way.[138]

121. After reading Article 5(1) of the Agreement and interpreting its terms according to the ordinary meaning to be given to them (Article 31(1) of the Vienna Convention), we find no principle stating that regulatory administrative actions are *per se* excluded from the scope of the Agreement, even if they are beneficial to society as a whole —such as environmental protection—, particularly if the negative economic impact of such actions on the financial position of the investor is sufficient to neutralize in full the value, or economic or commercial use of its investment without receiving any compensation whatsoever. It has been stated that:

Expropriatory environmental measures – no matter how laudable and beneficial to society as a whole – are, in this respect, similar to any other expropriatory measures that a state may take in order to implement its policies: where property is expropriated, even for environmental purposes, whether domestic or international, the state's obligation to pay compensation remains.[139]

122. After establishing that regulatory actions and measures will not be initially excluded from the definition of expropriatory acts, in addition to the negative financial impact of such actions or measures, the Arbitral Tribunal will consider, in order to determine if they are to be characterized as expropriatory, whether such actions or measures are proportional to the public interest presumably protected thereby and to the protection legally granted to investments, taking into account that the significance of such impact has a key role upon deciding the proportionality.[140] Although the analysis starts at the due deference owing to

the State when defining the issues that affect its public policy or the interests of society as a whole, as well as the actions that will be implemented to protect such values, such situation does not prevent the Arbitral Tribunal, without thereby questioning such due deference, from examining the actions of the State in light of Article 5(1) of the Agreement to determine whether such measures are reasonable with respect to their goals, the deprivation of economic rights and the legitimate expectations of who suffered such deprivation. There must be a reasonable relationship of proportionality between the charge or weight imposed to the foreign investor and the aim sought to be realized by any expropriatory measure.[141] To value such charge or weight, it is very important to measure the size of the ownership deprivation caused by the actions of the state and whether such deprivation was compensated or not.[142] On the basis of a number of legal and practical factors, it should be also considered that the foreign investor has a reduced or nil participation in the taking of the decisions that affect it, partly because the investors are not entitle to exercise political rights reserved to the nationals of the State, such as voting for the authorities that will issue the decisions that affect such investors.

The European Court of Human Rights has defined such circumstances as follows:

Not only must a measure depriving a person of his property pursue, on the facts as well as in principle, a legitimate aim « in the public interest », but there must also be a reasonable relationship of proportionality between the means employed and the aim sought to be realised...[...]. The requisite balance will not be found if the person concerned has had to bear "an individual and excessive burden" [...] The Court considers that a measure must be both appropriate for achieving its aim and not disproportionate thereto.[143]

....non-nationals are more vulnerable to domestic legislation: unlike nationals, they will generally have played no part in the election or designation of its authors nor have been consulted on its adoption. Secondly, although a taking of property must always be effected in the public interest, different considerations may apply to nationals and non-nationals and there may well be legitimate reason for requiring nationals to bear a greater burden in the public interest than non-nationals.[144]

The Arbitral Tribunal understands that such statements of the Strasburg Court apply to the actions of the State in its capacity as administrator, not only to its capacity as law-making body.

123. During its operation of the Landfill, Cytrar breached a number of the conditions under which the Permit was issued, which have been referred to above. Such breaches were verified by PROFEPA. In the opinion of the Arbitral Tribunal, these are the breaches to the Permit that triggered the issuance of the Resolution, since those are the breaches on which the Resolution is based and to which it refers. This is the conclusion to be reached under

---

[141] European Court of Human Rights, *In the case of Mellacher and Others v. Austria*, judgment of December 19, 1989, 48, p.24; In the case of *Pressos Compañía Naviera and Others v. Belgium*, judgment of November 20, 1995, 38, p. 19, http://hudoc.echr.coe.int

[142] It has been stated that: "....on the whole [...] notwithstanding compliance with the public interest requirement, the failure to pay fair compensation would render the deprivation of property inconsistent with the condition of proportionality", Y. Dinstein, Deprivation of Property of Foreigners under International Law, 2 Liber Amicorum Judge Shigeru Oda, p. 849 *et seq.*; esp. p. 868 (2002).

[144] *ibid.*, 63, pp. 24.

Mexican law, according to which administrative decisions must be duly grounded in order to have, among other things, the transparency required so that persons that disagree with such decisions may challenge them through all the available legal remedies.[145] The Resolution has not referred to the events related to the transportation and discharge of the hazardous waste of Alco Pacífico, as they took place under the terms of the permits and authorizations granted by the Mexican authorities, including INE, other than the Permit, and the violations committed by Cytrar in the performance of such activities have not been proved or penalized as infringements to the Permit. Therefore, without prejudice to the possibility of taking into account later on the effects of such events on the political and social considerations taken into account by INE upon issuing the Resolution —such considerations are generally referred to in the Resolution and in INE's correspondence addressed to Cytrar immediately before such Resolution— the Arbitral Tribunal considers that such infringements, that did not trigger the revocation or termination of the permits under which such transportation and discharge took place and that are not defined in the Permit's conditions, are not determinants of the Resolution. On the other hand, PROFEPA and SEMARNAP also stated that the violations in the transportation and discharge of the hazardous waste of Alco Pacífico should not be taken into account to determine if the Landfill's permit should be revoked upon answering a claim to that effect filed by a social group adverse to the Landfill.[146]

124. This Arbitral Tribunal considers that the violations to the Permit mentioned in the Resolution, to the extent they have been verified by PROFEPA or INE under the applicable Mexican law, are issues that the Tribunal does not need to review. However, the Arbitral Tribunal points out that such Resolution does not suggest that the violations compromise public health, impair ecological balance or protection of the environment, or that they may be the reason for a genuine social crisis. Additionally, when PROFEPA verified the existence of such violations in 1999, it applied the pertinent sanctions in the proportion it deemed appropriate to the importance of the violation. The sanction applied was in the form of a fine imposed after evaluating whether a greater or more serious sanction would have been applicable, such as the revocation of the Permit, and underscoring the fact that such violations did not compromise the condition of the environment, the ecological balance or the health of the population. With that, PROFEPA confirmed its statements in the note dated February 11, 1998, sent to Cytrar:[147]

> The inspections conducted by this Office to the landfill referred to several times, have not shown [sic in the Spanish original] any indication that risks for the population's health or the environment might exist.

On various occasions, the Municipality of Hermosillo[148] and the Minister of SEMARNAP, Ms. Julia Carabías Lillo,[149] have insisted that Cytrar's Landfill operation complies with the

Mexican legal provisions on environmental protection and public health preservation or meets the requirements necessary not to impair the environment or public health. More specifically, in a document dated September 3, 1998,[150] SEMARNAP —which comprises both INE and PROFEPA as autonomous divisions—, on the basis of the statements made by PROFEPA, stated as follows:

…CYTRAR's handles hazardous waste in strict compliance with the law, that the last stage of the landfill has the maximum safety conditions required, which provide the necessary grounds to authorize the relevant operations.

125. In addition to the reference made to the infractions to conditions for the Permit and a brief statement about Cytrar's commitment to relocate, the Resolution does not specify any reasons of public interest, public use or public emergency that may justify it. According to the Respondent's allegations, such reasons would basically be the following:

1. The protection of the environment and public health, and

2. The need to provide a response to the community pressure resulting from the location of the Landfill and Cytrar's violations during the operation, which some groups interpreted as harmful to the environment or the public health and the social unease in Hermosillo originated in these circumstances.

126. One of the factors that undoubtedly underlies such reasons is the location of the Landfill with respect to Hermosillo's urban center. As the Respondent's counsel stated in its oral allegation:

I have stated several times and insisted that the problem was not a problem with a company or with an investor, but with a specific site.[151]

Such declaration does not differ from the statements made by Dr. Cristina Cortinas Nava, INE's General Director of Hazardous Materials, Waste and Activities in this regard:

I insist once again that, for us, the position was: let's come to a close with this site**;** it is the reason for the conflict. People keep coming to the place to see how it's being operated; they won't even let it operate with all that community pressure. Let's start from scratch in some other place, in the right manner and with all the mechanisms that we think might ensure that this operation could be acceptable for society.[152]

127. Actually, according to the evidence submitted in this arbitration proceeding, it is irrefutable that there were factors other than compliance or non-compliance by Cytrar with the Permit's conditions or the Mexican environmental protection laws and that such factors had a decisive effect in the decision to deny the Permit's renewal. These factors included

[150] Document A92.

"political circumstances". As stated by Dr. Cristina Cortinas Nava in the official communication sent to Cytrar on October 23, 1998,[153]

> It is publicly known that your company has assumed a relocation commitment as to the landfill you operate and that, as you have stated in point seven of the brief dated July, 15, 1998, there are political issues that have to be taken into account to render a resolution as to the renewal of the operation permit and an increase in the landfill capacity. Therefore, we suggest that you contact the authorities of the State and of the Municipality to define the steps to be followed to relocate the landfill.

In its note dated July 15, 1998, addressed to INE, Cytrar requests that INE issue its decision on Cytrar's application for an increase in the landfill capacity according to the alternatives that Cytrar had presented to INE while

> ....the actions to be taken are defined on the basis of the political events affecting Cytrar (relocation)...[154]

128. Therefore the Arbitral Tribunal has to evaluate, pursuant to Article 5(1) of the Agreement and from the perspective of international law, the extent to which such political circumstances —that in the opinion of the Arbitral Tribunal, on the basis of the evidence submitted, do not seem to go beyond the circumstances arising from community pressure— are the basis of the Resolution, in order to assess whether the Resolution is proportional to such circumstances and to other circumstances, and to the neutralization of the economic and commercial value of the Claimant's investment caused by the Resolution.

129. These socio-political circumstances are the reason why INE has considered the renewal of the Permit as an "exceptional case". As a consequence, INE, instead of deciding by itself —as it was empowered by law— as to the Permit's renewal on the basis of considerations exclusively related to INE's specific function linked to the protection of the environment, ecological balance and public health, it consulted with the mayor of the Municipality of Hermosillo and the Governor of the State of Sonora as to Cytrar's requests related to the expansion of cell Nº 2 and the construction of cell Nº 3 in the Landfill.[155] The only conclusion possible is that such consultation or inquiries were driven by INE's socio-political concerns, since it is not in dispute that INE and PROFEPA were the only entities legally authorized and technically competent to have a role in issues in which public health and the protection of the environment in connection with the Landfill were involved. None of the parties to which INE makes the inquiry expresses concerns as to the danger that the Landfill may pose to public health, ecological balance or the environment. To the contrary, their concerns are to ensure the relocation of the Landfill to a different site far away from Hermosillo, the immediate closing of the Landfill and, after depleting its authorized and installed capacity, the prohibition to grant new permits to confine hazardous waste at the Las Víboras site;[156] i.e. to put an end to the political problems —defined as "community

pressure"— caused by the Landfill to the federal, state and municipal authorities, by permanently closing the Landfill.

130. The INE's General Director of Hazardous Materials, Waste and Activities, Dr. Cristina Cortinas Nava, sustains the political or social factor "…was one of the factors involved but not the main factor…",[157] and to the question of whether the influence on the Resolution of the unauthorized expansion of cell no. 2 was "strong, small, insignificant, decisive", the answer was "I would say it was important".[158] However, in fact, the absence of any statement in the Resolution and in the opinions rendered by the municipal and state officers consulted by INE prior to issuing the Resolution about these or the other infringements committed by Cytrar and mentioned in the Resolution being infringements seriously or imminently affecting public health, ecological balance or the environment, together with the confirmation by PROFEPA that such infringements did not pose such dangers, reveal that the Resolution was mainly driven by socio-political factors. Even the significance awarded by INE to the technical infringements committed during the operation of the Landfill, on which the Resolution is based, and therefore the relative relevance awarded by INE to such factors upon issuing the Resolution, were actually strongly influenced by the community pressure and the political consequences faced by INE since municipal and state authorities and opposing community associations interpreted the expansion of the Landfill and any other action intended to expand the Landfill capacity as a signal that such facility would not be relocated and that the Las Víboras site, close to Hermosillo's urban center, would continue to be a hazardous waste landfill site in violation of existing rules and regulations.[159] Indeed, Dr. Cristina Cortinas Nava considered that continuation by Cytrar of the expansion of cell no. 2 did not create current or future hazards for the protection of the environment or public health; she considered that such expansion increased INE's difficulties to manage community pressure and the related political consequences adverse to the Landfill:

> ..... as I had issued no written resolution authorizing the expansion of the cell, the fact that [Cytrar] commenced to expand the cell was a concern to me and I took it as evidence that the company was doing things before obtaining the permit it had applied for [...] I took that into account as one of the elements, but I insist: the circumstance that the company had not helped me create trust among local authorities as it expanded the cells without any authorization, whether issued by me or local authorities, was included among such elements...[160]

131. This item has been confirmed by the importance attributed to the relocation of Cytrar's operations to a site different from the Landfill. Such importance was actually motivated by the community's opposition to the Landfill's existing site and was not related to the fact that Cytrar's operations in the site or the site's appropriateness[161] or the way in which the Landfill was operated —as the municipal and state authorities and PROFEPA themselves

---

[161] *Ibid*, p.90 overleaf. "Because our interest was to recover the infrastructure that had already been created, and, as I have always held and still believe today, those premises were necessary for this State, they were located at the right site and, with an environmentally safe handling of hazardous waste**;** it was a good option".

admitted— entailed a risk for the environment or for the public health. The Landfill's still unresolved relocation, which, according to Dr. Cristina Cortinas Nava, was one of the motivations for the Resolution in that denying the renewal of the Permit —thus preventing Cytrar from operating the Landfill— was a strategy to put pressure on Cytrar to relocate, was then one of the factors that were closely related to the social and political tense circumstances surrounding the Landfill and its operation. INE thought it would placate such tensions by denying the renewal of the Permit instead of keeping the preservation of public health, ecological balance or the environment in mind.[162]

132. To sum up, the reasons that prevailed in INE's decision to deny the renewal of the Permit were reasons related to the social or political circumstances and the pressure exerted on municipal and state authorities and even on INE itself created by such circumstances. It will be necessary, then, for the purpose of establishing whether the Respondent breached Article 5(1) of the Agreement, to evaluate such reasons as a whole to determine whether the Resolution is proportional to the deprivation of rights sustained by Cytrar and with the negative economic impact on the Claimant arising from such deprivation.

133. There is no doubt as to the existence of community or political pressure —as both Parties have acknowledged and as made public by the local mass media and shown by the evidence submitted in these arbitral proceedings— against the Landfill. However, a substantial portion of the community opposition is based on objective situations that are beyond Cytrar or Tecmed's control or even beyond the Claimant's control. On the other hand, the Arbitral Tribunal should consider whether community pressure and its consequences, which presumably gave rise to the government action qualified as expropriatory by the Claimant, were so great as to lead to a serious emergency situation, social crisis or public unrest, in addition to the economic impact of such a government action, which in this case deprived the foreign investor of its investment with no compensation whatsoever. These factors must be weighed when trying to assess the proportionality of the action adopted with respect to the purpose pursued by such measure.

134. As highlighted before, the events related to the transportation and discharge of hazardous waste from Alco Pacífico belong to an operation safeguarded by legal instruments, licenses and permits that are different from the ones governing the Landfill. Therefore, any infringement or sanction imposed in connection with operations covered by such instruments, licenses and permits may not be regarded as infringements committed or sanctions imposed under the Permit or the legal provisions applicable to the activities specifically contemplated by such Permit. For that very same reason, any violation to such transport operation could not be part of the Resolution's grounds as the Resolution is based exclusively on violations to the legal provisions applicable to the activities covered by the Permit. However —as both Parties have admitted— the negative attitude that some social groups had with respect to the Landfill was taken as a result of the events related to the waste transportation from Alco Pacífico. Consequently, upon an overall examination of the impact of socio-political factors on the Resolution, such adverse attitude should be considered together with the real weight it had.

[162] Hearing held from May 20 to May 24, 2002. Declaration of Dr. Cristina Cortinas Nava, transcript of the session of May 21, 2002, pp. 72 overleaf-73, 75 oveleaf-76.

135. Actually, the negative reactions to the transportation of waste from Alco Pacífico to Hermosillo became apparent even before PROFEPA verified that Cytrar had committed certain violations when carrying out this operation. In the Respondent's words:

The landfill of Alco Pacífico's waste in Sonora generated reactions almost immediately. On January 14, 1997, a local newspaper published an article stating that Cytrar would confine imported hazardous waste that had been abandoned in Alco Pacífico's premises […]. On March 7, 1997, another article was published about the landfill of Alco Pacífico's hazardous waste in Sonora. On March 9, 1997, Manuel Llano Ortega, an engineer and a resident of Hermosillo, requested that the State Governor provide a response to the community's concerns about the landfill of Alco Pacífico's waste […]. On May 2, 1997, Sonora's Human Rights Academy filed a complaint against SEMARNAP, PROFEPA, the State Legislature and the State Governor. It held that the authorities had violated the State's sovereignty by authorizing the deposit of toxic waste from Baja California without the relevant permit by the competent local authorities. On May 15, 1997, the same association filed a complaint before the National Commission of Human Rights.[163]

136. Thus, community opposition to Cytrar's activities of transportation and discharge of Alco Pacífico's waste must be analyzed in light of the initial opposition shown by some citizens or associations to the decision of PROFEPA —which hired the transportation to Hermosillo of such waste with Cytrar— and INE —which granted the relevant permits for Cytrar to undertake such transportation activities—[164] as to whether such waste could be confined in Hermosillo. Undoubtedly, the Mexican authorities opted to choose or accept Hermosillo, Sonora, as the appropriate site for the landfill of Alco Pacífico's waste and they were responsible for that decision. The criticism by groups from Sonora on Cytrar's management of Alco Pacífico's waste transportation cannot be separated from such groups' repudiation of the authorities' decision to transport the waste from Alco Pacífico to Hermosillo, Sonora, to have it confined there, and at the same time such criticism was the evident expression of such repudiation. And it is not possible to state that it was Cytrar's management of such transportation activities, and not the previous decision of the authorities to have Alco Pacífico's waste confined in Hermosillo, the determinant of community opposition.

137. The truth is that PROFEPA did not choose the early termination of the agreement entered into with Cytrar because of community opposition; and under no circumstance did INE cancel or otherwise remove Cytrar's permit for the transportation or discharge of Alco Pacífico's waste. The infringements or irregularities found by PROFEPA in connection with these operations triggered the imposition of fines on Cytrar or brought about orders to amend its manner of operation, but apparently they did not originate any recommendation or action by PROFEPA for the cancellation of the permit or the termination of the agreement under which Cytrar operated. Neither Cytrar's shortcomings as to Alco Pacífico's waste transportation nor the community opposition that such transportation brought about seem to have originated emergency situations, genuine social crisis or public unrest or urgency, which, due to their severity, could have led the competent authorities to terminate the contractual relationship governing the transport operation or to revoke or

---

[163] Counter-memorial, pp. 44-45; 164 *et. seq*.
[164] INE's permit of January 23, 1997 for the transportation and discharge of waste from Alco Pacífico. Clause 11 (p. 3), (document D65) of this permit also allowed for the termination of the permit in the event of justified complaints or risk to the environment or to human life.

deny the renewal of the licenses or permits under which such transport operation was carried out. Upon the termination of Alco Pacífico's waste transportation agreement with Cytrar, PROFEPA did not make note of any breach or obligation under such agreement. Although in one of the provisions of the minutes evidencing the cessation of Cytrar's services under the agreement PROFEPA reserved its right to subsequently hold Cytrar liable "… for any hidden defects or non-performance and non-fulfillment of its obligations…",[165] no evidence has been brought forth to indicate that PROFEPA has enforced that right against Cytrar. There is no evidence that during the effective term of the agreement any actions against Cytrar were filed by the other parties to the contract for breach, whether seeking to terminate the contract on sufficient grounds as authorized by its clause 6,[166] to interrupt payments owed under the contract or to seek any other type of redress or compensation for breach of contract. There is no evidence either that Fomín, the company that under clause 5-D (p. 5) of such agreement was responsible for the supervision of Cytrar's services provided under the agreement, made any reservations, negative remarks or warnings about Cytrar's performance of its contractual obligations during the effective term of the agreement.

138. Therefore, if the level of opposition generated by the transportation and discharge by Cytrar of Alco Pacífico's waste did not trigger any decisive action by the competent federal authorities, including PROFEPA —such as revocation of the relevant permits or authorizations, the commencement of legal actions or the early termination of the agreement— to put an end to such activities and if such opposition is not of the essence in the Resolution, it is not appropriate to attribute any considerable significance to it upon taking into account and weighing factors to determine if the Resolution *per se* amounts to a violation of the Agreement.

139. Those events —not related to the transportation and discharge of Alco Pacífico's waste by Cytrar— which constitute material evidence of the opposition put up by community entities and associations to the Landfill or its operation by Cytrar, do not give rise, in the opinion of the Arbitral Tribunal, to a serious urgent situation, crisis, need or social emergency that, weighed against the deprivation or neutralization of the economic or commercial value of the Claimant's investment, permits reaching the conclusion that the Resolution did not amount to an expropriation under the Agreement and international law.

140. First of all, such opposition was mainly based —as recognized by the Respondent itself— on the site's proximity to Hermosillo's urban center and on the circumstance, not attributable to Cytrar, that the site's location violated the applicable Mexican regulations —i.e. NOM-055-ECOL-1993 issued by INE—,[167] a circumstance that was certainly known by Promotora upon selling the Landfill's assets to Cytrar and also by INE upon granting the different permits to operate the Landfill. As expressed by the Respondent, the Landfill's proximity to Hermosillo's urban center, and not concrete evidence that the Landfill's operation is harmful for the environment or public health, is the issue that concentrates the opposition of the groups that are against the Landfill. Therefore, since such groups could not obtain the Permit's revocation due to the lack of such evidence —as explained to them

[165] Document A76: Minutes executed by PROFEPA, Cytrar and Fomin on July 6, 1999. Provision 11.
[166] Agreement dated November 19, 1996, p. 6, document D64.
[167] Counter-memorial, 33, p. 9

by INE and the municipal authorities— their ultimate goal was to close down the Landfill and make Cytrar relocate its operations. SEMARNAP, INE, and the authorities of the Municipality and of the State of Sonora finally agreed with these objectives.

141. Tecmed and Cytrar were certainly aware of the existence of those regulations, but it is clear that those regulations did not apply to the Landfill, since when the Landfill was designed and built and specific technical procedures governing the Landfill's operation were established, such regulations were not effective and their application could not be retroactive, as confirmed by a note from PROFEPA to Cytrar.[168] Therefore, at the time the investment was made, Cytrar and Tecmed had no reason to doubt the lawfulness of the Landfill's location, regardless of the social and political pressure that appeared subsequently. These companies were not negligent upon analyzing the legal issues related to the Landfill's location.

142. As a result of the community pressure it ran into, Cytrar also agreed that the relocation —actively sought by the municipal and state authorities and by SEMARNAP— should take place. However, Cytrar conditioned the relocation, as was obviously to be expected from any operator of an on going business, to being able to transfer its activities to a new site. The minimum requirements for the relocation were the identification of the site, the completion of the studies to prove the site's adequacy for the landfill of hazardous waste, the acquisition of the site and the granting of the relevant authorizations and permits required to operate a hazardous waste landfill prior to closing down the Las Víboras site. As time went by, due to the growing pressure arising from the above-mentioned events and from the Mexican federal, state and municipal authorities, Cytrar or Tecmed agreed to assume a substantial portion of the cost of the acquisition and start-up of the new site as a hazardous waste landfill and of the cost of transferring the waste confined at the Las Víboras site to the new landfill site. The Mexican authorities were to find the site and issue the relevant permits, and they focused the search on the state of Sonora. An institution from Sonora, IMADES (Sonora's Environmental and Sustainable Development Institute) was in charge to look for the site. The evidence submitted has not proved that Cytrar breached, or had the intention to breach, any of its relocation commitments. In addition, there is not proof, and no evidence has been submitted, that the federal or state authorities or IMADES sent any notice to Cytrar or Tecmed demanding compliance with their relocation commitment to a concrete site identified by such authorities with or without the consent of Cytrar. Evidence is only available as to a number of sites identified by the state and federal authorities in the Municipality of Benjamín Hill which, in principle, were fit for the relocation of the Landfill, subject to the related studies. Cytrar agreed that the sites identified in such place were fit for the Landfill[169]. However, for reasons that, based on the evidence available, cannot be attributed to Cytrar, the relocation did not take place at such time or subsequently within that Municipality. Reportedly, such reasons were the community pressures that Mexican authorities did not deem advisable to contradict.[170]

[168] Note dated February 11, 1998. document D101.

[169] Counter-memorial, 270, p. 75.

[170] Opposition to the Landfill's relocation to Benjamín Hill, reportedly coming from the same groups that also opposed to the Las Víboras Landfill, continued even after the Resolution was issued, as shown by the journalistic evidence submitted: readers' opinions and articles published in Hermosillo newspaper *El Imparcial*, dated March 30, April 23, and May 4, 1999; letter from an environmental activist, Francisco

143. The evidence submitted does not lead to concluding that Cytrar's petitions to expand cell Nº 2 of the Landfill were actually a surreptitious way to postpone the relocation in order to continue operating the Landfill for the longest time possible, rather than a way to pursue an alternative solution to operating needs until the relocation was effective. In Cytrar's note to INE dated July 15, 1998,[171] in which Cytrar states the need to increase the Landfill's volume capacity by expanding cell Nº 2, Cytrar expressly relates such increase to the time required to continue operating the Landfill for a year, which was necessary for the relocation. That was precisely the minimum term estimated for that purpose by the Municipality of Hermosillo. INE never denied that that was the appropriate term to relocate nor did it state that the proposed additional landfill capacity was excessive compared to the Landfill's proposed additional term for operation by Cytrar until relocation or that it may have had the purpose of prolonging the Landfill's exploitation for a period longer than necessary –or indefinitely– to achieve such relocation. If the construction of cell Nº 3 — the authorization of which was also requested by Cytrar to INE "only in the event relocation was not completed after expanded cell Nº 2 was full"[172]— meant giving Cytrar landfill capacity at the Las Víboras site for a term longer than necessary to relocate, it would have been enough for INE to refuse to grant such authorization in order to dissuade Cytrar from delaying the relocation and it would not have been necessary for that purpose to dismiss the application for renewal of the Permit. INE, by itself or in association with IMADES, the Government of Sonora or the Municipality of Hermosillo, did not respond to the proposal included in the note dated July 15, 1998, with any other counter-offer. Until a few days before the Resolution, both Cytrar and Tecmed reaffirmed, through communications dated November 9, 12 and 17, 1998, their commitment to relocate the Landfill to any of the areas identified by the Mexican authorities and to bear the most significant costs associated with the relocation, including any costs related to the

---

Pavlovich, published in *El Imparcial* on April 16, 1999, (Press Dossier (I) exhibit A70). The same happened in connection with other places or sites located in Sonora according to the press information submitted by IMADES: note published in *El Imparcial* on March 25, 1999, about the towns of Carbó and Guaymas; notes published in *El Imparcial* on March 4 and April 15, 1999, about the town of Carbó, article published in *El Imparcial* on November 6, 1998 about the Agua Blanca site located in Benjamín Hill) (Press Dossier (I) exhibit A70). The approval by the Municipality of Benjamín Hill and the Mayor of this Municipality to commence the studies related to the identification of the site and the preliminary contract of sale of «El Pinito», a plot located in this Municipality, occurred in April 1999, i.e. quite a long time after the date of the Resolution. Such actions continue to be preparatory acts that have apparently not been implemented through concrete decisions or relocation proposals made by the authorities: Counter-memorial, 337, p. 96. On the other hand, according to the article published in *El Imparcial* on May 4, 1999, mentioned above, as well as to the article published in such newspaper on April 15, 1999, related to the construction of a landfill in "El Pinito", despite the resolutions of the authorities of Benjamín Hill, the community opposition to the relocation of the Landfill to that town continues and the issue does not seem to be definitively resolved. It is striking that as of February 22, 2000, almost a year later, the identification studies to determine whether that site would be definitely chosen by the authorities as a place fit for the relocation of the Landfill (letter of the Government of Sonora to Dra. Cristina Cortinas de Nava dated February 22, 2000, document D165) are still pending. In April 1999, IMADES had referred to another site located in Benjamín Hill, called "El Tilico". IMADES had reportedly obtained the permit of the authorities of such Municipality to construct the landfill (article published in *El Imparcial* on April 16, 1999, Press Dossier (I), exhibit A70). However, it seems that the authorities never carried this out.

[171] Document A50, 7.

[172] Cytrar's note to INE dated November 16, 1998, 5, p. 2, document A54.

construction of the new premises in the new site and the payment of part of the purchase price of the land.[173] INE and the Mexican authorities involved in the relocation arrangements did not indicate, in view of this statement and before the Resolution was issued, any site for such commitment, nor did they challenge Cytrar's technical, economic or operational capacity to fulfill its relocation commitment and operate in the new site under conditions that would guarantee the protection of the environment and the preservation of public health. The fact that such capacities were not controversial is confirmed by the fact that Cytrar and Tecmed continued negotiating to relocate the Landfill even after the Permit's renewal had been denied, at least during January 2000.[174]

144. Finally, the Respondent has not presented any evidence that community opposition to the Landfill —however intense, aggressive and sustained— was in any way massive or went any further than the positions assumed by some individuals or the members of some groups that were opposed to the Landfill. Even after having gained substantial momentum, community opposition, although it had been sustained by its advocates through an insistent, active and continuous public campaign in the mass media, could gather on two occasions a crowd of only two hundred people the first time and of four hundred people, the second time out of a community with a population of almost one million inhabitants, "… which makes it the city with the highest population in the state of Sonora".[175] Additionally, the "blockage" of the Landfill was carried out by small groups of no more than forty people.[176] The absence of any evidence that the operation of the Landfill was a real or potential threat to the environment or to the public health, coupled with the absence of massive opposition, limits "community pressure" to a series of events, which, although they amount to significant pressure on the Mexican authorities, do not constitute a real crisis or disaster of great proportions, triggered by acts or omissions committed by the foreign investor or its affiliates.

145. The fact that the real problem was the site of the Landfill and not the manner in which the Landfill was operated by Cytrar is confirmed by the fact that the Mexican federal, state and municipal authorities, including INE, did not hesitate to entrust Cytrar with the construction and operation of a new hazardous waste landfill located outside Hermosillo, with characteristics, activities and a scope apparently wider and more ambitious than the operation in Las Víboras. If these authorities had considered that Cytrar was not a suitable company to operate the Landfill in a prudent and responsible manner, and under technical conditions that ensured the protection of the environment, ecological balance and the health of the population, these authorities could not have agreed to —or even proposed— Cytrar's relocation, in good faith and without comitting a breach of their obligations. That would entail the possible and almost certain risk that Cytrar's unscrupulous and careless

[175] Counter-memorial, p. 15, 54.
[176] Hearing held from May 20 to May 24, 2002. Transcript of the session of May 20, 2002. Declaration of Javier Polanco Lavín, pp 33 overleaf, 35, 42-43; transcript of the session of May 21, 2002, declaration of José María Zapatero Vaquero, p. 57 overleaf.

action, allegedly lacking meticulousness in public relations management or in the relationship with the people, would lead to new expressions of condemnation in addition to the predictable damage to the environment and public health. This confirms that it was political pressure mainly revolving around the physical location of the site rather than a condemnation of major consequences expressed by the community or a situation originating a serious social emergency due to Cytrar's behavior that motivated the refusal to renew the Permit.

146. The situation described above is not comparable to the situation that led to the case *Elettronica Sicula S.p.A.(Elsi)*, invoked by the Respondent.[177] First, the decision of the Mayor of Palermo, which brought about the US claim against Italy filed before the International Court of Justice[178] upon ordering that the foreign investor's plant be requisitioned, is expressly based on —and the preambular clauses thereof refer to— a serious emergency and social crisis related to the closing of the plant located in Palermo, Italy (the closing down of an important job source —the second one in significance of the district— with the consequent dismissal of around one thousand workers and negative consequences on the same number of families and the Palermo community in general, which added to the suffering caused by the earthquakes that had occurred in the area a few months before).[179] This emergency was also recognized by the Palermo courts in terms of significant public hardship related to the plant's closing and of the unexpected urgent need to adopt measures to alleviate the crisis.[180] Second, the closing and mass firing of workers were directly attributable to the decision of the controlling shareholders of the company that owned the plant —i.e. the foreign investors— not to make new capital contributions or to execute the necessary bonds as security to obtain financial resources that would allow the company to stay in business.[181]

147. In this case, there are no similar or comparable circumstances of emergency**,** no serious social situation, nor any urgency related to such situations, in addition to the fact that the Mexican courts have not identified any crisis. The actions undertaken by the authorities to face these socio-political difficulties, where these difficulties do not have serious emergency or public hardship connotations, or wide-ranging and serious consequences, may not be considered from the standpoint of the Agreement or international law to be sufficient justification to deprive the foreign investor of its investment with no compensation, particularly if it has not been proved that Cytrar or Tecmed's behavior has been the determinant of the political pressure or the demonstrations that led to such deprivation, which underlie the Resolution and conclusively conditioned it. On the contrary, the commitment by such companies to relocate the Las Víboras operation to a different site, although immediately motivated in the deeply reasonable —though non-altruistic— concern of being able to continue with the commercial exploitation they were engaged in makes it clear that, objectively, such commitment was intended to make a positive contribution to mitigate the socio-political pressure and to continue providing

Mexico with hazardous waste landfill services from a new site. It should be underscored that, as argued in these arbitration proceedings, Mexico urgently needs these services due to a serious lack thereof.

148. Another factor should be added: Cytrar's operation of the Landfill never compromised the ecological balance, the protection of the environment or the health of the people, and all the infringements committed were either remediable or remediated or subject to minor penalties. The Resolution not only terminates the Permit, but also resolves to permanently close down the site at Las Víboras, and such circumstance irrefutably confirms that the problem concerned the location of the Landfill rather than Cytrar's operation of it. This is so, as such closing means that the Landfill may not be operated by Cytrar or by anyone else, even if it complied with INE's requirements as to the expansion of cell Nº 2, the prohibition to act as a transfer center or the requirements as to the type of waste to be confined or the temporary storage of such hazardous waste or any other action on which the Resolution was based. Such an extreme measure, the effects of which will have a permanent impact on the future, in view of the fact that the violations did not give rise to irreparable deficiencies in the operation of the Landfill, shows that INE concluded that the Permit granted to Cytrar should not be renewed and also that from then on nobody should be authorized to operate a hazardous waste landfill at the Las Víboras site, even if it was an operator whose behavior was so flawless that it could not give rise even to minor faults. Such conclusion was consistent with the requests of the Municipality of Hermosillo and the authorities of the state of Sonora with whom INE consulted.

149. While the Resolution is based on some of these violations to deny the renewal of the Permit, apparently through a literal and strict interpretation of the conditions under which the Permit was granted,[182] it would be excessively formalistic, in light of the above considerations, the Agreement and international law, to understand that the Resolution is proportional to such violations when such infringements do not pose a present or imminent risk to the ecological balance or to people's health, and the Resolution, without providing for the payment of compensation as required by Article 5 of the Agreement, leads to the neutralization of the investment's economic and business value and the Claimant's return on investment and profitability expectations upon making the investment. The Arbitral Tribunal does not agree with the Respondent's position denying that upon making its investment, the Claimant had legitimate reasons to believe that the operation of the Landfill would extend over the long term.[183] The political and social circumstances referred to above, which conclusively conditioned the issuance of the Resolution, were shown with all their magnitude after a substantial part of the investment had been made and could not have reasonably been foreseen by the Claimant with the scope, effects and consequences that those circumstances had. There is no doubt that, even if Cytrar did not have an indefinite permit but a permit renewable every year, the Claimant's expectation was that of a long-term investment relying on the recovery of its investment and the estimated return through the operation of the Landfill during its entire useful life.

---

[182] Counter-memorial, 314 *et. seq*., pp. 87-93; 489, p.143

[183] Closing statement of the Respondent's counsel, 124-126, pp. 65-66

150. Such circumstances are also included in the bid offer submitted by Tecmed under the bidding auction of the assets related to the Landfill, where it states that the investment will be applied for the benefit of the "...industries of the state of Sonora in the short, medium and long terms, and that to that effect no policies that might deplete the full capacity of the Landfill in the short term will be adopted...", and that "....Cytrar will increase its role as a regional plant, self-limiting its annual volume of waste acceptance from extra-regional sources to the level required to maintain a minimum profitability level ...".[184] In view of the above, it is clear the Cytrar would not have an operation level to reach a break-even point and obtain the expected rate of return in a short time. INE could not be unaware of this and of the need to act in line with such expectations to avoid rendering unfeasible any private investment of the scale required to confine hazardous waste in the United Mexican States under acceptable technical operating conditions. Both the authorization to operate as a landfill, dated May 1994, and the subsequent permits granted by INE, including the Permit, were based on the Environmental Impact Declaration of 1994, which projected a useful life of ten years for the Landfill.[185] This shows that even before the Claimant made its investment, it was widely known that the investor expected its investments in the Landfill to last for a long term and that it took this into account to estimate the time and business required to recover such investment and obtain the expected return upon making its tender offer for the acquisition of the assets related to the Landfill. To evaluate if the actions attributable to the Respondent —as well as the Resolution— violate the Agreement, such expectations should be considered legitimate and should be evaluated in light of the Agreement and of international law.

151. Based on the above; and furthermore considering that INE's actions (an entity of the United Mexican States "...in charge of designing Mexican ecological and environmental policy and of concentrating the issuance of all environmental regulations and standards")[186] are attributable to the Respondent under international law[187] and have caused damage to the Claimant, and the fact that the claim related to the violation of Article 5(1) of the Agreement attributable to the Respondent is admissible under Title II(5) of its Appendix because the date of the damage and the date on which the Claimant should have become aware of the alleged violation of Article 5(1) of the Agreement is the date of the expropriatory act —i.e. the Resolution— subsequent to the entry into force of the Agreement but always within three years before the date the request for arbitration was filed,[188] the Arbitral Tribunal finds and resolves that the Resolution and its effects amount to an expropriation in violation of Article 5 of the Agreement and international law.

[188] According to the certificate of registration issued on August 28, 2002, by the ICSID Interim Secretary-General, the Claimant's notice to commence this arbitration was received by the ICSID Secretariat on August 7, 2000. The three-year term established in Title II(5) of the Appendix to the Agreement, within which the Claimant became aware or should have become aware of the alleged violations of the Agreement on which its claims are based and of the related damage, is the period commencing on August 7 1997, and ending on August 7, 2000.

II. Fair and Equitable Treatment

152. According to Article 4(1) of the Agreement:

> Each Contracting Party will guarantee in its territory fair and equitable treatment, according to International Law, for the investments made by investors of the other Contracting Party.

153. The Arbitral Tribunal finds that the commitment of fair and equitable treatment included in Article 4(1) of the Agreement is an expression and part of the *bona fide* principle recognized in international law,[189] although bad faith from the State is not required for its violation:

> To the modern eye, what is unfair or inequitable need not equate with the outrageous or the egregious. In particular, a State may treat foreign investment unfairly and inequitably without necessarily acting in bad faith.[190]

154. The Arbitral Tribunal considers that this provision of the Agreement, in light of the good faith principle established by international law, requires the Contracting Parties to provide to international investments treatment that does not affect the basic expectations that were taken into account by the foreign investor to make the investment. The foreign investor expects the host State to act in a consistent manner, free from ambiguity and totally transparently in its relations with the foreign investor, so that it may know beforehand any and all rules and regulations that will govern its investments, as well as the goals of the relevant policies and administrative practices or directives, to be able to plan its investment and comply with such regulations. Any and all State actions conforming to such criteria should relate not only to the guidelines, directives or requirements issued, or the resolutions approved thereunder, but also to the goals underlying such regulations. The foreign investor also expects the host State to act consistently, i.e. without arbitrarily revoking any preexisting decisions or permits issued by the State that were relied upon by the investor to assume its commitments as well as to plan and launch its commercial and business activities. The investor also expects the State to use the legal instruments that govern the actions of the investor or the investment in conformity with the function usually assigned to such instruments, and not to deprive the investor of its investment without the required compensation. In fact, failure by the host State to comply with such pattern of conduct with respect to the foreign investor or its investments affects the investor's ability to measure the treatment and protection awarded by the host State and to determine whether the actions of the host State conform to the fair and equitable treatment principle. Therefore, compliance by the host State with such pattern of conduct is closely related to the above-mentioned principle, to the actual chances of enforcing such principle, and to excluding the possibility that state action be characterized as arbitrary; i.e. as presenting insufficiencies that would

---

[189] I. Brownlie, Principles of Public International Law, Oxford, 5th. Edition (1989), p. 19. It is understood that the fair and equitable treatment principle included in international agreements for the protection of foreign investments expresses "...the international law requirements of due process, economic rights, obligations of good faith and natural justice" : arbitration case *S.D. Myers, Inc.v. Government of Canada,* partial award of November 13, 2000; 134, p. 29 ; www.naftalaw.org.

[190] ICSID Arbitration no. ARB(AF)/99/2, *Mondev International Ltd v United States of America*, p.40, 116, October 11, 2002, www.naftalaw.org.

be recognized "…by any reasonable and impartial man,"[191] or, although not in violation of specific regulations, as being contrary to the law because:

...(it) shocks, or at least surprises, a sense of juridical propriety.[192]

155. The Arbitral Tribunal understands that the scope of the undertaking of fair and equitable treatment under Article 4(1) of the Agreement described above is that resulting from an autonomous interpretation, taking into account the text of Article 4(1) of the Agreement according to its ordinary meaning (Article 31(1) of the Vienna Convention), or from international law and the good faith principle, on the basis of which the scope of the obligation assumed under the Agreement and the actions related to compliance therewith are to be assessed.

156. If the above were not its intended scope, Article 4(1) of the Agreement would be deprived of any semantic content or practical utility of its own, which would surely be against the intention of the Contracting Parties upon executing and ratifying the Agreement since, by including this provision in the Agreement, the parties intended to strengthen and increase the security and trust of foreign investors that invest in the member States, thus maximizing the use of the economic resources of each Contracting Party by facilitating the economic contributions of their economic operators. This is the goal of such undertaking in light of the Agreement's preambular paragraphs which express the will and intention of the member States to "...intensify economic cooperation for the benefit of both countries..." and the resolve of the member States, within such framework, "....to create favorable conditions for investments made by each of the Contracting Parties in the territory of the other ...".

157. Upon making its investment, the fair expectations of the Claimant were that the Mexican laws applicable to such investment, as well as the supervision, control, prevention and punitive powers granted to the authorities in charge of managing such system, would be used for the purpose of assuring compliance with environmental protection, human health and ecological balance goals underlying such laws.

158. The evidence submitted reveals that when the authorities of the Municipality of Hermosillo, in the state of Sonora, of SEMARNAP and INE, perceived that the political problems mentioned above, closely related to the community opposition already described, made it necessary to relocate Cytrar's activities in the Landfill to a place outside Hermosillo, Cytrar, with Tecmed's support, agreed that its publicly known relocation proposal would become a commitment of Cytrar and of the Mexican federal, state and municipal authorities. Such evidence also shows that although Cytrar accepted or agreed to such relocation, it made it conditional upon having a new site to carry out its technical and business activities and that it expressed this condition before the Mexican authorities on several occasions. In its note dated June 25, 1998, to the President of INE, Cytrar defines the distribution of duties and obligations related to the relocation as follows:

[191] *Neer v. México* case, (1926) R.I.A.A. iv. 60.
[192] International Court of Justice Case: *Elettronica Sicula S.p.A. (ELSI) (United States of America v. Italy*), 128, p. 65, July 20, 1989, ICJ, General List No. 76.

....[Cytrar] will accept its relocation and, to that end, the municipal and state authorities will be in charge of finding, acquiring and delivering a new site, and they will also be in charge of carrying out any and all pertinent studies and of granting the related permits and licenses.[193]

159. There is no proof that INE or the state and municipal authorities challenged the distribution of the relocation obligations. Such allocation was only changed to the extent that Cytrar offered to assume a significant portion of the financial cost of the relocation. At no time, from the time the authorities communicated to the public the relocation of the Landfill to the date of the Resolution, did such authorities or IMADES express any disagreement as to conditioning the operation of the Landfill by Cytrar to the relocation of such operations to a different place, nor did they deny that the relocation was the result of an agreement with Cytrar on the basis of conditions agreed upon between Cytrar and such authorities. Dr. Cristina Cortinas Nava, INE's General Director of Hazardous Materials, Waste and Activities recognized this as follows:

......I recognize that the company stated that the relocation would take place after finding a new site. Therefore, the company expected to continue operating the Landfill at its current site until then. [...] I recognize that, and if you ask me why, then, at the time I made the decision that implied an interruption of the continuity sought by the company, why did I do it? [....] my answer is that it was because the circumstances in November were such that I am sure that if I had renewed the permit I would not have been able to guarantee to the company the continuity of its operations there. Because there were many objections to the continuity of the company's operations there.[194]

160. Cytrar may have understood in good faith that its operations at Las Víboras under the Permit would continue for a reasonable time until effective relocation. Although it is true that the relocation agreement has not been memorialized in an instrument signed by all the parties involved, the evidence submitted leads to the conclusion that there was such an agreement, as evidenced by the joint declaration of SEMARNAP, the Government of the state of Sonora and the Honorable Municipality of Hermosillo to that effect. Section 4 of such declaration states that "…the current landfill operated by CYTRAR shall be closed as soon as the new facilities are ready to operate".[195] On the other hand, the Resolution[196] itself stated that:

Furthermore, CYTRAR S.A. de C.V. agreed with the different levels of the federal, state and municipal government that the landfill would be relocated and made this agreement public.

There is no doubt that the agreement commenced to be performed, as evidenced by the joint visits of Cytrar and IMADES to sites that were possible locations for the relocated landfill. There is no evidence stating or suggesting that the parties to such agreement agreed that external factors stemming from community pressure —which the Mexican authorities were fully aware of upon reaching the agreement— would cause the closing of Cytrar's business

---

[193] Document A49. The relocation commitment project between the Mexican authorities and Cytrar referred to by the Respondent in the Counter-memorial, n. 324-329, pp. 93-94, which reportedly gives rise to a change in the allocation of obligations described above, has never been executed and was still subject to comments as of January 13, 1999. Therefore, such commitment cannot be taken into account to measure the allocation of the relocation obligations assumed by the parties in the stage prior to the issuance of the Resolution.

[194] Hearing held from May 20 to May 24, 2002; transcript of the session of May 21, 2002, pp. 77-77 overleaf.

[195] Document A88.

[196] Document A59.

at the Landfill without complying with the prior relocation of this business to another place. The incidental statements as to the Landfill's relocation in the correspondence exchanged between INE and Cytrar or Tecmed, and that constitute the immediate precedents of the Resolution, cannot be considered to be a clear and unequivocal expression of the will of the Mexican authorities to change their position as to the extension of the Permit so long as Cytrar's business was not relocated, nor can it be considered an explicit, transparent and clear warning addressed to Cytrar from the Mexican authorities that rejected conditioning the revocation of the Permit to the relocation of Cytrar's operations at the Landfill to another place, a rejection that should not have been expressed only by INE, but also by the other authorities responsible for deciding on the Landfill's relocation; i.e. the Municipality of Hermosillo, the Government of Sonora and SEMARNAP. The conclusion is that Cytrar may have reasonably trusted, on the basis of existing agreements and of the good faith principle, that the Permit would continue in full force and effect until the effective relocation date.

161. As stated above, on July 15, 1998, in a letter sent to the General Director of Hazardous Materials, Waste and Activities of INE, Dr. Cristina Cortinas Nava, Cytrar presented a number of proposals related to the expansion of cell Nº 2 and the construction of cell Nº 3 to address the company's commitments while the process to relocate its operations to a different site was carried out.[197] In spite of the urgency of the case and of the letter that Cytrar had sent to INE's President on June 25, 1998, reporting the need to increase the Landfill's capacity for those very reasons,[198] and reiterating Cytrar's commitment to relocate subject to the conditions expressed therein, INE took about three months to issue its reply to Cytrar. In its response, included in an official communication sent to Cytrar on October 23, 1998,[199] i.e. scarcely more than one month before the expiration of the Permit's term and when Cytrar had already requested the Permit's renewal in a letter sent to INE on October 19, 1998,[200] INE did not express the existence of any irregularity committed by Cytrar in the Landfill's operation or of any default by Cytrar of the conditions under which the Permit was granted that, in the opinion of INE, might jeopardize the Permit's renewal or its limited extension for a reasonable time so as to permit the relocation as proposed by Cytrar. INE could not have been unaware at the time of the existence of irregularities or infringements related to the expansion of cell Nº 2. The expansions seemed to be the biggest concern of the sectors that opposed the Landfill, as their interpretation was that the expansions, which had been communicated by PROFEPA to INE by means of an official communication received by INE on September 14, 1998,[201] were *sine die* the cause for the delay in closing the Landfill. As INE only stated that it would evaluate the request for the expansion of cell Nº 2 and construction of cell Nº 3 upon considering renewal of the Permit, without warning Cytrar of any breach or irregularity in the expansion of the Landfill's capacity that, in the opinion of INE, jeopardized the renewal of the Permit, INE significantly affected Cytrar's ability to cure such defaults or irregularities in due time and prevent the denial of the Permit's renewal upon its expiration. Although INE, in its official

[197] Letter sent to Dr. Cristina Cortinas Nava, document A50.
[198] Letter sent to Enrique Provencio, document A49.
[199] Official communication no. DOO-800/005262 of October 23, 1998, document A51.
[200] Cytrar's letter to Dr. Cristina Cortinas Nava, document A52.
[201] Document D133.

communication addressed to Cytrar on November 13, 1998,[202] in reply to the note sent by Cytrar on October 19, 1998, whereby it requested the renewal of the Permit, refers to these and other infringements, only six days before expiration of the Permit, it seems evident that, at that time, any meaningful effort to cure such infringement and prevent a denial of the permit's renewal was not feasible.

162. INE did not report, in clear and express terms, to Cytrar or Tecmed, before issuing the Resolution, its position as to the effect of these infringements on the renewal of the Permit. As a consequence, it prevented Cytrar from being able to express its position as to such issue and to agree with INE about the measures required to cure the defaults that INE considered significant when it denied the renewal without allowing a reasonable time to relocate Cytrar to another site. Providing an opportunity to Cytrar was reasonable and equitable, since at all times the parties considered that Cytrar would relocate the Landfill to another place, and such relocation and the necessity for the Landfill to continue operating at Las Víboras until the effective relocation, was the purpose of the recent correspondence exchanged between the parties. There was no disagreement that relocation could not be immediate and that it would require continued efforts, probably for many months, even for more than a year. There are clear inconsistencies or contradictions in the attitude of INE, which, on the one hand, did not challenge the technical capacity and operating qualifications of Cytrar upon entrusting it with the operation of a hazardous waste landfill that would be relocated to another site and that would operate under the more ambitious conditions —and surely with more responsibilities for the operator— of a Comprehensive Center for the Management of Industrial Waste, or CIMARI, and that, on the other hand, did not warn Cytrar about the curable defaults in its operations at Las Víboras sufficiently in advance so as to avoid the denial of the Permit's renewal. As shown, such defaults have not endangered public health, ecological balance or the environment. It should be noted that, although the official communication sent by INE to Cytrar on November 13, 1998, refers to an alleged violation by Cytrar of the specific condition 1.12 of the Permit, under which "....the presentation of repeated and justified complaints against the company or the occurrence of events due to problems in the Landfill's operation that may endanger public health...." (without going any deeper into this subject or expressly mentioning such events) are sufficient events to «*cancel*» the Permit (not to *deny its renewal*), such condition was not invoked among the grounds of the Resolution. After analyzing such inconsistencies, it may be concluded that the contradictions and lack of transparency in INE's attitudes vis-à-vis Cytrar, and the absence of clear signs from INE, did not permit Cytrar to adopt a behavior to prevent the non-renewal of the Permit, or that might at least guarantee the continuity of the permit for the period required to relocate the Landfill to a new site.

163. If INE's position was that relocation was to take place within a given period —which, as stated above, according to the Mexican authorities, should be about twelve months—[203] after the expiration of which the Permit would not be renewed, it would be reasonable to expect such situation to be reported to or agreed upon by Cytrar. Certainly, it is surprising that INE did not unequivocally and clearly specify the deadlines, terms and conditions that would apply to the relocation, as requested by the authorities of the Municipality of

[202] Document A53.
[203] Communication of the Mayor of the Municipality of Hermosillo, document D113.

Hermosillo a day before the Permit's expiration,[204] even when Cytrar and Tecmed had agreed to relocate Cytrar's business to any site selected by the Mexican authorities and regardless of the note sent by Tecmed to INE on November 17, 1998, in which Tecmed clearly requests the execution of an agreement with INE and the Mexican federal, state and municipal authorities containing a certain and specific relocation schedule.[205] There are also express inconsistencies between, on the one hand, the absence of such specifications and a notice to Cytrar warning it to agree to or abide by such conditions and, on the other hand, the use of the denial to renew the Permit as a factor to pressure Cytrar to relocate, as declared by INE's General Director of Hazardous Materials, Waste and Activities, who authored the Resolution:

> ......for them [the local authorities] if I continued renewing the Permit, that would [sic] extend ... For as long as the company could continue receiving waste, it would not assume a full commitment to perform the studies required to relocate the site ...[206]

This statement reveals the two goals pursued by INE upon issuing the Resolution. On the one hand it denies the renewal of Cytrar's Permit without any compensation whatsoever for the loss of the financial and commercial value of the investment. On the other hand, this denial is described as a means to pressure Cytrar and force it to assume a similar operation in another site, bearing the costs and risks of a new business, mainly because by adopting such course of action, INE expected to overcome the social and political difficulties directly related to the Landfill's relocation. Under such circumstances, such pressure involves forms of coercion that may be considered inconsistent with the fair and equitable treatment to be given to international investments under Article 4(1) of the Agreement and objectionable from the perspective of international law.[207]

164. If, on the other hand, INE's position was —as has actually been established— to close the Landfill inevitably, with or without relocation, INE should have expressed such position clearly. Regardless of the hypothesis contemplated, the decisive factor —for which Cytrar was not responsible— was the Landfill's location at the Las Víboras site and its proximity to Hermosillo's urban center, which was in violation of Mexican regulations and a source of community opposition and political unrest, but which was not —as confirmed by Mexican authorities— against the legitimacy of the Landfill's operation under Mexican law. If the inevitable consequence of this situation, evaluated by the Mexican authorities, was the refusal to renew the Permit and the closing of the site, such determination, from the Agreement's standpoint, should have been accompanied, as has already been decided, by the payment of the appropriate compensation. The lack of transparency in INE's behavior and intention throughout the process that led to the Resolution, which does not reflect in full the reasons that led to the non-renewal of the Permit, cover up the final and real

---

[204] Communication sent to INE's President by the Mayor of the Municipality of Hermosillo on November 18, 1998, in which the Mayor requests "the execution of a landfill relocation agreement between the Federation, the State, the Municipality and the company. A detailed, signed, legal agreement containing a schedule and fixed dates." Document D157.

[205] Document A 91.

[206] Hearing held from May 20 to May 24, 2002; transcript of the session held on May 21, 2002, p. 72.

[207] D.F.Vagts, Coercion and Foreign Investment Rearrangements, 72. The American Journal of International Law , pp. 17 *et seq*., specially p. 28 (1978) : "…the threat of cancellation of the right to do business might well be considered coercion."

consequence of such actions and of the Resolution: the definitive closing of the activities at the Las Víboras landfill without any compensation whatsoever, whether Cytrar agreed or not, in spite of the expectations created, and without considering ways enabling it to neutralize or mitigate the negative economic effect of such closing by continuing with its economic and business activities at a different place. Within the general context of the circumstances mentioned above, the ambiguity of INE's actions was even greater when it resorted to the non-renewal of the Permit to overcome obstacles not related to the preservation of health and the environment although, according to the evidence submitted, the protection of public health and the environment is where INE's preventive function should be focused. To the question about the factors or parameters that INE should take into account to decide on the renewal of authorizations such as the Permit, witness Dr. Cristina Cortina Navas answered:

> Provisions can have two different purposes: to evaluate environmental performance and to assess the management of companies. Thus, you will distinguish, among the conditions established, such conditions that allowed for the evaluation of the former and the conditions that allowed for the assessment of the latter. As regards management, there were a series of instruments, reports, records and issues that the company had to take care of. In turn, performance involved providing sufficient security that there would not be escapes, leaks or accidents during hazardous waste management, including transportation and storage. Any of these issues could be verified, and, in fact, before issuing any resolution we tried to gather all the elements necessary to be able to pass judgment on whether or not such purposes had been fulfilled.[208]

The refusal to renew the Permit in this case was actually used to permanently close down a site whose operation had become a nuisance due to political reasons relating to the community's opposition expressed in a variety of forms, regardless of the company in charge of the operation and regardless of whether or not it was being properly operated.

165. The Arbitral Tribunal considers that INE's behavior described above with respect to Cytrar, which had a material adverse effect on Cytrar's ability to get to know clearly the real circumstances on which the maintenance or validity of the Permit depended —it must be recalled that Cytrar could not operate without this Permit— is not an unprecedented action. INE's denial to renew the Permit belongs to the wider framework of the general conduct taken by INE towards Cytrar, Tecmed and, ultimately, the Claimant's investment.

166. The Arbitral Tribunal finds that INE's behavior, as analyzed in paragraphs 153-164 above and because of the "deficiencies" explained therein, conflicts with what a reasonable and unbiased observer would consider fair and equitable, and that this amounts to a violation of Article 4(1) of the Agreement. The Arbitral Tribunal also finds that such a behavior can be related, in terms of its prejudicial consequences, to the consequences of the Resolution; and that only after the Resolution was issued could the Claimant fully realize the breach of the Agreement incurred by such behavior and the resulting damage. Consequently, the Claimant's claims in connection with such behavior satisfy the requirements for admissibility contemplated in Title II(4) and (5) of the Appendix to the Agreement.

[208] *Ibidem*, pp. 68-68 overleaf

167. Notwithstanding the above, the Arbitral Tribunal considers it equally appropriate to place this behavior within the context of INE's prior conduct on the basis of the abundant arguments and evidence presented by the Parties in connection with such prior conduct and in view of the undeniable fact that the legal relationship between INE and Cytrar or Tecmed associated with the Landfill is one and only one, starting with the initial procedures in connection with the authorization to operate the Landfill and finishing with the Resolution —the immediate cause for the damage sustained by the Claimant. This conduct should also be analyzed in light of the fact that throughout a relationship of such nature, necessarily prolonged in time, the Claimant was entitled to expect that the government's actions would be free from any ambiguity that might affect the early assessment made by the foreign investor of its real legal situation or the situation affecting its investment and the actions the investor should take to act accordingly.

168. As a result of the judicial sale of the Landfill's assets, Tecmed and the Municipality of Hermosillo request from INE the "change of name" or the facilitation of such change, which, according to the administrative practice up to date, at least in connection with the Landfill, entailed the replacement of the holder of the permits necessary for the operation of the landfill at Las Víboras by such holder's successors. There is no evidence that INE has responded to such communications stating that Cytrar had actually to request a new permit, which may differ from the existing one, instead of requesting the replacement of the old holder with a new one; and no convincing evidence has been offered to support the Respondent's allegations as to the fact that, from the beginning, INE's officers instructed Cytrar to obtain a new "operating license" because, for example, as stated by the Respondent, the nature of the operation undertaken by Cytrar and the consequent expansion of the Landfill's installed capacity would so require it.[209] Among others, in the note dated June 5, 1996, sent to INE by Tecmed together with the MRP Form, containing information that INE should evaluate in connection with the individual or entity that was to be in charge of a hazardous waste landfill operation, Tecmed specifically requested from INE "...the change of the name appearing in the permit granted by INE to the new company for such purpose, CYTRAR S.A. de C.V."**.** Attached as Annex "A" to such presentation and Form, are the Establishment License granted on December 7, 1988, and the permit to operate the already existing Controlled Landfill, dated May 4, 1994, together with its expansion of August 25, 1994.[210]

169. Thus, there was no possible margin for error with respect to the request made by Tecmed and Cytrar with the support of the Municipality of Hermosillo in connection with the existing licenses or permits by virtue of which the Landfill had operated and was still operating. Considering such very clear requests, there is no evidence that INE had warned Cytrar that such requests could only be interpreted as petitions to be included in INE's listing of companies that would qualify for the operation of CIMARIS or Comprehensive Centers for Industrial Waste Management —to which the witness Jorge Sánchez Gómez, the INE's General Director of Hazardous Materials, Waste and Activities at that time[211] had made reference— or evidence of practices, resolutions or administrative regulations or legal

[209] Counter-memorial, 127, pp. 34-35
[210] Document D46
[211] Hearing held from May 20 to May 24, 2002. Transcript of the session of May 23, 2002, p. 57.

provisions leading to such sole and exclusive interpretation. On September 24, 1996, INE sent Cytrar an official communication signed by Jorge Sánchez Gómez, whereby Cytrar was informed that "In view of the request filed by the company Promotora e Inmobiliaria del Municipio de Hermosillo, OPD to change its name to Cytrar S.A. de C.V.," and considering that according to the recommendations of INE's "...Legal Affairs Department …" Cytrar had furnished "...the documents required by this General Office and had fulfilled all legal requirements that, in such Department´s understanding, are essential *for carrying out the necessary procedure,"*[212] Cytrar "... for all legal and administrative purposes..." had been "duly registered in this General Office under my charge".[213] It is not surprising that from this communication, Cytrar interpreted that INE had changed the corporate name appearing on the permits to operate the Landfill, as requested by Cytrar, Tecmed and the Municipality of Hermosillo.

170. Subsequently, it is no wonder to see Cytrar surprised when after Cytrar had been operating the Landfill under the existing permit dated May 4, 1994, in its capacity as new company authorized under the permit pursuant to INE's official communication dated September 24, 1996, as Cytrar was entitled to believe in good faith, INE demanded Cytrar to return such communication to be replaced by another, with the same date and an almost identical text, except for an annex whereby Cytrar was granted a permit to operate the Las Víboras landfill, dated November 11, 1996.[214] Such permit, in addition to terminating the prior permit dated May 4, 1994, in which Cytrar had requested the change of name, differed from the last one in some material respects. The most outstanding difference, which would only be appreciated upon refusal to renew the Permit in 1998, was that the permit of May 1994 had an indefinite duration and the permit of November 1996 had a term of one year that could be extended. As highlighted by the witness Jorge Sánchez Gómez, the purpose behind the annual renewal of permits was to facilitate INE's actions to put an end to the operations carried out by companies that, in INE's understanding, did not adjust their actions to the applicable legal provisions; the INE could refuse the extension or refuse to renew such permits at the end of each year. According to the witness, this allowed INE to dispense with the more cumbersome procedure —of uncertain success— of obtaining the revocation of the permit by PROFEPA, which required that a case be opened and that the party subject to sanctions be given the opportunity to express its argumentations and defenses:

….apparently, there is an alternative: that the agency that had to enforce the law; in this case, PROFEPA, carried out the execution. However, it was very difficult to have a company's registration withdrawn if there were no elements that would clearly allow verification of a breach. Revocation of permits is a very complicated procedure.....[215]

To emphasize INE's discretionary powers as to the continuation of Cytrar's operation of the Landfill and in accordance with INE's policy of facilitating the possibility of putting an end to such operation without having to start the proceeding to withdraw the permit, when

[212] Emphasis added by the Arbitral Tribunal
[213] Document A42
[214] Documents A43 and A44
[215] Hearing held from May 20 to May 24, 2002. Declaration of Jorge Sánchez Gómez, transcript for the session of May 23, 2002, p. 53 overleaf.

the Permit was granted —on November 19, 1997— it was determined that this Permit, instead of being "subject to extension" (as the previous permit stated), was subject to "renewal" upon request of the interested party. That is to say, it required a new permit at the end of each year, instead of extending its validity at the end of such period. In the words of the witness Jorge Sánchez Gómez:

...the notion of renewal is much easier to handle for the purpose of refusing a permit to a company that is not complying with the requirements.[216]

171. If the indefinite-duration permit dated May 4, 1994 had been transferred to Cytrar as requested to INE by Cytrar, Tecmed and the Municipality of Hermosillo, INE would not have been able to put an end to Cytrar's operation of the Landfill by means of the Resolution and the only remedy available for that purpose would have been the revocation of the Permit by PROFEPA. But such revocation would probably have not been successful on the basis of the infringements of the Permit used to justify the Resolution, which were not even considered by PROFEPA as deserving any sanction other than a fine. To sum up, INE unilaterally transformed a previous administrative act, which, as such, was presumed to be legitimate, had immediate effects and could only be interpreted in good faith as having accepted Cytrar's petition to be the transferee of the existing permits for the operation of the Landfill. The objective consequence of such transformation was to grant Cytrar a permit to operate the Landfill, which reduced Cytrar's entitlement to question actions that deprived it of the Permit or that had such effect. Subsequently, INE —also unilaterally— classified the petition as a request to be registered in a listing that Cytrar was not aware of, and regarding which, in any case, Cytrar had shown no interest. The same objective consequence is to be attributed to the transformation as from November 19, 1997, of Cytrar's permit to operate the Landfill, from a permit that was subject to extension to a permit that was subject to renewal.

172. The contradiction and uncertainty inherent in INE's actions as to Cytrar and Tecmed is evidenced, then, both in the initial stage of the processing of the necessary permits to operate the Landfill and when INE decided to put an end to such operation by means of the Resolution. Such actions belong to one and the same course of conduct characterized by its ambiguity and uncertainty which are prejudicial to the investor in terms of its advance assessment of the legal situation surrounding its investment and the planning of its business activity and its adjustment to preserve its rights. Such ambiguity and uncertainty are also present in the last stage of the relationship, analyzed under paragraphs 153-164 above, which led to the Resolution, and added their harmful effects to the damage resulting from the denial to grant the Permit. Although INE's initial behavior was before the effective date of the Agreement and the Arbitral Tribunal will not pass judgment on whether at that stage such conduct, considered in isolation, amounted to a breach of the provisions thereof before its entry into force, it cannot be ignored, in light of the good faith principle (Articles 18 and 26 of the Vienna Convention), that the conduct of the Respondent between the date of execution of the Agreement (in view of the Respondent's determination to ratify it subsequently) and the effective date thereof, is incompatible with the imperative rules deriving from Article 4(1) of the Agreement as to fair and equitable treatment. This is

[216] Transcript of the session of May 23, 2002, p. 59 overleaf.

particularly so since, according to Article 2(2) of the Agreement, it is applicable to investments made before its entry into force, a circumstance to be certainly considered when analyzing the conduct attributable to the Respondent that took place before that time but after the Respondent having executed the Agreement. INE's contradictory and ambiguous conduct at the beginning of the relationship between INE, Cytrar and Tecmed before the entry into force of the Agreement has the same deficiencies as those encountered in such conduct during the last stage of the relationship, immediately preceding the Resolution. Thus, INE's conduct during such time is added to the prejudicial effects of its conduct during the last stage, which breached Article 4(1) of the Agreement.

173. Briefly, INE's described behavior frustrated Cytrar's fair expectations upon which Cytrar's actions were based and upon the basis of which the Claimant's investment was made, or negatively affected the generation of clear guidelines that would allow the Claimant or Cytrar to direct its actions or behavior to prevent the non-renewal of the Permit, or weakened its position to enforce rights or explore ways to maintain the Permit. During the term immediately preceding the Resolution, INE did not enter into any form of dialogue through which Cytrar or Tecmed would become aware of INE's position with regard to the possible non-renewal of the Permit and the deficiencies attributed to Cytrar's behavior —including those attributed in the process of relocation of operations— which would be the grounds for such a drastic measure and, thus, Cytrar or Tecmed did not have the opportunity, prior to the Resolution, to inform of, in turn, their position or provide an explanation with respect to such deficiencies, or the way to solve such deficiencies to avoid the denial of renewal and, ultimately, the deprivation of the Claimant's investment. Despite Cytrar's good faith expectation that the Permit's total or partial renewal would be granted to maintain Cytrar's operation of the Landfill effective until the relocation to a new site had been completed, INE did not consider Cytrar's proposals in that regard and not only did it deny the renewal of the Permit although the relocation had not yet taken place, but it also did so in the understanding that this would lead Cytrar to relocate.

174. Such behavior on the part of INE, which is attributable to the Respondent, results in losses and damage[217] for the investor and the investment pursuant to Title II(4) of the Appendix to the Agreement coinciding both as to essence and time with those derived from the Resolution, whether such behavior is considered generically or only as to the stages mentioned and analyzed by the Arbitral Tribunal in paragraphs 153-164 above. The Respondent's behavior in such stages amounts, in itself, to a violation of the duty to accord fair and equitable treatment to the Claimant's investment as set forth in Article 4(1) of the Agreement and such behavior constitutes sufficient basis for the Claimant's claims founded on such violation to be admissible, given the time at which the damage occurred and the time when the damage and the violation of the Agreement were necessarily perceived by the Claimant (on the date of issuance of the Resolution), pursuant to Title II(4) and (5) of the Appendix to the Agreement.

III. Full Protection and Security and Other Guarantees under the Agreement

[217] "Damage" is not limited to the economic loss or detriment and shall be interpreted in a broad sense (J. Crawford, The International Law Commission's Articles on State Responsibility, 29-31 (Cambridge University Press, 2002).

175. The Claimant alleges that Mexican municipal and state authorities encouraged the community's adverse movements against the Landfill and its operation by Tecmed or Cytrar, as well as the transport by Cytrar of Alco Pacífico's waste. Further, the Claimant alleges that Mexican authorities, including the police and the judicial authorities, did not act as quickly, efficiently and thoroughly as they should have to avoid, prevent or put an end to the adverse social demonstrations expressed through disturbances in the operation of the Landfill or access thereto, or the personal security or freedom to move about of the members of Cytrar's staff related to the Landfill. It is the opinion of the Claimant that such behavior of the Mexican authorities, attributable to the Respondent, amounts to a violation of Article 3(1) of the Agreement, which provides that:

Each Contracting Party shall accord full protection and security to the investments made by the other Contracting Party's investors, in accordance with International Law and shall not, through legally groundless actions or discriminatory measures, hinder the management, maintenance, development, usage, enjoyment, expansion, sale, or, where applicable, disposition of such investments.

176. The Arbitral Tribunal considers that the Claimant has not furnished evidence to prove that the Mexican authorities, regardless of their level, have encouraged, fostered, or contributed their support to the people or groups that conducted the community and political movements against the Landfill, or that such authorities have participated in such movement. Also, there is not sufficient evidence to attribute the activity or behavior of such people or groups to the Respondent pursuant to international law.

177. The Arbitral Tribunal agrees with the Respondent, and with the case law quoted by it, in that the guarantee of full protection and security is not absolute and does not impose strict liability upon the State that grants it. At any rate, the Arbitral Tribunal holds that there is not sufficient evidence supporting the allegation that the Mexican authorities, whether municipal, state, or federal, have not reacted reasonably, in accordance with the parameters inherent in a democratic state, to the direct action movements conducted by those who were against the Landfill. This conclusion is also applicable to the judicial system, in relation to the efforts made to take action against the community's opposing demonstrations or to the attempt to reverse administrative measures which were deemed inconsistent with the legal rules applicable to the Landfill, such as the withdrawal by the Hermosillo's Municipal authorities of the license to use the Landfill's site.

178. Promotora's behavior, or INE's behavior attributable to the Respondent, regarding the sale of the assets related to the Landfill, the commitments undertaken in connection with such sale or the grant of the Permit to operate of November 11, 1996, and preceding events, all took place prior to the entry into force of the Agreement. With respect to Promotora, such behavior has not been considered by the Arbitral Tribunal due to the reasons described in paragraph 92 of this award, and will not be analyzed, even if it were hypothetically attributable to the Respondent, to determine whether there has been a violation of Article 3(1) of the Agreement or not.

179. With regard to INE's behavior prior to the entry into force of the Agreement, described above, and the subsequent stages following such date, the Arbitral Tribunal does

not consider, even at the time of its consummation and turning point —the refusal to renew the Permit— that such behavior has no legal grounds under Mexican law or that such behavior is discriminatory, as required by Article 3(1) of the Agreement in order to constitute a violation. The Arbitral Tribunal has not found that INE's denial to renew the Permit violated any Mexican laws or was issued beyond the Mexican legal framework. As provided below, the Arbitral Tribunal has not verified, either, the existence of discriminatory treatment detrimental to the Claimant in violation of the national and foreign treatment guarantees also set forth in the Agreement. Therefore, the Arbitral Tribunal considers that neither the Resolution nor the Respondent's behavior leading to such Resolution amount to a violation of Article 3(1) of the Agreement.

180. According to Article 4(2) of the Agreement, each Contracting Party guarantees the foreign investor a treatment that should not be less favorable... "than that accorded under similar circumstances [...] to investments made in its territory by investors from a third State". Pursuant to Article 4(5) of the Agreement, each Contracting Party, "In accordance with the restrictions and methods provided by the local laws [...] shall accord to the investments made by the other Contracting Party's investors a treatment that should not be less favorable than the treatment afforded to its own investors…". The Arbitral Tribunal observes, however, in its post-hearing brief, when referring to the alleged breach of the Agreement, that the Claimant omits any statement regarding the violation of the guarantees of non-discriminatory treatment (national or accorded to investors from a third State) provided in Articles 4(2) and (5) of the Agreement, which are not even mentioned, though the Claimant does sustain its allegations relative to the breach attributable to the Respondent of Articles 3 and 5 of the Agreement as alleged by the Claimant in the request for arbitration.[218]

181. In any case, the Arbitral Tribunal does not consider that the behavior attributable to the Respondent, to the extent such behavior commenced prior to the entry into force of the Agreement and was accomplished after such date, or occurred following the entry into force, such as, for instance in the latter case, the issuance of the Resolution, amounts to violations to the guarantee of national or foreign treatment set forth by the provisions of the Agreement referred to above. The Claimant has failed to furnish convincing or sufficient evidence to prove, at least *prima facie*, that the Claimant's investment received, under similar circumstances, less favorable treatment than that afforded to nationals of the State receiving the investment or of a third State, or that said investment was subject to discriminatory treatment upon the basis of considerations relative to nationality or origin of the investment or the investor. The Arbitral Tribunal further considers that the alleged discriminatory treatment attributed by the Claimant to the Respondent on the grounds of the unlimited duration of operation permits or licenses granted to Residuos Industriales Multiquim S.A. de C.V. (RIMSA), which would be owned by a foreign investor,[219] or to prior operators or owners of the landfill, all of which were government entities of the state of Sonora,[220] occurred and were entirely isolated events taking place prior to the

[218] Claimant's post-hearing brief, pp. 104-126.
[219] Memorial, p. 124.
[220] Memorial, p. 26

Agreement's entry into force, and will not be considered by this Arbitral Tribunal as stated in paragraph 67 of this arbitration award.

182. With regard to other forms of discrimination apparently originated in the allegedly different treatment accorded by INE to RIMSA's and Claimant's investments, the Arbitral Tribunal holds that the Respondent has furnished satisfactory evidence —not rebutted by the Claimant on this point— of the fact that the circumstances under which RIMSA's investment was made and concerning such investment materially differed from the investment in the Landfill. Thus, it is not possible to establish standards which allow a comparison of the treatment accorded to the investment in RIMSA's landfill and the investment in the Landfill. Further, it is the opinion of this Arbitral Tribunal that the Respondent has not breached Article 2(1) of the Agreement with respect to the promotion and admission of foreign investments, and that no evidence of such violation has been submitted; it being also relevant to point out that the Claimant itself has stated that if such violation existed, it should be the subject matter of a direct claim between the Contracting Parties[221] of the Agreement. The Arbitral Tribunal also holds that the denial of the Permit's renewal does not amount to a violation of Article 3(2) of the Agreement, pursuant to which each Contracting Party "within the local legal framework" shall grant the necessary permits with regard to the investments from the other Party, as the Arbitral Tribunal considers that there is no evidence proving the fact that INE's denial of the Permit is contrary to Mexican laws.

F. Compensation. Restitution in kind.

183. The Claimant's claim for compensation or restitution in kind is based upon the provisions of Title VII(1) of the Appendix to the Agreement, which contemplates those two options. The Claimant requests restitution in kind —which the Claimant considers "absolutely impossible"— only secondarily, as the Claimant primarily seeks monetary damages.[222] The Arbitral Tribunal considers that monetary damages paid to the Claimant as compensation for the loss of the investment constitutes an adequate satisfaction of the Claimant's claim under the Agreement. Therefore, and taking into account that the Claimant primarily seeks monetary damages, the Arbitral Tribunal will not consider the admissibility or inadmissibility of the restitution in kind in this case.

184. The Claimant calculates the amount to be paid as monetary damages under the discounted cash flow calculation method by which the Claimant intends to determine the Landfill's market value. Upon the basis of the report issued by the expert witness appointed by the Claimant, the amount to be paid as damages as of the date of the expropriation —November 25, 1998—totals US$ 52,000,000, plus interest. The Claimant further claims compensation for the damage allegedly caused to the Claimant's reputation, with arbitration costs to be borne by the Respondent.

185. The Respondent objects to the application of a discounted cash flow analysis, as the Respondent considers such calculation method to be highly speculative given the short term

---

[221] Memorial, p. 93.
[222] Memorial, pp. 142 – 144.

during which the Landfill operated as an on going business (about two years and a half), thus preventing the application of sufficient historical data to prepare the reliable estimates required by such calculation methodology. The Respondent has proposed the calculation of damages based on the investment made, upon which the investment's market value would be determined. In any case, the Respondent's expert witness challenges the discounted cash flow calculation methodology —as applied by the Claimant's expert witness— with regard to various aspects, including the price, costs, and market condition estimates, the failure to compute certain costs, such as remediation and maintenance of closed cells, and the discount rate applied by the Claimant's expert witness. Also, the Respondent's expert witness offers its own analysis under the discounted cash flow methodology, which in an "optimistic" version as such expert witness puts it, would be calculated in the amount of US$ 2,100,000 for the investment, and according to a "conservative" version such amount would total US$ 1,800,000.

186. The Arbitral Tribunal has noted both the remarkable disparity between the estimates of the two expert witnesses upheld throughout the examination directed by the parties and the Arbitral Tribunal at the hearing held on May, 20-24, 2002, and also the considerable difference in the amount paid under the tender offer for the assets related to the Landfill —US$ 4,028,788—[223] and the relief sought by the Claimant, amounting to US$ 52,000,000, likely to be inconsistent with the legitimate and genuine estimates on return on the Claimant's investment at the time of making the investment. The non-relevance of the brief history of operation of the Landfill by Cytrar —a little more than two years— and the difficulties in obtaining objective data allowing for application of the discounted cash flow method on the basis of estimates for a protracted future, not less than 15 years, together with the fact that such future cash flow also depends upon investments to be made —building of seven additional cells— in the long term, lead the Arbitral Tribunal to disregard such methodology to determine the relief to be awarded to the Claimant.[224]

187. In Article 5.2, the Agreement provides that, in the event of expropriation, or any other similar measure or with similar effects:

> Compensation shall be equivalent to the fair market value of the expropriated investment immediately before the time when the expropriation took place, was decided, announced or made known to the public (...) valuation criteria shall be determined pursuant to the laws in force applicable in the territory of the Contracting Party receiving the investment.

Also, Article 10 of the Mexican Federal Law on Expropriation provides that the applicable compensation shall indemnify for the commercial value of the expropriated property, which in the case of real property shall not be less than the tax value. There has been no evidence or allegations as to the interpretation of this rule in light of Mexican laws.

---

[223] Report by Fausto García y Asociados, p. 22

[224] Award of ICSID case No. ARB (AF)/97/1 *Metalclad Corporation v. United Mexican States*, 16 Mealey's International Arbitration Report, p. A-1 *et. seq*.; pp. A-14/A-15, 119-122 (2000). Award in case *Phelps Dodge Corp. and Overseas Private Investment Corp. v. The Islamic Republic of Iran*, 10 Iran-U.S. Claims Tribunal Reps., p. 121 *et. seq*.; 30, pp. 132-133 (1986-1); award of ICSID case No. ARB/98/4, *Wena Hotels v. Arab Republic of Egypt*, 41 I.L.M. 896 (2002), 122-125, pp. 918-919, award of December 8, 2000.

188. The Arbitral Tribunal considers that compensation to be awarded pursuant to such parameters —that is, the market value of the Landfill— shall be the total compensation for all the violations to the Agreement proved in this award, which, in relation to the Claimant, have the damaging effect of depriving the Claimant of its investment.

189. It is not in dispute that the assets forming the Landfill are owned by the "Tecmed Group", which belongs to the Actividades, Construcciones y Servicios group and thus has the Claimant as its parent corporation, into which, under Spanish accounting standards, the accounts of Tecmed and Cytrar are consolidated.[225] According to Articles 1(1)(b) and (2)(e) of the Agreement, the Claimant —the foreign investor— is the owner of the foreign investment in Mexico through the Claimant's subsidiaries. The Respondent has recognized that:

> The TECMED group, through the Mexican company TECMED, TECNICAS MEDIOAMBIENTALES DE MEXICO, S.A. de C.V., presently has the following environmental facilities in Mexico (in addition to the landfill, CYTRAR and its administrative offices).....[226]

It is also undisputed, at least after Cytrar obtained the permit from INE to operate the Las Víboras Landfill, that the related assets indirectly held by the Claimant constitute a hazardous waste landfill,[227] i.e. an integrated unit comprising tangible and intangible assets, including the Permit and other permits or licenses to operate as a hazardous waste landfill. Such unit must be valued by this Arbitral Tribunal upon rendering its award. Therefore, the Arbitral Tribunal concludes that the deprivation of the financial and business use of the Landfill's operation arising from the Respondent's actions and in violation of the Agreement has caused damage to the Claimant and its investment in the Landfill. Therefore, the Claimant is entitled to receive compensation in accordance with the provisions of the Agreement and on the basis of the market value of the assets the Claimant has been deprived of.

190. The Arbitral Tribunal also considers that, although the Arbitral Tribunal may consider general equitable principles when setting the compensation owed to the Claimant, without thereby assuming the role of an arbitrator *ex aequo et bono,*[228] the burden to prove the investment's market value alleged by the Claimant is on the Claimant. Such burden is transferred to the Respondent if the Claimant submits evidence that *prima facie* supports its allegation, and any difficulty in determining the compensation does not prevent the assessment of such compensation where the existence of damage is certain.[229]

(1982), 77-78 p.1016 ; specially No.78 : "It is well known that any estimate in purely monetary terms of amounts intended to express the value of an asset, of an undertaking, of a contract, or of services rendered, must take equitable principles into account". To the same effect, award in the case *Himpurna California Energy Ltd. (Bermuda) v. PT (Persero) Perusahaan Listruik Negara (Indonesia),* 14 Mealey's International Arbitration Report, A-1 *et seq*. 441, p. 129 [A-44] (1999).
[229] ICSID case ARB/84/3, *Southern Pacific Properties (Middle East) Limited v Arab Republic of Egypt*, 8 ICSID Law Review-Foreign Investment Law Journal, p. 389, 215 (1993).

191. The Parties have not raised any dispute as to the fact that this market value is defined as the fair value of the transaction on an arms' length basis, where both parties to the transaction have knowledge of the applicable circumstances.[230] The Respondent acknowledges that the price obtained in a public tender "…is an efficient manner to determine the price of the assets sold...".[231] The Claimant has not challenged this allegation. The Arbitral Tribunal finds that upon the 1996 sale the Landfill's market value was US$ 4,028,788, and will take that figure as the starting point for a subsequent analysis. The Arbitral Tribunal also finds, on the basis of the evidence submitted, that the existence of a market supported by a sufficient number of similar transactions that may be used as a guide to determine the Landfill's market value as of November 25, 1998, has not been established.

192. In the task of establishing the market value as of such date —the moment when the expropriatory act occurred—, the Arbitral Tribunal will also take into account other factors in accordance with the practice of international arbitral tribunals in similar cases.

193. For such purposes and on the basis of Article 5(2) of the Agreement, although the Arbitral Tribunal will consider the existence of community pressure against the location of the Landfill at its current place and that such pressures and the location would have jeopardized the operations of the Landfill in the long run, the Arbitral Tribunal will not necessarily take into account the actions or determinations of the Mexican authorities that, echoing the community sentiment, in turn exerted pressure on Cytrar for it to relocate or that are part of the Respondent's actions considered to be in violation of the Agreement in this award or that contributed to the damage resulting from such violations,[232] and that may have an adverse effect on valuation of the compensation. Upon weighing such community pressure, the Arbitral Tribunal cannot ignore the relocation commitment assumed by Cytrar, supported by Tecmed, the performance of which would have mitigated or eliminated such pressure, and whose non-performance is not attributable to Cytrar or Tecmed, nor the responsibilities of the Municipality of Hermosillo and of INE, as the case may be, that were involved in the sale of the site to Cytrar or that authorized Cytrar to operate the site under the premise that its location was legitimate despite the fact that it did not comply with Mexican laws. Such legitimacy was terminated by the Resolution which, in practice, ignored such legitimacy in order to address social and political factors against such location.

194. The Arbitral Tribunal will also take into account the additional investments made as from the Landfill's acquisition until the date of the Resolution and will consider that Cytrar has contributed management and client development elements that caused, among other things, a 39% increase in the Landfill's operation by 1997, excluding the activities related

to Alco Pacífico,[233] and that also produced net income in the second year of operations, i.e. during a stage of entry into and consolidation in the market at the beginning of its operations. It cannot be denied that the investment in the Landfill was productive and added value to the former Landfill's operations as well as goodwill, nor can it be denied that the Claimant was deprived of its investment's profits, and value added and goodwill, or that the Claimant's losses also include lost profits. As acknowledged by the Respondent itself, this operation almost did not exist for a long time before Cytrar's acquisition of the Landfill and, in the short periods in which it did exist, such activities were reduced in scope from a financial and business standpoint.[234] It is logical to understand that, as activities increased due to Cytrar's operations, this increase must have required additional investments. Although upon assessing the Landfill's market value two of the nine cells of the Landfill were full, thus reducing the original landfill capacity from nine to seven cells, it must also be taken into account that the increased productivity of the Landfill was evidenced after Cytrar took over the Landfill's operation. Such increased productivity is necessarily based on Cytrar's managerial and organizational skills and on gaining new clients, to the extent that the Respondent is willing to acknowledge at least net income for one additional year for an amount of US$ 314,545.[235] On the basis of these considerations, it is legitimate to conclude that the Landfill's market value as of November 25, 1998, could not be lower than the acquisition price paid by Cytrar.

195. On the basis of its own valuation, taking into account the Landfill's market value of US$ 4,028,788 upon its acquisition and adding the investments made thereafter according to Cytrar's financial statements for 1996, 1997 and 1998, and the profits for two years of operation following the Resolution date, the Arbitral Tribunal finds that such market value as of November 25, 1998, was US$ 5,553,017.12.[236] Although the Claimant's expert witness assessed the value of such additional investments at US$ 1,951,473,[237] no documentary evidence has been filed to support such amount, and such evidence has not been alleged by the Claimant in its closing statement. The Respondent challenges such amount in its closing statement on the basis of accounting data by comparing the fiscal years mentioned above, and estimates such amount to be US$ 439,000.[238] This amount has been accepted by the Arbitral Tribunal. Regarding the profits for the two additional years of operation, the Arbitral Tribunal has calculated such profits at the amount of US$ 1,085,229.12. For this, the Arbitral Tribunal has considered that an informed buyer of the Landfill would have assumed that it had to be relocated due to the community pressure and that such relocation might take about two years. In such calculation, the Arbitral Tribunal has further considered that the projections clearly stated that Cytrar was increasing its

[233] Report of Fausto García y Asociados, p. 26.
[234] Respondent's brief "Admissions and Denials", p. 12.
[235] Counter-memorial, 598, p. 171.
[236] The Arbitral Tribunal finds that the Claimant has made its compensation claim in US dollars (memorial, p. 146), and that such claim has not been challenged by the Respondent, who also uses such currency in its allegations to denominate the amounts to which it resorts to challenge the Claimant's claims. The expert witnesses for both parties also translate into such currency the figures they use for their analyses. Therefore, the Arbitral Tribunal makes its determination in US dollars.
[237] Hearing held from May 20 to May 24, 2003; transcript for the session of May 23, pp. 7 overleaf / 8.
[238] Respondent's closing statement added by expert witness Lars Christianson, taken into account by the Arbitral Tribunal as a part of such closing statement according to the Arbitral Tribunal's decision of August 12, 2002, p. 8.

revenues, the value of its clientele and goodwill as an on going business related to the Landfill exploitation, and the other considerations included in this Chapter F, particularly the circumstances explained in paragraphs 189-190 and 193-194, which, in the opinion of the Arbitral Tribunal, cannot be ignored upon establishing the economic compensation owed to the Claimant for the loss of the market value of its investment. The Arbitral Tribunal finds that it is not appropriate to deduct from such amount, which also reflects the principle that compensation of such loss must amount to an integral compensation for the damage suffered, including lost profits,[239] the cost of closing down the Landfill due to a decision attributable to the Respondent that the Arbitral Tribunal has found to be in violation of the Agreement.

196. The Claimant requests that any compensation awarded to it accrue compound interest at a rate of 6%.[240] The Arbitral Tribunal has not found any specific allegation by the Respondent regarding this point. The application of compound interest has been accepted in a number of awards, and it has been stated that:

…compound (as opposed to simple) interest is at present deemed appropriate as the standard of international law in […] expropriation cases.[241]

In connection with this case, in the opinion of the Arbitral Tribunal, application of compound interest is justified as part of the integral compensation owed to the Claimant as a result of the loss of its investment.

197. Therefore, the amount of US$ 5,533,017.12 will accrue interest at an annual rate of 6%, compounded annually, commencing on November 25, 1998, until the effective and full payment by the Respondent of all amounts payable by the Respondent to the Claimant under this award.[242]

198. The Arbitral Tribunal finds no reason to award compensation for moral dammage, as requested by the Claimant,[243] due to the absence of evidence proving that the actions attributable to the Respondent that the Arbitral Tribunal has found to be in violation of the Agreement have also affected the Claimant's reputation and therefore caused the loss of business opportunities for the Claimant. In addition, the Arbitral Tribunal has not found that the adverse press coverage for Tecmed or Cytrar of the events regarding the Landfill,

was fostered by the Respondent or that it was the result of actions attributable to the Respondent.

199. Promptly after effective payment to the Claimant of all sums payable to it by the Respondent under this award, the Claimant shall take all the necessary steps to transfer, or cause to be transferred, to the Respondent, or to a nominee designated by the Respondent, the assets forming the Landfill.

200. Taking into account that the Claimant has been successful only with respect to some of its claims and that the challenges or defenses filed by the Respondent were also admitted partially, each Party will bear its own costs, expenses and legal counsel fees. The costs incurred by the Arbitral Tribunal and ICSID will be shared equally between the Claimant and the Respondent.

G. Decision

201. Therefore, the Arbitral Tribunal finds as follows:

1. The Respondent has breached its obligations under the Agreement set forth in Articles 4(1) and 5(1).

2. The Respondent will pay the Claimant the amount of US$ 5,533,017.12, plus a compound interest on such amount at an annual rate of 6%, commencing on November 25, 1998, until the effective and full payment by the Respondent of all amounts payable by the Respondent to the Claimant under this award.

3. Promptly after effective and full payment to the Claimant of all sums payable to it by the Respondent under this award, the Claimant shall take all the necessary steps to transfer, or cause to be transferred, to the Respondent, or to a nominee designated by the Respondent, the assets forming the Landfill.

4. Each Party will bear its own costs, expenses and legal counsel fees. The costs incurred by the Arbitral Tribunal and ICSID will be shared equally between the Claimant and the Respondent.

5. Any claim or petition filed in this arbitration and not admitted herein will be considered rejected.

VII. DECISION OF THE TRIBUNAL ON LIABILITY 80

I. THE PARTIES

1. Claimants, LG&E Energy Corp. and LG&E Capital Corp. are corporations created and existing under the laws of the Commonwealth of Kentucky, in the United States of America, with domestic and foreign operations.[1] LG&E International Inc. is a corporation organized and existing under the laws of the State of Delaware, United States of America. Claimants hereinafter will be referred to collectively as "LG&E" or "Claimants."

2. LG&E has a shareholding interest in three local, gas distributing companies in Argentina created and existing under the laws of Argentina by commandment of the Argentine Government: Distribuidora de Gas del Centro ("Centro"), Distribuidora de Gas Cuyana S.A. ("Cuyana") and Gas Natural BAN S.A. ("GasBan"), hereinafter collectively referred to as "the licensees". LG&E owns a controlling equity interest in Centro and minority equity interests in GasBan and Cuyana.

3. Respondent is the Argentine Republic, which along with the United States of America, is a party to the Convention on the Settlement of Investment Disputes between States and Nationals of other States ("ICSID Convention" or "Convention"), ratified by the Argentine Republic in 1994 and by the United States of America in 1966. The Bilateral Investment Treaty between the United States of America and the Argentine Republic Concerning the Reciprocal Encouragement and Protection of Investments was signed on 14 November 1991 ("BIT", "the Bilateral Treaty" or the "Treaty") (and entered into force on 20 October 1994).

---

[1] Until 1 December 2005, Claimants were LG&E Energy Corp., LG&E Capital Corp. and LG&E International Inc. However, on 26 January 2006, Claimants informed the Tribunal that the name of two of the companies had been modified: LG&E Energy Corp. is now E.ON.US LLC and LG&E Capital Corp. is now E.ON.US. Capital Corp. LG&E International Inc. kept its name. Upon request by the Tribunal, LG&E submitted documents that, in the Tribunal's opinion, only prove the change of name but not its effects. Respondent remained silent on this issue.

II. THE ARBITRAL TRIBUNAL

4. On 31 January 2002 the Centre's Secretary-General registered Claimants' Request for Arbitration in accordance with Article 36(3) of the ICSID Convention. In accordance with Rule 7 of the Rules of Procedure for the Institution of Conciliation and Arbitration Proceedings ("the Institution Rules"), the Secretary-General gave notice to the parties of the registration of Claimants' Request and invited them to constitute an Arbitral Tribunal as soon as possible.

5. Forthwith, the parties agreed that the Arbitral Tribunal should be formed by three arbitrators, one appointed by the Claimants, another by the Argentine Republic and the third one, called to preside over the Tribunal, would be appointed by the Centre's Secretary-General in accordance with the method agreed upon by the parties.

6. On 20 June 2002, the Claimants appointed Professor Albert Jan van den Berg, a national of the Netherlands, as an arbitrator for this case. Said appointment was ratified by the Claimants by letters to the Centre dated 15 and 28 August 2002. The Argentine Republic, by letter dated 26 August 2002, appointed Judge Francisco Rezek, a Brazilian citizen, as an arbitrator. On 7 November 2002, the Centre's Secretary-General, with the parties' agreement, appointed Dr. Tatiana B. de Maekelt, a citizen of Venezuela, as the Arbitral Tribunal's President.

7. On 13 November 2002, the ICSID's Secretariat, in accordance with Rule 6(1) of the Rules of Procedure for Arbitration Proceedings ("Arbitration Rules"), notified the parties that all the arbitrators had accepted their appointments and that the Tribunal was deemed to be constituted and the proceeding deemed to begun as from that date. On this same day, in accordance with Rule 25 of the ICSID Administrative and Financial Regulations, the parties were informed that Dr. Claudia Frutos-Peterson would act as the Tribunal's Secretary.

III. PROCEDURAL BACKGROUND

8. On 28 December 2001, ICSID received from LG&E a request for arbitration dated 21 December 2001 against the Argentine Republic.

9. By letter dated 24 January 2002 the Claimants filed with ICSID a supplement to their request for arbitration. Claimants asserted that Respondent had committed further violations of the BIT as a result of the enactment by the Government of the Public Emergency and Currency Exchange Law ("Emergency Law"), which allegedly adversely affected Claimants' investment in Argentina.

10. In accordance with Arbitration Rule 13, the Tribunal held its first session with the parties at the seat of the Centre in Washington D.C. on 19 December 2002. The parties agreed to set the following schedule for the written proceedure: Claimants were to file a Memorial on 31 March 2003. Upon receipt of Claimants' Memorial, Respondent could choose to file an answer within either 60 or 90 days. In its answer, Respondent was entitled to file exceptions on jurisdiction, and to the extent it deemed necessary, could respond to Claimants' arguments on the merits. In the event that the Respondent filed a Memorial on Jurisdiction, the Claimants were to file their Counter-Memorial on Jurisdiction within 30 days from their receipt of the Respondent's Memorial on Jurisdiction, followed by Respondent's Reply on Jurisdiction within 20 days following receipt of Claimants' Counter-Memorial on Jurisdiction, and Claimants' Rejoinder on Jurisdiction to be filed 20 days from receipt of the Respondent's Reply on Jurisdiction.

11. With respect to oral proceedure, it was also agreed during the first session to set the following schedule based on the written submissions. In the event that Respondent filed its answer within 60 days and if the Tribunal decided so, there was to be a hearing on jurisdiction between 22 and 23 September 2003. In the event that Respondent filed its answer within 90 days, the hearing on jurisdiction, if the Tribunal were in agreement, was to be held on 20 and 21

October 2003. The hearing on the merits was scheduled for 8 through 12 March 2004.

12. The Claimants filed their Memorial on 31 March 2003.

13. Subsequently, under covenant, the parties decided to amend the schedule of proceedings concerning the objections to jurisdiction. Respondent and Claimants informed the ICSID Secretariat of this amendment on 1 and 2 July 2003, respectively. Under the new schedule, Respondent's Memorial on Jurisdiction was to be filed on 21 July 2003; Claimants' Counter-Memorial on Jurisdiction, on 29 August 2003; Respondent's Reply on Jurisdiction, on 22 September 2003, and Claimants' Rejoinder on Jurisdiction, on 13 October 2003. It was also agreed that the hearing on jurisdiction was to be held on 20 and 21 October 2003, but subsequently, the Tribunal, in joint agreement with the parties, decided that the hearing on jurisdiction should be held between 20 and 21 November 2003, at The Hague, Netherlands.

14. In accordance with the terms set, on 21 July 2003, Respondent formally filed objections to ICSID's jurisdiction. In its Memorial on Jurisdiction, Respondent presented the grounds upon which it based said objections and attached documents in support of its arguments. On 29 August 2003, Claimants filed their Counter-Memorial on Jurisdiction. On 22 September 2003, the Argentine Republic filed its Reply on Jurisdiction, and on 14 October 2003, Claimants filed their Rejoinder on Jurisdiction.

15. On 30 October 2003, Respondent filed a motion to suspend the proceedings and requested, as an alternative measure, a stay of the hearing on jurisdiction. On 31 October 2003, the President of the Tribunal asked Claimants to submit their comments on said motion by 3 November 2003. On 3 November 2003, the Claimants filed an objection to the stay motion. On 5 November 2003, the members of the Arbitral Tribunal deliberated on the Argentine Republic's motion and denied Respondent's motions to suspend these proceedings and stay the hearing on jurisdiction scheduled for

20 and 21 November 2003.

16. The hearing on jurisdiction was held on the date set, at the seat of the Permanent Court of Arbitration in The Hague, the Netherlands. Messrs. Eugene D. Gulland and Oscar M. Garibaldi of the law firm of Covington & Burling from Washington, D.C. acted as counsel for the Claimants. Also present at the hearing were Ms. Dorothy O'Brien, Deputy General Counsel for LG&E Energy Corp. and Mr. S. Bradford Rives, Chief Financial Officer of LG&E Energy Corp.

17. Messrs. Carlos Ignacio Suárez Anzorena and Ignacio Pérez Cortés, on behalf of Dr. Horacio Daniel Rosatti, the then-Procurador del Tesoro de la Nación Argentina, atended the hearing on behalf of the Respondent.

18. During the hearing, the parties presented their arguments on the jurisdictional issues. The Tribunal posed questions to the parties in accordance with Rule 32(3) of the Arbitration Rules.

19. On 30 April 2004, the Tribunal issued its Decision on Objections to Jurisdiction, holding that the present dispute is within the jurisdiction of the Centre and the competence of the Tribunal. In so holding, the Tribunal considered the following criteria:

a. That the dispute should be between a Contracting State and a national of another Contracting State and that Claimants should have *jus standi* to act in these proceedings;

b. That the issue should be a dispute of a legal nature arising directly from an investment;

c. That the parties should have given their consent, in writing, to submit to arbitration and, specifically to the ICSID arbitration; and

d. That all the other requirements of both the ICSID Convention and the Bilateral Treaty should be met in order to submit a dispute to arbitration.

20. With respect to criteria (a), regarding *jus standi*, the Tribunal was of the opinion that, for purposes of the ICSID Convention and the Bilateral Treaty, Claimants should be considered foreign investors, even though they did not directly operate the investment in the Argentine Republic, but acted through companies constituted for that purpose in its territory (Decision on Jurisdiction, ¶ 63).

21. With respect to criteria (b), which requires that the issues before the Tribunal be a dispute of a legal nature arising directly from an investment, the Tribunal concluded that, at the jurisdictional phase, it was to be presumed that Claimants' claims were based on alleged breaches of the Bilateral Treaty affecting Claimants' investments within the meaning of the ICSID Convention and the Bilateral Treaty (Decision on Jurisdiction, ¶ 66).

22. With respect to criteria (c), requiring the consent of the parties to submit the dispute to ICSID arbitration, the Tribunal was of the opinion that the Argentine Republic's consent was given through Article VII(4) of the Bilateral Treaty. In turn, when Claimants resorted to ICSID, they decided to submit their investment disputes to the Centre's jurisdiction. It is noteworthy, in this case, that Claimants did not submit the dispute to the Argentine courts or to any other dispute settlement mechanism mentioned in Article VII of the Bilateral Treaty. For this reason, no question regarding the "fork in the road" provision arises in the present case (Decision on Jurisdiction, ¶ 69 *et. seq*.).

23. Finally, with respect to criteria (d), concerning verification of the other requirements of the ICSID Convention and the Bilateral Treaty, the Tribunal concluded that the claims are not time barred, and that the claims asserted in the additional request filed by Claimants are sufficiently sequential to the originally stated claims as to permit their review by this Tribunal for the sake of efficiency. The fact that the license holders may have begun negotiations with Respondent is outside this arbitral proceeding, inasmuch as the license holders, which are different legal entities, are pursuing that process from

their own (corporate) perspective. Thus, in view of the fact that more than six months elapsed from the date on which the dispute arose, i.e. 24 January 2002, there is no bar in initiating the arbitral proceedings (Decision on Jurisdiction, ¶ 80 *et. seq*.).

24. Based on these considerations, the Tribunal:

 a. Held that the present dispute is within the jurisdiction of the Centre and the competence of the Tribunal;

 b. Dismissed all of the Respondent's objections as to the admissibility of the dispute and all of the Respondent's objections to the jurisdiction of ICSID and the competence of this Tribunal;

 c. Ordered, pursuant to Rule 41(4) of the Arbitration Rules, the continuation of the proceeding;

 d. Reserved all questions concerning the costs and expenses of the Tribunal and the parties for future determination.

25. In accordance with Procedural Order No. 1 dated 4 May 2004, Respondent filed its Counter-Memorial on the merits on 18 June 2004, seeking dismissal of LG&E's claims. On 6 August 2004, Claimants filed their Reply.

26. Respondent filed its Rejoinder on the merits on 27 September 2004, in which it asked the Tribunal, among other legal and factual arguments, to exclude Claimants' witness, Mr. Patricio Perkins, from the hearing on the merits on grounds of an alleged conflict of interest. Claimants objected to Respondent's motion to exclude the witness on 1 November 2004.

27. By means of Procedural Order No. 3, dated 23 November 2004, the Arbitral Tribunal decided (i) to admit the witness depositions offered by Respondent; (ii) to grant Claimants the opportunity to offer additional evidence regarding the witness depositions produced by Respondent in its Rejoinder, at the latest on 20 December 2004 and to cross-examine said witnesses during the hearing on the merits; (iii) to admit the testimony of Mr. Patricio Perkins,

subject to cross-examination by Respondent.

28. In accordance with Procedural Orders Nos. 4 and 5, dated 13 and 18 January 2005, respectively, the hearing on the merits was held between 23 and 29 January 2005, at the seat of the Centre in Washington, D.C. The following persons were present at that hearing:

Arbitral Tribunal:

Tatiana B. de Maekelt, President

Francisco Rezek, Arbitrator

Albert Jan van den Berg, Arbitrator

Secretary of the Tribunal:

Claudia Frutos-Peterson

Counsel for Claimants:

Oscar M. Garibaldi (Covington & Burling, Washington, D.C.)

Eugene D. Gulland (Covington & Burling, Washington, D.C.)

Eric D. Brown (Covington & Burling, Washington, D.C.)

Miguel López Forastier (Covington & Burling, Washington, D.C)

Marcelo Masonni: (Embassy of the Argentine Republic, Washington, D.C.)

Court Reporters:

David A. Kasdan

Dante Rinaldi

29. The hearing commenced, as scheduled on Sunday, 23 January 2005 at 8:45 a.m. After a brief introduction by the Tribunal's President, Claimants' counsel, Messrs. Eugene Gulland and Oscar Garibaldi, made their oral presentation to the Tribunal, referring to the arguments indicated in their briefs. They also presented their witnesses for oral examination: Messrs. S. Bradford Rives, Eduardo A. Hurtado, Patricio Carlos Perkins, Rudolf Dolzer, Eduardo Schwartz, Carlos Lapuerta, Antoni Peris Mingot, and Jose E. Álvarez.

30. Thereafter, Messrs. Osvaldo César Guglielmino, Ignacio Pérez Cortés and Gabriel Bottini made their submissions on behalf of the Argentine Republic. The following witnesses testified on behalf of Respondent: Ms. Anne-Marie Slaughter and Messrs. Eduardo A. Ratti, Jorge G. Simeonoff, Cristian Folgar, Nouriel Roubini and Fabián Bello.

31. On 28 February 2005, the parties submitted Post-Hearing Briefs.

32. By letter dated 18 May 2005, the Tribunal informed the parties of its decision to appoint an independent expert to assist the Tribunal in evaluating the expert financial evidence. By letter of 14 September 2005, the ICSID Secretariat transmitted the report on the findings of the independent expert to the parties and invited them to comment on the report by 5 October 2005. The parties filed their observations with the Tribunal on that date.

IV. FACTUAL BACKGROUND

33. Before considering the merits of the dispute, the Tribunal deems it necessary to set forth the facts that it considered relevant for its decision.

A. LATE 1980S AND 1990S

34. The present claims are to be viewed against the historic background and

especially the economic upheaval in Argentina and the Government's reaction to the several economic crises suffered by the country in the late 1980s and 1990s.

35. In the late 1980s, Argentina underwent an economic crisis characterized by deep recession and hyperinflation. As part of its economic recovery plan, the Government began an ambitious privatization program with the enactment of the State Reform Law in August 1989. Within this framework, large Government-owned businesses and entities were privatized or granted on concession (Respondent's Counter-Memorial, ¶121).

36. One March 27, 1991, Argentina enacted Law No. 23,928, referred to as the *Convertibility Law*, which ordered the implementation of a fixed exchange rate, pegging the *austral* (the then-Argentine currency) to the United States dollar.[2] The Convertibility Law also banned price or value indexation.

37. One of the primary goals of the Government's plan was the privatization of *Gas del Estado S.E.*, the national natural-gas transport and distribution monopoly. Pursuant to the Government's privatization plan, investors could purchase shares in newly-formed, licensed private corporations that would offer gas transport and distribution services. Such shares were available to domestic and foreign investors.

38. To implement its plan, the Government enacted in June 1992, the *Ley del Gas* ("Gas Law"), which established a comprehensive regulatory structure for the provision of natural-gas transport and distribution services, and created a public agency, called *Ente Nacional Regulador del Gas* (ENARGAS) to oversee the industry.

39. The Gas Law adopted a tariff structure under which ENARGAS would collect tariffs on the price of gas paid by consumers. Under the provisions of

the Gas Law, ENARGAS was required to set the transport and distribution tariffs at fair and reasonable levels that would allow licensed utility providers to recoup a "reasonable rate of return," after accounting for costs, defined as a rate similar to that applied to activities of similar risk and adequately related to the level of efficiency and satisfactory performance of the transport or distribution service. Profitability was to be measured against other activities of comparable risk.

40. ENARGAS was to set maximum tariffs for a period of five years. At the end of the five-year period, the tariffs were to be reviewed and adjusted based on international market indicators that reflected changes in the value of the goods and services representative of the activities of service providers.

41. The Gas Law was implemented by regulations adopted on 28 September 1992 by Decree No. 1738/92. Pursuant to these regulations, transport and distribution tariffs were to be calculated in U.S. dollars and then expressed in Argentine pesos, and the Government could not rescind or modify the licenses without the consent of the licensees.

42. On 7 December 1992, the Government adopted Decree No. 2255/92, called *Reglas Básicas de la Licencia* (Basic Rules of the License), which supplemented the Gas Law and the above-mentioned regulation and approved prototype licenses for natural-gas transport and distribution. The prototype licenses included a schedule of the maximum tariffs for the first five-year period (1993-1997) of service. The Basic Rules of the License obligated the Government to compensate the licensees fully for any losses resulting from changes to the guaranteed tariff system. The Basic Rules of the License also implemented the semi-annual tariff review based on the U.S. Producer Price Index ("PPI"), to be conducted in January and June of each year ("PPI adjustment").

---

[2] The *austral* later was replaced by the *peso* at the rate of 1,000 *australs* to 1 *peso*.

43. Under this framework comprised of the Gas Law, its regulations and Basic Rules of the License, the five-year review was to be a comprehensive review of the method used to calculate tariffs.

44. By Decree No. 1189/92, published on 17 July 1992, Argentina approved the procedure for the privatization of *Gas del Estado S.E.* It was restructured into two distinct transport business units and eight separate distribution business units, each responsible for a geographic region of the country. Each of the ten business units were transferred to the newly-created companies, which were to operate with a license under the legal framework in force.

45. An international bidding process was set in place by Resolution No. 874/92 issued by the Ministry of Public Works and Services and conducted pursuant to the *Pliego de Bases y Condiciones para la Licitación* ("Bidding Rules"). Under these Bidding Rules, both foreign and domestic investors were free to bid on the shares. The purpose of the Bidding Process was the purchase and sale of the majority interest in each of the licensed companies created by Decree No. 1189/92. Three of those majority interests were sold during that bidding process: 60% of Cuyana's shares, 70% of GasBan's shares, and 90% of Centro's shares.

46. In December 1992, the Argentine Government awarded the contracts for the purchase of the majority of shares in the ten newly-formed licensees into which *Gas del Estado S.E.* had been restructured. The licenses relevant to this dispute were approved by Decrees Nos. 2454/92 for Centro, 2460/92 for GasBan and 2453/92 for Cuyana, and became effective on 22 December 1992.

47. The blocks of shares of Centro, GasBan and Cuyana that were subject to privatization were awarded to private investors: 90% of the shares of Centro were awarded to a consortium formed by *Società Italiana Per Il Gas S.p.A.* ("Italgas"), an Italian company, and *Sideco Americana S.A.*, an Argentine company ("Sideco"); 70% of the shares of GasBan were awarded to a

consortium formed by *Gas Natural SdG S.A.*, a Spanish company, *Compañía General de Combustibles S.A.* and *Manra S.A.*, both Argentine companies; and 60% of the shares of Cuyana were awarded to a consortium formed by Italgas and Sideco.

48. Three Argentine investment companies were created as vehicles for the acquisitions: (i) *Inversora de Gas del Centro S.A.* to acquire the privatized shares of Centro; (ii) *Invergas S.A.* to acquire the privatized shares of GasBan; and (iii) *Inversora de Gas Cuyana S.A.* to acquire the privatized shares of Cuyana. The successful bidders or their affiliates became shareholders of the respective investment companies, which then entered into Transfer Agreements with the Respondent concerning the shares subject to this arbitration.

49. The privatization scheme created by Respondent targeted foreign investors because foreign capital was deemed essential for the successful operation of the Government's economic recovery plan. Foreign investors were encouraged to purchase shares with guarantees, such as tariffs calculated in U.S. dollars, automatic and periodic adjustments to the tariffs based on the PPI, a clear legal framework that could not be unilaterally modified, and the granting of "licenses" instead of "concessions" with a view to offering the highest degree of protection to prospective investors.

50. As part of its marketing efforts, Argentina distributed an Information Memorandum in foreign markets, including the United States and Europe. The Information Memorandum summarized the legal framework governing the privatization, the terms and conditions for the bidding, the bidding process and the legal and the regulatory framework that would apply to the new industry after privatization. The information in the memorandum concerning the privatization, prepared and distributed by investment banks, contained descriptive information and included disclaimers to discourage investors from relying solely on the information therein.

51. During this period, Argentina undertook to provide enhanced legal protection to investors so as to attract foreign investment in support of its privatization scheme. The Respondent ratified several treaties relating to international investment obligations, such as the ICSID Convention and a great number of bilateral investment treaties, including the Argentina-U.S. Bilateral Investment Treaty at issue in this dispute. As mentioned above, the Convertibility Law, which pegged the peso to the U.S. dollar, was also enacted at this time.

52. In reliance on the legal guarantees offered by the Argentine Government for the privatized energy industry, and based on its positive prior experience investing in the privatized Argentine gas market in 1992, Claimants chose to purchase shares of three licensed companies in the gas-distribution market. In February 1997, LG&E purchased a 45.9% interest in Centro and a 14.4% interest in Cuyana. In March 1999, LG&E purchased a 19.6% interest in GasBan.

53. From 1993 until the end of 1999, Claimants agree that the gas-distribution licensees and Respondent abided by their respective obligations under the licenses and law governing the privatization scheme. According to Claimants, the licensees invested heavily in Argentina's natural-gas-distribution infrastructure. GasBan invested about US$372 million in a new plant and equipment, even though originally required to invest US$90.9 million; Centro invested US$92 million, although originally required to invest US$10 million; and Cuyana invested more than US$120 million, although originally required to invest US$10 million. In return, Argentina honored the provisions of the licenses and other legal obligations, including the semi-annual tariff adjustment under the PPI indicator, and calculation of the tariffs in U.S. dollars.

B. Economic Crisis and the Emergence of the Dispute – 1999-2001

54. A new economic crisis developed in Argentina in the late 1990s. In the third

quarter of 1998, the Argentine economy plunged into a period of recession that was to last four years and triggered, in Respondent's opinion, the worst economic crisis since Argentina's inception in 1810 (Respondent's Counter-Memorial, ¶ 782).

55. In 1999, Argentina's Gross Domestic Product ("GDP") decreased causing a dramatic fall in domestic prices. Private consumption and investments began falling in August 1998 and Argentina entered a deflationary period. The period was marked by widespread decline in the value of assets located in Argentina. By the end of the 1990s, many economists considered the peso as overvalued, and predicted that the currency board would have to be abandoned, which would inevitably devalue the peso. Argentina's country risk premium increased, gradually excluding the country from the international credit market. These economic indicators were accompanied by social problems –unemployment, poverty and indigence levels began to increase. On 10 December 1999, Mr. Fernando de la Rúa took office as the President of Argentina. His administration tried to maintain the peg of the Argentine peso to the U.S. dollar as mandated by the Convertibility Law.

56. Against this background, public services rates, as specified in the contracts, were due to be adjusted in January 2000 based on the PPI. At the time, the United States was experiencing a high inflationary period, while Argentina was experiencing a significant deflationary period. As established in the Gas Law, the tariffs were to be adjusted to reflect changes in the cost structure of utility providers (Gas Law, Article 41). Argentina considered that the pending tariff adjustments based on the U.S. rate were unreasonable because they would result in a significant increase in utility rates within a recessionary and deflationary context.

57. Argentina met with the gas-distribution licensees to discuss a temporary suspension of the semi-annual tariff adjustments. Two agreements that the Government and the licensees entered in 2000 formed part of Claimaints' original claim submitted to this arbitration.

58. On 6 January 2000, the Government and the licensees entered an agreement (*Acta Acuerdo*) whereby the licensees agreed to a one-time, six-month postponement of the tariff adjustment due in January 2000. Pursuant to the agreement, the tariffs would be recovered with interest from 1 July 2000 to 30 April 2001. Therefore, through resolutions published on 10 January 2000, ENARGAS approved the tariff effective as from 1 January 2000 without the PPI adjustment. The ENARGAS resolutions provided that the legal regime governing the tariffs would remain intact.

59. During the first six months of 2000, the situation in the Argentine economy continued to deteriorate. The semi-annual PPI adjustment would have forced a second tariff increase in a continued deflationary period. Although the licensees had agreed to only one-time tariff adjustment postponement, the Government urged the gas-distribution licensees to accept a second postponement of the tariff adjustments; including the previously postponed adjustments that were scheduled to be recovered beginning on 1 July 2000 in accordance with the *Acta Acuerdo* of 6 January 2000.

60. On 17 July 2000, by Decree No. 669/00, effective 4 August 2000, the licensees and the Government agreed to a second postponement of the tariff adjustments until 30 June 2002. Pursuant to the agreement, a stabilization fund would be created to recover the postponed amounts, subject to certain ceilings and floors, with interest. As with the previous agreement, this agreement reaffirmed the Government's commitments and guarantees provided to the licensees and their investors under the legal structure created for the privatization of the gas industry, specifically recognizing the enforcement of Argentina's bilateral investment treaties and the semi-annual PPI adjustments as an integral component of the tariff system.

61. On 3 August 2000, the Argentine National Ombudsman filed a lawsuit in an Argentine Federal Court, seeking an injunction against the operation of Decree No. 669/00. On 18 August 2000, the Court issued an order provisionally enjoining the application of Decree No. 669/00 and of the

agreement of 17 July 2000. On 5 October 2001, the Court of Appeal ratified the order and the case is presently pending before the Supreme Court (Respondent's Counter-Memorial, ¶ 255).

62. ENARGAS declared in November 2001 that no further adjustments to the tariffs would be approved until final judgment in the lawsuit. No further adjustments to the tariffs have occurred to date.

C. THE EMERGENCY LAW – 6 JANUARY 2002

63. Argentina's crisis deepened at the end of 2001. The Government experienced increased difficulties in repaying its foreign debt. As poverty and unemployment soared, Argentines feared that the Government would default on its debt and immobilize bank deposits. Therefore, savings were massively withdrawn from the banks. In response, the Government issued Decree No. 1570/01, known as "*Corralito,*" on 1 December 2001, restricting bank withdrawals and prohibiting any transfer of currency abroad. Amid widespread discontent and public demonstrations, including violence that claimed tens of lives, President De la Rúa and his Cabinet resigned on 20 December 2001. A succession of presidents took office and quickly resigned.

64. Finally, President Eduardo Duhalde took office and implemented a new economic plan, which contained measures that form the additional claim submitted by Claimants. On 6 January 2002, Congress enacted Law No. 25,561, the Public Emergency and Foreign Exchange System Reform Law (known as "the Emergency Law"). The Emergency Law abrogated the Convertibility Law so that the one-to-one peg of the Argentine peso to the United States dollar no longer existed. The Emergency Law provided for the switch into Argentine pesos of debts owed to the banking system, debts arising from management contracts governed by public law, and debts under private agreements. The law further provided for the renegotiation of private and public agreements to adapt them to the new exchange system.

65. The Emergency Law adopted measures modifying public-service contracts, such as establishing that tariffs and prices for public services were to be calculated in pesos, instead of U.S. dollars; abolishing all clauses calling for tariff adjustments in U.S. dollars or other foreign currencies; eliminating all indexing mechanisms; and directing the Executive Branch to renegotiate all public-service contracts.

66. By Presidential Decree No. 214 of 3 February 2002, the Government adopted a currency conversion scheme under which all obligations payable in dollars existing on the date of enactment of the Emergency Law would be converted into pesos at the fixed one-to-one exchange rate.

67. The switch into Argentine pesos, also called "pesification," which affected the entire Argentine economy, was characterized by Respondent as a necessary process to return the country to the path of economic stability.

D. RENEGOTIATION OF THE PUBLIC SERVICE CONTRACTS

68. On 12 February 2002, Argentina announced the renegotiation of all public service contracts. By Decree No. 293/02, licenses for transport and distribution of natural gas were subject to mandatory renegotiation by a Renegotiation Committee within the Ministry of Economy. Under the Decree, the Government could either sign a renegotiated agreement or rescind the contract. By Resolution No. 38/02, issued on 9 March 2002, ENARGAS was ordered to discontinue all tariff reviews and to refrain from adjusting tariffs or prices in any way.

69. After enactment of the Emergency Law, the licensees and the Argentine Executive launched three initiatives to implement an emergency increase in the natural gas and electricity tariffs. Each of these initiatives was successfully challenged by consumer organizations and ombudspersons in the Argentine judiciary and consequently did not become effective. The Argentine Government attempted twice more in 2003 to obtain tariff

increases through Presidential Decrees but both these efforts were also quashed by the judiciary.

70. On 25 May 2003, a new Argentine President, Dr. Néstor Kirchner, took office after a popular election was held on 26 April 2003, replacing the transition authorities that had been appointed by the Argentine Congress. Respondent states that with the new administration, a period of institutional stabilization at the federal level began (Respondent's Counter-Memorial, 317).

71. By Presidential Decree No. 311/03, published on 4 July 2003, and Law No. 25,790, passed on 22 October 2003, the Argentine Government extended the renegotiation process. Centro, Cuyana and GasBan have been involved in the renegotiation process under threat of rescission of contract. During the renegotiation process, the Government has not offered to restore the legal guarantees that were eliminated by the Emergency Law, or compensate Claimants for any losses incurred.

E. Request for Relief

72. Bearing in mind the background already described, Claimants request the following relief (Request for Arbitration, ¶ 111 as revised in Claimants' Memorial at ¶ 208):

(i) Declaring that the Respondent has breached its obligations under Article II(2)(c) of the Bilateral Treaty by failing to observe obligations that it entered into with regard to the Claimants' investment;

(ii) Declaring that the Respondent has breached its obligations under Article II(2)(a) of the Bilateral Treaty by failing to accord to the Claimants' investment fair and equitable treatment and by according treatment less than that required by international law;

(iii) Declaring that the Respondent has breached its obligations under Article II(2)(b) of the Bilateral Treaty by taking

arbitrary and discriminatory measures that impair the use and enjoyment of the Claimants' investment;

(iv) Declaring that the Respondent has breached Article IV(1) of the Bilateral Treaty by indirectly expropriating the Claimants' investment without complying with the requirements of the Bilateral Treaty, including observance of due process of law and payment of prompt, adequate, and effective compensation;

(v) Ordering the Respondent to pay the Claimants full compensation in the amounts set forth in the Memorial, plus pre- and post-award compound interest;

(vi) Ordering the Respondent to pay all costs and expenses of this arbitration proceeding, including the fees and expenses of the Tribunal and the cost of the Claimants' legal representation, plus interest thereon in accordance with the Bilateral Treaty; and

(vii) Such other or additional relief as may be appropriate under the Bilateral Treaty or may otherwise be just and proper.

73. According to Claimants' Reply (¶ 287), the relief they seek is stated as follows:

1. Finding the Argentine Republic to be in breach of its obligations under the Treaty;

2. Ordering the Argentine Republic to pay LG&E: (i) compensation in the amounts specified in Part VI of [the] Reply; (ii) all costs and fees of the arbitration, including reasonable attorneys' fees; and (iii) compound interest on the monetary award from the date of the award until the date of actual payment; and

3. Ordering such additional relief as may be appropriate under the applicable law or otherwise just and proper.

74. The monetary relief sought by Claimants is US$ 248 million or, if the Tribunal concludes that there was expropriation, US$ 268 million, plus compound pre-award and post-award interest and costs.

75. Respondent denies that it has violated the Treaty and seeks an order from

this Tribunal dismissing LG&E's claims and holding LG&E liable for costs. In asserting its defense, Respondent contends in the alternative that the circumstances warrant application of the state of necessity defense, thus exempting it from liability for any Treaty violations.

V. PRELIMINARY MATTERS

76. In the analysis below, the Tribunal has not only considered the positions of the parties as summarized in the various sections above, but also their numerous detailed arguments in support of those positions as well as the arguments made at the hearing. To the extent that these arguments are not referred to expressly, they must be deemed to be subsumed in the analysis below.

A. JUS STANDI

77. With respect to *jus standi*, the Tribunal re-affirms its conclusions adopted in the Decision on Objections to Jurisdiction of 30 April 2004. As determined in the Decision on Jurisdiction, the Centre has jurisdiction over LG&E's claims and this Tribunal is competent to decide on Claimants' claims.

78. Argentina continues to argue that this Tribunal shall only have jurisdiction if Argentina's non-compliance with an international obligation is verified (Respondent's Rejoinder, ¶ 521(a)). Pursuant to the Tribunal's Decision on Jurisdiction issued on 30 April, 2004, the Tribunal deems that all the obligations in discussion are international because they relate to the Treaty. Thus, LG&E's minority-shareholder status has no bearing on its standing to bring these claims or on the Tribunal's competence to rule upon them.

79. It should be pointed out that, as this Tribunal stated in the Decision on Jurisdiction, the subject matter of this arbitration focuses on the investments made by LG&E in the Argentine licensees. Accordingly, the Tribunal has insisted on the independent treatment of LG&E regarding the licensees, both from the point of view of the legal personality of each entity and from the

actions of each. This does not mean, however, that certain actions of the licensees, by the fact that they are the investment's beneficiaries, may have, in some cases, effects on the investment itself. For such reasons, on occasion, the Tribunal shall be bound to refer to the licensees and their actions without implying a reference to LG&E. One should bear in mind that the recognition of the independence among these entities was the basis on which the jurisdiction of the Centre and the competence of the Tribunal were supported.

B. LAW APPLICABLE

1. Parties' Positions

80. The Claimants argue that their claims asserted arise under the Treaty. The law that applies to the dispute is therefore the Treaty and general international law. Claimants contend that this approach comports with the first part of Article 42(1) of the ICSID Convention. In Claimants' view, Argentine law merely establishes a factual predicate for the claims under the Treaty and general international law (Claimants' Memorial, ¶¶ 155-56).

81. Respondent does not deny the application of the Bilateral Treaty to this dispute, but argues that in the absence of an agreement on the applicable law, the relationship between LG&E and the Argentine Government should be subject to the second part of Article 42(1) of the ICSD Convention, which establishes the precedence of sources of law; therefore, the Argentine law should be applied first. Respondent asserts that "where an investor makes an investment in a State it is subject –as are local investors– to the laws of the country where the investment is made" (Respondent's Counter-Memorial, ¶ 25). Argentina stresses the insufficiency of the Treaty to govern the dispute at issue, particularly in light of the substantive framework regarding the foreign investment's treatment under Argentine law.

2. Tribunal's Analysis

82. In accordance with Article 42(1) of the ICSID Convention:

> "(1) The Tribunal shall decide a dispute in accordance with such rules of law as may be agreed by the parties. In the absence of such agreement, the Tribunal shall apply the law of the Contracting State party to the dispute (including its rules on the conflict of laws) and such rules of International Law as may be applicable."

83. This rule grants the parties' autonomy in choosing the law applicable to the substance of the dispute in an arbitration administered by ICSID. If no applicable law is chosen, the Tribunal must resort to the second sentence of Article 42(1).

84. It is evident that the parties hereto had not agreed on the applicable law in this dispute. This is usually found in the investment agreement, though this does not hold in this case. Nor is there any express reference to the applicable law in other documents related to the investment by LG&E, a fact that would result in the application of the second part of Article 42(1).

85. It is to be noted that the Argentine Republic is a signatory party to the Bilateral Investment Treaty, which may be regarded as a tacit submission to its provisions in the event of a dispute related to foreign investments. In turn, LG&E grounds its claim on the provisions of the Treaty, thus presumably choosing the Treaty and the general international law as the applicable law for this dispute. Nevertheless, these elements do not suffice to say that there is an implicit agreement by the Parties as to the applicable law, a decision requiring more decisive actions. Consequently, the dispute shall be settled in accordance with the second part of Article 42(1).[3]

86. In addition to the indication of the applicable law, there are two other

---

[3] Schreuer, Christoph, *The ICSID Convention: A Commentary,* Cambridge University Press, 2001, p. 573.

concepts embedded in the second part of Article 42(1) which deserve comment —the references to private international law and to the rules of international law "as may be applicable".

87. As to the reference to the private international law, the Tribunal has not found in the ICSID records any case in which the Arbitral Tribunal has resorted to the rules of conflict of law of the State party to the dispute. It has been so observed in the *Amco v. Indonesia* case, in which the Arbitral Tribunal, presided by Berthold Goldman, affirmed that it did not deem it necessary to enter into a discussion on the rules of conflict, inasmuch as the parties make constant references to the law of the State party in the dispute and, moreover in "the dispute before the Tribunal relating to an investment in Indonesia, there is no doubt that the substantive municipal rules of law to be applied by the Tribunal are to drawn from Indonesian Law."[4] The Tribunal in this case shares the same criterion.

88. With reference to the rules of international law and, particularly, to the language "as may be applicable," found in Article 42(1) of the ICSID Convention, the Tribunal holds the view that it should not be understood as if it were in some way conditioning application of international law. Rather, it should be understood as making reference, within international law, to the competent rules to govern the dispute at issue.[5] This interpretation could find support in the ICSID Convention's French version that refers to the rules of international law "*en la matière.*"[6]

[5] *"It simply means that the relevant rules of international law are to be applied."* Schreuer, Cristoph, *The ICSID Convention…op.cit.,* p. 622.

[6] *Convention CIRDI, Art. 42: "(1) (1) Le Tribunal statue sur le différend conformément aux règles de droit adoptées par les parties. Faute d'accord entre les parties, le Tribunal applique le droit de l'Etat contractant partie au différend—y compris les règles relatives aux conflits de lois—ainsi que les principes de droit international* ***en la matière***" (emphasis added). In: *http://www.worldbank.org/icsid/basicdoc-fra/partA-chap04.htm#s03*.

89. Likewise, applying the rules of international law is to be understood as comprising the general international law, including customary international law, to be used as an instrument for the interpretation of the Treaty. For example, where a term is ambiguous, or where further interpretation of a Treaty provision is required, the Tribunal will turn to its obligations under Articles 31and 32 of the Vienna Convention on the Law of Treaties, signed in 1969.

90. Having made this part clear, the Tribunal proceeds to analyze the extension of the remission to the domestic law contained in the second part of Article 42(1), whereby the Tribunal shall apply "the law of the Contracting State Party to the dispute…" The Argentine doctrine contributes to gaining insight into the remission's scope: "the situation is much clearer by virtue of the incorporation of the international law to the Argentine law and the hierarchical relation conferred by the 1994 constitutional reform to international treaties in Article 75, paragraph 22,[7] of the National Constitution."[8]

91. The Tribunal notes that as part of the Argentine legal system, the Bilateral Treaty prevails over domestic law, "especially, inasmuch as in most of the Bilateral Treaty's assumptions there is an express mention of international law, be it when referring to the treatment to be given to investments, or to the compensation in the event of expropriation or any other like measure, etc."[9]

92. This interpretation has been accepted in Argentina "as long as the litigation is linked to the violation of the BIT [bilateral investment treaty] and of international law and not to the mere pretensions of infringement of a local

---

[7] "… the treaties and concordats are hierarchically superior than laws …"

contract and as the parties should have not provided expressly the law applicable to the first of said disputes, the decision shall be governed by the ICSID Convention, by the BIT and applicable international law. Thus, the BIT becomes the *lex specialis* regarding disputes appearing in matters of investment between the foreign investor and the Host State."[10]

93. It is this Tribunal's opinion that obviating application of international law, specifically of the ICSID Convention and the Bilateral Treaty, would entail ignoring the fact that "international treaties move away from the principle according to which foreign investment is subject to the law and jurisdiction of the host state and seek international solution of conflicts."[11] This thesis, held by part of the Argentine doctrine, indicates that when submitting the settlement of a dispute to an Arbitral Tribunal acting within the framework of an international agreement, like ICSID, the dispute falls under public international law; thus its rules are to be applied.[12] However, the problem is more complex as has been admitted by several scholars, who are of the opinion that it is necessary to "balance the weight that domestic law and international law should have upon the settlement of the dispute"[13], this is, to establish an order of precedence of the sources.

94. International law overrides domestic law when there is a contradiction since a State cannot justify non-compliance of its international obligations by asserting the provisions of its domestic law.

95. If this contradiction does not exist, it is not an easy task to establish the relationship between international law and domestic law. In the original draft of the ICSID Convention, the conjunction "and" was not present in the rule,

footnote cont'd

but rather the conjunction "or" was in its place, so that it read, "The Arbitral Tribunal shall decide the dispute submitted to it in accordance with such rules of law, whether national or international as it shall determine to be applicable."[14] The intention in the language of the original draft was not to establish an order of preference, but rather to establish the possibility of alternatives. Initially, scholarly authorities and some ICSID Tribunals admitted that the conjunction "and" meant that "and in case of lacunae, or should the law of the Contracting State be inconsistent with international law."[15] However, any limitation to the role of international law under these terms would imply accepting that international law may be subordinate to domestic law and would obviate the fact that there are a growing number of arbitrations initiated on the basis of bilateral or multilateral investment treaties.

96. It is this Tribunal's opinion that "and" means "and," so that the rules of international law, especially those included in the ICSID Convention and in the Bilateral Treaty as well as those of domestic law are to be applied. In the *Wena Hotels Limited v. Arab Republic of Egypt* case, the Tribunal affirmed that "and means and", but accepted the supremacy of international law.[16]

97. The Tribunal concludes, as the tribunal concluded in the *Asian Agricultural Products*, Ltd, *(AAPL) v. Democratic Socialist Republic of Sri Lanka,* Award of June 27, 1990, that the Treaty "is not a self-contained closed legal system limited to provide for substantive material rules of direct applicability, but it has to be envisaged within a wider juridical context in which rules from other sources are integrated through implied incorporation methods, or by

footnote cont'd

direct reference to certain supplementary rules, whether of international law character or of domestic law nature."[17]

98. In short, one must also recall that between Argentina and LG&E there is no binding contractual agreement. The existence of such relationship would have allowed the parties to agree on stabilization clauses in the event of changes in certain circumstances. But, in the absence of such agreement, one is bound to resort to a legal system regulating those events. The fact that there is no contract between the Argentine Republic and LG&E favors in the first place, the application of international law, inasmuch as we are dealing with a genuine dispute in matters of investment which is especially subject to the provisions of the Bilateral Treaty complemented by the domestic law.

3. Tribunal's Conclusion

99. In order to settle this controversy, the present Tribunal shall apply first the Bilateral Treaty; second and in the absence of explicit provisions therein, general international law, and, third, the Argentine domestic law, particularly the Gas Law that governs the natural gas sector. The latter is applicable in view of its relevance for determining the Argentine Republic's liability and the defenses to which it may resort vis-à-vis the allegations made by Claimants.

VI. LIABILITY

A. ARTICLE II(2)(a): FAIR AND EQUITABLE TREATMENT

1. Parties' Positions

100. Based on the circumstances of this case as described in Section IV above,

for Annulment, Feb. 5, 2002, 41 ILM 933 (2002).

[17] *Asian Agricultural Products Ltd. (AAPL) v. Democratic Socialist Republic of Sri Lanka,* ICSID Case No. ARB/87/3, Final Award, June 27, 1990, 6 ICSID Review 533 (1991).

LG&E claims that the Argentine Republic breached Article II(2)(a) of the Bilateral Treaty, which guarantees that LG&E's investment in Argentina will at all times be accorded fair and equitable treatment.

101. In Claimants' view, by committing itself to the Treaty, Argentina made promises to the United States as to how it would treat the investments of U.S. nationals in Argentina. In Article II, Argentina agreed to maintain an investment environment that is even-handed towards all investors, foreign and domestic alike, free of arbitrary and discriminatory laws and regulations, and ultimately fair and equitable, offering full protection and security to the investments of U.S. nationals.

102. Claimants explain that fair and equitable treatment in the context of this Treaty, requires a stable and predictable legal framework for the investment. Claimants support their interpretation of the standard on the basis of the Preamble of the Treaty, which sets forth the object and purpose of the Treaty and specifically the provision on fair and equitable treatment, as well as three recent opinions of arbitral tribunals considering the question in a similar context.[18] Claimants contend that, under this standard, a State cannot grant treatment that affects the basic expectations that were taken into account by the foreign investor to make the investment. Considering that the Treaty's objective was to promote foreign investment, Claimants argue that the stability and predictability of the legal framework that laid the foundations for their investment and granted protection to its value are particularly important.

103. With respect to Respondent's reliance on the *Genin* case, Claimants argue

---

[18] *Técnicas Medioambientales Tecmed S.A. v. The United Mexican States*, ICSID Case No. ARB (AF)/00/02 Award ¶ 154 (29 May 2003); *MTD Equity Sdn. Bhd. and MTD Chile S.A. v. Republic of Chile*, ICSID Case No. ARB/01/7 Award ¶ 113 (25 May 2004); *Occidental Exploration and Production Company v. The Republic of Ecuador*, LCIA Case No. UN 3467 Final Award (1 July 2004).

that as the *Genin*[19] case is merely a standard for evaluating the fairness and equity of State procedures, such a standard should be evaluated in light of more recent cases.

104. Claimants also contend that the extent to which the fair and equitable standard relates to the minimum standard of treatment under customary international law makes no difference in this case because that standard has evolved since the *Mondev*[20] case to include the reasonable expectations of the investor.

105. Under this articulation of the standard, Claimants state that Argentina treated LG&E's investment in an unfair and inequitable manner. *First*, Argentina repudiated the guarantees that it had offered to the foreign investors at the time it induced them to invest in Argentina. *Second*, Argentina singled out the gas-distribution industry and other public utility industries, for treatment that was less favorable than the treatment granted to all other sectors of the economy. *Third*, Argentina publicized unfounded charges against the foreign investors and coerced the gas-distribution companies to waive their rights under the licenses and renegotiate the licenses. *Fourth*, Argentina held the licensees responsible for strict compliance with the terms of the licenses while the Government froze the gas-distribution tariffs. *Finally*, Claimants allege that Argentina foreclosed the licensees from pursuing judicial or arbitral remedies (Claimants' Memorial, ¶ 171).

106. Argentina had attracted Claimants with the guarantees derived from the Treaty and the legal framework for privatization, under which its laws and regulations guaranteed how Argentina would treat LG&E's investment. In making their decision to invest in Argentina, Claimants relied on Argentine

---

[19] *Alex Genin, Eastern Credit Limited, Inc. and A.S. Baltoil v. The Republic of Estonia,* ICSID Case No. ARB/99/2 Award, ¶ 367 (25 June 2001).

[20] *Mondev International Ltd. v. United States of America*, ICSID Case No. ARB(AF)99/2, Award, ¶ 116 (October 11, 2002).

laws that granted protection against currency fluctuation and inflation, while providing for adjustment of utility rates, thus ensuring reasonable rates of return and that the Argentine Government would not freeze utility rates, but rather maintain a dynamic tariff system, regulated by an expert agency.

107. Claimants did not expect their investment to be free of risk, or that Article II of the Bilateral Treaty should protect them from all risks associated with their investment. But they insist that the gas regulatory framework that Argentina put in place made their investment free from risk of regulatory alterations or changes in the rules in which they had invested. LG&E understood that it would bear what it calls "commercial risks," such as industry demand, recession and substitution of natural gas by alternative fuels (Hearing on the Merits, Perkins, 24 January, 2005, Spanish Transcript, p. 369; Claimants' Post-Hearing Brief, ¶ 8).

108. Claimants allege that, during the economic crisis, Argentina abandoned the guarantees that it made to investors in the gas-distribution sector. In January 2002, the Emergency Law swept away the protection against inflation. Argentina forced licensees to enter into two agreements postponing the PPI adjustments, after which an Argentine court issued an order that ENARGAS interpreted as an injunction against the PPI adjustment. The Emergency Law permanently abolished the PPI adjustment.

109. The Emergency Law also abandoned the protection against currency fluctuations. The Gas Law had guaranteed that the tariffs would be calculated in dollars and converted into pesos. In reliance on this protection against any sharp devaluation of the peso, Claimants decided to invest in the licensees.

110. In light of these prior measures, Claimants argue that Argentina repudiated its guarantee that generally prohibited the freezing or control of tariffs (Claimants' Post-Hearing Brief, ¶¶ 15-31).

111. While Claimants acknowledge that the material used by Respondent in order

to make the offer was not binding, the laws and promises referenced therein were (Claimants' Post-Hearing Brief, ¶ 9). Claimants add that if establishing the tariffs had been left to the State, investors would have never invested.

112. Respondent objects to the definition given to fair and equitable treatment. In Respondent's view, the standard should be defined by impartial and objective rather than personal and arbitrary criteria. They conclude that Claimants' interpretation of the standard is so vague as to ignore the parties' obligations and rights (Respondent's Counter-Memorial, ¶ 603-604).

113. Citing *Alex Genin, Eastern Credit Limited, Inc. and A.S. Baltoil v. The Republic of Estonia*[21] and *Robert Azinian, Kenning Davitian & Ellen Baca v. The United Mexican States*[22], Respondent concludes that the fair and equitable treatment principle refers to the international minimum standard of treatment owed to an investor, and as such, constitutes a minimum pattern for substantive justice (Respondent's Counter-Memorial, ¶ 620). Respondent also contends, citing *S.D. Myers Inc. v. The Government of Canada*[23] that a violation of the fair and equitable standard "occurs only when it is shown that an investor has been treated in such an unjust or arbitrary manner that the treatment rises to the level that is unacceptable from the international perspective" (Respondent's Counter-Memorial, ¶¶ 621-622).

114. Regarding the list of guarantees cited by Claimants, Respondent contends that the Gas Law does not provide for what Claimants call "exchange protection" (Respondent's Post-Hearing Brief, ¶ 74a). Respondent points out that, in fact, when Claimants' witnesses were examined, they were not able to identify where any such "protection" had been established. Respondent also asserts that the tariff calculation in U.S. dollars was linked to the

---

[22] *Robert Azinian and others v. United Mexican States,* ICSID Case No. ARB(AF)/97/2, Award, ¶¶ 83 and 87, (1 November 1999).
[23] *S.D. Myers, Inc. v. Government of Canada,* NAFTA Arbitration under UNCITRAL Rules, Partial

footnote cont'd

existing fixed rate of exchange between the peso and the U.S. dollar as established by the Convertibility Law. None of Claimants' witnesses was able to prove the opposite. Respondent adds that maintaining tariffs linked to the U.S. dollar after the convertibility system was abandoned lacks any economic logic. Respondent points out that none of the Government's guarantees address the abandonment of convertibility.

115. With respect to the tariff guarantee, Respondent argues that it is possible that the Argentine authorities had considered guaranteeing the calculation of the tariffs in U.S. dollars regardless of the Convertibility Law, but such plan was rejected due to the fact that the Government concluded that the Convertibility Law provided sufficient protection to the investment (Respondent's Post-Hearing Brief, ¶ 26).

116. With respect to the PPI adjustments, Respondent argues that from mid-1998, application of the PPI as the rate adjustment index became unreasonable and failed to fulfill the goal it was conceived for – namely, reflecting the changes in the value of the goods and services involved in the activity of service providers (Respondent's Post-Hearing Brief, ¶ 44). Additionally, Respondent states that the measure did not cause loss to the licensees. Citing the opinions of Schwartz and Lapuerta, Respondent contends that suspension of the PPI adjustment would have affected tariffs only by approximately 2% between August 2000 and October 2002 (Respondent's Post-Hearing Brief, ¶ 46).

117. Respondent agrees that the tariffs must be fair and sufficient, yet not abusive, something that would occur if the Claimants' position were sustained (Respondent's Post-Hearing Brief, ¶ 74c).

118. Regarding the claim that the Claimants were "induced" to invest in the Argentine Republic, Respondent argues that there is no proof of such

---

Award, ¶ 263, (13 November 2000).

inducement (Respondent's Counter-Memorial, ¶ 647). Respondent points out that the Claimants rely on non-binding documents, such as reports and minutes without any legal relevance. According to Respondent, these documents were irrelevant to the laws that should have been considered in deciding whether or not to invest in the Argentine gas-distribution market (Respondent's Post-Hearing Brief, ¶ 17).

2. Tribunal's Conclusion Concerning Argentina's Guarantees to Investors

119. The Tribunal concludes that the Gas Law and its implementing regulations made four guarantees to investors in the gas transport and distribution centers:

1. Article 41.1 of Decree No. 1738/92,[24] and Section 9.2 of the Basic Rules of the License[25] mandated that the tariffs would be calculated in U.S. dollars before conversion into pesos.

2. Section 9.4.1.1 of the Basic Rules of the License guaranteed that the tariffs would be subject to semi-annual adjustments according to the PPI.[26]

3. Article 38 of Law No. 24,076 provided that tariffs were to provide an income sufficient to cover all costs and a reasonable rate of return.[27]

---

[24] Article 41.1 provides: "Transportation and Distribution rates shall be calculated in United States dollars. The resulting Rate Schedule shall be stated in Argentine pesos and shall be convertible as stated in Law No. 23,928, using for the retranslation into Argentine pesos the parity set forth in Article 3 of Argentine Presidential Decree No. 2,128/91."

[25] Section 9.2 provides: "The tariff has been calculated in U.S. dollars. The adjustments referred to in point 9.3 will be calculated in U.S. dollars."

[26] Section 9.4.1.1 provides: "Distribution tariffs will be adjusted semiannually according to the variation operated in the PPI."

[27] Article 38 provides: "The services rendered by distributors will be offered at tariffs in line with the following principles:
a)To provide distributors who operate economically and prudently the opportunity to obtain sufficient income to meet all reasonable operating costs applicable to the service, taxes, amortization, and a

footnote cont'd

4. Section 9.8 of the Basic Rules of the License guaranteed that the tariff system would not be subject to freezing or price controls without compensation.[28]

120. The Tribunal also finds that as a matter of fact, the Emergency Law, passed on 6 January 2002, declared that the tariffs would no longer be calculated in U.S. dollars but directly in pesos (Article 8), and that there would be no further semi-annual tariff adjustments according to the PPI (Article 8). The Tribunal notes that since July 1999, there have not been any PPI adjustments in the tariffs relating to the licensees and the five-year review due in 2002 was not conducted – both affecting the level of the tariffs in the gas-distribution sector and, as a consequence, Claimants' rate of return on their investment. Argentina took these steps without compensating Claimants and forcing Claimants to renegotiate (a process in which an Argentine official recommended that investors waive their claims against the Government relating to the licenses) or face rescission of the licenses. (Decree No. 293/02, Article 2 and Claimants' Memorial ¶¶ 120 *et seq).*

3. Tribunal's Analysis

121. The question before the Tribunal is whether the measures implemented by Argentina violated Argentina's obligation under Article II(2)(a) of the Treaty to give fair and equitable treatment to LG&E's investment.

122. The Treaty does not define what is meant by fair and equitable treatment. In these circumstances, the Tribunal must interpret this provision in good faith, in accordance with the ordinary meaning to be given to the terms in their context, and in light of its object and purpose, as required by Article 31(1) of

---

reasonable rate of return, as determined in the following article."

[28] Section 9.8 provides: "Licensee's tariff system will not be subject to freezing, administration and/or price control. If, in spite of this stipulation, Licensee is forced to adapt to a price control system establishing a lower level than that arising from the Tariff, Licensee will have the right to be compensated by the Government in an equivalent amount."

the Vienna Convention.

123. The Treaty, following the general trend with investment treaties, provides for treatment applicable to investors in the host State through the establishment of a series of internationally recognized standards.[29] Due to the fact that such international standards have a generic nature and that their interpretation varies with the course of time and with the circumstances of each case, it becomes difficult to establish an unequivocal and static concept of these notions.

124. In considering the context within which Argentina and the United States included the fair and equitable treatment standard, and its object and purpose, the Tribunal observes in the Preamble of the Treaty that the two countries agreed that "fair and equitable treatment of investment is desirable in order to maintain a stable framework for investment and maximum effective use of economic resources." In entering the Bilateral Treaty as a whole, the parties desired to "promote greater economic cooperation" and "stimulate the flow of private capital and the economic development of the parties". In light of these stated objectives, this Tribunal must conclude that stability of the legal and business framework is an essential element of fair and equitable treatment in this case, provided that they do not pose any danger for the existence of the host State itself.

125. Several tribunals in recent years have interpreted the fair and equitable treatment standard in various investment treaties in light of the same or

---

[29] The notion of a standard appeared for the first time in a 1948 treaty, the Havana Charter for an International Trade Organization, and it was considered a protection against state actions violating internationally-accepted rules. In the 1960s it was related to the protection given to foreign properties. In international case law, the standard existed pursuant to the interpretation provided in the 1920s in the emblematic *Neer* case, which required that State conduct be deemed outrageous, wrongful, open injustice, an atrocity, bad faith or voluntary negligence of duty for a violation to be found. That interpretation is not the same that is given today. What was considered an "atrocity" in 1926 might not be so today, and what may be considered "violent" now, may not have been at that time. See *"Fair and Equitable Treatment Standard in International Investment Law"*, OECD, Working Paper on

footnote cont'd

similar language as the Preamble of the Argentina – U.S. BIT.[30] These tribunals have repeatedly concluded based on the specific language concerning fair and equitable treatment, and in the context of the stated objectives of the various treaties, that the stability of the legal and business framework in the State party is an essential element in the standard of what is fair and equitable treatment.[31] As such, the Tribunal considers this interpretation to be an emerging standard of fair and equitable treatment in international law.

126. Although the Chile - Malaysia BIT does not include express reference in its Preamble with respect to fair and equitable treatment, the tribunal in *MTD Equity Sdn. Bhd. and MTD Chile S.A. v. Republic of Chile* referred to the objectives of the Treaty set forth in the Preamble, and concluded that in light of these objectives, fair and equitable treatment meant treatment in an "even-handed and just manner, conducive to fostering the promotion of foreign investment."[32]

127. In addition to the State's obligation to provide a stable legal and business environment, the fair and equitable treatment analysis involves consideration of the investor's expectations when making its investment in reliance on the protections to be granted by the host State. Indeed, this view is reflected in the *Tecmed* decision, that has been adopted by a succession of tribunals:

International Investment, November 2003/4.

[30] See, e.g., *CMS Gas Transmission Company v. The Argentine Republic*, ICSID Case No. ARB/01/8 Award (12 May 2005) (Argentina-U.S. BIT*); Occidental Exploration and Production Company v. The Republic of Ecuador*, LCIA Case No. UN 3467 Final Award (1 July 2004) (U.S.-Ecuador BIT – almost identical language); *MTD Equity Sdn. Bhd. and MTD Chile S.A. v. Republic of Chile*, ICSID Case No. ARB/01/7 Award ¶ 113 (25 May 2004) (Malaysia-Chile BIT); *Metalclad Corporation v. United Mexican States*, ICSID Case No. ARB(AF)/97/1 Award ¶ 75 (30 August 2000). (An underlying objective of Article 102(1) of NAFTA is "to promote and increase cross-border investment opportunities and ensure the succesful implementation of investment initiatives").

[31] *CMS*, ¶ 274; *Occidental*, ¶183. See also *Metalclad,* ¶ 99 ("Mexico failed to ensure a transparent and predictable framework for Metalclad's business planning and investment").

[32] *MTD*, ¶ 113.

> "The Arbitral Tribunal considers that this provision of the [BIT], in light of the good faith principle established by international law, requires the Contracting Parties to provide to international investments treatment that does not affect the basic expectations that were taken into account by the foreign investor to make the investment. The foreign investor expects the host State to act in a consistent manner, free from ambiguity and totally transparently in its relations with the foreign investor, so that it may know beforehand any and all rules and regulations that will govern its investments, as well as the goals of the relevant policies and administrative practices or directives, to be able to plan its investment and comply with such regulations.[33]"

128. Similarly, the tribunal in *Waste Management, Inc. v. The United Mexican States,* interpreting the fair and equitable treatment standard under NAFTA Article 1105(1) concluded that in applying the fair and equitable treatment standard, "it is relevant that the treatment is in breach of representations made by the host State which were reasonably relied on by the claimant."[34] This means that violations of the fair and equitable treatment standard may arise from a State's failure to act with transparency –that is, all relevant legal requirements for the purpose of initiating, completing and successfully operating investments made, or intended to be made under an investment treaty should be capable of being readily known to all affected investors.[35]

129. The Tribunal is not convinced that bad faith or something comparable would ever be necessary to find a violation of fair and equitable treatment. The tribunal in *Alex Genin, Eastern Credit Limited, Inc. and A.S. Baltoil v. The Republic of Estonia*,[36] did not reach this conclusion either. The tribunal merely stated: "Acts that would violate this minimum standard *would*

---

[33] *Técnicas Medioambientales Tecmed S.A. v. The United Mexican States*, ICSID Case No. ARB(AF)/00/02, Award ¶ 154 (29 May 2003); *cited in e.g., MTD*, ¶ 114; *Occidental*, ¶ 185; *CMS*, ¶ 279.
[34] *Waste Management, Inc. v. The United Mexican States,* ICSID Case No. ARB(AF)/00/3, Award ¶ 98 (30 April 2004).
[35] See e.g., *Tecmed*, ¶ 154; *CMS*, ¶¶ 278-79 and *Occidental*, ¶ 185 (citing the *Tecmed* and *Metalclad* passages referring to transparency).

include acts showing a willful neglect of duty . . . or even subjective bad faith" (emphasis added).[37] The tribunal concluded that bad faith was not a requirement for a finding of a violation of fair and equitable treatment.[38]

130. It can be said that the investor's fair expectations have the following characteristics: they are based on the conditions offered by the host State at the time of the investment; they may not be established unilaterally by one of the parties; they must exist and be enforceable by law; in the event of infringement by the host State, a duty to compensate the investor for damages arises except for those caused in the event of state of necessity; however, the investor's fair expectations cannot fail to consider parameters such as business risk or industry's regular patterns.

131. Thus, this Tribunal, having considered, as previously stated, the sources of international law, understands that the fair and equitable standard consists of the host State's consistent and transparent behavior, free of ambiguity that involves the obligation to grant and maintain a stable and predictable legal framework necessary to fulfill the justified expectations of the foreign investor.

4. <u>**Tribunal's Conclusion**</u>

132. In light of the foregoing, the Tribunal concludes that Argentina violated the fair and equitable treatment provision in the Bilateral Treaty for the following reasons.

133. Emerging from the economic crisis of the late 1980s, Argentina created an

---

[36] *Genin,* ¶ 367.
[37] *Ibidem*.
[38] See, e.g., *Mondev*, ¶ 116 October 11, 2002 ("To the modern eye, what is unfair or inequitable need not equate with the outrageous or the egregious. In particular, a State may treat foreign investment unfairly and inequitably without necessarily acting in bad faith."); *see also Occidental*, ¶ 63 ("this is an objective requirement that does not depend on whether the Respondent has proceeded in good faith or not."); *see also Tecmed,* ¶ 153 (relying on *Mondev*); *Waste Management*, ¶ 93 (rejecting the standard set forth in the *Neer* case involving willful neglect of duty and bad faith).

economic recovery plan mainly dependent upon foreign capital. Argentina prepared with the investment banks an attractive framework of laws and regulations that addressed the specific concerns of foreign investors with respect to the country risks involved in Argentina. In light of these risks, Claimants relied upon certain key guarantees in the Gas Law and implementing regulations, such as calculation of the tariffs in U.S. dollars before their conversion into pesos, the semi-annual PPI adjustments, tariffs set to provide sufficient revenues to cover all the costs and a reasonable rate of return, and compensation in the event that the Government altered the tariff scheme. Having created specific expectations among investors, Argentina was bound by its obligations concerning the investment guarantees vis-à-vis public utility licensees, and in particular, the gas-distribution licensees. The abrogation of these specific guarantees violates the stability and predictability underlying the standard of fair and equitable treatment.

134. Specifically, it was unfair and inequitable to pass a law discarding the guarantee in Decree No. 1738/92 that the tariffs would be calculated in U.S. dollars and then converted into pesos. As pointed out by Claimants, this was not merely an economic and monetary policy of the Argentine Government which materialized through the Convertibility Law. Rather, it was a guarantee laid down in the tariff system. This guarantee was very important to investors to protect their investment, which was made in dollars, from a subsequent devaluation of the peso.

135. Argentina also acted unfairly and inequitably in the manner in which it abrogated the guarantees of the Gas Law and its implementing regulations, adversely affecting the gas-distribution sector but not affecting other sectors of the economy. For example, certain contracts, such as those in the export industry, were excluded from the forced conversion to pesos regulation, or the conversion was performed at a more favorable rate to the individual or company.

136. Argentina acted unfairly and inequitably when it prematurely abandoned the PPI tariff adjustments and essentially froze tariffs prior to the onset of the public disorder and threats to its essential security in December 2001, and when it refused to resume adjustments when conditions had normalized in April 2003, forcing instead the licensees to renegotiate.[39] History has shown that the PPI adjustments that initially were supposed to be postponed have been abandoned completely and are now being "negotiated" away.

137. Argentina also has acted unfairly and inequitably in forcing the licensees to renegotiate public service contracts, and waive the right to pursue claims against the Government, or risk rescission of the contracts. Even though the Gas Law provided for the renegotiation of public service contracts, in practice there was no real renegotiation, but rather the imposition of a process.

138. Likewise, the Government's Resolution No. 38/02 issued on 9 March 2002, which ordered ENARGAS to discontinue all tariff reviews and to refrain from adjusting tariffs or prices in any way, also breaches the fair and equitable treatment standard.

139. The Tribunal nevertheless recognizes the economic hardships that occurred during this period, and certain political and social realities that at the time may have influenced the Government's response to the growing economic difficulties. Certainly, LG&E was aware of the risks inherent in investing in a foreign State. But here, the Tribunal is of the opinion that Argentina went too far by completely dismantling the very legal framework constructed to attract investors.

---

[39] As described more fully below, Argentina is excused from liability for the measures taken during the extreme circumstances of December 2001 until April 2003 in order to maintain public order and protect its essential interests. It was fair that during this period of time, Argentina suspended the guarantees of the Gas Law and postponed the PPI tariff adjustments until such time as the Government could manage to resume its obligations.

B. ARTICLE II(2)(b): DISCRIMINATORY AND ARBITRARY TREATMENT

1. Discriminatory Treatment

(i) Parties' Positions

140. Claimants contend that the Argentine Government adopted measures that discriminated against the downstream gas sector (transport and distribution) compared to upstream businesses (production), large industrial customers, and other sectors not dominated by foreign investors, such as alternative energy and the public. In their view, such discrimination violates Article II(2)(b) of the Bilateral Treaty, which provides that "[n]either Party shall in any way impair by arbitrary or discriminatory measures the management, operation, maintenance, use, enjoyment, acquisition, expansion, or disposal of investments."

141. Claimants state that, from the time of the first PPI adjustment until the enactment of the Emergency Law of 6 January 2002, the gas industry received treatment different from that accorded to similarly situated public utilities, including electricity and water distribution companies. These other public utilities continued to enjoy the PPI adjustment until the enactment of the Emergency Law.

142. Claimants also support their contention by pointing out that, following enactment of the Emergency Law on 6 January 2002, the Government subjected most of the privatized public-utility sector, including the gas-distribution industry, to the least favorable of several regimes devised for the conversion of dollar obligation into pesos. Within the public-utility sector, Claimants also allege that the Government discriminated against the gas-distribution industry by excluding other public-service companies from the conversion of tariffs into pesos. The Government imposed upon the privatized gas-distribution companies what was considered the worst exchange and tariff system during the Argentine crisis.

143. Claimants stress that if one compares the measures that affected sectors such as gas production, alternative energy sources or even those of the public sector, with those affecting gas transportation or distribution, the Tribunal can only conclude that the Argentine Government discriminated against the gas distribution and transportation sectors. The alleged discrimination is particularly obvious in Claimants' view by the fact that most of the investors in the gas-distribution sector are foreigners.

144. Respondent argues that the measures it adopted were not discriminatory because they were general measures without any unreasonable distinction. Respondent questions whether Argentina's measures can be considered discriminatory, if one acknowledges, as Claimants have, that other industries related to public services were affected by the measures adopted regarding the PPI (Respondent's Counter-Memorial, ¶ 700).

145. Respondent explains that each public service is regulated by its own set of tariff rules, and for that reason, the effect may not have been exactly the same for all sectors, including the field of public services. Respondent alleges that "[i]t is irrational and illegitimate to compare one utility to a different one, subject to different rules, different agreements and different characteristics, and then hold that it is discriminatory to treat differently the different utilities at stake" (Respondent's Counter-Memorial, ¶ 703, emphasis omitted).

(ii) <u>Tribunal's Analysis</u>

146. In the context of investment treaties, and the obligation thereunder not to discriminate against foreign investors, a measure is considered discriminatory if the intent of the measure is to discriminate or if the measure has a discriminatory effect.[40] As stated in the *ELSI Elettronica*

---

[40] See Vandevelde, Kenneth J., *United States Investment Treaties: Policy and Practice,* Kluwer Law

footnote cont'd

Sicula SpA case (*United States of America v. Italy*), ICJ Report 1989 RLA 56 at 61-62 (20 July 1989), in order to establish when a measure is discriminatory, there must be (i) an intentional treatment (ii) in favor of a national (iii) against a foreign investor, and (iv) that is not taken under similar circumstances against another national.

(iii) <u>Tribunal's Conclusion</u>

147. While the Tribunal concludes that based on the evidence presented, Respondent treated the gas-distribution companies in a discriminatory manner, imposing stricter measures on the gas-distribution companies than other public-utility sectors, Claimants have however not proven that these measures targeted Claimants' investments specifically as foreign investments.

148. Certainly, all the gas-distribution companies were affected by the economic crisis and by the Government's measures like all other companies within the public-utility sector. However, Argentina suspended PPI adjustments for the gas industry two years before enacting the Emergency Law. It did not take the same action with respect to the public-utility companies such as the electricity and water distribution companies, in which case it continued to adjust their tariffs until enactment of the Emergency Law. Instead, the gas-distribution companies were subjected to unfavorable regimes devised for the conversion of dollar obligations and tariffs into pesos. Even though it was not proved that these measures had been adopted with the purpose of causing Claimants' foreign investments damage, discrimination against gas distribution companies vis-à-vis other companies, such as water supply and electricity companies, is evident.

---

and Taxation, 1992, p. 77.

2. Arbitrary Treatment

(i) Parties' Positions

149. Claimants characterize Argentine Government's course of conduct towards the gas-distribution licensees as arbitrary in violation of Article II(2)(b) of the Bilateral Treaty. Claimants articulate the standard for what constitutes an "arbitrary" act as "disregard for the rule of law" (Claimants' Memorial, ¶ 176).

150. Claimants argue that, in taking measures against the gas-distribution licensees and other public utilities, the Argentine Government acted in disregard for the rule of law. According to Claimants, the Government acted under the trappings of laws, decrees, resolution, regulations and court decisions, but by willfully repudiating the commitments it made to the gas-distribution licensees and their shareholders, the Government followed "the rule of power, not the rule of law" (Claimants' Post-Hearing Brief, ¶ 44). In Claimants' view, the Government's wholesale repudiation of the tariff system was unnecessary to achieve the stated aims of the PPI suspension or those of the Emergency Law, since the the tariff system was sufficiently flexible to allow Respondent to reduce tariffs unilaterally, for any reason, as long as it paid compensation to the licensees. Instead, the Government chose to dismantle the whole tariff system without granting due compensation (Claimants' Memorial, ¶ 176).

151. Claimants argue that when Respondent's Bilateral Treaty obligations and the promises made to the foreign investors became politically and economically inconvenient, Respondent ignored its obligations and repudiated the Gas Law's key provisions. These measures, they assert, not only surprise but also contradict any sense of Respondent's ownership of its legal obligations, and accordingly they are arbitrary in nature. Claimants refute as without evidence any assertion by Respondent that if the guarantees had not been abolished, tariffs would have tripled or quadrupled in price (Claimants' Post-

Hearing Brief, ¶ 44).

152. In its defense, Respondent contends that the measures were not arbitrary; on the contrary, they were reasonable and proportionate to the end pursued. In Argentina's view, the tariff system was not dismantled. Rather, it was modified by the measures that the Government was forced to put in place during the economic crisis. Respondent suggests that under the circumstances, the deferment of the PPI adjustment in the year 2000 was a reasonable measure. This position, as Respondent views it, is supported by both a decision of a court of first instance and by the Federal Court of Appeal (Cámara Federal de Apelaciones), which concluded that the adjustment at issue was unreasonable within the recessive economic context endured by the Argentine Republic. The stability that Claimants argue should characterize the legal system does not mean that the system will exist in perpetuity, immutability or immobility. Any requirement of "freezing the law" without considering the social and economic circumstances under which the laws were enacted, is transforming the Argentine legal system into a "frivolous rite" (Respondent's Counter-Memorial, ¶¶ 638-639).

153. Respondent contends that linking the tariff adjustments to the peso (pesificación) is not arbitrary or discriminatory. Had there been no link to the peso, many customers could not have had access to the gas service, which would have resulted in the collapse of the distribution industries themselves, and tariffs would have been no longer fair but abusive.

154. In Respondent's view, none of the measures adopted by the Argentine Government may be qualified as arbitrary or discriminatory. On the contrary, they were proportionate and reasonable under the circumstances and accordingly, not a violation of Article II(2)(b) of the Bilateral Treaty (Respondent's Post-Hearing Brief, ¶ 112).

(ii) Tribunal's Analysis

155. Article II(2)(b) of the Bilateral Treaty provides that "[n]either Party shall in

any way impair by arbitrary or discriminatory measures the management, operation, maintenance, use, enjoyment, acquisition, expansion, or disposal of investments."

156. The term "arbitrary" is left undefined by the Bilateral Treaty. Thus, the Tribunal looks to its plain meaning for international law to determine whether the measures adopted by Argentina could be classified as arbitrary.

157. According to international law, arbitrariness has been described as "a willful disregard of due process of law, an act which shocks, or at least surprises, a sense of juridical propriety."[41] The tribunal in *Ronald S. Lauder v. The Czech Republic*, referring to the Black's Law Dictionary, defined the term as "depending on individual discretion; (…) founded on prejudice or preference rather than on reason or fact."[42]

158. It is apparent from the Bilateral Treaty that Argentina and the United States wanted to prohibit themselves from implementing measures that affect the investments of nationals of the other Party without engaging in a rational decision-making process. Such process would include a consideration of the effect of a measure on foreign investments and a balance of the interests of the State with any burden imposed on such investments. Certainly a State that fails to base its actions on reasoned judgment, and uses abusive arguments instead, would not "stimulate the flow of private capital."[43]

159. The *Genin* case quoted by Respondent provides a good example of a State measure upholding a guarantee similar to the prohibition in the Estonia – U.S. BIT against arbitrary treatment. There, the tribunal concluded that the Bank of Estonia's annulment of a license occurred in the course of

---

[41] *Elettronica Sicula S.p.A.* (*ELSI*) (*United States of America v. Italy*), 1989 I.C.J. 15, 76 (Judgment of 20 July).
[42] *Ronald S. Lauder v. The Czech Republic*, Final Award ¶ 221 (3 September 2001) (*citing* Black's Law Dictionary 100 (7th ed. 1999)).
[43] Preamble, Argentina – U.S. BIT (1994).

exercising its statutory obligations to regulate the Estonian banking sector, and therefore was not arbitrary.[44] In so concluding, the tribunal accepted Estonia's explanation that the circumstances of political and economic transition prevailing in Estonia at the time justified heightened scrutiny of the banking sector, and that such regulation by a State reflects "a clear and legitimate public purpose."[45]

160. In contrast, the *Lauder* tribunal determined that the acts of the Czech Republic's Media Council were arbitrary. Such acts consisted in forcing a private investor in the newly-privatized company that held the state television license to exchange a direct participation in the company for a contractual relationship.[46] The tribunal reasoned that the act was motivated by fear of the political implications of having a foreigner influencing Czech television broadcasts.[47]

(iii) <u>Tribunal's Conclusion</u>

161. This case lands between the two cases mentioned above, but ultimately the Tribunal concludes that the acts of Argentina were not arbitrary, and therefore did not violate Article II(2)(b) for the following reasons.

162. While Claimants have alleged Argentina's political motivation to use foreign investors in the public utility sector as an excuse to justify the economic mistakes committed in the country, Argentina has explained that the Government's motivation was its desire to avoid its full economic collapse. To this end, it entered into agreements with the licensees in 2001, in addition to other actions taken. Bearing in mind the Tribunal's analysis, characterizing the measures as not arbitrary does not mean that such measures are characterized as fair and equitable or regarded as not having

---

[44] *Genin*, ¶ 370.
[45] *Ibidem.*
[46] *Lauder*, ¶ 222-32.

affected the stability of the legal framework under which gas transportation companies in Argentina operated. On the contrary, this means that Argentina faced severe economic and social hardships from 2001 onwards and had to react to the circumstances prevailing at the time. Even though the measures adopted by Argentina may not have been the best, they were not taken lightly, without due consideration. This is particularly reflected in the PPI adjustments which, before deciding on their postponement, Argentina negotiated with the investors. The Tribunal concludes that the charges imposed by Argentina to Claimants' investment, though unfair and inequitable, were the result of reasoned judgment rather than simple disregard of the rule of law.

163. Likewise, it was not arbitrary, though unfair and inequitable, not to restore the Gas Law or the other guarantees related to the gas distribution sector and to implement the contract renegotiation policy.

C. ARTICLE II(2)(c): THE UMBRELLA CLAUSE

1. Parties' Positions

164. LG&E claims that Argentina violated Article II(2)(c) of the BIT when it assumed certain fundamental obligations with regard to investments in its gas-distribution sector and the foreign investors and then repudiated each of these legal commitments without compensating Claimants for their loss.

165. As LG&E explains it, Argentina used foreign capital investment as the cornerstone of its economic recovery plan in the early 1990s. Respondent designed the privatization of *Gas del Estado S.E.* as an international bidding process, in which the conditions for bidding on local enterprises could be met only by a consortium involving foreign investors. Argentina wooed foreign investors with promises of return on investment that would always

[47] *Lauder*, ¶¶ 229, 232.

be reasonable, protections against currency exchange and inflation, adjustment of rates pursuant to international indexes, no unilateral changes and no price controls without indemnification. Argentina bound itself to these promises in the form of legal obligations.

166. According to Claimants, these are the promises that the umbrella clause is meant to address. The Tribunal need not decide that every commitment regarding investments embodied in general legislation or regulations gives rise to obligations that must be observed under that clause. Rather, liability derives from this article of the Treaty when in the particular circumstances of this case, Respondent failed to observe its obligations.

167. The problem with LG&E's claim, according to Respondent, is that it assumes that general legislation relating to the natural gas distribution and transportation industry falls within Article II(2)(c)'s parameter. Respondent suggests that such promises do not qualify as specific representations that make the umbrella clause effective.

168. Respondent also asserts that LG&E's claims are nothing more than claims of contractual breaches, which are to be considered under the specific jurisdictional clauses of the contract and not adjudicated in an international forum under application of the umbrella clause.

2. Tribunal's Analysis

169. Article II(2)(c) of the Treaty provides that "[e]ach party shall observe any obligation it may have entered into with regard to investments."

170. Such clause, referred to as an "umbrella clause," is a general provision included in a fairly large number of bilateral treaties that creates a requirement for the host State to meet its obligations towards foreign investors, including those that derive from a contract. Hence such obligations receive extra protection by virtue of their consideration under the bilateral treaty.

171. In many cases it has been considered that the umbrella clause is activated not by obligations set forth in municipal law, but in contracts between the State and the investor.[48] Several of those tribunals have concluded that the breach of a contractual obligation in a contract between the State and the investor gives rise to a claim under the umbrella clause.[49]

172. The issue for the Tribunal's consideration is whether the provisions of the Gas Law and its implementing regulations constitute (i) "obligations" (ii) "with regard to" LG&E's capacity as a foreign investor (iii) with respect to its "investment," such that abrogation of the guarantees set forth in the Gas Law and its implementing regulations give rise to a violation of the Treaty.

173. In this case, it will be necessary to establish whether LG&E's claims fall under the umbrella clause's protection.

174. In order to determine the applicability of the umbrella clause, the Tribunal should establish if by virtue of the provisions of the Gas Law and its regulations, the Argentine State has assumed international obligations with respect to LG&E and its investment. To this end, it is necessary to remember that the provisions of the Gas Law and its regulation fixed and regulated the tariff scheme ensuring the value of Claimants' investment; that the purpose of Claimants' investment was to increase the value of its shares in the Licensees through a fragile balanced management of profits and costs, represented by the tariffs fixed by Argentina in light of the already mentioned Gas Law and its regulation. In view of the statements above, the Tribunal concludes that these provisions were not legal obligations of a general nature.[50] On the contrary, they were very specific in relation to

---

[48] *See e.g., CMS,* ¶300 (citing cases).

[49] *CMS*, ¶ 303; *SGS v. Republic of the Philippines*, Decision on Jurisdiction, ICSID Case No. ARB/02/6 (29 January 2004), ¶¶ 127-28.

[50] *SGS v. Philippines,* ¶ 121 ("For [the umbrella clause] to be applicable, the host State must have assumed a legal obligation, and it must have been assumed vis-à-vis the specific investment – not as a matter of the application of some legal obligation of a general character.").

LG&E's investment in Argentina, so that their abrogation would be a violation of the umbrella clause.

3. Tribunal's Conclusion

175. As such, Argentina's abrogation of the guarantees under the statutory framework – calculation of the tariffs in dollars before conversion to pesos, semi-annual tariff adjustments by the PPI and no price controls without indemnification – violated its obligations to Claimants' investments. Argentina made these specific obligations to foreign investors, such as LG&E, by enacting the Gas Law and other regulations, and then advertising these guarantees in the Offering Memorandum to induce the entry of foreign capital to fund the privatization program in its public service sector. These laws and regulations became obligations within the meaning of Article II(2)(c), by virtue of targeting foreign investors and applying specifically to their investments, that gave rise to liability under the umbrella clause.

D. CONSIDERATIONS ON INDIRECT EXPROPRIATION

1. Parties' Positions

176. LG&E seeks a declaration from this Tribunal that Argentina expropriated LG&E's investment in the Argentine gas-distribution sector without compensation in violation of Article IV of the Treaty, which provides, in part:

> "1. Investments shall not be expropriated or nationalized either directly or indirectly through measures tantamount to expropriation or nationalization ("expropriation") except for a public purpose; in a non-discriminatory manner; upon payment of prompt, adequate and effective compensation; and in accordance with due process of law and the general principles of treatment provided for in Article II(2)."

177. LG&E articulates its expropriation claim as one of indirect expropriation. In other words, LG&E argues that the Argentine Government's treatment of Claimants' investment in the Licensees constitutes an indirect expropriation

of the investments because the value of LG&E's holdings in the Licenses has been reduced by more than 90% as a result of Respondent's abrogation of the principal guarantees of the tariff system (Claimants' Memorial, ¶ 180).

178. LG&E contends that, pursuant to Article IV of the Bilateral Treaty, it is entitled to compensation equivalent to the fair market value of the expropriated investment immediately before the expropriation was committed. Claimants pinpoint the date of expropriation in this case as the date on which Respondent's course of conduct finally resulted in the virtual destruction of the value of the investment –not later than August 2000, when the Argentine court enjoined implementation of the 17 July 2000 agreement and any further PPI adjustments (Claimants' Memorial, ¶ 181).

179. Under Claimants' theory, indirect expropriation occurs when government action substantially impairs the value of an investment (Claimants' Post-Hearing Brief, ¶ 53 *citing* Dolzer Reb., ¶ 56). In this case, the Claimants consider that the Argentine Government's actions had a substantial effect on LG&E's shares in the Licensees, which are an investment protected under Article I(1)(a) of the Treaty. The value of LG&E's investment was based on a tariff system and depended on the Respondent respecting the system. The value of LG&E's shares in the Licensees now fluctuates according to general speculation around the future tariff relief that Argentina may or may not grant (Claimants' Post-Hearing Brief, ¶ 53).

180. Claimants add that when it comes to establishing whether there was effectively an indirect expropriation, there is no relevance to the fact that the Licensees continue to operate or control their gas-distribution business, or as to whether Claimants hold title to the shares. In the case of indirect expropriation, it does not matter whether title to the licenses has been transferred to the State. It is enough to show that their investment has been impaired as a result of government action, which they claim is the case here as there allegedly has been a substantial appropriation of value by the State and transfer of wealth from the gas industry to gas consumers, especially

large industrial consumers (Claimants' Post-Hearing Brief, ¶¶ 53-54).

181. The Respondent denies that any expropriation under Article IV of the Bilateral Treaty has occurred. Respondent contends that, in order for the Argentine Government to have either directly or indirectly expropriated Claimants' investment, the measures at issue would have had to have been designed to transfer title to the investment to the State. The sole difference between direct and indirect expropriation in this case, according to Respondent, is that with indirect expropriation, no formal transfer of title is required, since its purpose is that of "masking, disguising the expropriating event and of eluding the resulting liability" (Respondent's Post-Hearing Brief, ¶ 103).

182. Respondent argues that Claimants have not proven that the PPI's suspension constitutes an expropriating event. Respondent contends that the suspension of the PPI adjustments would have affected tariffs by approximately 2%, and states that under no circumstance could a tribunal conclude that such a small loss qualifies as an expropriation subject to compensation.

183. Argentina argues that in any event there could not have been any expropriation during the economic crisis. The fact that the licensees may have been affected by the crisis, along with everyone else, does not lead to the conclusion that their investment was expropriated. Respondent denies any causal link between the measures adopted by the Argentine State during this time and the fluctuations in the value of LG&E's shares in the licensees. In its opinion, the fluctuation in the value of LG&E's investment is attributable to the "macroeconomic conditions affecting the Argentine Republic", rather than the measures adopted by the Argentine State (Respondent's Post-Hearing Brief, ¶ 109). Argentina points out that between 1997 and 2000, LG&E earned higher income than expected through its investments in the licensees.

184. Finally, after objecting the expropriation claim because the company

remains de facto and by law the owner of the investment, Respondent alleges that, in fact, the share prices of Claimants' investment have increased in value from the period immediately preceding the suspension of the PPI adjustments. As such, Respondent argues that where property is worth more today than it was prior to the measures' adoption, the property may not be deemed expropriated (Respondent's Post-Hearing Brief, ¶¶ 110-111).

2. <u>Tribunal's Analysis</u>

185. In order to establish the sustainability of an indirect expropriation, the Tribunal must define the concept. Generally, bilateral treaties do not define what constitutes an expropriation –they just make an express reference to "expropriation" and add the language "any other action that has equivalent effects." Likewise, Article IV of the Bilateral Treaty does not define the term "expropriation" and does not establish which measures, actions or conduct would constitute acts "tantamount to expropriation." Therefore, the Tribunal shall look to international law in determining the relevant criteria for evaluating this claim.

186. A State may, at its discretion, under Article IV of the Bilateral Treaty and in accordance with general principles of international law, make use of its sovereign power to expropriate private property with the purpose of satisfying a public interest. However, expropriation in any of its modalities requires due process and compensation under international law.

187. Although in scholarly authority two kinds of expropriation are known, we will obviously skip the direct one, understood as the forcible appropriation by the State of the tangible or intangible property of individuals by means of administrative or legislative action. The parties admit that the claim at issue does not involve a direct expropriation. In the case of the Argentine Republic, one could not say that it appropriated Claimants' investment, which is the indispensable requirement if one is to talk of direct expropriation. Instead, we shall limit ourselves to the assumption of the

indirect expropriation, one qualified by the Bilateral Treaty itself as "measures tantamount to expropriation."

188. Generally, the expression "equivalent to expropriation" or "tantamount to expropriation" found in most bilateral treaties, may refer both, to the so-called "creeping expropriation" and to the *de facto* expropriation. Their common point rests in the fact that the host State's actions or conduct do not involve "overt taking" but the taking occurs when governmental measures have "effectively neutralize[d] the benefit of property of the foreign owner."[51] Ownership or enjoyment can be said to be "neutralized" where a party no longer is in control of the investment, or where it cannot direct the day-to-day operations of the investment.[52] As to the differences, it is usual to say that indirect expropriation may show itself in a gradual or growing form —creeping expropriation— or through a sole and unique action, or through actions being quite close in time or simultaneous —*de facto* expropriation.

189. In order to establish whether State measures constitute expropriation under Article IV(1) of the Bilateral Treaty, the Tribunal must balance two competing interests: the degree of the measure's interference with the right of ownership and the power of the State to adopt its policies.

190. In evaluating the degree of the measure's interference with the investor's right of ownership, one must analyze the measure's economic impact – its interference with the investor's reasonable expectations – and the measure's duration.

191. In considering the severity of the economic impact, the analysis focuses on whether the economic impact unleashed by the measure adopted by the host State was sufficiently severe as to generate the need for compensation due to expropriation. In many arbitral decisions, the compensation has been denied

[51] *CME Czech Republic v. Czech Republic*, Partial Award, ¶ 604 (13 September 2001).

when it has not affected all or almost all the investment's economic value. Interference with the investment's ability to carry on its business is not satisfied where the investment continues to operate, even if profits are diminished.[53] The impact must be substantial in order that compensation may be claimed for the expropriation.

192. The tribunal in *Tecmed* required a finding that Claimant had been "radically deprived of the economical use and enjoyment of its investments, as if the rights related thereto –such as the income or benefits related to the [investment…]– had ceased to exist."[54] In other words, if due to the actions of the Respondent, the assets involved have lost their value or economic use for the Claimants and the extent of the loss.[55]

193. Similarly, one must consider the duration of the measure as it relates to the degree of interference with the investor's ownership rights. Generally, the expropriation must be permanent, that is to say, it cannot have a temporary nature, unless the investment's successful development depends on the realization of certain activities at specific moments that may not endure variations.

194. There is no doubt that the facts relating to the severity of the changes on the legal status and the practical impact endured by the investors in this case, as well as the possibility of enjoying the right of ownership and use of the investment are decisive in establishing whether an indirect expropriation is said to have occurred. The question remains as to whether one should only take into account the effects produced by the measure or if one should consider also the context within which a measure was adopted and the host State's purpose. It is this Tribunal's opinion that there must be a balance in

---

[52] *Pope & Talbot Inc. v. Canada*, Interim Award, ¶ 100 (26 June 2000).
[53] *Pope & Talbot*, ¶¶ 101-02.
[54] *Tecmed*, ¶ 115.
[55] *Ibidem*.

the analysis both of the causes and the effects of a measure in order that one may qualify a measure as being of an expropriatory nature. It is important not to confound the State's right to adopt policies with its power to take an expropriatory measure. "This determination is important because it is one of the main elements to distinguish, from the perspective of an international tribunal between a regulatory measure, which is an ordinary expression of the exercise of the state's police power that entails a decrease in assets or rights, and a *de facto* expropriation that deprives those assets and rights of any real substance."[56]

195. With respect to the power of the State to adopt its policies, it can generally be said that the State has the right to adopt measures having a social or general welfare purpose. In such a case, the measure must be accepted without any imposition of liability, except in cases where the State's action is obviously disproportionate to the need being addressed. The proportionality to be used when making use of this right was recognized in *Tecmed*, which observed that "whether such actions or measures are proportional to the public interest presumably protected thereby and the protection legally granted to investments, taking into account that the significance of such impact, has a key role upon deciding the proportionality."[57]

196. As is observed by *The American Law Institute's Restatement (Third) of the Foreign Relations Law of the United States*, "a state is not responsible for loss of property or for other economic disadvantage resulting from *bona fide* general taxation, regulation, forfeiture for crime, or other action of the kind that is commonly accepted as within the police power of the states, if it is not discriminatory…"[58]. This criterion was used by the Tribunal of Iran-United

[58] *Restatement (Third) of the Foreign Relations Law of the United States*, American Law Institute,

footnote cont'd

States of America claims in the *Too v. Greater Modesto Insurance Associates.*[59]

197. As was stated in the *Oscar Chinn* affair of 1934, adopted by the Permanent Court of International Justice:

> "No enterprise… can escape from the chances and hazards resulting from general economic conditions. Some industries may be able to make large profits during a period of general prosperity, or else by taking advantages of a treaty of commerce or of an alteration in customs duties; but they are also exposed to the danger of ruin or extinction if circumstances change. Where this is the case, no vested rights are violated by the State."[60]

3. Tribunal's Conclusion

198. In the circumstances of this case, although the State adopted severe measures that had a certain impact on Claimants' investment, especially regarding the earnings that the Claimants expected, such measures did not deprive the investors of the right to enjoy their investment. As in *Pope & Talbot*, the true interests at stake here are the investment's asset base, the value of which has rebounded since the economic crisis of December 2001 and 2002.

199. Further, it cannot be said that Claimants lost control over their shares in the licensees, even though the value of the shares may have fluctuated during the economic crisis, or that they were unable to direct the day-to-day operations of the licensees in a manner different than before the measures were implemented.

200. Thus, the effect of the Argentine State's actions has not been permanent on the value of the Claimants' shares', and Claimants' investment has not ceased to exist. Without a permanent, severe deprivation of LG&E's rights

---

Volume 1, 1987, Section 712, Comment g.

[59] *Too v. Greater Modesto Insurance Associates,* 23 Iran-United States Cl. Trib. Rep. 378, Award of 29 December 1989.

[60] *Oscar Chinn* affair, P.C.I.J, 1934, Ser A/B, Case No. 63.

with regard to its investment, or almost complete deprivation of the value of LG&E's investment, the Tribunal concludes that these circumstances do not constitute expropriation.

E. State of Necessity

1. Parties' Positions

201. Respondent contends in the alternative that, if Argentina would have breached its Treaty obligations, the state of political, economic and social crisis that befell Argentina allowed it to take action contrary to the obligations it had assumed with respect to the gas-distribution licensees. Thus, even if the measures adopted by the State in order to overcome the economic crisis suffered during the years 1998 through 2003, resulted in a violation of the rights guaranteed under the Treaty to foreign investments, such measures were implemented under a state of necessity and therefore, Argentina is excused from liability during this period.

202. Respondent pleads its defense as a "state of necessity" defense, available under Argentine law, Treaty in Articles XI and IV(3), as well as customary international law.

203. Claimants reject Respondent's contentions regarding the alleged state of necessity defense. Claimants contend that Article XI is not applicable in the case of an economic crisis because the public order and essential security interests elements are intentionally narrow in scope, limited to security threats of a physical nature.

2. General Comments on Article XI

(i) Preliminary Considerations

204. Article XI of the Bilateral Treaty provides:

> "This Treaty shall not preclude the application by either Party of measures necessary for the maintenance of public order, the

> fulfillment of its obligations with respect to the maintenance or restoration of international peace or security, or the protection of its own essential security interests."

205. The Tribunal's analysis to determine the applicability of Article XI of the Bilateral Treaty is twofold. First, the Tribunal must decide whether the conditions that existed in Argentina during the relevant period were such that the State was entitled to invoke the protections included in Article XI of the Treaty. Second, the Tribunal must determine whether the measures implemented by Argentina were necessary to maintain public order or to protect its essential security interests, albeit in violation of the Treaty.[61]

206. The Tribunal reiterates that to carry out the two-fold analysis already mentioned, it shall apply first, the Treaty, second, the general international law to the extent that is necessary and third, the Argentine domestic law. The Tribunal underscores that the claims and defenses mentioned derive from the Treaty and that, to the extent required for the interpretation and application of its provisions, the general international law shall be applied (See section V. B *supra*).

(ii) <u>The Question of Whether Article XI is Self-Judging</u>

207. Before turning to its substantive analysis of Article XI, the Tribunal must determine whether Article XI is *self-judging*.

208. Respondent has argued that because Article XI is a self-judging provision, it is for the State to make a good faith determination as to what measures are necessary for the maintenance of public order, or the protection of its essential security interests. According to Respondent, under this self-judging exception, the Tribunal must decide only whether Argentina acted in good faith or not.

---

[61] Respondent has not relied upon the third element of Article XI, "the fulfillment of its obligations with respect to the maintenance or restoration of international peace or security."

209. Respondent considers Article XI is ambiguous and characterizes such ambiguity as a "strategic ambiguity" on the part of the United States, since it does not clearly define who should determine if the measures to maintain public order or protect essential security interests are necessary. Respondent recognizes that the United States' 1987 Model BIT, upon which the Argentina–U.S. BIT was based, does not clarify the United States' position, nor does any of the documentation related to the negotiation or ratification of the Argentina-U.S. BIT. However, Respondent contends that subsequent to the conclusion of the Argentina-U.S. BIT, the United States shifted its position permanently with regard to essential security clauses, stating in 1992 that the United States considered such clauses to be self-judging, presently and retroactively (Slaughter Witness Statement, ¶¶ 12-31).

210. Claimants disagree that Article XI is self-judging, and argue instead that its application requires that the Tribunal conduct its own analysis of whether the conditions necessitated measures to maintain public order or protect Argentina's essential security interests within the meaning of Article XI.

211. Claimants contend that neither the plain meaning of Article XI, nor the context or purpose of the Treaty suggest that Article XI is self-judging, and that the position of the United States at the time the parties signed the Treaty was that such clauses were not self-judging (Hearing on the Merits, 28 January 2005, Alvarez, Spanish Transcript, p. 925 *et seq.*). Claimants argue that Respondent has not proven that the parties to the Treaty intended Article XI to be self-judging, which they characterize as "an exceptional thing." (Hearing on the Merits, 28 January 2005, Alvarez, Spanish Transcript, p. 932 *et seq.*). Claimants contend that the United States did not consider essential security clauses as self-judging until the Russia-U.S. BIT of 1992 and the 1992 U.S. Model BIT, both of which post-date the Argentina-U.S. BIT, and both of which noted explicitly the change in the United States' policy that these provisions were to be self-judging.

212. Certainly, the language of the BIT does not specify who should decide what

constitutes essential security measures –either Argentina itself, subject to a review under a good faith standard, or the Tribunal. Based on the evidence before the Tribunal regarding the understanding of the Parties in 1991 at the time the Treaty was signed, the Tribunal decides and concludes that the provision is not self-judging.

213. The provisions included in the international treaty are to be interpreted in conformity with the interpretation given and agreed upon by both parties at the time of its signature, unless both parties agreed to its modification. In that case, the date to be considered is November 1991. It is not until 1992, with the ratification of the Russia – US BIT, that the United States begins to consider that the application of the essential security measures are *self judging*; both instruments post-date the bilateral treaty between the United States and the Argentine Republic and, in both cases, this change was explicitly clarified.

214. Were the Tribunal to conclude that the provision is self-judging, Argentina's determination would be subject to a good faith review anyway, which does not significantly differ from the substantive analysis presented here.

(iii) Necessary Nature of the Measures Adopted

a. Parties' Positions

215. Argentina defends the measures it implemented as necessary to maintain public order and protect its essential security interests. It contends that under any interpretation, the financial crisis, riots and chaos of the years 2000 through 2002 in Argentina constitute a national emergency sufficient to invoke the protections of Article XI (Slaughter Witness Statement, ¶ 45).

216. Concerning "public order", Respondent reinforces its arguments on the necessary nature of the measures it had implemented by pointing to numerous reports of waves of sudden economic catastrophe, massive strikes involving millions of workers, fatal shootings, the shut down of schools,

businesses, transportation, energy, banking and health services, demonstrations across the country, and a plummeting stock market, culminating in a "final massive social explosion" in which five presidential administrations resigned within a month (Slaughter Witness Statement, ¶¶ 46-49). Under these circumstances, Argentina argues that price controls by the Argentine Government would have been fully justifiable under the public order provisions of Article XI. Additionally, Respondent argues that actions to freeze price increases in the gas-distribution sector were justifiable to maintain the country's basic infrastructure, which was dependent on natural gas energy.

217. Argentina also defends its measures as necessary to protect its essential security interests. Argentina asserts that Article XI's "essential security interests" element encompasses economic and political interests, as well as national military defense interests. Respondent cites several United States' officials who have propounded a broad interpretation of "essential security interests" (Slaughter Witness Statement, ¶ 38).

218. Respondent attacks Claimants' basis for asserting that the clause is narrow, reserved only for military actions. Furthermore, in all of the cases cited by Claimants, the point was whether the use of military force was justifiable under international law – a narrow reading of essential security clauses in these cases would be expected.

219. Because economic stability, in Respondent's view, falls within a State's essential security interests, Respondent defends the measures it took as necessary to protect its economic interests. Respondent argues that during the crisis period, the health, safety and security of the Argentine State and its people were threatened, and that the economic melt-down had the potential to cause catastrophic state failure. Thus, the public emergency that Argentina declared and the Emergency Law the Government passed altering its financial arrangements were necessary to protect the State's essential security interests.

220. Claimants identify the four measures at issue here –suspension and abolishment of the PPI adjustment, freezing the gas-distribution tariffs, and abandonment of the calculation of the tariffs in dollars, all taken unilaterally– and contend that Respondent must prove that each measure was necessary in order to maintain public order and protect Argentina's essential security interests (Reply, ¶ 209). By the term "necessary," Claimants contend that these measures must have been the only option available to Argentina in order to invoke protection under Article XI.

221. Claimants define public order measures as "actions taken pursuant to a state's police powers, particularly in respect of public health and safety". Based on this definition, Claimants state that the measures in dispute in this case were not aimed at bringing calmness to the collapse that was threatening the country. Consequently, such measures cannot be deemed necessary to maintain public order.

222. With respect to "essential security interests," Claimants reiterate that such interests do not include economic interests –only defense or military concerns. They compare a State's interest in essential security to a national security threat, while a "national emergency," the alleged circumstance in which Respondent invokes the protection, has an entirely different meaning. In Claimants' view, economic crises should not be elevated to an essential security interest, and that doing so would disregard the object and purpose of the Treaty. They argue that an economic crisis is precisely when investors need the protections offered by a BIT.

223. Claimants argue that in any event, Article XI does not relieve Argentina of its obligations to compensate Claimants for damages suffered as a result of breaches of the Treaty.

224. Claimants also reject the possibility of applying the rule provided by Article IV(3) of the Treaty. They are of the opinion that this provision does not apply to economic crises, and it does not authorize the host State to revoke

or suspend the protections given to foreign investors (Reply, ¶ 229).

225. Claimants invoke Article 27 of the International Law Commission's Draft Articles on State Responsibility. Claimants contend that even if the state of necessity defense is available to Argentina under the circumstances of this case, Article 27 of the Draft Articles makes clear that Argentina's obligations to Claimants are not extinguished and Argentina must compensate Claimants for losses incurred as a result of the Government's actions. Article 27 provides that "invocation of a circumstance precluding wrongfulness in accordance with this chapter is without prejudice to (a) compliance with the obligation in question… (b) the question of compensation for any material loss caused by the act in question" (Reply, ¶¶ 226-228).

b. Tribunal's Analysis

226. In the judgment of the Tribunal, from 1 December 2001 until 26 April 2003, Argentina was in a period of crisis during which it was necessary to enact measures to maintain public order and protect its essential security interests.

227. The Tribunal does not consider that the initial date for the state of necessity is the effective date of the Emergency Law, 6 January 2002, because, in the first place, the emergency had already started when the law was enacted. Second, should the Tribunal take as the initial date the day when the Emergency Law became effective, it might be reasonable to take as its closing date the day when the state of emergency is lifted by the Argentine State, a fact that has not yet taken place since the law has been extended several times.

228. It is to be pointed out that there is a factual emergency that began on 1 December 2001 and ended on 26 April 2003, on account of the reasons detailed below, as well as a legislative emergency, that begins and ends with the enactment and abrogation of the Emergency Law, respectively. It should be borne in mind that Argentina declared its state of necessity and has

extended such state until the present. Indeed, the country has issued a record number of decrees since 1901, accounting for the fact that the emergency periods in Argentina have been longer than the non-emergency periods. Emergency periods should be only strictly exceptional and should be applied exclusively when faced with extraordinary circumstances. Hence, in order to allege state of necessity as a State defense, it will be necessary to prove the existence of serious public disorders. Based on the evidence available, the Tribunal has determined that the situation ended at the time President Kirchner was elected.

229. Thus, Argentina is excused under Article XI from liability for any breaches of the Treaty between 1 December 2001 and 26 April 2003. The reasons are the following:

230. These dates coincide, on the one hand, with the Government's announcement of the measure freezing funds, which prohibited bank account owners from withdrawing more than one thousand pesos monthly and, on the other hand, with the election of President Kirchner. The Tribunal marks these dates as the beginning and end of the period of extreme crisis in view of the notorious events that occurred during this period.

231. Evidence has been put before the Tribunal that the conditions as of December 2001 constituted the highest degree of public disorder and threatened Argentina's essential security interests. This was not merely a period of "economic problems" or "business cycle fluctuation" as Claimants described (Claimants' Post-Hearing Brief, ¶ 14). Extremely severe crises in the economic, political and social sectors reached their apex and converged in December 2001, threatening total collapse of the Government and the Argentine State.

232. All of the major economic indicators reached catastrophic proportions in December 2001. An accelerated deterioration of Argentina's Gross Domestic Product (GDP) began in December 2001, falling 10 to 15 percent faster than

the previous year. Private consumption dramatically dropped in the fourth quarter of 2001, accompanied by a severe drop in domestic prices. Argentina experienced at this time widespread decline in the prices and in the value of assets located in Argentina. The Merval Index, which measures the share value of the main companies of Argentina listed on the Buenos Aires Stock Exchange, experienced a dramatic decline of 60% by the end of December 2001. By mid-2001, Argentina's country risk premium was the highest premium worldwide, rendering Argentina unable to borrow on the international markets, and reflecting the severity of the economic crisis.

233. At this time, capital outflow was a critical problem for the Government. In the fourth quarter of 2001, the Central Bank of Argentina lost US$ 11 billion in liquid reserves, amounting to 40%. The banking system lost 25% of its total deposits.

234. While unemployment, poverty and indigency rates gradually increased from the beginning of 1998, they reached intolerable levels by December 2001. Unemployment reached almost 25%, and almost half of the Argentine population was living below poverty. The entire healthcare system teetered on the brink of collapse. Prices of pharmaceuticals soared as the country plunged deeper into the deflationary period, becoming unavailable for low-income people. Hospitals suffered a severe shortage of basic supplies. Investments in infrastructure and equipment for public hospitals declined as never before. These conditions prompted the Government to declare the nationwide health emergency to ensure the population's access to basic health care goods and services. At the time, one quarter of the population could not afford the minimum amount of food required to ensure their subsistence. Given the level of poverty and lack of access to healthcare and proper nutrition, disease followed. Facing increased pressure to provide social services and security to the masses of indigent and poor people, the Government was forced to decrease its per capita spending on social services by 74%.

235. By December 2001, there was widespread fear among the population that the Government would default on its debt and seize bank deposits to prevent the bankruptcy of the banking system. Faced with a possible run on banks, the Government issued on 1 December 2001 Decree of Necessity and Emergency No. 1570/01. The law triggered widespread social discontent. Widespread violent demonstrations and protests brought the economy to a halt, including effectively shutting down transportation systems. Looting and rioting followed in which tens of people were killed as the conditions in the country approached anarchy. A curfew was imposed to curb lootings.

236. By 20 December 2001, President De la Rúa resigned. His presidency was followed by a succession of presidents over the next days, until Mr. Eduardo Duhalde took office on 1 January 2002, charged with the mandate to bring the country back to normal conditions.

237. All of these devastating conditions –economic, political, social– in the aggregate triggered the protections afforded under Article XI of the Treaty to maintain order and control the civil unrest.

238. The Tribunal rejects the notion that Article XI is only applicable in circumstances amounting to military action and war. Certainly, the conditions in Argentina in December 2001 called for immediate, decisive action to restore civil order and stop the economic decline. To conclude that such a severe economic crisis could not constitute an essential security interest is to diminish the havoc that the economy can wreak on the lives of an entire population and the ability of the Government to lead. When a State's economic foundation is under siege, the severity of the problem can equal that of any military invasion.

239. Claimants contend that the necessity defense should not be applied here because the measures implemented by Argentina were not the only means available to respond to the crisis. The Tribunal rejects this assertion. Article XI refers to situations in which a State has no choice but to act. A State may

have several responses at its disposal to maintain public order or protect its essential security interests. In this sense, it is recognized that Argentina's suspension of the calculation of tariffs in U.S. dollars and the PPI adjustment of tariffs was a legitimate way of protecting its social and economic system.

240. The Tribunal has determined that Argentina's enactment of the Emergency Law was a necessary and legitimate measure on the part of the Argentine Government. Under the conditions the Government faced in December 2001, time was of the essence in crafting a response. Drafted in just six days, the Emergency Law took the swift, unilateral action against the economic crisis that was necessary at the time (Hearing on the Merits, 25 January 2005, Ratti, Spanish Transcript, pp. 415-419).

241. In drafting the Emergency Law, the Government considered the interests of the foreign investors, and concluded that it "could not leave sectors of the economy operating with the brutally dollarized economy –[the] system was in crisis, so we had to cut off that process, and we had to establish a new set of rules for everybody." (Hearing on the Merits, 25 January 2005, Ratti, Spanish Transcript, p. 417). Argentina's strategy to deal with the thousands of public utility contracts that could not be individually assessed during the period of crisis was to implement "across-the-board solutions" and then renegotiate the contracts (Hearing on the Merits, 26 January 2005, Roubini, Spanish Transcript, p. 635). The Tribunal accepts the necessity of approaching enactment of a stop-gap measure in this manner and therefore rejects Claimants' objection that Argentina's unilateral response was not necessary.

242. The Tribunal accepts that the provisions of the Emergency Law that abrogated calculation of the tariffs in U.S. dollars and PPI adjustments, as well as freezing tariffs were necessary measures to deal with the extremely serious economic crisis. Indeed, it would be unreasonable to conclude that during this period the Government should have implemented a tariff increase pursuant to an index pegged to an economy experiencing a high inflationary

period (the United States). The severe devaluation of the peso against the dollar renders the Government's decision to abandon the calculation of tariffs in dollars reasonable. Similarly, the Government deemed that freezing gas tariffs altogether during the crisis period was necessary, and Claimants have not provided any reason as to why such measure would not provide immediate relief from the crisis.

243. The Tribunal will now turn to Article IV(3) of the Treaty, which provides:

> "Nationals or companies of either Party whose investments suffer losses in the territory of the other Party owing to war or other armed conflict, revolution, *state of national emergency*, insurrection, civil disturbance or other similar events shall be accorded treatment by such other Party no less favorable than that accorded to its own nationals or companies or to nationals or companies of any third country, whichever is the more favorable treatment, as regards any measures it adopts in relation to such losses." (Emphasis added)

244. Article IV(3) of the Treaty confirms that the States Party to the Bilateral Treaty contemplated the state of national emergency as a separate category of exceptional circumstances. That is in line with the Tribunal's interpretation of Article XI of the Treaty. Furthermore, the Tribunal has determined, as a factual matter that the grave crisis in Argentina lasted from 1 December 2001 until 26 April 2003. It has not been shown convincingly to the Tribunal that during that period the provisions of Article IV(3) of the Treaty have been violated by Argentina. On the contrary, during that period, the measures taken by Argentina were "across the board."

245. In the previous analysis, the Tribunal has determined that the conditions in Argentina from 1 December 2001 until 26 April 2003 were such that Argentina is excused from liability for the alleged violation of its Treaty obligations due to the responsive measures it enacted. The concept of excusing a State for the responsibility for violation of its international obligations during what is called a "state of necessity" or "state of emergency" also exists in international law. While the Tribunal considers

that the protections afforded by Article XI have been triggered in this case, and are sufficient to excuse Argentina's liability, the Tribunal recognizes that satisfaction of the state of necessity standard as it exists in international law (reflected in Article 25 of the ILC's Draft Articles on State Responsibility) supports the Tribunal's conclusion.[62]

246. In international law, a state of necessity is marked by certain characteristics that must be present in order for a State to invoke this defense. As articulated by Roberto Ago, one of the mentors of the Draft Articles on State Responsibility, a state of necessity is identified by those conditions in which a State is threatened by a serious danger to its existence, to its political or economic survival, to the possibility of maintaining its essential services in operation, to the preservation of its internal peace, or to the survival of part of its territory.[63] In other words, the State must be dealing with interests that are essential or particularly important.[64]

---

[62]Article 25 of the Draft Articles on Responsibility of States for Internationally Wrongful Acts provides:

> 1. "Necessity may not be invoked by a State as a ground for precluding the wrongfulness of an act not in conformity with an international obligation of that State unless the act:
>
> a) Is the only way for the State to safeguard an essential interest against a grave and imminent peril; and
>
> b) Does not seriously impair an essential interest of the State or States towards which the obligation exists, or of the international community as a whole.
>
> 2. In any case, necessity may not be invoked by a State as a ground for precluding wrongfulness if:
>
> a) The international obligation in question excludes the possibility of invoking necessity; or
>
> b) The State has contributed to the situation of necessity."

The ILC's Draft Articles, after some debate regarding the original prepared under the auspices of the Society of Nations in 1930, was abandoned and then resumed by the General Assembly in 1963. Its definitive version, due mainly to the works of Mssrs. Roberto Ago, Willem Riphagen and Gaetano Arangio-Ruiz, was approved in 1981 and subject to a revision in 1998, which was approved in 2001, during the 85th plenary session of the United Nations' General Assembly. (Session dated 12 December 2001, during the fifty-sixth session, Agenda item 162 of the Program, A/RES/56/83).

[64] Strupp. K., *Les règles générales du Droit de la paix*, RECUEIL DES COURS, 1934 I, T. 47, pp. 259-595, especially p. 568. Similarly, the ILC has defined the state of necessity as that situation where the only means of safeguarding an essential interest of the State against a grave and imminent peril is an act that is not in conformity with an international obligation binding that State with another State. In shaping the concept of state of necessity, one must make a compulsory reference to the Russian seal furs case. There, the Russian government banned the hunting of seals near the Russian shorelines,

footnote cont'd

247. The United Nations Organization has understood that the invocation of a state of necessity depends on the concurrent existence of three circumstances, namely: a danger to the survival of the State, and not for its interests, is necessary; that danger must not have been created by the acting State; finally, the danger should be serious and imminent, so that there are no other means of avoiding it.

248. The concept of state of necessity and the requirements for its admissibility lead to the idea of prevention: the State covers itself against the risk of suffering certain damages. Hence, the possibility of alleging the state of necessity is closely bound by the requirement that there should be a serious and imminent threat and no means to avoid it. Such circumstances, in principle, have been left to the State's subjective appreciation, a conclusion accepted by the International Law Commission. Nevertheless, the Commission was well aware of the fact that this exception, requiring admissibility, has been frequently abused by States, thus opening up a very easy opportunity to violate the international law with impunity. The Commission has set in its Draft Articles on State Responsibility very restrictive conditions to account for its admissibility, reducing such subjectivity.[65]

249. James Crawford, who was rapporteur of the Draft Articles approved in 2001, noted that when a State invokes the state of necessity, it has full knowledge of the fact that it deliberately chooses a procedure that does not abide an

---

including international waters and founded such decision on the absolute need to adopt immediate provisional measures. In a communication addressed, on the occasion of this incident, by the Russian foreign Minister, Chickline, to the British Ambassador, Morier, the main elements of the state of necessity were established: the absolutely exceptional nature of the alleged situation; the imminent character of the threat against an important State interest; the impossibility of avoiding the risk with other means, and the necessarily temporary nature of this justification, linked to the due danger's persistence. *See* United Nations, Report of the International Law Commission on the work performed during its 32nd session, p. 87.

[65] United Nations, Report A/CN.4/315, p. 78.

international obligation.[66] This deliberate action on the part of the State is therefore subject to the requirements of Article 25 of the Draft Articles, which must concur jointly and without which it is not possible to exclude under international law the wrongfulness of a State's act that violates an international obligation.

250. Taking each element in turn, Article 25 requires first that the act must be the only means available to the State in order to protect an interest. According to S.P. Jagota, a member of the Commission, such requirement implies that it has not been possible for the State to "avoid by any other means, even a much more onerous one that could have been adopted and maintained the respect of international obligations. The State must have exhausted all possible legal means before being forced to act as it does."[67] Any act that goes beyond the limits of what is strictly necessary "may not be considered as no longer being, as such, a wrongful act, even if justification of the necessity may have been admitted."[68]

251. The interest subject to protection also must be essential for the State. What qualifies as an "essential" interest is not limited to those interests referring to the State's existence. As evidence demonstrates, economic, financial or those interests related to the protection of the State against any danger seriously compromising its internal or external situation, are also considered essential interests. Roberto Ago has stated that essential interests include those related to "different matters such as the economy, ecology or other."[69] Julio Barboza affirmed that the threat to an essential interest would be identified by considering, among other things, "a serious threat against the existence of the State, against its political or economic survival, against the

maintenance of its essential services and operational possibilities, or against the conservation of internal peace or its territory's ecology."[70]

252. James Crawford has stated that no opinion may be offered *a priori* of "essential interest," but one should understand that it is not the case of the State's "existence", since the "purpose of the positive law of self-defense is to safeguard that existence."[71] Thus, an interest's greater or lesser essential, must be determined as a function of the set of conditions in which the State finds itself under specific situations. The requirement is to appreciate the conditions of each specific case where an interest is in play, since what is essential cannot be predetermined in the abstract.[72]

253. The interest must be threatened by a serious and imminent danger. The threat, according to Roberto Ago, "must be 'extremely grave' and 'imminent.'"[73] In this respect, James Crawford has opined that the danger must be established objectively and not only deemed possible.[74] It must be imminent in the sense that it will soon occur.

254. The action taken by the State may not seriously impair another State's interest. In this respect, the Commission has observed that the interest sacrificed for the sake of necessity must be, evidently, less important than the interest sought to be preserved through the action.[75] The idea is to prevent against the possibility of invoking the state of necessity only for the safeguard of a non-essential interest.

255. The international obligation at issue must allow invocation of the state of

necessity. The inclusion of an article authorizing the state of necessity in a Bilateral Investment Treaty constitutes the acceptance, in the relations between States, of the possibility that one of them may invoke the state of necessity.

256. The State must not have contributed to the production of the state of necessity. It seems logical that if the State has contributed to cause the emergency, it should be prevented from invoking the state of necessity. If there is fault by the State, the exception disappears, since in such case the causal relationship between the State's act and the damage caused is produced. The Tribunal considers that, in the first place, Claimants have not proved that Argentina has contributed to cause the severe crisis faced by the country; secondly, the attitude adopted by the Argentine Government has shown a desire to slow down by all the means available the severity of the crisis.

257. The essential interests of the Argentine State were threatened in December 2001. It faced an extremely serious threat to its existence, its political and economic survival, to the possibility of maintaining its essential services in operation, and to the preservation of its internal peace. There is no serious evidence in the record that Argentina contributed to the crisis resulting in the state of necessity. In this circumstances, an economic recovery package was the only means to respond to the crisis. Although there may have been a number of ways to draft the economic recovery plan, the evidence before the Tribunal demonstrates that an across-the-board response was necessary, and the tariffs on public utilities had to be addressed. It cannot be said that any other State's rights were seriously impaired by the measures taken by Argentina during the crisis. Finally, as addressed above, Article XI of the Treaty exempts Argentina of responsibility for measures enacted during the state of necessity.

258. While this analysis concerning Article 25 of the Draft Articles on State Responsibility alone does not establish Argentina's defense, it supports the

Tribunal's analysis with regard to the meaning of Article XI's requirement that the measures implemented by Argentina had to have been necessary either for the maintenance of public order or the protection of its own essential security interests.

259. Having found that the requirements for invoking the state of necessity were satisfied, the Tribunal considers that it is the factor excluding the State from its liability vis-à-vis the damage caused as a result of the measures adopted by Argentina in response to the severe crisis suffered by the country.

260. With regard to Article 27 of the United Nations' Draft Articles alleged by Claimants, the Tribunal opines that the article at issue does not specifically refer to the compensation for one or all the losses incurred by an investor as a result of the measures adopted by a State during a state of necessity. The commentary introduced by the Special Rapporteur establishes that Article 27 "*does not attempt to specify in what circumstances compensation would be payable*".[76] The rule does not specify if compensation is payable during the state of necessity or whether the State should reassume its obligations. In this case, this Tribunal's interpretation of Article XI of the Treaty provides the answer.

261. Following this interpretation the Tribunal considers that Article XI establishes the state of necessity as a ground for exclusion from wrongfulness of an act of the State, and therefore, the State is exempted from liability. This exception is appropriate only in emergency situations; and once the situation has been overcome, i.e. certain degree of stability has been recovered; the State is no longer exempted from responsibility for any violation of its obligations under the international law and shall reassume them immediately.

(iv) Consequences of the State of Necessity

262. Three relevant issues arise with respect to the Tribunal's finding Argentina is entitled to invoke the state of necessity as contemplated by Article XI, and general international law.

263. The first issue deals with the determination of the period during which the state of necessity occurred. As previously indicated, in the view of the Tribunal, the state of necessity in this case began on 1 December 2001 and ended on 26 April 2003, when President Kirchner was elected (*see* the Tribunal's Analysis). All measures adopted by Argentina in breach of the Treaty before[77] and after the period during which the state of necessity prevailed, shall have all their effects and shall be taken into account by the Tribunal to estimate the damages.

264. The second issue related to the effects of the state of necessity is to determine the subject upon which the consequences of the measures adopted by the host State during the state of necessity shall fall. As established in the Tribunal's Analysis, Article 27 of ILC's Draft Articles, as well as Article XI of the Treaty, does not specify if any compensation is payable to the party affected by losses during the state of necessity. Nevertheless, and in accordance with that expressed under paragraphs 260 and 261 *supra*, this Tribunal has decided that the damages suffered during the state of necessity should be borne by the investor.

265. The third issue is related to what Argentina should have done, once the state of necessity was over on 26 April 2003. The very following day (27 April), Argentina's obligations were once again effective. Therefore, Respondent should have reestablished the tariff scheme offered to LG&E or, at least, it should have compensated Claimants for the losses incurred on account of the

---

[77] The period before the state of necessity initiates with the injunction issued by the Argentine Court on 18 August 2000.

measures adopted before and after the state of necessity.

(v) Conclusions of the Tribunal

266. Based on the analysis of the state of necessity, the Tribunal concludes that, first, said state started on 1 December 2001 and ended on 26 April 2003; second, during that period Argentina is exempt of responsibility, and accordingly, the Claimants should bear the consequences of the measures taken by the host State; and finally, the Respondent should have restored the tariff regime on 27 April 2003, or should have compensated the Claimants, which did not occur. As a result, Argentina is liable as from that date to Claimants for damages.

VII. DECISION OF THE TRIBUNAL ON LIABILITY

267. For the foregoing reasons, the Tribunal renders its decision, partially granting LG&E's claims, as follows:

a. The claim for expropriation of the investment is hereby dismissed.

b. Argentina breached the standard of fair and equitable treatment, no less favorable treatment than that to be accorded under the international law, and adopted discriminatory measures, causing damage to LG&E. Argentina's abrogation of the guarantees under the statutory framework, as indicated under paragraph 175 *supra*, violated its obligations to Claimants' investments, giving rise to liability under the umbrella clause.

c. The standard prohibiting the adoption of arbitrary measures is not deemed to have been violated.

d. Between 1 December 2001 and 26 April 2003, Argentina was in a state of necessity, for which reason it shall be exempted from the payment of compensation for damages incurred during that period.

e. The Argentine Republic is liable for damages to Claimants for the aforementioned violations, except during the period of the state of necessity, which damages, including interest, as well as specification of the periods during which Respondent has incurred in violation of its international obligations, shall be determined in a next phase of the arbitration and in respect of which the Tribunal retains jurisdiction.

f. Any decision on the costs of the arbitration is reserved.

Made in Washington, D.C., in English and Spanish, both versions equally authentic.

AWARD

RENDERED BY AN ARBITRAL TRIBUNAL COMPOSED OF

STEWART BOYD, ARBITRATOR
MARC LALONDE, ARBITRATOR
BERNARD HANOTIAU, PRESIDENT

Date of dispatch to the parties: July 29, 2008

TABLE OF CONTENTS

PAGE

CHAPTER I. THE PARTIES AND THE BACKGROUND OF THE DISPUTE 1

CHAPTER II. THE PROCEDURE 5
I. INSTITUTION OF THE PROCEEDINGS 5
II. PROCEDURAL RULES AND AGENDA: MINUTES OF THE FIRST SESSION..........7
III. FIRST REQUESTS FOR PRODUCTION OF DOCUMENTS: PROCEDURAL ORDER NO. 1..........8
IV. CLAIMANTS' SUBSTANTIATED REQUESTS FOR PRODUCTION OF DOCUMENTS: PROCEDURAL ORDER NO. 2 9
V. CLAIMANTS' REQUEST FOR FURTHER PRODUCTION OF DOCUMENTS: PROCEDURAL ORDER NO. 3 10
VI. SECOND REQUESTS FOR PRODUCTION OF DOCUMENTS: PROCEDURAL ORDER NO. 4 12
VII. EXCHANGE OF WRITTEN PLEADINGS 12
VIII. ORAL PLEADINGS..........14
IX. POST HEARING SUBMISSIONS 17
X. CLOSING OF THE PROCEEDINGS..........17

CHAPTER III. THE FACTS 18
I. UP TO THE TERMINATION OF THE INVESTMENT CONTRACT 18
A. The foundation of KaR-Tel..........18
B. The GSM license..........20
C. The Motorola loan..........21
D. The alteration of the participations in KaR-Tel 23
E. The Investment Contract..........23
F. The foundation of Telecom Invest and the introduction of Telsim 24
G. The development of KaR-Tel's Business 25
II. THE TERMINATION OF THE INVESTMENT CONTRACT AND ITS REPERCUSSIONS 26
A. The termination of the Investment Contract 26
B. The Extraordinary General Meeting of Shareholders of KaR-Tel..........26
C. The proceedings issued in Almaty City Courts 28
1. The Telecom Invest Claim..........28
2. The KaR-Tel Claim..........29
3. The Consolidation of Telecom and KaR-Tel cases 30
4. The forensic examination of KaR-Tel 30
D. The attempts to sell Telecom Invest's participation in KaR-Tel 31
E. Mr. Seysembayev's offer to purchase Claimants' participation in KaR-Tel..........32
F. Claimants' complaints to Respondent 32
G. The judgment of the Almaty City Court on June 6, 2003..........33
H. The appointment of a Working Group..........34
I. Criminal investigation..........35
J. The judgment of the Supreme Court of July 23, 2003..........36

K. The judgment of the Supreme Court Presidium of October 30, 2003 - The following restructuring of KaR-Tel – and the purchase of KaR-Tel by VimpelCom....36
1. The judgment of the Supreme Court Presidium....36
2. The restructuring of KaR-Tel....37
3. The sale of KaR-Tel to VimpelCom....37
III. CLAIMANTS SEIZED BY TSDIF....37

CHAPTER IV. THE JURISDICTION OF THE ARBITRAL TRIBUNAL....38
I. CLAIMANTS' POSITION....38
A. Respondent consented to ICSID jurisdiction over this dispute....39
1. Claimants' investments were fully legal....39
2. Claimants' investments did not violate the principle of good faith, the principle "*nemo auditur propriam turpitudinem allegans*," or international public policy....43
B. Claimants have standing to bring this arbitration....44
1. Rumeli and Telsim are the proper Claimants in this arbitration....44
2. There was no assignment of Claimants' claim to the TSDIF....49
3. The TSDIF was not subrogated to Claimants' claims....49
4. There is no reason to pierce the corporate veil....49
5. Respondent's allegation that Article 25 of the Convention imposes a control test must fail....50
6. TSDIF would satisfy the jurisdictional requirements of ICSID in any event....52
C. Claimants have gone far beyond establishing a *prima facie* case on the merits....53
D. Respondent is a proper party to this dispute....54
E. Claimants have standing to challenge the cancellation of the Investment Contract....54
F. The Foreign Investment Law is a valid secondary basis for establishing jurisdiction....55
II. RESPONDENT'S POSITION....56
A. Respondent did not consent to ICSID jurisdiction over this dispute....56
1. Claimants' investments were not legal....57
2. Claimants' investments violated the principle of good faith, the principle *nemo auditur propriam turpitudinem allegans* and international public policy....59
B. Claimants do not have standing to bring this arbitration....61
1. The Turkish State is the real party in interest in this arbitration....61
2. The assignment of Claimants' cause of action....67
3. The TSDIF was subrogated in Claimants' claim....67
4. Alter ego and piercing the corporate veil....69
5. *"Control"* and *"incorporation"*....69
6. The claim brought by TSDIF does not satisfy the jurisdictional requirements of ICSID....72
C. No *prima facie* case....76
D. Respondent is not a proper party to the dispute....76

E. Claimants do not have standing to challenge the termination of the Investment Contract 77
F. The Foreign Investment Law is not applicable 77
G. Admissibility 78
III. DECISION OF THE ARBITRAL TRIBUNAL 78

CHAPTER V. THE CLAIMS 86
I. OVERVIEW OF THE CLAIMS 86
II. THE PARTIES' POSITION ON RESPONDENT'S PURPORTED SCHEME 87
A. Claimants' position 87
1. The general context 87
a) Claimants' investment 87
b) The Republic of Kazakhstan and the involvement of President Nazarbayev's family 91
2. The termination of the Investment Contract 94
3. Telecom Invest and Respondent colluded to effect the illegal compulsory sale of Claimants' interest in KaR-Tel 98
a) The KaR-Tel EGM 98
b) The Injunctive relief proceedings 102
4. The actions of Respondent's police authorities 103
5. The attempt to sell Telecom Invest's participation in KaR-Tel 104
6. The actions of the Working Group 105
7. The actions of Respondent's Judiciary 107
8. The attempts to pay Claimants to go away 111
9. The sale of KaR-Tel to VimpelCom 112
10. General observations on the hearing and on circumstantial evidence 113
a) Observations on the hearing 113
b) Circumstantial evidence 116
B. Respondent's position 118
1. The general context 118
a) Claimants' investment 118
b) The Republic of Kazakhstan and the involvement of President Nazarbayev's family 120
2. The termination of the Investment Contract 121
3. On the purported collusion between Telecom Invest and Respondent to effect the compulsory sale of Claimants' interest in KaR-Tel 126
a) The KaR-Tel EGMs 126
b) The Injunctive relief proceedings 129
4. The actions of Respondent's police authorities 131
5. The attempt to sell Telecom Invest's participation in KaR-Tel 133
6. The actions of the Working Group 134
7. The actions of Respondent's Judiciary 138
8. The alleged attempts to pay Claimants to go away 144
9. The sale of KaR-Tel to VimpelCom 146
10. The conspiracy theory 147

III. ON THE PURPORTED BREACHES BY RESPONDENT OF ITS OBLIGATIONS 149
A. The legal framework 149
1. Claimants' position 149
2. Respondent's position 151
3. The applicable standards: Decision of the Arbitral Tribunal 152
B. Fair and equitable treatment 154
1. Claimants' position 154
a) The Standard 154
b) Application to the facts of the case 156
2. Respondent's position 157
a) The standard 157
b) Application to the facts of the case 161
3. Decision of the Arbitral Tribunal 161
a) The Standard 161
b) Application to the facts of the case 162
C. Denial of justice 165
1. Claimants' position 165
a) The standard 165
b) Application to the facts of the case 167
2. Respondent's position 169
a) The standard 169
b) Application to the facts of the case 170
3. Decision of the Arbitral Tribunal 172
a) The Standard 172
b) Application to the facts of the case 173
D. Full protection and security 174
1. Claimants' position 174
a) The standard 174
b) Application to the facts of the case 175
2. Respondent's position 176
a) The standard 176
b) Application to the facts of the case 177
3. Decision of the Arbitral Tribunal 177
a) The Standard 177
b) Application to the facts of the case 178
E. Unreasonable, arbitrary, or discriminatory measures 178
1. Claimants' position 178
a) The standard 178
b) Application to the facts of the case 179
2. Respondent's position 181
a) The standard 181
b) Application to the facts of the case 181
3. Decision of the Arbitral Tribunal 181

a) The Standard 181
b) Application to the facts of the case 182
F. Expropriation 183
1. Claimants' position 183
a) The standard 183
b) Application to the facts of the case 184
2. Respondent's position 185
a) The standard 185
b) Application to the facts of the case 186
3. Decision of the Arbitral Tribunal 186
a) The Standard 186
b) Application to the facts of this case. 189

CHAPTER VI. COMPENSATION AND DAMAGES 194
I. PRELIMINARY REMARKS ON CLAIMANTS' CLAIM FOR DAMAGES 194
A. Respondent's position 194
B. Claimants' position 194
II. GENERAL PRINCIPLES 195
A. The compensation in international law. 195
1. Claimants' position 195
2. Respondent's position 196
B. Valuation standards 196
1. Claimants' position 196
2. Respondent's position 198
C. The valuation date 200
1. Claimants' position 200
2. Respondent's position 202
D. Causation 203
III. CALCULATION OF DAMAGES AND QUANTUM 205
1. Claimants' position 205
a) The position developed in Claimants' Memorials 205
b) The position developed in Claimants' Post-Hearing Memorial 207
2. Respondent's position 209
IV. DECISION OF THE ARBITRAL TRIBUNAL 214
A. The principles of compensation 214
B. The calculation of the compensation and its amount 216
V. COSTS 226

AWARD 227

CHAPTER I. THE PARTIES AND THE BACKGROUND OF THE DISPUTE

1. Claimants in this arbitration are Rumeli Telekom A.S. ("*Rumeli*") and Telsim Mobil Telekomunikasyon Hizmetleri A.S. ("*Telsim*"), (collectively "*Claimants*"). Both Rumeli and Telsim are telecommunications companies, incorporated in Turkey as an "*anonim sirket*" (joint stock company). Both companies' address is Mehmet Akif Mah/Inonu Cad., Star Sokak No. 2, Ikitelli 34540 Istanbul, Republic of Turkey. Claimants are represented in this arbitration by Mr. Hamid G. Gharavi and Ms. Brenda Horrigan, SALANS, 9 rue Boissy d'Anglas, 75008 Paris, France.

2. Respondent in this arbitration is the Republic of Kazakhstan ("*Respondent*," or the "*Republic*"). It is represented in this arbitration by Mr. Timur Issabekov, Director of the Department of International Law, Ministry of Justice of the Republic of Kazakhstan, and by Mr. David Warne, Mr. Gautam Bhattacharyya and Ms. Chloe J. Carswell, Reed Smith, Beaufort House, 15 St Botolph Street, London EC3A 7EE, United Kingdom. Respondent was initially represented by Mr. John Emmott, Michael Wilson & Partners, Ltd, 5th floor, 36 Samal-1 Almaty 050059, Republic of Kazakhstan and Ms. Azhar Kuzubayeva, Almira & Co LLP, 50 Long Acre, London WC2E 9JR, UK.

3. On May 16, 1998, Rumeli and Investel, a Kazakhstan closed joint stock company, entered into a Foundation Agreement for the creation of the joint venture KaR-Tel in the form of a Kazakhstan limited liability partnership, for the provision of mobile telecommunications services on the territory of the Republic.

4. At the creation of KaR-Tel, Rumeli owned 70% of KaR-Tel and Investel owned 30%. The initial charter capital of KaR-Tel was 750,000 Tenge (equivalent to approximately USD 10,000 at the time).

5. Immediately after the execution of the Foundation Agreement, KaR-Tel prepared to participate in the auction for the second GSM 900 license issued in Kazakhstan (the

"*License*"), held by the Ministry of Transportation and Telecommunications ("*MTT*") of the Republic.

6. The auction for the License took place on July 31, 1998 and KaR-Tel won the License with a bid of USD 67,500,000. The License Agreement between KaR-Tel and the MTT was signed on August 10, 1998. It set forth the conditions for the sale by the MTT to KaR-Tel of "*the right to use the radio-frequency spectrum for the creation and operation of a GSM-standard communications network in the Republic of Kazakhstan"* for a period of 15 years.

7. Around October 1998, KaR-Tel started to negotiate with the State Committee on Investment an agreement granting KaR-Tel investment incentives. On May 20, 1999, KaR-Tel and the Investment Committee executed Contract N° 0123-05-99 (the "*Investment Contract*"). The Investment Contract characterized the object of the investment activity as *"the creation and exploration of digital cellular radiotelephone connection of the GSM (900) standard on the territory of the Republic of Kazakhstan*." It granted KaR-Tel tax and other benefits. The term of the Investment Contract was set to expire on July 31, 2009.

8. On December 31, 2000, Telsim acquired 15% of the partnership from Rumeli and was officially registered as a participant in KaR-Tel on July 27, 2001. During this same period, Investel's participatory interest – which had increased from 30% to 40% in the spring of 1999 – was transferred to Telecom Invest, a separate Kazakhstan limited liability partnership.

9. Claimants allege to have undertaken important "*investments*" on the territory of the Republic by means of establishment of KaR-Tel, by providing know-how and marketing services in the field of telecommunications, by establishing a national administrative and commercial network and by providing extensive financing and guarantees to KaR-Tel, with the consequence that KaR-Tel became one of the leading GSM operators in the Republic.

10. According to Claimants, once KaR-Tel's success was assured, the local partner's shareholders, themselves Kazakhstan officials and/or members of the empire of the President of Kazakhstan, devised a scheme to orchestrate Claimants' expulsion from KaR-Tel in a definitive manner and to keep all of KaR-Tel for their sole benefit. It is Claimants' allegation that:

- the local partners exploited their political and personal ties with Respondent to obtain from the Investment Committee the termination of the Investment Contract;
- the local partners then alleged that Claimants were responsible for this termination and that the latter caused significant damages to KaR-Tel;
- the local partners called a general meeting of the shareholders of KaR-Tel without sending a notice to Claimants;
- at this purported general meeting, where Claimants could not have been present, it was unilaterally decided by the local partners, that, because of the harm caused by Claimants to KaR-Tel, Claimants' shareholding had to be compulsorily transferred to KaR-Tel to the final benefit of its remaining shareholders, *i.e.,* the local partners;
- this decision to sell Claimants' 60% stake in KaR-Tel was taken in violation of Kazakh law and was irregularly confirmed by the Kazakh Judiciary;
- the Kazakh Judiciary set the value of the shares at a mere USD 3,000, whereas, less than a year later, the local partners (and other parties in interest) sold 100% of KaR-Tel to another investor (VimpelCom) for the sum of USD 350 million.

11. Therefore, Claimants invoke Respondent's collusion with the local partners and a violation of international law, encompassing, *inter alia*, Respondent's wrongful termination of the Investment Contract, its resulting denial of Claimants' right to challenge the termination, its eviction of Claimants from KaR-Tel through the Judiciary and its failure to grant Claimants adequate compensation.

12. According to Claimants, these actions, together with further acts and omissions detailed below, constitute breaches of Respondent's obligations under international law, under the Agreement between the Republic of Kazakhstan and the Republic of Turkey concerning the Reciprocal Promotion and Protection of Investments, dated May 1, 1992 (the *"Bilateral Investment Treaty,"* or *"BIT"*), and under the Law of the Republic of Kazakhstan on Foreign Investments dated December 27, 1994 (the *"Foreign Investment Law"* or *"FIL"*).

13. Claimants' allegations are strongly denied and disputed by Respondent.

CHAPTER II. THE PROCEDURE

I. INSTITUTION OF THE PROCEEDINGS

14. On July 20, 2005, ICSID received a Request for the institution of arbitration proceedings under the ICSID Convention on behalf of Rumeli and Telsim against the Republic.

15. On July 21, 2005, The ICSID Secretariat (the "Secretariat") transmitted copies of the Request and of its accompanying documentation to the Republic.

16. On August 2, 2005, the Secretariat asked Claimants to provide their observations concerning the text of the three versions (English, Russian and Turkish) of Article VII(2) of the Bilateral Investment Treaty in relation to the issue whether the provision subjects the recourse to arbitration to the pre-condition of recourse to local courts.

17. Claimants answered in a letter dated August 4, 2005, which was transmitted by the Secretariat to the Republic.

18. In their letter, Claimants set forth that the Turkish language version of Article VII(2) of the Bilateral Investment Treaty was the only one subjecting the recourse to arbitration to the pre-condition of recourse to local courts and that the text of the other language versions (English, Russian) did not. Claimants further alleged that even if recourse to local courts was required, Respondent had, through its unfair, inequitable, arbitrary, discriminatory and unlawful measures deprived Claimants of the possibility of meaningfully exercising any such action, and Respondent therefore could not rely on any such alleged obligation to resist jurisdiction. Claimants further submitted that they additionally relied, through the Most Favorable Nation Clause contained in Article II of the Bilateral Investment Treaty, on the other bilateral treaties entered into by Kazakhstan that do not contain any such prerequisite to ICSID arbitration. Claimants finally submitted that they relied on the Foreign Investment Law as an alternative basis for ICSID jurisdiction.

19. By letter of August 30, 2005, in accordance with Article 36 of the ICSID Convention, the Secretary-General of ICSID registered the Request for Arbitration and, on the same day, notified the parties of the registration, inviting them to proceed to the constitution of the Arbitral Tribunal as soon as possible.

20. By letter of September 6, 2005, Claimants proposed that the Tribunal consist of three arbitrators, one to be appointed by each party by September 30, 2005; if either party failed to appoint its arbitrator within this deadline, such arbitrator would be appointed by the Secretary-General of ICSID. Claimants further proposed that the third arbitrator, who would be the President of the Tribunal, be appointed by agreement of the two party-appointed arbitrators. If the two arbitrators failed to agree on the appointment of the third arbitrator within fifteen days of the date by which both arbitrators had accepted their appointment, the third presiding arbitrator would be appointed by the Secretary-General of ICSID. Finally, Claimants proposed that the Secretary-General of ICSID be allowed to appoint arbitrators outside the ICSID Panel of Arbitrators but only arbitrators who would have experience in ICSID arbitration, whether as counsel or arbitrator.

21. By letter of September 29, 2005, Respondent agreed to Claimants' proposal on the method and timetable for the constitution of the Tribunal and requested the postponement of the September 30, 2005 date proposed by Claimants for the appointment of the party-appointed arbitrators.

22. By letter of September 30, 2005, Claimants agreed to postpone the date of the appointment of the party-appointed arbitrators until October 21, 2005, subject to an express confirmation of the method and timetable for the constitution of the Tribunal by Respondent by no later than October 7, 2005.

23. By letter of October 6, 2005, Respondent expressly accepted Claimants' proposed method and timetable and requested the postponement to October 30, 2005 of the October 21, 2005 date proposed by Claimants for the appointment of the party-appointed arbitrators.

24. By letter of October 7, 2005, Claimants agreed to postpone the date of the appointment of the party-appointed arbitrators until October 30, 2005.

25. Thereafter, by letter of October 31, 2005, the Secretariat acknowledged receipt of a letter of September 29, 2005 from Respondent informing that it had appointed Mr. Stewart Boyd CBE Q.C., a national of the United Kingdom, as its arbitrator. In its letter, the Secretariat also acknowledged receipt of a letter of October 30, 2005 from Claimants informing that they had appointed Mr. Marc Lalonde P.C., O.C., Q.C., a national of Canada, as their arbitrator. Both arbitrators accepted their appointment on November 2, 2005.

26. Following an extension of the time limit to appoint the third presiding arbitrator, on December 9, 2005, the Secretariat informed the parties that Messrs. Boyd and Lalonde had notified the Centre on December 8, 2005 of their appointment of Mr. Bernard Hanotiau, a national of Belgium, as the President of the Tribunal. The Secretariat, on behalf of the Secretary-General of ICSID, also informed the parties that, having received from each arbitrator the acceptance of his appointment, the Arbitral Tribunal was deemed to have been constituted, and the proceedings were deemed to have begun on December 9, 2005.

27. In accordance with ICSID Arbitration Rule 6, Mrs. Martina Polasek, Counsel at ICSID, was designated to serve as Secretary of the Tribunal. On May 31, 2007, the Secretariat informed the Arbitral Tribunal and the parties that Mrs. Polasek would be temporarily replaced by Ms. Eloïse Obadia, Senior Counsel, from June 1, 2007. Mrs. Polasek returned to her functions in this case on November 26, 2007.

II. PROCEDURAL RULES AND AGENDA: MINUTES OF THE FIRST SESSION

28. The first session of the Arbitral Tribunal concerning the procedural rules and the agenda of the arbitration was held on January 30, 2006, by telephone conference among the Members of the Tribunal and the Secretary of the Tribunal. The parties had agreed that the Tribunal hold the first session without the parties.

29. The first session considered matters listed on an agenda circulated to the parties by the Secretary on January 12, 2006, as well as the parties' joint proposals of January 27, 2006 regarding these matters (attached to the Minutes as Annex 1). Counsel for Respondent had by communication of January 29, 2006 added an observation to the parties' joint proposals which was equally taken into consideration.

30. Following the first session, by communications to the parties of January 31 and February 10, 2006, the Tribunal made certain proposals regarding items Nos. 2, 3, 4, 14 and 17 of the agenda. The parties responded to certain of the proposals by a joint communication of February 2, 2006 and individual communications of February 14, 2006 (from Claimants) and February 14, 15 and 23, 2006 (from Respondent). The above-mentioned communications were attached to the Minutes as Annex 2.

31. The Minutes of the first session, signed by the President and the Secretary of the Tribunal, were transmitted to the parties on March 20, 2006.

III. FIRST REQUESTS FOR PRODUCTION OF DOCUMENTS: PROCEDURAL ORDER NO. 1

32. The agreed timetable of the arbitration provided for a first joint submission of requests for production of documents to be submitted by March 17, 2006. On that date, the parties filed a joint submission of their respective requests, including any objections to the other party's requests, in tabular form.

33. On March 17, 2006, Respondent informed the Arbitral Tribunal that it would file additional remarks by Friday, March 24, 2006; however, the Tribunal did not receive any remarks by that date.

34. On March 28, 2006, the Arbitral Tribunal granted Respondent until Friday, March 31, 2006 to file its additional remarks on Claimants' request for production of documents; Claimants were granted the possibility to comment on Respondent's remarks by April 4, 2006.

35. Also on March 28, 2006, Respondent supplied to the Arbitral Tribunal an English translation of article 518 of the Tax Code of the Republic of Kazakhstan, requested by the Arbitral Tribunal on March 27, 2006.

36. On March 31, 2006, Respondent filed with the Secretary-General of ICSID objections to the jurisdiction of the Tribunal.

37. On April 3, 2006, the Arbitral Tribunal informed the parties that in accordance with ICSID Arbitration Rule 41(3) and (4), the proceedings on the merits were suspended and the parties were requested to file observations on whether the objections to jurisdiction should be dealt with as a preliminary question or should be joined to the merits of the dispute. Claimants were invited to file their observations by April 7, 2006, Respondent was invited to file its reply observations by April 12, 2006 and Claimants their rejoinder by April 17, 2006. The parties filed submissions according to the calendar.

38. The parties also filed additional remarks on production of documents on April 24 and 25, 2006.

39. On April 26, 2006, the Tribunal decided, in accordance with Rule 41(4) of the ICSID Arbitration Rules, to join the objections on jurisdiction to the merits of the dispute.

40. In its Procedural Order No. 1 dated April 28, 2006, the Arbitral Tribunal allowed some of the requests for production of documents. The Tribunal also reserved its decision on other requests, considering that it was not sufficiently informed to make a reasoned decision. It therefore invited Claimants to make additional submissions by May 4, 2006, and Respondent to further comment on the issue by May 10, 2006.

IV. CLAIMANTS' SUBSTANTIATED REQUESTS FOR PRODUCTION OF DOCUMENTS: PROCEDURAL ORDER NO. 2

41. In accordance with Procedural Order No. 1, Claimants further substantiated their request No. 11 for production of documents by letter dated May 4, 2006, and Respondent commented on it by letter dated May 10, 2006.

42. In accordance with Procedural Order No. 1, Respondent further substantiated its objections to Claimants' request No. 13 for production of documents by letter dated May 5, 2006 and Claimants commented on it by email of May 11, 2006.

43. In its Procedural Order No. 2 dated May 16, 2006, the Arbitral Tribunal ordered the production of certain requested documents.

V. CLAIMANTS' REQUEST FOR FURTHER PRODUCTION OF DOCUMENTS: PROCEDURAL ORDER NO. 3

44. In their letter dated July 24, 2006, Claimants requested a further production of documents. In their Request, they pointed out that on July 11, 2006, Respondent had submitted an initial first list of 249 documents ("List 1") representing the documents in *"its possession or custody or power"* and responsive to Procedural Order No. 1. On July 12, 2006, Respondent retracted this list to replace it with a second list of 229 responsive documents ("List 2"). When Respondent produced the documents responsive to Procedural Order No. 1, on July 20, 2006, it then enclosed a third list of 229 documents ("List 3") which Claimants considered identical to List 2.

45. Claimants submitted that the documents removed from List 1 were exchanges between various Ministries of Respondent as well as minutes of internal meetings of such ministries. Therefore, according to Claimants, the disputed documents clearly fell within the scope of the documents that Respondent was ordered to produce under Procedural Order No. 1. Claimants therefore requested the Arbitral Tribunal to order Respondent to immediately produce the disputed documents.

46. On July 28, 2006, in its letter in response to Claimants' request, Respondent submitted that the disputed documents were privileged by reason of the fact that they were confidential documents passing between Respondent's legal advisers (including internal legal advisers) and Respondent (including its Ministries) for the purpose of seeking or providing legal advice, and/or were created with the sole or dominant purpose of litigation arising out of the matters underlying this dispute.

47. In its Order of July 31, 2006, the Arbitral Tribunal decided the following in relation to the disputed documents:

> *We are not satisfied from the description of the documents listed in Annex 3 attached to the Claimant's letter of 24 July 2006 that any of them are privileged, but are prepared to allow the Respondents until 4 August 2006 to provide any further material in support of their claim for privilege, e.g. by identifying in the case of each document the litigation (if any) for which the relevant communication was prepared, and the legal adviser (if any) by whom or to whom the communication was sent.*

48. On August 5, 2006, the Arbitral Tribunal issued the following Direction:

> *1. With reference to paragraph 1 of the Tribunal's order of July 31, 2006, the August 4, 2006 deadline for the Respondent's response is extended until August 9, 2006. The Respondent should send its response directly to the Claimants, all Members of the Tribunal and the Secretariat on August 9. No further extension will be granted.*
>
> *2. The Tribunal will issue its decision on August 10, 2006.*
>
> *3. The Claimants should be prepared to file their memorial by close of business on August 11, 2006.*
>
> *4. If the Tribunal were to decide that all or part of the documents are not privileged and should be produced, it will order their immediate production and will consider granting a very short extension for the filing of the Claimants' memorial."*

49. On August 9, 2006, Respondent sent to the ICSID Secretariat a letter containing the substantiation of its claim that the disputed documents were privileged.

50. In its Procedural Order No. 3 dated August 10, 2006, the Arbitral Tribunal, taking into consideration the parties' observations and comments, considered that certain documents were privileged and ordered the production of certain other documents.

VI. SECOND REQUESTS FOR PRODUCTION OF DOCUMENTS: PROCEDURAL ORDER NO. 4

51. The agreed timetable of the arbitration provided for a second joint submission of requests for production of documents to be submitted within three weeks of the filing of Respondent's Counter-Memorial. This time period was subsequently extended.

52. The parties exchanged correspondence on this matter on January 10 and 12, February 5, 7, 12, 13, 15 and 27, 2007. On March 7, 2007, the parties filed a joint submission of their respective requests in tabular form. Respondent filed an additional observation on March 7, 2007.

53. The Tribunal, in a Procedural Order No. 4 dated March 22, 2007, took note of the parties' agreement on certain requests; it granted some of the parties' further requests, and dismissed others.

VII. EXCHANGE OF WRITTEN PLEADINGS

54. The timetable contained in the Minutes of the first session of the Arbitral Tribunal was amended by letters dated March 28, 2006, April 26, 2006, August 10, 2006, September 12, 2006, December 6, 2006, May 7, 2007 and June 29, 2007. Each party filed its written submissions pursuant to these amended directions.

55. Claimants filed a Memorial dated August 21, 2006, together with exhibits and legal authorities.

56. Respondent filed a Counter-Memorial dated December 14, 2006, together with exhibits and legal authorities.

57. Claimants then filed a Reply dated February 27, 2007, together with exhibits and legal authorities.

58. Respondent subsequently filed a Rejoinder dated May 23, 2007, together with:

- exhibits;

- legal authorities;
- an expert report on Kazakh procedural law by Mr. Mukhamedshin;
- an expert report on Kazakh criminal law by Ms Suleimenova;
- an expert report on Kazakh civil law by Professor Kaudyrov and Professor Klimkin;
- an expert report on quantum by Mr. Kaczmarek of Navigant Consulting; and
- an expert report on Turkish law by Mr. Erkam.

59. On June 29, 2007, the Secretariat of ICSID informed the parties that, in respect to the letters from Claimants dated June 26, 2007 concerning the difficulty for Claimants to find a Kazakh law expert willing to testify, and the letters from Respondent dated June 26 and 27, 2007 concerning Claimants' response to Respondent's case on jurisdiction, the Arbitral Tribunal issued the following directions:

> *In relation to Kazakh law we invite counsel for the Claimants to appoint themselves a non-Kazakh law expert. The report should be filed by July 31, 2007.*
>
> *The Arbitral Tribunal also authorizes the Claimants to file an additional submission strictly limited to jurisdiction, including a rebuttal expert report on Turkish law limited to jurisdiction by July 31, 2007.*

60. On August 3, 2007, Claimants filed:

- a Rejoinder on jurisdiction;
- witness Statements of Mr. Bora Agilönü and Dr. Yasar Akgun;
- an expert report of Professor Ziya Akinci onTurkish law; and
- an expert report of Professor A. P. Sergeyev on Kazakh law.

61. On the same date, Respondent filed witness statements of Mr. Mirbulat Abuov, Mr. Aidan Karibjanov, Mr. Alexander Podporin, Mr. Imin Sabirov, Mr. Iskander Yerimbetov and Mr. Vadim Zverkov.

62. On September 19, 2007 Claimants filed a request on some procedural issues. On September 24, 2007, the Secretariat of ICSID informed the parties that, after careful

consideration of Claimants' request and Respondent's answer of September 21, 2007, the Arbitral Tribunal had decided as follows:

> *1. (...)*
>
> *2. The Arbitral tribunal takes note that the parties agree that Respondent may file a witness statement by Judge Begaliev limited to the question of bribery raised in Mr. Agilonu's statement. The Tribunal decides that the filing of this witness statement must take place no later than October 5 and that Claimants will have the right to file a rebuttal witness statement by Mr. Agilonu, limited to the points covered by Judge Begaliev, no later than October 16.*
>
> *3. Respondent's request No. 2 [permission to amend their Memorials to include new allegations found in a witness statement filed by the Claimants] is denied. Given the proximity of the hearings, the Arbitral Tribunal finds more appropriate that the issue raised by Respondent be dealt with in the course of the oral submissions and testimonies.*
>
> *4. The Arbitral Tribunal takes note that Respondent has not made any objection against the filing by Claimants of a witness statement by Mr. Koksaldi. The Tribunal decides that the filing of this witness statement must take place no later than October 5."*

63. On October 5, 2007, Respondent filed the witness statement of Judge Bakhytbek Adilkhanovich Begaliev. On the same date, Claimants filed the witness statement of Mr. Huseyin Koksaldi.

VIII. ORAL PLEADINGS

64. On September 11, 2007, the Secretariat of ICSID informed the parties that, after careful consideration of the letters of August 21, September 7, and September 10, 2007 from Respondent and the letters of August 10 and September 6, 2007 from Claimants, the Tribunal had issued the following direction regarding the arrangements for the hearing scheduled for October 19 and from October 22 to 26, 2007:

> *The Arbitral Tribunal has noted the agreement of the parties on the following issues:*
>
> > *1. The hearing will take place in Paris. The venue will be decided by ICSID.*

> *2. The parties will not use livenotes. There will be daily transcripts.*
>
> *3. There will be post-hearing submissions, the time limit and contents to be determined by the Tribunal after consultation with the parties.*

As far as the other disputed issues are concerned, the Arbitral Tribunal has taken the following decisions:

> *1. The Arbitral Tribunal considers that written opening submissions are not necessary since the opening submissions will be transcribed by the court reporter.*
>
> *2. The Arbitral Tribunal would like the parties to prepare a common core bundle to be submitted to the Tribunal at the hearing.*
>
> *3. The Arbitral Tribunal has no objection to the submission of a bundle containing the Kazakh legislation. For its preparation, the parties should consult with each other as to its presentation and contents.*
>
> *4. The Arbitral Tribunal agrees that Mr. Prokofiev be retained as translator/interpreter. The parties may retain additional interpreters if they wish, in order to check the accuracy of Mr. Prokofiev's translations/interpretation.*
>
> *5. The Arbitral Tribunal also invites the parties to inform them whether there are at this moment other outstanding procedural issues to be decided and/or discussed during a telephone conference.*

65. On September 19, 2007 Claimants filed a request on some procedural issues. On September 24, 2007, the Secretariat of ICSID informed the parties that, after careful consideration of Claimants' request and Respondent's answer of September 21, 2007, the Arbitral Tribunal had decided as follows:

> *Pursuant to article 34(2)(a) of the ICSID Arbitration Rules, the Arbitral Tribunal calls upon Respondent to produce as witness at the hearings, Mr. Kulibayev and Mr. Orazbekov. Respondent is invited to inform the persons concerned of the Tribunal's decision and to ask them to attend the hearings. On the other hand, the Arbitral Tribunal is also ready to send*

itself a letter to these persons and, in that respect, requests their precise address in Kazakhstan by return fax.

(...)

66. On September 24, 2007, the parties transmitted an agreed timetable and framework for the hearing to the Secretary of the Arbitral Tribunal.

67. On October 10, 2007, the Secretariat of ICSID sent a letter, on behalf of the Arbitral Tribunal, to Mr. Orazbekov inviting him to attend the hearing, in person or by video-link, to serve as a witness.

68. On October 21, 2007, Respondent informed the Arbitral Tribunal that Mr. Orazbekov was willing to give evidence to the Arbitral Tribunal by video link from Khazakstan.

69. The hearing took place at the World Bank's offices, Avenue d'Iena in Paris, as scheduled, on October 19 and from October 22 to 26, 2007. The hearing was audio recorded and transcribed by a court reporter, Ms. Emma White, Boscen Reporting Services.

70. The parties submitted an agreed core bundle at the hearing.

71. After opening statements by Counsel, the hearing was devoted to the examination and cross-examination of the parties' witnesses:

   - In the first place, Counsel for Respondent cross-examined the following factual witnesses of Claimants: Mr. Huseyin Koksaldi, Mr. Yasar Akgun and Mr. Bora Agilönü on October 22 and 23, 2007.
   - Subsequently the Turkish law expert, Mr. Coskan Erkam, was examined by Counsel for Respondent and cross-examined by Counsel for Claimants on October 23, 2007, and the Turkish law expert, Professor Ziya Akinci, was examined by Counsel for Claimants and cross-examined by Counsel for Respondent on the same date.

- Then, the hearing was devoted to the examination and cross-examination of the following factual witnesses of Respondent: Mr. Alexander Podporin and Mr. Karibjanov on October 23, 2007; Ambassador Vadim Zerkhov on October 23, 2007 and October 24, 2007; Mr. Kairat Orazbekov (by video conference), Mr. Iskander Yerembetov, Mr. Imin Sabirov and Judge Bakhytbek Begaliev on October 24, 2007 and finally, Mr. Mirbulat Abuov on October 25, 2007.
- The three Kazakh law experts were then cross-examined: Professor Aleksander Sergeyev and Professor Tolesh Kaudyrov on October 25, 2007 and Professor Rinat Mukhamedshin on October 25 and 26, 2007.
- Finally, on October 26, 2007, Professor Gulnar Z. Suleimenova, financial expert for Respondent, was cross-examined by Counsel for Claimants. This was followed by a presentation by Mr. Andrew Wright, financial expert for Claimants and a presentation by Mr. Brent Kaczmarek, financial expert for Respondent and their respective cross-examination.

IX. POST HEARING SUBMISSIONS

72. According to the directions of the Arbitral Tribunal given on October 26, 2007, and pursuant to the deadline extension which was agreed by the parties on December 12, 2007, the parties filed their post-hearing memorials on December 19, 2007.

73. With respect to costs, pursuant to the directions of the Tribunal given on October 26, 2007, and the deadline extension which was granted on January 14, 2008, the parties' post-hearing submissions on costs were filed on January 25, 2008.

X. CLOSING OF THE PROCEEDINGS

74. Pursuant to Arbitration Rule 38(1), the Arbitral Tribunal closed the proceedings on June 16, 2008.

CHAPTER III. THE FACTS

I. UP TO THE TERMINATION OF THE INVESTMENT CONTRACT

A. The foundation of KaR-Tel

75. Rumeli Telefon, the holding company of Rumeli, was created by members of the Uzan family, namely: Kemal Uzan (20%), Hakan Uzan (24%), Cem Uzan (24%) and Aysegul Akay (22%), to operate a small number of mobile telephony operations in Central Asia.

76. Telsim is Turkey's second largest mobile telephone operator. It was created by Standart Telekom, a company owned by Hakan Uzan, Cem Uzan, Aysegul Akay and Rumeli Telefon.

77. In the first half of 1998, Rumeli and Telsim began investigating the possibility of establishing a GSM network in Kazakhstan. To this end, they established a business plan which covered the period from 1999 to 2008. At that time, Kazakhstan had no GSM mobile telephony network on its territory. Kazakhtelecom, the state-owned telecommunications operator, held a general license, according to which it had the status of "*the sole national operator ensuring [the] development, introduction, maintenance of the Public switched Telecommunications Network (PSTN), and performing its functions as the PSTN operator and exclusive operator of domestic long-distance and international services"* in Kazakhstan.

78. Investel was incorporated on February 11, 1998 as a closed joint stock company under the laws of the Republic. It was founded by two Limited Liability Partnerships ("LLPs") created under the laws of the Republic: Almex LLP ("*Almex*") and Giramat LLP ("*Giramat"*), which took respectively 51% and 49% of the shares in Investel.

79. Investel was incorporated to act as a single purpose vehicle for the exploitation of opportunities in the telecommunications sector in Kazakhstan and, in particular for the proposed joint venture with Rumeli, to acquire and operate a mobile telephony licence in the Republic.

80. On May 16, 1998, three months after the incorporation of Investel, Investel and Rumeli entered into an agreement in writing to found a new Kazakh limited liability partnership (LLP) to carry out their joint venture (the *"Foundation Agreement"*). This new LLP was to be called KaR-Tel LLP. Rumeli held 70% of the shares and Investel 30%. The Foundation Agreement was signed, on behalf of Investel, by Mr. Alexander Podporin.

81. Article 4.3 of the Foundation Agreement set out the respective roles and obligations of Rumeli and Investel in respect of KaR-Tel. Rumeli was *"[t]o make a lump sum investment on incorporation of the company, and to make additional investments during first operation years of the company*" and *"[t]o carry out marketing, to provide assistance and know-how for operations of the company*." As for Investel, it was *"[t]o obtain necessary permissions and licenses from official bodies of Kazakhstan Republic (Governmental Investment Committee, Kazakhtelecom etc.)*" and *"[t]o provide office places and buildings for the company*."

82. Pursuant to Article 5.1 of the Foundation Agreement, KaR-Tel had three organs of control: the General Meeting of Shareholders, the Board of Directors and the General Manager. The General Manager was to have full day-to-day operational control of KaR-Tel, but the General Meeting of Shareholders was the supreme organ of the partnership. It was empowered to determine acceptance or removal of partners in KaR-Tel, as well as appointing the Board of Directors.

83. The Board of Directors was comprised of three persons: two were nominated by Rumeli and one, Mr. Podporin, was nominated by Investel. Although the General Manager was initially appointed by the Board of Directors, this responsibility was subsequently transferred to the General Meeting of Shareholders pursuant to an amendment to KaR-Tel's Charter on April 20, 2001 which included an abandonment of the Board of Directors as an organ of the Company.

84. The position of General Manager was filled at all times until after the termination of the Investment Contract (see below) by an appointee of Claimants: from May to July 1998

Mr. Sabri Fedai, from July 1998 to August 17, 1999 Mr. Hussein Köksaldi; from August 17, 1999 to April 2002 Mr. Bora Agilönü.

B. The GSM license

85. In February 1998, the MTT announced that it proposed to issue the first GSM license which would be awarded following a competitive auction. On July 17, 1998, Rumeli advanced to KaR-Tel USD 1,650,000 to pay for the guarantee required from all participants in the auction for the License (the *"Tender Guarantee"*).

86. The auction for the License took place on July 31, 1998 and KaR-Tel won the License with a bid of USD 67,500,000. KaR-Tel then turned to the negotiation of the terms of the License agreement required for the acquisition of the License from the MTT. Investel took the lead role on behalf of KaR-Tel in these negotiations.

87. On August 10, 1998, KaR-Tel and the MTT executed a License agreement ("the *License"*) setting out, together with the annex to the License (the *"Annex*"), the conditions and rights and obligations of the parties in respect of the grant of the GSM 900 frequency license. It was signed on behalf of KaR-Tel by Mr. Podporin.

88. The material clauses of the License were as follows:

- the License was granted for 15 years (clause 1.2);
- the cost of the License was USD 67,500,000, less the amount already advanced as Tender Guarantee, payment of which was to be made within ten days (clause 2.2.1);
- within three calendar days after such payment, the MTT was required to issue the License to KaR-Tel (clause 2.1.2);
- KaR-Tel was to ensure that the technical requirements laid out in Order No. 106 of the MTT dated May 22, 1998 were fulfilled (clause 2.2.2);
- the MTT was entitled to monitor the performance by KaR-Tel of its obligations (clause 3.1.1);

- the MTT was entitled to terminate the License Agreement unilaterally if KaR-Tel failed to fulfill its obligations set out in clause 2.2.2 (clause 3.1.2).

89. The Annex set out more specific details of the obligations of KaR-Tel:

- KaR-Tel had specific obligations for the extent of its network coverage at the end of each of the first five years of the License (clause 2.1 Annex);
- KaR-Tel was to take all measures to provide for the use within its network and the connection thereto only of terminal equipment which complied with the respective international standards (clause 4.1 Annex).

90. It was also announced at the time of the bidding for the License that once the first GSM license had been issued, the State telecommunications corporation, Kazakhtelecom, would be entitled to acquire a second GSM license on identical terms from Respondent. In September 1998, Kazakhtelecom did acquire such a license through a joint venture which it formed for this purpose with a Turkish telecommunications joint venture, FinTur. At the time, FinTur had two Turkish shareholders, Turkcell and Cukurova Group, and the Finnish telecommunications company, Sorena. Turkcell was Claimants' largest rival in the Turkish market and the joint venture brand name was K-Cell. K-Cell thus began operating in the Republic after KaR-Tel.

91. On August 20, 1998, thanks to the money obtained through the Motorola Loan (below C), the License fee was paid and the License was issued to KaR-Tel.

C. <u>The Motorola loan</u>

92. In the course of the summer of 1998, KaR-Tel focused its efforts on obtaining the necessary financing to pay the License fee and to purchase telecommunications equipment. Rumeli was able to obtain a loan from Motorola. In this context, it procured a company subject to the same beneficial ownership and control, Telsim, to issue an irrevocable and unconditional guarantee (the *"Loan Guarantee"*) to Motorola. At that time, Telsim was not a participant in KaR-Tel.

93. By a loan facility agreement dated August 14, 1998, Motorola agreed to lend to KaR-Tel up to USD 160 million in a series of tranches for the purposes of acquiring the GSM license and then purchase equipment (the *"Motorola Loan Facility*"). It was clear at that time that there would not be sufficient time to finalise the Motorala Loan Facility in order to make the payment required of USD 65,850,000 by August 20, 1998. Consequently, Rumeli and Telsim entered into a Memorandum of Understanding and KaR-Tel, by its General Manager, Mr. Sabri Fedai, entered into a separate Bridging Loan Agreement with Motorola to secure the payment by Motorola of USD 65 million on August 19, 1998. By these agreements, Motorola agreed to lend KaR-Tel USD 65 million, secured by a Telsim guarantee for the same, to be used USD 60 million for the License fee and USD 5 million for the purchase of equipment by KaR-Tel from Motorola.

94. The Motorola Loan was originally repayable on or before November 16, 1998 (clause 3.1), but that 90 days period could be extended by a further 90 days to February 15, 1999 (clause 3.2). As KaR-Tel missed the February 15, 1999 payment deadline, amendments to the Motorola Loan were made starting on May 6, 1999, extending the repayment date but also increasing the size of the Loan.

95. The final Loan Extension and Amendment Agreement was entered into on September 29, 2000 and extended the deadline for repayment until April 30, 2001.

96. KaR-Tel did not make any payment and on May 22, 2001, Motorola issued a notice of failure to pay to KaR-Tel and demanded repayment in full within 10 days.

97. On August 15, 2002, Motorola served KaR-Tel with a final demand for immediate repayment of the amount outstanding under the Motorola Loan: USD 107,461,784.14. In the autumn of 2002, Motorola initiated proceedings in the Kazakh Courts to put KaR-Tel into liquidation and recover its debt.

98. On February 12, 2003, a Kazakhstan Court refused to declare KaR-Tel bankrupt considering that such an application was premature.

D. <u>The alteration of the participations in KaR-Tel</u>

99. On April 14, 1999, a General Meeting of Shareholders of KaR-Tel was held. At this meeting, it was agreed and resolved that Rumeli and Investel's participations in KaR-Tel would be altered from the existing respective participations of 70% and 30% to 60% for Rumeli and 40% for Investel.

E. <u>The Investment Contract</u>

100. On February 28, 1997, the Republic passed Law number 75 on State Support of Direct Investment in the Republic of Kazakhstan ("*the Investment Support Law"*). Pursuant to the Investment Support Law, a State Committee on Investment was created at ministerial level under the office of the First Deputy Prime Minister to negotiate incentive contracts with "*investors contributing direct investments in the Republic of Kazakhstan*." These contracts were intended to provide financial incentives for investors to invest in the Republic, including reduction in, or exemption from, taxation.

101. It was in KaR-Tel's interest to obtain the benefit of such an investment contract with the Investment Committee. On May 20, 1999, KaR-Tel and the Investment Committee executed Contract No. 0123-05-99 ("*the Investment Contract"*) pursuant to the aforementioned legislation.

102. Clause 2 of the Investment Contract set out the reasons for its granting: "*for the purpose of providing different measures of stimulation and state support in the course of investment activity in the sphere of wireless and cellular communications in rural areas."* The incentives were granted by the Investment Committee in order to encourage KaR-Tel to progress the development of its network quickly and to ensure that it provided its network equally in the less profitable rural areas of Kazakhstan, as well as in the highly profitable main cities. This was further particularized in the 5-year "*Working Programme*" annexed to the Investment Contract wich set out the respective population centres and areas of the Republic to which KaR-Tel's network coverage had to extend over the course of the five-year period.

103. The Investment Contract obliged KaR-Tel to make investments, to apply advanced technology and to provide the Investment Committee with regular and detailed information on the progress of the investment programme. In return, KaR-Tel was granted tax and other benefits, including a five-year total exemption from corporate and property tax, and reduced rates for the five years thereafter. The Investment Contract was to expire on July 31, 2009.

F. <u>The foundation of Telecom Invest and the introduction of Telsim</u>

104. On September 29, 2000, Almex and a Mrs. Elena Petrovna Gutova entered into an agreement to found a new Kazakh LLP called Telecom Invest LLP ("*Telecom Invest*") with a minimum charter capital of 100,000 Tenge. The participatory interests were divided as follows: 87.5% to Almex and 12.5% to Mrs. Gutova.

105. At a General Meeting of Shareholders of KaR-Tel held on October 10, 2000, the founders of KaR-Tel resolved that:

- Investel be permitted to sell its participation in KaR-Tel to a third party for 300,000 Tenge;
- Rumeli be permitted to sell a part of its participation equivalent to 15% of the total participation rights in KaR-Tel to a third party.

106. In late 2000, Investel transferred its participation interest in KaR-Tel to Telecom Invest for 300,000 Tenge. On December 31, 2000, Rumeli sold a 15% participation in KaR-Tel to Telsim. Pursuant to Articles 22(2) and 12 of the Kazakh Law on Limited and Additional Liability Partnerships, Telsim became successor to Rumeli's obligations under the Foundation Agreement.

107. These changes necessitated the amendment of KaR-Tel's Charter, which was approved at a General Meeting of Shareholders on April 20, 2001. Further amendments were made the same day:

- the registered capital was reallocated as follows: Telecom Invest (40%), Rumeli (45%) and Telsim (15%);
- the Board of Directors was removed as an organ;
- as a result of the removal of the Board of Directors, the former powers of that organ, and in particular the power to appoint or remove the General Manager of KaR-Tel, was transferred to the General Meeting of Shareholders.

108. On September 9, 2001, Mr. Podporin was officially appointed the General Manager of Telecom Invest.

G. <u>The development of KaR-Tel's Business</u>

109. Claimants' and Respondent's position on the business development of KaR-Tel and on the investments allegedly made by Claimants differ substantially.

110. In a nutshell, Claimants allege that by the end of the year 2001, KaR-Tel had a work force of approximately 193 well-qualified employees, the number of subscribers and revenues reached almost 160,000 and USD 60 million respectively; and that the number of subscribers reached 380,000 by April 2002. Claimants further allege that this success was the result of their very important efforts and investments.

111. According to Claimants, Respondent itself recognized and praised KaR-Tel's achievement in a letter of the Ministry of Transportation and Telecommunications of the Republic of Kazakhstan dated May 11, 2000. Moreover, KaR-Tel was generating positive EBITDA margins – *i.e.* generating a positive operating cash flow – in both 2001 and early 2002, when Claimants were suddenly evicted from KaR-Tel.

112. On the contrary, Respondent alleges that the level of subscribers and revenues was grossly overstated and that there is no evidence that Claimants really invested in KaR-Tel.

II. THE TERMINATION OF THE INVESTMENT CONTRACT AND ITS REPERCUSSIONS

A. The termination of the Investment Contract

113. On February 21, 2002, the Investment Committee took the decision to terminate the Investment Contract. By a letter dated February 21, 2002, it gave KaR-Tel notice in writing that, as a result of its repeated breaches of said Contract and more specifically on the basis that KaR-Tel had not complied with its reporting obligations pursuant to the Investment Contract, the Investment Contract would terminate 30 days later.

114. By letter dated March 27, 2002, the Investment Committee recorded the Formal Order of Termination of the Investment Contract at a meeting on March 25, 2002 on the basis that KaR-Tel had failed to comply in a timely manner with a requirement in the Investment Contract to submit reports on the economic activities of the partnership and on the implementation of the investment project.

B. The Extraordinary General Meeting of Shareholders of KaR-Tel

115. In view of this development, an Extraordinary General Meeting of the Shareholders of KaR-Tel ("EGM") was called by Telecom Invest. According to Respondent, Mr. Podporin sent to Rumeli and to Telsim formal notices calling this EGM. These notices set out that:

- an EGM of KaR-Tel would be held on April 11, 2002 at 18.00 at an address in Almaty;
- in case Claimants' representatives did not attend the EGM on April 11, the EGM would then be adjourned to April 15 at 18.00 at the same address;
- if Claimants' representatives failed again to attend the adjourned EGM on April 15, 2002, decisions on the proposed agenda for the meeting would be taken in their absence.

116. The three points on the agenda for this meeting were: (1) consideration of the damage caused to KaR-Tel by Rumeli and Telsim; (2) consideration of the compulsory

redemption of the participations of Rumeli and Telsim and their removal from the partnership; (3) the temporary change of the General Manager of KaR-Tel.

117. With respect to the compulsory redemption of Claimants' shareholding, Article 34 of the Limited and Additional Liability Partnership Law (the "*LLP Law*") provides that :

> *"1. When a participant of a limited liability partnership causes harm to a partnership or its participants, they shall have the right to claim for compensation of damages from such person.*
>
> *2. In the event when material harm is caused, the limited liability partnership aside from its claim to compensate damages and raising the issue on forced purchase by the partnership of the participating interest of the guilty participant who has caused the harm shall also have the right to require his retirement from the participants.*
>
> *3. The forced purchase of a participating interest shall be carried out in a judicial procedure."*

118. In addition, Article 82 of the Kazakh Civil Code provides that:

> *"In the event a participant of the limited liability partnership fails to fulfill its obligation towards the partnership, as established by legislative acts or foundation documents, the partnership, in compliance with a decision of the general meeting, may demand in Court the forced buy-out of the participating interests owned by such participant at a price determined by an agreement between the partnership and the participant. In the event an agreement is not reached, the price for the share being forcedly bought out shall be established by the court."*

119. Claimants, however, allege that they were not notified of these meetings, and that this is why they were not present at the first meeting which took place on April 11, 2002 and at the adjourned meeting which subsequently took place on April 15, 2002.

120. On April 15, 2002, Telecom Invest proceeded to consider the matters on the agenda in Claimants' absence. The following resolutions were passed:

- to prepare all necessary documents, including financial analyses, demonstrating the damage caused to KaR-Tel by the activity and/or inactivity of Rumeli and Telsim;

- to issue proceedings in the Almaty City Court for the compulsory redemption of Claimants' participation in KaR-Tel;
- to dismiss Mr. Agilönü as General Manager of KaR-Tel and to replace him temporarily by Mr. Iskander Yerimbetov and to seek the Court's approval of this amendment.

C. The proceedings issued in Almaty City Courts

1. The Telecom Invest Claim

121. On April 19, 2002, Telecom Invest issued proceedings against Claimants in the Almaty City Court ("*the Telecom Invest Claim*") for the compulsory redemption of Claimants' participation in KaR-Tel. Telecom Invest also sought an injunction to freeze the assets and records of KaR-Tel.

122. On April 23, 2002, Mrs. S. G. Ivanovna, sitting as the presiding judge of the Almaty City Court, considered Telecom Invest's application for an injunction. Judge Ivanovna held that in accordance with the Law on National Security, it was necessary to grant the injunction freezing the partnership's assets, property and records in order to ensure that the performance of KaR-Tel's network continued uninterrupted. At the time, the Republic had only two mobile telephony networks and these were considered to be critical strategic interests.

123. Judge Ivanovna ordered that, pending a decision on the merits of the case:

- all property of KaR-Tel be frozen to secure the claim;
- access to objects which ensured the uninterrupted operation of KaR-Tel's cellular network and to financial, technical and other documents and computer databases was to be restricted to those with written permission of the temporary General Manager Mr. Yerimbetov.

124. On the same day, April 23, 2002, the Court bailiffs took steps to ensure compliance with the order of the Court. The bailiffs did this by attending at KaR-Tel's premises with a representative of Telecom Invest, Mr. Aidan Karibjanov, and with a security escort.

125. This first decision on injunctive relief was made *ex parte*. It was thus decided on the basis of the application and without any hearing. Claimants appealed the decision to the Supreme Court on May 2, 2002. On June 11, 2002, the Supreme Court set aside the second part of Judge Ivanovna's Order, requiring access to KaR-Tel to be restricted to those with written permission from Mr. Yerimbetov.

2. The KaR-Tel Claim

126. In late May 2002, whilst Claimants' appeal of the injunction to the Supreme Court was still pending, KaR-Tel, acting through its new temporary General Manager, Mr. Yerimbetov, commenced proceedings against Claimants in identical terms to those brought by Telecom Invest.

127. On May 22, 2002, Mr. Agilönü called an EGM of the partnership. As soon as he was notified of this, Mr. Yerimbetov, on behalf of KaR-Tel, applied to the Almaty City Court for a further injunction preventing the holding of the intended EGM.

128. On June 3, 2002, the Almaty City Court granted the injunction and:

- suspended the EGM called by Mr. Agilönü for June 7, 2002;
- enjoined Mr. Agilönü from exercising the rights and performing the functions of General Manager of KaR-Tel pending a decision on the merits of the case;
- enjoined Claimants from calling or holding any general meetings of KaR-Tel pending a decision on the merits of the case.

129. Court bailiffs enforced the injunction by entering the conference room in which the General Meeting of Shareholders was held at the AnKaRa Hotel on June 7, 2002 and asked Mr. Agilönü and Claimants to stop the meeting.

130. Claimants appealed this second injunction before the Supreme Court of the Republic. On or about August 1, 2002, the Supreme Court allowed Claimants' appeal in part and set aside part of Judge Ivanovna's order insofar as it related to constraints on the action of Mr. Agilönü, on the grounds that he was not a party to the proceedings. The Supreme Court also dismissed as entirely without foundation Claimants' allegation that the grant of the injunction demonstrated bias and partiality on the part of the Almaty City Court.

3. The Consolidation of Telecom and KaR-Tel cases

131. One month before, by an order dated July 1, 2002, Judge Ivanovna of the Almaty City Court had ruled that the proceedings brought by Telecom Invest and the proceedings brought by KaR-Tel should be consolidated into a single proceeding, on the basis that the claims were very similar and against the same defendants.

4. The forensic examination of KaR-Tel

132. On July 31, 2002, Judge Begaliev of the Almaty City Court issued a ruling appointing the Forensic Examination Centre of the Kazakh Ministry of Justice to prepare an integrated accounting and commercial forensic examination. The examination was to address the issue of whether Claimants had caused significant damage to KaR-Tel by their actions, and to assess the value of KaR-Tel as at April 2002. In this respect, Judge Begaliev posed 6 specific questions to the Forensic Examination Centre:

- what is the annual turnover of KaR-Tel?;
- did KaR-Tel sustain a loss as a result of the cancellation of the Investment Contract; if so, in what amount?;
- what was the average market value at the time of purchase of the equipment purchased by KaR-Tel from Telsim; what price did KaR-Tel in fact pay to Telsim; what is the difference, if any, between these two figures?;
- what was the average market value at the time of purchase of the telephone handsets purchased by KaR-Tel from Telsim; what price did KaR-Tel in fact pay to Telsim?;

- what is the total value of investments made by Rumeli and Telsim in the context of their obligations under the Foundation Agreement; how were these investments used?; and
- what is the balance sheet value of KaR-Tel and the shareholdings of Rumeli and Telsim therein?

133. On or about August 9, 2002, Claimants appealed Judge Begaliev's order. The Supreme Court dismissed the appeal regarding the appointment of the Forensic Examination Centre on September 19, 2002. It held that:

  - it was normal and proper for Judge Begaliev to have appointed the Centre to review those matters prior to holding a hearing on the merits;
  - it was incorrect to allege that the claim was stayed due to the appeal of the injunction;
  - Judge Begaliev's order did not go beyond the scope of the claims.

D. The attempts to sell Telecom Invest's participation in KaR-Tel

134. In August 2002, Telecom Invest and Claimants entered into discussions concerning the sale of Telecom Invest's 40% in KaR-Tel to Claimants. A Stock Purchase Agreement was negotiated and initialed by the parties on October 13, 2002, subject to the signature of their highest executives.

135. The purchase price for Telecom Invest's 40% stake was set at USD 12 million. Ultimately, however, the agreement was not finalized.

136. In late autumn 2002, KaR-Tel's General Manager, Mr. Yerimbetov, and a Kazakh businessman, Mr. Margulan Seysembayev, approached Almex and Mrs. Gutova with an offer to acquire KaR-Tel. The parties entered into discussions, and it was eventually agreed to sell Telecom Invest itself to Mr. Seysembayev.

137. The purchase, effected through 6 companies which were beneficially owned and controlled by Mr. Seysembayev, was concluded informally by amendment of Telecom

Invest's Charter at a shareholders meeting on December 19, 2002. This amendment was registered on January 17, 2003 and was for nominal consideration.

E. Mr. Seysembayev's offer to purchase Claimants' participation in KaR-Tel

138. In or about April 2003, Mr. Seysembayev, the owner of Telecom Invest, attempted to purchase Claimants' 60% interest in KaR-Tel. He indicated to Claimants that he was prepared to offer them USD 12 million to USD 15 million for their participation. Claimants refused this offer.

F. Claimants' complaints to Respondent

139. On April 2, 2003, Rumeli wrote to the Prime Minister of the Republic and sent further copies of the letter to the President, the Minister of Foreign Affairs, the Minister of Transport and Communications, the Minister of Industry and Trade, the Minister of Finance, the Chairman of the Investment Committee and the Turkish Ambassador to Kazakhstan. On April 3, 2003, Telsim sent an identical letter to the same recipients.

140. These letters were complaints by Claimants that the termination of the Investment Contract had been wrong because:

- KaR-Tel had complied with all of its investment obligations under the Investment Contract;
- KaR-Tel had complied with all of its reporting obligations under the Investment Contract;
- the Investment Committee had violated the contractual procedure for termination "*in that any termination could take place only if the Contract had been suspended first and the investor failed to remedy the situation*."

141. Claimants also threatened to launch ICSID proceedings if their dispute with the Investment Committee was not resolved to their satisfaction.

G. The judgment of the Almaty City Court on June 6, 2003

142. As explained above, on July 1, 2002, the Almaty City Court had ordered that the proceedings brought by Telecom Invest and those brought by KaR-Tel be consolidated. The claim was for the Court to order that Claimants' participation in KaR-Tel be compulsory redeemed. Claimants defended these proceedings with the assistance of local counsel and engaged three Kazakh academics to provide expert evidence on the disputed issues.

143. There were two central issues for the Almaty City Court to determine:

- the validity of KaR-Tel's EGM resolution to bring the claim;
- whether the claim for compulsory redemption was made out.

144. With respect to the first issue, the Court:

- held that pursuant to Article 45(2) of the LLP Law, "if, despite requests by members, the executive body does not convene a general meeting, it may be convened by the members themselves," where they hold more than 10% of the total voting equity in the partnership;
- found as a fact that on the balance of the evidence Mr. Agilönü had indeed received the requests in the form of letters dated March 4, 2002 and March 20, 2002; and therefore,
- held that the EGMs on April 11 and 15 were properly convened by Telecom Invest;
- determined that the meeting on April 15, 2002 was quorate and that the resolutions had been passed in a procedurally correct manner and with the requisite quorums and majorities. The resolution was therefore valid and was upheld.

145. With respect to the second issue, *i.e.* KaR-Tel's claim for compulsory redemption of Claimants' shares, the Court found that Claimants had caused KaR-Tel to suffer harm in the amount of USD 40,662,765, being the loss caused to KaR-Tel by the termination of

the Investment Contract and trough transactions with related companies. The Court decided that this was indeed material harm entitling KaR-Tel compulsorily to redeem Claimants' shareholdings, which the Court then ordered.

146. It was recorded in the Court's judgment that, pursuant to Article 32(3) of the LLP Law, the value of the interest to be purchased was to be established by the parties in the first place and that the Court would only make such determination in circumstances where the parties would be unable to agree. The Court thus left the issue of the value of Claimants' shareholding to be determined by agreement between Claimants and Telecom Invest.

H. <u>The appointment of a Working Group</u>

147. On June 9, 2003, the Investment Committee wrote to Claimants to inform them that Respondent's Government's decision to establish an inter-departmental Working Group to "*conduct an audit on KaR-Tel LLP on the execution of the terms of the contract by KaR-Tel LLP, including investments obligations.*"

148. The Working Group reached a decision on July 17, 2003. Its findings were the following:

- in breach of clause 6.2 of the Investment Contract, KaR-Tel had failed to use advanced technologies in implementing the investment project. Instead, KaR-Tel had imported second hand and outdated BTS base sections;
- in breach of clause 3 of the Investment Contract, between May 1999 and March 2002, KaR-Tel made direct investments of only USD 13,308,749. This equated to only 11.7% of the pro-rated direct investment of USD 113,643,000 required under clause 3;
- in breach of the Work Programme at Annex 1 to the Investment Contract and in breach of clause 2.1 of the same, between 1999 and 2002, KaR-Tel had achieved only 56% of the progress required under the Work Programme. In particular, the rural areas of Kazakhstan had been largely without coverage;

- Article 13 of the Law on State Support for Direct Investments permits the Investment Committee to terminate an investment contract where the investor fails to comply with its obligations or breaches terms of the contract. There is no provision in the Law for suspension of an investment contract prior to its termination. Additionally, even under the terms of the Investment Contract, a prior suspension of the Contract is a right rather than an obligation of the Investment Committee;
- although the Investment Contract was terminated for KaR-Tel's failure to submit reports, the only reason why it was not terminated for the breaches set out above was that the failures to report prevented the Investment Committee from having information from which it could have identified the breaches;
- KaR-Tel itself had expressed to the Working Group that it did not dispute the termination of the Investment Contract.

I. Criminal investigation

149. On June 24, 2003, Mr. Yerimbetov filed a criminal complaint against five former KaR-Tel employees who would have signed expenses authorization forms in order to take money directly from KaR-Tel's petty cash reserve. The total sum so transferred was 27,053,748 Tenge, which at the time equated approximately USD 192,663. The executives and employees concerned were:

- Bora Agilönü, KaR-Tel's General Manager;
- Mustafa Bash, KaR-Tel's Director of Sales;
- Erdal Osornec, KaR-Tel's Finance Director;
- Bulent Gurel, KaR-Tel's Chief Accountant; and
- Zhuldys Kaden, a secretary.

150. On July 1, 2003, Major Yun, a senior investigator in the Almaty police force, decided to issue a criminal indictment against these employees. They fled the country. The proceedings were suspended on September 1, 2003.

J. The judgment of the Supreme Court of July 23, 2003

151. On June 20, 2003, Claimants appealed the Almaty City Court's judgment to the Supreme Court of Kazakhstan. Claimants repeated the points on which they had relied before the first Court, and requested the Supreme Court to:

- overturn the decision of the Almaty City Court;
- refuse KaR-Tel's claim for compulsory redemption;
- invalidate the calling of the EGM on April 15, 2002 and all decisions adopted at that meeting;
- discharge the injunctions dated April 23, 2002 and June 2, 2002.

152. KaR-Tel also filed an application to the Supreme Court to have the valuation exercise conducted on Claimants' participation in KaR-Tel.

153. The Supreme Court reviewed the Almaty City Court decision and left it unchanged. It dismissed all of the appeals and the application filed by KaR-Tel to have the valuation exercise conducted. It therefore remained for the parties to agree on a price for the compulsory redemption of Claimants' shareholding.

K. The judgment of the Supreme Court Presidium of October 30, 2003 - The following restructuring of KaR-Tel – and the purchase of KaR-Tel by VimpelCom

1. The judgment of the Supreme Court Presidium

154. On September 15, 2003, KaR-Tel appealed the Supreme Court's decision to the Presidium of the Supreme Court ("*the Presidium*"), the highest instance for civil cases in the Kazakh legal system. The purpose of KaR-Tel's appeal was to ask the Presidium to determine the valuation of Claimants' participation in KaR-Tel.

155. The Presidium considered that it had jurisdiction to determine the price since it was established that the parties, *i.e.* KaR-Tel on the one hand and Claimants on the other hand, were not able to reach agreement. The Presidium then valued Claimants'

participation in KaR-Tel at 337,500 Tenge for Rumeli (approximately USD 2,281) and 112,500 Tenge for Telsim (approximately USD 760.43).

2. The restructuring of KaR-Tel

156. Shortly thereafter, on November 10, 2003, KaR-Tel's Charter was amended to reflect that the founders were Telecom Invest (40%) and Steiner and Zingermann JV LLP, a law firm (60%). Steiner and Zingermann had purchased that shareholding from KaR-Tel following Telecom Invest's waiver of its right of pre-emption. They subsequently transferred their shareholding to another of Mr. Seysembayev's companies, Kertean LLP, in January 2004.

157. Under its management, Mr. Yerembetov restructured the company. He made new investments and started negotiations with Motorola to restructure the loan. In April 2004, Mr. Yerembetov was finally able to reach a deal with Motorola whereby the loan would be discounted to USD 35 million and repaid in full in the short term.

158. Mr. Yerembetov managed to persuade KazKommertz Bank to lend it the USD 35 million required to repay Motorola.

3. The sale of KaR-Tel to VimpelCom

159. On August 27, 2004, VimpelCom announced that it had won a public tender to purchase KaR-Tel for USD 350 million.

III. Claimants Seized By TSDIF

160. In February 2004, the Turkish Savings Deposit Insurance Fund (the "*TSDIF*"), seized control of over two hundred companies allegedly belonging to, or controlled by, the Uzan family, among which Rumeli and Telsim.

CHAPTER IV. THE JURISDICTION OF THE ARBITRAL TRIBUNAL

161. The first issue to be decided in this arbitration is the jurisdiction of this Arbitral Tribunal. It is indeed disputed by Respondent, as is further explained below.

I. CLAIMANTS' POSITION

162. According to Claimants, the requirements of Article 25 of the ICSID Convention and ICSID Rule 2(1)(c) are fulfilled. Claimants have consented to the jurisdiction of ICSID by virtue of their Request for Arbitration and the ICSID arbitration clause contained in the BIT. Respondent has consented to ICSID jurisdiction on the date of entry into force of the BIT, namely August 10, 1995 and/or on the date of entry into force of the FIL, namely on December 28, 1994.

163. According to Claimants, the BIT states that two authentic copies (in four different languages) of the BIT have been executed, "*each in Turkish, Kazak [sic], English and Russian*." There does not appear, however, to exist any Kazakh language version. There is no requirement under the English or Russian versions of a prior submission of the dispute to local Courts before initiation of arbitration proceedings before ICSID. On the other hand, Article VII of the Turkish version contains such a requirement. According to Claimants:

- no requirement of prior initiation and completion of local proceedings as a prerequisite to ICSID arbitration should be imposed, as two of the three official versions of the BIT do not provide for such a requirement;
- such a requirement would constitute a violation of the Most Favorable Clause contained in the BIT, since it would create a barrier to arbitration not found in the dispute resolution clauses of other BITs entered into by the Republic of Kazakhstan;
- in any case, Respondent, through its behavior, has deprived Claimants of the possibility of meaningfully exercising any such action.

164. It is finally Claimants' position that none of Respondent's objections to the jurisdiction of this Tribunal has any merit.

A. Respondent consented to ICSID jurisdiction over this dispute

165. According to Claimants, Respondent's consent to ICSID jurisdiction is contained in both the BIT and the FIL. As far as Claimants are concerned, they first expressed their intention to initiate arbitration in April 2003, when they wrote letters to Respondent indicating that they had "*the right to submit the dispute for final resolution to the International Center for Settlement of Investment Disputes (ICSID) and have firm intentions to do so if no agreement is reached with the Republic of Kazakhstan in the nearest future*." Claimants completed their consent by filing their ICSID Request for Arbitration on July 15, 2005. Thus, all parties have consented to ICSID jurisdiction over this dispute by no later than July 15, 2005.

166. Nevertheless, nearly two years after the Request for Arbitration was filed, Respondent alleges that it did not consent to ICSID jurisdiction over this dispute on the ground that Claimants' investments violated the laws and regulations of Kazakhstan. Claimants consider that Respondent's allegations are wholly without merit and should be dismissed accordingly.

1. Claimants' investments were fully legal

167. Claimants deny that their investments did not comply with Kazakhstan's laws and regulations. In any event, the standards that would need to be satisfied in this regard for ICSID jurisdiction to be defeated are very high. Respondent, which bears the burden of proof, has not advanced, let alone provided, evidence of any factual and legal support for its allegations.

168. To defeat the Tribunal's jurisdiction based on a BIT's requirement that the disputed investments be in conformity with the host State's laws and regulations, a certain level of

violation is required. As determined by the Arbitral Tribunal in the *LESI*[1] case, such a provision will exclude the protection of investments only if they have been made in breach of fundamental legal principles of the host country ("*en violation des principes fondamentaux en vigueur*").

169. Moreover, mere allegations are not enough. According to Claimants, Respondent does not substantiate its allegations with any factual evidence of fraud. Nor does it invoke any laws or regulations of Kazakhstan that Claimants' investments would have supposedly violated. Rather, Respondent relies upon an unrelated New York Court judgment applying American law and refers to that Court's assessment of acts and omissions that took place in Turkey regarding separate transactions, to reach the conclusion that *"*[*i*]*n circumstances where the entire basis of the Claimants' alleged investment in KaR-Tel was to further their worldwide fraud, the investment was not in conformity with the laws of Kazakhstan."*

170. Claimants submit that the Tribunal should rather follow the holding of *Tokios Tokelés*,[2] where the registration of Claimants' investments indicated that they had been made in accordance with the laws and regulations of the host State. Similarly here, it is not in dispute that Respondent registered KaR-Tel, granted KaR-Tel Kazakhstan's second GSM license through a free and transparent bidding process, and willingly registered all corporate changes to KaR-Tel.

171. According to Claimants, Respondent's attempt to try to link to KaR-Tel acts and omissions in Turkey of the Uzan family, relating to third party transactions, is irrelevant. The manner in which the Uzans conducted their business outside of Kazakhstan has no relation to the case at hand. According to Claimants, the Uzans' alleged fraud was related to the T. Imar Bankasi TAS (the "*ImarBank*") banking practices in Turkey. They had nothing to do with Claimants' investments in Kazakhstan. Similarly, Respondent's

[1] *LESI, S.p.A. and Astaldi S.p.A. v. People's Democratic Republic of Algeria* (ICSID Case No. ARB/05/3), Decision on Jurisdiction of July 12, 2006 [hereinafter *LESI v. Algeria*].

[2] *Tokios Tokelés v. Ukraine* (ICSID Case No. ARB/02/18), Decision on Jurisdiction of April 29, 2004 [hereinafter *Tokios Tokelés*].

justification for depriving Claimants of their majority stake in KaR-Tel, which was based on an alleged failure to file reporting documents, was unrelated to the Uzans' fraud.

172. The only evidence put forward by Respondent in support of the proposition that Claimants' investments were fraudulent is a July 13, 2003 judgment rendered in the United States against the Uzans. A judgment of a Court of first instance in New York applying American law does not bind an arbitral tribunal dealing with claims under international law. In any event, that judgment did not rule on the legality of Claimants' investment in Kazakhstan.

173. The New York judgment could not have found evidence that KaR-Tel played a role in an illegal scheme with respect to the Motorola loans as Respondent alleges. As noted in Judge Rakoff's findings of fact, two Motorola loans were made in relation to KaR-Tel:

- the largest loan was the USD 60,000,000 loan made on August 19, 1998. As it did not cover the total price of the GSM License, Claimants paid the remaining USD 5,850,000. Therefore, the Uzans obviously could not have used this loan for illegal purposes;
- the second Motorola loan was for USD 13,723,00.99. But Judge Rakoff's findings of fact did not specifically conclude that this loan was used improperly and not for the purchase of equipment from Motorola. Respondent has failed to prove any fraud whatsoever in connection with this loan.

174. Claimants further allege that, with respect to Respondent's allegation that Claimants defrauded KaR-Tel itself by causing it to enter into transactions with Telsim at excessive prices, no neutral expert has ever determined that these transactions with Telsim were in fact at excessive prices. Rather, Bülent Yağci, a professor of the Istanbul Technical University, reviewed the prices at which Telsim sold KaR-Tel equipment and found that the "*cost [was] reasonable*." He moreover determined that the prices were lower than those of the market. In any case, sales at a high price do not constitute a violation that

would rise to the "*violation of fundamental principles*" standard needed to defeat jurisdiction.

175. According to Claimants, contrary to Respondent's allegations, the entire basis of their investments in KaR-Tel was obviously not to further a worldwide fraud. They had only one purpose: to create a profitable cellular telecommunications business in Kazakhstan. In this respect, Rumeli and Telsim expended significant financial and human resources to create and develop KaR-Tel's operations and GSM network:

- they made significant investments in KaR-Tel. The bid process by which KaR-Tel received Kazakhstan's second GSM License was wholly legal. The License was legally paid for;
- the telecommunications network that Claimants built was in compliance with the local laws and technical regulations of Kazakhstan;
- in or around July 1998, Claimants' managers flew to Kazakhstan with a team of six or seven Turkish specialists from the Rumeli/Telsim group for the purpose of developing KaR-Tel's operations and GSM network;
- Rumeli conducted in-depth market research and analyses and established a ten-year business plan for KaR-Tel;
- KaR-Tel's success increased under Claimants' management due to their continued investments;
- Rumeli and Telsim made significant investments in KaR-Tel during the period of 1998-2002;
- in 2000, Claimants further invested approximately USD 13,000,000, and KaR-Tel revenues reached approximately USD 11,000,000, with the number of subscribers reaching over 57,000.

176. Therefore, Claimants allege that KaR-Tel was a legitimate business and a success story. It was not a company set up to further a worldwide fraud, but rather a legitimate, growing and dynamic telecommunications company in Kazakhstan. It was also a company of significant value as its sale to VimpelCom in 2004 for USD 350,000,000 attests.

2. Claimants' investments did not violate the principle of good faith, the principle "*nemo auditur propriam turpitudinem allegans*," or international public policy

177. Claimants allege that their investments did not violate the principle of good faith. Respondent's argument in this respect is based on Respondent's repetitive allegation that the investment was part of a worldwide fraud, which is untrue and which Respondent has failed to substantiate.

178. According to Claimants the *Inceysa* case[3] relied upon by Respondent must be distinguished from the present case. Indeed, the circumstances were very different in *Inceysa*. *Inceysa's* violations of the principle of good faith were shockingly clear: *Inceysa's* investment was the result of winning a bid, which *Inceysa* won only by presenting wholly falsified information. On the contrary, no false information was ever presented to Respondent with respect to Claimants' investments in Kazakhstan.

179. Claimants' investment did not violate the principle *nemo auditur propriam turpitudinem allegans*. Once again, the *Inceysa* decision relied upon by Respondent is irrelevant since the current arbitration does not remotely resemble the facts of the *Inceysa* case.

180. Claimants' investment did not violate international public policy. Respondent again invokes *Inceysa*, whereas *Inceysa's* very investment was secured by fraudulent misrepresentations. Again, Claimants allege that no false information was ever presented to Respondent with regard to Claimants' investments in Kazakhstan.

181. The *World Duty Free* decision[4] invoked by Respondent to stand for the principle that no jurisdiction is permissible where an investment violates public policy is also irrelevant to the present case. Indeed, according to Claimants, in *World Duty Free,* Kenya alleged that the agreement on which the claims in the arbitration were based was obtained through a

---

[3] *Inceysa Vallisoletana S.L. v. Republic of El Salvador* (ICSID Case No. ARB/03/26), Award of August 2, 2006 [hereinafter *Inceysa v. El Salvador*].

[4] *World Duty Free Company Limited v. The Republic of Kenya* (ICSID Case No. ARB/00/7), Award of October 4, 2006 [hereinafter *World Duty Free v. Kenya*].

bribe. The tribunal agreed, and went on to hold that, since bribery is contrary to international public policy, claims based on contracts obtained by corruption could not be upheld by the tribunal. Here, by way of contrast, Respondent has made no case against Claimants of any bribe.

182. Claimants finally point out that a mere presumption of fraud is insufficient. It has to be positively proved. Moreover, the fraud must be particularized and must directly relate to the precise issue at hand, namely Claimants' investment in Kazakhstan.

B. Claimants have standing to bring this arbitration

1. Rumeli and Telsim are the proper Claimants in this arbitration

183. ICSID's arbitration mechanism was designed to protect investments of foreign nationals, like Telsim and Rumeli. They are legal entities registered in Turkey and as such are nationals of another Contracting State. Article 25 of the ICSID Convention defines a "*National of another Contracting State*" as "*any juridical person which had the nationality of a Contracting State other than the State party to the dispute on the date on which the parties consented to submit such a dispute to conciliation or arbitration*." Rumeli and Telsim qualify as such because they were incorporated and headquartered in Turkey both at the time the dispute arose and at the time of their consent to ICSID arbitration.

184. According to Claimants, today, Rumeli and Telsim:

- remain legal entities incorporated in Turkey;
- remain commercially registered legal entities;
- have employees and own assets;
- have full legal capacity;
- pay social charges and taxes and are not immune from enforcement;
- are not owned, but merely managed by TSDIF.

185. Claimants further allege that they were never created for treaty-shopping purposes. Nor did they become controlled by TSDIF for this purpose. At the time of Respondent's wrongful actions, Claimants were actively engaged in telecommunications operations both in Turkey and abroad. When Telsim and Rumeli indicated that they would initiate ICSID proceedings in April 2003, they were fully-operational telecommunications companies. This was still the case when they perfected their consent to initiate proceedings by filing their Request for Arbitration on July 15, 2005.

186. Claimants dispute Respondent's allegation that Claimants are mere shell companies. In any event, even if Rumeli and Telsim were indeed "*shell*" companies, this would not constitute a bar to this Tribunal's jurisdiction under either the ICSID Convention or the BIT. Indeed, nowhere in Article 25 – nor in the ICSID Convention – is there a basis for denying ICSID jurisdiction to a shell company. This has been confirmed by a recent ICSID decision on jurisdiction. In *Aguas del Tunari*,[5] Respondent, Bolivia, argued that the claimant – a local company – could not claim that it was an entity "*controlled directly or indirectly*" by "*nationals*" of the Netherlands because, *inter alia*, the ultimate Dutch controlling corporation was a shell company actually controlled by an American company. As is clear from the decision, the tribunal rejected Respondent's position on the basis that the Dutch corporation was not a corporate shell specifically set up to gain ICSID jurisdiction over the dispute.

187. In the present case, even if Rumeli and Telsim are deemed today to be "*shell*" companies, it cannot be seriously argued that they were created in 1993 for "*treaty-shopping*" purposes, *i.e.* to gain ICSID jurisdiction.

188. Therefore:

- the fact that Telsim may or may not have substantial activities following the sale of Telsim assets to Vodafone is irrelevant for jurisdictional purposes. If Kazakhstan

[5] *Aguas del Tunari S.A. v. Republic of Bolivia* (ICSID Case No. ARB/02/3), Decision on Respondent's Objections to Jurisdiction of October 21, 2005 [hereinafter *Aguas del Tunari v. Bolivia*].

had wanted, as a condition for the BIT protection, that the Turkish corporate investors have substantial activities in Turkey, from the first day of their investment to the date of the rendering of an ICSID award, it could have included such an exceptional condition in the definition of "*investor*" in the BIT. It did not do so;

- Rumeli which owned a larger stake than Telsim in KaR-Tel – has not sold its assets. Consequently, the "*shell*" argument is not in any case relevant with respect to Rumeli;
- finally, to allege, as Respondent does, that once an arbitration has legitimately started, a company cannot sell its assets to another company, is simply wrong.

189. Moreover, according to Claimants, the BIT does not provide a basis for looking beyond Rumeli and Telsim on the alleged basis that they are shell companies. Article I(1)(b) of the BIT defines the term "*investor*" as "*corporations…incorporated under the law in force of either of the parties and having their headquarters in the territory of that party*." Accordingly, the BIT adopts the State of incorporation and the State of the seat as criteria for determining the nationality of a claimant. It does not exclude shell companies from its scope of application nor requires a search beyond the designated claimant whenever it is a shell company.

190. In this context, it is neither for Respondent nor for an arbitral tribunal to substitute its views of the definition of the term "*investor*" to that of the Contracting Parties to a BIT. This is the position recently adopted in *Saluka*.[6] In that case, the arbitral tribunal decided that the applicable BIT expressly gave standing to a legal person constituted under the laws of the Netherlands and did not expressly empower the tribunal to add any other criteria in this respect, irrespective of whether such a legal person was a shell company.

191. In addition, according to Claimants, the TSDIF's appointment of managers at Telsim and Rumeli did not in any way put an end to the corporate existence of Claimants or to Claimants' ownership of their claims against Kazakhstan. This is supported by decisions

[6] *Saluka Investments BV (The Netherlands) v. The Czech Republic* (UNCITRAL), Partial Award of March 17, 2006 [hereinafter *Saluka*].

such as in the *Autopista* case,[7] where the respondent argued that, even if the parties to the applicable agreement had agreed to treat the local company as a United States national because of the majority shareholding, "*the pervasive control by Mexican nationals over, and involvement in the affairs of*" the local company should lead the tribunal to decline jurisdiction under Article 25 of the ICSID Convention. The tribunal rejected respondent's argument.

192. Claimants further allege that given the fact that Claimants brought the claim in their names, the issue of what would have happened had TSDIF brought the claims itself is purely academic.

193. Claimants also submit that Respondent's attempts to imply that TSDIF already would have brought a claim in its own name against Respondent and that this would confirm that the real parties in interest would be TSDIF and the Turkish Treasury, is also incorrect. In fact, the "*proceedings*" to which Respondent refers is merely a Payment Order which was addressed to KaR-Tel and was issued by the TSDIF on October 7, 2004, shortly following the sale of KaR-Tel to Vimpelcom. Such USD 5.5 billion payment order was sent to over 200 Uzan-associated companies in October 2004. This was just an unsuccessful payment request by the TSDIF, not the institution of proceedings in the name of Telsim or Rumeli against Respondent.

194. Likewise, Claimants submit that Respondent's assertion that "*it is telling that Motorola brought its proceedings against the Republic of Turkey and the TMSF (TSDIF) and even more telling that the Republic of Turkey and the TMSF settled those proceedings*" is irrelevant to the dispute at hand. Moreover, it is factually wrong. The settlement agreement was entered into by Telsim, Rumeli, Bayindirbank A.S., Motorola Inc., Motorola Credit Corporation, Motorola Limited, and Motorola Komunikasyon Ticaret Ve Servis Ltd. STI. Neither the Republic of Turkey nor TSDIF were signatories. Therefore, according to Claimants, the fact that an arbitration initiated by Motorola against the

[7] *Autopista Concesionada de Venezuela, C.A. v. Bolivarian Republic of Venezuela* (ICSID Case No. ARB/00/5), Decision on Jurisdiction of September 27, 2001, para. 52 [hereinafter *Autopista*].

Republic of Turkey and TSDIF was settled in an agreement to which the Republic of Turkey and the TSDIF were third parties, and which they did not even sign, cannot be evidence that Claimants lack standing to bring this claim.

195. As for the letter of Dr. Yaşar Akgün, Deputy Chairman of Rumeli, to VimpelCom stating that Rumeli was now a "*state concern*," it is by no means an admission of the assimilation of Claimants' Rumeli and Telsim to the Turkish State for purposes of jurisdiction. Rather, it is a mere declaration that the TSDIF was naturally concerned as the managing authority of Claimants.

196. Furthermore, according to Claimants, the issue of who is the beneficial owner of the Rumeli and Telsim's claim is also largely irrelevant. Not only would Claimants directly benefit from any award, but the only ICSID decision to closely examine the question of the beneficial owner of a claim, the *CSOB* decision,[8] held quite clearly that beneficial ownership of a claim was irrelevant to the issue of standing. This position is supported by the expert witness statement of Professor Ziya Akinci, who confirms that the possible ultimate transfer of proceeds of any resulting award to third parties, be they State entities or private entities, would not in any event deprive Claimants of their commercial status.

197. Finally, Claimants allege that, with respect to ownership of the companies, neither Claimant is owned by the TSDIF or the Republic of Turkey. Claimants' shareholders remain private individuals. In any event, even ownership of a claimant by a State does not warrant examining the standing of the public entity that owns that claimant. The task of an ICSID tribunal in such a case is, as decided in *CSOB,* limited to reviewing the nature of the activities of the named claimant.

198. In sum, Claimants point out that they are neither the Turkish State nor the TSDIF, and that Article 25 of the ICSID Convention and the BIT plainly grant this Tribunal jurisdiction *rationae personae* to rule on the dispute.

---

[8] *Československa obchodní banka, a.s. v. Slovak Republic* (ICSID Case No. ARB/97/4), Decision on Objections to Jurisdiction of May 24, 1999 [hereinafter *CSOB*].

2. There was no assignment of Claimants' claim to the TSDIF

199. According to Claimants, they never assigned their claim to the TSDIF. The TSDIF was granted the authority pursuant to Turkish laws to appoint Claimants' management following the ImarBank banking violations. While TSDIF did appoint Claimants' management and played an instrumental role in the sale of the Uzans' assets, it never became the owner of Claimants' claim against Respondent.

200. Therefore, Claimants retained ownership of their claim. As noted in Professor Ziya Akinci's expert witness statement, Rumeli and Telsim had and retain standing to sue under Turkish law.

3. The TSDIF was not subrogated to Claimants' claims

201. According to Claimants, Respondent's allegation that the relationship between the TSDIF and Claimants should be viewed as one of subrogation is equally artificial. There was no subrogation and the economic consequences are entirely different from those of a subrogation. Indeed, as noted by Professor Schreuer, in the case of subrogation, "*the insurer succeeds to all the rights of the beneficiary who has received compensation under the insurance contract.*" Here, however, there was no insurance contract between Rumeli and Telsim and a national insurance agency, and Rumeli and Telsim received no compensation under such an imaginary insurance contract. There has also been no transfer of economic risk as in *CSOB*. In other words, nobody has compensated Claimants for their losses.

4. There is no reason to pierce the corporate veil

202. According to Claimants, the Arbitral Tribunal should also dismiss Respondent's claim that Claimants' corporate veils should be pierced.

203. In support of this position, Respondent relies on two cases, namely *Barcelona Traction*[9] and *Tokios Tokelés*.[10] It is true that in *Barcelona Traction*, the International Court of

[9] *Case Concerning The Barcelona Traction, Light and Power Company, Limited (Belgium v. Spain),* Judgment of February 5, 1970, I.C.J. Reports, p. 3 [hereinafter *Barcelona Traction*].

Justice held that piercing the corporate veil might be justified to prevent the misuse of the relevant company's legal personality in the case of fraud or malfeasance, to protect creditors or purchasers, or to prevent the evasion of legal requirements or obligations. However, none of these conditions is present here.

204. In *Tokios Tokelés*, the Tribunal rejected respondent's arguments to pierce the corporate veil on the basis that the claimant had made no attempt to conceal its national identity from the respondent and had not created the claimant companies to gain access to ICSID jurisdiction. Similarly, Claimants did not conceal their Turkish juridical identity from Respondent and were clearly not created for the purpose of gaining access to ICSID arbitration.

205. Moreover, nowhere in the ICSID Convention is there a basis for piercing the corporate veil of a designated claimant. This has been confirmed in the *ADC* ICSID award[11] where the arbitral tribunal confirmed that the principle of piercing the corporate veil "*only applies to situations where the real beneficiary of the business misused corporate formalities in order to disguise its true identity and therefore to avoid liability*."

206. In the present case, it cannot be seriously argued that the Turkish State or the TSDIF "*misused corporate formalities*." Rumeli and Telsim were incorporated in 1993, long before the start of these proceedings, and conducted substantial activities in the telecommunications sector for many years, both in Turkey and abroad.

5. Respondent's allegation that Article 25 of the Convention imposes a control test must fail

207. According to Claimants, the rule as to standing is clearly set forth in Article 25(1) of the ICSID Convention: "*The jurisdiction of the Centre shall extend to any legal dispute arising directly out of an investment, between a Contracting State…and a national of another Contracting State…*" The general rule as to the meaning of "*national of another*

---

[10] *Tokios Tokelés*, Decision on Jurisdiction of April 29, 2004.

[11] *ADC Affiliate Limited and ADC & ADMC Management Limited v. The Republic of Hungary* (ICSID Case No. ARB/03/16), Award of October 2, 2006, para. 335 et seq. [hereinafter *ADC v. Hungary*].

Contracting State" for legal entities, is set forth in the first clause of Article 25(2)(b), which provides that a national of another Contracting State means "*any juridical person which had the nationality of a Contracting State other than the State party to the dispute on the date on which the parties consented to submit such dispute to conciliation or arbitration*." However, for legal entities, Article 25(2)(b) provides an exception. It states that a national of another Contracting State also means "*any juridical person which had the nationality of the Contracting State party to the dispute on that date and which, because of foreign control, the parties have agreed should be treated as a national of another Contracting State for the purposes of this Convention*."

208. Therefore, according to Claimants, the control test provided under the second clause of Article 25(2)(b), was specifically inserted to broaden the scope of ICSID jurisdiction, not to limit it. It is precisely to fulfill this purpose in favor of jurisdiction that it has been applied by ICSID tribunals, such as in *SOABI*.[12]

209. In this respect, Claimants allege that all the cases cited by Respondent, *i.e. Vacuum Salt v. Ghana, Letco v. Liberia*,[13] and others relate to the second clause of Article 25(2)(b) and focus on the situation where the investor was an entity incorporated in the respondent State, and where control in the context of the second clause of Article 25(2)(b) was therefore relevant, which is not the case here.

210. Claimants finally allege that Respondent misstates the legal doctrine relating to the second clause of Article 25(2)(b). Respondent misreads Mr. Amerasinghe's article and Mr. Broches' statements to stand for the proposition that a flexible approach is taken under the Convention to determine standing. In the *Tokios Tokelés* Decision on

---

[12] *Société Ouest Africaine des Bétons Industriels [SOABI] v. State of Senegal* (ICSID Case No. ARB/82/1), Decision on Jurisdiction of August 1, 1984, 2 ICSID Reports 175 [hereinafter *SOABI v. Senegal*].

[13] *Vacuum Salt Products Ltd. v. Republic of Ghana* (ICSID Case No. ARB/92/1), Award of February 16, 1994, 4 ICSID Reports 345 [hereinafter *Vacuum Salt*]; *Liberian Eastern Timber Corporation v. Republic of Liberia* (ICSID Case No. ARB/83/2), Interim Award of October 24, 1984, 2 ICSID Reports, pp. 349 -351 [hereinafter *LETCO*].

Jurisdiction,[14] the arbitral tribunal strongly criticized that incorrect reading and highlighted the limited circumstances where the use of a control-test is justified: "*[t]he second clause of Article 25(2)(b) limits the use of the control-test to the circumstances it describes, i.e., when Contracting Parties agree to treat a national of the host State as a national of another Contracting Party because of foreign control… ICSID Tribunals ... have interpreted the second clause of Article 25(2)(b) to expand, not restrict jurisdiction ....*"

6. TSDIF would satisfy the jurisdictional requirements of ICSID in any event

211. According to Claimants, even if TSDIF were somehow the "*real party*" to this dispute, the tribunal would in all likelihood still have jurisdiction to hear it. Indeed, as stated by Mr. Broches in his article, a state-owned entity qualifies as a national of another Contracting State unless it acts as an agent for the government or discharges an essentially governmental function.

212. In the only ICSID case were this situation was addressed, *i.e.* the *CSOB* case,[15] it was decided that the sole determining factor is the nature of the activities of the relevant entity: "*While it cannot be doubted that in performing the above-mentioned activities, CSOB was promoting the governmental policies or purposes of the State, the activities themselves were essentially commercial rather than governmental in nature.*" Furthermore, the *CSOB* tribunal went even further and reasoned that the standing of a state-owned entity under Article 25 of the ICSID Convention should be reviewed not on the basis of the acts and function of the state-owned entity in general, but rather on the basis of its acts and function in connection with the actual dispute under review.

213. In this respect, Claimants point out that Respondent mischaracterized their position by stating that "*the test formulated by Broches and applied by the CSOB tribunal would be quite meaningless if the question was whether it was an essentially governmental function*

[14] *Tokios Tokelés*, Decision on Jurisdiction of April 29, 2004, paras. 45-47.

[15] *CSOB*, Decision on Objections to Jurisdiction of May 24, 1999, para. 20.

to bring litigation." Indeed Claimants do not argue that the Broches test as applied by the *CSOB* tribunal would grant the tribunal jurisdiction whenever a State agency brings litigation. Rather, the point is that, following the ImarBank banking violations, the TSDIF appointed managers to Rumeli and Telsim. These new managers continued to run Rumeli and Telsim as telecommunications companies. In April 2003, as any commercial entity would do when faced with the expropriation of a valuable asset, the previous managers of Rumeli and Telsim wrote to Respondent stressing that they intended to submit the dispute to the International Centre for Settlement of Investment Disputes. When Rumeli and Telsim's previous management was replaced by TSDIF appointed management, the new managers simply carried out the previous managements' commercial plans to submit Rumeli and Telsim dispute with Kazakhstan for final resolution to ICSID. The TSDIF-appointed managers did not exercise any special prerogatives in fulfilling the previous managements' "*firm intentions*."

214. According to Claimants, the Cayman Islands case *TMSF v. Wisteria Bay* cited by Respondent in this context is totally irrelevant for the following reasons:

- in that case, the TSDIF was a party to the proceedings; and
- the TSDIF was exercising special privileges to confiscate assets.

215. Finally, and in any event, even if the TSDIF was acting in this arbitration pursuant to public prerogatives, the closest analogy to its role would be that of a receiver. Bringing a claim in such a circumstance is perfectly legitimate in all developed municipal legal systems. To deny a receiver the right to bring such a claim would undermine any possibility of protecting the rights of the insolvent company's creditors through an arbitration procedure.

C. Claimants have gone far beyond establishing a *prima facie* case on the merits

216. According to Claimants, the Arbitral Tribunal cannot follow Respondent's allegation that Rumeli and Telsim have failed to establish a *prima facie* case on the merits so as to satisfy the jurisdictional requirements for their claim. Indeed, according to Claimants, all

the measures that were implemented by the Republic of Kazakhstan and led to the expropriation of Claimants' property as well as their multiple violations of international law are fully documented by Claimants and firmly establish their claim.

D. **Respondent is a proper party to this dispute**

217. Contrary to Respondent's allegation, this dispute is not a dispute between two private parties or related to contractual claims. Neither is it a dispute limited to the ownership of KaR-Tel. Rather, Claimants' claims are premised on Respondent's collusion with the local partner and violation of the BIT and international law, encompassing, *inter alia*, Respondent's wrongful termination of the Investment Contract, its resulting denial of Claimants right to challenge the termination of said Contract, its eviction of Claimants from KaR-Tel, its intimidation measures against Claimants' executives, and its failure to grant Claimants adequate compensation for what amounted to the expropriation of their shares.

E. **Claimants have standing to challenge the cancellation of the Investment Contract**

218. Claimants dispute Respondent's allegation that:

- Claimants do not have standing to challenge the termination of the Investment Contract because they were not parties thereto;
- even if Claimants had standing, such a claim would fall outside the scope of this Tribunal's jurisdiction since it would amount to a contractual claim which is not encompassed by the jurisdictional provisions of the Investment Contract.

219. According to Claimants, none of these arguments are founded:

- this arbitration is not based on the Investment Contract;
- it is not solely related to the termination of the Contract;
- the wrongful termination of the Investment Contract is but one element of Respondent's wrongful conduct, and in fact is the catalyst and pretext for

Respondent's ultimate expropriation of Claimants' investment without adequate compensation;

- this arbitration arises out of Respondent's violation of the BIT and international law.

F. **<u>The Foreign Investment Law is a valid secondary basis for establishing jurisdiction</u>**

220. According to Claimants, the Foreign Investment Law of the Republic of Kazakhstan constitutes an alternative basis for the jurisdiction of this tribunal. Indeed, under Article 27(2) of the Law, a foreign investor is expressly permitted to choose ICSID arbitration as the means for solving disputes with the Republic relating to its investments and, once that choice has been made, the consent of the Republic of Kazakhstan is "*presumed to have been granted*."

221. Claimants also submit, contrary to Respondent's allegation, that the fact that the Foreign Investment Law was repealed as of January 8, 2003 does not have any impact on ICSID jurisdiction as it was valid and effective at all times relevant to this dispute. Moreover, Article 6(1) of the Law specifically grants foreign investors protection against adverse changes in legislation for a period of ten years from the date they made their investment, or for the entire duration of a contract exceeding ten years entered into with authorized State bodies. Claimants meet both of these two alternative conditions. The relevant investments were made by Claimants from 1998 to 2002, and the Investment Contract dated May 20, 1999 between Claimants and Respondent was valid until July 31, 2009, *i.e.* for a period of more than ten years.

222. Respondent consented to ICSID arbitration on December 28, 1994, the date of the entry into force of the Foreign Investment Law, which remains applicable to the dispute pursuant to its Article 6(1). As for Claimants, they have completed their consent to ICSID jurisdiction by filing their Request for Arbitration.

II. RESPONDENT'S POSITION

223. According to Respondent, there are a number of grounds which demonstrate that this Tribunal does not have jurisdiction to entertain or determine Claimants' claims. In substance, Respondent alleges that this case is an attempt by a foreign State, the Republic of Turkey, through one of its agencies, to use the ICSID arbitration facility to render a host State, Respondent, responsible for decisions made by its Courts in proceedings between a private foreign investor and a privately-owned company incorporated in the Republic of Kazakhstan and owned, controlled and operated at all material times by private Kazakh citizens.

A. Respondent did not consent to ICSID jurisdiction over this dispute

224. It is Respondent's case that its consent, as expressed either in the Turkey-Kazakhstan BIT or the Foreign Investment Law, does not extend to this dispute because it was limited to investments made in conformity with Kazakh law. The Tribunal must therefore analyze the scope of Respondent's consent and determine whether or not this dispute arises out of an investment that falls within the scope of that consent.

225. In this respect, in the ICSID case *Inceysa v. El Salvador*,[16] the arbitral tribunal found that arbitral jurisprudence had developed three fundamental principles :

- absence of a presumption in favor of or against jurisdiction;
- the need for the identification of the will of the Contracting States; and
- an interpretation according to the principle of good faith.

226. Taking into consideration the above elements, Respondent alleges that both the BIT and the FIL contain clear limitations in relation to Respondent's consent. Article 1 of the BIT limits the protection afforded by the BIT only to those investments made in conformity with the laws and regulations of the Republic of Kazakhstan. The effect of this type of clause was recognized by the *Inceysa* tribunal. The will of the parties to the BIT was to

[16] *Inceysa v. El Salvador*, Award of August 2, 2006.

exclude from its scope of application and protection disputes arising from investments which were not made in conformity with the laws of the host State.

227. In the same vein, the FIL refers in its Article 4(1) to: "*any form of foreign investments and activities which are associated therewith, which are not prohibited by the current legislation of the Republic of Kazakhstan,….*" This language has the same effect as the language in the BIT. Consequently, investments which are contrary to Kazakh law are outside Respondent's consent and the Tribunal's jurisdiction.

1. Claimants' investments were not legal

228. Respondent alleges that its consent to arbitration has only been given to cases involving legal investments. That is the reason why the context in which the "*investments*" of Claimants took place in the Republic of Kazakhstan is highly material and more specifically the Uzans' fraud. Indeed, the Uzans' actions constituted a systematic attempt to commit a worldwide and wholesale fraud both on Motorola and Nokia, as well as on the Uzans' own companies around the world, including KaR-Tel.

229. On January 28, 2002, Motorola, together with Nokia Corporation, initiated legal proceedings in the United States District Court for the Southern District of New York against the Uzan family members and certain of their corporations. The claim alleged acts of racketeering in breach of the US Racketeer Influenced and Corrupt Organizations Act (RICO).

230. On July 31, 2003, the United States District Court for the Southern District of New York gave judgment in favor of Motorola and Nokia for over USD 4 billion. The judgment provides valuable insights into the *modus operandi* of the Uzan family and their corporations which are relevant to the present proceeding. Amongst the findings of the Court which are of relevance, the following points are highlighted by Respondent:

- the Uzans failed to disclose to Motorola that they intended to divert some of the proceeds of the Motorola loan to KaR-Tel for non KaR-Tel purposes;

- Telsim was given a final repayment deadline of April 2001 in respect of USD 700 million of loans which had been granted to it;
- on May 22, 2001, Motorola issued a notice of default in respect of the USD 700 million that remained unpaid from April;
- the Uzans saw Motorola's loans as a great opportunity to funnel vast sums into their control and then divert them wherever they chose, whether to prop up other companies in their far-flung enterprise or to simply launder monies into their own pockets;
- at least USD 552 million was laundered into the control of Uzan-controlled companies by the device of reimbursing them for fraudulently overstated expenses.

231. Respondent further points out that whereas providing funding was one of Rumeli's principal obligation under the Foundation Agreement, Rumeli did not in fact make any investment at all, electing instead to burden KaR-Tel with huge debts.

232. In this context, the funds advanced under the Motorola loan, for which KaR-Tel had assumed an obligation to repay, were never received by KaR-Tel. Rather, they were paid directly to Rumeli, which paid the balance of USD 60 million to the Ministry of Finance for the License. The remaining USD 5 million, which was subsequently increased to over USD 17 million, was never received by KaR-Tel at all. Respondent understands that these sums were retained and used by Telsim and/or Rumeli, despite KaR-Tel being liable for the debt created thereby.

233. In the same vein, pursuant to clause 6 of the Investment Contract, KaR-Tel was obliged to use advanced technology in developing its network in Kazakhstan. It emerges from various audits and the Court-appointed forensic merchandising examination of KaR-Tel by the Forensic Examination Centre of the Ministry of Justice during the course of the Kazakh Courts proceedings, that Telsim had been selling obsolete second-hand equipment to KaR-Tel at inflated prices. Indeed:

- between February 1, 2001 and April 25, 2002, Mr. Agilönü caused KaR-Tel to enter into contracts with Telsim for the purchase of handsets for a total of USD 9,270,970. An average market value for the handsets was approximately USD 4,395,556;
- by contract IEPA 29 dated May 10, 2000, KaR-Tel purchased from Telsim telecommunications equipment for a total price of USD 5,840,797.74. These products were available at the time from a different supplier for USD 1,898,728.

234. Therefore, according to Respondent, the reality of the situation appears to have been that Claimants were pursuing with KaR-Tel precisely the same strategy that they had adopted in relation to other mobile telecommunications ventures around the world. KaR-Tel was merely a small part of the overall project. What made Claimants' action towards KaR-Tel worse was that they deliberately indebted it twice. Indeed, KaR-Tel was liable for its borrowing from Motorola of USD 17 million, which it never received and which appears to have been retained or used by Telsim and, in addition, was caused or procured by Claimants' executives who operated KaR-Tel to enter into further loan agreements with Telsim for the provision of overpriced and obsolete equipment.

235. Therefore, it is Respondent's allegation that in circumstances where the entire basis of Claimants' alleged investment in KaR-Tel was to further their worldwide fraud, the investment was not in conformity with the laws of Kazakhstan. Respondent submits that the Tribunal should adopt the same approach as the *Inceysa* tribunal, which identified three general principles of international law against which the conduct of the claimant must be compared: good faith, *nemo auditur propriam turpitudinem allegans*, and international public policy.

2. Claimants' investments violated the principle of good faith, the principle *nemo auditur propriam turpitudinem allegans* and international public policy

236. According to Respondent, being part of a worldwide fraudulent scheme, Claimants' investment was made in violation of the principle of good faith. Therefore, Claimants did not make their investment in conformity with Kazakh law.

237. Moreover, no legal system based on rational grounds would allow a party which has committed an illegal act to benefit from it. Therefore, Claimants cannot enjoy the protection granted by Respondent, such as access to international arbitration under the ICSID system.

238. In the same vein, the *Inceysa* tribunal found that international public policy consists of a series of fundamental principles that constitute the very essence of the State and the essential function of which is to preserve the values of the international legal system against actions contrary to it. One of those values is respect for the law. If the Tribunal were to assume jurisdiction to resolve the dispute brought before it by Claimants, it would recognize the existence of rights for Claimants arising out of their illegal conduct. That would violate the respect for the law which is a principle of international public policy.

239. Respondent finally sets forth that violation of international public policy was held to be a self-standing ground for refusing to accept jurisdiction over a claim by the tribunal in the *World Duty Free* case.[17] There, the tribunal found that the contracts which formed the basis of the investor's claim had been procured by bribes. The tribunal then cited a passage from the decision of Judge Lagergren in ICC Case No. 1110: "*Jurisdiction must be declined in this case… Parties who ally themselves in an enterprise of the present nature must realize that they have forfeited any right to ask for the assistance of the machinery of justice (national courts or arbitral tribunals) in settling their disputes*."[18]

240. Fraud is contrary to the international public policy of most, if not all, States. It follows that claims based upon investments which were part of a fraud, cannot be admitted by the ICSID mechanism.

[17] *World Duty Free v. Kenya*, Award of October 4, 2006.

[18] *Id.*, para. 148, citing *ICC Case No. 1110*, Award of 1963, [1994] International Arbitration at 277.

B. Claimants do not have standing to bring this arbitration

1. The Turkish State is the real party in interest in this arbitration

241. According to Respondent, the nominal Claimants to these proceedings are not the real claimants or the real parties in interest in this arbitration. The true claimant is in fact the TSDIF, which is indisputably an agency of the Turkish State and does not itself have standing to bring these proceedings.

242. Respondent points out that, on February 14, 2004, the TSDIF seized Claimants. Since then, it cannot be argued that Claimants have existed as independent commercial entities in any meaningful sense.

243. According to Respondent, this seizure of Rumeli and Telsim is part of the consequences of the worldwide fraud committed by the Uzans and the collapse of their bank. The TSDIF is an agency of the Turkish Government. Its Board of Directors is appointed by the Turkish Council of Ministers. It is obliged to report its activities and financial position to the Turkish Parliament and its budget is approved by the Turkish Treasury. Membership of the TSDIF is mandatory for all banks operating in Turkey. The TSIDF's purpose is to guarantee deposits held in both domestic and foreign banks operating in Turkey as to 100%.

244. If a Turkish bank collapses, the TSDIF's function is to reimburse depositors for the full amount of their deposits held by the bank. Prior to 1999, this role was undertaken directly by the Turkish Government.

245. On June 12, 2003, the Turkish Ministry of Energy annulled the Concession Agreements under which Çukurova Elektrik ("*ÇEAS*") and Kepez Elektrik, the two most profitable companies owned and managed by the Uzan family, supplied electricity in Turkey's Mediterranean region.

246. At the same time, the Turkish Banking Regulatory and Supervisory Board (the "*BDDK*") was becoming concerned about the activities of ImarBank, also owned by the Uzans.

The loss of ÇEAS and Kepez Elektik caused concern in the Turkish market and led a significant number of depositors to remove their deposits from ImarBank. On July 3, 2003, the BDDK revoked ImarBank's license and began an investigation into its activities. Control over ImarBank then passed to the TSDIF.

247. According to Respondent, the ensuing investigation into the management of ImarBank by the Uzan family revealed that the bank had under-declared its true level of deposits. ImarBank had declared its deposits at around USD 600 million. It quickly became clear that more than USD 5 billion had been deposited and concealed using a sophisticated double accounting system. Consequently, in August 2003, warrants for the arrest of Kemal Uzan and Hakan Uzan were issued, the two individuals having fled the country shortly before the takeover of ImarBank.

248. The scale of the Uzans' fraud on Imarbank meant that the TSDIF was unable to meet the full extent of the bank's liabilities so that the Turkish Treasury was forced, for the first time since the TSDIF was established, to settle the depositors' claims on ImarBank.

249. According to Respondent, this meant that action was taken by the Turkish Government to seize every Uzan-related asset they could locate. At the end of July 2003, Law 4969 was passed by the Turkish Government which extended the scope of assets that could be frozen and therefore conserved to settle the debts owed by ImarBank and ultimately borne by the Turkish State. Some 259 companies controlled by the Uzan family were affected. In late 2003, a further law, Law 5020, was passed by the Turkish Government, which provided for the transfer of management and control of companies owned by affiliates and shareholders of ImarBank to the TSDIF. The TSDIF, on behalf of the Turkish State, began reimbursing ImarBank depositors on January 23, 2004.

250. On February 14, 2004, the TSDIF exercised its powers under Law 5020 in respect of Claimants in this Arbitration, Rumeli and Telsim. Within two days, the TSDIF had appointed a new executive board of directors headed by Mehmet Tasaltin, a former

executive of Turkish Telecom, to administer all communication companies within the Uzan group of companies.

251. Following Telsim's seizure by the TSDIF in February 2004, Motorola and Nokia demanded the TSDIF to settle their US judgment debt of over USD 2 billion.

252. During the course of 2004 and 2005, the TSDIF restructured Telsim in preparation for a sale. On December 13, 2005, the Telsim brand, its assets and business were auctioned with Vodafone successfully bidding a reported USD 4.55 billion to acquire them.

253. In October 2005, under the agreement reached with the TSDIF, Motorola was to receive 20% and Nokia 7.5% of the proceeds of the Vodafone sale, in settlement of their judgment debt. The remaining 72.5% of the sale proceeds passed to the Turkish State to reduce the loss it had suffered in paying back depositors of ImarBank.

254. Consequently, according to Respondent, since February 14, 2004, the TSDIF has been the only entity with any real interest in Claimants. It is misleading to suggest that there are genuine private shareholders of Claimants who exercise any function at all in relation to Claimants. In this respect, the documents reluctantly disclosed by Claimants show that the nominal shareholders continue to be the members of the Uzan family who are fugitives from Turkish justice since 2003, two years before this arbitration was initiated.

255. Respondent further points out that TSDIF, with the assistance of the Turkish Treasury, had already paid Motorola USD 500 million as an initial payment prior to the sale of Telsim. This payment, together with the agreement to make further payments following Telsim's sale, was the settlement agreed in the ICSID proceedings Motorola brought against the Republic of Turkey and the TSDIF, not Telsim or Rumeli. In that arbitration, Motorola alleged that the TSDIF's seizure of Telsim had expropriated Motorola's "*investment*" in Telsim, in the form of several billion dollars of loans that remained owing to Motorola.

256. According to Respondent, it is telling that Motorola brought its proceedings against the Republic of Turkey and the TSDIF and even more telling that the Republic of Turkey and the TSDIF settled those proceedings. If the TSDIF's assertions in this arbitration that Rumeli and Telsim are the only and the true parties in interest were genuine, it is surprising, to say the least, that the TSDIF and the Turkish State adopted the view that they needed to settle the ICSID claim brought against them in respect of Rumeli and Telsim by paying well over USD 1 billion to Motorola and Nokia.

257. According to Respondent, it is established by the above that:

- TSDIF is in total control of both Claimants;
- Telsim's assets and business have been sold;
- Telsim, without any assets or business, is a mere shell;
- no part of the sums received in respect of the sale of Telsim's business and assets has been retained by Claimants themselves;
- nor has any part of the sums so received been paid to the official "*shareholders*" or "*owners*" of Claimants;
- it is disingenuous for Claimants to attempt to perpetuate the fiction of private ownership by the Uzans, who are reportedly fugitives from Turkish justice;
- the sole power over Claimants not held by the TSDIF, namely the right to receive dividends, did not prevent it from removing all of the proceeds of sale of Telsim from Claimants;
- in fact, the sums received by Telsim have been used by the TSDIF to satisfy settlement terms agreed by the Republic of Turkey with Motorola and Nokia arising out of their ICSID proceedings;
- the real parties in interest in this claim are not Claimants, but the TSDIF and the Turkish Treasury.

258. The fact that the real parties in interest are the TSDIF and the Turkish Treasury is further confirmed by the existence of proceedings brought by the TSDIF in its own name against

KaR-Tel in Turkey seeking to recover USD 5.5 billion in relation to the same subject matter as this arbitration.

259. According to Respondent, none of the arguments set forth by Claimants to support the allegation that Claimants are the proper parties to this arbitration, has any merit. In this respect, Claimants point out that they are "*commercially registered legal entities*." However, Respondent does not dispute that Claimants continue to be in existence. Rather, it disputes that they are in existence in anything other than a shell form and for any other purpose than attempting to maintain standing for the purposes of this arbitration. This is confirmed by:

- Respondent's Expert Report on Turkish Law;
- the announcement by Mr. Yusuf Adigüzel after the sale of Telsim's assets and business that: "*the aim of TSDIF is to sell the assets of the companies managed by it to reduce the amount of public debt and to liquidate the companies. Telsim A.S. will be liquidated in the near future*."

260. According to Respondent, Claimants' argument that they have a number of employees and own a number of assets including immovable property, credits and receivables, also does not support Claimants' position. Indeed, the fact that TSDIF may not yet have laid-off absolutely all of Claimants' employees or sold off all of their office buildings is irrelevant to the issue of whether or not they are mere shell companies. Claimants' reliance on *Saluka* and *Aguas del Tunari* misses the point. Both of those cases concerned genuine commercial entities, with no hint of unusual conduct sufficient to justify piercing the corporate veil. More importantly, in neither case was there any issue of State involvement.

261. In the same vein, according to Respondent, Claimants' allegation that they "*have full legal capacity and can thus commence legal proceedings or be sued before the courts*" is curious. Indeed, it is strange that other Court cases relating to Rumeli and Telsim are brought by the TSDIF in its own name. It is also strange, in such circumstances, that

Motorola and Nokia issued ICSID proceedings against TSDIF and the Republic of Turkey rather than commercial arbitration or Court cases against Claimants.

262. Respondent further submits that Claimants' allegation that "*the fact that Claimants may or may not have substantial activity at this time neither bars them from taking up such activity at a later stage, nor renders them shell companies*" says everything. The important point is that at the time of instituting these proceedings, the TSDIF had agreed to sell the Telsim brand name, its business and all of its assets for USD 4.55 billion; both Rumeli and Telsim had been completely under TSDIF control for well over a year and neither Claimant had any material ongoing commercial activity.

263. As expressed by Dr. Yasar Akgün, a TSDIF appointee to Claimants' boards, in two letters to VimpelCom dated August 27, 2004, "*our company is now a state concern*." Accordingly, Respondent alleges that the reality is that Claimants' existence is perpetuated as vehicles for the TSDIF and the Turkish State to abuse the ICSID arbitration mechanism and evade its clear jurisdictional requirements.

264. With respect to the *CSOB* case invoked by Claimants, Respondent submits that it is substantially different from the present case. In *CSOB*, the tribunal considered that standing in an international forum was determined by reference to the date on which proceedings are instituted and noted that the assignments of the claims had taken place over a year after the registration of the Request for Arbitration.

265. Respondent finally alleges that one of the strange features of this case is that Claimants have failed to give any explanations about what was going on within their companies. They know the facts, but they have declined to go into them on the basis that the Uzan fraud has nothing to do with Kazakhstan. In this context, Respondent points out that in his evidence before the Tribunal, Mr. Akgün admitted that the TSDIF had recently decided to file a law suit in Turkey against Claimants' former directors and auditors. Mr. Akgün also stated that Claimants did not investigate the allegations made against the Uzans in the US proceedings in relation to what was there termed the "*KaR-Tel Scheme*."

2. The assignment of Claimants' cause of action

266. Respondent submits that the TSDIF's seizure is identical in legal and economic effect to an assignment of Claimants' cause of action.

267. It is a question of fact for determination by the Tribunal whether or not the terms of the host State's consent to ICSID arbitration extend to the assignee and/or permit assignment of rights and obligations arising out of an investment relationship. As underlined by Schreuer, where the host State is unaware of, or has resisted, an assignment, "*it is unlikely that a tribunal will decide that party status under the Convention has been transferred*."

268. According to Respondent, even if it were possible to construe Respondent's consent to ICSID arbitration as extending to an assignee (which is not accepted), such consent could not be deemed to extend to a State or State agency.

269. The legal and economic effect of the TSDIF's seizure of Claimants is identical to an assignment. Had the TSDIF received such a voluntary assignment, this Tribunal would be bound to reject jurisdiction over this claim. According to Respondent, the TSDIF cannot be placed in a better position because it seized Claimants and thereby forcibly took over the alleged causes of action than if it had taken a voluntary assignment.

3. The TSDIF was subrogated in Claimants' claim

270. According to Respondent, another way of viewing the relationship between the TSDIF and Claimants is one of subrogation. Indeed, the economic consequences of the TSDIF's seizure of Claimants is the same as if it had been subrogated to their rights. On this additional or alternative basis, Respondent submits that this Tribunal does not have jurisdiction under Article 25 of the ICSID Convention.

271. During the negotiation of the ICSID Convention, the situation in relation to State-operated investment insurance funds was considered. The possibility was explicitly discussed of ICSID's arbitration facilities being made available to a governmental

subrogee under such an insurance fund by virtue of an ICSID clause between the investor and the host State. Ultimately, however, this possibility was removed as it was felt that it might well lead to the Centre becoming a forum for inter-State confrontations.

272. On the other hand, if the subrogee were a private insurer and, like the investor, a "*national of another Contracting State*," there would appear to be no difficulty in it appearing as a party in ICSID proceedings in place of the investor, assuming the host State had consented to the subrogation. The position is markedly different where the subrogee is a governmental or inter-governmental entity. Such an entity cannot avail itself of the investor's right to ICSID arbitration against the host State.

273. Professor Schreuer cites three main reasons for the denial of party status to a State-owned investment insurance agency, each of which applies in this arbitration:

- the Convention provides for the settlement of disputes between States and nationals of other States. The clear wording of Article 25(1) cannot be reinterpreted to cover disputes involving States, State agencies or international organizations on the investor's side;
- one of the Convention's objectives is to depoliticize disputes;
- the Convention's '*travaux préparatoires*' show that a conscious decision was made to exclude States, State agencies or international organizations from access to ICSID proceedings on the investor's side.

274. Therefore, according to Respondent, an indemnifying State fund cannot take advantage of the right the investor may have had under an appropriate ICSID clause. Further more, the State Fund does not have the right to bring such proceedings in the investor's name.

275. It is true that according to Broches, this general exclusion of a State fund would not prevent that fund requiring an indemnified investor to pursue its remedies under the Convention to offset the insurer's net payments under the insurance scheme. However, in such circumstances, a plea of non-admissibility might be invoked against the claim on the basis that the investor has been indemnified. In this respect, Respondent points out

that Claimants have no interest whatsoever in the outcome of this arbitration. They are not trading entities and they will not see the benefit of any sums recovered, which will instead go directly to the Turkish Treasury.

276. Respondent finally submits that, under Turkish law, the TSDIF is much more than a subrogate. It is granted the right to seize all assets of the shareholders of a collapsed bank and pursuant to Article 12 of the Turkish Regulation Relating to Liquidation of Companies Controlled by TSDIF, it is the legal successor in title to any of the companies it seizes.

4. Alter ego and piercing the corporate veil

277. According to Respondent, there is another way of viewing the TSDIF's undoubted absolute control over and operation of the remaining shells of Claimants. The TSDIF is effectively the *alter ego* of Claimants.

278. Another view would be to consider the bringing of this claim through the doctrine of piercing the corporate veil: the filing of the claim by the nominal Claimants is a sham designed to conceal the reality of a claimant which fails to satisfy the ICSID jurisdictional requirements. These doctrines have been expressly held to be applicable in the international law context by the International Court of Justice in the *Barcelona Traction* case and by an ICSID tribunal in the *Tokios Tokelés* case.

279. If the corporate veil is pierced, what remains is a claim brought by, and on behalf of the Turkish State. Such a case does not fall within the bounds of ICSID jurisdiction pursuant to Article 25 of the Convention as a result and the claim should be rejected.

5. *"Control"* and *"incorporation"*

280. Respondent disputes that Claimants' contention that Article 25 of the ICSID Convention only requires the claimant to have the nationality of another Contracting State and that the management of a designated claimant is irrelevant to the analysis under Article 25.

281. Respondent submits that under the ICSID Convention, a broad approach is taken which looks at the reality of the position and is not based solely upon the outdated notion of share ownership relied on in the pre-*Barcelona Traction* jurisprudence. In this sense, Mr. Amerasinghe has stated that "*[a] tribunal may regard any criterion based upon management, voting rights, shareholding or any other reasonable theory as being reasonable for the purpose. The point is that the concept of 'control' is broad and flexible….*" Mr. Broches, too, has written that, whilst the Convention begins from the premise that incorporation determines nationality, an ICSID tribunal should take account not only of formal criteria such as incorporation, but also of economic realities such as ownership and control.

282. In contrast to the general principle that Claimants seek to derive erroneously from the *Autopista* decision on jurisdiction, the tribunal in the *Vacuum Salt* case came to the opposite conclusion. In *Vacuum Salt*,[19] only 20% of the shares of *Vacuum Salt* were in foreign hands. The tribunal proceeded to examine the other possible elements of control over the company, and especially its management, but found that there was nothing which dispelled the overall impression of Ghanaian control. The tribunal held that to assume jurisdiction under those circumstances would have been contrary to the purpose of the Convention.

283. In *LETCO*,[20] the question of control did not raise any factual problem as there was 100% share ownership by a juridical national of another Contracting State. Nonetheless, the tribunal still found it appropriate to also base its finding on the company's decision-making structure and management.

284. In reality, there are a number of examples of ICSID tribunals having looked beyond the signatories to an investment agreement to take account of the true parties in interest. In

---

[19] *Vacuum Salt*, Award of February 16, 1994.

[20] *LETCO*, Interim Award of October 24, 1984.

the *Holiday Inns*[21] decision on jurisdiction, in order to find that the parent companies of the investor, which were not themselves parties to the investment agreement, were proper parties to the proceedings, the tribunal looked specifically to their actual participation in the carrying out of that investment agreement. By the same token, in the *Klöckner v. Cameroon* case,[22] the tribunal found that it had jurisdiction over Klöckner for the purposes of the government's counterclaim even in relation to an investment agreement which had been concluded between a company which was not Klöckner but in which Klöckner had a majority interest, and the government. The basis for this finding was that Klöckner had negotiated the investment agreement and was the real party in interest.

285. According to Respondent, and as suggested by Schreuer, the better approach would be "*a realistic look at the true controllers, thereby blocking access to the Centre for juridical persons that are controlled directly or indirectly by nationals of non-Contracting States or nationals of the host State*."[23] This is the prevailing view adopted by ICSID tribunals.

286. According to Respondent, if such an approach is adopted in order to block claims which can be qualified as abusive of the ICSID mechanism – because they are in reality brought by nationals of non Contracting States or of the host State – the same approach must be followed where claims are brought by another State.

287. It is true that in many of the cases cited, the issue arose because the investor was an entity incorporated in the respondent State. However, according to Respondent, the principle is of more general application. It is in ICSID's interest to guarantee the continued depoliticization of its system by blocking claims brought by one Contracting State against another.

[21] *Holiday Inns S.A. and others v. Morocco* (ICSID Case No. ARB/72/1), Decision on Jurisdiction of May 12, 1974 [hereinafter *Holiday Inns*].

[22] *Klöckner Industrie-Anlagen GmbH and others v. United Republic of Cameroon and Société Camerounaise des Engrais* (ICSID Case No. ARB/81/2), Award of October 21, 1983, 2 ICSID Reports 9, at 17 [hereinafter *Klöckner*].

[23] Christoph H. Schreuer, *The ICSID Convention: A Commentary*, 2001, p. 318, para. 563 [hereinafter *Schreuer*, The ICSID Convention].

288. It is also true that in the *AMCO* case,[24] the tribunal held in general terms that it did not consider an enquiry into the indirect controllers of an investor to be the correct approach. However, the tribunal nonetheless accepted that the true nationality of the controller would have to be taken into account where, for political or economic reasons, it matters for the host State to know the nationality of the controller and where the host State, had it known this nationality, would not have agreed to the arbitration clause.

289. Respondent alleges that in the present arbitration, it matters for Respondent and for the Tribunal to know the true identity of the controller of Rumeli and Telsim. Had Respondent known that Rumeli and Telsim had been seized by the TSDIF, it would not have agreed to arbitrate a dispute arising between them before an ICSID tribunal. It is for this reason that a distinct mechanism for the determination of disputes between the Republic of Turkey and the Republic of Kazakhstan is provided for in Article VII of the BIT.

290. According to Respondent, the facts lead therefore to the conclusion that control of Claimants is relevant, and the circumstance that in the present case such control is exercised exclusively by the Turkish State and its agencies for their sole benefit, means that the case brought by Claimants is an action which seeks to abuse the ICSID mechanism and should be blocked by this Tribunal.

6. The claim brought by TSDIF does not satisfy the jurisdictional requirements of ICSID

291. According to Respondent, if it is accepted that the TSDIF is the true claimant in this arbitration, it becomes necessary to address Claimants' argument that the TSDIF would satisfy the jurisdictional requirements of ICSID as a State-owned entity. Equally, if Rumeli and Telsim are found to be the true claimants, it becomes necessary to consider whether they are effectively State-owned corporations and whether, in consequence, they themselves fall within the boundaries of ICSID jurisdiction.

[24] *Amco Asia Corporation and others v. Republic of Indonesia* (ICSID Case No. ARB/81/1), Decision on Jurisdiction of September 25, 1983, 1 ICSID Reports 396 [hereinafter *Amco I*].

292. In the Commentary to the Preliminary Draft of Convention, it was acknowledged that State-owned corporations could be party to proceedings brought under the Convention. This was not, however, repeated in the Executive Directors' Report on the final Convention text. Schreuer states that the best guidance on this issue is still that formulated by Mr. Broches in his 1972 Hague Academy Course: "*[I]n today's world, the classical distinction, between private and public investment, based on the source of the capital, is no longer meaningful, if not outdated…for the purposes of the Convention a mixed economy company or government-owned corporation should not be disqualified as a 'national of another Contracting State' unless it is acting as an agent for the government or is discharging an essentially governmental function.*"

293. However, according to Respondent, Mr. Broches was writing during the cold war, when, for a multilateral treaty to be effective, he needed to address the peculiarities of genuinely commercial enterprises which happened to be State-owned for political reasons. He did not have in mind the situation in which a State party seized a private company. Respondent therefore submits that the test formulated by Broches has no application in this arbitration. Even if it was applicable, Claimants and/or the TSDIF should still be excluded from ICSID jurisdiction since they are agents of the Turkish government discharging an essentially governmental function.

294. According to Respondent, the TSDIF is indeed an agency of the Turkish government. This conclusion is supported by the following considerations:

- two letters dated August 27, 2004 which expressly refer to the TSDIF as a State agency (Exhibits RM98 and RM99);
- the findings of the Court of Appeals of the Cayman Islands on the basis of submissions made last year by the TSDIF itself in proceedings before that Court. The TSDIF had seized a yacht which the plaintiff had purchased from the Uzan family prior to the seizure of their assets by the TSDIF. An injunction was granted by the Cayman Grand Court ordering the TSDIF not to sell the yacht. The TSDIF relied upon the defense of sovereign immunity in relation to the plaintiff's challenge

to its actions. The TSDIF argued that it was an agency of the Turkish State performing governmental and sovereign acts. And, precisely, the Court of Appeals of the Cayman Islands began its judgment by referring in the very first line thereof to the TSDIF as "*an agency of the Turkish government*."

295. The second, and alternative, ground formulated by Mr. Broches on the basis of which a State-owned corporation or entity would be disentitled from using the ICSID mechanism is where it discharges an essentially governmental function. Respondent emphasizes the fact that Mr. Broches considered either ground to be sufficient alone to exclude an entity from bringing a claim under the Convention mechanism. Respondent accepts that in relation to the second ground, State-ownership, whilst important, is not determinative. What matters is the nature of the functions carried out. According to Respondent, there is no question that TSDIF's activities in general, and in particular in seizing and selling off the assets of shareholders of banks, are governmental functions:

- they are not functions that can be performed by any private person or organization;
- as Mr. Erkam states in his Expert Report on Turkish Law, property seized by the TSDIF is regarded under Turkish law as State-property;
- this is confirmed by the statements made by the Mr. Akgün where he states: "*our company is now a state concern.*"

296. According to Respondent, the test is thus whether the entity discharges in general a governmental function and not as suggested by Claimants, whether the particular act in question is of a governmental nature. To support their position, Claimants rely on a passage from the *CSOB*[25] decision on jurisdiction which states that: "*Respondent has failed to sustain its contention that the Centre lacks jurisdiction and the Tribunal competence to hear this case on the ground that Claimant was acting as an agent of the State or discharging essentially governmental activities as far as this dispute is concerned*" (emphasis added).

[25] *CSOB*, Decision on Objections to Jurisdiction of May 24, 1999, para. 27.

297. According to Respondent, Claimants' interpretation is untenable. The test would indeed be meaningless if the question was whether it was an essentially governmental function to bring litigation. The answer would, naturally, be the same in every case. Therefore, the meaning of the phrase in *CSOB* is to reflect that tribunal's previous observation that the dispute in that arbitration related to investment banking transactions which it found to be of a corporate nature. In the present arbitration, on the contrary, the function being performed by the TSDIF is the attempted realization of funds from the seized property of Turkish nationals charged with criminal offences.

298. Alternatively, Respondent submits that if it is not accepted that the TSDIF is the real claimant in this case, and one takes into consideration the nominal Claimants, Respondent's case continues to be that in pursuing this claim, they are exercising a governmental function. The claim is being funded by the Turkish State, directed by officials of the Turkish State and is designed to recoup a large amount of foreign currency for the Turkish Treasury. None of those things is a function carried out by a private party. The recovery of State debts through litigation or any other means is plainly not an act *jure gestionis*.

299. Respondent further alleges that there is a manifest difference between *CSOB* invoked by Claimants and the present arbitration in that there is a difference between a State-owned investment bank like in *CSOB*, and a defunct shell corporation seized by the State pursuant to domestic criminal laws and operated for the purpose of recovering State debts.

300. Ultimately, irrespective of whether the correct approach is to examine the nature and function of the TSDIF or to take into consideration the nominal Claimants themselves, it is clear that this claim is brought and driven by the TSDIF in an attempt to recover the losses suffered by the Turkish State as a result of the Uzan family's massive-scale worldwide frauds. It is a claim which is brought by the TSDIF pursuant to its statutory and sovereign powers and, as such, falls outside the requirements for jurisdiction set forth by Article 25 of the Convention.

C. No ***prima facie*** case

301. According to Respondent, the fact that Claimants do not even have a *prima facie* case is another obstacle to the jurisdiction of this Tribunal.

302. The *onus* is indeed on Claimants to demonstrate that they have such a case. They have not discharged this burden. Indeed, they have not demonstrated a *prima facie* case of any of the internationally wrongful acts that they allege against Respondent.

303. According to Respondent, Claimants' case is only a string of unspecific and generalized allegations that many diverse Kazakh parties and entities, with no apparent communality of interest, conspired together – for no apparent reason – to mistreat them.

304. Furthermore, Claimants' position that the Kazakh Courts grossly misapplied Kazakh law is unfounded. The evidence on Kazakh law upon which Claimants rely is of limited value. They indeed rely on opinions of Kazakh law professors, in particular those of Professor Suleimenov and Professor Didenko, which the latter wrote in support of Claimants' position before the Kazakh Courts. However, neither of these experts has provided a new expert report on these matters for the purposes of this arbitration. The opinions they have given in the context of the Kazakh proceedings have no status in this arbitration. Moreover, while having provided an expert opinion before the Kazakh proceedings in favor of Claimants, Professor Didenko, shortly after the conclusion of the proceedings, produced an academic article in which he expressly referred to those proceedings and changed his position in relation to a number of important issues.

D. Respondent is not a proper party to the dispute

305. Respondent also alleges that it is not a proper party to these proceedings, as it is not involved in the underlying dispute, which, in reality, is a dispute between private parties as to the ownership of KaR-Tel.

E. **Claimants do not have standing to challenge the termination of the Investment Contract**

306. It is moreover Respondent's contention that Claimants were not parties to the Investment Contract and therefore have no standing to challenge its termination. In addition, even if they did have standing, such a claim would not fall within the jurisdiction of ICSID by reason of:

- the fact that it is contractual claim and not a treaty claim;
- the express jurisdiction provisions of the Investment Contract.

307. According to Respondent, the Investment Contract does not permit ICSID arbitration as a forum for disputes unless there have been written objections to consideration of the dispute by the Courts of Kazakhstan. Furthermore, the Investment Contract expressly restricts the right of action to the "*investor*" which is a term defined in Article 1.3 as KaR-Tel LLP. Finally, if shareholders of an investor company have standing to bring arbitration proceedings in respect of their investment, the specific contractual wording of the Investment Contract does not permit Claimants to bring a treaty claim under it.

F. **The Foreign Investment Law is not applicable**

308. According to Respondent, Claimants' purported reliance on the FIL as founding jurisdiction for this Arbitral Tribunal is also misplaced. Indeed, the consent to arbitrate disputes relating to foreign investment under the FIL was no longer effective at the time of the commencement of these proceedings, as the FIL had been repealed. Claimants' contention that the consent to ICSID arbitration survives this repeal by reason of Article 6 (1) FIL is misconceived. This is only true in the case where the investor has accepted the offer of ICSID jurisdiction in writing whilst the legislation was still in force. In the present case, the FIL had been repealed prior to the registration of the Request for Arbitration, and cannot found jurisdiction for this arbitration.

G. <u>Admissibility</u>

309. If the Tribunal finds that it has jurisdiction in this arbitration, Respondent submits that it should deny the admissibility of Claimants' claims on the ground that they constitute an attempt by a Contracting State to abuse the ICSID arbitration mechanism.

III. DECISION OF THE ARBITRAL TRIBUNAL

310. Respondent challenges the jurisdiction of this Arbitral Tribunal on various grounds. First, it contends that Respondent did not consent to ICSID jurisdiction over this dispute because Claimants' investments were not legal, violated the principle of good faith, the principle *nemo auditur propriam turpitudinem allegans* and international public policy. Respondent further alleges that Claimants do not have standing to bring this arbitration because the Turkish State is the real party in interest, Claimants' cause of action has been assigned to TSDIF or TSDIF was subrogated in Claimants' claim or at least can be considered the *alter ego* of Claimants. They also allege that Claimants do not satisfy the conditions of Article 25 of the ICSID Convention to the extent that they are controlled by the Turkish State and its agencies for their sole benefit. Finally, Respondent submits that Claimants were not parties to the Investment Contract and therefore have no standing to challenge its termination, that in any case Respondent is not a proper party to the dispute, which is a dispute between private parties as to the ownership of KaR-Tel. Moreover, Claimants would not have a *prima facie* case.

311. As to the Foreign Investment Law, Respondent alleges that this Arbitral Tribunal has no jurisdiction on the basis of the FIL since it was no longer effective at the time of the commencement of these proceedings.

312. The jurisdiction of the Centre is based on the conditions set forth in Article 25 of the ICSID Convention which provides:

> *"(1) The jurisdiction of the Centre shall extend to any legal dispute arising directly out of an investment, between a Contracting State (or any constituent subdivision or agency of a Contracting State designated to the Centre by that State) and a national of another Contracting State, which*

the parties to the dispute consent in writing to submit to the Centre. When the parties have given their consent, no party may withdraw its consent unilaterally.

(2) "National of another Contracting State" means:

(a) any natural person who had the nationality of a Contracting State other than the State party to the dispute on the date on which the parties consented to submit such dispute to conciliation or arbitration as well as on the date on which the request was registered pursuant to paragraph (3) of Article 28 or paragraph (3) of Article 36, but does not include any person who on either date also had the nationality of the Contracting State party to the dispute; and

(b) any juridical person which had the nationality of a Contracting State other than the State party to the dispute on the date on which the parties consented to submit such dispute to conciliation or arbitration and any juridical person which had the nationality of the Contracting State party to the dispute on that date and which, because of foreign control, the parties have agreed should be treated as a national of another Contracting State for the purposes of this Convention."

313. In this case, Claimants are companies incorporated and existing under the laws of Turkey. Turkey has ratified the ICSID Convention on March 3, 1989. Claimants appear therefore *prima facie* as nationals of a Contracting State in the meaning of Article 25.

314. Respondent is the State of Kazakhstan which has also ratified the ICSID Convention on September 21, 2000 and therefore also qualifies as a Contracting State within the meaning of Article 25 of the ICSID Convention.

315. On the other hand, the parties gave their consent to ICSID Arbitration in Article VII of the Agreement between the Republic of Turkey and the Republic of Kazakhstan concerning the Reciprocal Promotion and Protection of Investments of May 1, 1992. Article VII entitled "Settlement of Disputes Between One Party and Investors of the Other Party" indeed provides :

1. Disputes between one of the Parties and one investor of the other Party, in connection with his investment, shall be notified in writing,

including a detailed information, by the investor to the recipient Party of the investment. As far as possible, the investor and the concerned Party shall endeavour to settle these disputes by consultations and negotiations in good faith.

2. If these disputes cannot be settled in this way within six months following the date of the written notification mentioned in paragraph I, the dispute can be submitted, as the investor may choose, to:

(a) the International Centre for Settlement of Investment Disputes (ICSID) set up by the "Convention on Settlement of Investment Disputes Between States and Nationals of Other States," (in case both Parties become signatories of this Convention)

(b) an ad hoc court of arbitration laid down under the Arbitration Rules of Procedure of the United Nations Commission for International Trade Law (UNCITRAL), (in case both parties are members of U.N.)

(c) the Court of Arbitration of the Paris International Chamber of Commerce, provided that, if the investor concerned has brought the dispute before the courts of justice of the Party that is a party to the dispute and final award has not been rendered within one year.

3. The arbitration awards shall be final and binding for all parties in dispute. Each Party commits itself to execute the award according to its national law.

316. Claimants completed their consent by filing their ICSID Request for Arbitration on July 15, 2005.

317. By contrast with the Turkish version, the English and Russian versions of the Treaty do not require a prior submission of the dispute to local courts before initiation of arbitration proceedings before ICSID. The Arbitral Tribunal considers therefore that no such requirement had to be fulfilled by Claimants before starting this arbitration.

318. Notwithstanding the above, Respondent alleges that it did not consent to ICSID jurisdiction over this dispute on the ground that Claimants' investment violated the laws and regulations of Kazakhstan.

319. Indeed, in order to receive the protection of a bilateral investment treaty, the disputed investments have to be in conformity with the host State laws and regulations. On the other hand, as was determined by the arbitral tribunal in the *Lesi* case, investments in the host State will only be excluded from the protection of the treaty if they have been made in breach of fundamental legal principles of the host country.

320. After careful examination of Respondent's submissions, the Arbitral Tribunal has reached the conclusion that Respondent did not prove that Claimants' investment would have been fraudulent or would have violated any laws or regulations of Kazakhstan. The allegations of fraud perpetrated by the Uzan Family in Turkey and the judgment rendered on July 13, 2003, in the United States against the Uzans in relation to Motorola loans, are not evidence that the investment made by Claimants in Kazakhstan were themselves fraudulent or illegal. As noted by Claimants (see above para. 173), the New York judgment does not bring any evidence that the two Motorola loans made in relation to KaR-Tel were used improperly or for illegal purposes.

321. Moreover, notwithstanding Respondent's allegations, the record does not contain conclusive evidence that Claimants defrauded KaR-Tel by causing it to enter into transactions with Telsim at excessive prices.

322. From the record, it appears that Claimants made significant investments in KaR-Tel during the period 1998-2002. They legally obtained the second GSM license and paid for it; they developed a telecommunications network in compliance with the local laws and technical regulations of Kazakhstan. Respondent's allegation that Claimants' investment was fraudulent does not find any foundation in the record.

323. The Tribunal has also not found in the record any conclusive evidence that Claimants' investment would have violated the principle of good faith, the principle of *nemo auditur propriam turpitudinem allegans* or international public policy.

324. Respondent further challenges the jurisdiction of this Arbitral Tribunal arguing that Rumeli and Telsim are not the real parties to this arbitration, that the real party in interest

is TSDIF, that Rumeli and Telsim are just empty shells and that the benefit of this award, if any, will go to the Turkish State.

325. We have noted that following the problems encountered by Imar Bank in Turkey, owned by the Uzan family, the Turkish Parliament enacted various laws which empowered the TSDIF, a State agency, to take over the control of companies previously controlled directly or indirectly by the Uzan family and in particular, to take over the management of these companies. It is on this basis that the TSDIF appointed managers to Rumeli and Telsim. These new managers continued to run Claimants as telecommunications companies. In April 2003, the previous managers of Rumeli and Telsim wrote to Respondent stressing that they had intended to submit the dispute to ICSID. The new managers carried out the previous management commercial plans and started ICSID arbitration. The TSDIF is not however Claimant in this arbitral procedure. The case was initiated by Rumeli and Telsim. They are the real Claimants in this arbitration.

326. Even if it is correct that Telsim's assets have been sold to Vodaphone and that Telsim may or may not have substantial activities since that sale, it is still a company incorporated and existing under the laws of Turkey. So also is Rumeli which has not sold its assets. Moreover, the companies have existed since 1993 and have certainly not been created for treaty shopping purposes. The fact that Telsim is no longer an active company in the field of telecommunications is no bar to ICSID jurisdiction. The BIT does not provide a basis for looking beyond a company on the alleged basis that it would be a shell company and does not exclude such companies from its scope of application from the moment it is incorporated in another contracting State. The TSDIF's appointment of managers for Telsim and Rumeli did not in any way put an end to their corporate existence or to Claimants' ownership of their claims against Kazakhstan.

327. The record also confirms that the TSDIF is not the owner of Claimants' shares. It is also incorrect to state that if Claimants are successful, the Turkish State will be the only beneficiary of the moneys allocated to Claimants by the award. The moneys will be used to pay all Claimants' creditors, according to the relevant rules of Turkish law. The role

of the TSDIF may be compared to some extent to the role of a receiver or liquidator or judicial manager. The presence of such an entity as manager of the company in accordance with the law is no bar to the jurisdiction of the Centre. The Arbitral Tribunal does not have to anticipate what would be the status of Claimants in case the two companies would be put into liquidation, since so far no such decision of liquidation has been taken.

328. The record also does not support Respondent's allegation that Claimants' claim was assigned to the TSDIF or that the TSDIF was subrogated to Claimants' claims. Moreover, the Tribunal does not see any reason to "pierce the corporate veil" as requested by Respondent. As pointed out by the *ADC* award, the principle of piercing the corporate veil only applies to situations where the real beneficiary of the business misused corporate formalities in order to disguise its true identity and therefore to avoid liability. This is not the case here.

329. Finally, the Arbitral Tribunal also considers that Article 25(2)(b) stating that a national of another contracting State also means "*any juridical person which had the nationality of the Contracting State party to the dispute on "the date on which the parties submitted the dispute to arbitration" and which, because of foreign control, the parties have agreed should be treated as a national of another Contracting State for the purposes of this Convention*" was inserted to broaden the scope of ICSID jurisdiction and not to limit it, as evidenced by the awards invoked by Respondent, such as the *SOABI*, the *Vacuum Salt* and *LETCO* cases.

330. Respondent's final allegation that Claimants would not have standing to challenge the termination of the Investment Contract because they were not parties thereto and that in any case such a claim would fall outside the scope of this Tribunal's jurisdiction since it would amount to a contractual claim, which is not encompassed by the jurisdictional provisions of the Investment Contract, are unfounded. Claimants' request is not based on the Investment Contract. It is not solely related to the termination of the Contract. The wrongful termination of the Investment Contract is but one element of Respondent's

alleged wrongful conduct. Claimants' Request for Arbitration and subsequent memorials clearly establish that this arbitration arises out of Respondent's alleged violation of the BIT and international law.

331. The Arbitral Tribunal therefore considers that Claimants have standing to bring this arbitration and that this Tribunal has jurisdiction to hear the dispute under Article 25 of the ICSID Convention and Article 7 of the BIT.

332. The Arbitral Tribunal also considers that it has jurisdiction on the basis of the Foreign Investment Law.

333. Under Article 27 of the FIL, a foreign investor is expressly permitted to choose ICSID arbitration as the means for solving disputes with the Republic relating to investments and, once that choice has been made, the consent of the Republic of Kazakhstan "*shall be presumed to have been granted*" (Article 27(3)). The fact that the Foreign Investment Law was repealed as of January 8, 2003, does not have an impact on ICSID jurisdiction. The FIL was indeed valid and effective at all times relevant to this dispute. Article 6(1) of the Law provides that "*[i]n the case of a deterioration of the position of a foreign investor, which is a result of changes in the legislation and (or) entering into force and (or) changes in the provisions of international treaties, to foreign investments during ten years the legislation shall be applied which had been current at the moment of making the investment, and with respect to the investments which are carried out in accordance with the long-term (more than ten years) contracts with the authorized State bodies, until the expiry of the effect of the contract, unless the contract stipulates otherwise.*" In other words, Article 6(1) grants foreign investors protection against adverse changes in legislation for a period of ten years from the date they made their investment, or for the entire duration of the contract exceeding ten years entered into with authorized State bodies. This is the case here. The relevant investments were made by Claimants from 1998 to 2002, and the Investment Contract entered into between Claimants and Respondent on May 20, 1999, was valid until June 31, 2009, i.e., for a period of more than ten years.

334. Respondent has expressed its consent to ICSID arbitration on December 28, 1994, the date of the entry into force of the FIL, and it remains applicable to the dispute pursuant to Article 6(1). On the other hand, Claimants have consented to ICSID jurisdiction by filing their Request for Arbitration. The Arbitral Tribunal has therefore jurisdiction under the FIL.

335. Besides Article 6(1), it is also well established in international law that a State may not take away accrued rights of a foreign investor by domestic legislation abrogating the law granting these rights. This is an application of the principles of good faith, estoppel and *venire factum proprium*.

336. The Arbitral Tribunal has therefore jurisdiction under the FIL. It notes however that the FIL is invoked by Claimants only as an alternative basis for the jurisdiction of this Tribunal. In this respect, the Tribunal has reached the conclusion that since the protection granted to foreign investors by the FIL is fully covered by the provisions of the BIT, it needs not refer to it to decide the claims submitted by the parties in this arbitration.

CHAPTER V. THE CLAIMS

I. OVERVIEW OF THE CLAIMS

337. According to Claimants, Respondent took the following actions, which were in breach of its obligations under the BIT, international law and the Kazakh Foreign Investment Law:

- Respondent's Investment Committee unlawfully terminated the Investment Contract in breach of the suspension and early termination mechanism set forth therein;
- Respondent's Courts colluded with Telecom Invest by granting its request for injunctive relief and thus ratifying Telecom Invest's choice of General Manager;
- Respondent's police authorities enforced the foregoing injunctive relief and ousted Claimants' representatives from KaR-Tel's premises;
- Respondent's Courts ratified Telecom Invest's actions by ordering the compulsory redemption of Claimants' stake in KaR-Tel, in clear contravention of Kazakhstan law;
- Respondent set up a Working Group over a year after the termination of the Investment Contract to examine alternative grounds for the termination of the Contract rather than to examine the legality of the grounds on which the Contract was actually terminated in March 2002. Furthermore, Claimants were *de facto* excluded from the meetings of the Working Group;
- Respondent initiated, under false pretenses and/or in a discriminatory/arbitrary manner, criminal proceedings against Claimants' executives, thereby forcing them to leave the country;
- the decision of the Working Group validated the termination of the Contract on entirely different grounds than those forming the basis for the termination;
- Respondent's Courts ordered the compulsory redemption of Claimants' 60% stake in KaR-Tel for a mere USD 3,000.

338. According to Claimants, Article 4 of the Articles on the Responsibility of States for Internationally Wrongful Acts (the "*ILC Articles*") attributes to the State the conduct of

"*any State organ…whether the organ exercises legislative, executive, judicial or any other functions, whatever position it holds in the organization of the State….*" Therefore, Claimants allege that each of the above acts and omissions, individually and collectively, constitutes a breach of each of Respondent's international obligations, namely, its obligations:

- to afford fair and equitable treatment;
- not to deny justice;
- to ensure full protection and security;
- not to impose unreasonable, arbitrary and/or discriminatory measures;
- not to expropriate absent certain specific conditions.

II. THE PARTIES' POSITION ON RESPONDENT'S PURPORTED SCHEME

339. As pointed out above, Claimants allege that each of the acts and omissions allegedly wrongfully committed by Respondent, individually and collectively constitute a breach of Respondent's international obligations. Before analyzing the various legal grounds invoked by Claimants, the parties' positions are hereinafter summarized.

A. CLAIMANTS' POSITION

1. The general context

a) Claimants' investment

340. Contrary to Respondent's allegation, Claimants submit that they have made considerable investments in Kazakhstan as per the terms of the BIT and of the FIL. Indeed, the BIT provides that: "*the term 'investment'…shall include every kind of asset in particular, but not exclusively: i) shares, stocks or any other form of participation in companies, ii) returns reinvested, claims to money or any other rights to legitimate performance having financial value related to an investment.*" The FIL defines "*investment*" as "*all types of proprietary and intellectual values invested into objects of entrepreneurial activity with the purpose of obtaining profit….*" The FIL further specifies that "*foreign investments*" are "*investments made in the form of participation into an authorized capital of legal*

entities of the Republic of Kazakhstan, as well as granting of loans (advances) to legal entities of the Republic of Kazakstan, in which the foreign investors have the right to control decisions adopted by such legal entities."

341. According to Claimants, their combined 60% stake in KaR-Tel thus constitutes an "*investment*" under the BIT and the FIL. Moreover, Claimants paid the entire initial charter capital contribution of approximately USD 10,000 when they acquired a 70% stake in KaR-Tel in May 1998 (which was subsequently reduced to 60%).

342. Claimants also granted lines of credit to KaR-Tel totaling up to USD 40 million and, pursuant thereto, extended loans to KaR-Tel of USD 16,953,455.88 and USD 16,285,835 (by Rumeli and Telsim respectively). According to Claimants, although these loans initially were to be subject to interest rate, this was immediately changed. In any event, Claimants allege that even if the loans had been subject to interest, this would have no bearing on the fact that the law considers such loans to constitute investments.

343. Claimants further allege that Rumeli pledged its own funds as security under loan agreements between KaR-Tel and Bank Turan Alem. After Bank Turan Alem collected USD 2,580,000 pledged by Rumeli, this latter became a creditor of KaR-Tel for this amount, and this constitutes another investment.

344. Furthermore, according to Claimants, in light of Respondent's forensic expert reports that concluded that Claimants indeed provided more than USD 33 million to KaR-Tel, Respondent's allegation that there is "*no evidence of alleged investment of USD 33 million"* is no more than a misrepresentation of the facts.

345. Claimants allege that they were forced to structure their investments as loans and commodity credits since the parties-in-interest behind Investel/Telecom Invest refused to participate to capital increases. Claimants' willingness to make investments in the form of increased capital contributions is evidenced by article 2.7 of both Contracts on Temporary Financial Support which provided that, after expiration of the repayment

term, the loans extended by Rumeli could be considered as additional capital contribution by Rumeli to KaR-Tel upon a decision of KaR-Tel's board of directors.

346. Claimants' financial obligations pursuant to KaR-Tel's Foundation Agreement were limited to an obligation "*to ensure provision of the investments*," *i.e.,* to assist KaR-Tel in negotiations with third parties to obtain financing. According to Claimants, given the significant amount of the Motorola Loan and the Bank Turam Alem loan – the first guaranteed by Telsim, the other pledged by Rumeli – Claimants obviously fulfilled their obligations under the Foundation Agreement. In this context, it is Claimants' position that the circumstances surrounding the Motorola Loan are irrelevant to the question of their investment.

347. Claimants further allege that Telsim, which guaranteed the Motorola Loan, was a highly valuable company, with a value higher than its borrowings. This is confirmed by the fact that Telsim ultimately honored its payment obligations towards Motorola and was sold for USD 4.55 billion in December 2005.

348. Claimants also submit that Respondent's attempt to challenge the existence of Claimants' investments is absurd in light of the fact that the local partner in KaR-Tel – which did not provide any monetary, management, or know-how assistance, nor the necessary office space to KaR-Tel – was able to sell a 100% stake in KaR-Tel for USD 350 million.

349. Claimants further point out that:

- the Working Group established by Respondent itself recognized that Claimants made millions of dollars of direct capital investment in KaR-Tel;
- they had no obligation under the Investment Contract, which was concluded between the Investment Committee and KaR-Tel;
- KaR-Tel had no obligation to achieve any specific portion of the USD 184,405,000 investment mentioned in article 3 of the Investment Contract;
- in any case, the Investment Contract was terminated exclusively for the failure to file reports and not for the alleged unsatisfactory level of investment.

350. Moreover, Respondent's allegation that KaR-Tel overpaid Telsim by over USD 8 million for "*obsolete*" second-hand equipment and handsets does not withstand scrutiny:

- the equipment was advanced and fully met KaR-Tel's operational and technical needs;
- the expert, Mr. Bulent Yagci, testified in the Kazakhstan Court proceedings that the second-hand base stations worked properly and satisfied KaR-Tel's objectives and were provided on favorable terms;
- Telsim provided guarantee services, spare parts, and training of KaR-Tel employees to use the equipment.

351. By the same token, according to Claimants, Respondent's allegation that Telsim sold telephone sets to KaR-Tel at a price higher than the market is also unfounded. Respondent's Courts made such a finding solely on the basis of the conclusions drawn by Respondent's own forensic experts and wholly ignored the evidence adduced by Claimants.

352. Finally, Claimants dispute Respondent's challenge of the quality of the support, know-how and training provided by Claimants on the basis that KaR-Tel was allegedly insolvent at the time that Claimants were ousted from Kazakhstan:

- Claimants did provide a great deal of this support, know-how and training, which constitutes an investment;
- Respondent provides no evidence that such training or support was somewhat inadequate;
- KaR-Tel – at the time that Claimants were ousted – was far from being insolvent.

353. In any case, Respondent's conduct and various acts and omissions, in collusion with the influential local partner, deprived Claimants of their investment for a derisory sum. Even if the alleged wrongdoings of Claimants were somehow true, they could not justify the expropriation of Claimants' majority shares without compensation.

354. It is therefore Claimants' position that they made investments within the meaning of Article 25 of the ICSID Convention and ICSID jurisprudence, their investments being long term (the GSM License was granted for a renewable 15-year period and the Investment Contract's duration exceeded 10 years); they involved regularity of profit and return; they were substantial, risky and strategic for the development of the Republic of Kazakhstan.

b) The Republic of Kazakhstan and the involvement of President Nazarbayev's family

355. According to Claimants, Kazakhstan has not yet succeeded in breaking with the vestiges of Soviet bureaucracy. Since 1989, the country is governed by President Nursultan Nazarbayev, whose last election, with a purported 91.15% of the votes, failed to meet OSCE and international standards for democratic elections. The Judiciary has limited judicial independence. Moreover, corruption is prevalent at every stage and level of the judicial process. The regime is hard with any kind of opposition and with the media.

356. According to Claimants, President Nazarbayev succeeded in concentrating most of the powers in his own hands, but he also successfully established direct and indirect (through his family and/or executives) control over the most important sectors of the Kazakhstan economy.

357. According to Claimants, in this context, once KaR-Tel's success was assured thanks to Claimants' considerable efforts and investments, the local partner's shareholders devised a scheme to orchestrate Claimants' expulsion from KaR-Tel with the unconditional support of Respondent. The local partners' shareholders exploited their close personal and political ties with Respondent to oust Claimants from their investments. In this framework, Claimants allege that the following elements demonstrate that some members' of the President Nazarbayev's empire were the real parties in interest behind Investel/Telecom Invest.

358. *First*, Claimants' initial local partner, Investel, was co-founded by Almex, a company that was itself founded by President Nazarbayev's brother, Mr. Bulat Nazarbayev. Other

shareholders in Almex included President Nazarbayev's second daughter, Ms. Dinar Nazarbayeva, and her husband, Mr. Timur Kulibayev. During the course of their investment, Claimants were also told that, in addition to Almex, the Minister of Transportation and Telecommunications of the Republic of Kazakhstan, at the time Mr. Serik Burkitbaev, was also a shareholder in Investel. By November 2000, Mr. Kulibayev held 50% in Almex, with his wife holding a 20% stake therein and Mr. Abuov (Mr. Kulibayev's 'right-hand man') holding the remaining 30%. When Telecom Invest replaced Investel, Almex remained the majority 87.5% shareholder of Telecom Invest until the end of 2002.

359. *Second,* irrespective of whether he formally held an official position in Investel/Telecom Invest, Mr. Kulibayev acted as executive director of Investel and later Telecom Invest:

- KaR-Tel's successive General Managers met in person with him in that capacity on many occasions;
- Mr. Agilönü sent monthly reports of KaR-Tel's financial data to Mr. Kulibayev.

360. *Third,* the amendment to KaR-Tel's charter with respect to the replacing of Claimants on November 10, 2003 was registered by the Almaty District Division of the Ministry of Justice the very next day. According to Claimants, this is not feasible for such a re-registration to take merely one day, absent some extra influence such as Respondent's interest in the re-registration.

361. According to Claimants, Respondent's allegation that there is no basis upon which a State can bear legal responsibility for the actions of the President's son-in-law oversimplifies the present case. Indeed, Mr. Kulibayev is not only the son-in-law of the President, he has also held, at various times, governmental functions both as a member of the Investment Committee and as top executive of various State-owned energy companies. According to Claimants, it is undisputed that Mr. Kulibayev maintained ties with the Investment Committee and knew Mr. Zverkov, the Chairman of the Investment Committee who terminated the Investment Contract. Therefore, his actions cannot be

viewed in a vacuum and cannot be dissociated from his privileged relationship with Respondent.

362. It is also undisputed that the primary obligation of Telecom Invest/Investel in KaR-Tel was precisely lobbying before the organs of Kazakhstan. The local partner did use that influence at the outset and during the course of the project to secure and obtain, from organs of the Republic of Kazakhstan, the License, the Investment Contract, the easy-to-remember '333' prefix and favorable treatment from Kazakhstan Customs Authorities. It is also Claimants' case that the local partner and Mr. Kulibayev could do and undo things at the Investment Committee.

363. In this context, it is Claimants' allegation that the fact that, by late 2002/early 2003, Mr. Seysembayev, through some companies, and not Almex, was *de jure* the controlling shareholder of Telecom Invest has no bearing on Claimants' case. Indeed, a subsequent change in ownership of Telecom Invest, does not somehow undo Respondent's prior collusion with the previous shareholders. Nor does such a change preclude Respondent from continuing to collude even with the new owners.

364. Moreover, this change of ownership was for "*nominal consideration*," which does not at all exclude the likelihood that an arrangement may have been reached between Telecom Invest's prior owners and Mr. Seysembayev. Indeed, it is still unknown who received the USD 350 million paid by VimpelCom.

365. Claimants further allege that even if Telecom Invest's shareholders could be deemed to be independent and private third parties, Respondent would still be liable for breaching its international obligations. Indeed, collusion between the State, judicial authorities, and the local party-in-interest can amount to a denial of justice, and a State can expropriate an investment for the benefit of a third party.

366. Finally, even if there is no such a collusion, Respondent would still be liable for its acts and omissions, namely the wrongful termination of the Investment Contract, the eviction

of Claimants from KaR-Tel by the police, the Courts' decision that grossly misapplied Kazakhstan law and the derisory compensation paid to Claimants.

2. The termination of the Investment Contract

367. According to Claimants, by mid-2001, the local partner took the decision to oust Claimants from KaR-Tel. This is confirmed by Mr. Abuov. The task of identifying the options to carry out this decision was entrusted to Mr. Karibjanov from Visor Investment Solutions, who declared that his "*involvement in KaR-Tel commenced at some point between August and December 2001.*" In the fall of 2001, Respondent set in motion the impetus that would eventually result in the total expropriation of Claimants' investment in favor of President Nazarbayev's family and empire.

368. On September 10, 2001, the Investment Committee, which was under the influence of Mr. Kulibayev sent KaR-Tel a warning letter, requesting that KaR-Tel submit various financial statements and information that it had not previously requested. Indeed, prior to September 10, 2001, there had been no Investment Committee investigations or warnings on this issue. Ambassador Zverkov's testimony to the contrary is not supported by any documentary evidence. From this point, Telecom Invest, Mr. Kulibayev and Mr. Abuov suddenly became unreachable.

369. On February 21, 2002, Respondent's Investment Committee sent KaR-Tel a notification letter purporting to terminate the Investment Contract within thirty days on the alleged basis that KaR-Tel had not complied with its reporting obligations pursuant to the Contract. During this period, KaR-Tel challenged this abrupt termination, continued its best efforts with the assistance of its auditors to comply with the filing requirements and sought an extension of time. This extension was granted, at the very least, according to Mr. Zverkov's own admission, until March 23, 2002.

370. However, contrary to Respondent's allegations, the Investment Committee Members were not waiting at the Investment Committee premises on March 23, 2002 to receive Claimants' reports. Mr. Zverkov's declarations in this respect are not credible since

March 23, 2002 was a Saturday, which is a day off in Kazakhstan. Moreover, the Investment Committee was also closed on Friday, March 22, 2002 since it was Norouz, a public holiday in Kazakhstan. It is therefore obvious that on March 23, a Saturday immediately following a public holiday, the Investment Committee was also closed.

371. According to Claimants, it cannot therefore be disputed that, even assuming for the sake of argument that Respondent granted Claimants an extension only until Saturday, March 23, 2002 for the filing of the requested reports, such extension extended automatically until Monday, March 25, 2002, the very first working day after Norouz. Furthermore, as confirmed by the documents and by Respondent's own Ministry of Economy and Budget Planning, KaR-Tel submitted the materials requested on March 25, 2002.

372. Claimants point out that the Investment Contract was terminated by the Investment Committee on March 25, 2002 on the only basis of the alleged failure to submit reports. Respondent seeks today to justify the termination of the Contract on the basis that, in any event, it was justified on substantive grounds since KaR-Tel allegedly did not comply with its investment obligations. However, as emphasized by the *Amco I*[26] and *II*[27] decisions, regardless of the examination of the substantive grounds relied upon by a State agency in the framework of the revocation of a license, "*the mere lack of due process would have been an insuperable obstacle to the lawfulness of the revocation*." Respondent's attempt to justify *ex post* the termination of the Investment Contract is unconvincing.

373. The Investment Contract was wrongfully terminated. It was terminated prior to the expiration of the deadline for submitting the reports, which were filed on March 25, 2002, *i.e.* within the deadline. Moreover, even assuming, *arguendo*, that certain reports were not submitted in a timely manner, the Investment Committee could only suspend the Contract and not terminate it.

---

[26] *Amco I v. Indonesia*, Decision on Jurisdiction of September 25, 1983.

[27] *Amco Asia Corporation and others v. Republic of Indonesia* (ICSID Case No. ARB/81/1), Award in the Resubmitted Case of June 5, 1990, 1 ICSID Reports 569, para. 70 [hereinafter *Amco II*].

374. Indeed, the early termination mechanism of the Investment Contract explicitly set forth in the Contract provided that early termination could only occur on the basis of specific grounds listed at article 19.3 ("*refusal of the Investor to cure the reasons which have caused the decision on the suspension of the Contract, or a failure to cure these reasons during the term established by the Agency").* This basis presupposed that:

- there had been a suspension of the Contract in accordance with the terms of article 19.2; and
- the reasons for such suspension were notified.

375. According to Claimants, none of these conditions was satisfied, a fact which has been recognized by Respondent itself in two letters dated May 14, 2003 from the Ministry of Finance and from the Ministry of Economy and Budget Planning. Respondent tries to downplay the significance of these letters. However, they were executed by vice-ministers and are unequivocal in several respects.

376. As recognized by Respondent itself, the Investment Committee did not suspend the Contract. Respondent alleges that the lack of formal suspension was in the interest of KaR-Tel since the suspension of the Contract would have required KaR-Tel to make ordinary tax payments until the suspension was lifted. However, according to Claimants:

- it is not for Respondent to decide what was in the interest of KaR-Tel; and
- in any event, had the investment Committee suspended the Contract, KaR-Tel could have remedied any alleged breaches and the suspension would have been lifted.

377. According to Claimants, Respondent's further attempt to justify its failure to suspend the Contract by relying on article 13 of the Investment Support Law is also unconvincing. Indeed, although this Law grants the Investment Committee the right to terminate a contract without first suspending the same, the express terms of each individual contract can supplement this right. In the present case, the parties, as they were entitled,

specifically conditioned in their Contract the right of the Investment Committee to terminate a contract to the mandatory prerequisite of its prior suspension.

378. Even assuming, for the sake of argument, that article 13 of the Investment Support Law does support Respondent's position, a State cannot rely on its internal law to invalidate its own undertakings. Moreover, Respondent's position was discredited at the hearing by its own expert, professor Kaudyrov, who agreed that a foreign investor in Kazakhstan would have had a reasonable expectation that the terms of the Investment Contract, and specifically the provisions calling for suspension, were valid.

379. Claimants further allege that Exhibit RM32 invoked by Respondent as another example of a telecom company whose investment was terminated in the same conditions than Claimants, is, on the contrary, clear evidence that some contracts must be suspended prior to termination.

380. Finally, contrary to Respondent's allegation, it was only KaR-Tel and not Claimants, who had legal standing to challenge the termination of the Investment Contract. This was confirmed at the hearing by Respondent's own law expert, Professor Kaudyrov. In addition, on April 22, 2002, KaR-Tel's General Manager, Mr. Agilönü, indeed contested the unlawful termination of the Contract. However, he was unable to pursue his recourse since he was ousted from KaR-Tel. In this respect, even after the Supreme Court amendment to the April 23, 2002 injunction requiring a written permission of Mr. Yerimbetov to access KaR-Tel's documents, Claimant continued *in fact* to be denied access to KaR-Tel's premises and documents.

381. Claimants finally point out that the local partner did not engage in any effort to assist Kar-Tel in the Investment Contract control process. On the contrary, the local partner vanished during the investigation process. In this respect, Mr. Abuov disingenuously suggested that he might have disappeared during these key months because he was gone on a particularly long business trip and was therefore unreachable. This was clearly false. There can be no doubt that the local partner "strategically" disappeared.

382. The reality is that, in February and March 2002, the local partner, with the help of lawyers and of Mr. Karibjanov from Visor Investment Solutions, was trying to implement its decision to get rid of Claimants.

383. In this context, the local partner colluded with the Investment Committee to terminate the Investment Contract. That collusion was established by the testimony of Mr. Abuov and by the evidence that Mr. Kulibayev had the power to cause the Investment Committee to implement the local partner's decision to get rid of the majority shareholders in KaR-Tel through the cancellation of the Investment Contract.

384. According to Claimants, Mr. Abuov's argument that the local partner had no reason to terminate the Investment Contract simply does not stand. The local partner had two very strong incentives to terminate this Contract. The first was the implementation of his plan to get rid of Claimants. The second was to minimize the necessity of payment by KaR-Tel for Claimants' 60% shares.

3. Telecom Invest and Respondent colluded to effect the illegal compulsory sale of Claimants' interest in KaR-Tel

a) The KaR-Tel EGM

385. According to Claimants, Telecom Invest used the cancellation of the Investment Contract as the pretext for calling an extraordinary meeting of KaR-Tel shareholders (EGM) to remove Claimants from KaR-Tel. In this respect, Mr. Podporin of Telecom Invest claims to have sent two letters to Mr. Agilönü on March 4, 2002 and March 20, 2002 requesting Mr. Agilönü, as General Director of KaR-Tel, to call an EGM to discuss the cancellation of the Investment Contract.

386. Mr. Agilönü testified that he never received these letters. Mr. Podporin, who was in direct contact with Mr. Agilönü on a daily basis, admitted that he never followed up with Mr. Agilönü, whether in person, telephone or other means, to determine whether the letters were in fact received.

387. On March 26, 2002 – the day after the Investment Committee issued its order terminating the Investment Contract, but one day before such order was even sent to KaR-Tel – Mr. Podporin allegedly sent notices to Claimants in Turkey to convene an EGM of KaR-Tel for April 11, 2002. Therefore, according to Claimants, given the timing of this "*notice*," it is clear that Telecom Invest and its shareholders were, at the very least, privy to the termination decision. Claimants did not receive these notices.

388. An EGM was then held on April 11, 2002. It is not disputed between the parties that the April 11, 2002 meeting could not proceed and take decision without a quorum being present. Otherwise, there would have had no need for the alleged follow-up meeting on April 15, 2002. At the hearing, Mr. Podporin indicated that no decisions were taken at this meeting because of the lack of quorum, in the absence of Claimants. This testimony is contradicted by the evidence. Indeed, the resolution of the meeting dated April 11, 2002, which was signed by Mr. Podporin, indicates that the meeting did in fact proceed on that date in the absence of a quorum. The resolution records that Telecom Invest, the sole attendee and minority shareholder of KaR-Tel, voted at the April 11, 2002 meeting:

- to prepare all necessary documents, including financial analyzes, demonstrating the damage caused to KaR-Tel by the activity and/or inactivity of Rumeli and Telsim;
- to issue proceedings in the Almaty City Court for the compulsory redemption of Claimants' participation in KaR-Tel;
- to dismiss Mr. Agilönü as General Manager of KaR-Tel and to replace him temporarily by Mr. Iskander Yerimbetov and to seek the Court's approval of this amendment.

389. According to Claimants, the resolution is thus invalid on its face since a non-quorate meeting cannot take decisions. Nevertheless, on April 19, 2002, Telecom Invest filed a claim based solely on the April 11, 2002 resolution, seeking a Court decision on the forced buyout of Telsim and Rumeli's interest in KaR-Tel. Neither the claim filed, nor the Court's April 23, 2002 decision granting injunctive relief mention anything about any

postponement of the April 11 meeting or about any follow-up meeting on April 15 or any other date.

390. According to Claimants, following an attempt by Mr. Agilönü to call a general meeting of KaR-Tel shareholders for June 7, 2002 to discuss, *inter alia*, "*the wrongfulness and illegality of the April 11, 2002 KaR-Tel general shareholders' meeting and resolutions*," KaR-Tel separately petitioned the Court for an injunction prohibiting this meeting. Claimants allege that, unlike the earlier Telecom Invest petition – which had been made prior to any challenge by Claimants to the validity of the April 11, 2002 resolution – this second KaR-Tel petition referred only to the resolution of a purported April 15, 2002 meeting. This meeting had not even been mentioned before. The resolution purportedly adopted at this alleged follow-on meeting was virtually identical (other than the date) to that of the April 11 meeting.

391. Claimants further point out that neither the purported resolution of April 15, nor the petition to the Court based on that resolution, mentioned the fact that the April 15 meeting would have been called as a "*follow-on*" meeting after the failure of Claimants to attend the April 11 meeting. Therefore, the April 15 resolution was also invalid.

392. In any case, according to Claimants, both April 2002 meetings were not validly constituted and held, for the following reasons:

- Claimants were not notified of the meetings, contrary to article 46 (1) of the LLP;
- moreover, with respect to the notice issue, if there is no quorum at the original meeting, a new general meeting is to be convened at least 15 days prior to the repeated meeting. This is to ensure that there will be a second attempt by the partnership to notify the participants. This was not the case since the notice of the repeated meeting was included in the notice of the original meeting. As confirmed by Professor Sergeev, the Kazakh Courts made a serious mistake when considering that it is possible to notify the participants about two meetings in one notice. Respondent's experts' position to the contrary: the allegation that a

follow-up meeting could be held as little as two hours after the original non-quorate meeting, is simply not credible. It violates the basic principle of the provision related to notices, which is to ensure that the partners have the opportunity to participate in the activity of the company;

- pursuant to the LLP Law, article 46, the 15-day notice period is triggered when the participants have been notified rather than when the notice has been issued. Therefore, even assuming that Claimants received the notices of the meeting on April 1, 2002, the notice period for the original meeting (April 11, 2002) was insufficient as the 15-day time period began on the date following receipt (April 2, 2002). Neither was the repeated meeting properly notified since there were only 14 days between the alleged notice and the day of such meeting;
- article 47 (4) of the LLP Law provides that a general meeting can adopt decisions only if there is a quorum, *i.e.* more than 50% of the total votes are present. If less than 50% of the total votes are present, a general meeting can be convened again, which is deemed to have a quorum regardless of the votes present (art. 47(5)). If less than 50% of the votes are present, the meeting has the right to adopt decisions only on questions which do not require a qualified majority vote or unanimity (art. 47(5)). As confirmed by Professor Suleimenov before the Kazakhstan Courts, article 48(2) and 43(2)(9) of the LLP law provide that the compulsory redemption of a shareholder's interest requires a qualified majority of votes of three quarters of the votes present and a quorum of two-thirds of the total number of votes. Claimants' presence – holding 60% of the votes – was thus required;
- pursuant to article 47(9) of the LLP Law, it is necessary to certify that there is a quorum immediately prior to voting;
- in violation of article 34 of the LLP Law, the minutes of the April 15, 2002 did not indicate that any evidence was presented of any significant damage to KaR-Tel presumably caused by Claimants;
- although a shareholder whose shares are being redeemed may not participate in the voting of its own compulsory redemption (art. 48(2) of the LLP Law), if a general meeting contemplates the compulsory redemption of two of its

shareholders, the presence of at least one shareholder whose interest is subject to the redemption is required at the meeting. Even assuming that Respondent's Judiciary properly applied the LLP and that the presence of the participant whose interest is being forcefully bought out is not necessary, there were here two participants whose interests were bought out. Therefore, separate decisions should have been taken. When the question of whether to buy out the interest of the first participant is put to a vote, even if such participant cannot vote on this decision, the second participant can vote, and vice versa;

- more generally, as stated by Professor Suleimenov, "on no conditions the sharer which possesses the small interest of shares in the company may not bring up the question about compulsory redemption of shares of the sharer which possesses the majority interest in the share capital of the company. Otherwise the situation may be carried to an absurdity: several sharers holding 10% of shares may determine on the question about compulsory redemption of the share of sharers holding 90% of shares in the share capital. It may be very suitable mechanism for usurpation of companies." Professor Sergeev reached identical conclusions.

b) The Injunctive relief proceedings

393. According to Claimants, Telecom Invest and its shareholders then sought the assistance of Respondent's judiciary to ratify their illegal conduct. In this context, they obtained, *ex parte*, the injunctive relief of April 23, 2002 to secure the forced removal of Rumeli and Telsim.

394. According to Claimants, the injunction was granted whereas the resolutions of the shareholders meetings were blatantly in violation of the LLP law. In this respect, Claimants emphasize, *inter alia*, that neither the claim filed, nor the Court's decision granting injunctive relief, mention anything about the April 15 meeting. It is undisputed that there was no quorum at the April 11 meeting to take decisions so that the *ex parte* decision rendered on April 23, 2002 was based on a resolution which was procedurally and patently invalid on its face. Moreover, by appointing Mr. Yerimbetov, the very same

General Manager that had been unilaterally appointed by Telecom Invest in the course of the April meetings, and not an independent administrator – pending a decision on the merits of the case – the Court effectively prejudged the merits while denying Claimants the right to manage and benefit from their investment as well as to access data necessary for the defense of their interests in KaR-Tel.

395. According to Claimants, the defects in the Court's April 23 decision are so egregious as to permit no other conclusion than one of bias and discrimination by the Court in favor of Telecom Invest.

396. Finally, even if Claimants recognize that the April 23, 2002 injunction was subsequently amended by the Supreme Court so as to remove the requirement of a prior written permission of Mr. Yerimbetov for Claimants to access KaR-Tel's premises and documents, they *in fact* continued to be denied access, as evidenced by Claimants' numerous requests to KaR-Tel and to the Court that remained unanswered.

4. The actions of Respondent's police authorities

397. According to Claimants, by the end of the business day on April 23, 2002, the Kazakhstan armed police – led by Mr. Aidan Karibjanov, a senior executive of the firm Visor Investment Solution (consultant to Telecom Invest) – seized all of KaR-Tel' offices. The police physically barred from access only KaR-Tel's Turkish management executives. Even after the amendment of the injunction in June 2002, they continued to be denied access to the KaR-Tel premises.

398. According to Claimants, even if Respondent tries to make a distinction between its unarmed Court bailiffs that enforced the April Injunction, and its armed police, its remains that the seizure of KaR-Tel premises and the ousting of the Turkish employees was executed by Court bailiffs who are State officials, a real organ of the State, and were accompanied by a police escort. The mere presence of private security forces in KaR-Tel was insufficient to give rise to a case of necessity justifying the presence of the police.

399. Claimants also point out that they were not informed of the Court's injunction or its enforcement and were thus not invited to be present when Respondent's Court bailiffs and police seized KaR-Tel, in stark contrast to Telecom Invest who was represented on the ground by Mr. Karibjanov.

400. In their Post-Hearing Memorial, Claimants further point out that, at the hearing, Respondent's witnesses confirmed that the Court bailiffs were accompanied by officers from Kuzet Security Services ("*Kuzet*"), which is a specialized security subdivision of internal affairs bodies of the Republic of Kazakhstan. Their guards wore uniforms and carried weapons. Kuzet was acting pursuant to a contract with Telecom Invest. As this contract could only have been formed on or before the April 23, 2002 injunction of Judge Ivanovna, this means that Claimants' local partner was privy to Judge Ivanovna's decision before it was made public.

5. The attempt to sell Telecom Invest's participation in KaR-Tel

401. According to Claimants, after they were forcibly removed from KaR-Tel's premises on April 2002, Telecom Invest continued to exploit its privileged relationship with Respondent to capitalize on its influence on Respondent's various organs.

402. Indeed, the local partner and/or associated individuals sought to extract cash from the partnership and its stake therein and asked Claimants to purchase its 40% stake in KaR-Tel.

403. A Stock Purchase Agreement was negotiated. In this context, it appeared that the Investment Committee continued to be under the influence of Telecom Invest which was in a position to instruct the Committee to reinstate the Contract. However, Claimants decided not to sign because:

- there was no guarantee that once the USD 12 million stipulated in the agreement would have been paid, Telecom Invest would not further collude with Respondent to extract more money from Claimants;

- there was a risk that KaR-Tel had entered into transactions that were not in its interest as a result of having been managed by Telecom Invest.

6. The actions of the Working Group

404. On June 9, 2003, Claimants were informed of the constitution of a Working Group in charge of the examination of the termination of the Investment Contract. It was tasked with seeing if there existed any grounds on which the Investment Committee could have terminated the Contract. According to Professor Sergeev, this expansion of the scope of its review was illegal: "*the Working Group should have cancelled the order of termination of the Contract. The question of compliance by the Investor with the terms of the Contract and existence of grounds for its termination should have been determined by the Committee in compliance with procedures established by the Contract.*"

405. Claimants allege that several circumstances resulted in the *de facto* exclusion by Respondent of Claimants from the meetings of this Group, preventing Claimants from defending their position:

    - they were only verbally invited to a meeting just two days before this meeting;
    - the meeting was not to take place at a neutral place but at KaR-Tel's offices which were under the control of Telecom Invest;
    - rumors circulated that Respondent had initiated wholly unfounded criminal proceedings against Claimants executives on July 1, 2003 - *i.e.*, the very same day that it extended an informal invitation to attend the meeting.

406. With respect to these criminal charges, Claimants allege that:

    - contrary to Respondent's assertions, Mr. Ozonerk did not admit that the charges were founded. He merely stated that the amounts at issue consisted of "*working advance payments*" and had been approved by Rumeli's management;
    - the investigation related to mere cash advances totaling less than USD 200,000, which are customary in emerging countries in a major business operation;

- the fact that the charges were also brought against Ms. Kaden, a Kazakhstan national, only serves to support Claimants' argument that the charges were brought only against Turkish executives and for an ulterior purpose. Indeed, Ms. Kaden was the assistant of KaR-Tel's General Manager. The police thus wanted to hold someone close to Claimants accountable in the event it would not be able to sanction the Turkish nationals;
- the farcical nature of these criminal proceedings is obvious: Mr. Agilönü was charged with "*grand theft*" on the basis that he was in arrears for 74,435 Tenge in petty cash used for business expenses (approximately USD 580). The potential sanctions for such charges, however, were very real. As acknowledged by Respondent's expert on Kazakh Criminal Law, the penalty for such charges could "*go up to 12 years in prison.*"

407. The Working Group then validated the termination of the Contract, but it did it on entirely different grounds than those forming the basis for the initial decision. Moreover, it relied on the fact that KaR-Tel had not challenged the termination, which is ludicrous given the fact that Respondent had placed KaR-Tel under the control of Telecom Invest, which had no interest to challenge the termination.

408. Claimants further allege that Respondent's attempt to validate the investigation of the Working Group by asserting that it ultimately found that KaR-Tel had not complied with its investment obligations is hopeless. Indeed, nowhere in the Investment Contract was it required that KaR-Tel invest specific amounts on a yearly basis. The Contract only sets forth a lump sum objective as investment obligation over ten years.

409. According to Mr. Sabirov, Chairman of the Working Group, a primary ground for the termination of the Investment Contract was that KaR-Tel did not comply with the timetable set out in the Working Program and had failed to make the required amount of investments. Yet, the Investment Contract provides no timetable for making monetary investments. When asked how the Working Committee found that Claimants had not been making the requisite investments, Mr. Sabirov had no answer. When the Tribunal

questioned whether a timing requirement for investments under the Investment Contract was imposed by article 278 of the Civil Code - on equal allocation of obligations over time - Mr. Sabirov again had no answer. On the contrary, Professor Sergeev addressed this question and established that article 278 would apply only where nothing is stipulated by the Contract. Since the Contract attached a Working Program setting out dates by which certain actions (rather than investments of amounts) had to be taken, Professor Sergeev concluded that the requirement of article 278 did not apply.

410. In any event, irrespective of whether there may have been legitimate grounds for the revocation of the Contract, the whole approach leading to its termination and the confirmation thereof by the Working Group lacked in transparency and in due process.

411. Claimants finally allege that if the unlawful termination of the Investment Contract had presumably caused enough damage to KaR-Tel to justify the compulsory redemption of Claimants' shareholding, it is surprising, to say the least, that Telecom Invest (through KaR-Tel) did not seek to challenge the termination or to reinstate the Contract.

7. The actions of Respondent's Judiciary

412. According to Claimants, Respondent's Courts then continued to further the goals of the local partner's shareholders by rendering decisions in contravention of Kazakhstan law. They culminated in a decision of the Supreme Court of October 30, 2003 which set the value of the shares to approximately USD 2,281 for Rumeli's 45% stake and to USD 760.43 for Telsim's 15% stake, granting Telecom Invest (with only 40% interest in KaR-Tel) the necessary official judicial blessing to acquire Claimants' 60% interest at virtually no cost.

413. According to Claimants, the decisions of Respondent's Judiciary were so grossly unjust that no competent judge could have reasonably issued such decisions. This clearly demonstrates the collusion between the Kazakh Courts and the individuals controlling Telecom Invest.

414. According to Claimants, the first outrageous misapplication of Kazakh law lies in the Courts' decision that *the April 2002 resolutions* of the Extraordinary General Meeting were valid, whereas they were *prima facie* invalid.

415. Claimants submit that Respondent's Judiciary misapplied the law in collusion with the local partner through the delivery of the *April 23, 2002 ex parte injunction*.

416. According to Claimants, the next legal concept grossly misapplied by Respondent's Judiciary relates to the appreciation of the facts that allegedly gave rise to Telecom Invest's right to buy out Claimants' shareholding. Indeed, the LLP Law allows the forceful buy out of a participant only if such participant caused significant harm to the partnership.

417. At the April 15, 2002 meeting, Telecom Invest discussed the potential harm that KaR-Tel might suffer. At that time, no real harm existed. Respondent's Judiciary ignored that rule, concluding that there was a future loss.

418. The law also requires that there exist a causal link between the action or inaction of a participant and the harm. The Courts ignored this requirement. Indeed:

- such link was not established since Claimants were neither a party to the Investment Contract nor responsible for its termination, which resulted from KaR-Tel's alleged failure to file reports with the Investment Committee;
- rather, it is the local partner that failed to comply with its contractual obligations in this respect. Pursuant to article 4.3 of the Foundation Agreement, Investel/Telecom Invest – and not Claimants – assumed the obligation to assure the relations with the Investment Committee;
- in any event, the local partner had equal access to all of KaR-Tel's financial information so that it cannot be said that Claimants were solely responsible for the wrongful termination of the Investment Contract.

419. The LLP and the Civil Code also require that all of *the reasons* to buy out a participant be discussed at the General Meeting and does not allow the partnership to raise new reasons during subsequent Court hearings. Indeed, it is the partnership, and not its participants, that may bring a claim to forcefully buy out a participant. Therefore, the partnership's claim before the Courts must be based on a decision taken by the General Meeting. If the partnership advances arguments that were not discussed, such arguments are *ultra vires* and may not be reviewed and accepted by the competent Court. However, this clear principle was ignored. The Courts based their decisions on the alleged lack of investment by Claimants and the alleged overpricing of the equipment they supplied, neither of which were the basis for the resolution purportedly adopted by the General Meeting.

420. According to Claimants, those outrageous violations of Kazakh law culminated in Judge Begaliev's decision dated June 6, 2003 ruling on Telecom Invest's claim for expulsion of Claimants from KaR-Tel and on the compulsory redemption of their shares.

421. In this respect, Claimants point out, *inter alia,* that, in his decision, and in total contradiction with the documentary evidence, Judge Begaliev wrongfully concluded that the termination of the Investment Contract was the result of Claimants' non-performance of their purported obligation to secure investments for KaR-Tel.

422. Judge Begaliev's decision rejected Claimants' counterclaim challenging the validity of the April 11 and April 15 resolutions despite their glaring deficiencies. In this respect, Claimants underline that it was not until this decision by Judge Begaliev on June 6, 2003, *i.e.* more than one year after the April 23, 2002 injunction was first issued, that there was mention in the Court's decisions of the idea that the April 15 meeting was held as a "*follow-on"* meeting arising from the lack of presence of a quorum at the April 11 meeting.

423. Similarly, Judge Begaliev's decision that a secretive EGM called by minority shareholders, calling for the compulsory redemption of Claimants' majority stake, was valid, was manifestly wrong as a matter of law.

424. Claimants further stress as an example of the behavior of Judge Begaliev, his approach to expert evidence, such as the legal opinion of Professor Suleimenov and others, which were rejected on the basis that "*the indicated individuals do not possess the right to interpret the law.*"

425. According to Claimants, the above mentioned defects in the Court's decision are so glaring that they can only be the result of bias, corruption and/or bad faith on the part of Judge Begaliev. In this respect, Claimants submit the testimony of Mr. Agilönü, who testified that Judge Begaliev had requested from him EUR 400,000 to rule in Claimants' favor, but then had informed Mr. Agilönü that "*he had received instructions from the highest authorities to rule against us, and that ruling in [Claimants] favor would jeopardize his and his family's life.*" Judge Begaliev denied that allegation in his testimony. However, he had a clear personal interest in such denial, as he could be imprisoned or lose his job if he admitted this discussion, whereas Mr. Agilönü had no such personal interest.

426. Claimants finally submit that the decision of the Presidium of the Supreme Court constituted the final step in the State-sponsored scheme to expropriate their investment in KaR-Tel. Indeed:

- they were not given notice of the Presidium hearing and were thereby prevented from making any submissions as to the valuation of their shareholdings in KaR-Tel;
- the Presidium acted *ultra vires* even in considering the appeal since Telecom Invest did not request in its claim or in any of the Court proceedings prior to the June 6, 2003 decision of the Almaty City Court, that the Court decide on the valuation of Claimants' shares;
- the Presidium's valuation of their shareholdings in KaR-Tel was "*unjust and outrageous*," particularly in light of the true value of the entire KaR-Tel company, as evidenced by its resale price of USD 350 million. Moreover, the Court grossly

misapplied Kazakh law establishing a price by reference to the concept of "*equity interest*" and not by taking into account "*market price*;"

- finally, Claimants allege that the conclusion of forensic experts that Claimants made *no investment* is so grossly incorrect that no reasonable judge should have accepted it.

8. The attempts to pay Claimants to go away

427. According to Claimants, several attempts were made by Respondent and/or various members of President Nazarbayev's empire to pay Claimants to go away.

428. KaR-Tel was first to offer to purchase Claimants' combined 60% for approximately USD 3,000 only. Claimants obviously refused.

429. Then, in April 2003, Mr. Seysembayev offered to purchase Claimants' stake for USD 12 to 15 million. In the context of these discussions, he informed Claimants of the criminal charges that had been raised against their personnel. Claimants refused the offer which they considered too low.

430. In August 2004, as Claimants were preparing to commence the present arbitration, they were contacted by the President of Altel, Mr. Zhanarbek Umirzhanov, to discuss the purchase of Claimants' 60% interest and the resolution of the difficulties faced by Claimants in Kazakhstan. According to Claimants, Altel is ultimately owned and controlled by the Republic. In this context, Claimants also met Mr. Kairat Orazbekov, the Vice Chairman of Arlan (also referred to as Orlon by Respondent) Holding Company, a company which was controlled by one of the daughters of President Nazarbayev. Mr. Orazbekov stated that the Arlan/Altel Group was willing to purchase Claimants' 60% interest in KaR-Tel for USD 20 million.

431. According to Claimants, Respondent's offer to purchase Claimants' shares at USD 20 million is an admission that Respondent violated its international obligations. Indeed, by making such an offer, Respondent implicitly recognized that the decisions of its Courts would not stand international scrutiny and that Claimants still held a combined

shareholding interest with significant value. Indeed, in light of the fact that KaR-Tel's charter had already been amended to remove Claimants as shareholders by early November 2003, such a proposal from Respondent nearly a year later can only be viewed as an admission of liability.

9. The sale of KaR-Tel to VimpelCom

432. On August 27, 2004, just three days after Claimants had answered negatively to the USD 20 million proposal to purchase their stake, they learned that VimpelCom had purchased 100% of KaR-Tel for USD 350 million.

433. In this respect, Claimants further point out that:

- in its Annual Report for the year ended December 31, 2004, VimpelCom seemed to attach great importance to having a local partner with "*local knowledge*" in connection with its investment in KaR-Tel;
- VimpelCom noted that it had "*heard assertions regarding possible questionable payments to government authorities in connection with certain legal proceedings in which KaR-Tel was involved prior to our acquisition*."

434. Claimants submit that the USD 350 million price is in marked contrast with the Supreme Court's valuation of Claimants' 60% stake at USD 3,000, less than a year before. In this respect, Claimants dispute the arguments set forth by Respondent to support the idea of a subsequent improvement of KaR-Tel's situation that would have justified a much higher valuation of the company:

- Claimants dispute Respondent's allegation that Mr. Yerimbetov entered into negotiations with Motorola and was able to reduce KaR-Tel's debts by USD 72 million. Respondent produces no documents to support this statement;
- Claimants also dispute Respondent's allegation that the reasons why Mr. Yerimbetov was able to negotiate a reduction of the amount to be repaid to Motorola were that the 3-year limitation period for bringing a claim was to expire and Mr. Yerimbetov understood that Motorola had already written off KaR-Tel's

debt from its accounts. According to Claimants, the statute of limitations stops and runs anew if a creditor files a claim, and the writing-off of a debt in one's books cannot constitute a waiver of its rights. Therefore, these reasons cannot explain the purported reduction of the debt towards Motorola.

435. Claimants further point out that, as explained by Andrew Wright from Analysys, an expert in the telecom business with nearly 20 years of experience, "*it is inconceivable to me that a company could go from zero value to an enterprise value of USD 450 million in around about two years. It was never zero in the first place.*"

436. In the same vein, Claimants make several comments on the argument raised by Respondent that the USD 3,000 valuation of KaR-Tel by the Kazakh Courts was based on the reports of independent experts and in particular PWC:

- those reports simply took information and assumptions presented by KaR-Tel's new management;
- in its report, PWC cautioned that "it did not verify the credibility" of the information provided and that "a more detailed analysis is required to express an opinion on the price";
- it is clear from the PWC report that there were issues with the management assumptions provided to PWC;
- PWC indicated in its report that it could not "*make any guarantees or warranties (direct or indirect) with respect to the accuracy, fullness or admissibility of this report for any purposes*."

10. General observations on the hearing and on circumstantial evidence

a) Observations on the hearing

437. Claimants make three general remarks on the developments that occurred at the hearing. First, Respondent continued its pattern of obstruction of justice by refusing to produce as a witness Mr. Kulibayev, despite the Arbitral Tribunal's order dated September 24, 2007.

Mr. Kulibayev and his wife, the daughter of President of Kazakhstan, owned a controlling stake in Claimants' local partner. He has exercised a variety of key, high-level State functions and is one of the leaders of a group of individuals that exercises significant control and/or influence over the organs of the Republic of Kazakhstan. According to Claimants, had Mr. Kulibayev come to the hearing, he:

- could have explained the precise role he played in the local partner's decision of mid-2001 to dissociate itself from Claimants;
- could have answered Claimants' allegations of collusion with the Investment Committee;
- could have explained why the Investment Committee, under Ambassador Zverkov's leadership, abruptly terminated KaR-Tel's Investment Contract;
- could have explained why he did not satisfy his and his subordinates' lobbying obligations or good faith obligations as shareholders and partners to provide assistance;
- could have explained how and why Visor Investment Solutions, a company that he had tasked with getting rid of Claimants, promised Claimants in October 2002 to "*cancel*" the termination of the Investment Contract in order to facilitate the sale of his company's minority shares in KaR-Tel to Claimants; and
- could have explained whether the Republic of Kazakhstan ever contacted him to provide testimony.

438. Second, Respondent did everything possible to avoid producing Mr. Orazbekov for examination at the hearing. On September 24, 2007, the Arbitral Tribunal ordered Respondent to produce Mr. Orazbekov as witness. Respondent did not comply, but, instead, sent on October 5, 2007, a letter providing the Tribunal with an address of Mr. Orazbekov. On October 10, 2007, the Tribunal wrote to Mr. Orazbekov asking him to be present to give witness testimony. On October 12, 2007, Respondent produced a very short letter from Mr. Orazbekov denying that he had ever discussed with anyone the matter of purchasing Claimants' stake in KaR-Tel and stating that he would not appear to testify. Yet, Respondent suddenly shifted its position, after Claimants' counsel protested

against this obstruction of justice, indicated the questions that he would have put to Mr. Orazbekov, and requested that adverse inferences be drawn from his absence.

439. Respondent then wrote a letter on October 22, 2007 stating that it had "*obtained a business address for him*" (which made no sense as Mr. Orazbekov's address had already been provided) and that he would be available for cross-examination. At the hearing, Mr. Orazbekov conceded that he had never been informed of these ICSID proceedings prior to October 12, 2007. However, Respondent has denied, since the time of its Counter-Memorial dated December 14, 2006 that any offers had been made to purchase Claimants' shares in August 2004. According to Claimants, it is simply unacceptable for Respondent to have strongly denied such important facts without having contacted Mr. Orazbekov beforehand.

440. Third, it is Claimants' position that Respondent's witnesses lied at the hearing:

- for instance, nearly all of Respondent's witnesses and experts, including those that did not have any direct knowledge of the facts alleged, included in their statements the magic words – (Motorola) "*loan,*" (Uzan) "*fraud*," "*obsolete equipment*" and "*amount supposed to be invested*" in a clear attempt to bias the Tribunal against Claimants and to find belated justifications for the wrongful termination of the Investment Contract;
- Ambassador Zverkov refused at the hearing to even confirm what he said in his own letter, namely that the Investment Committee granted an extension to file the requested reports, at the very least until March 23, 2002. He also engaged in conflicting justifications when confronted with the fact that March 23, 2002, the day he claimed the Investment Committee members were waiting at the Investment Committee to receive Claimants' reports, was a Saturday, and that the previous day was Norouz, a public holiday;
- Mr. Orazbekov admitted that Mr. Akgün and Mr. Salih Oktar, representatives of Claimants, were invited by the State company Altel to attend a meeting with him on March 24, 2004. Yet, Mr. Orazbekov claimed that these two gentlemen were

not invited to be extended any offer for the settlement of their KaR-Tel claims, but rather to discuss further business opportunities in Kazakstan. According to Claimants, this is unconvincing: Mr. Orazbekov failed to describe, even in any general fashion, much less to provide any specifics, the alleged business opportunities the parties discussed at the meeting he attended. In any case, these companies were undergoing crises in Turkey and had had their investment expropriated in Kazakhstan. Therefore, the likelihood is slim that they would have attended a meeting to discuss further business opportunities in Kazakhstan.

441. Claimants request that the Arbitral Tribunal draw adverse inferences as a result of these multiple obstructions of justice, misrepresentations and improper conduct.

b) Circumstantial evidence

442. The Arbitral Tribunal asked Claimants to explain the weight that the Tribunal should give to circumstantial evidence. In this connection, Claimants note that they rely primarily on Respondent's admissions in this arbitration and on the direct evidence that has been produced to demonstrate Respondent's breaches of the Bilateral Investment Treaty. Some circumstantial evidence has also been advanced, however, particularly with regard to the collusion between the powerful local partner and organs of Respondent. Claimants request that the Arbitral Tribunal give full weight to the circumstantial evidence that has been presented for the following reasons.

443. Article 34(1) of the ICSID Arbitration Rules provides that the Arbitral "*Tribunal shall be the judge of the admissibility of any evidence adduced and of its probative value.*" Therefore, the Tribunal is not bound by any legal system of procedure. It is free to determine the probative value of any evidence that has been produced, be it circumstantial or otherwise.

444. In general, international tribunals have given full weight to circumstantial evidence. Two independent factors are considered by Arbitral Tribunals when assessing the weight that should be given to such evidence:

- the first factor is the party's attitude in the proceedings. If a party, as was the case with Respondent, does not comply with its obligations, for instance by refusing to produce the requested documents and witnesses, the Arbitral Tribunal is authorized to draw adverse conclusions from the party's behavior. The same applies when witnesses manifestly lack independence, as was the case with those produced by Respondent;
- the second factor is whether direct evidence of fact is unavailable. In this respect, the International Court of Justice decided in the *Corfu Channel* case that "*[T]he other State [the claimant], the victim of a breach of international law, is often unable to furnish direct proof of facts giving rise to responsibility. Such a State should be allowed a more liberal recourse to inferences of facts and circumstantial evidence. This indirect evidence is admitted in all systems of law, and its use is recognized by international decisions*."[28] In *AAPL v. Sri Lanka,* an ICSID Arbitral Tribunal listed the international rules regarding evidence and concluded: "*Finally, in cases where proof of a fact presents extreme difficulty, a tribunal may thus be satisfied with less conclusive proof, i.e. prima facie evidence.*"[29]

445. In this arbitration, Claimants rely on circumstantial evidence primarily to show collusion between the powerful local partner and the organs of the Republic of Kazakhstan. It is undisputable that submission of direct evidence on these points is very difficult, and even more so given that the Republic of Kazakhstan is a party to this dispute and has in general not been cooperative in the fact finding procedure.

446. Furthermore, in some circumstances, the endemic nature of a fact alleged in certain countries has been considered to be circumstantial evidence of the facts alleged. For instance, in ICC arbitration No. 3916, the widespread nature of corruption in Iran was

---

[28] *Corfu Channel (United Kingdom of Great Britain and Northern Ireland v. Albania),* Judgment of April 9, 1949, [1949] ICJ Report Rep. 4, para. 18 [hereinafter *Corfu Channel v.Albania*].

[29] *Asian Agricultural Products Ltd. v. Republic of Sri Lanka* (ICSID Case No. ARB/87/3), Final Award of June 27, 1990, (1991) 30 ILM 580, paras. 37-45 [hereinafter *AAPL v. Sri Lanka*].

considered to be circumstantial evidence for the existence of corrupt practices.[30] Similarly, in the case at hand, the international reports and widely published articles submitted prove the two points on which circumstantial evidence is most relevant, namely general lack of impartiality of the organs of Respondent and collusion between powerful groups of the ruling family in Kazakhstan.

447. According to Claimants, there is no doubt that the two independent and alternative factors described above for the use of circumstantial evidence are present. Additionally, admissions have been secured and direct evidence submitted on related subjects that reinforce the circumstantial evidence submitted in support of Claimants' position on collusion. Claimants also produced the witness statement of Mr. Agilönü who confirmed that Respondent's judiciary was not only corrupt in this matter, but also under the influence of the powerful local partner against the interest of which it could not possibly rule.

448. Therefore, Claimants allege that they have satisfied their burden of proof on collusion. They finally allege that, in the event that the Arbitral Tribunal were to find otherwise, that would have no impact on Respondent's liability for breaches of the Bilateral Investment Treaty since Respondent, independently of the issue of collusion, breached multiple obligations under the Treaty, as proven by the admissions made by Respondent and the direct evidence submitted in this arbitration.

B. RESPONDENT'S POSITION

1. The general context

a) Claimants' investment

449. According to Respondent, there was nothing to expropriate since Claimants did not make any investment. The highest Claimants are able to put their case is that they granted KaR-Tel lines of credit or procured for KaR-Tel loans from third parties, and particularly from Motorola. Respondent alleges that the only capital contribution not in the form of

[30] *ICC Case No. 3916* (1982), Collection of ICC Arbitral Awards 1974-1985, at 507.

an interest-bearing loan is Rumeli's partial contribution towards the charter capital of KaR-Tel.

450. According to Respondent, it is not clear on what basis Claimants can allege that the loans made to KaR-Tel constitute the investment they were obliged to make under the Foundation Agreement and/or the Investment Contract. In any event, they were anything but interest-free: they were subject to interest at LIBOR +2%.

451. Moreover, it appears that Rumeli deposited a sum in a bank account at Bank TuranAlem in order to permit KaR-Tel to borrow further funds. Once again, rather than actually investing in KaR-Tel, Rumeli further indebted the company.

452. It is also Respondent's allegation that Claimants did not transfer equipment on very favorable terms to KaR-Tel. On the contrary, they sold obsolete equipment to KaR-Tel at a significant overvalue, in breach of the requirements of the Invetsment Contract to use advanced technology.

453. Respondent accepts that Telsim guaranteed the Motorola Loan for KaR-Tel, but this cannot be termed an investment by Claimants: it simply created further indebtness on KaR-Tel and was done at a time when Telsim was not a shareholder of KaR-Tel. When Motorola demanded repayment of the Motorola Loan from Telsim, that demand was not met in whole or in part.

454. Respondent further submits that there is no evidence of the additional investment of USD 33 million allegedly made by Claimants between 1999 and 2001 and, indeed, none was provided to the Kazakh Courts nor found by the independent forensic experts appointed by the Kazakh Courts or the leading auditors appointed by Telecom Invest or KaR-Tel during the course of the proceedings in 2002 and 2003.

455. Finally, Respondent submits that the quality of the support know-how and training provided by Claimants was not very good and that in the opinion of several leading

auditors KaR-Tel was insolvent and unable to continue trading without significant restructuring.

b) The Republic of Kazakhstan and the involvement of President Nazarbayev's family

456. According to Respondent, despite the repeated references to collusion and conspiracy and acting in concert, Claimants do not provide any evidence of even a suspicion of collusion or conspiracy.

457. Respondent further submits that no attempt is made by Claimants to link its generalized allegations of corruption and dishonesty to the matters in dispute in this arbitration. For instance, it is unclear which members of the President Nazarbayev's family or "*empire*" are said to have played a purported "*active role*." The best Claimants are able to allege is that two of the persons they mention, Mr. Kulibayev and his wife, might be participants of a Limited Partnership called Almex that was itself a shareholder of Investel/Telecom Invest, which were themselves participants in KaR-Tel.

458. Contrary to Claimants' allegations, Mr. Kulibayev had no role whatsoever in the negotiations with the Investment Committee and was at no time a director of Investel or Telecom Invest.

459. On that extraordinarily tenuous basis, Claimants seek to allege that the Republic bears responsibility for the dispute that arose between three private entities. However, there is no basis on which a State can bear legal responsibility for the actions of its President's son-in-law.

460. Claimants are alleging that the conspiracy was between all of:

- Mr. Kulibayev, Mrs. Kulibayeva, Mr. Abuov and President Nazarbayev;
- numerous members of the Investment Committee;
- two judges of the Almaty Court;
- numerous Court bailiffs;

- numerous members of the criminal prosecution office;
- all the members of the Working Group;
- Deloitte & Touche, PricewaterhouseCoopers and the other experts who produced reports before the Kazakh Courts;
- three judges of the Supreme Court of Kazakhstan;
- nine judges of the Presidium of the Supreme Court of Kazakhstan.

461. According to Respondent, when viewed in that context alone, Claimants' allegations seem extraordinary. When one realizes that these allegations are unsupported by evidence, Claimants' case becomes offensive.

462. In particular, Claimants' allegation that Respondent's Judiciary acted improperly because it was corrupted is wholly unparticularised. Moreover, Claimants fail to mention that they filed appeals that resulted in first instance decisions being reversed.

463. According to Respondent, Claimants' case theory was always flawed by one incontrovertible fact. After January 2003, Mr. Kulibayev, Mr. Abuov and Mr. Karijbanov had no role or interest in Telecom Invest or KaR-Tel. They had sold Telecom Invest to Mr. Seysembayev. Therefore, any tenuous connection that might have existed with Respondent prior to that sale extinguished six months before the first judgment in the legal proceedings.

2. The termination of the Investment Contract

464. Respondent points out that clause 13 of the Investment Contract required KaR-Tel to provide the Investment Committee with detailed information on the progress of the investment programme on a quarterly and annual basis. This was to allow the Committee, which does not have the power to carry out inspections or audits, to monitor KaR-Tel's compliance with the terms of the Investment Contract. In the period when it was under the control of Claimants, KaR-Tel conspicuously failed to comply with these obligations:

- no annual reports were filed at all during the entire period of the Investment Contract. Only one report was submitted, after the Investment Contract had been terminated and it related to the year 2000;
- the deadlines for filing the quarterly reports were repeatedly missed. By way of example, the reports for the first and second quarters of 2000 were filed together at the end of August 2000 and the report for the third quarter of 2000 was not filed until November 2000. The reports for the third and fourth quarters of 2001 were not filed until after the Investment Contract had been terminated.

465. According to Respondent, it subsequently became clear why KaR-Tel had failed to file any annual reports: the reports had to be certified by an auditor and Mr. Agilönü could not find an auditor who would certify them. For example, in July 2002, Deloitte & Touche provided KaR-Tel with the results of an audit in the course of which they had discovered material discrepancies between the information recorded on the partnership's balance sheet and its actual financial status. It is obvious that the reason why Claimants did not file reports was to prevent the Committee from seeing that in reality KaR-Tel was insolvent and heavily in default on the Motorola Loan.

466. The official notice dated September 10, 2001 sent by the Investment Committee set a deadline of November 1, 2001 for KaR-Tel to cure its breaches. KaR-Tel did not comply with this notice and asked for several extensions, which were granted. In any case, KaR-Tel failed to file either of the requested annual reports or any other information at all. The Committee then sent a letter dated February 21, 2002. There followed a meeting between Claimants' executives and members of the Investment Committee. These later accepted that if the reports were filed within 30 days, it would be possible to stop the cancellation of the Investment Contract. The formal order of cancellation was sent on March 27, 2002. Given the multiple breaches of the Investment Contract in terms of reporting, the Investment Committee clearly had the right to terminate the Contract.

467. According to Respondent, Mr. Agilönü's evidence on the cancellation of the Investment Contract was limited in scope and unreliable. The most incredible part of his evidence on

this issue turned on the new allegations he made at the hearing that the filing of the reports had always been the responsibility of Investel/Telecom and more specifically of Mr. Podporin. This, the latter denied. And, upon closer examination, Mr. Agilönü's new allegations disintegrated. He was asked how Mr. Podporin, who was only the logistics manager, could prepare the detailed financial reports required. Mr.Agilönü's response was telling. He replied that his team was responsible for preparing the reports, which Mr. Podporin was then responsible for filing. However, in view of the fact that Mr. Agilönü accepted that the 1999 and 2001 annual reports for KaR-Tel had never been prepared, it is difficult to see what blame could possibly attach to Mr. Podporin, even if Mr. Agilönü were correct. It is also to note that Mr. Agilönü's acceptance of the failure to file the reports for 1999 to 2000 is contrary to Claimants' position as set out in their Memorials.

468. Mr. Agilönü went even further in his evidence and stated that in September 2001, on receipt of the Investment Committee's warning letter, he had specifically asked Mr. Podporin to resolve the problem. This is clearly a further lie. Mr. Podporin denied this alleged conversation. Further, this allegation, together with Mr. Agilönü's admission that he spoke to Mr. Abuov in January 2002, contradicts the statement in Mr. Agilönü's witness statement that Mr. Abuov and Mr. Podporin disappeared after the letter of 10 September 2001 was received. In the same vein, Mr. Agilönü confirmed that he had not attempted to contact Mr. Kulibayev at any stage in relation to the problem KaR-Tel was facing with the Investment Committee, which contradicts Claimants' allegation that they knew that Mr. Kulibayev was a man of great influence in Kazakhstan.

469. According to Respondent, Claimants admitted that several extensions of time have been given to file the reports. And, in any case, no reports for 1999 or 2001 were ever filed. Therefore, even if the 2000 report was filed on time – which it was not – KaR-Tel would still have been in significant breach of its reporting obligations.

470. With respect to the timing, Mr. Agilönü's evidence was that he filed the 2000 annual report with the Investment Committee by facsimile on March 25, 2002. This conflicts

with Claimants' case in their Request for Arbitration which states that on March 25, 2002, they filed two quarterly reports and only on March 31, 2002 did they file the remaining documents. In any event, this was after the deadline of March 23, 2002, which was the end of the 30-day notice period granted by the letter of termination dated February 21, 2002.

471. On the allegation of collusion that would have led to the cancellation of the Investment Contract, Respondent points out that Ambassador Zverkov, Chairman of the Investment Committee, denies having been under any pressure to cancel the Contract. With respect to Mr. Abuov, who was accused of having failed to assist KaR-Tel when it needed him, he answered that he had never been asked to assist and that whenever he had given his advice to Claimants and their appointees, it had been routinely ignored.

472. Mr. Abuov further testified that it was nonsensical for Telecom Invest to cause the cancellation of the Investment Contract as it would have caused significant harm to KaR-Tel and thus to Telecom Invet's investment. In any case, Almex sold Telecom Invest in January 2003 and thereafter had nothing to do with it.

473. Respondent further submits that Claimants' complaint of unfair procedure, i.e., that the Investment Committee cancelled the Investment Contract on a statutory basis rather than on the contractual basis of clause 19, which would have required a prior suspension of the Contract, is unfounded.

474. Indeed, article 13 of the Investment Support Law gives the Investment Committee the right to cancel the Investment Contract without prior suspension. The evidence given by Mr. Sabirov, who was himself Chairman of the Investment Committee after Amabassador Zverkov, shows that during his tenure on the Committee, the Committee cancelled 30 to 40 investment contracts without prior suspension. Around a quarter of those cancellations were based on the investor's failure to file their reports.

475. Moreover, as confirmed by Professor Kaudyrov, article 13 of the Investment Support Law is mandatory. Consequently, the Investment Contract could not deviate from, or

condition, its application. Therefore, Claimants could not have had a "*legitimate expectation*" that suspension was a prerequisite.

476. In any event, Respondent alleges that Claimants' failure to challenge the cancellation of the Investment Contract debars them from bringing a claim that Respondent has denied them justice or fair and equitable treatment.

477. Respondent further alleges that:

- although the Investment Committee did not cancel the Investment Contract on the basis of clause 19 thereof, and did not formally suspend the Contract, it could have been validly cancelled pursuant to clause 19.3 on February 21 in any event. Indeed, the notice sent on September 10, 2001 constituted a suspension of the Contract in accordance with the spirit of clause 19. If that notice alone did not constitute a suspension, the repeated further extensions of time granted did. The only difference from the strict position under clause 19.2 is that the Investment Committee refrained from formally suspending the Investment Contract, as that would have obliged KaR-Tel to make ordinary payments of tax until the suspension was lifted: it therefore benefited KaR-Tel;
- the May 14, 2003 letters invoked by Claimants in support of their position have been written by junior administrators in Respondent's Ministry of Finance and Ministry of Economy. They are not based on a review of the events. They take as given the incorrect assertions made by Claimants in their April 2003 letters that they had fully complied with all of their reporting obligations. Moreover, Respondent points out that it is difficult to see how these letters match with Claimants' case theory of collusion;
- the cancellation was not abrupt since KaR-Tel had been granted 6 months of extensions from the initial demand to file the reports;
- Exhibit RM32 constitutes another example of a telecommunications company whose investment contract was terminated according to the same procedure;

- had the Investment Committee been presented at the time with the information it ought to have received from KaR-Tel, it would have been entitled to cancel the Investment Contract and would have done so for breach of KaR-Tel's obligations to make direct investments under clause 3.

478. Respondent finally points out that Claimants did not request KaR-Tel to challenge the termination of the Investment Contract.

3. On the purported collusion between Telecom Invest and Respondent to effect the compulsory sale of Claimants' interest in KaR-Tel

a) The KaR-Tel EGMs

479. According to Respondent, it is incorrect to allege, as Claimants do, that the April 2002 EGMs were invalidly held.

480. First, contrary to Claimants' allegation, they received notice of the EGMs. The default rule of Kazakh law is that extraordinary general meetings of LLPs are to be convened by the central executive body of an LLP, in the case of KaR-Tel the General Manager. However, article 45(2) also provides that if, despite a request, the executive body does not call an EGM, any shareholder with at least 10% of the equity may also do it.

481. By letters dated March 4 and March 20, 2002, Telecom Invest's Mr. Podporin requested KaR-Tel's General Manager to call an EGM as soon as possible to discuss the cancellation of the Investment Contract. Mr. Agilönü ignored these requests. He denied having received these letters. However, evidence from the Kazakh postal service and from two of KaR-Tel's secretaries proved this statement to be false. Therefore, on March 26, 2002, in view of Mr. Agilönü's failure to respond, Mr. Podporin sent to Rumeli and Telsim formal notices calling an EGM of KaR-Tel.

482. According to Respondent, the Turkish postal service confirmed that the EGM notices were delivered and signed for by named individuals at Rumeli and Telsim. Therefore,

unless Claimants also implicate the Turkish postal service in the alleged conspiracy to expropriate their investment, they cannot challenge this evidence.

483. Respondent further submits that contrary to Claimants' allegation, article 46 of the LLP Law does not state that it is not possible to provide notice of two EGMs in a single document. On the contrary:

- the Office of the Public Prosecutor stated that it was for the Court to decide;
- the Supreme Court, having heard the evidence of Professor Suleimenov for Claimants, rejected the view that it was impermissible to have notice for two EGMs in one document;
- the Civil Expert Report of Respondent concludes that the Court was correct;
- Professor Sergeev, Claimants' expert, accepted that this issue was not clear cut in Kazakh law.

484. It is also Respondent's allegation, supported by their legal experts, that pursuant to article 176 of the Kazakh Civil Code, notices sent by post before midnight on the last day of a period set by law are deemed to be made on time. In any case, this issue was not raised by Claimants before the Kazakh Courts. They cannot therefore be criticized for not having decided an issue that they were not submitted. Moreover, in these circumstances, it is not open to the Tribunal to find that the decision of the Almaty City Court was so egregiously wrong that no competent and honest judge could have determined the issues in that way

485. With respect to the issue of quorum, Respondent sets forth that, pursuant to article 47(5) of the LLP Law, an adjourned or reconvened EGM is quorate irrespective of the number of voting rights present. This is confirmed by their Civil Expert Report and even by Professor Didenko, Claimants' expert before the Kazakh Courts, who indeed changed his views in an article subsequent to his testimony.

486. Article 47(5) of the LLP Law provides that where fewer than half of the total votes are present at a reconvened EGM, it is not competent to adopt resolutions requiring a

qualified majority. Claimants allege that the decision on compulsory redemption is one requiring qualified majority voting and, thus, that as Telecom Invest held only 40% of the total votes, it could not legally adopt a decision on compulsory redemption at the April 15, 2002 EGM.

487. Article 48(2) of the LLP Law provides that a motion for the compulsory redemption of a participant's shareholding in a LLP requires: "*a qualified majority of three fourth of votes of the partnership present and represented at the meeting. When adopting a decision under sub-paragraph (9) of paragraph 2 of article 43 of this Law the participant whose participating interest is to be purchased into a forced procedure shall not take part in voting and the number of votes he has shall not be considered.*"

488. The Almaty City Court dismissed Claimants' contention holding that article 48(2) is clear that it is only the votes present or represented at the meeting that count for the purpose of assessing whether or not the 75% threshold has been achieved. The Court added that the final part of article 48(2) made the position even more clear: had Claimants been present at the meeting on April 15, 2002, they would not have been entitled to vote on the question of compulsory redemption, and Telecom Invest would still have held 100% of the votes eligible to be exercised in passing that resolution.

489. Professors Kaudyrov's and Klimkin's expert evidence, which was unchallenged, was that there is an ambiguity between article 47(5) and article 48(2): the former refers to "*qualified majority of vote*" and the latter to "*a qualified majority of three quarters of the votes present and represented at the meeting*." Respondent's experts opined that, faced with such ambiguity, the better approach is to adopt the narrower standard of article 48(2), which is also more directly relevant to the issue to be determined. In their view, the Almaty City Court's determination of this issue was correct. Moreover, one of Claimants' expert witnesses in the Kazakh proceedings, Professor Didenko, has subsequently revised his view and now considers that the Kazakh Courts determined this issue correctly.

490. In this framework, Respondent alleges that, pursuant to article 48(2) of the LLP Law, even if Claimants had been present at the meeting on April 15, 2002, they would not have been entitled to vote on the issue of compulsory redemption, and thus Telecom Invest would still have held 100% of the votes eligible to be exercised in passing that resolution. In this context, the Almaty City Court rightly held that Claimants were to be treated as a single entity in view of their mutual ownership and behavior. Professor Didenko confirmed this point of view.

491. With respect to the certification of the quorum, Claimants allege that article 47(9) of the LLP Law requires that the quorum be certified anew immediately prior to the vote. However, according to Respondent, whether or not it was done is irrelevant since there was only one shareholder present.

492. With respect to the minutes of the EGM, Respondent further points out that Claimants, which initially argued that the minutes of the meeting did not record the evidence which had been presented relating to the significant damage suffered by KaR-Tel, now appear to accept that the harm suffered by KaR-Tel as a result of the cancellation of the Investment Contract was discussed at the EGM.

493. Respondent finally submits that, as confirmed by its Procedural Expert Report, and now also by Professor Didenko, the LLP Law contains no formal limits on the size of the shareholding which may be the subject of an order for compulsory redemption. In any case, even if it were otherwise, this limit would have been inapplicable in the present case since there was no majority shareholder, unless Claimants' shareholdings are taken together, which they dispute in relation to the voting on compulsory redemption.

b) The Injunctive relief proceedings

494. According to Respondent, there were good reasons for Telecom Invest to seek an injunction in March 2002. Indeed, Claimants had not participated at all in the EGMs, and, in addition, Telecom Invest had recently discovered falsified minutes of a purported EGM at which it had been falsely recorded that Telecom Invest had consented to Rumeli

transferring a further 10% of its shares in KaR-Tel to Telsim. There was a risk that, once Claimants would have learned of KaR-Tel's resolution for compulsory redemption of their shareholding, they might have attempted to disrupt KaR-Tel's network and destroy critical documents.

495. Indeed, notwithstanding the injunction, Claimants managed to delete KaR-Tel's website. Claimants did not challenge that point. Nor do they dispute Mr. Yerimbetov's evidence that Claimants' representatives attempted to obtain the remote access details for KaR-Tel's switch, which would have permitted them to switch off the entire KaR-Tel network. Claimants, rather than deny this outright, simply suggested to Mr. Yerimbetov that there might be other reasons for them to have sought the switch remote access details, but Mr. Yerimbetov was clear in his recollection.

496. Respondent submits that the application for the injunction was, by necessity, filed *ex parte*. Article 158 of the Kazakh Civil Procedure Code provides that Courts may take steps to secure a claim on a motion by a participant in the relevant case. As explained by Respondent's Procedural Expert Report, applications for such injunctions are determined *ex parte*. The evidence of Professor Mukhamedshin that this *ex parte* procedure is normal and regularly used in Kazakhstan and that the Court acted entirely properly was unchallenged. Claimants did not adduce any expert evidence on this issue. Nor was there any challenge to Professor Mukhamedshin's evidence. The judge must simply evaluate whether the applicant has submitted a *prima facie* case that in the absence of an injunction the Court's orders may be difficult to enforce. According to Respondent, in view of the application, the Court's decision was sensible.

497. Respondent also submits that it is not true to say that the Court ratified the appointment of Mr. Yerimbetov and prejudged the merits of the pending claim. The appointment of the General Manager is for the General Meeting of the Shareholders to decide. During the meeting held in April 2002, it was decided to appoint Mr. Yerimbetov, in replacement of Mr. Agilönü. Therefore, the Court had no basis to doubt the validity of this

appointment and no legal basis to appoint a third party. Professor Mukhamedshin's evidence confirms that point.

498. Respondent further points out that Claimants filed an appeal against the injunction and the Supreme Court set aside the second part thereof (related to the limits of access to KaR-Tel's premises, etc.), which is hardly the conduct of a Judiciary that is said to be denying justice to Claimants.

499. Finally, it is not true that in fact Claimants continued to be denied access despite the Supreme Court decision and that their requests to the Courts remained unanswered. They made a single application on July 25, 2002 to challenge Mr. Yerimbetov's control over the access to KaR-Tel of employees engaged by Claimants. The decision on this point is at the discretion of the Court. The request was rejected. In fact, the Court found that as the only attempts made to access KaR-Tel were prior to the alteration of the injunction by the Court of Appeal decision of June 11, 2002, it could not be said at that stage that Claimants had been denied access to KaR-Tel, such as to justify a Court order. It was always open to Claimants to return to Court if they still were not given access. Respondent's Procedural Expert Report finds that the Court's decision was valid. His opinion was not challenged by Claimants.

500. In this context, Respondent finally points out that, when almost one year later, on May 22, 2003, Claimants attempted to access documents at KaR-Tel once more and were unable to contact Mr. Yerimbetov, they immediately went to the Almaty City Court which granted their application for an order.

4. The actions of Respondent's police authorities

501. According to Respondent, Claimants attempt to give the impression that the Kazakhstan armed police seized KaR-Tel's premises and evicted Claimants whereas, in fact, the Kazakh police was not present. During the enforcement of the injunction by Court bailiffs, there were guards from the Kuzet Security Service. Respondent does not know whether they were armed, but, in any event, they were not present to assist in the

enforcement of the injunction but rather to take over from the existing KaR-Tel security guards, who had been dismissed by Mr. Yerimbetov.

502. According to Respondent, in the course of the hearing, the allegations relating to the enforcement of the injunction were disavowed or undermined by Mr. Agilönü. Indeed, he admitted that:

- he did not know if it was in fact the Kazakh police, it could have been Kuzet security guards;
- he could not recall whether or not they were armed, let alone whether or not they had machine guns;
- he had a conversation with Mr. Karijbanov at the switch and agreed to meet Mr. Karijbanov in the following days to discuss the situation.

503. Mr. Karijbanov confirmed his evidence that he saw Kuzet security guards at the premises of KaR-Tel during the enforcement of the injunction, but no police and no-one armed. According to Respondent, this is a radically different picture than that previously painted by Claimants and casts significant doubt on the reliability of their case and evidence.

504. The police was thus not there but even if it had been otherwise, it is a matter within the discretion of the enforcing bailiff whether to call for assistance. Contrary to Claimants' suggestion, the bailiff is not required to attempt first to enforce the injunction without police assistance.

505. Respondent finally alleges that:

- KaR-Tel's premises were not simultaneously seized;
- Mr. Karibjanov was not present to lead the allegedly armed force but merely to protect Telecom Invest's interest;
- the Court's bailiffs did not bar Turkish executives from entering the premises. The Turkish executives simply failed to appear for work;

- there is no obligation in Kazakh law to notify the respondent to an ex parte procedure that the injunction has been obtained prior to enforcing its terms.

5. The attempt to sell Telecom Invest's participation in KaR-Tel

506. Respondent disputes Claimants' position on Telecom Invest's attempt to sell its participation in KaR-Tel. This was not at all a purported way of extracting money from the partnership. On the contrary, in late summer 2002, Almex and Telecom Invest took the position that it would be sensible for them to sell their interest in KaR-Tel as quickly as possible in view of the real danger of KaR-Tel being made insolvent and losing its principal valuable asset.

507. Their first option was to discuss with Claimants. Mr. Karibjanov, appointed by Telecom Invest, flew to Corfu and had a meeting with Hakan Uzan. Initially, Mr. Uzan offered to sell Claimants' shares to Telecom Invest for USD 20 million. Mr. Karibjanov refused. Mr. Uzan then offered to purchase Telecom Invest's shareholding for USD 12 million.

508. There followed further discussions. Claimants wanted to retain 30% of the purchase price on completion and that Telecom Invest obtain a new investment contract. A Stock Purchase Agreement was drafted but, ultimately, Rumeli did not transfer the funds and the agreement lapsed.

509. According to Respondent, the price offer made does not reveal anything. It is just the price that Mr. Uzan offered, which Respondent considered to be a considerable overvalue. In any case, the fact that Telecom Invest was ready to sell its stake for USD 12 million is irrelevant to the issue of its true value.

510. Moreover, Claimants' allegation that the Stock Purchase Agreement would demonstrate that the Investment Committee was under the influence of the local partner, is simply wrong. It is true that the Agreement provided that Telecom Invest had to procure either a new investment contract or to persuade the Investment Committee to overturn its cancellation of the previous Contract. However, this clause was simply a best endeavors clause and Mr. Karibjanov took the view that even if Telecom Invest were not successful

in securing the reinstatement of the Investment Contract, or in obtaining a new one, it would still have obtained USD 10.2 million for its 40% shareholding which he himself considered to be worthless.

511. Respondent finally submits that:

- the ultimate proof of the absence of influence of Telecom Invest on the Investment Committee is the fact that the Investment Contract was never reinstated;
- the Stock Purchase Agreement contained a contractual mechanism in the form of a retention of 15% of the purchase price to deal with the risk that KaR-Tel could have entered into transactions that were not in its interest during the time it was managed by Telecom Invest. Contrary to Claimants' allegation, this risk was not at the origin of the non execution of the Agreement. In reality, Claimants were unable to complete the transactions because external events left them without funds.

6. The actions of the Working Group

512. The next entity criticized by Claimants is the Working Group established by Respondent's Government. According to Respondent, the only evidence adduced by Claimants in relation to the Working Group was a short section of Professor Sergeev's report. The only question asked to Professor Sergeev – whether the Working Group could validate the cancellation of the Investment Contract – was not in issue between the parties, and so is irrelevant. On the other hand, Respondent provided a witness statement from Mr. Imin Sabirov, who as well as being a former Chairman of the Investment Committee, was the Chairman of the Working Group. Mr. Sabirov gave evidence to the Tribunal at the hearing.

513. Claimants were not *de facto* excluded by Respondent from the Working Group investigation. Instead:

- there was no legal obligation for Respondent to establish such a Working Group. It was an informal group before which there was no formal procedure. There was thus no requirement to hear representations from Claimants, nor to involve them in any way. However, the Working Group did offer Claimants the opportunity to participate;
- as evidenced by Mr. Sabirov, the Working Group wanted Claimants to participate as they were the complainants. Claimants were notified of the creation of the Group. On July 1, 2003, Claimants' attorney was informed by telephone of the new start date of the work on July 4, 2003;
- since the Group was to conduct an audit on KaR-Tel, including on its investment obligations, it was logical to hold the meetings of the Working Group at KaR-Tel's offices. In this respect, Respondent points out that, in the light of Mr. Agilönü's evidence that he sought access to KaR-Tel's premises, no credence can be given to the affirmation that those premises were hostile to Claimants;
- at no stage did Claimants display any interest in participating in the Working Group's investigation. There were no letters from Claimants indicating willingness to participate or seeking information on the process.

514. With respect to the criminal proceedings, Respondent disputes Claimants' allegation that they were wholly unfounded and begun at the same time as the Working Group's examination precisely to dissuade Claimants' appointees from participating in the Working Group's work:

- in 2002, Mr. Yerimbetov had discovered that approximately USD 200,000 had been taken from KaR-Tel by its senior management without appropriate paperwork. During the spring of 2003, Mr. Yerimbetov was warned by the tax authorities that if he did not report this as a criminal offence, he could render himself personally liable. After an audit of the relevant transactions, Mr. Yerimbetov and KaR-Tel's chief accountant made a report to the Almaty police on June 24, 2003. Mr. Yerimbetov confirmed that once he had discovered that the money was missing, he had contacted the individuals involved on a

number of occasions and asked them to repay the debt, but they had refused. He was not asked a single question at the hearing, so that his evidence is unchallenged;

- a criminal indictment was issued on July 1, 2003. However, on September 1, 2003, the Almaty police was forced to suspend the proceedings as they had been unable to interview any of the persons indicted, who had fled Kazakhstan;
- Claimants' appointees did not challenge the decision to indict them as it was their right to do so;
- on the contrary, Mr. Ozornek wrote to KaR-Tel, admitting having taken the sums alleged;
- one of the persons indicted is a Kazakh national, which undermines Claimants' suggestion that the criminal charges were brought only against Turkish executives and for an ulterior purpose;
- these indictments were far from being unfounded;
- Respondent's Expert on Criminal Procedure in Kazakhstan confirms that there was nothing unusual from a procedural point of view. Claimants did not adduce any expert on this issue and Respondent's expert evidence remained unchallenged;
- Claimants' continued reliance on the fact that Mr. Seysembayev knew of the criminal proceedings is misconceived. The indictment was a document of public record and Mr. Seysembayev was the ultimate beneficial owner of Telecom Invest at the time, and therefore the person to whom Mr. Yerimbetov was answerable. It was therefore perfectly legitimate to make him aware of the complaint filed by Mr. Yerimbetov.

515. According to Respondent, Mr. Agilönü's witness statement, which is the only evidence adduced by Claimants in relation to the criminal investigation says almost nothing. Furthermore, in cross-examination, Mr. Agilönü admitted that:

- none of Claimants' appointees had contested the criminal investigation;

- Mr. Ozornek admitted to having taken the sums alleged and Rumeli offered to offset the sums against its claims against KaR-Tel.

516. In re-examination, Mr. Agilönü alleged for the first time that he had in fact repaid the money it was alleged he took, implicitly accepting that he had taken the sums alleged.

517. Contrary to Claimants' allegation, the Working Group was not in any sense established to review the legality of the Investment Committee's decision to cancel the Investment Contract or to find alternative grounds for its cancellation. After the Government had received Claimants' complaints dated April 2 and 3, 2003, various Ministries suggested that, in the interest of preserving a good relationship with Claimants and to avoid the costs of an arbitration procedure they were threatening to initiate, an attempt should be made to settle the dispute amicably through negotiation. In this perspective, the Working Group was created by the Kazakh Government to provide information to the Government concerning whether or not KaR-Tel had fulfilled its obligations under the Investment Contract. The purpose was therefore not at all improper. This was confirmed by Mr. Sabirov.

518. The Working Group found that, contrary to Claimants' allegations, KaR-Tel had not complied either with its reporting obligations or with its investment obligations, and that, consequently, the Investment Committee was right in cancelling the Investment Contract. According to Respondent, it is crucial for the Tribunal to recognize that Claimants did not challenge in evidence any of the findings of the Working Group.

519. Mr. Sabirov was cross-examined on his views on the legitimacy of the cancellation of the Investment Contract. He confirmed his witness statement and provided further explanation:

- suspension was only the right, not the obligation of the Investment Committee;
- it was normal practice for the Investment Committee to cancel investment contracts unilaterally, without a Court decision, and without suspending first pursuant to article 13 of the Investment Law;

- he was in fact only surprised that the Investment Committee had granted KaR-Tel so long to remedy its breaches;
- the most common grounds for which investment contracts were cancelled under article 13 of the Investment Law were failure to file reports and non-compliance with the working program;
- no member of the Working Group had any idea that KaR-Tel was in any way related to the President's family or the Government.

520. Respondent finally alleges that, even if Claimants were correct about the Working Group process being procedurally or substantively wrongful, they failed to challenge that process, or its findings, in Kazakhstan, even by writing to the Working Group itself to protest its conclusions. Claimants thereby denied the Kazakh system the opportunity to correct the alleged errors on which they now seek to rely.

7. The actions of Respondent's Judiciary

521. According to Respondent, Claimants' position that Respondent's Judiciary grossly misapplied the law is totally unfounded. Respondent adduced expert evidence from Professors Kaudyrov and Klimkin and from Professor Mukhamedshin in relation to the principles of Kazakh law on each issue raised by Claimants.

522. Claimants submitted the testimony of Professor Sergeev, who admitted that he had not published on the areas of investment law, corporate law in Kazakhstan or Kazakh LLP Law, whereas Professors Kaudyrov and Mukhamedshin have a significant experience in those fields. In addition, in the course of his evidence, Professor Sergeev accepted that the issue of whether the notice for the EGMs was in compliance with Kazakh law was open to debate. He also accepted that the opinions of Professors Kaudyrov, Klimkin and Mukhamedshin submitted to the Tribunal, and which support the Almaty City Court's reasoning, were their honest opinions.

523. In this respect, it is Respondent's position that the Courts correctly applied the law by deciding that the April 2002 EGM was valid.

524. Respondent further submits that the delivery of the April 2002 injunction was perfectly legitimate and in accordance with Kazakh law with the consequence that the Court's decision to validate it was correct.

525. Respondent further disputes Claimants' allegation that the Court violated the law with respect to the issue of the harm to the partnership discussed at the EGMs, following the cancellation of the Investment Contract. Claimants indeed allege that the judge ignored the rule of article 34 of the LLP Law that only actual and incurred harm can justify a compulsory redemption, not purely potential harm.

526. According to Respondent, and as confirmed by their Civil Expert Report, there is no requirement in the LLP Law for evidence of "*harm*" or "*damage*" to be presented at the EGM. It cannot therefore be a requirement for a valid resolution of compulsory redemption.

527. Respondent further alleges that Claimants are unable to demonstrate that the Court decision on the compulsory redemption was incorrect. Indeed, the cancellation of the Investment Contract had caused KaR-Tel losses in two ways. First KaR-Tel had to pay back 34,500,000 Tenge, as well as fines and default interest bringing the total amount to be paid to approximately USD 389,000. Second, KaR-Tel lost the benefit of the Investment Contract for the future.

528. Respondent further alleges that Claimants caused KaR-Tel to purchase outdated equipment and mobile telephone handsets at inflated prices and that this also generated damage for KaR-Tel, as evidenced by the Court-appointed forensic merchandising experts. The only complaint that Claimants expressed on this report is that it only established probable prices, not certain prices. According to Respondent, it is notable in relation to the issue of the transactions with Telsim that Mr. Agilönü gave evidence to the Tribunal in which he accepted that he had not conducted any tenders for equipment whilst General Director of KaR-Tel.

529. In this framework, it is also Respondent's contention that the Court rightly rejected the argument put forward by Claimants that they could not be blamed for these transactions since they were entered into with Telsim and not Rumeli, at a time when Telsim was not a shareholder. Indeed, each of the transactions had been made conditional upon Rumeli's approval.

530. Respondent further points out that for its Procedural Law Expert, it is beyond dispute that the multi-million dollars of harm caused to KaR-Tel are to be qualified as significant.

531. Respondent finally disputes Claimants' allegation that the Court violated the law to the extent that the harm caused to KaR-Tel was not attributable to Claimants or could also have been attributed to the local partner. Claimants' position is indeed that they did not owe any obligations to the Investment Committee, such obligations being only owed by KaR-Tel; a member of an LLP is not responsible for the obligations of the LLP by virtue of article 44 of the LLP Law. Respondent disputes this and submits that the Kazakh Courts correctly decided that the obligations of KaR-Tel to make investments under the Investment Contract were directly related to Claimants' obligations to invest under the Foundation Agreement. The Courts held that the reason for the failure to file the reports was that the companies controlling KaR-Tel recognized that KaR-Tel had not complied with its obligations. Thus, the Investment Contract could validly be cancelled for failure to invest.

532. The Courts further found that KaR-Tel's General Manager was at all times a person controlled by Rumeli and Telsim. Therefore, the failure to file the reports was attributable to Claimants. This is confirmed by Respondent's Procedural Expert Report.

533. On the other hand, Telecom Invest being a silent partner, it could not be considered equally responsible for the failure of KaR-Tel to comply with its obligations.

534. With respect to the issue of the reasons to buy out a participant, Respondent submits that their Civil Law Expert dismissed as being without any basis in the LLP Law, Claimants' contention that any allegation of harm or damage caused to the LLP, which was not

explicitly discussed at the EGM at which the resolution was passed, is *ultra vires* and may not be entertained by the Court. Indeed, as the compulsory redemption is a judicial procedure, the proper place to bring and consider evidence of harm or damage caused to the partnership is before the Court.

535. Respondent further contends that the Court's approach to the expert evidence was appropriate. It is correct that Judge Begaliev said that opinions of Professor Suleimenov and the other professors were not accepted, and that "*the indicated individuals do not have the right to interpret the law*." This is conform to Kazakh law, according to which legal opinions are considered as evidence, which judges are entitled to reject.

536. According to Respondent, the only real allegation of denial of justice by Claimants precisely concerns Judge Begaliev who would have been corrupted. The allegation against Judge Begaliev is based only on the evidence of Mr. Agilönü. Respondent makes the following submissions on this issue:

- this is a very serious allegation, which requires the Tribunal to look at the matter very carefully. In addition, Mr. Agilönü is the leading factual witness for Claimants. If the Tribunal concludes that he lied to the Tribunal with respect to Judge Begaliev, then this should have an adverse effect on the remainder of his evidence;
- the allegations were raised very late in the proceedings;
- there is not a single contemporary document supporting the allegations. Mr. Agilönü reported back to Claimants' management located in Turkey. It is reasonable to suppose, if his evidence was truthful, that the discussions would have been documented particularly since he says he was following management's instructions;
- had Judge Begaliev done any of the acts complained of, Claimants would have asked for his removal from the case or raised his conduct by way of an appeal from the decision of June 6 , 2003. None of this happened;
- Mr. Agilönü was an unsatisfactory witness. Indeed, his evidence was incredible:

- for the first time he introduced the suggestion that another judge had asked for a bribe but he was not prepared to name him;
- for the first time, once he had admitted he spoke limited Russian at the time, he alleged that all his dealings with Judge Begaliev had been through an interpreter, whom he also refused to name;
- it is inconsistent for Judge Begaliev to have told Mr. Agilönü on one day that he would decide the case in Claimants' favor for money, and the next to have told Mr. Agilönü that he had been ordered by the highest authorities to decide in the other way;
- although his witness statement speaks of Judge Begaliev receiving instructions from the highest authorities, implying the Presidential family, in cross-examination, Mr. Agilönü admitted that he had understood merely that it was someone more senior than Judge Begaliev at Almaty City Court;

- Judge Begaliev gave his evidence in a calm and measured manner;
- Judge Begaliev's evidence was entirely consistent with the expert evidence given on Kazakhstan law. Claimants did not identify a single aspect of Judge Begaliev's judgment that was only explicable on the basis that he was corrupt and rendered a dishonest judgment;
- finally, the pantomime with the non-existent photograph of Judge Begaliev wearing a dark suit and sitting behind a table with sandwiches on it did no more than highlight the hopelessness of Claimants' case and the inappropriate lack of seriousness with which they treat making such grave allegations against a serving judge.

537. Respondent further notes that, in their Memorials, Claimants did not make any direct criticism of the Supreme Court's judgment, though it was to be inferred that they applied the same criticisms to it as those they applied to the judgment of the Almaty City Court.

538. In the course of his evidence before the Tribunal, however, Mr. Agilönü, for the first time in this arbitration, alleged that a Justice of the Supreme Court had also solicited a bribe from him in order to determine the appeal in Claimants' favor. However, Mr. Agilönü refused to give the name of the judge and further details. Therefore, the Tribunal is invited to draw the inference that Mr. Agilönü is not telling the truth on this issue. The nature of the allegation makes it inherently improbable, the circumstances and timing in which it was first raised and the conduct of Claimants' counsel in respect of it only heighten the sense that it is a further lie.

539. Respondent finally alleges that none of the critics made by Claimants against the decision of the Presidium of the Supreme Court has any merit:

- Claimants were notified of the hearing. It is notable that they made no attempt to protest against this alleged further failure of the Kazakh postal service;
- pursuant to article 82 of the Kazakh Civil Code, it was within the Presidium's power to determine the price for the compulsory redemption since there had been no agreement between the parties. Claimants have not adduced any expert evidence on this issue and the expert evidence of Professor Mukhamedshin and Professors Kaudyrov and Klimkin was unchallenged in cross-examination;
- the valuation of the Presidium was correct. It based its valuation decision on several expert reports prepared by a number of different entities, including international audit firms and the independent and Court-appointed Forensic Examination Center of the Ministry of Justice of the Republic. Moreover, the Expert Valuation prepared by Navigant Consulting also confirms the valuation provided to the Kazakh Courts. He demonstrated also that, despite the superficial attraction of Claimants' attempts to draw a comparison between the Presidium's valuation and the price paid by VimpelCom, the two are reconcilable.

540. Respondent finally alleges that, even if the Presidium's decision could be potentially expropriatory, which is denied, it is plain that Claimants received fair compensation for

their shareholdings, such that one of the key requirements for expropriation is not present, or they would not have suffered any loss as a result.

8. The alleged attempts to pay Claimants to go away

541. It is true that in April 2003, Mr. Seysembayev attempted to purchase Claimants' 60% interest in KaR-Tel for USD 12 to 15 million. Claimants refused the offer. However, Claimants misstate the chronological sequence of the events. The offer made by KaR-Tel in the amount of USD 3,000 was not made before but after Mr. Seysembayev. Indeed, KaR-Tel's offer was after the judgment of the Almaty City Court and Claimants failed to appeal to the Supreme Court. KaR-Tel's offer was thus made at a time when Telecom Invest knew that KaR-Tel was insolvent.

542. Respondent further points out that both these offers were made considerably after the sale of Telecom Invest to Mr. Seysembayev. There is therefore no basis for alleging that these offers were in any way made by either Respondent or "*members of President Nazarbayev's empire*."

543. According to Respondent, a final link to the President's family, and supposedly therefore, to Respondent's liability, was the alleged offer by Arlan/Altel in August 2004 to purchase Claimants' shares in KaR-Tel for USD 20 million. Claimants allege that this was made on behalf of Respondent since one of the President's daughters has an interest in Altel and that Kazakhtelecom does too.

544. Respondent disputes that allegation :

- Altel is only partially owned by Kazakhtelecom;
- the documents invoked by Claimants in support of their allegation are irrelevant;
- even if Claimants were correct that an offer was made at the meeting held on August 24, 2004, it is a significant step to further allege that it was in some way made on behalf of Respondent and that it would constitute an admission of a violation of Respondent's obligations under international law.

545. According to Respondent, it was alleged that Mr. Orazbekov had made this offer at a meeting with Mr. Akgün in Kazakhstan. However, Mr. Akgün's evidence before the Tribunal on this issue was riddled with inconsistencies:

- he accepted that there was no mention in the letter from Mr. Umirzhanov, the President of Altel, to Mr. Tasalin, to anything relating to KaR-Tel, only to opportunities for collaboration in the telecommunications sector;
- his explanation of the letter was not credible. Mr. Akgün stated that the first contact had been by telephone. He said" This letter just makes for us possible to visit" but he then accepted that he did not need a visa to travel to Kazakhstan;
- he accepted that his own letter in response equally made no mention of KaR-Tel, though his explanation for it being written in English was that this was company policy;
- in contrast to this, Mr. Akgün then suggested that the memorandum from him to TSDIF was originally in Turkish, not English. No Turkish version of this document has ever been provided by Claimants, unlike in relation to all other Turkish documents in this arbitration, and it is curious that the supposed translation is radically different from all other translations provided by Claimants;
- he accepted that the offer he alleges he received from Mr. Orazbekov was never put into writing;
- Mr. Akgün then alleged for the first time that Mr. Umirzhanov had also made the same offer to purchase Claimants' shareholding for USD 20 million. This was not alleged in Claimants' Memorials or in Mr. Akgün's witness statement.

546. On the contrary, Mr. Orazbekov gave evidence to the Tribunal that he had been asked to have a meeting with some Turkish people to discuss investment opportunities, but that they had not wanted to discuss this at all and had instead just complained of the problems they were having in Kazakhstan. He was also clear that he did not have the authority to commit Arlan to pay USD 20 million on any contract.

547. According to Respondent, the Arbitral Tribunal should accept Mr. Orazbekov's evidence as being inherently more credible than Mr. Akgün's inconsistent and shifting account. The Tribunal is also invited by Respondent to find that Claimants have not established how any such offer, even if made, could possibly be attributable to Respondent as a matter of international law.

9. The sale of KaR-Tel to VimpelCom

548. According to Respondent, Claimants' attempt to contrast the figure paid by VimpelCom with the valuation of the Presidium is not proper for the following reasons:

- no account can be taken of what a private company wishes to pay to acquire an asset in an open tender process;
- VimpelCom was bidding in an open tender for a business that might well have a significant specific value for VimpelCom, but which could not be realized by any other entity;
- the Presidium's valuation was for 60% of KaR-Tel in April 2002. VimpelCom's bid was for 100% of KaR-Tel in late August 2004;
- VimpelCom bid for a completely different entity than the insolvent KaR-Tel of April 2002. Indeed, KaR-Tel had been operated and restructured by Mr. Yerimbetov.

549. According to Respondent, thanks to the efforts of Mr. Yerimbetov:

- KaR-Tel overall debt had been reduced by over USD 101 million, whilst at the same time significant investments had been made in new technology;
- the network had been expanded considerably;
- KaR-Tel had over 600,000 real subscribers, as opposed to 150,000 alleged subscribers;
- KaR-Tel had a market share in Kazakhstan of 31%, compared to less than 20% in 2002;
- KaR-Tel had a fast growing and very successful prepay product;

- KaR-Tel had a modern billing platform.

550. With respect to KaR-Tel's debt, Respondent alleges that Mr. Yerimbetov was able to negotiate very hard with Motorola and to obtain a restructuring deal whereby the Loan would be discounted to USD 35 million because:

    - he could demonstrate to Motorola that the Uzans had nothing to do any more with KaR-Tel;
    - he had realized that the 3-year limitation period for bringing a claim would expire; and
    - he had seen that Motorola had already written off from its accounts the debt owed by KaR-Tel.

551. Mr. Yerimbetov further persuaded KazKommertz Bank to lend KaR-Tel the USD 35 million required to repay Motorola.

552. Respondent finally points out that KaR-Tel filed a claim for the losses suffered as a result of Claimants' actions related to the un-commercial transactions with Telsim. On 6 July 2004, the Almaty City Court awarded KaR-Tel damages of USD 41.8 million. Claimants did not appeal the judgment but have so far failed to pay any part of the sum. However, this enabled Mr. Yerimbetov to set-off the alleged debts towards Rumeli and Telsim.

10. The conspiracy theory

553. According to Respondent, the first element of Claimants' case was a conspiracy to expropriate their investments in Kazakhstan. However, this conspiracy case was, and remains, a fiction.

554. In this respect, Respondent points out that it presented a number of witnesses who, on Claimants' case, either knew of the purported conspiracy or even participated in it. It was pointed out in Respondent's opening submissions and twice subsequently, that fairness required that the conspiracy case be put to any witness who, it was said, was involved in the alleged wrongful acts. However, Claimants studiously declined to put

their allegations, or the facts underlying those allegations to Respondent's witness. The reason for this failure is clear: there is no discernible factual basis for any of the allegations made by Claimants.

555. According to Respondent, faced with the prospect that their case was lost, Claimants resorted to bizarre tactics:

- they concocted a dishonesty case against a serving judge, Jugde Begaliev, without any ground;
- they alleged that Respondent had taken steps to prevent Claimants from obtaining legal advice on Kazakhstan law, whereas the truth was that Claimants were unable to find anyone who was prepared to support their case;
- they alleged that Professor Didenko had been forced to write his academic article "*contradicting in violation of the most fundamental rules of ethics, his own position in the previous litigation against the local partner in Kazakhstan*," whereas this article is a balanced opinion in which Professor Didenko alters some, but by no means all, of his views. He still stands by certain of his criticisms of the approach taken by the Almaty City Court. Moreover, his article was published in 2003, over two years before these arbitral proceedings were commenced;
- they allege that Respondent was seeking to "intimidate" Claimants by copying correspondence to someone in Salans' offices in Kazakhstan: again this was a groundless allegation.

556. With respect to Claimants' allegation that an adverse inference should be drawn by the fact that Respondent did not call Mr. Kulibayev, Respondent points out that there is nothing in this point:

- no prima facie case has been disclosed which requires a response from Mr. Kulibayev;
- Respondent does not have the power to compel Mr. Kulibayev; he holds no position in the Republic of Kazakhstan Government;

- Respondent did call as witnesses a number of persons who had contact with Mr. Kulibayev. In particular, they called Mr. Abuov, who was alleged by Claimants to be the "right hand man" of Mr. Kulibayev. He testified that Mr. Kulibayev did not cause the Investment Committee to cancel the Investment Contract.

III. ON THE PURPORTED BREACHES BY RESPONDENT OF ITS OBLIGATIONS

A. The legal framework

1. Claimants' position

557. According to Claimants, their investment is protected by the BIT between Turkey and the Republic, more specifically by virtue of its Articles II and III.

558. Article II provides that:

> *"(1) Each Party shall permit in its territory investments, and activities associated therewith, on a basis no less favorable than that accorded in similar situations to investments of investors of any third country, within the framework of its laws and regulations.*
>
> *(2) Each Party shall accord to these investments, once established, treatment no less favorable than that accorded in similar situations to investments of its investors ('National Treatment clause') or to investments of investors of any third country, whichever is the most favorable ('MFN clause')."*

559. Article III provides that:

> *"(1) Investments shall not be expropriated, nationalized or subject directly or indirectly, to measures of similar effect except for a public purpose, in a non-discriminatory manner, upon payment of prompt, adequate and effective compensation, and in accordance with due process of law and the general principles of treatment provided for in Article II of this Agreement.*
>
> *(2) Compensation shall be equivalent to the real value of the expropriated investment before the expropriatory action was taken or became known. Compensation shall be paid without delay and be freely transferable."*

560. According to Claimants, in view of the MFN clause contained in the BIT, Respondent's international obligations assumed in other bilateral treaties are applicable to the instant case. Such obligations include:

- the obligation to ensure the fair and equitable treatment of the investments of investors of the other Contracting Party;
- the obligation to accord full protection and security to such investments;
- the obligation not to impair by unreasonable, arbitrary, or discriminatory measures the management, maintenance, use, enjoyment, or disposal of such investments.

561. Claimants also consider that their investment is protected by the FIL, and more specifically its Articles 7 and 9.

562. Article 7 provides that:

> *"1. Foreign investments may not be nationalized, expropriated or subjected to any measures which have the same consequences as nationalization and expropriation (henceforth, expropriation), except for the cases where such expropriation is carried out for public interests in compliance with the appropriate legal procedures and carried out without discrimination with the payment of immediate, adequate and efficient compensation.*
>
> *2. The compensation must be equal to the fair market value of the expropriated investments at the moment when the investor learnt of the expropriation."*

563. Article 9(2) provides that:

> *"[l]osses inflicted by any illegal suspension, restriction or termination of the business activities of a foreign investor by the actions of the bodies and persons named in Article 8 of this Law, shall be compensated to the foreign investor." The persons named in article 8 include, inter alia, state executive bodies, law enforcement bodies, and state officials at any level.*

564. Finally, according to Claimants, Respondent is also obliged to act in accordance with "*such rules of international law as may be applicable*," which includes customary international law.

565. Given the foregoing, it is Claimants' position that the acts and omissions of Respondent, individually and collectively, constitute breaches of its obligations:

- to afford fair and equitable treatment;
- not to deny justice;
- to ensure full protection and security;
- not to impose unreasonable, arbitrary and/or discriminatory measures;
- not to expropriate absent certain specific conditions.

2. Respondent's position

566. Respondent submits that pursuant to Article 42(1) of the ICSID Convention, the law applicable to this arbitration is Kazakh law, supplemented by certain principles of international law.

567. Referring to the five international standards invoked by Claimants in their memorial (fair and equitable treatment, denial of justice, full protection and security, no unreasonable, arbitrary or discriminatory measures and expropriation), Respondent submits that there is very little substantive dispute between the parties on the test for each of them, except that these standards are probably less onerous than Claimants suggest.

568. More precisely, Respondent does not dispute that its actions are to be measured against international standards and broadly accepts the applicability of the particular standards set out by Claimants. Rather, it is Respondent's case that, when applied to the real facts, none of the above legal grounds for complaint is even close to being made out.

569. Respondent accepts that it owed Claimants a duty to accord them fair and equitable treatment with respect to their investments and a duty not to unlawfully expropriate such investments. It denies that it breached either of those duties.

570. Respondent considers that, on a proper interpretation, the duty to accord fair and equitable treatment includes the other duties set out by Claimants. According to Respondent, in dividing the various duties, Claimants have unreasonably sought to create the impression that Respondent owed Claimants substantially greater duties than did it in fact. Therefore, Respondent does not accept that each such duty is a separate obligation.

571. Respondent further accepts that under customary international law, Claimants were entitled to the minimum customary standard, and that this includes the denial of justice. However, according to Respondent, the obligations stated by Claimants exceed that minimum international standard.

572. Respondent also accepts that the Turkey-Kazakhstan BIT imposes certain obligations upon it and that the provisions this case is concerned with are Articles II and III. It also accepts that, under the MFN clause, it was obliged to treat Claimants in accordance with any more favourable treatment afforded to nationals of other countries.

573. However, for Claimants to be afforded that treatment, they had to meet the conditions required of those other nationals. In this respect, Respondent alleges that Claimants have not identified the specific BITs upon which they rely to found their claims to the various obligations. The BITs to which Kazakhstan is not a party are not relevant.

574. Finally, each of the obligations asserted by Claimants must be interpreted by reference to the specific terms, context and aims of each individual BIT. To interpret the obligations claimed by Claimants that are not in the Turkey-Kazakhstan itself, Respondent will refer only to the United Kingdom-Kazakhstan BIT. This contains all of the obligations Claimants allege they were owed and Respondent accepts that, were Claimants United Kingdom companies, the standards of that treaty would be applicable to them.

3. The applicable standards: Decision of the Arbitral Tribunal

575. The parties agree that in view of the MFN clause contained in the BIT, Respondent's international obligations assumed in other bilateral treaties, and in particular the United Kingdom-Kazakhstan BIT, are applicable to this case, such obligations including:

- the obligation to ensure the fair and equitable treatment of the investments of investors of the other Contracting Party;
- the duty not to deny justice;
- the obligation to accord full protection and security to such investments; and
- the obligation not to impair by unreasonable, arbitrary, or discriminatory measures the management, maintenance, use, enjoyment, or disposal of such investments.

The parties also agree to a large extent on the test applicable for each of these obligations, as we will see below.

576. Whether a breach of one of the above standards can be attributed to the State will be determined on the basis of the principles laid down in the ILC Articles. According to Article 2 of the ILC Articles:

> *"there is an internationally wrongful act of a State when conduct consisting of an action or omission : a) is attributable to the State under international law; and b) constitutes a breach of an international obligation of that State."*

577. According to Article 4:

> *"1. The conduct of any State organ shall be considered an act of that State under international law, whether the organ exercises legislative, executive, judicial or any other functions, whatever position it holds in the organization of the State, and whatever its character as an organ of the central government or of a territorial unit of the State.*
>
> *2. An organ includes any person or entity which has that status in accordance with the internal law of the State."*

578. Article 5 further provides that:

> *"[t]he conduct of a person or entity which is not an organ of the State under Article 4 but which is empowered by the law of that State to exercise elements of the governmental authority shall be considered an act of the State under international law, provided the person or entity is acting in that capacity in the particular instance."*

579. According to Article 12:

> *"[t]here is a breach of an international obligation by a State when an act of that State is not in conformity with what is required of it by that obligation, regardless of its origin or character."*

580. Finally, according to Article 13:

> *"[a]n act of State does not constitute a breach of an international obligation unless the State is bound by the obligation in question at the time the act occurs."*

B. Fair and equitable treatment

1. Claimants' position

a) The Standard

581. According to Claimants, Respondent's obligation to afford "*fair and equitable treatment*" is imposed not only by customary international law but also by virtue of the MFN clause of the BIT.

582. The standard can indeed have two meanings. It can be given its plain meaning, i.e., fairness and equity of treatment as these terms are generally understood in non-technical terms. Accordingly, tribunals would determine whether "*in all the circumstances [of the case] the conduct in issue is fair and equitable or unfair and inequitable*."[31] Alternatively, this standard can mean that beneficiaries are assured treatment commensurate to the international minimum standard for investors.

583. The standard is intentionally vague in order to give arbitrators the possibility to articulate the range of principles to achieve the treaty's purpose in particular disputes. As it emerges from the arbitral case law, the principle encompasses, *inter alia*, the following concrete principles:

- the State must act in a transparent manner (Metalclad, Tecmed);
- the State is obliged to act in good faith (Tecmed, Waste Management);

---

[31] F.A. Mann, *British Treaties for the Promotion and Protection of Investment*, 52 British Y.B. Int'l L, 1981, pp. 241, 244 [hereinafter F.A. Mann, *British Treaties*].

- State conduct cannot be arbitrary, grossly unfair, unjust, idiosyncratic, discriminatory, or lacking in due process (Waste Management);
- the State must respect procedural propriety and due process (Amco, Azinian, Fabiani, Brown).

584. Fair and equitable treatment thus requires that the State act in a transparent manner, namely that there is no ambiguity in the legal framework relating to the investor's operations and that the decision affecting the latter be traceable to that legal framework.

585. As confirmed by *Metalclad*,[32] transparency requires that the investor be informed about the laws and administrative or other binding decisions before they are imposed. In the same vein, the tribunal in *Tecmed*[33] stated that the fair and equitable treatment provision requires that the investor's basic expectations should not be affected by a State's conduct, which must be consistent, free from ambiguity, and completely transparent in its relation to the foreign investor. According to the tribunal in *Tecmed*, the foreign investor "*also expects the host State to act consistently, i.e. without arbitrarily revoking any preexisting decisions or permits issued by the State that were relied upon by the investor to assume its commitments as well as to plan and launch its commercial and business activities*."[34]

586. According to Claimants, arbitral tribunals – including *Tecmed* and *Waste Management* – also have confirmed that good faith is inherent in fair and equitable treatment.

587. Taking together the arbitral jurisprudence, Claimants allege that the *Waste Management*[35] tribunal best summarized the standard requiring that a State act in a manner affording fair and equitable treatment to foreign investment:

---

[32] *Metalclad Corporation v. United Mexican States* (ICSID Case No. ARB (AF)/97/1), Award of August 30, 2000 [hereinafter *Metalclad*].

[33] *Técnicas Medioambientales Tecmed S.A. v. United Mexican States* (ICSID Case No. ARB(AF)/00/2), Award of May 29, 2003, para. 154 [hereinafter *Tecmed*].

[34] *Id*., para. 154.

[35] *Waste Management, Inc. v. United Mexican States* (ICSID Case No. ARB(AF)/00/3), Award of April 30, 2004, para. 98 [hereinafter *Waste Management v. Mexico*].

"[the] minimum standard of treatment of fair and equitable treatment is infringed by conduct attributable to the State and harmful to the claimant if the conduct is arbitrary, grossly unfair, unjust or idiosyncratic, is discriminatory and exposes the claimant to sectional or racial prejudice, or involves a lack of due process leading to an outcome which offends judicial propriety – as might be the case with a manifest failure of natural justice in judicial proceedings or a complete lack of transparency and candor in an administrative process. In applying this standard it is relevant that the treatment is in breach of representations made by the host State which were reasonably relied on by the Claimant."

b) Application to the facts of the case

588. According to Claimants, the facts of the case clearly demonstrate that Respondent has not treated Claimants' investment fairly or equitably:

- the Investment Committee did not even wait until its own extended deadline for the filing of the reports before terminating the Investment Contract on March 25, 2002;
- the Investment Contract was terminated despite the fact that Claimants submitted the requested reports on March 25, 2002;
- the Investment Committee had the obligation to first suspend the Investment Contract;
- the Investment Committee terminated the Investment Contract with the utmost lack of good faith and in clear violation of the international obligations of Respondent contained in the Bilateral Investment Treaty. The termination was unreasonable, arbitrary, grossly unfair, unjust, idiosyncratic and violated the legitimate expectation of Claimants.

589. According to Claimants, the above undisputable breaches of the Bilateral Investment Treaty are alone sufficient to justify a ruling against Respondent, irrespective of the subsequent breaches committed by Respondent and irrespective of the collusion between Respondent and powerful local partner.

590. Claimants further point out the following breaches of the Bilateral Investment Treaty by Respondent:

- the process that led to the termination of the Investment Contract and to the decision of the Working Group was anything but transparent;
- Claimants were not granted an opportunity to present their position either before the Investment Committee or the Working Group;
- Respondent's Courts and enforcement authorities ousted Claimants from KaR-Tel prior to a determination of the merits of the dispute;
- Respondent's Courts favored the local partner by confirming the appointment of the new General Manager;
- the decision ordering the compulsory sale of Claimants' shareholding for USD 3,000 is particularly outrageous;
- Respondent initiated criminal proceedings in total bad faith;
- Respondent recognized that it had treated Claimants unfairly and inequitably when it offered Claimants, through a controlled entity, USD 20 million to acquire its interest in KaR-Tel.

2. Respondent's position

a) The standard

591. Respondent accepts that the duty of fair and equitable treatment was owed to Claimants under the most favored nation clause of the Turkey-Kazakhstan BIT in conjunction with the UK-Kazakhstan BIT. The substance of that obligation, however, is different from that stated by Claimants.

592. Respondent accepts that in accordance with this principle, it was required to act in good faith and in a transparent manner, and that its conduct could not be arbitrary, grossly unfair, unjust, idiosyncratic, discriminatory or lacking in due process. However, Respondent does not accept Claimants' standard, which is too high. For Respondent, the fair and equitable treatment standard is a minimal one and moreover, for a breach of the standard to occur, Respondent's conduct should have fallen below that minimal standard in a manner that "*shocks, or at least surprises, a sense of juridical propriety*" (*ELSI*).

593. In this respect, Respondent alleges that the interpretation must follow the standard rules. Awards based on NAFTA are in principle inapplicable since not only is the wording of Article 1105 NAFTA different to Article II of the UK-Kazakhstan BIT but moreover, as Schreuer stated, it does not follow that the result reached in the NAFTA context should also necessarily be applied to other treaties, notably to BIT's because of the special features of Article 1105(1). Respondent will therefore rely upon elements of awards under NAFTA only insofar as they are also applicable to the relevant BIT.

594. Respondent further alleges that to determine the extent of the fair and equitable treatment obligation in this case, it is necessary to construe the specific part of Article II(2) of the UK-Kazakhstan BIT. This should be done in accordance with the accepted rules of treaty interpretation, as applied in the *Saluka* decision.

595. As stated in *Saluka*, the ordinary meaning of fair and equitable treatment "*can only be defined by terms of almost equal vagueness.*" It includes "*just, even-handed, unbiased, legitimate.*"[36]

596. Moreover, its context in an international legal instrument must indicate that it refers to international standards. In order for the standard to be breached, the investor must therefore have been "*treated in such an unjust or arbitrary manner that [it] rises to the level that is unacceptable from the international perspective" (S.D. Meyers*[37]). Its context in an international legal instrument also indicates that it should not, without express indication, overrule fundamental principles of international law. Any determination of breach of the provision "*must be made in the light of the high measure of deference that international law generally extends to the right of domestic authorities to regulate matters within their own borders*."[38]

---

36 *Saluka v. Czech Republic,* Partial Award of March 17, 2006, paras. 296 to 309.

37 *S.D. Myers v. Canada* (UNCITRAL), First Partial Award of November 13, 2000, para. 263 [hereinafter *S.D. Myers v. Canada*].

38 *Id.,* para. 263.

597. The context of the fair and equitable treatment provision does not, therefore, raise the obligation upon Respondent beyond the international minimum standard of protection.

598. As in *Saluka*, one of the principal aims of BITs is to encourage international investment. There is therefore a need for a balanced approach: if the protection of the foreign investors were exaggerated, the host State might be dissuaded from admitting all foreign investors.

599. Furthermore, the stated goals of the UK-Kazakhstan BIT are not to ensure extending and intensifying economic relations like in *Saluka*. Its object and purpose is therefore relevant only to the extent that Respondent is required to do no more than that which does not deter foreign capital by providing disincentives to investment. It therefore only sets a floor of minimum treatment that must be accorded to foreign investors, regardless of the treatment accorded to nationals.

600. Respondent also alleges that a fair and equitable treatment standard that does no more than not to deter foreign investment is related to the expectations of the investors. For Respondent to be bound to respect those expectations, they must be legitimate and reasonable in the light of the circumstances. They should be limited to a base level and should not in any case include an expectation to be able to act contrary to public interest.

601. According to Respondent, the reasonable and legitimate expectations of an investor, determined in accordance with the above interpretation, would always include that the State "*implements its policies bona fide by conduct that is, as far as it affects the investors' investment, reasonably justifiable by public policies and that such conduct does not manifestly violate requirements of consistency, transparency, even-handedness and non-discrimination. In particular, any differential treatment of a foreign investor must not be based on unreasonable distinctions and demands, and must be justified by*

showing that it bears reasonable relationship to rational policies not motivated by a preference for other investments over the foreign-owned investment."[39]

602. They will also include that the State will not commit the delict of denial of justice by disregarding the principles of procedural propriety and due process. The State must not, therefore, act in an arbitrary or discriminatory manner. In this respect, Respondent submits that it accepts the definitions of arbitrary, unreasonable and discriminatory conduct as set out in the authorities cited by Claimants.

603. Respondent concludes that in accordance with the above, in order to succeed that Respondent breached its obligations of fair and equitable treatment, Claimants must demonstrate that its actions were "*evidently arbitrary, unjust or idiosyncratic"* or prove that they were directly or indirectly discriminated against on the grounds of their nationality. The burden of proof is on Claimants and is a high one.

604. In this context, the Tribunal should not engage in a complex review of the decisions of the State's Courts. The conduct and decisions of Respondent's Courts should only be held to fall below the minimum standard if their conduct amounted to a denial of justice.

605. Finally, Respondent alleges that:

- the various requirements of the standard are closely interrelated. For example, if the State acts in good faith and in a non-discriminatory manner, without any procedural impropriety, it follows that it is exceptionally unlikely to have acted arbitrarily;
- if the actions of the State complained of were justified, and proportionate to that justification, it cannot have acted in an unfair and inequitable manner. The only exception would be if the justification was in fact a sham.

[39] *Saluka v. Czech Republic,* Partial Award of March 17, 2006, para. 307.

b) Application to the facts of the case

606. According to Respondent, when viewed against the facts of the case, it is clear that the Republic has not in any way breached its obligations under the fair and equitable treatment principle.

607. Claimants' allegation that the Kazakhstan Supreme Court exceeded its jurisdiction and thereby breached international law is denied by Respondent. Moreover, even if there had been a misapplication of Kazakh law by the Kazakh Courts, that would not automatically rise to the level of an international wrong.

608. With respect to the criminal proceedings, Respondent alleges that they were not initiated by the Republic, that they were justified, they were not arbitrary and that in any case, they have not prevented Claimants from pursuing their rights.

3. Decision of the Arbitral Tribunal

a) The Standard

609. The parties rightly agree that the fair and equitable treatment standard encompasses *inter alia* the following concrete principles:

- the State must act in a transparent manner;
- the State is obliged to act in good faith;
- the State's conduct cannot be arbitrary, grossly unfair, unjust, idiosyncratic, discriminatory, or lacking in due process;
- the State must respect procedural propriety and due process.

The case law also confirms that to comply with the standard, the State must respect the investor's reasonable and legitimate expectations.

610. The concept "fair and equitable treatment" is not precisely defined. *"It offers a general point of departure in formulating an argument that the foreign investor has not been well treated by reason of discriminatory or other unfair measures being taken against its interest. It is therefore a concept that depends on the interpretation of specific facts for*

its content."[40] The precise scope of the standard is therefore left to the determination of the Tribunal which "*will have to decide whether in all the circumstances the conduct in issue is fair and equitable or unfair and inequitable*."[41]

611. The only aspect on which the parties differ is that for Respondent, the concept does not raise the obligation upon Respondent beyond the international minimum standard of protection. The Arbitral Tribunal considers that this precision is more theoretical than real. It shares the view of several ICSID tribunals that the treaty standard of fair and equitable treatment is not materially different from the minimum standard of treatment in customary international law.[42]

b) Application to the facts of the case

612. Claimants complain that the Investment Committee did not even wait until its own extended deadline for the filing of the reports before terminating the Investment Contract on March 25, 2002. The initial deadline of one month mentioned in the Committee's letter of February 21, 2002 was indeed extended until March 23, 2002, as was confirmed by Mr. Zverkov during his testimony. Claimants point out that March 23 was a Saturday and that since the 22nd of March was Noruz, a public holiday in Kazakhstan, the Investment Committee was certainly closed on the 23rd; and in any case, since the 23rd was a Saturday, the extension extended automatically until Monday, March 25, 2002, the first following working day. The record confirms that the reports on the implementation of the investment project for the third and fourth quarters of 2001 were faxed by Claimants on the 25th of March and subsequently delivered to the Committee on March 27.

---

[40] Peter Muchlinski, *Multinational enterprises and the law*, 1995, p. 625 [hereinafter *Muchlinski*].

[41] F.A. Mann, *British Treaties*, pp. 241-244.

[42] *Azurix Corp. v. Argentine Republic* (ICSID Case No. ARB/01/12), Award of July 14, 2006, para. 361 [hereinafter *Azurix*]; and *CMS Gas Transmission Company v. Argentine Republic* (ICSID Case No. ARB/01/8), Award of May 12, 2005, para. 284 [hereinafter *CMS*].

613. The Arbitral Tribunal notes however that even if Claimants are right that the deadline for the delivery of the reports was March 25, it remains that the filing by Claimants was only partial in that it only concerned the report for the third and fourth quarters of 2001. Claimants did not therefore comply with the requirement of the Investment Committee.

614. On the other hand, in accordance with Article 19.3 of the Investment Contract, the Investment Committee had the right to terminate the Contract in case of "*[r]efusal of the Investor to cure the reasons which have caused the decision on suspension of the Contract, or a failure to cure these reasons during the term established by Agency*." This presupposes that there had been a suspension of the Contract in accordance with the terms of Article 19.2 and the reasons for such suspension were notified.

615. The Arbitral Tribunal considers that in deciding to terminate the Contract without prior suspension, the Republic breached the Investment Contract. This was admitted by the Republic in two letters sent to the Ministry of Industry and Trade on May 14, 2003 by officials of the Ministry of Finance and the Ministry of Economy and Budget planning. Since the Investment Committee is an organ of the State, and in the particular circumstances of this case discussed above, this breach amounts to a breach of the BIT by the Republic. The decision was arbitrary, unfair, unjust, lacked in due process and did not respect the investor's reasonable and legitimate expectations.

616. Respondent's attempt to justify its failure to suspend the Contract by relying on Article 13 of the Investment Support Law is unconvincing. Although the Law grants the Investment Committee the right to terminate a Contract without first suspending the same, this provision can be supplemented by the express terms of each individual contract. Moreover, it is a general principle of international law that a State cannot rely on its internal law to invalidate its own undertakings.

617. The Arbitral Tribunal is also of the opinion that the process that led to the decision of the Working Group appointed by the Ministry of Industry and Trade on June 9, 2003 lacked transparency and due process. The Working Group was appointed in relation to the

termination of the Investment Contract, to perform the verification of the fulfillment by Kar-Tel of the terms and conditions of the Contract, including investment obligations, "*for the purpose of settlement of this issue prior to the arbitration*." The Working Group issued a three and a half pages decision, summarily reasoned, and concluded that the Contract was lawfully terminated and that there were no grounds for its restauration. The Working Group founded its decision of validation not only on Kar-Tel's non-compliance with its reporting obligations but also on various entirely different grounds than those forming the basis for the initial decision. The decision was made without Claimants having a real possibility to present their position. They were only verbally invited to a meeting just two days before the meeting of the Working Group. The meeting was to take place at Kar-Tel's offices which were under the control of Telecom Invest and from which Claimants had been previously ousted. Moreover, Claimants had been informed that criminal proceedings against Claimants' executives had been initiated on July 1, 2003, the very same day that the invitation had been extended.

618. The Arbitral Tribunal therefore considers that the process that led to the decision of the Working Group lacked transparency and due process and was unfair, in contradiction with the requirements of the fair and equitable treatment principle. Since the Working Group acted as an organ of the State, the violation amounts to a breach of the BIT by the Republic.

619. On the other hand, the Arbitral Tribunal considers that it does not have any clear evidence that the decisions of the various Kazakh Courts which have been reviewed above were wrong procedurally or substantially, or were so egregiously wrong as to be inexplicable other than by a denial of justice. As was evidenced by the legal experts who testified during the hearing, the issues that the Courts had to decide were sometimes highly disputed issues. The Tribunal has also noted that when the decisions were appealed, they were carefully reviewed by the appellate courts and sometimes partially reversed by them.

C. Denial of justice

1. Claimants' position

a) The standard

620. According to Claimants, the duty not to deny justice arises from customary international law and is a subset of the international minimum standard of treatment, *i.e.* the standard below which a nation could not fall without violating international law. It can also be considered to fall within the scope of treaty provisions providing for "*fair and equitable treatment.*"

621. It is Claimants' position that although denial of justice is "*always procedural*," it encompasses instances of politically-dictated judgments, corruption, and intimidation. Moreover, it includes cases where "*the proof of the failed process is that the substance of a decision is so egregiously wrong that no honest or competent court could possibly have given it.*"[43]

622. Tribunals have identified four types of factual circumstances where a State's conduct amounted or could amount to a denial of justice.

623. First, Courts are not the only State organs the conduct of which can amount to a denial of justice. Administrative organs can also engage the State's international responsibility by denying justice. This was confirmed in the *Amco I*[44] decision where the tribunal found that "*the mere lack of due process would have been an insuperable obstacle to the lawfulness of the revocation.*" The *Amco II* tribunal also found that "*the whole approach to the issue of revocation of the license was tainted by bad faith, reflected in events and procedures*"[45] and that therefore, even if substantive grounds existed for the revocation of the licence, the circumstances surrounding the decision made it unlawful.[46] It pointed out

---

[43] Citing Don Wallace Jr., *Fair and Equitable Treatment and Denial of Justice*, International Investment Law and Arbitration, 2005, pp. 669, 672 [hereinafter Wallace, *Fair and Equitable Treatment*].

[44] *Amco I v. Indonesia*, Award of November 20, 1984, para. 242.

[45] *Amco II v. Indonesia*, Award in the Resubmitted Case of June 5, 1990, para. 98.

[46] *Id.,* para. 99.

that there is "*no provision of international law that makes impossible a denial of justice by an administrative body.*"[47]

624. Second, as the *Azinian* tribunal stated, a denial of justice can be pleaded "*if the relevant courts refuse to entertain a suit, if they subject it to undue delay, or if they administer justice in a seriously inadequate way*"or if there is a "*clear and malicious misapplication of the law.*"[48] The latter form of denial of justice likely overlaps with the notion of "*pretense of form*" to mask an international law violation or cloak the pursuit of hidden wrongful objectives.

625. Third, tribunals have found that collusion between the State judicial authorities, and the local party-in-interest can amount to a denial of justice. In *France v. Venezuela*,[49] Mr. Fabiani was unable to enforce an arbitral award in Venezuela due to a number of judicial and political obstacles resulting from collusion between a private citizen and governmental authorities. The tribunal found that the government of Venezuela was under an obligation to "*ensure the administration of justice*" and adopted the view that a State is "*liable for the denial of justice committed by the judiciary, at least when, duly informed of the denial, the state has not undertaken any action to prevent its effect.*"

626. Fourth, tribunals have also found that collusion among branches of government can result in a denial of justice. Specifically, in *U.S. v. Great Britain*,[50] the tribunal concluded that "*[a]ll three branches of the Government conspired to ruin [an] enterprise*"; that based on the whole case, the cumulative steps taken by the State amounted to a denial of justice.

---

50 *U.S. v. Great Britain* (*Robert E. Brown* case), Award of November 23, 1923, VI Reports of International Arbitral Awards (United Nations), p. 120 [hereinafter *Robert E. Brown*].

b) Application to the facts of the case

627. According to Claimants, the following elements constitute a denial of justice:

- the Investment Committee did not even wait until its own extended deadline for the filing of the reports before terminating the Investment Contract on March 25, 2002;
- the Investment Contract was terminated despite the fact that Claimants submitted the required reports on March 25, 2002;
- the Investment Committee had the obligation to first suspend the Investment Contract;
- the Investment Committee terminated the Investment Contract with the utmost lack of good faith and in clear violation of the international obligations of Respondent contained in the Bilateral Investment Treaty. The termination was unreasonable, arbitrary, grossly unfair, unjust, idiosyncratic and violated the legitimate expectation of Claimants.

628. According to Claimants, the above undisputable breaches of the Bilateral Investment Treaty are alone sufficient to justify a ruling against Respondent, irrespective of the subsequent breaches committed by Respondent and irrespective of the collusion between Respondent and powerful local partner.

629. Claimants further allege that, in the present case, the Investment Committee's termination of the Investment Contract was unlawful and improper for the same reasons as those enumerated by the *Amco* tribunals. Indeed, the Committee unilaterally terminated the Contract abruptly and without warning and in breach of the suspension mechanism. Furthermore, the Working Group confirmed the termination on completely different grounds without an input from Claimants who were *de facto* excluded from the process. Consequently, irrespective of whether there may have been legitimate grounds for the revocation of the Contract – which Claimants deny – the whole approach leading to its termination lacked in due process. Moreover, in light of Respondent's collusion among

its various organs and with the various shareholders of the local partner, Respondent's unlawful termination of the Contract is tainted by bad faith.

630. Claimants also allege that even if Respondent's Courts decisions could be deemed to have been proper procedurally and substantially – which Claimants vigorously deny – such decisions only served to cloak Respondent's violation of international law. The substance of the Courts' decisions is so egregiously wrong as to be inexplicable other than by a denial of justice.

631. Moreover, the real parties in interest behind Claimants' local partner were various Kazakhstan officials and/or members of President Nazarbayev's family and empire. Clearly, Telecom Invest and the Investment Committee were working in tandem so as to put in place the mechanism by which Telecom Invest's parties-in-interest would maximize their financial interest, *i.e.* by forcing out Claimants.

632. Subsequently, Respondent continued to give Telecom Invest and its shareholders the necessary active support to accomplish their objectives. Respondent's Judiciary rubber stamped the improperly-convened general meeting of KaR-Tel shareholders and sanctioned the resolutions adopted thereat, notwithstanding the clear *prima facie* evidence to the contrary. Respondent's police authorities and public prosecutor's office then assisted Telecom Invest in physically ousting Claimants and their executives from KaR-Tel and eventually from Kazakhstan. Finally, by putting a USD 3,000 price tag on Claimants' 60% stake in KaR-Tel, the Kazakhstan Supreme Court assisted Telecom Invest in acquiring 100% of KaR-Tel for a derisory price, which Telecom Invest's shareholders subsequently sold to VimpelCom for the sum of USD 350 million.

633. Finally, Claimants allege that Respondent's various organs acted in concert to achieve the same end (the expropriation of Claimant's investment), in collusion with the shareholders of the local partner. Indeed, Respondent offered Telecom Invest a package of coordinated State actions, from the termination of the Investment Contract to the fixing of the price for the compulsory redemption of Claimants' stake in KaR-Tel. In a nutshell,

the investment committee terminated the Contract unlawfully, which gave Telecom Invest a pretext to adopt illegal shareholder resolutions. In turn, Respondent's Judiciary not only ratified these illegal resolutions but also the Kazakhstan Courts even went a step further by ascribing a value of a mere USD 3,000 to Claimants' multi-million dollar investment, thereby sealing the expropriation. Moreover, Respondent initiated criminal proceedings against Claimants' executives with a view to intimidate them and to force them to flee Kazakhstan and thereby abandon the defense of Claimants' interests.

2. Respondent's position

a) The standard

634. According to Respondent, denial of justice is an element of the overarching fair and equitable treatment standard of the BIT. It does not extend or further the legal basis for Claimants' claims.

635. Contrary to Claimants' allegation, Respondent points out that '*denial of justice*' has only one meaning: it refers to the failure of the administration of justice in a State to meet a certain procedural standard. It is always procedural and the substantive outcome of a proceeding is only of relevance when it demonstrates irregularities in the procedure.

636. Respondent further alleges that the four types of factual circumstances raised by Claimants are no more than examples of attribution of various actions to a State that were in denial of justice. However, for each of the methods of attribution, Claimants must meet a high standard of proof. Simply stating that it is possible that a conspiracy between the State and others can, in certain circumstances, lead to a denial of justice is not probative of that denial.

637. Respondent also alleges that Claimants' claim is based to a large extent upon a substantive denial of justice in the sense that Claimants submit that the outcome of the decisions was unfair. However, there is no concept of substantive denial of justice: "*the mere violation of internal law may never justify an international claim based on denial of*

justice."[51] The substance is only relevant where there have been "*exceptionally outrageous or monstrously grave breaches of municipal law. In such cases, ... it must be shown that "one can no longer explain the sentence rendered by any factual consideration or valid legal reason."*[52]

638. Respondent further alleges that a claim in denial of justice does not relate to a single Court, but to a Court system. It also submits that litigants are required to give the Court system every opportunity to correct a challenged decision before resorting to international tribunals. Therefore, even if Claimants were correct about the cancellation of the Investment Contract, the Working Group process, or the decisions of the Kazakh Courts, their failure to challenge at all or to exhaust the system bars them from succeeding on their claims because they have denied the Kazakh legal system the opportunity to correct the alleged errors on which they now seek to rely.

b) Application to the facts of the case

639. Denial of justice is thus only concerned with procedure. However, Claimants do not allege that they were prevented from access to the Kazakh legal system, nor that the determination of the Kazakh legal system was subject to ruinous delay amounting in effect to an exclusion from its use. Claimants could not allege this, as they have, and for the most part made use of access to all three instances of the Kazakh civil Courts.

640. Instead, what Claimants allege is that the decisions of the Kazakh Courts were wrong as a matter of Kazakh law. However, substantive outcomes are not generally relevant. In any case, it is Respondent's position that Claimants have not even demonstrated that the decisions of the Kazakh Courts misapplied Kazakh law.

641. With respect to the cancellation of the Investment Contract, it was substantially justified on the grounds given as a matter of Kazakh law. But even if Claimants were able to

[51] Charles de Visscher, *Le déni de justice en droit international*, (1935), 54 Recueil des cours 370 at 376.

[52] Jan Paulsson, *Denial of Justice in International Law*, 2005, p. 83.

establish that the termination breached Kazakh law, this would not be sufficient to amount to a denial of justice. Indeed, in order to amount to such a breach, Claimants would have to demonstrate that the Investment Committee's misapplication of Kazakh law was patently arbitrary, unjust or idiosyncratic such that it would demonstrate bad faith, which they have not done.

642. According to Respondent, Claimants must prove a procedural denial of justice and Claimants do not provide this proof. They have not even begun to establish any misapplication of Kazakh law. Their sole evidence in relation to Kazakh law comes from one of the reports submitted in the proceedings in Kazakhstan in 2003, which were all rejected by the Courts. In any case, those reports have no status in this arbitration.

643. Moreover, Professor Didenko, on whose expert report (produced before the Kazakh Courts) Claimants rely, published an article a short time after the end of the Courts' proceedings in which he expressed a different view on a number of matters at issue in this case.

644. Respondent further alleges that:

- Claimants' allegation that the Republic Judiciary was bribed is not particularized;
- with respect to the decision of the Presidium, Respondent disputes that Claimants were not notified of the hearing.

645. Moreover, it is Respondent's position that, even if Claimants would be correct about the cancellation of the Investment Contract, the Working Group process, or decisions of the Kazakh Courts being procedurally or substantively wrong, they failed to challenge those decisions in Kazakhstan, which debars them from bringing a claim for denial of justice.

646. In particular, between the cancellation of the Contract and the registration of this arbitration, Claimants made no serious attempt to challenge the cancellation, with the exception of two letters of protest. These are not sufficient to comply with the preconditions of a claim for denial of justice.

647. Respondent disputes Claimants' allegation that they were prevented from contesting the termination of the Contract by the injunction restricting access to KaR-Tel's premises and documents. This restriction was amended by the Supreme Court. It is not true that Claimants were thereafter *de facto* denied access to the premises or documents. In any case, even if they were, that did not prevent them from challenging the cancellation of the Investment Contract.

648. Likewise, Respondent points out that Claimants never challenged the findings of the Working Group.

649. In the same vein, Respondent submits that with respect to the validation of the deliberation of the April 2002 EGM, Claimants did not appeal their case to the Presidium of the Supreme Court, as was their right. Moreover, several of the contentions now advanced by Claimants were not even put in issue before the Kazakh Courts.

650. According to Respondent, the result of Claimants' failures to pursue their right to challenge the disputed decisions before the appropriate Kazakh authorities and Courts is that Claimants denied the Kazakh system the opportunity to correct any errors that there may have been. Therefore, their claim for denial of justice, and thus for breach of fair and equitable treatment, is inadmissible before this Tribunal and alternatively fails.

3. Decision of the Arbitral Tribunal

a) The Standard

651. The parties agree that the duty not to deny justice arises from customary international law and can also be considered to fall within the scope of treaty provisions provided for "*fair and equitable treatment*."

652. The parties also agree that denial of justice is always procedural. However, for Claimants, it also encompasses instances of politically-dictated judgments, corruption and intimidation and extends to cases where there is a "*clear and malicious*

misapplication of the law."[53] On the other hand, Respondent considers that denial of justice only refers to the failure of the administration of justice in a State to meet a certain procedural standard. The substantive outcome is only of relevance when it demonstrates irregularities in the procedure. In other words, a court decision will be considered a denial of justice if it was patently arbitrary, unjust or idiosyncratic such that it would demonstrate bad faith.

653. The Arbitral Tribunal does not think that there is a major difference in the parties' understanding of the concept. The standard is indeed of a procedural nature. In that sense, a court procedure which does not comply with due process is in breach of the duty. On the other hand, as pointed out by Respondent, the substance of a decision may be relevant in the sense that a breach of the standard can also be found when the decision is so patently arbitrary, unjust or idiosyncratic that it demonstrates bad faith.

b) Application to the facts of the case

654. The Arbitral Tribunal notes that the violations alleged by Claimants and allegedly constituting a denial of justice, have also been invoked by Claimants as constituting a violation of the fair and equitable treatment principle. The Arbitral Tribunal considers that these violations are better qualified and dealt with as issues falling under the fair and equitable treatment standard which also includes in its generality the standard of denial of justice. Reference is therefore made to the Tribunal's decisions at paragraphs 609 to 619, above. Consequently, the alleged violations will not be separately dealt with under the denial of justice standard.

655. The Arbitral Tribunal would like however to add that Claimants' allegation of an attempt at bribery by Judge Begaliev has been contradicted by Respondent and Judge Begaliev himself and is not supported by the record.

656. On the other hand, Respondent's allegation that Claimants have made no serious attempt to challenge the cancellation of the Investment Contract or the decision of the Working

[53] *Azinian*, Award of November 1, 1999, paras. 102-103.

Group, is unfounded as these procedures could only have been initiated by Kar-Tel. Claimants filed appeals of the court decisions each time they could, at the sole exception of the decision relating to the validation of the deliberation of the April 2002 EGM which they could have further appealed to the Presidium of the Supreme Court.

657. Claimants have argued that they were not given notice of the Presidium hearing which took place on October 30, 2003, upon Kar-Tel's appeal of September 15, 2003, to determine the sum to be paid on the compulsory redemption. Respondent challenges that statement and has produced copies of the notice of appeal, apparently also addressed to Claimants, as well as copies of notices allegedly sent by Mr. D. Shamshiev, the Manager, Secretariat of the Presidium, to counsel for Rumeli and Telsim, on October 17, 2003, advising them that a meeting of the supervisory collegium was scheduled for October 30, 2003 in connection with the court orders in the civil case on the claim by Telekom Invest and KaR-Tel against Rumeli and Telsim. No evidence of actual delivery has been submitted to the Tribunal but the Tribunal does not conclude from this that it did not take place. The Arbitral Tribunal notes in this respect that Claimants disputed for the first time in their Reply Memorial (page 52) the fact that they were given notice. There was no mention of this important and obvious point in their first memorial.

D. Full protection and security

1. Claimants' position

a) The standard

658. According to Claimants, a treatment that is not fair and equitable "*automatically entails an absence of full protection and security.*" The obligation to accord full protection and security requires the host State to exercise due diligence in the protection of foreign investments. It imposes an objective standard of vigilance and thus requires the State to afford the degree of protection and security that should be legitimately expected from a reasonably well-organized modern State.

659. According to the United Nations Conference on Trade and Development, the full protection and security standard:

> *"connotes the assurance of full protection and security for foreign investors as contemplated or required by customary international law. At the same time, the clause on full protection and security is unusual in that it contemplates protecting investment against private as well as public action, that is, the clause requires that the host country should exercise reasonable care to protect investment against injury by private parties."*

660. It is inconsequential whether the damage is caused by a member of the State forces or by a private party. In either case, the State has a "*primary obligation"* to exercise due diligence to provide adequate protection. The State's failure to comply with this objective obligation due to the mere lack of diligence is sufficient, without any need to establish malice or negligence.[54]

661. The question was addressed in the *Wena Hotels*[55] arbitration where a dispute arose out of agreements concluded between Wena Hotels and Egyptian Hotels Company ("EHC"), a State-owned Egyptian company. The tribunal found that, although it was unclear whether Egyptian officials directly participated in the seizure of the hotel, Egypt was aware of EHC's intentions in this connection and took no actions to prevent EHC from doing so. Egypt did nothing to protect Wena Hotels' investment after the illegal seizures, made no attempts to return the hotel, refused to compensate the claimant and failed to prosecute the EHC or its senior officials.

b) Application to the facts of the case

662. It is Claimants' allegation that in the present case, Respondent failed to afford Claimants' investment full protection and security. Rather, Respondent colluded with and actively supported Telecom Invest, to the detriment of Claimants. Among other actions:

---

[54] *American Manufacturing & Trading, Inc. v. Republic of Zaire* (ICSID Case No. ARB/93/1), Award of February 21, 1997, 36 ILM 1534, paras. 6.05 – 6.06 and 6.13 [hereinafter *AMT*]; and *Asian Agricultural Products Ltd. v. Republic of Sri Lanka* (ICSID Case No ARB/87/3), Final Award of June 27, 1990, paras. 76-77 [hereinafter *AAP*].

[55] *Wena Hotels Limited v. Arab Republic of Egypt* (ICSID Case No. ARB/98/4), Award of December 8, 2000, para. 84 [hereinafter *Wena*].

- Respondent's Courts ratified Telecom Invest's illegitimate resolutions adopted at an improperly-convened meeting granting its request for injunctive relief;
- the Almaty City Court validated Mr. Yerimbetov's illegitimate appointment as General Manager pending a decision on the merits;
- with the help of the Kuzet security service, Respondent enjoined Claimants from accessing the premises or data of KaR-Tel without Mr. Yerimbetov's permission;
- Claimants were not able to enforce the judgment ruling that Claimants should have access to KaR-Tel documents;
- Respondent instituted criminal proceedings against Claimants' executives as a means of exerting pressure on such individuals.

2. Respondent's position

a) The standard

663. According to Respondent, the full protection and security standard in Article II(2) of the UK-Kazakhstan BIT must be construed in accordance with the accepted rules of treaty interpretation. It is closely related to the fair and equitable standard. Previous tribunals have held that it obliges the State to provide a certain level of protection to foreign investments from physical damage and even not all physical damage. Arbitral tribunals have also held that the full protection and security obligation is one of due diligence and no more. The key criterion is that the State knows of the unlawful act and takes no action to prevent or remedy it, according to the case.

664. In *Lauder v. Czech Republic*,[56] the tribunal stated that it considered this principle to oblige the parties to:

> *"exercise such due diligence in the protection of foreign investment as reasonable under the circumstances. However, the treaty does not oblige the parties to protect foreign investment against any possible loss of value caused by persons whose acts could not be attributed to the State. Such*

[56] *Ronald S. Lauder v. Czech Republic* (UNCITRAL), Final Award of September 3, 2001, paras. 318 et seq. [hereinafter *Lauder*].

protection would amount to strict liability, which cannot be imposed to a State absent any specific provision in the Treaty."

665. The tribunal went on to state that:

> *"the investment treaty created no duty of due diligence on the part of the Czech Republic to intervene in the dispute between the two companies over the nature of their legal relationships. The Respondent's only duty under the treaty was to keep its judicial system available for the Claimant and any entities he controls to bring their claims, and for such claims to be properly examined and decided in accordance with domestic and international law…."*

b) Application to the facts of the case

666. According to Respondent, Claimants have not alleged any physical damage and have not therefore alleged a breach of the obligation of full protection and security. The allegation of favoring one shareholder over another is an allegation of unfair and inequitable treatment; and the allegation that "*in effect, Respondent took KaR-Tel away from Claimants"* is an allegation of expropriation. Claimants therefore have no proper claim that Respondent did not accord their investment full protection and security.

667. With respect to the criminal proceedings, Respondent alleges that they were not initiated by Respondent, that they were justified, that they were not arbitrary and in any case, that they have not prevented Claimants from pursuing their rights.

3. Decision of the Arbitral Tribunal

a) The Standard

668. The Arbitral Tribunal agrees with Respondent that the full protection and security standard in Article II(2) of the UK-Kazakhstan BIT must be construed in accordance with the accepted rules of treaty interpretation. It obliges the State to provide a certain level of protection to foreign investment from physical damage. In *AMT v. Zaire*[57] and in the *Wena* case,[58] ICSID tribunals have recognized that in international law, the full protection

[57] *AMT v. Zaire,* Award of February 21, 1997, 36 ILM p. 1534.

[58] *Wena v. Egypt*, Award of December 8, 2000.

and security obligation is one of "due diligence" and no more. More recently, in *Saluka*,[59] the Tribunal also decided that "*the "full security and protection" clause is not meant to cover just any kind of impairment of an investor's investment, but to protect more specifically the physical integrity of an investment against interference by use of force*."

b) Application to the facts of the case

669. Given the limited scope of the full security and protection standard, the Arbitral Tribunal considers that the violations alleged by Claimants cannot fall under it, except in respect of the allegation that with the help of the Kuzet Security Services, Respondent enjoined Claimants from accessing the premises or data of Kar-Tel without Mr. Yerimbetov's permission. The Tribunal considers however that given the factual circumstances of the case, there was no such violation.

670. Indeed, at the hearing, Respondent's witnesses confirmed that Kuzet Security Services were not acting upon instructions of the State authorities but pursuant to a contract they had concluded with Telecom Invest and therefore, upon instructions of the latter. Moreover, the record does not support Claimants' allegation that police officers were present during the enforcement procedure conducted by a bailiff.

E. <u>Unreasonable, arbitrary, or discriminatory measures</u>

1. Claimants' position

a) The standard

671. According to Claimants, Respondent also violated the BIT by impairing the operation of Claimants' investment by unreasonable, arbitrary, and/or discriminatory measures. The standard of "*reasonableness*" has no different meaning than the "*fair and equitable treatment"* standard with which it is associated. Therefore, it requires that the State's conduct bears a reasonable relationship to some rational policy, whereas the standard of

[59] *Saluka v. Czech Republic,* Partial Award of March 17, 2006, para. 483.

non discriminatory measures requires a rational justification of any differential treatment of a foreign investor.

672. Arbitrariness is a willful disregard of due process of law, an act which shocks, or at least surprises, a sense of judicial propriety.[60] A measure is discriminatory when it provides the foreign investment with a treatment less favorable than the domestic investment or than other foreign investment.

673. According to Claimants, the award rendered in *CME*[61] is highly persuasive for the purpose of this arbitration.

b) Application to the facts of the case

674. According to Claimants, Respondent violated its obligations by unreasonable, arbitrary, and/or discriminatory measures in that:

- the Investment Committee did not even wait until its own extended deadline for the filing of the reports before terminating the Investment Contract on March 25, 2002;
- the Investment Contract was terminated despite the fact that Claimants submitted the required reports on March 25, 2002;
- the Investment Committee had the obligation to first suspend the Investment Contract;
- the Investment Committee terminated the Investment Contract with the utmost lack of good faith and in clear violation of the international obligations of Respondent contained in the Bilateral Investment Treaty. The termination was unreasonable, arbitrary, grossly unfair, unjust, idiosyncratic and violated the legitimate expectation of Claimants.

---

60 *Elettronica Sicula S.p.A. (ELSI) (United States of America v. Italy)*, Judgment of July 20, 1989, 1989 ICJ Reports 15, para. 128 [hereinafter *ELSI*].

61 *CME Czech Republic B.V. v. The Czech Republic* (UNCITRAL), Partial Award of September 13, 2001, para. 612 [hereinafter *CME*].

675. According to Claimants, the above undisputable breaches of the Bilateral Investment Treaty are alone sufficient to justify a ruling against Respondent, irrespective of the subsequent breaches committed by Respondent and irrespective of the collusion between Respondent and powerful local partner.

676. Claimants further invoke the following elements as unreasonable, arbitrary, and/or discriminatory measures:

- Respondent's judiciary took decisions and actions in support of Telecom Invest's expulsion of Claimants from KaR-Tel, depriving Claimants of all the benefits and enjoyment of their investments as well as access to documents to defend themselves;
- the Working Group's treatment of Claimants' investment was also in breach of Respondent's same obligation since it was unreasonable, arbitrary, grossly unfair, unjust;
- the decisions of Respondent's judiciary were unreasonable, arbitrary and grossly unfair;
- the sole purpose of the Investment Committee's purported termination of the Investment Contract was to give Telecom Invest a basis to undermine the legal foundation of Claimants' investment;
- all following actions of Respondent were clearly intended to collude with the foreign investor's local partner. Respondent's actions were discriminatory. They were even more so discriminatory on the part of the judiciary and other organs to have evicted Claimants and then deprived Claimants of their shares on this basis as it is the local partner that had the lobbying obligations with respect to the Investment Committee, and irrespective of these obligations had the duty of assistance as shareholder;
- moreover, Respondent took such actions in favor of Claimants' local partner and to the detriment of Claimants as foreign investors despite Telecom Invest's own failure to fulfill its obligations in KaR-Tel. Indeed, pursuant to the Foundation Agreement, Telecom Invest assumed the obligation of assuring relations with the

Investment Committee; it shared the responsibility of the operations and management of KaR-Tel. Yet, Respondent's Investment Committee and Judiciary failed equally to take all of those elements into consideration;

- the fact that Claimants had no access to documents at KaR-Tel after their eviction is also plainly discriminatory;
- finally, the institution of criminal proceedings against only Turkish employees (save for one local secretary who was the secretary of Mr. Agilönü) for the alleged theft of petty cash worth a few hundred euros is discriminatory, particularly since a few thousand dollars were paid for years to employees forced on KaR-Tel by the local partner who did not even show up for work but were paid anyway upon Mr. Kulibayev's instructions.

2. Respondent's position

a) The standard

677. Respondent accepts the definition of unreasonable, arbitrary and discriminatory treatment stated by the authorities cited by Claimants. According to Respondent, in accordance with the proper interpretation of the fair and equitable treatment obligation, the standard of protection to be afforded is low. Further, any purportedly unreasonable, arbitrary or discriminatory conduct is capable of justification if it is proportionate and for a public purpose.

b) Application to the facts of the case

678. According to Respondent, Claimants have not demonstrated a *prima facie* case of any arbitrary or unreasonable or discriminatory conduct by any person or entity whose actions are attributable to Respondent.

3. Decision of the Arbitral Tribunal

a) The Standard

679. As we have noted, the parties agree with the interpretation of the standard. As the Arbitral Tribunal appropriately determined in *Saluka*, the standard of "reasonableness"

has no different meaning than the "fair and equitable treatment" standard "*with which it is associated*."[62] Reasonableness therefore requires that the State's conduct *"bears a reasonable relationship to some rational policy, whereas the standard of "non-discrimination" requires a rational justification of any differential treatment of a foreign investor*."[63]

680. Similarly, the Arbitral Tribunal in the *CMS* award stated that the standard of protection against discrimination "*is related to that of fair and equitable treatment. Any measure that might involve ... discrimination is in itself contrary to fair and equitable treatment.*[64] *The standard is next related to impairment*."[65] A measure is discriminatory when it provides "*the foreign investment with a treatment less favorable than domestic investment*."[66]

b) Application to the facts of the case

681. The Arbitral Tribunal notes that the violations alleged by Claimants and allegedly constituting unreasonable, arbitrary or discriminatory measures, have also been invoked by Claimants as constituting a violation of the fair and equitable treatment principle. The Arbitral Tribunal considers that these violations are better qualified and dealt with as issues falling under the fair and equitable treatment standard, which also includes in its generality the principle of no-unreasonable, arbitrary or discriminatory measures. Reference is therefore made to the Tribunal's decision at paragraphs 609 to 619, above.

---

62 *Saluka v. Czech Republic,* Partial Award of March 17, 2006, para. 460.

63 *Ibidem*.

64 *CMS*, Award of 12 May 2005, para. 290. See also *Saluka,* Partial Award of March 17, 2006, para. 460.

65 *CMS*, Award of May 12, 2005, para. 290.

66 *ELSI,* Judgment of July 20, 1989, para. 128.

F. Expropriation

1. Claimants' position

a) The standard

682. Both the BIT and the FIL prohibit the host State from expropriating directly or indirectly, or subjecting to measures of similar effect, any foreign investment, if certain specific conditions are not met. The circumstances under which a State may lawfully expropriate a foreign investment are limited to expropriations that are done:

- for a public purpose;
- in a non-discriminatory manner;
- in accordance with due process of law;
- upon payment of prompt, adequate, and effective compensation.

683. Moreover, it is generally accepted that a State can expropriate an investment in a number of ways, including through acts of harassment. One of the methods is when a State forces an alien to dispose of his property at a price representing only a fraction of what it would have been had not the alien's use of its property been subjected to interference by the State.

684. An expropriation may also be '*creeping*', *i.e.* a form of indirect expropriation with a distinctive temporal quality in the sense that it encapsulates the situation whereby a series of acts which are attributable to the State over a period of time culminate in the expropriatory taking of such property.[67]

685. A distinction is indeed made in public international law between two types of expropriation: either a direct and deliberate formal act of taking, such as an outright nationalization, or an indirect taking that substantially deprives the investor of the use or enjoyment of its investment, including deprivation of the whole or a significant part of the economic benefit of property.

---

[67] *Generation Ukraine, Inc. v. Ukraine* (ICSID Case No. ARB/00/9), Award of September 16, 2003, para. 20.22 [hereinafter *Generation Ukraine*].

686. Claimants further allege that although the intent of the State may play a role, such intention is not decisive. In essence, the standard for determining whether a State's conduct amounts to an expropriation is the actual effect of the measures on the investor's property.

687. Claimants finally allege that an expropriation does not have to be for the benefit of the host State for it to be unlawful. Indeed, as confirmed in *Metalclad* and *Tecmed*,[68] a State can expropriate an investment, or take measures equivalent to an expropriation in connection with an investment, for the benefit of a third party. Similarly, the *Tecmed* tribunal[69] commented that the term "expropriation" covered situations where the State actions *"transfer assets to third parties different from the expropriating State*."

b) Application to the facts of the case

688. According to Claimants, in the present case, there can be no doubt that Respondent has expropriated Claimants' investment. Each of the acts and omissions described above, individually and collectively, constitute an expropriation:

- the termination of the Investment Contract in violation of its terms was the triggering event;
- subsequently, the decision of Respondent's Courts to rubber stamp, without more, Telecom Invest's request for injunctive relief, and to replace KaR-Tel's General Manager by Mr. Yerimbetov, amounted to a de facto expropriation;
- Claimants were thus physically ousted from KaR-Tel's premises but were also excluded from the management, enjoyment, and use of their investment as such;
- Respondent's Courts subsequently expropriated Claimants' title for the further benefit of Telecom Invest, ordering the compulsory redemption of Claimants' shares in KaR-Tel;

---

[68] *Metalclad*, Award of August 30, 2000, para. 103; and *Tecmed*, Award of May 29, 2003.

[69] *Id.,* para. 113.

- Respondent's unlawful expropriation culminated in the October 2003 decision of the Kazakhstan Supreme Court, in which the compulsory redemption decision was affirmed and Claimants' 60% combined stake in KaR-Tel was valued at a mere USD 3,000.

689. In reality, according to Claimants, the parties do not dispute that Claimants' investment was expropriated. Respondent's objection that Claimant's expropriation was justified is irrelevant as Claimants are not seeking restitution or specific performance but adequate compensation. In this respect, Claimants allege that the USD 3,000 valuation of KaR-Tel by Respondent's judiciary is a defiant mockery of justice. Respondent itself recognized this fact as is evidenced by its offer, via Altel, to purchase Claimants' shares for USD 20 million.

690. Given the foregoing, Claimants submit that none of the elements of lawful expropriation has been satisfied.

2. Respondent's position

a) The standard

691. Respondent accepts that the conditions for lawful expropriation are:

- that it should take place for a public purpose;
- in a non-discriminatory manner;
- in accordance with due process of law;
- upon payment of prompt, adequate and effective compensation.

692. Respondent also accepts that expropriation can be direct or indirect and take place in a single action or a series of actions. However, Respondent submits that the intention of the State is highly relevant, although admittedly not determinative of whether or not there has in fact been an expropriation.

693. Respondent further accepts that expropriation can exist despite there being no obvious benefit to the State concerned, albeit this kind of case is exceptional.

694. Respondent finally points out that in order for an act to be an unlawful expropriation, it must have had a significant impact upon the enjoyment of the investment and must have been initiated by an act attributable to Respondent.

b) Application to the facts of the case

695. Respondent denies that it has expropriated Claimants' investment. In any case, the difficulty in which Claimants find themselves is that expropriation requires the taking of an asset belonging to the person making the claim. Claimants did not in fact make any investment, therefore, there was nothing to expropriate.

696. Additionally, the real Claimant is the Turkish State. The sums that Claimants are in fact seeking to recover are the losses that the Turkish State itself, and not Rumeli or Telsim, have suffered as a result of the collapse of the Uzan family's bank and the settlement of the ICSID claim brought against the Turkish State by Motorola.

697. Respondent further sets forth that a transfer to a third party is only an expropriation if that transfer was instigated by the State. In this respect, it is Respondent's position that Claimants have not adduced any evidence to suggest that Respondent instigated the compulsory redemption of their shares in KaR-Tel. The plain truth is that it was Telecom Invest, a private Kazakh entity, the actions of which are not attributable to Respondent, which in fact instigated that process.

3. Decision of the Arbitral Tribunal

a) The Standard

698. Article III of the BIT provides that -

> *"1. Investment shall not be expropriated, nationalized or subject directly or indirectly, to measures of similar effect expect for a public purpose, in a non-discriminatory manner, upon payment of prompt, adequate and effective compensation, and in accordance with due process of law and the general principles of treatment provided for in Article II of this Agreement.*

2. Compensation shall be equivalent to the real value of the expropriated investment before the expropriatory action was taken or became known. Compensation shall be paid without delay and be freely transferable as described in para. 2 Article 4."

699. The FIL provides that -

> *"1. Foreign investments may not be nationalised, expropriated or subjected to any measures which have the same consequences as nationalization and expropriation (henceforth, expropriation), except for the cases where such expropriation is carried out for public interests in compliance with the appropriate legal procedures and carried out without discrimination with the payment of immediate, adequate and efficient compensation.*
>
> *2. The compensation must be equal to the fair market value of the expropriated investments at the moment when the investor learnt of the expropriation."*

700. The parties agree that expropriation can be direct, that is, resulting from a deliberate formal act of taking, or indirect, that is, resulting from a series of acts which are attributable to the State over a period of time and culminate in the expropriatory taking of the relevant property.[70] The intention or purpose of the State organ is not mentioned in Article III of the BIT and the parties agree that the intent of the State is relevant to, but is not decisive of the question whether there has been an expropriation:

> *"The intent of the government is less important than the effects of the measures on the owner, and the form of the measures of control or interference is less important than the reality of their impact.... Therefore, the Tribunal need not determine the intent of the Government of Iran...."*[71]

701. The parties also agree that expropriation can exist despite there being no obvious benefit to the State concerned:

---

[70] *Generation Ukraine v. Ukraine*, Award of September 16, 2003, paras. 20-22.

[71] Georges H. Aldrich, *What Constitutes a Compensable Taking of Property? The Decisions of the Iran-United States Claims Tribunal,* 1994, 88 American Journal of International Law, p. 603; and *Phillips Petroleum Co. Iran v. The Islamic Republic of Iran*, Case No. 39, Chamber Two, Award No. 425-39-2 of June 29, 1989, 1989 WL663903, para. 97.

"Although formally an expropriation means a forcible taking by the Government of tangible or intangible property by means of administrative or legislative action to that effect, the term also covers a number of situations described as de facto expropriation, where such actions or laws transfer assets to third parties different from the expropriating State or where such laws or actions deprive persons of their ownership over such assets, without allocating such assets to third parties or to the Government." [72]

This is supported by a footnote referring to the following passage in *Metalclad*:

"Thus, expropriation... includes not only open, deliberate and acknowledged takings of property, such as outright seizure or formal or obligatory transfer of title in favour of the host State, but also covert or incidental interference with the use of property which has the effect of depriving the owner, in whole or significant part, of the use or reasonably to be expected economic benefit of property even if not necessarily to the obvious benefit of the host State."[73]

702. Whereas most cases of expropriation result from action by the executive or legislative arm of a State, a taking by the judicial arm of the State may also amount to an expropriation. In the *Oil Field of Texas* case the Tribunal held that:

"It is well established in international law that the decision of a court in fact depriving an owner of the use and benefit of his property may amount to an expropriation of such property that is attributable to the state of that court. As the French-Italian Commission held in its decision No. 136 of 25 June 1952, concerning a dispute over Italian property in Tunisia:

'La sentence rendue par l'autorité judiciaire est une émanation d'un organe de l'Etat, tout comme la loi promulguée par l'autorité législative, ou la décision prise par l'autorité exécutive. La non-observance d'une règle internationale, de la part d'un tribunal, crée la responsabilité internationale de la collective dont le tribunal est un organe, même si le tribunal a appliqué un droit interne conforme au droit international.'"[74]

---

703. The Tribunal notes also the provisions of Article 4(1) of the ILC Articles (see paragraph 577 above).[75]

704. It is a characteristic of judicial expropriation that it is usually instigated by a private party for his own benefit, and not that of the State. This is no doubt a relevant consideration, although not in itself decisive, as has already been observed. The Tribunal considers however, and Respondent indeed accepted in paragraph 259 of its Rejoinder, that a transfer to a third party may amount to an expropriation attributable to the State if the judicial process was instigated by the State.

b) Application to the facts of this case.

705. The final act of 'taking' as regards Claimants' investment (i.e. their shares in Kar-Tel) was the decision of the Presidium of the Supreme Court affirming the compulsory redemption of those shares. The Tribunal is satisfied that this decision was made "for a public purpose," namely the administration of justice and the execution of the laws of the host State. Moreover, despite the fact that the valuation of the shares was, unusually, made by the Presidium rather than by either of the inferior tribunals, there was no evidence that it was not made "in accordance with due process of law."

706. Nevertheless, for reasons which the Tribunal will discuss under the heading "Calculation Of Damages And Quantum," the valuation placed on Claimants' shares was manifestly and grossly inadequate compared to the compensation which the Tribunal there holds to be necessary in order to afford adequate compensation under the BIT and the FIL. The Tribunal accordingly holds that the expropriation by the Presidium was unlawful.

(1987), at pp. 287-291 [hereinafter *Oil Field of Texas v. Iran*]. *See* also *CCL v. Republic of Kazakhstan, SCC Case 122/2001,* Stockholm International Arbitration Review 2005:1, pp. 174-5 [hereinafter *CCL v. Kazakhstan*].

[75] *See also* the observation of Professor Christopher J. Greenwood, *State Responsibility for the Decisions of National Courts,* in *Issues of State Responsibility before International Juridical Institutions*, ed. Fitzmaurice and Sarooshi 2004, p. 57, that "the decisions of a court - at whatever level of the judicial hierarchy - are plainly imputable to the State."

707. The Tribunal further holds that the fact that the expropriation was not directly for the benefit of the State but for the benefit of Telecom Invest does not affect this conclusion, since, as the parties agree, expropriation can exist despite there being no obvious benefit to the State concerned. In this connection the Tribunal does however consider that it is relevant that the court process which culminated in the expropriation was instigated by the decision of the State, acting through the Investment Committee, to terminate the Investment Contract. This decision was taken on March 25, 2002: the following day Telcom Invest sent its notice to Kar-Tel and to Claimants calling for an Extraordinary General Meeting of shareholders of Kar-Tel to consider the harm to Kar-Tel and the compulsory redemption of Claimants' shares. This notice was sent without the decision of the Investment Committee having been communicated to Kar-Tel. In the judgment of the Tribunal, the only possible conclusion from these circumstances is that Telcom Invest and its shareholders were privy to the decision and that Kar-Tel and Claimants were not, and that this was the result of collusion between the Investment Committee on the one hand and Telcom Invest and its shareholders on the other. The Tribunal is unable to conclude with confidence that the Investment Committee foresaw or intended the court proceedings which resulted from this, although such court proceedings were, if not actually foreseen, at least reasonably foreseeable. The Tribunal is left in no doubt, however, that the court process which resulted in the expropriation of Claimants' shares was brought about through improper collusion between the State, acting through the Investment Committee, and Telcom Invest. The fact that the result may not have been intended by the Investment Committee is not decisive of the issue of expropriation. Moreover, it is beyond doubt that expropriation *was* the intended consequence of the court orders for compulsory redemption of Claimants' shares.

708. In summary, the conclusion of the Tribunal is that this was a case of 'creeping' expropriation, instigated by the decision of the Investment Committee which was then collusively and improperly communicated to Telcom Invest and its shareholders before Claimants were made aware of it, and which proceeded via a series of court decisions, culminating in the final decision of the Presidium of the Supreme Court. The decision of

the Investment Committee was moreover unfair and inequitable in itself, as the Tribunal has found.

709. Claimants, however, advanced a very much broader case than this, founded on an allegation that the entire process leading to the expropriation of their shares in Kar-Tel was brought about by a conspiracy between the shareholders of Telcom Invest, the Investment Committee, and the judges of the courts who heard the various stages of the legal proceedings, to bring about a result which benefited members of the family of the President of the Republic of Kazakhstan, and thereby indirectly the President himself. The evidence for this was mainly, if not wholly circumstantial, but it is in the nature of such an allegation that direct evidence of a conspiracy is unlikely to be available. The Tribunal has therefore considered the evidence with particular care, reminding itself that an allegation such as this must, if it is to be supported only by circumstantial evidence, be proved by evidence which leads clearly and convincingly to the inference that a conspiracy has occurred.

710. The Tribunal has before it a number of documents, mostly in the form of press reports, which tend to establish that the whole country, the whole political system and the whole economy of Kazakhstan are controlled by President Nurabayev and his family, including an article by the International Eurasian Institute for Economic and Political Research. The Tribunal was also shown a report by the UN Economic and Social Council which indicates that the judiciary is not independent and is prone to allegations of bribery, and another by the Bureau of Democracy noting that human rights are not respected and that "the constitution concentrates power in the hands of the presidency, permitting the president to control regional and local governments and to exercise significant influence over the legislature and judiciary ..."

711. It is also clear that the President's family played a role, at least behind the scenes, in relation to Kar-Tel. Investel, the first partner of Claimants in Kar-Tel, was owned to the extent of 51% by Almex. The majority owners of Almex were Timur Kulibaev and his wife Dina Kulibaeva, the President's second daughter. Almex is a major company: it is

also the major shareholder of Halik Bank, with a participation of 80.92%. Investel was later replaced by Telecom Invest whose founders were Almex (87.5%) and Mrs. Helena Goutova (12.5%).

712. The Tribunal notes that the role of the local partner was to "obtain necessary permissions and licenses from official bodies of Kazakhstan Republic (Government Investment Committee, Kazakhtelcom, etc.)." In this connection, the Tribunal recalls that in August 2002, Mr. Hakin Uzan offered to sell Claimants' shares to Telecom Invest for USD 20 million. That offer was rejected by Mr. Karibjanov, who represented Telecom Invest, and Mr. Uzan then offered to buy Telecom Invest's shares for USD 12 million. Subsequently, Telecom Invest accepted the offer and a Share Purchase Agreement was negotiated and the parties initialled it on October 13, 2002. Claimants however never proceeded to transfer the required funds. The draft Stock Purchase Agreement provided in its Article 6.2 that "the seller shall either obtain on behalf of the Company a valid investment incentive certificate, which was previously cancelled by the Investment Committee on 19 April 2002, or shall procure that the Investment Committee will have rescinded its cancellation of 19 April 2002. It is the full responsibility of the seller that the Company will have obtained the new and valid investment incentive certificate or the Investment Committee will have rescinded its cancellation of 19 April 202. The seller shall obtain the new investment incentive certificate or shall procure the rescission of the cancellation of 19 April 2002 to the full satisfaction of the Buyer within four months after the closing. The seller shall ensure in the new investment incentive certificate or in the rescission of the cancellation of 19 April 2002 that the Company and the Buyer shall enjoy exactly the same benefits as originally granted by the Investment Committee when the Company was established as if there had been no cancellation on 19 April 2002." The Stock Purchase Agreement further provided that if the seller failed to obtain the certificate or the rescission of the cancellation, Claimants would obtain a reduction of price. This clearly indicates that Telecom Invest had grounds for believing that it was able to influence the decisions of the Investment Committee. Mr. Kulibaev was indeed a former member of the Investment Committee.

713. According to Claimants, in August 2004 Altel (together with Orlon) indicated to Claimants that they were willing to purchase their 60% share for USD 20 million. Respondent disputes this and states that the meeting had another purpose. The Tribunal is unable to say which version of events is correct. One of the founders of Altel was represented by Ms. A. N. Nazarbayeva, apparently the youngest daughter of the President. Claimants also allege, but without any concrete evidence, that Orlon is owned by another daughter of the President.

714. The Tribunal further takes into account the fact that once the Investment Contract was terminated the local partner took no steps - and nor did Kar-Tel - to challenge the decision of the Investment Committee or to reinstate the Contract.

715. In these circumstances it is not in the least surprising that Claimants harbour the gravest suspicions that they are the victims of a conspiracy for the benefit of the President and his family. Indeed the material summarised above is consistent with and positively supports the Tribunal's finding that there was improper collusion between the Investment Committee and Telcom Invest with regard to the decision to terminate the Contract, although it is not necessary to decide whether this involved Mr. Kulibaev directly, which he denied, or some other means. Despite this, the Tribunal is unable on this material to conclude with the necessary degree of conviction that there was a wider conspiracy involving the President, or for his direct or indirect benefit. Nor is the Tribunal able to conclude that any of the other participants in the investment acted in such a way as to engage the international responsibility of the Republic of Kazakhstan. In particular, the Tribunal observes that in January 2003 Telcom Invest was sold to Mr. Seysembayev, who was not alleged to have any family relationship to the President, and that a number of key elements in the process leading to the expropriation took place after this date.

CHAPTER VI. COMPENSATION AND DAMAGES

I. PRELIMINARY REMARKS ON CLAIMANTS' CLAIM FOR DAMAGES

A. Respondent's position

716. According to Respondent, in the light of the foregoing, it is unnecessary for the Tribunal to consider the issue of damages. Claimants have failed to establish any breach by Respondent of its international law obligations. In any case, if it is found that the cancellation of the Investment Contract constituted a breach of Respondent's international obligation, no compensation can be awarded to Claimants because:

- first, Claimants did not make investments in the amount or the nature alleged so that they cannot claim damages for the alleged expropriation of non-existent investments;
- second, for reasons of public policy, the Tribunal should not allow Claimants to recover alleged losses connected with their fraud on KaR-Tel;
- third, in any case, it is obvious that Claimants' fraud would have been detected and used to justify the acts complained of by Claimants. Accordingly, Claimants are unable to show any damages flowing from the acts complained of against Respondent;
- finally, the reports filed in the Kazakh proceedings indicate that KaR-Tel was insolvent. Any valuation must take this fact into consideration.

B. Claimants' position

717. According to Claimants, none of these arguments is convincing:

- Claimants made a substantial multi-million dollar financial investment and contributed know-how and training so as to build a successful and growing KaR-Tel as the second GSM licensed operator in Kazakhstan;
- the manner in which the Uzan family may or may not have conducted the business of its companies in Turkey is irrelevant;

- even if Claimants' alleged fraud in Turkey "would have been detected," this does not in any way justify or somehow change anything in Respondent's wrongful conduct in breach of international law. Respondent's obligation is independent of any conduct that Respondent might seek to attribute to Claimants;
- Claimants dispute that KaR-Tel, with the only second-issued GSM license in Kazakhstan, was in any way an insolvent entity. The report filed before the Kazakhstan Courts and the Courts' conclusion in this regard form part of the denial of justice that Claimants suffered due to the Courts' blatant misapplication of Kazakhstan law. In any event, this argument cannot be sustained in the light of the fact that a year after the valuation of Claimants' shares by the Courts, Respondent offered – through Altel – to purchase Claimants' rights for USD 20 million and Vimpelcom purchased KaR-Tel for more than USD 350 million.

II. General Principles

A. The compensation in international law

1. Claimants' position

718. According to Claimants, with respect to expropriation, the BIT and the FIL both require that the investor be compensated for its expropriated investment. The Bilateral Investment Treaty establishes that "*Compensation shall be equivalent to the real value of the expropriated investment before the expropriatory action was taken or became known.*" Beside the case of expropriation, the BIT does not define the manner in which damages should be calculated in case of treaty violations other than expropriation. Therefore, it is Claimants' position that reparation should be determined in accordance with general principles of international law. Such principles are set forth in the ILC Articles. Article 31 of the ILC Articles enunciates the principle of full reparation, a principle which is confirmed by the *Chorzow Factory* decision.[76]

[76] *Case Concerning Certain German Interests in Polish Upper Silesia (Germany v Poland),* 1928 P.C.I.J. (Ser. A) No. 17, at 40 [hereinafter *Chorzów Factory*].

719. This principle of full reparation is equally applicable to calculate damages for non-expropriation breaches of treaty obligations when there has been no finding of expropriation. Since the Bilateral Investment Treaty does not define the manner in which damages should be calculated in case of treaty violations other than expropriation, an arbitral tribunal "*must accordingly exercise its discretion to identify the standard best attending to the nature of the breaches found*."[77]

2. Respondent's position

720. Respondent points out that the *Chorzow Factory* decision requires the restoration of the *status quo ante*, or compensation of the same effect. The *status quo ante* in this case would be for Claimants to hold 60% of the equity of a heavily insolvent partnership whose major creditor was actively pursuing repayment of over USD 100 million.

721. According to Respondent, if the Tribunal is minded to award damages to Claimants, it is Respondent's case that:

- the proper valuation standard is the fair market value of Claimants' investment in April 2002;
- the Analysys Report is so seriously flawed as to be worthless to the Tribunal in assessing the proper measure of compensation;
- the Navigant Report is eminently preferable to the Analysys Report, and provides clear and compelling evidence that the fair market value of Claimants' investment in April 2002 was zero.

B. <u>Valuation standards</u>

1. Claimants' position

722. According to Claimants, when assessing the compensation due following an expropriation, the Tribunal should determine the fair market value of the foreign investment so as to give full effect to the principle of full reparation set forth in *Chorzow*

[77] *CMS*, Award of May 12, 2005, para. 409.

Factory. This principle of full reparation is equally applicable to calculate damages for non-expropriatory breaches of treaty obligations. In this respect, Claimants point out that, while some tribunals have favored the guiding principle set forth in *Chorzow Factory*, other tribunals, such as in *CMS*, have preferred the fair market value approach.

723. According to Claimants, in the instant case, the "*cumulative nature*" of Respondent's breaches of its treaty obligations (other than expropriation) have resulted in the irreversible deprivation of Claimants' entire investment for which Claimants should be compensated at full market value.

724. Claimants submit that in determining the value of KaR-Tel, its expert, Analysys, rightly applied a discounted cash flow ("*DCF*") approach as this is the most "*widely accepted and highly regarded methodology used to calculate the value of cashflows being generated by a business.*" Analysys dismissed the net book value approach ("*NBV*") as "*particularly inappropriate in the case of a mobile operator, where the business model is one of heavy investment to establish an asset base (network) that can be used to generate returns over an extended period of time.*"

725. Therefore, Mr. Wright of Analysys used the DCF to determine the value of KaR-Tel as of two alternative valuation dates, namely April 23, 2002 (the date of expulsion of Claimants from KaR-Tel) and October 30, 2003 (the date of the unappealable decision of Respondent's Supreme Court ordering the compulsory redemption of Claimants' shares).

726. Respondent's damage expert, Mr. Kaczmarek of Navigant Consulting, did not dispute that the DCF approach is a traditional method for valuing companies. He argued only that the DCF approach was inapplicable in the instant case because, in his view, KaR-Tel was insolvent and could thus not be treated as a going concern as of April 2002. However, Mr. Kaczmarek did not address the question of solvency of KaR-Tel as of October 2003.

727. Claimants further point out that, contrary to Mr. Kaczmarek's opinion, Mr. Wright rightly explained that "*[T]his was never in doubt, that it was a going concern…This was a fully*

operational company…They couldn't fund the financing, or they couldn't repay the Motorola Loan, that is balance sheet insolvent, but they were an ongoing business…."

728. According to Claimants, the facts and circumstances clearly support Mr. Wright's view:

- KaR-Tel was and is a going concern; it continues in active existence today and is a highly profitable company. It would be contrary to the principles of full restitution to reject use of the DCF method on grounds of insolvency when KaR-Tel has not been liquidated, had valuable assets, including one of the two GSM licenses in a large and emerging oil-rich country;
- Motorola could not push KaR-Tel into bankruptcy for so long as the Telsim guarantee remained in place;
- as evidenced in the PWC report, KaR-Tel generated positive EBITDA margins in both 2001 and early 2002;
- although Mr. Wright acknowledged that the restructuring of the debt would restore solvency, he rightly argued that "*it's valuable even before you solved it [the restructuring of the debt], just the knowledge that it can be solved means the thing is valuable, and it is demonstrated when you solve it*;"
- the Vimpelcom transaction for USD 350 million, less than a year following the Supreme Court's valuation of Claimants' shares, gives the Tribunal the benefit of an objective and fully independent valuation. As noted by Analysys, it is simply inconceivable that in a short period of time KaR-Tel's value could increase to that extraordinary extent.

2. Respondent's position

729. According to Respondent, the only loss for which Claimants claim is the *de facto* or indirect expropriation of their shareholding in KaR-Tel. A number of ICSID awards have accepted a measure of compensation based upon fair market value as appropriate for treaty breaches not amounting to expropriation. Moreover:

- the BIT provides that "*compensation shall be equivalent to the real value of the expropriated investment*;"
- Article 7(2) of the FIL, on which Claimants rely, provides that compensation shall be equivalent to the fair market value of the asset expropriated;
- the Kuwait-Kazakhstan BIT specifies that compensation shall be assessed "*in accordance with internationally recognized principles of valuation on the basis of the fair market value*."

730. Therefore, according to Respondent, the standard of compensation should be assessed by reference to internationally recognized principles of valuation on the basis of the fair market value. The best statement of the internationally recognized principles referred to are the World Bank Guidelines of 1992. These provide that "*without implying the exclusive validity of a single standard for the fairness by which compensation is to be determined and as an illustration of the reasonable determination by a State of the market value of the investment…, such determination will be deemed reasonable if conducted as follows: for a going concern with a proven record of profitability on the basis of the discounted cash flow value (DCF); for an enterprise which, not being a proven going concern demonstrates lack of profitability, on the basis of the liquidation value.*"

731. According to Respondent, there can be no doubt that KaR-Tel was heavily insolvent in April 2002. The Navigant Report is clear that KaR-Tel satisfied each of the possible tests for insolvency. In addition:

- KaR-Tel had missed nearly all of the targets in its own business plan;
- the total equity investment made had only been USD 10,000;
- KaR-Tel had dramatically underinvested in capital equipment in particular;
- KaR-Tel had never made a profit;
- KaR-Tel was increasingly underperforming its only rival, K-Cell;
- KaR-Tel had been capitalized using short-term debt, on which it was in default.

732. Deloitte & Touche's auditor's statement dated July 15, 2002 was unambiguous: "*there is substantial doubt that the Company will be able to continue as a going concern.*" Even Mr. Wright from Analysys accepted in cross-examination that KaR-Tel was balance sheet insolvent.

733. The best Claimants can do is say that it is not correct to say that KaR-Tel was insolvent since it did in fact continue to survive and eventually prosper. That, however, only serves to highlight precisely why using hindsight is inappropriate. No one looking at KaR-Tel as it stood in April 2002 would have thought that it had a realistic chance of survival.

734. Accordingly, Respondent alleges that, in the present case, as confirmed by the Navigant Consulting Report, the best approach is liquidation value. However, even if KaR-Tel is valued as a going concern, the Navigant Report confirms that KaR-Tel's shares were worthless in April 2002.

735. Respondent further alleges that damages reflecting lost profits or future earnings are only recoverable where the entity is a going concern with a history of actual operations. In April 2002, KaR-Tel was not a going concern in any sense of the word. It was clearly insolvent.

736. In the same vein, it is Respondent's position that arbitral tribunals do not accept claims for speculative, uncertain or contingent damages. Indeed, in cases where lost profits have been awarded, this measure has been based upon a long history of operations. In the present circumstances, KaR-Tel's financial status in April 2002 was such that any assessment of lost profits would be speculative and uncertain in the extreme.

C. The valuation date

1. Claimants' position

737. Claimants point out that with respect to unlawful expropriation, the relevant date for purposes of assessing damages is respectively defined by the BIT and the FIL as the moment "*before the expropriatory action was taken or became known*" and "*the moment when the investor learnt of the expropriation*." However, neither provides any guidelines

as to how such date of expropriation should be ascertained. In case of creeping expropriation such as this one, the precise date of expropriation is difficult to ascertain since various events can be deemed expropriatory in nature. Arbitral tribunals have considered that, in cases of creeping expropriation, the date of expropriation is not necessarily the date of the first or of the last expropriatory event, but can be any point in time within that range when the owner has been irreversibly deprived of its property. The exact date on which this moment is deemed to have occurred is left to the discretion of the Arbitral Tribunal.

738. According to Claimants, the moment of valuation should be, as pointed out by Messrs. Reisman and Sloane, "*the date on which assessing the fair market value of a foreign investment for purposes of calculating compensation will enable a tribunal to give full effect to the principle of full reparation.*"[78] This is the approach that was retained in the *ADC* case, where the tribunal, confronted to a case where the value of the investment after the date of expropriation had risen considerably held that the application of the *Chorzow Factory* standard required that the "*date of valuation should be the date of the Award and not the date of expropriation, since this is what is necessary to put the Claimants in the same position as if the expropriation had not been committed*."[79]

739. Moreover, arbitral tribunals, as in *Amco II,* have held that, since the purpose of the compensation is full restitution, it is neither necessary nor appropriate to exclude from consideration in value calculations information which became available after the date of expropriation.[80]

740. Claimants point out that the same approach is applicable to calculate damages for non-expropriatory breaches.

[79] *ADC*, Award of October 2, 2006, paras. 484-494.

[80] *Amco II*, Award in the Resubmitted Case of June 5, 1990.

741. Claimants therefore instructed Analysys to determine the value of Claimants' investment at two different moments in the timeline of Respondent's creeping expropriation: (1) on April 23, 2002, when Claimants were physically ousted from KaR-Tel by Respondent's enforcement authorities and on the basis of an injunction issued by Respondent's Courts and were never permitted to return, such that their investment was *de facto* expropriated on such date; and (2) on October 30, 2003, when the final and unappealable decision of Kazakhstan Supreme Court effectuated the compulsory sale of Claimants' shares for a price of only USD 3,000, thereby irreversibly depriving Claimants of their investment.

2. Respondent's position

742. According to Respondent, the only possible relevant date for valuation should be 23 April 2002. As decided in the *Chorzow Factory* case, the reparations should, insofar as possible, place claimant in the position in which it would have been had the expropriation not occurred. The appropriate date for valuation of Claimants' shareholding in KaR-Tel would, therefore, be as at April 2002. Indeed, April 2002 was the last time that Claimants or their appointees played any role in KaR-Tel. From that point onwards, Claimants did not invest or otherwise provide any funding to KaR-Tel, nor did they or their appointees participate in any way in the operations of KaR-Tel. If, therefore, as Claimants allege, the injunction marked the beginning of the continuum of expropriation, this makes April 23, 2002 the most appropriate date for valuation purposes.

743. Respondent notes that Claimants refer to the approach taken by the *ADC* tribunal which adopted the date of the award as the valuation date. However, Respondent draws the Tribunal's attention to the very different circumstances leading to the adoption of that approach:

- the ADC tribunal itself referred to the unique nature of the case;
- the claimant in the ADC case had a contract with the host government itself for the provision of airport management services;
- by the time of the expropriation, that contract had been in operation for six years and had been very successful financially;

- had the benefit of the contract not been expropriated, the claimant would not have had to implement significant changes to its operations;
- the claim for lost profits was therefore reasonably certain;
- the only way in which the claimant could be put into the position it would have been without the expropriation, was to award the lost profits.

744. According to Respondent, *ADC* was therefore a case concerning the award of lost profits and it relied upon the same principles, especially that of a "*going concern*." Respondent alleges that the contrast with the facts of this arbitration could not be more pronounced since KaR-Tel failed to make any profit in its first four years, was insolvent and it is only as a result of Mr. Yerimbetov's management skills and change of direction that KaR-Tel eventually became successful.

D. <u>Causation</u>

745. According to Claimants, Respondent's wrongful conduct in breach of the Bilateral Investment Treaty and of international law has resulted in the total loss of Claimants' considerable investment. The causal nexus between the wrongful acts and the damage is obvious. This is because it is the unlawful termination of the Investment Contract that triggered and served as the justification for the process that ultimately led to the expropriation of Claimants' 60% shares in KaR-Tel by Respondent as it is on the termination of the Investment Contract that the local partner and Respondent's judiciary relied to evict Claimants.

746. According to Respondent, the principles governing international law require the wrongdoer to compensate the victim for the loss it has suffered which was directly caused by the wrongful acts. In other words, if the Tribunal finds Respondent liable to make reparations to Claimants, such reparations may only extend to that which is necessary to compensate Claimants for losses directly caused by the international wrong attributed to Respondent.

747. In this respect, Respondent submits that if the Tribunal were to find that the cancellation of the Investment Contract was procedurally unlawful, or even substantively unlawful, this would not have caused any loss to Claimants.

748. Indeed, even if there had been no procedural irregularities – and Respondent alleges that there were none – the Investment Committee would still have cancelled the Investment Contract. Even if some procedural irregularities were established, they could not have had any effect on the termination of the Investment Contract. It is the cancellation of the Contract, not the alleged procedural irregularities, which is the proximate cause of Claimants' loss.

749. Even if the Tribunal were to find that the Investment Contract ought to have been suspended prior to its cancellation, that did not cause Claimants any loss. Indeed, it would not have been possible for KaR-Tel, under Claimants' control, to remedy the multiple breaches of the Investment Contract's terms even if there had been a suspension.

750. Claimants' reliance upon the *Amco II* award as support for its position that procedural defects can make a substantively valid cancellation unlawful in international law, is unjustified. According to Respondent:

- the facts of both cases are different;
- the Amco award is not binding upon the Tribunal;
- it conflicts on this issue with all the leading authorities including the International Court of Justice.

751. Consequently, it is Respondent's position that if the Tribunal finds either that the cancellation of the Investment Contract was substantively valid or that other valid substantive grounds for its cancellation existed, the causal nexus between the alleged procedural defects and the losses allegedly suffered would not be present. From the moment the cancellation was the ultimate cause of the compulsory redemption of Claimants' shares, the loss suffered by Claimants has not been caused by a wrongful act of Respondent, which, therefore, does not have to make any reparation.

III. CALCULATION OF DAMAGES AND QUANTUM

1. Claimants' position

a) The position developed in Claimants' Memorials

752. According to Claimants, the market value upon which the compensation should be based should be ascertained against the background of the existing contemporaneous evidence, namely the sale by Telecom Invest in September 2004 of 100% of KaR-Tel to VimpelCom for the sum of USD 350 million.

753. In this regard, Claimants dispute Respondent's allegation that this sale price was achieved only as a result of two years of Mr. Yerimbetov's "*considerable efforts*" and that KaR-Tel was allegedly insolvent at the time that Claimants were ousted in April 2002.

754. Claimants submit that:

- KaR-Tel was not insolvent. It was not generating large profits in the short term, like most telecommunications companies, but this fact alone cannot serve as a basis to conclude that KaR-Tel was insolvent, particularly with KaR-Tel holding the second GSM license ever issued in Kazakhstan, with over 138,000 subscribers and a national network;
- rather, at the time Claimants were ousted, KaR-Tel was worth several hundreds of millions of dollars;
- in any event, no evidence is – or can be – adduced that KaR-Tel's management at the time would not have undertaken its own restructuring of KaR-Tel and further increased the value of the company. In fact, any other investor to which Claimants could have sold their investment at the time would have provided similar, if not more, considerable "*efforts*." Had the company not been expropriated nor consequently been subject to Rumeli's and Telsim's claims, there is no reason why KaR-Tel could not have been sold for more than USD 350 million in 2003.

755. According to Claimants, based on the elements identified and detailed in its report, Analysys first established a "*Base Case*" evaluation of KaR-Tel as of April 23, 2002, which consisted of two elements: (1) the Net Present Value ("*NPV*") of KaR-Tel over the period of 2002-2013 equal to over USD 345 million; and (2) the Terminal Value ("*TV*") of KaR-Tel – which takes into account revenues and costs generated upon the renewal of the License – equal to over USD 221 million. The Base Case value of 100% of KaR-Tel is thus approximately USD 567 million, with Claimants' combined 60% stake in KaR-Tel being valued at USD 340 million.

756. Claimants further note that Analysys took into account "*certain market data…that would not have been available in 2002, namely the actual penetration rates for mobile telephony in Kazakhstan between 2002 and 2006"* so as to ensure the "*maximum accuracy of the model in establishing a valuation that reflects the likely impact of actual market developments and market events."*

757. According to Claimants, to ensure the comprehensiveness of its Report, Analysys made an alternative calculation, on the basis of information that was known and predicted in 2002. The effect of this scenario is to reduce the NPV by USD 151 million and the TV by USD 85 million, resulting in a total valuation of USD 331 million, and of approximately USD 199 million for Claimants' combined 60% stake in KaR-Tel. However, it is Claimants' position that the Tribunal should not rely on this more conservative approach to the detriment of a more accurate approach based on actual market developments and relevant market events.

758. Taking into consideration the date of October 30, 2003 for the valuation, Analysys has estimated that the NPV would have increased by USD 131 million and the TV by USD 66 million, for a total valuation of KaR-Tel of USD 763 million. Claimants' stake therein is thus valued at approximately USD 458 million.

759. Consequently, Claimants consider that they are entitled to USD 458 million, corresponding to the value of their stake on October 30, 2003, and alternatively, that they

are entitled to an amount of USD 340 million, corresponding to the value of their stake on April 23, 2002.

b) The position developed in Claimants' Post-Hearing Memorial

760. In their Post-Hearing Memorial, Claimants point out that, as discussed at the hearing, Analysys had to revise its initial model. In developing its "*Base Case*" DCF Model, Analysys collected and verified public forecasts of mobile subscribers in Kazakhstan to forecast the addressable market. It then developed forecasts of Average Revenue Per User (ARPU) based on income distribution, GDP growth, and reported market ARPU's.

761. According to Claimants, Analysys had to revise its initial model because a key input relating to ARPU in the model had been misleadingly identified by Vimpelcom in its 2005 Annual Report. Upon reading Vimpelcom's 2006 Annual Report, which was not available at the time Analysys'model was first constructed, Analysys realized that Vimpelcom was including interconnect revenues in what was defined as "*services revenues*," although this had not been identified in Vimpelcom's earlier definition of "*service revenues*." Analysys thus reran its model to take this difference into account.

762. Analysys' methodology is described in more detail in Analysys' quantum opinion of February 26, 2007 and in Analysys' PowerPoint presentation of October 26, 2007. In this respect, Claimants point out that the entire amount of the outstanding Motorola Loan was fully accounted for in Analysys' model, and was deducted from the value of KaR-Tel and by consequence from the value of Claimants' 60% shares in KaR-Tel.

763. On the basis of this DCF methodology, Analysys concluded that the real value of Claimants' 60% stake in KaR-Tel under the "*Base Case*" scenario was USD 162,000,000 on April 23, 2002 and was USD 227,000,000 on October 30, 2003.

764. Contrary to Respondent's allegation, it is Claimants' position that, in this valuation, it is legitimate to take into account the development occurring in the market and the business after the date of the expropriation. Indeed, Claimants' investments could have benefited

from the expanding Kazakhstan telecom market. To ignore what actually happened in the Kazakhstan telecom market would not reestablish the situation which would have existed, had Respondent's expropriation not been committed.

765. Nevertheless, for the benefit of the Tribunal, if it were to rule that no data subsequent to Respondent's expropriation should be used to calculate the "*real value*" of Claimants' losses, Analysys has run further scenarios based on forecasts from 2002/2003, *i.e.*, contemporary forecasts that underestimated actual growth in the Kazakh mobile communications market. Without using any hindsight, and ignoring the actual growth in the Kazakh mobile communications market, Analysys has determined that Claimants' 60% stake in KaR-Tel should be valued at USD 111,000,000 (without 3G investments) or USD 54,600,000 (with 3G investments), respectively, on April 23, 2002.

766. On the final day of the hearing, the Tribunal requested that Analysys provide further valuations of KaR-Tel based on the assumption that the licenses would terminate in 2013 and not be extended (so that no terminal value should be accounted for in the model). Analysys' expert immediately noted that "*I don't know any cases where there hasn't been continuity beyond the end of a license.*" The presumption used in valuating telecom companies is that there would be a renewal of the license. This is further confirmed by the fact that there are renewal provisions contained in KaR-Tel's GSM license. Claimants thus strongly object to the valuation of KaR-Tel based on the assumption that the license would not be renewed.

767. Nevertheless, on October 30, 2007, Analysys provided the breakdown requested by the Tribunal of the valuation of KaR-Tel based on the non-renewal of the license.[81] Analysys noted that, in reality, there would always be a terminal value since "*we would expect KaR-Tel to derive some value from the assets and from selling the subscriber contracts to another operator.*" Analysys added that in this scenario, the cost item for the purchase of a 3G spectrum in 2010 should be removed from the model, since the company would have bought a 3G spectrum only if it knew it had continuity.

---

[81] *See* Exhibit 30 to the Analysys' Quantum Opinion.

768. In any case, Claimants allege that Analysys' original "*Base Case*" scenario most accurately reflects the real value as specified in Article III of the Bilateral Investment Treaty. Based on the foregoing, Claimants are entitled to compensation of USD 227,000,000 corresponding to the real value of their 60% stake in KaR-Tel as of October 30, 2003. Alternatively, Claimants take the position that they are entitled to the amount of USD 162,000,000 corresponding to the real value of their 60% stake in KaR-Tel as of April 23, 2002.

769. As for the interest, the most appropriate standard which will satisfactorily compensate Claimants is the 6 month average LIBOR plus 2 per cent per year for each year during which amounts are owed. Interest should be compounded semi-annually as reflected by the recent practice of ICSID tribunals. Finally, interest should start running at the date of the expropriation until payment of the award.

2. Respondent's position

770. For their valuation, Claimants rely on the difference between the compensation awarded to them by the Presidium of the Supreme Court and the price paid by VimpelCom. However, the difference between the two numbers is easy to explain:

- the Presidium was valuing 60% and not 100% of the shares;
- the Presidium was valuing KaR-Tel as of April 2002 whereas Vimpelcom did bid for KaR-Tel in August 2004;
- the Presidium was bound by the formula agreed by Claimants and Telecom Invest in KaR-Tel's Foundation Agreement;
- the Presidium made its valuation on the basis of a number of independent expert audit reports, all but one of which concluded that KaR-Tel was insolvent, whereas VimpelCom was bidding for a company with significantly lower debt levels, profitable operations, four times the number of subscribers and a great deal of new equipment;
- the Navigant Report demonstrates that the Presidium's valuation of KaR-Tel and VimpelCom's implicit valuation are in fact entirely compatible.

771. According to Respondent, it is untenable to suggest, as Claimants do, that no evidence is adduced that KaR-Tel's management at the time would not have undertaken its own restructuring of KaR-Tel and further increased the value of the company. Indeed, by April 2002, Claimants had been in control of KaR-Tel's management for four years and during that period:

- they had saddled KaR-Tel with over USD 100 million of debt to Motorola alone;
- KaR-Tel did not make a single payment towards the Motorola Loan;
- Motorola had begun to threaten KaR-Tel with legal proceedings;
- between 1999 and 2001, KaR-Tel had been unprofitable;
- notwithstanding this situation, Claimants did not show any willingness to inject any equity into KaR-Tel;
- Motorola had filed fraud and racketeering claims in the New York Courts against Claimants' owners;
- there was no possibility open to Claimants to renegotiate the Motorola Loan since Motorola would not accept to discuss any settlement of its claim until the Uzans were no longer involved in KaR-Tel;
- ultimately, whether or not some other party could have achieved the same results is irrelevant from a valuation standpoint since, as Mr. Kaczmarek of Navigant pointed out in his testimony, it does not alter the fact that no external investor would have paid more than an extremely token amount for the equity in KaR-Tel at that time. Any investor proposing to come into the business would have had to either pay off Motorola or put sufficient funds into KaR-Tel to enable it to do it itself. No rational investor would do either of those things without demanding the issue of new shares for that equity, which would have left the existing shareholders diluted so that they owned less than 1% of the company.

772. Claimants also miss the point when they allege that KaR-Tel was not insolvent in April 2002 because it is not uncommon for mobile telecom operators to generate losses during the early years of operations. Indeed, KaR-Tel's insolvency was not directly tied to its

ability to generate profits. It was insolvent because it had failed to make a single payment of interest or principal on the Motorola Loan.

773. Moreover, according to Respondent, Claimants' statement that "*it is not uncommon for mobile telecom operators to generate losses during the early years of operations*" must be compared against the performance of KaR-Tel's only competitor in the Kazakh market, K-Cell. They received their licenses within a month of each other. However, as early as 2001, K-Cell was generating short-term profits. The comparison with K-Cell is illustrative of the fact that Claimants appear to have viewed KaR-Tel simply as another vehicle for their worldwide fraud.

774. Respondent further considers that the Report prepared by Analysys and submitted on behalf of Claimants is unreliable. There are two indicators which reveal immediately that the Analysys valuation is incorrect:

- Analysys' s April 2002 valuation gives an enterprise value per subscriber (EVPS) of over USD 4,450, whereas the enterprise value per subscriber for comparable companies at the same time was between USD 500 and USD 600;
- Analysys's valuation of KaR-Tel as of September 2004 (USD 928 million) is almost three times the value paid by VimpelCom at the time (USD 350 million).

775. Claimants' counsel opened the hearing before the Tribunal on the basis of the figures in the Analysys Report. It was extraordinary, therefore, when, in the middle of the hearing, Analysys informed Respondent that they had got it dramatically wrong. In fact, Analysys provided new figures which reduced their valuations by 50%. If, as is its usual role, Analysys had been advising a company on the purchase of KaR-Tel, that company would have paid more than the double of what Analysys now believes the company to have been worth.

776. Further, Respondent alleges that what is particularly troubling is the lateness of this admission. Analysys has had Navigant's Report since May 2007, which made clear that there must have been a significant error by Analysys.

777. Moreover, the new valuation by Analysys is still hopelessly overstated. It continues to fail to treat KaR-Tel as insolvent, which means its entire report adopts the wrong methodology, applying a valuation method for solvent companies to an insolvent company.

778. Respondent further submits that it is unacceptable as a matter of valuation theory, to use historical data when producing a fair market valuation. Only knowledge and expectations at the time are relevant. And in this context, in 2002, no analyst or investor appears to have foreseen the exponential growth that would occur in the Kazakh mobile telephony market between 2002 and 2006.

779. According to Respondent, the reason why Claimants have sought to rely on a different basis than fair market value is that fair market valuations are not permitted to rely on hindsight and must value the investment on the basis of the information that was known to the market at the relevant time. In April 2002, which is the appropriate time for valuation, it is quite clear that the market did not expect the growth in Kazakhstan mobile telephony which in fact occurred. Analysys acknowledged contemporaneous forecasts were not available for Kazakhstan in 2002. Moreover, a review of Analysys' own exhibit containing contemporaneous forecasts of mobile penetration for comparable countries in Central Asia and East Europe confirms that there is compelling evidence that the mobile markets in all these countries grew much faster than was forecast in 2002.

780. According to Respondent, the Tribunal should take into account the following:

- the BIT itself provides that "*compensation shall be equivalent to the real value of the expropriated investment before the expropriatory action was taken.*" This implicitly recognizes that what is to be valuated is the investment as it stood in April 2002, not what somenone in 2007 would pay for it if they could go back in time with subsequent knowledge;
- Analysys have not disclosed any authority for the proposition that real value means something different from fair market value and that it permits the use of hindsight in valuation. Navigant have, on the contrary, provided the Tribunal

with a wide range of ICSID awards demonstrating that fair market value is the appropriate standard and that it is not permissible to use hindsight in arriving at a fair market valuation.

781. Respondent finally alleges that further evidence that even Analysys' second attempt at a valuation is inaccurate is provided by a comparison of the actual data we now know for KaR-Tel with the figures that their model generates. As Navigant Slide 60 demonstrates, Analysys' net income figures for KaR-Tel for 2005 and 2006 are, respectively, 12 times and almost 5 times higher than the actual results posted by KaR-Tel – differences of over USD 25 million and over USD 70 million respectively.

782. The clearest way to see the absurdity of Analysys' figures is to do the arithmetic. In the course of his evidence to the Tribunal, Mr. Wright was asked about the fact that even his revised calculations led to a notional enterprise value per subscriber for KaR-Tel of USD 2,554.4 which looked rather high compared with the average actual enterprise value per subscriber of USD 746 achieved on the sale of KaR-Tel's only rival K-Cell in February 2002. Mr. Wright maintained that his figures were correct and were unsurprising. He stated that the disparity was explained by the fact that less developed mobile phone operators with smaller subscriber numbers were "*earlier in the curve*" so attracted a greater EVPS than more established operators like K-Cell. According to Respondent, these arguments are hopeless. The effect of Mr. Wright's evidence is that an informed buyer in April 2002 would have paid more for KaR-Tel than for K-Cell.

783. According to Respondent, its Navigant Report is to be preferred. It concludes that the fair market value of KaR-Tel was zero, even if it is evaluated on a going concern perspective.

784. Therefore, Claimants are not able to make out their case for the damages they claim. Respondent submits that the Tribunal should not award them a different or lesser sum.

IV. DECISION OF THE ARBITRAL TRIBUNAL

A. The principles of compensation

785. For expropriation, Article III of the BIT provides that "(c)ompensation shall be equivalent to the real value of the expropriated investment before the expropriatory action was taken or became known." Article 7(2) of the FIL provides that "(t)he compensation must be equal to the fair market value of the expropriated investments at the moment when the investor learnt of the expropriation."

786. The expression "fair market value" may in certain contexts have a specific technical meaning for the valuation of assets. In the context of the FIL, however, the expression must be taken to have a non-technical meaning and to convey a measure of value which can be applied whether or not a "fair market value" in a technical sense can be ascertained in the particular case. For present purposes, the Tribunal considers that no relevant distinction can be drawn between the expressions "real value" and "fair market value." The Tribunal should apply the method or methods of valuation which will most closely reflect the value of the expropriated investment to the investor at the relevant time.

787. Under Article 7(2) of the FIL the relevant time, i.e. the moment when the investor learnt of the expropriation, must necessarily be later than the expropriation itself. Article III of the BIT, on the other hand, does not indicate whether the Tribunal should apply the moment before the expropriatory action was taken, or the moment when it became known. For present purposes, the Tribunal considers that it can treat both moments as having occurred at the same time, since every step in the events leading up to the decision of the Presidium of the Supreme Court was known at once or almost at once to Claimants.

788. The moment at which the expropriation took place is not to be determined by any principle of international law, but is a question of fact to be determined by the Tribunal in the particular circumstances of the case. In some cases the moment of expropriation may be clearly established by a single expropriatory act. In other cases, such as the present

case, the expropriation may be gradual or "creeping," or it may be indirect rather than direct, so that to determine the moment of expropriation may be a matter of judgment rather than of direct and clear evidence. Given that both the BIT and the FIL refer, in similar language, to the moment when the expropriation became known to the investor, the Tribunal may legitimately have regard to the question whether any initial expropriatory act was known to be irrevocable, or whether there remained any possibility that it might be reversed.

789. For claims for breaches other than expropriation, neither the BIT nor the FIL offer any guidance for evaluating the damages arising from such breaches. Under Article 1 of the ILC Articles, every 'internationally wrongful act' of a State entails the 'international responsibility' of that State. An 'internationally wrongful act' is defined under Article 2 as an act which is (i) attributable to the State under international law and (ii) a breach of an international obligation of the State.

790. Under Article 28 of the ILC Articles, the international responsibility of a State which is entailed by an internationally wrongful act involves the legal consequences set out in part II of the ILC Articles. These include, under Article 32 (Reparation), an obligation to make "*full reparation for the injury caused by the internationally wrongful act.*" Injury is defined as including "*any damage, whether material or moral, caused by the internationally wrongful act*." Article 34 sets out the three forms of reparation which may be claimed individually or in combination: (i) restitution; (ii) compensation; (iii) satisfaction.

791. Under Article 36, when restitution cannot be made, as in the present case, the State is under an obligation to compensate for the damage caused. Such compensation is to cover "*any financially assessable damage including the loss of profits insofar as it is established*."

792. In assessing compensation for internationally wrongful acts other than expropriation, the Tribunal considers that it should apply the principle of the *Factory at Chorzow* case, according to which any award should "as far as possible wipe out all the consequences of

the illegal act and reestablish the situation which would in all probability have existed if that act had not been committed."[82]

793. In the present case, the loss which Claimants maintain that they have suffered is in fact the expropriation of their shares in Kar-Tel, whether or not this is characterised as an expropriation calling for compensation under the BIT, or merely as the consequence of some other internationally wrongful act, such as a breach of the obligation of fair and equitable treatment. In either case, the Tribunal considers that the correct approach is to award such compensation as will give back to Claimants the value to them of their shares at the time when the expropriation took place. This requires the Tribunal to take account only of the value which the shares would probably have had in the hands of Claimants if the shares had not been expropriated, and therefore to leave out of account any increase (or decrease) in the value of the shares which Claimants would probably not have enjoyed (or suffered) if the shares had remained in their hands.

B. <u>The calculation of the compensation and its amount</u>

794. As the Tribunal has just stated, it considers that, regardless of the nature of the breach which has been established, the correct approach in this case is to award such compensation as will give back to Claimants the value to them of their shares at the time when the expropriation took place.

795. The valuation date was a matter of controversy between the parties. Respondent maintained that the expropriation took place on April 23, 2002, which was the date of the injunction which excluded Claimants from the premises of Kar-Tel and was the last date on which Claimants played any part in the operations of Kar-Tel. Claimants on the other hand maintain that the expropriation did not take place until October 30, 2003, the date of the decision of the Presidium ordering the compulsory redemption of Claimants' shares. Having regard to what is said in paragraph 768, the Tribunal considers that it is appropriate to take into account the fact that until the unappealable decision of the Presidium on October 30, 2003 it could not reasonably be known by Claimants that their

[82] *Chorzów Factory,* 1928 PCIJ, Series A No. 17, p. 47.

exclusion from the premises of Kar-Tel would irrevocably lead to the loss of their shares. The injunction was challenged by Claimants, and did not become irrevocable until the decision of the Presidium in August 2002. Even then, the shares themselves remained in the ownership of Claimants, and the injunction could and would have been reversed if Claimants had succeeded on the merits by defeating the claim for compulsory redemption. It was not until June 6, 2003 that an order was made by the Almaty City Court for the compulsory redemption of the shares. That decision was also challenged on appeal, and it did not become irreversible until the decision of the Presidium on October 30, 2003.

796. The Tribunal considers that at no time until that date could it be said that there had been, to the knowledge of Claimants, an expropriation which had taken definite and irrevocable effect. The fact that successive decisions of the lower court were appealed to the Supreme Court is cogent evidence that Claimants considered that there was at least some prospect that they might retain their shares and resume control of the operations of Kar-Tel. For these reasons the Tribunal considers that it should assess the value of the shares to Claimants at October 30, 2003, and not at any earlier date.

797. The Tribunal has given consideration to the question whether the valuation of the shares by the Presidium is relevant or even conclusive as to the value of the shares to the Claimant. In the Tribunal's opinion, this valuation is neither relevant nor conclusive, for two reasons. First, to the extent that the decision of the courts that the shares should be compulsorily redeemed resulted from the internationally wrongful acts of the Investment Committee, the task of the Tribunal is to make an award which will restore Claimants to the position which would probably have prevailed if those wrongful acts had not taken place. That involves assuming a hypothetical state of affairs, in which the train of events which led to the valuation by the Presidium would not have taken place. That valuation is irrelevant to the hypothesis on which the Tribunal must make its own award, because on that hypothesis the valuation would not have occurred, and should not have occurred. Second, to the extent that the Tribunal determines that this was a case of expropriation requiring compensation under the BIT, it is axiomatic that such compensation must be

assessed by the Tribunal seized of the question whether, *under international law*, the compensation is "prompt, adequate and effective." That is a question which cannot be foreclosed by a decision of the State, including its courts, even if the decision is unimpeachable under the law of the host State. That is clearly so where as here, the decision of the court of the host State was a decision under the law of that State, and not under international law or under the BIT. In principle, however, the position would be the same even if the Presidium had purported to make its decision as if it were a valuation for the purpose of the BIT and under international law.

798. On the assessment of compensation itself, the discussion above of the respective positions of the parties discloses fundamental disagreements both as to the method of valuation and as to the result. In summary form the differences can be stated as follows.

799. Claimants for their part invite the Tribunal to adopt the DCF method of valuation, which on adjusted figures produces a valuation of Claimants' 60% shareholding, as at October 30, 2003, of USD 227 million. This valuation was based on forecasts of future growth which would have been available at that date (although not on April 23, 2002), so it does not rely on hindsight, which was a criticism made by Respondent of the figures for the earlier date, but only of those figures. Claimants maintain that the figure of USD 227 million compares well with the price paid by Vimpelcom in August 2004, of USD 350 million (of which 60% would have been USD 210 million).

800. Respondent on the other hand maintains that it is wrong in principle to use the DCF method to value a company which is not solvent and is therefore not a going concern, as they maintain was true of Kar-Tel in April 2002 and would have remained true in October 2003 if Claimants had remained in control. They maintain that the DCF method, as applied by Claimants' expert, leads to a valuation which is grossly out of line with the price paid in comparable transactions involving mobile phone licences, and that if the values implicit in those transactions are taken into account, the value of Kar-Tel's licence was insufficient to repay Kar-Tel's indebtedness to Motorola. In other words, Claimants' shares were valueless.

801. The Tribunal has considered in this connection the World Bank Guidelines on the Treatment of Foreign Direct Investment, 1992. Guideline IV contains the following remarks:

> *"3. Compensation will be deemed "adequate" if it is based on the full market value of the taken asset ...*
>
> *5. ... the fair market value will be deemed acceptable if determined by the State according to reasonable criteria related to the market value of the investment, i.e., in an amount that a willing buyer would normally pay to a willing seller after taking into account the nature of the investment, the circumstances in which it would operate in the future and its specific characteristics, including the period in which it would operate in the future and its specific characteristics, including the period in which it has been in existence, the proportion of tangible assets in the total investment and other relevant factors pertinent to the specific circumstances of each case."*

802. The Tribunal notes that this attaches to "fair market value" a meaning which does not presuppose the existence of a market in which investments of the class in question can be freely traded (there being no such market in the present case) but assumes a transaction between a willing buyer and a willing seller. The Tribunal also notes that the Guidelines do not state that there is no other way of arriving at a "fair market value." Nevertheless the Tribunal considers that these sections of the Guidelines set out concisely and accurately the approach to valuation of Claimants' shares which is appropriate in the circumstances of the present case, and that this is so even though the BIT refers to "real value" rather than "fair market value."

803. Section 6 of Guideline IV sets out the following guidelines for determining the market value of an investment:

> *"6. Without implying the exclusive validity of a single standard for the fairness by which compensation is to be determined as an illustration of the reasonable determination by a State of the market value of the investment under Section 5 above, such determination will be deemed reasonable if conducted as follows:*
>
> > *(i) for a going concern with a proven record of profitability, on the basis of the discounted cash flow value;*

> *(ii) for an enterprise which, not being a proven going concern, demonstrates lack of profitability, on the basis of the liquidation value;*
>
> *(iii) for other assets .... [Omitted as not relevant to the present case.]*
>
> *For the purposes of this provision:*
>
> *-a 'going concern' means an enterprise consisting of income producing assets which has been in operation for a sufficient period of time to generate the data required for the calculation of future income and which could have been expected with reasonable certainty, if the taking had not occurred, to continue producing legitimate income over the course of its economic life in the general circumstances following the taking by the State;*
>
> *-'discounted cash flow value' means the cash receipts realistically expected from the enterprise in each future year of its economic life as reasonably projected minus that year's expected cash expenditure, after discounting this net cash flow for each year by a factor which reflects the time value of money, expected inflation, and the risk associated with such cash flow under reasonable circumstances. Such discount may be measured by examining the rate of return available in the same market on alternative investments of comparable risk on the basis of their present value;*
>
> *-'liquidation value' means the amounts at which individual assets comprising the enterprise or the entire assets of the enterprise could be sold under conditions of liquidation to a willing buyer less any liabilities which the enterprise has to meet;*
>
> *[The definitions of 'replacement value' and 'book value' are omitted as not relevant to the present case.]*

804. The Tribunal adopts these provisions of Guideline IV as a valuable starting point for assessing compensation in the present case, while reminding itself (a) that they do not imply the exclusive validity of a single standard, (b) that the guidelines are described as "an illustration" and (c) that the overriding object is to ascertain the "fair market value" as defined in section 5. There is, as the Tribunal is aware, an extensive body of awards and other writings concerning the proper approach to the assessment of compensation for expropriation. In other cases it might be necessary to refer to such writings to resolve

particular issues, but the parties have not invited the Tribunal to embark on such an exercise, and the Tribunal considers that these sections of Guideline IV represent a widely recognised and well respected statement of the modern practice in such matters, which the Tribunal should follow so far as they are appropriate to the circumstances of this case.

805. With these observations in mind the Tribunal turns to consider the fair market value to Claimants of their shares on October 30, 2003. For this purpose the assumption must be made that Claimants had not been removed from the premises of Kar-Tel in April 2002 and that they had remained in continuous control of the operations of Kar-Tel from then until October 30, 2003, and indeed thereafter. On this assumption Respondent maintains that Kar-Tel was not a 'going concern' in April 2002, and that it would not have been a 'going concern' at October 30, 2003 if Claimants had remained in control of its operations.

806. In support of this Respondent relies on the facts set out in paragraph 731, above, as showing that Kar-Tel was insolvent in April 2002. The Tribunal accepts that on the basis of these matters Kar-Tel was probably insolvent at that date, at least as regards its balance sheet. Whether it would likewise have been insolvent as at October 30, 2003 if it had remained in the hands of Claimants is a matter of speculation. No doubt, given the financial strength of Rumeli's affiliate Telsim, funds could have been found to keep Kar-Tel in being and even, if it had proved absolutely unavoidable, to repay the Motorola Loan. Nevertheless the past history of the company under Claimants' management indicates that it would have continued to be starved of funds to make the necessary capital investment to turn the fortunes of the company around, particularly if it had become necessary to repay the Motorola loan. No doubt the fact that Claimants would have provided 100% of the capital but held only 60% of the shares (of which only 15% were held by Telsim) would have been a disincentive to any large scale investment. There is moreover no evidence to suggest the likelihood of any improvement in the quality of the management of Kar-Tel under Claimants' control. The strong likelihood is that its market share would at best have remained static and might even have continued to

shrink, that it would have remained chronically undercapitalised, and that it would have continued to miss its performance targets. It would also have remained under threat from the bankruptcy proceedings begun in Kazakhstan in August 2002.

807. According to Respondent the fact that Kar-Tel did not cease to carry on business was due to the new management brought in after Claimants were removed in April 2002, in the person of Mr. Yerimbetov, who gave evidence at the hearing. Mr. Yerimbetov was able to renegotiate the Motorola Loan down from over USD 100 million to USD 35 million and to borrow the funds necessary to repay the renegotiated amount. But this was not until after October 2003 (in fact in April 2004), and it had no impact on the availability of capital for day to day operations. That was achieved by Mr. Yerimbetov negotiating an allowance of credit from two large banks in the Kazakhstan market in the form of bank guarantees in the amount of USD 25 million. This enabled to buy new up-to date top of the range equipment from Alcatel, and thereby substantially to improve Kar-Tel's network coverage. Mr. Yerimbetov also purchased a new billing platform and re-branded the prepay card system, and he attributed the fact that subscribers increased to over 600,000 people and sales to over USD 100 million a year, to the activities which he described.

808. For the present it is sufficient for the Tribunal to find that if Kar-Tel had remained in the hands of Claimants it is likely that there would have been little or no improvement in its management or its financial position between April 2002 and October 2003, and that the impressive improvement in the fortunes of Kar-Tel after April 2002 would not have taken place.
